## HOW TO MAKE THE BLACKBOARD CLOCK.

Draw a circle, about a foot in diameter, on the blackboard, in a convenient place where it may remain. Place a dot in the center. Inside the circle place the figures, hour and minute marks as you have them on the face of your watch or clock.

If the clock is to be made on a wooden blackboard it will be best to have slips cut from tin for the hour and minute hands, and fastened to the center of the face with a slender screw; but if the board is of hard finish, and a screw of any kind will not answer, the next best plan will be to cut the hands from hard, white pasteboard and fasten them in place by means of a long pin, using a hard piece of pasteboard, cut round, for a washer.

Exercise care to have the minute hand long enough to reach exactly to the minute spaces, and the hour hand to the hour figures only.

The clock is thus made ready for use, though it will be made more attractive by drawing lines representing a case about the face in colored crayon. A smooth board having the dimensions of twelve by twenty inches, or thereabout, may be painted and prepared to represent a clock.

An old clock with a worn out movement answers still better for the purpose than the blackboard clock.

# **TEACH THE PUPILS HOW TO TELL THE TIME.**

First,—Teach the pupils to count to sixty.

Develop the idea of, and teach the pupils to write the Roman and Arabic numbers to twelve inclusive.

Teach the pupils that sixty minutes make an hour.

Review by careful questioning that which was done at previous exercises.

Develop all ideas as far as possible by questioning the pupils.

## **Tell the Pupils That:**

The little spaces around the face of the clock are named minutes.

The big hand is the minute hand and it counts the minutes.

There are sixty little minutes around the face of the clock which the minute hand has to count.

The figures are named hours.

The little hand is the hour hand and it points out the hours.

The minute hand reaches clear to the minutes, and the hour hand touches only the hours.

## **Teach The Hour.**

When the hour hand points to figure 1, it is one o'clock.

When the hour hand points to figure 2, it is two o'clock.

When the hour hand points to figure 3, it is three o'clock, etc.

Twelve is the home hour.

It is where the two hands live, yet they are always going.

They never go backward.

They always start away from home and go around back home again.

They always get home together at dinner time, that is, twelve o'clock, and again in the middle of the night, midnight, or twelve o'clock again.

### **Exercise I.**

Send a pupil to the blackboard clock with a pointer; have him point to one o'clock, two o'clock, etc.

Let others do the same, but do not continue till the attention of the class wavers.

Let pupils count the minutes, by turns, each commencing where the one preceding him left off, always following the course of the hands of a clock.

### **Tell the Pupils That:**

It is not our work to do the pointing nor the counting. The hour and minute hands on the face of a clock always do that to tell us what time it is.

The minute hand counts the minutes, and the hour hand points to the hours.

When the hour hand points to 1, it is one o'clock.

When the hour hand points to 2, it is two o'clock, etc.

Let us play it is dinner time. The hour and minute hands are home together, ready to start out and go around again. They are always ready to go and they always go the right way. They never go the wrong way. The minute hand goes all the way around, counts all the minutes and gets back home while the hour hand goes to only one figure, and then we know it is one o'clock, because the hour hand is pointing to it. The minute hand gets home just at the same time that the hour hand points to any hour.

There are twelve hours on the face of the clock.

It takes the hour hand a long time, twelve hours, to get home, but the minute hand gets home as soon as it counts the minutes all round the face of the clock.

### **Exercise II.**

The teacher places the hands, each time stopping the hour hand at the right hour, and the minute hand at the twelve o'clock, or home hour, and having the pupils tell what time it is, individually.

### **Exercise III.**

Send a pupil to the board; let him as the teacher dictates, make it one o'clock, two o'clock, etc. Let others do the same. Never continue for a minute with flagging interest and attention.

Drill until the pupils all see that the minute hand goes all the way around every time the hour hand goes from one hour to another.

### **Teach The Half Past.**

Tell the pupils:—When the hour hand gets past a number, half way to the next number, the minute hand has counted half the minutes and is half way home.

### **Exercise IV.**

Place the hands, at the half past marks, and let pupils tell individually what time it is.

Let pupils place the hands at the half past marks as the teacher dictates.

### **The Quarter Hour.**

Develop the quarter past and quarter of by the same devices used for developing the half past.

Combine the hour, half hour and quarter hour exercises.

## **The Minutes.**

The minutes past and minutes of may be taught by various methods, according to the ability of the pupils.

Many exercises may be devised by the teacher besides these here given.

### **Show The Pupils That:**

The minute hand counts all the minutes while the hour hand goes from one hour to another.

The minute hand goes twelve times as fast as the hour hand.

The minute hand counts twelve minutes while the hour hand is going past one minute.

### **Exercise V.**

Play it is dinner time, and the two hands are home together again, but they cannot stop, for it is their duty to always keep going.

Now we find the hour hand has gone past just one minute. It did not say anything about the minute nor even point at it because it never does do that. It just went past twelve, the home hour, and then past one minute.

What did the minute hand do?

It counted twelve minutes.

Then what time does the big minute hand tell us that it is?

It tells us that it is twelve minutes after, or past twelve.

### **Show The Pupils That:**

The minute hand gets home twelve times as often as the hour hand.

The minute hand starts from home just when the hour hand starts from an hour.

The number of minutes from home to the minute hand is what the minute hand has counted each time, and it shows the time, or minutes past

an hour.

The number of minutes from the minute hand around to home again is what the minute hand will have to count each time, and it shows the time or minutes to an hour, or of an hour.

### **Exercise VI.**

Drill in placing hands for pupils to tell the time.

Dictate for pupils to place hands.

## MISCELLANEOUS DRILL.

One of the main objects of time drill in the schoolroom is to aid in effecting order.

Decorum acquired from time drills in the schoolroom characterize pupils on the streets, in public meetings, and in society everywhere.

The following time drills are very beneficial: Exercises in timing pupils' work and plays.

Training pupils to keep time to martial music by beating stepping or other movements.

One that little ones particularly enjoy is to hipity-hop in time to martial music.

Any exercises in stepping, beating or counting time.

Beating the measures while practicing the natural scale in music.

Practicing kindergarten plays in time to music or singing.

Thorough training in school tactics. All school tactics tend toward developing the faculty, time. For this reason the teacher cannot be too zealous in training it.

Teaching the time table:

60 seconds make a minute,  
60 minutes make an hour,  
24 hours make a day (and night),  
7 days make a week,  
4 weeks make a month,  
12 months make a year,  
100 years make a century.

Guessing time, as:—

Letting pupils guess the time, at any hour.

Letting pupils close their eyes for a short period, and afterward guessing how long a time it was.

Letting pupils guess how long it took them to write or recite a certain lesson or to do a certain thing.

How often does the sun rise in a day? in two days? in a week? etc. How often does it rain. How often do we go to school in a day? in a week? etc. How often does your birthday come? and like questions.

Ages of persons:—

Let pupils tell the dates of their birthdays, their parents' birthdays, or dates of the birthdays of brothers, sisters or friends.

In some some way take special notice of, or celebrate, the birthdays of pupils when they occur during school months.

Celebrate in some way also the birthdays of the most noted men and women.

Speed:—

Stopping, beating or other movements, measured: slow, fast.

Practice exactness of time, punctuality, yourself; children learn more by example than by precept.

Require it always of your pupils. Teach them that "Procrastination is the thief of time."

Teach the pupils to regard the clock as a true companion.

Songs:—

Time songs and clock songs. The time drill in music cannot be over done so long as the interest of the pupils is awakened.

Teach the abbreviation A. D. and its meaning.

Economy of time:—

Train pupils to economize time, by doing everything the best way and the shortest.

## **Section 2. Information about the Mission of Project Gutenberg**

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including

obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at [www.gutenberg.org](http://www.gutenberg.org).

### **Section 3. Information about the Project Gutenberg Literary Archive Foundation**

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at [www.gutenberg.org/contact](http://www.gutenberg.org/contact)

### **Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation**

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit [www.gutenberg.org/donate](http://www.gutenberg.org/donate).

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: [www.gutenberg.org/donate](http://www.gutenberg.org/donate).

## **Section 5. General Information About Project Gutenberg electronic works**

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:  
[www.gutenberg.org](http://www.gutenberg.org).

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
