BUGBREEDERS ***

THE USELESS BUGBREEDERS

BY JAMES STAMERS

**TO THE SPACE COUNCIL, ASTEROID 4722
WAS JUST ANOTHER ROADBLOCK IN THE
WAY OF INTERPLANETARY TRAFFIC. BUT
TO THE USELESS BUGBREEDERS IT WAS HOME!**

**[Transcriber's Note: This etext was produced from
Worlds of If Science Fiction, May 1961.
Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

The previous case was a Weeper, and he lost. So the Space Zoning Commissioners were damp and irritable before I opened pleadings for my client. I tried not to squelch as I approached the bench.

"Not the Flammables again, Mr. Jones?" the fat Commissioner asked nastily, sponging his suit with a sodden handkerchief.

"This was last week, Your Honor."

The thin dark Commissioner stared pointedly at the charred end of the bench nearest the witness seat.

"Indeed it was, Mr. Jones."

The middle Commissioner poised his fingers and looked at the court ceiling; moisture gleamed diamond like on his bald head.

"Now let me see," he intoned. "Correct me if I err, Mr. Jones, but I seem to observe you have a habit of representing somewhat spectacular aliens. Including, in the past six months alone, the Drillers, Whirling Tombs, Fragile Glasses, Erupters, Vibrational Men, Transparent Women—and of course let us not forget the Flammables."

"I assure Your Honor, my present clients will be found to be sober, hardworking, desirable members of the Galactic Community, seeking only to live on their own asteroid in peace under a democratic system, which...."

"Thank you, Mr. Jones. Shall we proceed?"

"And perhaps," added the fat Commissioner, "you may be good enough to leave us with most of our courtroom intact on this occasion."

The thin Commissioner sighed and shuffled his papers.

"You appear, Mr. Jones, to contest a Space Council ruling for the elimination of Asteroid Four Thousand Seven Hundred and Twenty-Two on the grounds, which you allege, that it is a peaceful dwelling of an adult and responsible alien race."

"Yes, Your Honor."

"Then let us see your adult, um, Bugbreeder."

I shuffled uncomfortably and splashed the court stenographer who gave me a dirty look.

"A space tramp's name given in the early days of Space, Your Honor. More properly, my clients are the Selective Culturists of Bacteria and Lesser Life."

The fat Commissioner sniffed.

"Bugbreeders will do," he said. "Produce one."

My client hopped off the table and ran nimbly up to the witness seat. He sat there like a small green snowball with large and pointed ears.

"Happy, happy to be here, I'm sure," he said.

Fortunately he had a hand to raise and looked reasonably humanoid as he was sworn in. The caterpillar and semi-jelly cultures make a less favorable first impression, and at this point the Driller had gone excitedly through the floor.

"You are a representative member of your race?" I asked formally.

"Oh, yus. Much."

"And you reside on Asteroid Four Thousand Seven Hundred and Twenty-Two, the permanent dwelling of your race?"

"Oh, yus. Home."

"And although your home presents certain technical difficulties for interplanetary vehicles on the spacerun to the greater planets, you maintain it should be preserved because of your contribution to the culture of the Galactic Community?" I asked.

"Oh, yus."

"Does he understand a word you're saying, Mr. Jones?" asked the bald Commissioner.

"Oh, yus. Not much," said my client cheerfully.

"Hurrmph," I said, and coughed.

"Perhaps I may assist," suggested the thin Commissioner, with a nasty look at me. "What exactly does your race do?"

"Breed bugs, I'm sure. Am head bacteriophysicist name of Lood. Am good scientist."

"And what exactly do you do with these bugs you raise?"

"Most everything."

"Your Honors," I interrupted. "At this point I propose a few simple demonstrations of what Mr. Lood and his people can do."

"May I inquire if either of my learned brethren know any way in which we can charge Mr. Jones with rebuilding costs, if necessary?" asked the bald Commissioner.

"Your Honors, I assure you...."

"Proceed at your peril, Mr. Jones."

I walked over to the exhibit table and pointed to a row of jars.

"Exhibits A through G, Your Honors. Samples of food and beverages produced by my clients without raw materials and from the expert culture of bacteria."

I held up a jar full of mauve fungus. It was the most attractive example.

"I would hardly call feeding on funguses a sign of a responsible humanoid race, Mr. Jones."

"Perhaps Your Honor will recall the part played by bacteria in making milk, cheese, wine, beer, bread."

The Commissioners looked at each other and nodded reluctantly. So I passed the jars up to them, secure in the knowledge they had been tested by the Alien Foods Bureau. I watched the Commissioners unscrew the lids and taste the contents somewhat hesitantly.

"Not bad," confessed the fat Commissioner eventually.

"Quite palatable."

"Of course we already have honey and similar foodstuffs, Mr. Jones."

"Naturally, Your Honor. But Mr. Lood's race can survive without extraplanetary aid. Provided they have sunshine and water, they can breed their spores and bacteria with no other resources."

"You mean," said the thin Commissioner with a dark leer, "that almost any sunny planet would do for them?"

Somewhere along the line my point seemed to have been swept away, so I added hurriedly:

"I offer this evidence purely to show the high degree of civilization of my clients' culture, as cause why they should not be deprived of their native land."

"Oh, yus," my client agreed.

"Mr. Lood," intoned the bald Commissioner, "to stay on your present asteroid you will have to prove that your race offers something that cannot be found elsewhere in the Galactic Community. Now have these funguses of yours any special medicinal values, for example?"

"Please?"

"Can you cure diseases with them?"

"Oh, no."

"Ah," said the thin and fat Commissioners together. "Proceed, Mr. Jones."

That put Lood somewhere back behind the twentieth-century discoverers of penicillin and the mycins, and even back behind the pioneer Pasteur. Five hundred years back, in fact.

"Yes. Well. Let's see how my clients handle housing, Your Honors. I think you'll find this quite revolutionary. Mr. Lood?"

Lood hopped off the witness seat and trotted up to the long table normally reserved for attorneys. Lately, I have found my professional colleagues strangely reluctant to stay in court when I have a case, so Lood had the entire table to himself.

He pulled a small jar out from under the table and spread a pile of dust on the tabletop. Then he unscrewed the jar and gently poured nothing out of it onto the dust. Nothing visible, that is. But I assumed it was teeming with viruses and such.

"While Mr. Lood gets this started, Your Honors," I said, hoping the viruses or whatever were not fatal to humans, "may I submit the usefulness of fungus foods for space-travel and for pioneers on inhospitable planets?"

"Are we having difficulties with General Food-Concentrates, the Travelers Capsule Combine and the other ten thousand concerns in this line, Mr. Jones?" the bald Commissioner asked quietly.

You can't say I didn't try. I shut up and watched Lood fuss with the dust on the table.

It started moving as if it were bubbling and Lood stood back.

Slowly, the dust on the table formed itself into a brick, a long eight by six by three inch brick. Lood smiled happily.

"And here, Your Honors," I said triumphantly, "here is automatic housing."

"One brick does not make a house, Mr. Jones."

"If Your Honors will just watch...."

The brick slowly elongated and split into two perfect bricks, lying on the table end to end.

"Mass colony action of bacteria," said Lood wisely. "Oh, yus."

The two bricks each split into two further bricks. These divided and multiplied themselves while we watched, out to the end of the table.

"I would like Your Honors to observe the way these bricks overcome natural hazards," I said, getting into my stride.

I pointed to the bricks drooping over the end of the table. A brick fell onto the floor at each end, then built itself up until it joined the line of bricks on the table, forming a perfect arch at each angle. The line on the table was now three bricks high, so I walked round and stood behind the wall.

"You see, Your Honors, suppose I need a house. I merely combine these suitable microbes and dust. And there we are, a house."

I had to stand on tiptoe to finish the sentence because of the mathematics involved. Every brick was doubling and redoubling itself in just under a minute. And the wall was getting quite impressively high.

"Mr. Jones," called one of the Commissioners.

It was not until I tried to walk round the end of the wall that I found I had been out-flanked.

I ran to the nearest wall of the courtroom but the bricks got there first. I heard a rending noise that suggested the other end had gone clean through the opposite wall. As a matter of fact, I saw the astonished face of an attorney entering the main door of the Justice Building as the wall advanced towards him. Then he saw me. He grinned and waved.

I was in no mood to wave back.

"Mr. Lood, Mr. Lood," I yelled. "Can you hear me?"

"Wall too thick, yus," came a muffled answer.

And indeed it was. I had not noticed it, but the wall was expanding sideways as well. I was calculating the approximate thickness when it went up and through the roof of the courtroom.

Fortunately it was a nice sunny day.

However, this was no time to sunbathe and I dashed towards the hole in the courtroom wall, where Lood's wall had gone through.

I just got out before a buttress, coming out the wall at right angles, blocked the gap. I remembered something Lood had said about the automatic creation of full-scale houses on a simple standard plan: two rooms, a toilet and a patio.

Outside, the wall was well on the way towards completing its second simple house. This side of the wall was, that is. I could only assume it was doing something similar on the other side. There was no way of getting round and seeing, except by outstripping the wall in a sprint.

I gathered my breath and dignity and ran very rapidly down the length of the wall, round the far mounting tiers of brick, advancing now on the State Library, and back to where I had left the Commissioners and Mr. Lood.

I was faced by a thicket of patios and arched doorways and low-roofed houses.

"Your Honors, Your Honors," I called hopefully, walking into the maze, in the general direction of what appeared to be an old and ruined war monument. It then occurred to me that this was the outer wall of the courthouse. It stood far off, pointing a stone finger to the sky, as if going down in a sea of brick for the third time.

"Your Honors, Your Honors...."

I met them turning a corner.

Unfortunately, they seemed to have found it necessary to crawl through a broken gap of some sort. They were very dusty and had a slightly shredded appearance.

"Ah, Mr. Jones," they said grimly, dusting each other off.

A tremendous crash announced the falling in of the roof of the State Library.

"Well," said the thin Commissioner, "he did say it was revolutionary."

I smiled politely.

"Don't giggle, Mr. Jones, or we'll hold you in contempt."

We wound out of the maze in single file. A pattering behind us announced Lood bringing up the rear.

Once we were out, and about two hundred yards ahead of the advancing walls, patios and houses, the three Commissioners turned on me.

"Mr. Jones," they said with restraint. "You will now stop this reckless building project."

I turned to Lood.

"You must stop it," I said.

"Oh, yus," he agreed, nodding happily. "Most marvelous, no. Ample housing for all and sundry. Homes for peoples. Immediate occupancy. You like basic plan house, yus?"

"Mr. Lood," snarled the fat Commissioner. "The problem on every habitable planet so far has been to find room to build. Earth is congested...."

Distant crashing informed me that an unprecedented houseclearing was still going on.

"... And so are all authorized planets yet discovered. I speak for my learned brethren in saying that this ... this anthill of yours is one thing the Galactic Community can do without."

"And do without right now," added his bald colleague.

"You wish to stop?" asked Lood.

Small tears filled the periphery of his round eyes.

"Yes," I confirmed brutally. "Can you stop it?"

"Oh, yus. Must have antiseptics."

It took the fire department four hours of spraying from their copters to reduce the entire housing estate to dust. And then an even blanket of brown feathery residue lay unbroken for several acres, save here and there where the shells of previous buildings stood up gauntly and accusingly.

"All bugs gone," said Lood sadly.

"But what about this mess?" demanded the bald Commissioner.

"Comes out of air. Floating particles. Process cleans air, too."

A fresh wind from across the blanket of dust came inopportunistically to punctuate Mr. Lood's remark. As soon as they could talk again, the Commissioners suggested resuming in another city.

"Assuming, Mr. Jones, you wish to produce further aspects of your, hum, case."

Six red and bleary eyes stared at me from a coating of brown dust of only vaguely judicial appearance.

"I think, Your Honors, the next evidence had better be delivered in the open," I said, and pointed to a nearby park.

Much, if not all, of the dust fell off us as we walked over to the small green hill in the center of the park. The birds twittered, the sun shone, the breeze was fresh; and after the Commissioners had settled on convenient tree stumps, I felt quite hopeful about the third line of evidence. Lood stood optimistically by.

"Your Honors," I said, "you are aware that Earth suffers a grave shortage of metals. Almost all economical quantities have been mined out. Yet, Your Honors—" I paused dramatically—"in the haematin of human blood alone, whose main function is to carry oxygen to the system, there is nearly twice as much iron by weight as oxygen."

"Precisely which of us, Mr. Jones, do you propose to mine first?"

I cleared my throat and let the thin Commissioner's remark pass.

"Merely making the point, Your Honor, that the metal-carrying properties of bacteria have been hardly considered."

This was stretching it a bit because selective breeding of microbes for the recovery of metals in tailings have been developed back in the nineteen-fifties. But so far as I knew, no one had carried it as far as my client race.

"Mr. Lood," I commanded.

"Just one moment, Mr. Jones," said the bald Commissioner drily. "Let us have an outline of this *before* we start."

"Certainly, Your Honor. Mr. Lood will now extract gold from a sample of ocean water we have obtained."

I signalled to the waiting carrier and it came trundling softly over the grass and deposited a large tank on the grass.

"Genuine untouched ocean water, Your Honors," I said, slapping the tank.

"Go ahead, Mr. Lood."

The little fellow hopped up to the side of the tank and emptied another invisible horde from a test tube into the water.

We waited.

"Oh, yus," he said.

And there on the bottom of the tank was an unmistakable sludge of metallic gold, shining speckled in the rays of sunlight bending through the water.

I scooped out a sample and handed it round for the Commissioners to inspect.

"Subject to analysis," grunted the fat one, "this certainly seems to be gold."

"Of course, there is no reason why this should not be done on Earth, as a starting point."

The thin Commissioner paused and looked at my client.

"Does this process affect fish?"

"Oh, yus," said Lood. "Kills all parasites. Fish, reptiles, and such."

"Thank you," said the Commissioner drily.

Mr. Lood looked at me apologetically.

"My people too small to tolerate fish," he explained. "Fish most dangerous wild beasts. Oh, yus."

"Never mind," I reassured him. "Your Honors, I feel the court will take a more favorable view of the dry-land operation, then. Taking place as it does in the bowels of the earth, there is no danger to valuable livestock. And here we can demonstrate, for example, simple aluminum extraction, by the progressive reduction and oxidation and reduction of bacteria on a molecular scale.

"I hope," I added, "this experiment will produce visible evidence of this great boon to mankind, though I must ask Your Honors to watch closely."

Lood produced another test-tube, pressed a small hole in the grass with his finger and emptied the tube. The hole darkened.

We all bent over to watch.

Nothing happened.

"Perhaps a dud batch?" I asked eventually.

"Oh, no," said Lood.

We peered intently into the small hole without seeing anything.

Then a faint wisp of steam came out of the hole. I walked over the grass, picked up a long twig, walked back and thrust it into the hole. I could not touch bottom, so something was going on down there.

The edges of the hole began to gleam with white metal. I was about to explain the alumina content of common clay, when the thin Commissioner and the tree stump he was sitting on went down with a whistling sound into a sudden pit that opened beneath him.

I only just caught the third and last Commissioner in time. We watched his tree stump sinking out of sight together.

The ground began to quiver uneasily.

"Let us get out of here with all haste."

I followed the direction of the court with proper professional zeal. And we just made it to the safe stressed-concrete surface of the old freeway when the park melted completely into a stark framework of aluminum. Seated in the middle and peering at us through the aluminum cage were the other two Commissioners. They did not seem particularly happy.

Around them in a widening belt there opened up a pit of gleaming aluminum, melting, so to speak, towards the horizon on all sides.

"You realize, I suppose, Mr. Jones," said the bald Commissioner beside me, "that your client is in the process of eating up the Earth." He breathed heavily.

Lood was beaming and hopping up and down at the success of his experiment. I touched him in the general area of a shoulder. He looked at me.

"No," I said firmly, shaking my head.

"No?"

"No!"

His round eyes became tearful and his little green body shook.

"Oh, dear. Oh, dear. Oh, dear."

"Antiseptics?" I asked.

"Oh, yus," he confirmed sadly.

Very fortunately, the fire department was still observing my client—and me, I suspected afterwards, ridiculous as that may seem.

This time it took them several hours of deep spraying and drilling to confine the area. A vast saucer of aluminum remained.

"Useful for signalling to stars, oh, yus?" asked Lood, hopefully.

"Oh, no," I said.

A threatening cough made me turn round to see the three Commissioners staring at me.

"Mr. Jones...."

"... you have now destroyed the Courthouse, the Public Library and five city blocks...."

"... and buried them under a filthy layer of dust...."

"and reduced a park into a great garbage pit...."

"... we therefore refuse your claim and give you and your client six hours to get off Earth...."

"... and kindly do not trouble to advise us where the Space Council moves you. We will sleep more soundly for believing that it will be many, many light-years away."

And they turned and walked away, leaving me with my client—and, apparently, my traveling companion.

A quiet and suppressed sobbing made me turn and look at Lood. He wept dolefully.

"We have nothing," he said. "Oh, no. We have nothing to offer. Nothing that you humans want."

"Well," I said, "that's the way it goes sometimes."

And what, I wondered, was I going to do for a living now?

"Free food," gulped Lood. "Free housing. Free gold and metals. We had all hoped so much from this. Oh, yus."

There did not seem any point in telling him his people were several hundred years too late. Once upon a time he would have been hailed as a savior of a starving and poor human race, a great benefactor of mankind. Now he was just a nuisance. And I was another for letting him loose.

"Well," I assured him, "you have got one guest until they shift you off your asteroid. Me. Free food and housing will suit me fine. And maybe we'll find some very backward part of the Galaxy where they need gold and such.

"It's a pity," I added, as we started to walk towards the spaceport, "that you can't control these bacteria of yours."

"Can control."

"It didn't look like it, my friend."

"Oh, yus. Can control bodily leucocytes, corpuscles and such. Perfect cell replacement easy."

I looked down at him.

"If it's all that easy," I said. "I suppose your old men can run faster than your houses."

"No old men," said Lood.

"Well, old whatever-you-are's."

"No old. Not die. Oh, yus. Perfect cell replacement."

I stood very still.

"Do you mean you never die?" I asked.

"Oh, yus. Never die."

"Can teach?" I asked.

"Oh, yus. Most simple," smiled Lood. "Can teach all men not die. Not ever."

But I was off running after the three Commissioners, yelling until they stopped and stood waiting for me....

*** END OF THE PROJECT GUTENBERG EBOOK THE USELESS
BUGBREEDERS ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project GutenbergTM License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
