THE CROSS WORD PUZZLE

By NEWMAN LEVY

For many years we've lived as man and wife,
As happy now as on the day we wed.
"We're more like sweethearts," I have always said.
No cloud has dimmed the sunshine of our life,
Though now and then I'll seize a rolling pin
And playfully I'll clout her on the dome
Just to preserve domestic discipline
And demonstrate who's master in our home.
At times she'll hurl with well-directed aim
A platter or an iron at my bean.
These slight attentions keep romances green
And keep alive the hymeneal flame.

On Sunday, when the evening lamp is lit
And peace and calm contentment fill our house,
With pipe and well-loved book at ease I sit,
And at my side, in earnest thought, my spouse,
Then fade the cares and troubles of the day;
With Conrad and Lord Jim I sail the sea,
When suddenly I hear my wife's voice say,
"What word for 'female child' begins with G?"
"The word is 'Girl'," I growl. Again I try
To catch the shattered magic of my tale.
I find my place. Again with Jim I sail

Upon the tropic sea. My wife says “My,
What pronoun in three letters starts with Y?”

[6]

Calmly I rise and search about the place
To find a weapon of sufficient weight.
Aha! Upon our wall an ancient mace,
Studded with knobs of steel. The very thing.
I seize it, and with easy, graceful swing
Wallop my darling wife upon the pate,
The scone or bean, or dome, or what you will.
Silent she tumbles headlong in the grate.
I take my book and leisurely resume
My tale, and peace and quiet fill the room.

THE CROSS WORD PUZZLE BOOK

[9]

CONFESSIONS OF A CROSS WORD PUZZLE EDITOR

When I was first made unwilling Cross Word Puzzle Editor some two years ago, the procedure in deciding what puzzle would be run was limited to picking out a good-looking one from among the bunch and sending it upstairs to be set. I saw no reason to change this splendid system. At that time, I had never taken the trouble to do a puzzle and the letters of anathema and condemnation that came in by the dozens had small effect on my conscience. They were evidently from cranks and couldn't be avoided.

I must admit that the dawning of conscience began with the arrival of F.P.A., who came to work in the next room. When he discovered that I was responsible for the cross words, he formed the atrocious habit of stalking in every Monday morning bright and early (about eleven o'clock) to point out to me in sarcastic tones just what was wrong with yesterday's. Well, to make a long story short, in order to avoid the moronish feeling that usually followed such a lecture, I decided to reform and find out what a really decent puzzle was like.

I began by trying to do one the next Sunday, and thus experienced the throes of acute agony that come to all solvers of puzzles on discovering definitions left out, numbers wrong, hideously warped definitions, words not to be found inside of any known dictionary, foreign words—very foreign^[10]—and words that had no right to be dragged out of their native obscurity. Then and there, with my left hand reposing on a dictionary and my right raised in air, I took an

oath to edit the cross words to the essence of perfection. From then on, I instituted the procedure of doing the puzzles myself on the page proof—sort of trying it on the dog—applying the principle,

“If it be not fair to me,
What care I how fair it be!”

Since that momentous day, F.P.A.’s visits have grown less frequent—in fact, he has to make up excuses to come in and converse on other matters—and the cross words even came in for an occasional bouquet in Sam Pepys’s diary. So now you all know whom to thank for the perfection (more or less) of the cross word puzzle found each Sunday on the *World Magazine*’s Ingenuities Page.

MARGARET PETHERBRIDGE [\[11\]](#)

[\[Contents\]](#)

HOW TO SOLVE THEM

Solving a cross word puzzle offers numerous enjoyments of which the uninitiated are ignorant. There is the pure esthetic stimulation of looking at the pattern with its neat black and white squares, like a floor in a cathedral or a hotel bathroom; there is the challenge of the definitions, titillating the combative ganglion that lurks in all of us; there is the tantalizing elusiveness of the one little word that will satisfactorily fill a space and give clues to others that we know not of; and there is the thrill of triumph as the right word is found, fitted, and its attendant branches and roots spring into being. No better illustration could be used than a recent brilliant construction of Mr. Gelett Burgess, published in the Sunday World Magazine.

Consider the solver as he faces his problem. The numbers in the squares, he knows, refer to the definitions; in the system of numbering used in this book, the first letters only are indicated by numbers. Thus 1 horizontal means a word that will fill the space following the figure up to the next black square.

Horizontal

Lowest¹ form of life
Product¹² of coal or pine
Opposite¹⁸

Vertical

Gustated¹
Divine² nourishment

Before
Indefinite number

[12]

The solver, then, looks the puzzle over. Aha! a friend. 12 horizontal, three letters long—“product of coal or pine.” Triumphantly the solver writes TAR in the spaces and proceeds with this clue. 2 Vertical is defined as “Divine Nourishment.” It links with TAR at the second letter. A moment of thought and MANNA appears as the only possible solution. He turns to 1 vertical, the second letter of which is the first of 12 horizontal—T. The definition is “gustated,” and the word is of three letters. Why hesitate? ATE goes into the space. “A cinch!” reflects the solver, and joyously writes ENEMY in 18 horizontal, defined as “Opponent.” 3 vertical is defined as “Before,” and with -RE staring him in the face he would be dull indeed who did not write ERE. And now 1 horizontal stands revealed. “Lowest form of life,” eh? AMEBA goes down. 4 vertical is “Indefinite number.” Well, A-Y cannot be anything but ANY—and there is the corner complete, with three clues to the words in other sections.

So far the sailing has been fairly easy. But trouble waits just around the corner. There are other definitions which [13] are not so simple as “product of coal or pine.” In the far reaches of the puzzle to which the above corner belongs may be found such definitions as “Vexation (Provincial British),” “Humorous figure of speech,” “One-sided headaches” and “Droning dung-beetles.” Is the solver prepared to state that he can fill the spaces represented by those words without the assistance of the linked horizontals or verticals?

It is here that one of the greatest charms of the crossword puzzle lies: the discovery of new words by the process of building them, though entirely ignorant of their actual spelling. Consider another portion of Mr. Burgess’ puzzle. The construction of the provincial form of “Vexation” and “Humorous figure of speech” fortunately come in juxtaposition; they illustrate at once the vocabulary-building feature of the cross word puzzle and a constructional weakness which may lead to non-solution.

The definitions surrounding this precious pair are as follows: Horizontal, “Series of games,” “Self,” “Means of sustenance,” and “Surface of fibres”; Vertical, “Drinking vessel” and “Body of cavalry.” When these words are solved one finds:

[14]

Now the unfortunate part of it is that the section is completed; there are no more clues, and if one does not know what the humorous figure of speech is and what the British provincialism is, there is no way of discovering them aside from the use of deduction. A little thinking will show that the first letter of the provincialism is more likely to be “S” than any other letter, and a short search in the dictionary will give “Sturm” as the answer; while as for -EUGMA, a brief running through the alphabet will so limit the possibilities that a very short search will reveal ZEUGMA as correct.

It is extremely difficult, in the construction of cross word puzzles, to avoid the use of such “unkeyed” letters, and effort has been used to ensure the presence of common words where more than one letter is unkeyed; but the exigencies of construction will not always allow this. Nor should it always be done; allowance must be made for erudition on the part of the solver. When such a construction appears as S-ALE-E, defined as “Unequal sided and angled” and with all clues exhausted, it is with a warm sensation of culture that one triumphantly fills the blanks with “C” and “N.” And the same thrill is present when “One-sided headaches,” standing clueless with M-GRI-S, is properly filled in to become MEGRIMS.

Thus is the solution achieved; in part by the science of deduction, in part by mother-wit, in part by erudition; appeals to as many as possible of the lobes of the brain. There is no nobler satisfaction than the fitting in of the last word that makes the pattern complete; one rises to lyric heights in the contemplation of the evolution of such a word as one enthusiastic constructor included in his design,

the definition of [15] which was “Parallel pairs of simulacra in echinoideans.” The cross-constructions showed BIVIA as the necessary filler and the vocabularies of the solvers were enriched by an addition of high esthetic value and utter incomprehensibility, to be used as occasion demands.

The cross word solver becomes a collector, a connoisseur of words. They lose, to him, their mundane purpose of a suitable medium for the exchange of thoughts, and take on an esoteric significance, akin to the appeal of slip-ware to the collector of pottery or the three-cornered Mauritius to the philatelist. He and Hamlet are one. “Words, words, words”—except that he has the advantage of the melancholy one. Hamlet’s words ran in decorous file, one after the other; the solver’s twine and intertwine, each leading to others, resulting in a harmonious whole unapproached by any except the masterpieces of classic literature.

* * *

It is generally conceded that as a form of amusement, cross words are very instructive, and that as a form of instruction, they are very amusing. The first thing that strikes the eye is the pattern in which the words are intermingled. Our experience teaches that an all-over interlock is an absolute necessity, and except in a few cases you will find that the puzzles in this book possess this quality. The advantages are obvious; when all the words interlock, you can check up the horizontal by the vertical, and vice versa.

Occasional stunt patterns are interesting, but as a general thing they are apt to detract from the value of a puzzle as a thing to be solved.

The numbering system used to be quite intricate and took [16] up a lot of precious space. It required two numbers to each definition. On July 22, 1923, at the suggestion of an ardent puzzler who calls himself “Radical,” we offered the new system of numbering, which calls for only one number to a definition. It is quite simple to read either horizontally or vertically from one number, and forms a decided improvement over the old style. “Radical” deserves a special vote of thanks. All the puzzles in this book use the new system of numbering.

As for the words that find their way into cross words, strange as it may seem with the whole of the dictionary to choose from, the same old favorites have a way of recurring ceaselessly. Of course, all the two letter words are overworked, and many have to compromise on abbreviations. Our sole objection to abbreviations is that they cannot be defined without practically telling what they are. Parts of the verb “to be”; prepositions; the Egyptian Sun God, Ra; Pi, em, ma, pa, i.e., e.g., so, to, go, do, are to be found in almost every cross word puzzle, and the solver gets heartily tired of them. So the better patterns avoid these two word spaces. The three letters words contain some old favorites, too. Eel, emu and gnu are among the most popular. It seems that almost nine-tenths of the puzzles we look at have a “snake-like fish” wriggling in them somewhere. And who hasn’t found err, sin, and erg; cam, moa, tar; pal, ode, née, ace, e’er, o’er, sac; lee and lea; ape and pea; ego, ago and age; era and eon; Eli and spa; and all the notes of the scale from do to do. Truly, all these words are to the puzzler as buttons are to a shirt.

Among the longer words, the rule seems to hold that words [17] with alternating consonants and vowels can be used more frequently than others. It is evident that a word containing three consecutive consonants, for instance, may have to take, in the word just below it,

three consecutive vowels—and who hasn't heard the cross-word constructor asking plaintively for a seven-letter word beginning with e-a-o and ending with u? Among the much-used words, you'll surely find opera, onus, tenor, estop, used, ameer, renal, depot, emit, cabal, item, sere, lunar, nacre, neve, apse and the rest.

[\[Contents\]](#)

THE SCIENCE AND LORE OF CROSS WORD PUZZLES

Everyone knows the classic Riddle of the Sphinx: what is it that walks on four legs in the morning, on two at noon and on three in the evening? the answer being man, who goes on hands and knees in infancy, with bipedal locomotion in after years, and in old age with a cane.

The posing of such riddles was an important affair with ancient peoples. It was a tradition of the archaic Scandinavians, among whom it shows clear literary relations. Thus, the riddle—what is the name of the horse that flies with upright wings across the sea, the answer being ship—becomes the metaphor, of a type common in the Sagas—the upright-winged horse of the sea.

Old forms of writing take on puzzle forms. In the Maya hieroglyphics of Central America is found an element similar to the mechanism of the rebus. It is as though the symbol meaning “hair” in juxtaposition with the one meaning “ring,” might mean “hair and ring” or it might mean herring. This makes the decipherment of the Maya writing so very difficult for modern scholars. The old fashioned charade has rebus-like elements. Cryptography, of course, must have begun in the earliest times when a literate man had a secret message to convey. The most recondite systems of hidden writing have been devised both for practical use and literary fantasy, remembering only Poe’s ingenious speculations. Much of [19]the

“Baconian Theory” has revolved around supposed cryptography in Shakespeare.

Ancient and medieval folk were much given to anagrams; that is, to phrases of related meanings and made up of the same letters—as the masterpiece, “They see,” answer “The eyes,” or “Honor est a Nilo,” answer “Horatio Nelson.” Into theological controversy came such damnations as this: The Calvinistic opponents of Jacobus Arminius rearranged the letters of his name to spell, “vani orbis amicus,”—“friend of the false world.”

A recent “Baconian” argument based itself on an anagrammatical treatment of the long dedication of the sonnets. The author rearranged the letters of the dedication to form a statement that it was Lord Bacon who had written the verse. An experienced puzzler might object that he could rearrange the numerous letters to spell out a statement of almost anything, that he would rearrange the letters that make up Aristotle’s *Poetics* into a treatise proving that when the Democrats are in office hard times come. Similar to the anagram in principle is the transposition, in which you fill blanks in a text with words that are made up of the same letters; for instance, angered, enraged, derange.

Of ancient glory, too, is the palindrome, which is properly not a puzzle at all, but an ingenuity. A palindrome reads the same backward and forward, as in the familiar “Madam, I’m Adam,” and “Able was I ere I saw Elba.” Perhaps the most charming of antique palindromes is the Roman legal maxim, “Si nummi immunis,”—“if you pay you go free.”

But perhaps the most fascinating of all word puzzles are [20] the types in which words are to be guessed from definitions. There is the well-known acrostic, where with definitions as clues you arrive at a

set of words of which the initial letters, or finals or second letters or third, as may have been determined, will spell another or other words. During the struggle for Italian freedom an acrostic was seen in the shibboleth, Vittorio Emmanuele Re D'Italia, giving the name of the composer, Verdi. Most august of all is the fish symbol for Christ, which was held in much mystic veneration in the early Christian centuries. The Greek word for fish, Ichthys (Ιχθυς) was seen to be composed of the first letters of the sacred phrase, Iesus Christos Theou Huios Soter (Ἰησοῦς Χριστὸς Θεοῦ Υἱὸς Σωτήρ), meaning "Jesus Christ, Son of God, Savior."

It is the feature of determining words from definitions that has made "word forms" the most popular genus of puzzle. A word form is a set of words arranged one under the other so that their letters may be read across and down to give sensible readings, sometimes the same readings across and down and sometimes different readings. They may be of many geometric configurations, as square, pyramid, octagon, etc. Their origin is lost in the mists of time.

Word forms, especially squares, have a considerable following of very skillful adepts, most of them members of the National Puzzlers' League, who construct and solve them with the same sort of devotion that a chess player demonstrates toward chess. Among such the forms take the most learned guise and consist of the most unusual sort of words. With the adepts any word that has ever been printed in an English book is allowable, and thus there is a great selection [21] of exotic words in various spellings from old gazetteers, books of travel, etc. The adept delights in words that no one has ever heard of before. Here are several examples of recondite ingenuities.

The great public following goes to the Cross Word Puzzle, which is an expanded word form in which, commonly, only dictionary words are allowed. It is this simplicity of words, together with its larger and more elaborate construction, that makes it irresistible to the casual puzzler. A cross word square, or other geometric figure, is a logical modern development of the ancient word square. The insertion of black spaces permits it to be made of any size and gives an interesting variety of inner construction.

The cross word puzzle began its career only a few decades back. It was run for many years in the Sunday Magazine of the New York *World* and has held a considerable and steady group of followers. Recently it has come into a sudden great vogue and is being printed by many newspapers and magazines throughout the country. Cross word puzzles are now published for the first time in book form.

PROSPER BURANELLI [23]

[\[Contents\]](#)

DO'S AND DON'T'S FOR SOLVERS

Don't get scared if you can't guess the first horizontal word. Go through the list till you find a definition that you're sure of. That is the simplest method of beginning the solution. When you have written in all the words you are sure of you will have plenty of clues for the unknowns.

Don't spend too much time with the long words unless you are sure of them. They will appear when the short ones have been solved. Of course, not all the short ones are easy, but they are generally more readily attended to than the long ones. Also, there are more of them, increasing the chances of finding familiar faces among the definitions.

If you think a word is right, pencil it in lightly till you are sure. This saves erosion of paper and temper. But never hesitate to try a word that may be right. The trial and error method holds in puzzling as it does in life.

Remember that the horizontals furnish a sure check on the verticals, and vice versa.

If you are hopelessly stuck, try another puzzle. Inspiration sometimes waits for a return engagement.

A pleasant feeling of something attempted, something done accompanies the solution of a cross word puzzle. It's good for the inferiority complex. [25]

PUZZLE No. 1

A SOFT BEGINNING

By GREGORIAN

The two long central words, if solved at once, will give sufficient clues to permit of rapid solution. But should these prove elusive, surely such definitions as 9 horizontal and 29 vertical offer no difficulties. Three-letter words meaning respectively “aged” and “sorrowful” should hold few terrors for the beginner.

PUZZLE No. 5

WELL BALANCED

By MR. and MRS. H. C. WALLER

This is a nice study in words of medium length, as was dictated by the two-ply “X” construction. The solver will observe that the central interlock is of the good, familiar “L” joint sort.

PUZZLE No. 16

A WELL-TIED SAILOR'S KNOT

By CAPTAIN F. F. STEWART

The sea contributes a spacious, ample field of voyage. It is remarkable for the presence of no small units—two or three letter words. You will observe consistent splicing throughout although the center is a trifle loose.

PUZZLE No. 21

FOUR LEAF CLOVER

By MARCAM

This lucky design offers two unusual features: an excellent conventionalized figure and freedom from excess of black spaces. The solution offers difficulties; how much more the construction! The three-by-five interlocks at the sides in especial deserve worshipful consideration.

PUZZLE No. 41

A WEST POINTER

By CORPORAL ARTHUR BAISCH and SERGEANT WILLIAM M. MUNROE

The army sends a neat design—and not an easy one. The interlocking is good, and the occasional unkeyed letters are well supported by cross-clues.

[104]

*** END OF THE PROJECT GUTENBERG EBOOK THE
CROSS WORD PUZZLE BOOK ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR
USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic

work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in

addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission

of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a

Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, “Information about donations to the Project Gutenberg Literary Archive Foundation.”
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works

possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.

- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also

defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you ‘AS-IS’, WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax

deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit:
www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
