1

The history of the flying machine reaches back as far as the earliest of man's written records of his thoughts and ambitions. And one can only surmise how long ago it must have been, in the dim unchronicled past, when the idea of human flight first suggested itself to our ancestors.

¶ The ancient mythology of the Greeks reveals an interest in this problem. The philosophers who lived when Rome was ruler of the world, and the alchemists of the middle ages have left time-stained parchments of their thoughts and theories about artificial flight.

¶ And even today, after centuries of trial and error have brought an intangible dream to a streamlined actuality, the glamour and marvel of aviation still grips the minds of men. Hardly any device which humanity has fashioned has taken so lengthy a time to accomplish and, after being achieved, has been able to hold its place in the sun—in war and in peace.

¶ For it was war that brought the rapid development of the airplane into a machine that is serving man so capably as a peace-time vehicle. Bringing serum to the critically ill; winging food to flooded and snow-bound areas; transporting people over thousands of miles in a single day; and speeding up the wheels of commerce with its mail carriers; these are but a few of the almost magical feats which aviation has made possible.

¶ And, better than volumes of words could describe, one will find this vast panorama of man's struggle for mastery over the air pictured in glowing colors and realistic scenes on the hundreds of air mail stamps which have been issued by almost all countries of the world.

¶ There is a tale of danger and daring behind each square of tinted paper, a pulse-quickenning story of crossing fever-ridden jungles, battling treacherous, snow-clad mountain peaks, and risking the mocking death of desert wastes.

¶ It takes no great stretch of the imagination to visualize the magnitude and grace of the Zeppelins as pictured on the German air mail stamps. From afar, one seems to hear the deep-throated roar of the great engines and the whistle of the wind as it strums along the wires. The great "Graf," air-traveler supreme, is flying before your eyes!

¶ One needs no trip to the Mediterranean to see the blue of its waters and the gold of its sun. The Grecian issue with an indescribable delicacy of line and color suffices. The ruins of the Acropolis, perched on their hilly site, before a background of cloud-studded skies, seem but a step away. 2

¶ But to single out stamps here and there does not do full justice to this theme—the myriad perfection of air mail stamps as a pictorial record of a great triumph must be viewed in a more methodical manner, and more broadly, as a grand mural of many events.

¶ Beginning with the fabulous flight of Daedalus and his son Icarus, on wings made of wax and feathers, we can follow the story of aviation on air mail stamps. We see the Roman philosopher, Virgil, on an Italian adhesive,

gazing at a gliding eagle and remarking prophetically, “I assign limits neither to the extent nor the duration of the empire.”

¶ Even Leonardo Da Vinci, while creating paintings of undying fame, must have spent many an hour musing on the possibilities of flight by artificial means. His ideas were so detailed that he drew a plan of a glider which, although never constructed in wood and fabric, embodies several fundamental features of aero-dynamics.

¶ The progress of aviation was ruttled in this theoretical stage, however, for hundreds of years. Many problems, some of them still unthought of, had to be overcome before controlled flight was a reality.

¶ Ballooning, of course, had developed steadily after the epochal success of the Montgolfier brothers in 1783. In the latter part of the nineteenth century, Alberto Santos-Dumont began experimenting with dirigibles. His early attempts were made with non-rigid balloons, and we can see one of this Brazilian’s ships circling the Eiffel Tower of Paris, on a stamp issued by his native land.

¶ The event pictured took place on October 19, 1901, before a group of officials of the French Aero Club who were there to award a prize of 100,000 francs if Santos-Dumont could successfully fly from the Aero Club Park to the Eiffel Tower and return. Several previous attempts had resulted in failure, but this day the craft made the first lap of the journey without mishap.

¶ At a fairly high altitude the balloon rounded the tower at its very tip, but as soon as the nose pointed homeward, a strong wind struck it, slowing the motor to such an extent that it almost stopped. For the moment Santos-Dumont was between the devil and the deep blue sea. If he loosened his control from the steering lever to adjust the carburetor, the balloon might swing wild. But the fates were kind that day—his ship sailed on as he tinkered with the spark and brought his sputtering motor back to a healthy roar.

¶ On he sailed, over the Bois, then over the throngs at the Auteuil race-track while precious minutes were ticking on. He had to complete the voyage in a

half hour and only a few moments remained of this allotted time.

¶ The dirigible wobbled, it swung up and then down, the engine wheezed and coughed—but Santos-Dumont kept his eyes fixed on the goal. The cheers of the crowd rose into the air and then died to a whisper as nerves became rigid with suspense. It wasn't a question whether he would make it, now, but whether he would do it on time. For the minutes were flying faster than the ship—at last he passed over Longchamps, the Seine was crossed, and finally Santos-Dumont sailed by over the heads of the French Aero Club officials. The line had been crossed—and the flight completed in twenty-nine minutes and thirty seconds!

¶ Another countryman of this successful aeronaut was Augusto Severo who built a much larger balloon than had ever been attempted up to that time. “The Pax” which has been illustrated on an air stamp crashed, however, dashing Severo and his mechanic to a horrible death. The unfortunate airman struck the earth with such terrific force that the bones of his feet were forced through the soles of his boots.

¶ To Count Ferdinand von Zeppelin, though, goes the greatest honors for bringing this type of aircraft to a really practical development. After a hectic, military life during which he served the Union cause in the Civil War under the immortal Lincoln, he retired to dream about the vision that had lived with him since youth. To build rigid balloons, to put a skeleton of metal under a hood of fabric was his contribution to this science.

¶ Count Zeppelin was 61 years of age when his first great airliner was finished, a ship over 400 feet long and 38 feet in diameter. This was by far the largest dirigible ever built up to that time, and thousands of people flocked to witness its first flight in July, 1899. Journalists, peasants, scientists, men and women of all ages and interests came to see this huge sausage-shaped balloon navigate through space.

¶ The morning of that epochal day was clear and bright, as bright as the feverish glint in Zeppelin's eyes, as, with poorly-concealed excitement, he tested ropes and wires, and examined the hundred-and-one vital parts of the L. Z. 1. The great crowds that surged about the lake stood in hushed
awe as he came out of the hangar after the inspection was completed,

and reverently bowed his head in silent prayer. A few moments later, the roar of two powerful motors went echoing over the waters of Lake Constance, and slowly the dirigible glided from the cavernous depths of its hangar. And then, with a serene indifference, the L. Z. 1 floated upward, higher, higher into the full glare of the sun.

¶ While wave after wave of full-throated cheers announced to the world a triumphant achievement, the airship traveled three and a half miles. Seventeen minutes later, it descended safely at Immenstadt.

¶ The air mail stamps existing today bear witness to the importance of this accomplishment. Dozens of them picture the great Zeppelins from their early beginnings to their present state of perfection. Tableaus depicting them over the polar regions, and topping the crags of mountain ranges, and even in the process of construction form a visual history of the balloon.

¶ And now the Wright brothers come to the fore! After years of patient experimenting, these humble bicycle builders from Dayton, Ohio, launched a 'plane powered with a gasoline engine upon a startled world. On the bleak sands of Kitty Hawk, Orville and Wilbur Wright had seen their efforts crowned with success. Aviation had taken its biggest step forward.

¶ The Wright 'plane's successful performance, which is shown on a two-cent U. S. stamp of 1928, gave new impetus to this branch of aeronautics.

¶ And Santos-Dumont, apparently forsaking the lighter-than-air vessels that had occupied his earlier years, followed the trail blazed by these two Americans. In 1906 he perfected a biplane glider which rose from water and flew. This flight which was staged in Paris, the scene of most of the Brazilian's experiments, was the first official European ascension of a heavier-than-air craft.

¶ Flying, by this time, had become a more practical affair. With the elemental principles understood and conquered, minor improvements were developed as a result of ever-widening experience. In the summer of 1909, Bleriot crossed the English Channel in a frail monoplane and received an ovation almost as great as that accorded Lindbergh for his daring feat.

¶ But before Lindbergh could take a 'plane from New York to Paris in one triumphant jump, years had to pass, years of war that spread havoc and desolation throughout the world. But from the embers of that conflagration one thing, at least, emerged with greater glory. While guns and ammunition were dumped in the sea, and warships scrapped, the airplane rose in the eyes of the world to a new height of importance. 5

¶ For the war had wrought a great change in this device—no longer were 'planes but the playthings of a few, but servants that could serve a world!

¶ Today we can see on the air mail stamps of Spain, of Brazil, and the African Congo, portraits of the early craft—and by turning a few leaves of the album, can view the wartime “devils of the air”—the D. H. 4's, the Curtiss “Jennies,” and the deadly Fokkers.

¶ Soon after the great conflict had ended, the hundreds of daring airmen who found themselves footloose, began to gamble their lives against a new element. Where formerly they had defied machine-gun bullets, they now pitted their skill against the hazards of sea and jungle.

¶ The London “Daily Mail” had offered a handsome prize of ten thousand pounds for the first successful dash across the Atlantic Ocean. Having this as a powerful incentive, two intrepid flyers, Major Harry G. Hawker and Commander K. Mackenzie Grieve, were striving to be the first to span this dangerous trail with a non-stop flight.

¶ On the morning of Sunday, May 18, 1919, while the populace of Newfoundland's capital were sunk in slumber, these two men trundled forth their frail Sopwith biplane and launched it over the turbulent sea, a desert of water that would menace them for thousands of miles. According to available records, they soon had the ill fortune to be caught in a series of storms. In Hawker's own story of the flight, he states that after these will-o-the-wisp squalls had been overcome, the cooling system began to clog. In a few moments, the temperature of the water spurted to the boiling point.

¶ By diving quickly several times, Hawker managed to free the flow momentarily, but this expedient soon proved useless as the trouble became more acute. With its cooling agency crippled, the engine balked. Hawker

declared that when the motor had gone dead, they suffered some nerve-racking seconds as the sea came toward them at a smashing speed.

¶ But Grieve climbed to the forward part of the ship, near the gasoline tank, and furiously worked to bring life back to the stilled engine. Despite Hawker's best efforts to check the fall, they were dropping steadily and, according to his statement, were but twenty feet above the sea when the cylinders spluttered. Only ten feet when the motor took up its full load again. 6

¶ Knowing that their only hope was to sight a vessel, they searched frantically for one through the gathering dusk. At last when things seemed rather bleak, a Danish freighter, the "Mary," was espied by the anxious airmen and after twelve hundred arduous miles of flying, they landed to be rescued by this good Samaritan of the sea.

¶ Soon after, another team of aviators, Alcock and Brown, took off from the same soil, and sixteen hours from Newfoundland, they were circling over Clifden, on the west coast of Ireland. Many a son of Erin's Sabbath peace was rudely shattered as this great Vickers-Vimy bomber came droning out of the sky to bury its nose deep in an Irish bog. The "Daily Mail" prize of ten thousand pounds was theirs, and an appropriate trophy, commemorating this feat, was also presented to Alcock and Brown.

¶ Others still followed the path of the North Atlantic, even though the incentive of the prize money had been removed. Admiral Sir Mark Kerr, Captain Boyd, Chamberlain and Levine, and De Pinedo were but a few of those who followed in the wake of the triumphant Alcock.

¶ All these pioneering flights, with their attendant narratives of death and danger, are recorded on the air mail stamps of Newfoundland. The 'planes they used, and the routes the fliers followed are pictured for all time on these mute bits of postal paper.

¶ After Lindbergh had made his Atlantic voyage, he hopped off on his famous Pan-American tour. And as he flew from country to country, he left behind a trail of philatelic mementos of this venture. Costa Rica, Panama,

and Cuba, to mention but a few countries, issued special stamps to honor his visits.

¶ Exploration, too, has been immeasurably aided by the airplane and one case in point is the Amundsen-Ellsworth expedition of 1925, a polar trip which has been chronicled by a Norwegian set of air mail stamps.

¶ Their journey started on the afternoon of May 21, 1925, when two Dornier-Wal flying-boats rose from the waters of Kings Bay, Spitzbergen, and headed for the North Pole. With motors roaring in unison, the flight got under way auspiciously.

¶ After traversing six hundred miles, the navigators calculated that their position should be directly above the North Pole, but a strong wind had been blowing, which had driven them unawares over a hundred miles off their course. 7

¶ In landing their ships, however, through the jagged fissures of open ice, both 'planes were damaged. Amundsen, Ellsworth and the crew realized that their only hope of salvation lay in repairing at least one of the ships. A couple of weeks passed before this task was accomplished, and only completed in that length of time through almost superhuman endeavor.

¶ To effect a take-off, a smooth plateau of ice had to be found and small scouting parties discovered a large floe for this purpose, but it was a half mile from their 'plane. And between that broad field of ice and the Dornier-Wal, there rose a high ridge, and a bit further on, a deep chasm gouged across the trail.

¶ But to this handful of men, necessity was a taskmaster that bade them conquer all the hazards that an angry Arctic hurled against them. With nothing but primitive tools, Amundsen's party hacked a passage through the fifteen-foot thickness of the ice-ridge, a passage wide enough to accommodate the great wing-span of their craft.

¶ At last, all perils were overcome and the crew piled into the ship, dumping every unnecessary article from the 'plane to lighten the load. The motors were started. With a surge the ship moved forward—it bumped—it swayed

—it traveled 300 meters—then 400—and at last it tore itself from the ice and flew!

¶ That evening the adventurers were picked up by a cruising steamer and returned safely to their homeland—leaving another Arctic adventure behind them.

¶ And so we can see, in a never-ending panorama, the story of flight on air mail stamps. Twenty-eight hundred stamps have been issued, approximately, and one by one they add color and zest to this adventurous story.

¶ The round-the-world trappings of the “Graf” Zeppelin, the never-ending stream of long-distance flights, the break-neck air races at Cleveland, the wanderings of the DO-X, and the gigantic air armada of Balbo—all are chronicled on air mail stamps. And even while they portray the struggles of the past, they also prophesy still greater triumphs for the future.

¶ The thousands of air mail collectors, drawn from all walks of life including Emperors, Presidents, and leaders of industry, bear witness to the fascination of this hobby. Besides being an interesting avocation, however, the collecting of mint air mail stamps excels most gilt-edged securities when considered from a purely investment point of view. 8

¶ This might seem to be a rash statement, but the history of the past few years has irrefutably proven it to be true. While statistics are usually dry-as-dust things, let us examine a few. They will, in this case, prove as exciting to the collector as his air stamps themselves.

¶ First, consider the age-old economic law of supply and demand. In the case at hand, we find the demand for stamps so deep-seated and secure that it literally stretches from the cradle to the grave. From the business transacted by government agencies and the multitude of dealers in philatelic merchandise, authorities have estimated that five out of every hundred people, both here and abroad, are stamp collectors. Such a computation means, that in the United States alone, well over 5,000,000 people pursue this hobby.

¶ There are scores of philatelic publications, both weekly and monthly, which boast appreciable circulations paid for by popular subscription. By the “movie” newsreels publicizing new stamp issues, and metropolitan newspapers featuring a regular column on this subject, one can easily realize that this vast network for the dissemination of stamp information must reach a tremendous audience. And this Gargantuan following was not built in a day, a year, or a decade. No, for well over a half-century has gone into its making.

¶ This hobby was almost as firmly established before the dawn of the gas-lit nineties as it is today. Its vast army of adherents prove that stamp collecting is no fad, no fleeting joy-of-the-moment, but that it can be rightfully called the universal hobby.

¶ Placed squarely against the problem of demand is the question of supply. It is, of course, simple economics to understand that when the demand for something is greater than the supply, the value rises accordingly. And the wider the difference between these two poles, the greater will be the appreciation in value.

¶ Unused air mail stamps fit such a situation admirably. For these special adhesives are seldom printed in large quantities. Because their use is 9 limited, in the majority of cases, to prepaying matter carried by airplane, issues of stamps in lots of less than 100,000 copies are the rule, rather than the exception. Quite frequently, the smaller governments will confine a special issue to five or ten thousands copies—a fact which means that on this broad globe of ours only a handful of people can ever hope to own such a specimen, regardless of their wealth or position in life. And this number of possible possessors is materially lessened because of the fact that most specialists build their collections with blocks of four stamps of each issue as well as single copies.

¶ Looking back only three short years ago at the prices which air mail stamps commanded during the spring of 1933, the reader will quickly realize the soundness of the foregoing remarks. Ascribe it to what you will: their popularity, their intriguing history, or their limited supply—one principal fact will stand out. The simple fact that air mail stamps have, as a

whole since this time, *doubled* in value, with many instances of issues which trebled and quadrupled their former price.

¶ For the purpose of illustration, we can choose a few air mail adhesives issued by our own government for no one could question the integrity behind the postal paper of the United States. The first triumvirate of values brought out in 1918 was in six, sixteen, and twenty-four cent denominations. During April of 1933, the market price for this set was \$2.50. Today, it is offered at \$4.00.

¶ The 1923 set, however, shows a much greater appreciation in value when percentage of increase is considered. On the date mentioned above, this issue sold for \$1.25, and today commands at least \$3.00 for fine specimens. And the famous “Graf Zeppelin” issue has soared from \$10.00 in 1933 to a present-day figure which varies from \$35.00 to \$40.00 per set, depending upon condition.

¶ And to bring the reader still another amazing instance, we can refer to the special stamp printed in October, 1933, in commemoration of the Century of Progress flight made by the Graf Zeppelin. Just about two and a half years have passed since this fifty cent adhesive left the printing presses at the Bureau of Engraving. Today, copies of it are bringing \$3.00, with many dealers unable to supply them at that price because of their scarcity and unabated demand.

¶ We could, without question, continue this parade of statistics through the entire list of air stamps issued by all countries of the world, but lack the space to make such a lengthy comparison. If, however, any reader has 10 any lingering doubts, we invite him to make a complete check-up. To his amazement, we can foretell, he will find that our statements are conservative indeed.

¶ Of course, the racketeer, the bucket-shop, and the confidence-man, to mention but a few, are types of vicious parasites that fasten themselves on legitimate business, and prey on the unwary, doing as much harm to the honest merchant as to the swindled purchaser. And, we must admit, that the philatelic business is no exception to this rule.

¶ It is regrettable that while people know they cannot buy diamonds in a five-and-ten cent store, yet they will, time and again, be persuaded to buy philatelic merchandise from doubtful sources at “bargain” prices. A forgery is no bargain at any price as many a collector has learned to his embarrassment and dismay, when a counterfeit specimen is discovered in his album. And, strange as it may seem, these tricksters of the trade do not confine themselves to counterfeiting the rarities alone, but lend their shady talents to duplicating the low-priced issues also.

¶ When dealing with errors, especially, one must exercise care and judgment before purchasing. While genuine errors do make a collection distinctive and complete, yet they should only be acquired after an acknowledged specialist has guaranteed their authenticity.

¶ The House of Emil Bruechig can rightfully offer such a guarantee. Having served collectors in all parts of the globe for many years, and always maintaining a complete stock of air mail stamps, including many rarities and errors, we stand squarely behind every item we sell. As our old friends know, and our new friends will discover, their air mail stamps are always genuine and of superior quality, when they bear the insignia of:

NOTES

¶ All stamps listed in this price-list are identified by numbers from Scott's Standard Postage Stamp Catalogue, followed by the numbers from the Standard Catalogue of Air Post Stamps.

* * * * * * *

¶ Specialists are invited to send us their want-lists, as we have a varied and large stock of errors and unique items which lack of space prevents listing in the following columns.

* * * * * * *

¶ All stamps listed are guaranteed to be genuine and of superior quality. Approval selections will gladly be sent to all persons either personally known to us, or those submitting recognized references.

* * * * * * *

¶ Prices quoted are net, but a discount of 5% will be allowed on purchases ranging from \$100.00 to \$1,000.00. On purchases larger than this, a discount of 10% will be granted.

* * * * * * *

¶ Remittances may be made by Money Order or personal check. Cash is sent at sender's risk, and should always be registered. Postage charges are extra on purchases of less than one dollar.

EMIL BRUECHIG, 522 FIFTH AVE., NEW YORK, N. Y.

The purchase of mounted air mail collections remains the most economical and quickest way to achieve a good showing of these stamps. For this reason, we always carry a complete selection of collections, ranging in price from \$40.00 upward, all carefully mounted in Scott Air Post Albums. Below we list a few representative items from our stock which we shall be glad to show for examination at our New York office, or send on approval after proper references have been submitted.

33

* * * * *

Collection #1—(contains over 400 stamps)	\$40.00
Collection #2—(contains over 600 stamps)	\$100.00
Collection #3—(contains over 800 stamps)	\$150.00
Collection #4—(contains over 1100 stamps)	\$500.00
Collection #5—(contains over 2200 stamps)	\$1,375.00
Collection #6—(contains 2,833 stamps, representing over 98% of all air mail stamps issued up to the present time.)	\$5,400.00

34

Proper mounting and lettering enhances the appearance of your collection and means much toward its success when competing against others at an exhibition.

As we specialize in air mail stamps, a great fund of knowledge has been gathered concerning these issues. We can, therefore, offer our clients the opportunity to have their collections “written up” with interesting and accurate descriptions, and skillfully mounted in loose-leaf albums.

We solicit your inquiries regarding this service.

* * * * *

As we have agents in all corners of the world, our facilities for obtaining the new issues are unexcelled. Our service is an individualized one, for our customers can specify any requirements they choose. Whether they desire to restrict their purchases to certain countries, or to limit them to a definite price range, they will find us ready to meet these varying demands with exactitude.

In many cases, we are able to acquire certain issues through our network of agents that quickly command premiums, and these savings alone, which we pass on to our customers, pay the slight charge for subscribing to our new issue service.

35

*We carry a complete line of
Air Post Albums
and Accessories*

Illustrated below are the popular albums manufactured by the Scott Stamp & Coin Company, a distinguished selection to fit the purse of all collectors.

**Loose Leaf with Two Spring Back Binders
(Illustrated)**

Two spring back binders, with maroon colored Fabrikoid back and corners, maroon cloth sides. High grade linen ledger pages, linen hinged. Printed on one side only with artistic border and individual spaces for each stamp. Statistical data including dates of issue and historical information on outstanding flights.

De Luxe Edition	\$15.00 (12 lbs.)
Pages only	7.50 (6 lbs.)
Binder only, each	4.00 (4 lbs.)
Blank Pages , with heading, Covers, Semi-Official, or no heading, for De Luxe Edition	25 for 1.50 (3 lbs.)

Pages only	3.50 (5 lbs.)
Binder only	2.00 (4 lbs.)
Blank Pages , with headings, Covers, Semi-Official or no heading	25 for .40 (2 lbs.)

The International AIRPOST ALBUM

A handsome and practical album at a low price. Provides spaces for all Air Post stamps issued up to January 1, 1936. Pages printed on both sides. Bound in red cloth, attractively stamped in black.

\$1.00

Transcriber's Notes

- Silently corrected a few typos.
- Retained publication information from the printed edition: this eBook is public-domain in the country of publication.
- In the text versions only, text in *italics* is delimited by _underscores_.

*** END OF THE PROJECT GUTENBERG EBOOK THE HISTORY
AND ROMANCE OF AIR MAIL STAMPS ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, “Information about donations to the Project Gutenberg Literary Archive Foundation.”
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
