there was an old WOMAN—

By ROBERT SILVERBERG

Miss Mitchell had ideas—and 31 identical sons!

**[Transcriber's Note: This etext was produced from
Infinity November 1958.**

**Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

Since I was raised from earliest infancy to undertake the historian's calling, and since it is now certain that I shall never claim that profession as my own, it seems fitting that I perform my first and last act as an historian.

I shall write the history of that strange and unique woman, the mother of my thirty brothers and myself, Miss Donna Mitchell.

She was a person of extraordinary strength and vision, our mother. I remember her vividly, seeing her with all her sons gathered 'round her in our secluded Wisconsin farmhouse on the first night of summer, after we had returned to her from every part of the country for our summer's vacation. One-and-thirty strapping sons, each one of us six feet one inch tall, with a shock of unruly yellow hair and keen, clear blue eyes, each one of us healthy, strong, well-nourished, each one of us twenty-one years and fourteen days old, one-and-thirty identical brothers.

Oh, there were differences between us, but only we and she could perceive them. To outsiders, we were identical; which was why, to outsiders, we took care never to appear together in groups. We ourselves knew the differences, for we had lived with them so long.

I knew my brother Leonard's cheekmole—the right cheek it was, setting him off from Jonas, whose left cheek was marked with a flyspeck. I knew the faint tilt of Peter's chin, the slight oversharphness of Dewey's nose, the florid tint of Donald's skin, I recognized Paul by his pendulous earlobes, Charles by his squint, Noel by the puckering of his lowerlip. David had a blue-stubbed face, Mark flaring nostrils, Claude thick brows.

Yes, there were differences. We rarely confused one with another. It was second nature for me to distinguish Edward from Albert, George from Philip, Frederick from Stephen. And Mother *never* confused us.

She was a regal woman, nearly six feet in height, who even in middle age had retained straightness of posture and majesty of bearing. Her eyes, like ours, were blue; her hair, she told us, had once been golden like ours. Her voice was a deep, mellow contralto; rich, firm, commanding, the voice of a strong woman. She had been Professor of Biochemistry at some Eastern

university (she never told us which one, hating its name so) and we all knew by heart the story of her bitter life and of our own strange birth.

"I had a theory," she would say. "It wasn't an orthodox theory, and it made people angry to think about it, so of course they threw me out. But I didn't care. In many ways that was the most fortunate day of my life."

"Tell us about it, Mother," Philip would invariably ask. He was destined to be a playwright; he enjoyed the repetition of the story whenever we were together.

She said:

"I had a theory. I believed that environment controlled personality, that given the same set of healthy genes any number of different adults could be shaped from the raw material. I had a plan for testing it—but when I told them, they discharged me. Luckily I had married a wealthy if superficial-minded executive, who had suffered a fatal coronary attack the year before. I was independently wealthy, thanks to him, and free to pursue independent research, thanks to my University discharge. So I came to Wisconsin and began my great project."

We knew the rest of the story by heart, as a sort of litany.

We knew how she had bought a huge, rambling farm in the flat green country of central Wisconsin, a farm far from prying eyes. Then, how on a hot summer afternoon she had gone forth to the farmland nearby, and found a fieldhand, tall and brawny, and to his great surprise seduced him in the field where he worked.

And then, the story of that single miraculous zygote, which our mother had extracted from her body and carefully nurtured in special nutrient tanks, irradiating it and freezing it and irritating it and dosing it with hormones until, exasperated, it sub-divided into thirty-two, each one of which developed independently into a complete embryo.

Embryo grew into fetus, and fetus into child, in Mother's ingenious artificial wombs. One of the thirty-two died before birth of accidental narcosis; the

remainder survived, thirty-one identical males sprung from the same egg, to become us.

With the formidable energy that typified her, Mother single-handed nursed thirty-one baby boys; we thrived, we grew. And then the most crucial stage of the experiment began. We were differentiated at the age of eighteen months, each given his own room, his own particular toys, his own special books later on. Each of us was slated for a different profession. It was the ultimate proof of her theory. Genetically identical, physically identical except for the minor changes time had worked on our individual bodies, we would nevertheless seek out different fields of employ.

She worked out the assignments at random, she said. Philip was to be a playwright, Noel a novelist, Donald a doctor. Astronomy was Allan's goal, Barry's biology, Albert's the stage. George was to be a concert pianist, Claude a composer, Leonard a member of the bar, Dewey a dentist. Mark was to be an athlete; David, a diplomat. Journalism waited for Jonas, poetry for Peter, painting for Paul. Edward would become an engineer, Saul a soldier, Charles a statesman; Stephen would go to sea. Martin was aimed for chemistry, Raymond for physics, James for high finance. Ronald would be a librarian, Robert a bookkeeper, John a priest, Douglas a teacher. Anthony was to be a literary critic, William a librarian, Frederick an airplane pilot. For Richard was reserved a life of crime; as for myself, Harold, I was to devote my energies to the study and writing of history.

This was my mother's plan. Let me tell of my own childhood and adolescence, to illustrate its workings.

My first recollections are of books. I had a room on the second floor of our big house. Martin's room was to my left, and in later years I would regret it, for the air was always heavy with the stink of his chemical experiments. To my right was Noel, whose precocious typewriter sometimes pounded all night as he worked on his endless first novel.

But those manifestations came later. I remember waking one morning to find that during the night a bookcase had been placed in my room, and in it a single book—Hendrik Willem van Loon's *Story of Mankind*. I was four,

almost five, then; thanks to Mother's intensive training we were all capable readers by that age, and I puzzled over the big type, learning of the exploits of Charlemagne and Richard the Lionhearted and staring at the squiggly scratches that were van Loon's illustrations.

Other books followed, in years to come. H.G. Wells' *Outline of History*, which fascinated and repelled me at the same time. Toynbee, in the Somervell abridgement, and later, when I had entered adolescence, the complete and unabridged edition. Churchill, with his flowing periods and ringing prose. Sandburg's poetic and massive life of Lincoln; Wedgwood on the Thirty Years' War; Will Durant, in six or seven block-like volumes.

I read these books, and where I did not understand I read on anyway, knowing I would come back to that page in some year to come and bring new understanding to it. Mother helped, and guided, and chivvied. A sense of the panorama of man's vast achievement sprang up in me. To join the roll of mankind's chroniclers seemed the only possible end for my existence.

Each summer from my fourteenth to my seventeenth, I travelled—alone, of course, since Mother wanted to build self-reliance in us. I visited the great historical places of the United States: Washington, D.C., Mount Vernon, Williamsburg, Bull Run, Gettysburg. A sense of the past rose in me.

Those summers were my only opportunities for contact with strangers, since during the year and especially during the long snowbound winters we stayed on the farm, a tight family unit. We never went to public school; obviously, it was impossible to enroll us, en masse, without arousing the curiosity my mother wished to avoid.

Instead, she tutored us privately, giving us care and attention that no professional teacher could possibly have supplied. And we grew older, diverging toward our professions like branching limbs of a tree.

As a future historian, of course, I took it upon myself to observe the changes in my own society, which was bounded by the acreage of our farm. I made notes on the progress of my brothers, keeping my notebooks well hidden, and also on the changes time was working on Mother. She stood up surprisingly well, considering the astonishing burden she had taken upon herself. Formidable was the best word to use in describing her.

We grew into adolescence. By this time Martin had an imposing chemical laboratory in his room; Leonard harangued us all on legal fine points, and Anthony pored over Proust and Kafka, delivering startling critical interpretations. Our house was a beehive of industry constantly, and I don't remember being bored for more than three consecutive seconds, at any time. There were always distractions: Claude and George jostling for room on the piano bench while they played Claude's four-hand sonata, Mark hurling a baseball through a front window, Peter declaiming a sequence of shocking sonnets during our communal dinner.

We fought, of course, since we were healthy individualists with sound bodies. Mother encouraged it; Saturday afternoon was wrestling time, and we pitted our growing strengths against one another.

Mother was always the dominant figure, striding tall and erect around the farm, calling to us in her familiar boom, assigning us chores, meeting with us privately. Somehow she had the knack of making each of us think we were the favorite child, the one in whose future she was most deeply interested of all. It was false, of course; though once Jonas unkindly asserted that Barry must be her *real* favorite, because he, like her, was a biologist.

I doubted it. I had learned much about people through my constant reading, and I knew that Mother was something extraordinary—a fanatic, if you like, or merely a woman driven by an inner demon, but still and all a person of overwhelming intellectual drive and conviction, whose will to know the truth had led her to undertake this fantastic experiment in biology and human breeding.

I knew that no woman of that sort could stoop to petty favoritism. Mother was unique. Perhaps, had she been born a man, she would have changed the entire course of human development.

When we were seventeen, she called us all together round the big table in the common room of our rambling home. She waited, needing to clear her throat only once in order to cut the hum of conversation.

"Sons," she said, and the echo rang through the entire first floor of the house. "Sons, the time has come for you to leave the farm."

We were stunned, even those of us who were expecting it. But she explained, and we understood, and we did not quarrel.

One could not become a doctor or a chemist or a novelist or even an historian in a total vacuum. One had to enter the world. And one needed certain professional qualifications.

We were going to college.

Not all of us, of course. Robert was to be a bookkeeper; he would go to a business school. Mark had developed, through years of practice, into a superb right-handed pitcher, and he was to go to Milwaukee for a major-league tryout. Claude and George, aspiring composer and aspiring pianist, would attend an eastern conservatory together, posing as twins.

The rest of us were to attend colleges, and those who were to go on to professions such as medicine or chemistry would plan to attend professional schools afterward. Mother believed the college education was essential, even to a poet or a painter or a novelist.

Only one of us was not sent to any accredited institution. He was Richard, who was to be our criminal. Already he had made several sallies into the surrounding towns and cities, returning a few days or a few weeks later with money or jewels and with a guilty grin on his face. He was simply to be turned loose into the school of Life, and Mother warned him never to get caught.

As for me, I was sent to Princeton and enrolled as a liberal-arts student. Since, like my brothers, I was privately educated, I had no diplomas or similar records to show them, and they had to give me an equivalency examination in their place. Evidently I did quite well, for I was immediately accepted. I wired Mother, who sent a check for \$3,000 to cover my first year's tuition and expenses.

I enrolled as a History major; among my first-year courses were Medieval English Constitutional History and the Survey of Western Historical Currents; naturally, my marks were the highest in the class in both cases. I worked diligently and even with a sort of frenzied fury. My other courses,

in the sciences or in the arts, I devoted no more nor no less time to than was necessary, but history was my ruling passion.

At least, through my first two semesters of college.

June came, and final exam, and then I returned to Wisconsin, where Mother was waiting. It was June 21 when I returned; since not all colleges end their spring semester simultaneously, some of my brothers had been home for more than a week, others had not yet arrived. Richard had sent word that he was in Los Angeles, and would be with us after the first of July. Mark had signed a baseball contract and was pitching for a team in New Mexico, and he, too, would not be with us.

The summer passed rapidly. We spent it as we had in the old days before college, sharing our individual specialties, talking, meeting regularly and privately with Mother to discuss the goals that still lay ahead. Except for Claude and George, we had scattered in different directions, no two of us at the same school.

I returned to Princeton that fall, for my sophomore year. It passed, and I made the homeward journey again, and in the fall travelled once more eastward. The junior year went by likewise.

And I began to detect signs of a curious change in my inward self. It was a change I did not dare mention to Mother, on those July days when I met with her in her room near the library. I did not tell my brothers, either. I kept my knowledge to myself, brooding over it, wondering why it was that this thing should happen to me, why I should be singled out.

For I was discovering that the study of history bored me utterly and completely.

The spirit of rebellion grew in me during my final year in college. My marks had been excellent; I had achieved Phi Beta Kappa and several graduate schools were interested in having me continue my studies with them. But I had been speaking to a few chosen friends (none of whom knew my bizarre family background, of course) and my values had been slowly shifting.

I realized that I had mined history as deeply as I ever cared to. Waking and sleeping, for more than fifteen years, I had pondered Waterloo and Bunker Hill, considered the personalities of Cromwell and James II, held imaginary conversations with Jefferson and Augustus Caesar and Charles Martel.

And I was bored with it.

It began to become evident to others, eventually. One day during my final semester a friend asked me, "Is there something worrying you, Harry?"

I shook my head quickly—*too* quickly. "No," I said. "Why? Do I look worried?"

"You look worse than worried. You look obsessed."

We laughed about it, and finally we went down to the student center and had a few beers, and before long my tongue had loosened a little.

I said, "There *is* something worrying me. And you know what it is? I'm afraid I won't live up to the standards my family set for me."

Guffaws greeted me. "Come off it, Harry! Phi Bete in your junior year, top class standing, a brilliant career in history ahead of you—what do they want from you, blood?"

I chuckled and gulped my beer and mumbled something innocuous, but inside I was curdling.

Everything I was, I owed to Mother. She made me what I am. But I was played out, as a student of history; I was the family failure, the goat, the rotten egg. Raymond still wrestled gleefully with nuclear physics, with Heisenberg and Schrodinger and the others. Mark gloried in his fastball and his slider and his curve. Paul daubed canvas merrily in his Greenwich Village flat near N.Y.U., and even Robert seemed to take delight in keeping books.

Only I had failed. History had become repugnant to me. I was in rebellion against it. I would disappoint my mother, become the butt of my brothers' scorn, and live in despair, hating the profession of historian and fitted by training for nothing else.

I was graduated from Princeton summa cum laude, a few days after my twenty-first birthday. I wired Mother that I was on my way home, and

bought train-tickets.

It was a long and grueling journey to Wisconsin. I spent my time thinking, trying to choose between the unpleasant alternatives that faced me.

I could attempt duplicity, telling my mother I was still studying history, while actually preparing myself for some more attractive profession—the law, perhaps.

I could confess to her at once my failure of purpose, ask her forgiveness, for disappointing her and flawing her grand scheme, and try to begin afresh in another field.

Or I could forge ahead with history, compelling myself grimly to take an interest, cramping and paining myself so that my mother's design would be complete.

None of them seemed desirable paths to take. I brooded over it, and was weary and apprehensive by the time I arrived at our farm.

The first of my brothers I saw was Mark. He sat on the front porch of the big house, reading a book which I recognized at once and with some surprise as Volume I of Churchill. He looked up at me and smiled feebly.

I frowned. "I didn't expect to find *you* here, Mark. According to the local sports pages the Braves are playing on the Coast this week. How come you're not with them?"

His voice was a low murmur. "Because they gave me my release," he said.

"What?"

He nodded. "I'm washed up at 21. They made me a free agent; that means I can hook up with any team that wants me."

"And you're just taking a little rest before offering yourself around?"

He shook his head. "I'm through. Kaput. Harry, I just can't stand baseball. It's a silly, stupid game. You know how many times I had to stand out there in baggy knickers and throw a bit of horsehide at some jerk with a club in

his paws? A hundred, hundred-fifty times a game, every four days. For what? What the hell does it all mean? Why should I bother?"

There was a strange gleam in his eyes. I said, "Have you told Mother?"

"I don't dare! She thinks I'm on leave, or something. Harry, how can I tell her—"

"I know." Briefly, I told him of my own disenchantment with history. We were mutually delighted to learn that we were not alone in our affliction. I picked up my suitcases, scrambled up the steps, and went inside.

Dewey was cleaning up the common room as I passed through. He nodded hello glumly. I said, "How's the tooth trade?"

He whirled and glared at me viciously.

"Something wrong?" I asked.

"I've been accepted by four dental schools, Harry."

"Is that any cause for misery?"

He let the broom drop, walked over to me, and whispered, "I'll murder you if you tell Mother this. But the thought of spending my life poking around in foul-smelling oral cavities sickens me. *Sickens*."

"But I thought—"

"Yeah. You thought. You've got it soft; you just need to dig books out of the library and rearrange what they say and call it new research. I have to drill and clean and fill and plug and—" He stopped. "Harry, I'll kill you if you breathe a word of this. I don't want Mother to know that I didn't come out the way she wanted."

I repeated what I had said to Mark—and told him about Mark, for good measure. Then I made my way upstairs to my old room. I felt a burden lifting from me; I was not alone. At least two of my brothers felt the same way. I wondered how many more were at last rebelling against the disciplines of a lifetime.

Poor Mother, I thought! Poor Mother!

Our first family council of the summer was held that night. Stephen and Saul were the last to arrive, Stephen resplendent in his Annapolis garb, Saul crisp-looking and stiff-backed from West Point. Mother had worked hard to wangle appointments for those two.

We sat around the big table and chatted. The first phase of our lives, Mother told us, had ended. Now, our preliminary educations were complete, and we would undertake the final step towards our professions, those of us who had not already entered them.

Mother looked radiant that evening, tall, energetic, her white hair cropped mannishly short, as she sat about the table with her thirty-one strapping sons. I envied and pitied her: envied her for the sweet serenity of her life, which had proceeded so inexorably and without swerve toward the goal of her experiment, and pitied her for the disillusioning that awaited her.

For Mark and Dewey and I were not the only failures in the crop.

I had made discreet enquiries, during the day. I learned that Anthony found literary criticism to be a fraud and a sham, that Paul knew clearly he had no talent as a painter (and, also, that very few of his contemporaries did either), that Robert bitterly resented a career of bookkeeping, that piano-playing hurt George's fingers, that Claude had had difficulty with his composing because he was tone-deaf, that the journalistic grind was too strenuous for Jonas, that John longed to quit the seminial life because he had no calling, that Albert hated the uncertain bohemianism of an actor's life—

We circulated, all of us raising for the first time the question that had sprouted in our minds during the past several years. I made the astonishing discovery that not one of Donna Mitchell's sons cared for the career that had been chosen for him.

The experiment had been a resounding flop.

Late that evening, after Mother had gone to bed, we remained together, discussing our predicament. How could we tell her? How could we destroy her life's work? And yet, how could we compel ourselves to lives of unending drudgery?

Robert wanted to study engineering; Barry, to write. I realized I cared much more for law than for history, while Leonard longed to exchange law for the physical sciences. James, our banker-manque, much preferred politics. And

so it went, with Richard (who claimed five robberies, a rape, and innumerable picked pockets) pouring out his desire to settle down and live within the law as an honest farmer.

It was pathetic.

Summing up the problem in his neat forensic way, Leonard said, "Here's our dilemma: do we all keep quiet about this and ruin our lives, or do we speak up and ruin Mother's experiment?"

"I think we ought to continue as is, for the time being," Saul said. "Perhaps Mother will die in the next year or two. We can start over then."

"Perhaps she *doesn't* die?" Edward wanted to know. "She's tough as nails. She may last another twenty or thirty or even forty years."

"And we're past twenty-one already," remarked Raymond. "If we hang on too long at what we're doing, it'll be too late to change. You can't start studying for a new profession when you're thirty-five."

"Maybe we'll get to *like* what we're doing, by then," suggested David hopefully. "Diplomatic service isn't as bad as all that, and I'd say—"

"What about me?" Paul yelped. "I can't paint and I know I can't paint. I've got nothing but starvation ahead of me unless I wise up and get into business in a hurry. You want me to keep messing up good white canvas the rest of my life?"

"It won't work," said Barry, in a doleful voice, "We'll have to tell her."

Douglas shook his head. "We can't do that. You know just what she'll do. She'll bring down the umpteen volumes of notes she's made on this experiment, and ask us if we're going to let it all come to naught."

"He's right," Albert said. "I can picture the scene now. The big organ-pipe voice blasting us for our lack of faith, the accusations of ingratitude—"

"Ingratitude?" William shouted. "She twisted us and pushed us and molded us without asking our permission. Hell, she *created* us with her laboratory tricks. But that didn't give her the right to make zombies out of us."

"Still," Martin said, "we can't just go to her and tell her that it's all over. The shock would kill her."

"Well?" Richard asked in the silence that followed. "What's wrong with that?"

For a moment, no one spoke. The house was quiet; we heard footsteps descending the stairs. We froze.

Mother appeared, an imperial figure even in her old housecoat. "You boys are kicking up too much of a racket down here," she boomed. "I know you're glad to see each other again after a year, but I need my sleep."

She turned and strode upstairs again. We heard her bedroom door slam shut. For an instant we were all ten-year-olds again, diligently studying our books for fear of Mother's displeasure.

I moistened my lips. "Well?" I asked. "I call for a vote on Richard's suggestion."

Martin, as a chemist, prepared the drink, using Donald's medical advice as his guide. Saul, Stephen, and Raymond dug a grave, in the woods at the back of our property. Douglas and Mark built the coffin.

Richard, ending his criminal career with a murder to which we were all accessories before the fact, carried the fatal beverage upstairs to Mother the next morning, and persuaded her to sip it. One sip was all that was necessary; Martin had done his work well.

Leonard offered us a legal opinion: it was justifiable homicide. We placed the body in its coffin and carried it out across the fields. Richard, Peter, Jonas, and Charles were her pallbearers; the others of us followed in their path.

We lowered the body into the ground and John said a few words over her. Then, slowly, we closed over the grave and replaced the sod, and began the walk back to the house.

"She died happy," Anthony said. "She never suspected the size of her failure." It was her epitaph.

*** END OF THE PROJECT GUTENBERG EBOOK THERE WAS AN
OLD WOMAN— ***

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
