MILL

The image shows the front cover of a book. The cover is primarily a deep red color with a fine, pebbled texture. A vertical strip of marbled paper runs down the center, and a diagonal section of marbled paper extends from the top right corner towards the center. The marbling features a complex pattern of swirling, cell-like shapes in shades of red, pink, and cream. The text is printed in a yellow, cursive-style font.

CONSIDERATIONS ON REPRESENTATIVE GOVERNMENT

By John Stuart Mill

CONTENTS

[Preface](#)

[Chapter I](#) To What Extent Forms of Government are a Matter of Choice.

[Chapter II](#) The Criterion of a Good Form of Government.

[Chapter III](#) That the ideally best Form of Government is Representative Government.

[Chapter IV](#) Under what Social Conditions Representative Government is Inapplicable.

[Chapter V](#) Of the Proper Functions of Representative Bodies.

[Chapter VI](#) Of the Infirmities and Dangers to which Representative Government is Liable.

[Chapter VII](#) Of True and False Democracy; Representation of All, and Representation of the Majority only.

[Chapter VIII](#) Of the Extension of the Suffrage.

[Chapter IX](#) Should there be Two Stages of Election?

[Chapter X](#) Of the Mode of Voting.

[Chapter XI](#) Of the Duration of Parliaments.

[Chapter XII](#) Ought Pledges to be Required from Members of Parliament?

[Chapter XIII](#) Of a Second Chamber.

[Chapter XIV](#) Of the Executive in a Representative Government.

[Chapter XV](#) Of Local Representative Bodies.

[Chapter
XVI](#)

Of Nationality, as connected with Representative Government.

[Chapter
XVII](#)

Of Federal Representative Governments.

[Chapter
XVIII](#)

Of the Government of Dependencies by a Free State.

UTILITARIANISM

By John Stuart Mill

CONTENTS

CONTENTS.

CHAPTER I GENERAL REMARKS

CHAPTER II WHAT UTILITARIANISM IS

CHAPTER III OF THE ULTIMATE SANCTION OF THE PRINCIPLE OF UTILITY

CHAPTER IV OF WHAT SORT OF PROOF THE PRINCIPLE OF UTILITY IS SUSCEPTIBLE

CHAPTER V OF THE CONNEXION BETWEEN JUSTICE AND UTILITY

**ESSAYS ON SOME UNSETTLED
QUESTIONS OF POLITICAL
ECONOMY**

By John Stuart Mill

CONTENTS

[PREFACE.](#)

[CONTENTS.](#)

<u>ESSAY I.</u>	Of the Laws of Interchange between Nations; and the Distribution of the Gains of Commerce among the Countries of the Commercial World
<u>ESSAY II.</u>	Of the Influence of Consumption upon Production
<u>ESSAY III.</u>	On the Words Productive and Unproductive
<u>ESSAY IV.</u>	On Profits, and Interest
<u>ESSAY V.</u>	On the Definition of Political Economy; and on the Method of Investigation proper to it

PRINCIPLES OF POLITICAL ECONOMY

By John Stuart Mill

Contents

[Preface.](#)

[Introductory.](#)

[A Sketch Of The History Of Political Economy.](#)

[Books For Consultation \(From English, French, And German Authors\).](#)

[Preliminary Remarks.](#)

[Book I. Production.](#)

[Chapter I. Of The Requisites Of Production.](#)

[§ 1. The requisites of production.](#)

[§ 2. The Second Requisite of Production, Labor.](#)

[§ 3. Of Capital as a Requisite of Production.](#)

[Chapter II. Of Unproductive Labor.](#)

[§ 1. Definition of Productive and Unproductive Labor.](#)

[§ 2. Productive and Unproductive Consumption.](#)

[§ 3. Distinction Between Labor for the Supply of Productive Consumption and Labor for the Supply of Unproductive Consumption.](#)

[Chapter III. Of Capital.](#)

[§ 1. Capital is Wealth Appropriated to Reproductive Employment.](#)

[§ 2. More Capital Devoted to Production than Actually Employed in it.](#)

[§ 3. Examination of Cases Illustrative of the Idea of Capital.](#)

[Chapter IV. Fundamental Propositions Respecting Capital.](#)

[§ 1. Industry is Limited by Capital.](#)

[§ 2. Increase of Capital gives Increased Employment to Labor, Without Assignable Bounds.](#)

[§ 3. Capital is the result of Saving, and all Capital is Consumed.](#)

[§ 4. Capital is kept up by Perpetual Reproduction, as shown by the Recovery of Countries from Devastation.](#)

§ 5. Effects of Defraying Government Expenditure by Loans.

§ 6. Demand for Commodities is not Demand for Labor.

Chapter V. On Circulating And Fixed Capital.

§ 1. Fixed and Circulating Capital.

§ 2. Increase of Fixed Capital, when, at the Expense of Circulating, might be Detrimental to the Laborers.

§ 3. -This seldom, if ever, occurs.

Chapter VI. Of Causes Affecting The Efficiency Of Production.

§ 1. General Causes of Superior Productiveness.

§ 2. Combination and Division of Labor Increase Productiveness.

§ 3. Advantages of Division of Labor.

§ 4. Production on a Large and Production on a Small Scale.

Chapter VII. Of The Law Of The Increase Of Labor.

§ 1. The Law of the Increase of Production Depends on those of Three Elements-Labor, Capital, and Land.

§ 2. The Law of Population.

§ 3. By what Checks the Increase of Population is Practically Limited.

Chapter VIII. Of The Law Of The Increase Of Capital.

§ 1. Means for Saving in the Surplus above Necessaries.

§ 2. Motive for Saving in the Surplus above Necessaries.

§ 3. Examples of Deficiency in the Strength of this Desire.

§ 4. Examples of Excess of this Desire.

Chapter IX. Of The Law Of The Increase Of Production From Land.

§ 1. The Law of Production from the Soil, a Law of Diminishing Return in Proportion to the Increased Application of Labor and Capital.

§ 2. Antagonist Principle to the Law of Diminishing Return; the Progress of Improvements in Production.

§ 3. -In Railways.

§ 4. -In Manufactures.

§ 5. Law Holds True of Mining.

Chapter X. Consequences Of The Foregoing Laws.

§ 1. Remedies for Weakness of the Principle of Accumulation.

§ 2. Even where the Desire to Accumulate is Strong, Population must be Kept within the Limits of Population from Land.

§ 3. Necessity of Restraining Population not superseded by Free Trade in Food.

§ 4. -Nor by Emigration.

Book II. Distribution.

Chapter I. Of Property.

§ 1. Individual Property and its opponents.

§ 2. The case for Communism against private property presented.

§ 3. The Socialists who appeal to state-help.

§ 4. Of various minor schemes, Communistic and Socialistic.

§ 5. The Socialist objections to the present order of Society examined.

§ 6. Property in land different from property in Movables.

Chapter II. Of Wages.

§ 1. Of Competition and Custom.

§ 2. The Wages-fund, and the Objections to it Considered.

§ 3. Examination of some popular Opinions respecting Wages.

§ 4. Certain rare Circumstances excepted, High Wages imply Restraints on Population.

§ 5. Due Restriction of Population the only Safeguard of a Laboring-Class.

Chapter III. Of Remedies For Low Wages.

§ 1. A Legal or Customary Minimum of Wages, with a Guarantee of Employment.

§ 2. -Would Require as a Condition Legal Measures for Repression of Population.

§ 3. Allowances in Aid of Wages and the Standard of Living.

§ 4. Grounds for Expecting Improvement in Public Opinion on the Subject of Population.

§ 5. Twofold means of Elevating the Habits of the Laboring-People; by Education, and by Foreign and Home Colonization.

Chapter IV. Of The Differences Of Wages In Different Employments.

§ 1. Differences of Wages Arising from Different Degrees of Attractiveness in Different Employments.

§ 2. Differences arising from Natural Monopolies.

§ 3. Effect on Wages of the Competition of Persons having other Means of Support.

§ 4. Wages of Women, why Lower than those of Men.

§ 5. Differences of Wages Arising from Laws, Combinations, or Customs.

Chapter V. Of Profits.

§ 1. Profits include Interest and Risk; but, correctly speaking, do not include Wages of Superintendence.

§ 2. The Minimum of Profits; what produces Variations in the Amount of Profits.

§ 3. General Tendency of Profits to an Equality.

§ 4. The Cause of the Existence of any Profit; the Advances of Capitalists consist of Wages of Labor.

§ 5. The Rate of Profit depends on the Cost of Labor.

Chapter VI. Of Rent.

§ 1. Rent the Effect of a Natural Monopoly.

§ 2. No Land can pay Rent except Land of such Quality or Situation as exists in less Quantity than the Demand.

§ 3. The Rent of Land is the Excess of its Return above the Return to the worst Land in Cultivation.

§ 4. -Or to the Capital employed in the least advantageous Circumstances.

§ 5. Opposing Views of the Law of Rent.

§ 6. Rent does not enter into the Cost of Production of Agricultural Produce.

Book III. Exchange.

Chapter I. Of Value.

§ 1. Definitions of Value in Use, Exchange Value, and Price.

§ 2. Conditions of Value: Utility, Difficulty of Attainment, and Transferableness.

§ 3. Commodities limited in Quantity by the law of Demand and Supply: General working of this Law.

§ 4. Miscellaneous Cases falling under this Law.

§ 5. Commodities which are Susceptible of Indefinite Multiplication without Increase of Cost. Law of their Value Cost of Production.

§ 6. The Value of these Commodities confirm, in the long run, to their Cost of Production through the operation of Demand and Supply.

Chapter II. Ultimate Analysis Of Cost Of Production.

§ 1. Of Labor, the principal Element in Cost of Production.

§ 2. Wages affect Values, only if different in different employments; "non-competing groups."

§ 3. Profits an element in Cost of Production.

§ 4. Cost of Production properly represented by sacrifice, or cost, to the Laborer as well as to the Capitalist; the relation of this conception to the Cost of Labor.

§ 5. When profits vary from Employment to Employment, or are spread over unequal lengths of Time, they affect Values accordingly.

§ 6. Occasional Elements in Cost of Production; taxes and ground-rent.

Chapter III. Of Rent, In Its Relation To Value.

§ 1. Commodities which are susceptible of indefinite Multiplication, but not without increase of Cost. Law of their Value, Cost of Production in the most unfavorable existing circumstances.

§ 2. Such commodities, when Produced in circumstances more favorable, yield a Rent equal to the difference of Cost.

§ 3. Rent of Mines and Fisheries and ground-rent of Buildings, and cases of gain analogous to Rent.

§ 4. Résumé of the laws of value of each of the three classes of commodities.

Chapter IV. Of Money.

§ 1. The three functions of Money-a Common Denominator of Value, a Medium of Exchange, a "Standard of Value".

§ 2. Gold and Silver, why fitted for those purposes.

§ 3. Money a mere contrivance for facilitating exchanges, which does not affect the laws of value.

Chapter V. Of The Value Of Money, As Dependent On Demand And Supply.

§ 1. Value of Money, an ambiguous expression.

§ 2. The Value of Money depends on its quantity.

§ 3. -Together with the Rapidity of Circulation.

§ 4. Explanations and Limitations of this Principle.

Chapter VI. Of The Value Of Money, As Dependent On Cost Of Production.

§ 1. The value of Money, in a state of Freedom, conforms to the value of the Bullion contained in it.

§ 2. -Which is determined by the cost of production.

§ 3. This law, how related to the principle laid down in the preceding chapter.

Chapter VII. Of A Double Standard And Subsidiary Coins.

§ 1. Objections to a Double Standard.

§ 2. The use of the two metals as money, and the management of Subsidiary Coins.

§ 3. The experience of the United States with a double standard from 1792 to 1883.

Chapter VIII. Of Credit, As A Substitute For Money.

§ 1. Credit not a creation but a Transfer of the means of Production.

§ 2. In what manner it assists Production.

§ 3. Function of Credit in economizing the use of Money.

§ 4. Bills of Exchange.

§ 5. Promissory Notes.

§ 6. Deposits and Checks.

Chapter IX. Influence Of Credit On Prices.

§ 1. What acts on prices is Credit, in whatever shape given.

§ 2. Credit a purchasing Power, similar to Money.

§ 3. Great extensions and contractions of Credit. Phenomena of a commercial crisis analyzed.

§ 4. Influence of the different forms of Credit on Prices.

§ 5. On what the use of Credit depends.

§ 6. What is essential to the idea of Money?

Chapter X. Of An Inconvertible Paper Currency.

§ 1. What determines the value of an inconvertible paper money?

§ 2. If regulated by the price of Bullion, as inconvertible Currency might be safe, but not Expedient.

§ 3. Examination of the doctrine that an inconvertible Current is safe, if representing actual Property.

§ 4. Experiments with paper Money in the United States.

§ 5. Examination of the gain arising from the increase and issue of paper Currency.

§ 6. Résumé of the subject of money.

Chapter XI. Of Excess Of Supply.

§ 1. The theory of a general Over-Supply of Commodities stated.

§ 2. The supply of commodities in general can not exceed the power of Purchase.

§ 3. There can never be a lack of Demand arising from lack of Desire to Consume.

§ 4. Origin and Explanation of the notion of general Over-Supply.

Chapter XII. Of Some Peculiar Cases Of Value.

§ 1. Values of commodities which have a joint cost of production.

§ 2. Values of the different kinds of agricultural produce.

Chapter XIII. Of International Trade.

§ 1. Cost of Production not a regulator of international values. Extension of the word "international."

§ 2. Interchange of commodities between distance places determined by differences not in their absolute, but in the comparative, costs of production.

§ 3. The direct benefits of commerce consist in increased Efficiency of the productive powers of the World.

§ 4. -Not in a Vent for exports, nor in the gains of Merchants.

§ 5. Indirect benefits of Commerce, Economical and Moral; still greater than the Direct.

Chapter XIV. Of International Values.

§ 1. The values of imported commodities depend on the Terms of international interchange.

§ 2. The values of foreign commodities depend, not upon Cost of Production, but upon Reciprocal Demand and Supply.

§ 3. -As illustrated by trade in cloth and linen between England and Germany.

§ 4. The conclusion states in the Equation of International Demand.

§ 5. The cost to a country of its imports depends not only on the ratio of exchange, but on the efficiency of its labor.

Chapter XV. Of Money Considered As An Imported Commodity.

§ 1. Money imported on two modes; as a Commodity, and as a medium of Exchange.

§ 2. As a commodity, it obeys the same laws of Value as other imported Commodities.

Chapter XVI. Of The Foreign Exchanges.

§ 1. Money passes from country to country as a Medium of Exchange, through the Exchanges.

§ 2. Distinction between Variations in the Exchanges which are self-adjusting and those which can only be rectified through Prices.

Chapter XVII. Of The Distribution Of The Precious Metals Through The Commercial World.

§ 1. The substitution of money for barter makes no difference in exports and imports, nor in the Law of international Values.

§ 2. The preceding Theorem further illustrated.

§ 3. The precious metals, as money, are of the same Value, and distribute themselves according to the same Law, with the precious metals as a Commodity.

§ 4. International payments entering into the "financial account."

Chapter XVIII. Influence Of The Currency On The Exchanges And On Foreign Trade.

§ 1. Variations in the exchange, which originate in the Currency.

§ 2. Effect of a sudden increase of a metallic Currency, or of the sudden creation of Bank-Notes or other substitutes for Money.

§ 3. Effect of the increase of an inconvertible paper Currency. Real and nominal exchange.

Chapter XIX. Of The Rate Of Interest.

§ 1. The Rate of Interest depends on the Demand and Supply of Loans.

§ 2. Circumstances which Determine the Permanent Demand and Supply of Loans.

§ 3. Circumstances which Determine the Fluctuations.

§ 4. The Rate of Interest not really Connected with the value of Money, but often confounded with it.

§ 5. The Rate of Interest determines the price of land and of Securities.

Chapter XX. Of The Competition Of Different Countries In The Same Market.

§ 1. Causes which enable one Country to undersell another.

§ 2. High wages do not prevent one Country from underselling another.

§ 3. Low wages enable a Country to undersell another, when Peculiar to certain branches of Industry.

§ 4. -But not when common to All.

§ 5. Low profits as affecting the carrying Trade.

Chapter XXI. Of Distribution, As Affected By Exchange.

§ 1. Exchange and money make no Difference in the law of Wages.

§ 2. In the law of Rent.

§ 3. -Nor in the law of Profits.

Book IV. Influence Of The Progress Of Society On Production And Distribution.

Chapter I. Influence Of The Progress Of Industry And Population On Values And Prices.

§ 1. Tendency of the progress of society toward increased Command over the powers of Nature; increased Security, and increased Capacity of Co-Operation.

§ 2. Tendency to a Decline of the Value and Cost of Production of all Commodities.

§ 3. -except the products of Agriculture and Mining, which have a tendency to Rise.

§ 4. -that tendency from time to time Counteracted by Improvements in Production.

§ 5. Effect of the Progress of Society in moderating fluctuations of Value.

Chapter II. Influence Of The Progress Of Industry And Population On Rents, Profits, And Wages.

§ 1. Characteristic features of industrial Progress.

§ 2. First two cases, Population and Capital increasing, the arts of production stationary.

§ 3. The arts of production advancing, capital and population stationary.

§ 4. Theoretical results, if all three Elements progressive.

§ 5. Practical Results.

Chapter III. Of The Tendency Of Profits To A Minimum.

§ 1. Different Theories as to the fall of Profits.

§ 2. What determines the minimum rate of Profit?

§ 3. In old and opulent countries, profits habitually near to the minimum.

§ 4. -prevented from reaching it by commercial revulsions.

§ 5. -by improvements in Production.

§ 6. -by the importation of cheap Necessaries and Implements.

§ 7. -by the emigration of Capital.

Chapter IV. Consequences Of The Tendency Of Profits To A Minimum, And The Stationary State.

§ 1. Abstraction of Capital not necessarily a national loss.

§ 2. In opulent countries, the extension of machinery not detrimental but beneficial to Laborers.

§ 3. Stationary state of wealth and population dreaded by some writers, but not in itself undesirable.

Chapter V. On The Possible Futurity Of The Laboring-Classes.

§ 1. The possibility of improvement while Laborers remain merely receivers of Wages.

§ 2. -through small holdings, by which the landlord's gain is shared.

§ 3. -through co-operation, by which the manager's wages are shared.

§ 4. Distributive Co-operation.

§ 5. Productive Co-Operation.

§ 6. Industrial Partnership.

§ 7. People's Banks.

Book V. On The Influence Of Government.

Chapter I. On The General Principles Of Taxation.

§ 1. Four fundamental rules of Taxation.

§ 2. Grounds of the principle of Equality of Taxation.

§ 3. Should the same percentage be levied on all amounts of Income?

§ 4. Should the same percentage be levied on Perpetual and on Terminable Incomes?

§ 5. The increase of the rent of land from natural causes a fit subject of peculiar Taxation.

§ 6. Taxes falling on Capital not necessarily objectionable.

Chapter II. Of Direct Taxes.

§ 1. Direct taxes either on income or expenditure.

§ 2. Taxes on rent.

§ 3. -on profits.

§ 4. -on Wages.

§ 5. -on Income.

§ 6. A House-Tax.

Chapter III. Of Taxes On Commodities, Or Indirect Taxes.

§ 1. A Tax on all commodities would fall on Profits.

§ 2. Taxes on particular commodities fall on the consumer.

§ 3. Peculiar effects of taxes on Necessaries.

§ 4. -how modified by the tendency of profits to a minimum.

§ 5. Effects of discriminating Duties.

§ 6. Effects produced on international Exchange by Duties on Exports and on Imports.

Chapter IV. Comparison Between Direct And Indirect Taxation.

§ 1. Arguments for and against direct Taxation.

§ 2. What forms of indirect taxation are most eligible?

§ 3. Practical rules for indirect taxation.

§ 4. Taxation systems of the United States and other Countries.

§ 5. A *Résumé* of the general principles of taxation.

Chapter V. Of A National Debt.

§ 1. Is it desirable to defray extraordinary public expenses by loans?

§ 2. Not desirable to redeem a national Debt by a general Contribution.

§ 3. In what cases desirable to maintain a surplus revenue for the redemption of Debt.

Chapter VI. Of An Interference Of Government Grounded On Erroneous Theories.

§ 1. The doctrine of Protection to Native Industry.

§ 2. -had its origin in the Mercantile System.

§ 3. -supported by pleas of national subsistence and national defense.

§ 4. -on the ground of encouraging young industries; colonial policy.

§ 5. -on the ground of high wages.

§ 6. -on the ground of creating a diversity of industries.

§ 7. -on the ground that it lowers prices.

Appendix I. Bibliographies.

Appendix II. Examination Questions.

Footnotes

A SYSTEM OF LOGIC RATIOCINATIVE AND INDUCTIVE--VOLUME I.

**BEING A CONNECTED VIEW OF THE PRINCIPLES OF
EVIDENCE AND THE METHODS OF SCIENTIFIC**

INVESTIGATION
IN TWO VOLUMES
VOL. I.
SEVENTH EDITION

By John Stuart Mill

CONTENTS OF THE FIRST VOLUME

INTRODUCTION.

- | | |
|---|-----------|
| § <u>1.</u> A definition at the commencement of a subject must be provisional | <u>1</u> |
| <u>2.</u> Is logic the art and science of reasoning? | <u>2</u> |
| <u>3.</u> Or the art and science of the pursuit of truth? | <u>3</u> |
| <u>4.</u> Logic is concerned with inferences, not with intuitive truths | <u>5</u> |
| <u>5.</u> Relation of logic to the other sciences | <u>8</u> |
| <u>6.</u> Its utility, how shown | <u>10</u> |
| <u>7.</u> Definition of logic stated and illustrated | <u>11</u> |

BOOK I.

OF NAMES AND PROPOSITIONS.

Chapter I. *Of the Necessity of commencing with an Analysis of Language.*

- | | |
|--|-----------|
| § <u>1.</u> Theory of names, why a necessary part of logic | <u>17</u> |
| <u>2.</u> First step in the analysis of Propositions | <u>18</u> |
| <u>3.</u> Names must be studied before Things | <u>21</u> |

Chapter II. *Of Names.*

- | | |
|---|-----------|
| § <u>1.</u> Names are names of things, not of our ideas | <u>23</u> |
| <u>2.</u> Words which are not names, but parts of names | <u>24</u> |
| <u>3.</u> General and Singular names | <u>26</u> |
| <u>4.</u> Concrete and Abstract | <u>29</u> |
| <u>5.</u> Connotative and Non-connotative | <u>31</u> |
| <u>6.</u> Positive and Negative | <u>42</u> |

7. Relative and Absolute	44
8. Univocal and Æquivocal	47
<u>Chapter III.</u> <i>Of the Things denoted by Names.</i>	
§ 1. Necessity of an enumeration of Nameable Things. The Categories of Aristotle	49
2. Ambiguity of the most general names	51
3. Feelings, or states of consciousness	54
4. Feelings must be distinguished from their physical antecedents. Perceptions, what	56
5. Volitions, and Actions, what	58
6. Substance and Attribute	59
7. Body	61
8. Mind	67
9. Qualities	69
10. Relations	72
11. Resemblance	74
12. Quantity	78
13. All attributes of bodies are grounded on states of consciousness	79
14. So also all attributes of mind	80
15. Recapitulation	81
<u>Chapter IV.</u> <i>Of Propositions.</i>	
§ 1. Nature and office of the copula	85
2. Affirmative and Negative propositions	87
3. Simple and Complex	89
4. Universal, Particular, and Singular	93
<u>Chapter V.</u> <i>Of the Import of Propositions.</i>	
§ 1. Doctrine that a proposition is the expression of a relation between two ideas	96
2. Doctrine that it is the expression of a relation between the meanings of two names	99

3. Doctrine that it consists in referring something to, or excluding something from, a class	103
4. What it really is	107
5. It asserts (or denies) a sequence, a coexistence, a simple existence, a causation	110
6. —or a resemblance	112
7. Propositions of which the terms are abstract	115
Chapter VI. <i>Of Propositions merely Verbal.</i>	
§ 1. Essential and Accidental propositions	119
2. All essential propositions are identical propositions	120
3. Individuals have no essences	124
4. Real propositions, how distinguished from verbal	126
5. Two modes of representing the import of a Real proposition	127
Chapter VII. <i>Of the Nature of Classification, and the Five Predicables.</i>	
§ 1. Classification, how connected with Naming	129
2. The Predicables, what	131
3. Genus and Species	131
4. Kinds have a real existence in nature	134
5. Differentia	139
6. Differentiæ for general purposes, and differentiæ for special or technical purposes	141
7. Proprium	144
8. Accidens	146
Chapter VIII. <i>Of Definition.</i>	
§ 1. A definition, what	148
2. Every name can be defined, whose meaning is susceptible of analysis	150
3. Complete, how distinguished from incomplete definitions	152
4. —and from descriptions	154
5. What are called definitions of Things, are definitions of Names with an implied assumption of the existence of	157

Things corresponding to them	
6. —even when such things do not in reality exist	165
7. Definitions, though of names only, must be grounded on knowledge of the corresponding Things	167
BOOK II.	
OF REASONING.	
Chapter I. <i>Of Inference, or Reasoning, in general.</i>	
§ 1. Retrospect of the preceding book	175
2. Inferences improperly so called	177
3. Inferences proper, distinguished into inductions and ratiocinations	181
Chapter II. <i>Of Ratiocination, or Syllogism.</i>	
§ 1. Analysis of the Syllogism	184
2. The <i>dictum de omni</i> not the foundation of reasoning, but a mere identical proposition	191
3. What is the really fundamental axiom of Ratiocination	196
4. The other form of the axiom	199
Chapter III. <i>Of the Functions, and Logical Value, of the Syllogism.</i>	
§ 1. Is the syllogism a <i>petitio principii</i> ?	202
2. Insufficiency of the common theory	203
3. All inference is from particulars to particulars	205
4. General propositions are a record of such inferences, and the rules of the syllogism are rules for the interpretation of the record	214
5. The syllogism not the type of reasoning, but a test of it	218
6. The true type, what	222
7. Relation between Induction and Deduction	226
8. Objections answered	227
9. Of Formal Logic, and its relation to the Logic of Truth	231
Chapter IV. <i>Of Trains of Reasoning, and Deductive Sciences.</i>	
§ 1. For what purpose trains of reasoning exist	234

2.	A train of reasoning is a series of inductive inferences	234
3.	—from particulars to particulars through marks of marks	237
4.	Why there are deductive sciences	240
5.	Why other sciences still remain experimental	244
6.	Experimental sciences may become deductive by the progress of experiment	246
7.	In what manner this usually takes place	247
	<u>Chapter V.</u> <i>Of Demonstration, and Necessary Truths.</i>	
§ 1.	The Theorems of geometry are necessary truths only in the sense of necessarily following from hypotheses	251
2.	Those hypotheses are real facts with some of their circumstances exaggerated or omitted	255
3.	Some of the first principles of geometry are axioms, and these are not hypothetical	256
4.	—but are experimental truths	258
5.	An objection answered	261
6.	Dr. Whewell's opinions on axioms examined	264
	<u>Chapter VI.</u> <i>The same Subject continued.</i>	
§ 1.	All deductive sciences are inductive	281
2.	The propositions of the science of number are not verbal, but generalizations from experience	284
3.	In what sense hypothetical	289
4.	The characteristic property of demonstrative science is to be hypothetical	290
5.	Definition of demonstrative evidence	292
	<u>Chapter VII.</u> <i>Examination of some Opinions opposed to the preceding doctrines.</i>	
§ 1.	Doctrine of the Universal Postulate	294
2.	The test of inconceivability does not represent the aggregate of past experience	296
3.	—nor is implied in every process of thought	299
4.	Sir W. Hamilton's opinion on the Principles of Contradiction and Excluded Middle	306

BOOK III.

OF INDUCTION.

Chapter I. *Preliminary Observations on Induction in general.*

- § 1. Importance of an Inductive Logic 313
- 2. The logic of science is also that of business and life 314

Chapter II. *Of Inductions improperly so called.*

- § 1. Inductions distinguished from verbal transformations 319
- 2. —from inductions, falsely so called, in mathematics 321
- 3. —and from descriptions 323
- 4. Examination of Dr. Whewell's theory of Induction 326
- 5. Further illustration of the preceding remarks 336

Chapter III. *On the Ground of Induction.*

- § 1. Axiom of the uniformity of the course of nature 341
- 2. Not true in every sense. Induction *per enumerationem simplicem* 346
- 3. The question of Inductive Logic stated 348

Chapter IV. *Of Laws of Nature.*

- § 1. The general regularity in nature is a tissue of partial regularities, called laws 351
- 2. Scientific induction must be grounded on previous spontaneous inductions 355
- 3. Are there any inductions fitted to be a test of all others? 357

Chapter V. *Of the Law of Universal Causation.*

- § 1. The universal law of successive phenomena is the Law of Causation 360
- 2. —*i.e.* the law that every consequent has an invariable antecedent 363
- 3. The cause of a phenomenon is the assemblage of its conditions 365
- 4. The distinction of agent and patient illusory 373
- 5. The cause is not the invariable antecedent, but the *unconditional* invariable antecedent 375

<u>6.</u> Can a cause be simultaneous with its effect?	<u>380</u>
<u>7.</u> Idea of a Permanent Cause, or original natural agent	<u>383</u>
<u>8.</u> Uniformities of coexistence between effects of different permanent causes, are not laws	<u>386</u>
<u>9.</u> Doctrine that volition is an efficient cause, examined	<u>387</u>
<u>Chapter VI.</u> <i>Of the Composition of Causes.</i>	
§ <u>1.</u> Two modes of the conjunct action of causes, the mechanical and the chemical	<u>405</u>
<u>2.</u> The composition of causes the general rule; the other case exceptional	<u>408</u>
<u>3.</u> Are effects proportional to their causes?	<u>412</u>
<u>Chapter VII.</u> <i>Of Observation and Experiment.</i>	
§ <u>1.</u> The first step of inductive inquiry is a mental analysis of complex phenomena into their elements	<u>414</u>
<u>2.</u> The next is an actual separation of those elements	<u>416</u>
<u>3.</u> Advantages of experiment over observation	<u>417</u>
<u>4.</u> Advantages of observation over experiment	<u>420</u>
<u>Chapter VIII.</u> <i>Of the Four Methods of Experimental Inquiry.</i>	
§ <u>1.</u> Method of Agreement	<u>425</u>
<u>2.</u> Method of Difference	<u>428</u>
<u>3.</u> Mutual relation of these two methods	<u>429</u>
<u>4.</u> Joint Method of Agreement and Difference	<u>433</u>
<u>5.</u> Method of Residues	<u>436</u>
<u>6.</u> Method of Concomitant Variations	<u>437</u>
<u>7.</u> Limitations of this last method	<u>443</u>
<u>Chapter IX.</u> <i>Miscellaneous Examples of the Four Methods.</i>	
§ <u>1.</u> Liebig's theory of metallic poisons	<u>449</u>
<u>2.</u> Theory of induced electricity	<u>453</u>
<u>3.</u> Dr. Wells' theory of dew	<u>457</u>
<u>4.</u> Dr. Brown-Séquard's theory of cadaveric rigidity	<u>465</u>
<u>5.</u> Examples of the Method of Residues	<u>471</u>

6. Dr. Whewell's objections to the Four Methods	475
<u>Chapter X. Of Plurality of Causes; and of the Intermixture of Effects.</u>	
§ 1. One effect may have several causes	482
2. —which is the source of a characteristic imperfection of the Method of Agreement	483
3. Plurality of Causes, how ascertained	487
4. Concurrence of Causes which do not compound their effects	489
5. Difficulties of the investigation, when causes compound their effects	494
6. Three modes of investigating the laws of complex effects	499
7. The method of simple observation inapplicable	500
8. The purely experimental method inapplicable	501
<u>Chapter XI. Of the Deductive Method.</u>	
§ 1. First stage; ascertainment of the laws of the separate causes by direct induction	507
2. Second stage; ratiocination from the simple laws of the complex cases	512
3. Third stage; verification by specific experience	514
<u>Chapter XII. Of the Explanation of Laws of Nature.</u>	
§ 1. Explanation defined	518
2. First mode of explanation, by resolving the law of a complex effect into the laws of the concurrent causes and the fact of their coexistence	518
3. Second mode; by the detection of an intermediate link in the sequence	519
4. Laws are always resolved into laws more general than themselves	520
5. Third mode; the subsumption of less general laws under a more general one	524
6. What the explanation of a law of nature amounts to	526

Chapter XIII. *Miscellaneous Examples of the Explanation of Laws of Nature.*

§ 1.	The general theories of the sciences	529
2.	Examples from chemical speculations	531
3.	Example from Dr. Brown-Séquad's researches on the nervous system	533
4.	Examples of following newly-discovered laws into their complex manifestations	534
5.	Examples of empirical generalizations, afterwards confirmed and explained deductively	536
6.	Example from mental science	538
7.	Tendency of all the sciences to become deductive	539

**A SYSTEM OF LOGIC
RATIOCINATIVE AND
INDUCTIVE, VOLUME II.**

**BEING A CONNECTED VIEW OF THE PRINCIPLES OF
EVIDENCE AND THE METHODS OF SCIENTIFIC
INVESTIGATION**

By John Stuart Mill

IN TWO VOLUMES

SEVENTH EDITION

CONTENTS OF THE SECOND VOLUME

BOOK III.

ON INDUCTION.—(*Continued.*)

Chapter XIV. *Of the Limits to the Explanation of Laws of Nature; and of Hypotheses.*

- § 1. Can all the sequences in nature be resolvable into one law? 3
- 2. Ultimate laws cannot be less numerous than the distinguishable feelings of our nature 4
- 3. In what sense ultimate facts can be explained 7
- 4. The proper use of scientific hypotheses 8
- 5. Their indispensableness 16
- 6. Legitimate, how distinguished from illegitimate hypotheses 18
- 7. Some inquiries apparently hypothetical are really inductive 25

Chapter XV. *Of Progressive Effects; and of the Continued Action of Causes.*

- § 1. How a progressive effect results from the simple continuance of the cause 29
- 2. —and from the progressiveness of the cause 33
- 3. Derivative laws generated from a single ultimate law 36

Chapter XVI. *Of Empirical Laws.*

- § 1. Definition of an empirical law 38
- 2. Derivative laws commonly depend on collocations 39
- 3. The collocations of the permanent causes are not reducible to any law 41

4.	Hence empirical laws cannot be relied on beyond the limits of actual experience	41
5.	Generalizations which rest only on the Method of Agreement can only be received as empirical laws	43
6.	Signs from which an observed uniformity of sequence may be presumed to be resolvable	44
7.	Two kinds of empirical laws	47
	Chapter XVII. <i>Of Chance, and its Elimination.</i>	
§ 1.	The proof of empirical laws depends on the theory of chance	49
2.	Chance defined and characterized	50
3.	The elimination of chance	55
4.	Discovery of residual phenomena by eliminating chance	57
5.	The doctrine of chances	59
	Chapter XVIII. <i>Of the Calculation of Chances.</i>	
§ 1.	Foundation of the doctrine of chances, as taught by mathematics	61
2.	The doctrine tenable	63
3.	On what foundation it really rests	64
4.	Its ultimate dependence on causation	68
5.	Theorem of the doctrine of chances which relates to the cause of a given event	72
6.	How applicable to the elimination of chance	74
	Chapter XIX. <i>Of the Extension of Derivative Laws to Adjacent Cases.</i>	
§ 1.	Derivative laws, when not casual, are almost always contingent on collocations	78
2.	On what grounds they can be extended to cases beyond the bounds of actual experience	80
3.	Those cases must be adjacent cases	82
	Chapter XX. <i>Of Analogy.</i>	
§ 1.	Various senses of the word analogy	86
2.	Nature of analogical evidence	87
3.	On what circumstances its value depends	91

Chapter XXI. *Of the Evidence of the Law of Universal Causation.*

- § 1. The law of causality does not rest on an instinct 95
- 2. But on an induction by simple enumeration 100
- 3. In what cases such induction is allowable 102
- 4. The universal prevalence of the law of causality, on what grounds admissible 105

Chapter XXII. *Of Uniformities of Coexistence not dependent on Causation.*

- § 1. Uniformities of coexistence which result from laws of sequence 110
- 2. The properties of Kinds are uniformities of coexistence 111
- 3. Some are derivative, others ultimate 113
- 4. No universal axiom of coexistence 114
- 5. The evidence of uniformities of coexistence, how measured 117
- 6. When derivative, their evidence is that of empirical laws 117
- 7. So also when ultimate 119
- 8. The evidence stronger in proportion as the law is more general 120
- 9. Every distinct Kind must be examined 121

Chapter XXIII. *Of Approximate Generalizations, and Probable Evidence.*

- § 1. The inferences called probable, rest on approximate generalizations 124
- 2. Approximate generalizations less useful in science than in life 124
- 3. In what cases they may be resorted to 126
- 4. In what manner proved 127
- 5. With what precautions employed 130
- 6. The two modes of combining probabilities 131
- 7. How approximate generalizations may be converted into accurate generalizations equivalent to them 136

Chapter XXIV. *Of the Remaining Laws of Nature.*

- § 1. Propositions which assert mere existence 139

2.	Resemblance, considered as a subject of science	141
3.	The axioms and theorems of mathematics comprise the principal laws of resemblance	143
4.	—and those of order in place, and rest on induction by simple enumeration	145
5.	The propositions of arithmetic affirm the modes of formation of some given number	146
6.	Those of algebra affirm the equivalence of different modes of formation of numbers generally	151
7.	The propositions of geometry are laws of outward nature	154
8.	Why geometry is almost entirely deductive	156
9.	Function of mathematical truths in the other sciences, and limits of that function	158

[Chapter XXV.](#) *Of the Grounds of Disbelief.*

§ 1.	Improbability and impossibility	161
2.	Examination of Hume's doctrine of miracles	162
3.	The degrees of improbability correspond to differences in the nature of the generalization with which an assertion conflicts	166
4.	A fact is not incredible because the chances are against it	170
5.	Are coincidences less credible than other facts?	172
6.	An opinion of Laplace examined	175

[BOOK IV.](#)

OF OPERATIONS SUBSIDIARY TO INDUCTION.

[Chapter I.](#) *Of Observation and Description.*

§ 1.	Observation, how far a subject of logic	183
2.	A great part of what seems observation is really inference	184
3.	The description of an observation affirms more than is contained in the observation	187
4.	—namely an agreement among phenomena; and the comparison of phenomena to ascertain such agreements is a preliminary to induction	190

[Chapter II.](#) *Of Abstraction, or the Formation of Conceptions.*

§ 1.	The comparison which is a preliminary to induction implies general conceptions	193
2.	—but these need not be pre-existent	194
3.	A general conception, originally the result of a comparison, becomes itself the type of comparison	198
4.	What is meant by appropriate conceptions	200
5.	—and by clear conceptions	203
6.	Further illustration of the subject	205
	Chapter III. <i>Of Naming, as subsidiary to Induction.</i>	
§ 1.	The fundamental property of names as an instrument of thought	209
2.	Names are not indispensable to induction	210
3.	In what manner subservient to it	211
4.	General names not a mere contrivance to economize the use of language	213
	Chapter IV. <i>Of the Requisites of a Philosophical Language, and the Principles of Definition.</i>	
§ 1.	First requisite of philosophical language, a steady and determinate meaning for every general name	215
2.	Names in common use have often a loose connotation	215
3.	—which the logician should fix, with as little alteration as possible	218
4.	Why definition is often a question not of words but of things	220
5.	How the logician should deal with the transitive applications of words	224
6.	Evil consequences of casting off any portion of the customary connotation of words	229
	Chapter V. <i>On the Natural History of the Variations in the Meaning of Terms.</i>	
§ 1.	How circumstances originally accidental become incorporated into the meaning of words	236
2.	—and sometimes become the whole meaning	238
3.	Tendency of words to become generalized	240

4. —and to become specialized	243
<u>Chapter VI.</u> <i>The Principles of a Philosophical Language further considered.</i>	
§ 1. Second requisite of philosophical language, a name for every important meaning	248
2. —viz. first, an accurate descriptive terminology	248
3. —secondly, a name for each of the more important results of scientific abstraction	252
4. —thirdly, a nomenclature, or system of the names of Kinds	255
5. Peculiar nature of the connotation of names which belong to a nomenclature	257
6. In what cases language may, and may not, be used mechanically	259
<u>Chapter VII.</u> <i>Of Classification, as subsidiary to Induction.</i>	
§ 1. Classification as here treated of, wherein different from the classification implied in naming	266
2. Theory of natural groups	267
3. Are natural groups given by type, or by definition?	271
4. Kinds are natural groups	274
5. How the names of Kinds should be constructed	280
<u>Chapter VIII.</u> <i>Of Classification by Series.</i>	
§ 1. Natural groups should be arranged in a natural series	284
2. The arrangement should follow the degrees of the main phenomenon	285
3. —which implies the assumption of a type-species	287
4. How the divisions of the series should be determined	288
5. Zoology affords the completest type of scientific classification	289
<u>BOOK V.</u>	
ON FALLACIES.	
<u>Chapter I.</u> <i>Of Fallacies in General.</i>	
§ 1. Theory of fallacies a necessary part of logic	295
2. Casual mistakes are not fallacies	297

3.	The moral sources of erroneous opinion, how related to the intellectual	297
	Chapter II. <i>Classification of Fallacies.</i>	
§ 1.	On what criteria a classification of fallacies should be grounded	301
2.	The five classes of fallacies	302
3.	The reference of a fallacy to one or another class is sometimes arbitrary	305
	Chapter III. <i>Fallacies of Simple Inspection, or à priori Fallacies.</i>	
§ 1.	Character of this class of Fallacies	309
2.	Natural prejudice of mistaking subjective laws for objective, exemplified in popular superstitions	310
3.	Natural prejudices, that things which we think of together must exist together, and that what is inconceivable must be false	314
4.	Natural prejudice, of ascribing objective existence to abstractions	321
5.	Fallacy of the Sufficient Reason	322
6.	Natural prejudice, that the differences in nature correspond to the distinctions in language	325
7.	Prejudice, that a phenomenon cannot have more than one cause	329
8.	Prejudice, that the conditions of a phenomenon must resemble the phenomenon	332
	Chapter IV. <i>Fallacies of Observation.</i>	
§ 1.	Non-observation, and Mal-observation	341
2.	Non-observation of instances, and non-observation of circumstances	341
3.	Examples of the former	342
4.	—and of the latter	347
5.	Mal-observation characterized and exemplified	352
	Chapter V. <i>Fallacies of Generalization.</i>	

§ 1. Character of the class	356
2. Certain kinds of generalization must always be groundless	356
3. Attempts to resolve phenomena radically different into the same	357
4. Fallacy of mistaking empirical for causal laws	359
5. <i>Post hoc, ergo propter hoc</i> ; and the deductive fallacy corresponding to it	364
6. Fallacy of False Analogies	366
7. Function of metaphors in reasoning	373
8. How fallacies of generalization grow out of bad classification	375
Chapter VI. <i>Fallacies of Ratiocination.</i>	
§ 1. Introductory Remarks	377
2. Fallacies in the conversion and æquipollency of propositions	377
3. Fallacies in the syllogistic process	379
4. Fallacy of changing the premises	379
Chapter VII. <i>Fallacies of Confusion.</i>	
§ 1. Fallacy of Ambiguous Terms	384
2. Fallacy of Petitio Principii	396
3. Fallacy of Ignoratio Elenchi	405
BOOK VI.	
ON THE LOGIC OF THE MORAL SCIENCES.	
Chapter I. <i>Introductory Remarks.</i>	
§ 1. The backward state of the Moral Sciences can only be remedied by applying to them the methods of Physical Science, duly extended and generalized	413
2. How far this can be attempted in the present work	415
Chapter II. <i>Of Liberty and Necessity.</i>	
§ 1. Are human actions subject to the law of causality?	417
2. The doctrine commonly called Philosophical Necessity, in what sense true	418
3. Inappropriateness and pernicious effect of the term Necessity	420
4. A motive not always the anticipation of a pleasure or a pain	424

Chapter III. *That there is, or may be, a Science of Human Nature.*

- § 1. There may be sciences which are not exact sciences 426
- 2. To what scientific type the Science of Human Nature corresponds 429

Chapter IV. *Of the Laws of Mind.*

- § 1. What is meant by Laws of Mind 432
- 2. Is there a science of Psychology? 433
- 3. The principal investigations of Psychology characterized 435
- 4. Relation of mental facts to physical conditions 440

Chapter V. *Of Ethology, or the Science of the Formation of Character.*

- § 1. The Empirical Laws of Human Nature 445
- 2. —are merely approximate generalizations. The universal laws are those of the formation of character 447
- 3. The laws of the formation of character cannot be ascertained by observation and experiment 449
- 4. —but must be studied deductively 454
- 5. The Principles of Ethology are the *axiomata media* of mental science 455
- 6. Ethology characterized 459

Chapter VI. *General Considerations on the Social Science.*

- § 1. Are Social Phenomena a subject of Science? 461
- 2. Of what nature the Social Science must be 463

Chapter VII. *Of the Chemical, or Experimental, Method in the Social Science.*

- § 1. Characters of the mode of thinking which deduces political doctrines from specific experience 466
- 2. In the Social Science experiments are impossible 468
- 3. —the Method of Difference inapplicable 469
- 4. —and the Methods of Agreement, and of Concomitant Variations, inconclusive 471

5. The Method of Residues also inconclusive, and presupposes Deduction	472
Chapter VIII. <i>Of the Geometrical, or Abstract Method.</i>	
§ 1. Characters of this mode of thinking	476
2. Examples of the Geometrical Method	478
3. The interest-philosophy of the Bentham school	479
Chapter IX. <i>Of the Physical, or Concrete Deductive Method.</i>	
§ 1. The Direct and Inverse Deductive Methods	486
2. Difficulties of the Direct Deductive Method in the Social Science	489
3. To what extent the different branches of sociological speculation can be studied apart. Political Economy characterized	492
4. Political Ethology, or the science of national character	497
5. The Empirical Laws of the Social Science	500
6. The Verification of the Social Science	502
Chapter X. <i>Of the Inverse Deductive, or Historical Method.</i>	
§ 1. Distinction between the general Science of Society, and special sociological inquiries	506
2. What is meant by a State of Society?	506
3. The Progressiveness of Man and Society	508
4. The laws of the succession of states of society can only be ascertained by the Inverse Deductive Method	511
5. Social Statics, or the science of the Coexistences of Social Phenomena	513
6. Social Dynamics, or the science of the Successions of Social Phenomena	521
7. Outlines of the Historical Method	522
8. Future prospects of Sociological Inquiry	525
Chapter XI. <i>Additional Elucidations of the Science of History.</i>	
§ 1. The subjection of historical facts to uniform laws is verified by statistics	529
2. —does not imply the insignificance of moral causes	532

3.	—nor the inefficacy of the characters of individuals and of the acts of governments	535
4.	The historical importance of eminent men and of the policy of governments illustrated	540
	Chapter XII. <i>Of the Logic of Practice, or Art; including Morality and Policy.</i>	
§ 1.	Morality not a science, but an Art	544
2.	Relation between rules of art and the theorems of the corresponding science	544
3.	What is the proper function of rules of art?	546
4.	Art cannot be Deductive	548
5.	Every Art consists of truths of Science, arranged in the order suitable for some practical use	549
6.	Teleology, or the Doctrine of Ends	550
7.	Necessity of an ultimate standard, or first principle of Teleology	552
8.	Conclusion	554

A SYSTEM OF LOGIC, RATIOCINATIVE AND INDUCTIVE

BEING A CONNECTED VIEW OF THE PRINCIPLES OF
EVIDENCE, AND THE METHODS OF SCIENTIFIC
INVESTIGATION.

By John Stuart Mill

CONTENTS

[Preface To The First Edition.](#)

[Preface To The Third And Fourth Editions.](#)

[Introduction.](#)

<u>Book I</u>	Of Names And Propositions.
<u>Chapter I</u>	Of The Necessity Of Commencing With An Analysis Of Language.
<u>Chapter II</u>	Of Names.
<u>Chapter III</u>	Of The Things Denoted By Names.
<u>Chapter IV</u>	Of Propositions.
<u>Chapter V</u>	Of The Import Of Propositions.
<u>Chapter VI</u>	Of Propositions Merely Verbal.
<u>Chapter VII</u>	Of The Nature Of Classification, And The Five Predicables.
<u>Chapter VIII</u>	Of Definition.
<u>Book II</u>	On Reasoning.
<u>Chapter I</u>	Of Inference, Or Reasoning, In General.
<u>Chapter II</u>	Of Ratiocination, Or Syllogism.
<u>Chapter III</u>	Of The Functions And Logical Value Of The Syllogism.
<u>Chapter IV</u>	Of Trains Of Reasoning, And Deductive Sciences.
<u>Chapter V</u>	Of Demonstration, And Necessary Truths.
<u>Chapter VI</u>	The Same Subject Continued.
<u>Chapter VII</u>	Examination Of Some Opinions Opposed To The Preceding Doctrines.
<u>Book III</u>	Of Induction.

<u>Chapter I</u>	Preliminary Observations On Induction In General.
<u>Chapter II</u>	Of Inductions Improperly So Called.
<u>Chapter III</u>	Of The Ground Of Induction.
<u>Chapter IV</u>	Of Laws Of Nature.
<u>Chapter V</u>	Of The Law Of Universal Causation.
<u>Chapter VI</u>	On The Composition Of Causes.
<u>Chapter VII</u>	On Observation And Experiment.
<u>Chapter VIII</u>	Of The Four Methods Of Experimental Inquiry.
<u>Chapter IX</u>	Miscellaneous Examples Of The Four Methods.
<u>Chapter X</u>	Of Plurality Of Causes, And Of The Intermixture Of Effects.
<u>Chapter XI</u>	Of The Deductive Method.
<u>Chapter XII</u>	Of The Explanation Of Laws Of Nature.
<u>Chapter XIII</u>	Miscellaneous Examples Of The Explanation Of Laws Of Nature.
<u>Chapter XIV</u>	Of The Limits To The Explanation Of Laws Of Nature; And Of Hypotheses.
<u>Chapter XV</u>	Of Progressive Effects; And Of The Continued Action Of Causes.
<u>Chapter XVI</u>	Of Empirical Laws.
<u>Chapter XVII</u>	Of Chance And Its Elimination.
<u>Chapter XVIII</u>	Of The Calculation Of Chances.
<u>Chapter XIX</u>	Of The Extension Of Derivative Laws To Adjacent Cases.
<u>Chapter XX</u>	Of Analogy.
<u>Chapter XXI</u>	Of The Evidence Of The Law Of Universal Causation.
<u>Chapter XXII</u>	Of Uniformities Of Co-Existence Not Dependent On Causation.
<u>Chapter XXIV</u>	Of The Remaining Laws Of Nature.
<u>Chapter XXV</u>	Of The Grounds Of Disbelief.
<u>Book IV</u>	Of Operations Subsidiary To Induction.

<u>Chapter I</u>	Of Observation And Description.
<u>Chapter II</u>	Of Abstraction, Or The Formation Of Conceptions.
<u>Chapter III</u>	Of Naming, As Subsidiary To Induction.
<u>Chapter IV</u>	Of The Requisites Of A Philosophical Language, And The Principles Of Definition.
<u>Chapter V</u>	On The Natural History Of The Variations In The Meaning Of Terms.
<u>Chapter VI</u>	The Principles Of A Philosophical Language Further Considered.
<u>Chapter VII</u>	Of Classification, As Subsidiary To Induction.
<u>Chapter VIII</u>	Of Classification By Series.
<u>Book V</u>	On Fallacies.
<u>Chapter I</u>	Of Fallacies In General.
<u>Chapter II</u>	Classification Of Fallacies.
<u>Chapter III</u>	Fallacies Of Simple Inspection; Or A Priori Fallacies.
<u>Chapter IV</u>	Fallacies Of Observation.
<u>Chapter V</u>	Fallacies Of Generalization.
<u>Chapter VI</u>	Fallacies Of Ratiocination.
<u>Chapter VII</u>	Fallacies Of Confusion.
<u>Book VI</u>	On The Logic Of The Moral Sciences.
<u>Chapter I</u>	Introductory Remarks.
<u>Chapter II</u>	Of Liberty And Necessity.
<u>Chapter III</u>	That There Is, Or May Be, A Science Of Human Nature.
<u>Chapter IV</u>	Of The Laws Of Mind.
<u>Chapter V</u>	Of Ethology, Or The Science Of The Formation Of Character.
<u>Chapter VI</u>	General Considerations On The Social Science.
<u>Chapter VII</u>	Of The Chemical, Or Experimental, Method In The Social Science.
<u>Chapter VIII</u>	Of The Geometrical, Or Abstract, Method.
<u>Chapter IX</u>	Of The Physical, Or Concrete Deductive, Method.
<u>Chapter X</u>	Of The Inverse Deductive, Or Historical, Method.

ANALYSIS OF THE PHENOMENA OF THE HUMAN MIND

By James Mill (John Stuart Mill)

CONTENTS OF THE FIRST VOLUME

	PAGE
INTRODUCTION	1
CHAPTER I.	
Sensation	2
SECTION 1. Smell	7
2. Hearing	16
3. Sight	21
4. Taste	25
5. Touch	28
6. Sensations of Disorganization, or of the Approach to Disorganization, in any part of the Body	37
7. Muscular Sensations, or those Feelings which accompany the Action of the Muscles	40
8. Sensations in the Alimentary Canal	45
CHAPTER II.	
Ideas	51
CHAPTER III.	
The Association of Ideas	70
CHAPTER IV.	
Naming	127

SECTION 1. Nouns Substantive	<u>134</u>
2. Nouns Adjective	<u>134</u>
3. Verbs	<u>151</u>

*** END OF THE PROJECT GUTENBERG EBOOK INDEX OF THE
PROJECT GUTENBERG WORKS OF JOHN STUART MILL ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
