Candies

Make candies cream-smooth with today's Carnation—the milk you can use like cream, with ½ the fat calories!

The proof of good candy is in its texture. It should be creamy-smooth, not coarse or granular.

Cream itself couldn't make candy smoother than Carnation does—with ½ the fat calories of cream! Carnation looks like cream, cooks like cream, even whips! An exclusive method of evaporation slowly removes only water, at low temperature. This low-heat method gives Carnation the consistency of rich cream—with ½ the fat calories, and at ½ the cost!

Peanut Clusters

—Makes about 3½ dozen

2 cups firmly packed light brown sugar
⅔ cup (small can) undiluted Carnation Evaporated Milk
1 teaspoon vanilla
½ cup peanut butter

1½ cups (6¼-ounce can) chopped peanuts

Mix sugar and Carnation thoroughly in a 2-quart saucepan. Bring to a rolling boil over high heat. Reduce heat to medium. Boil for 5 minutes, stirring constantly. Remove from heat. Add vanilla, peanut butter and peanuts. Beat until well-mixed. Drop candy rapidly from a teaspoon onto a buttered cookie sheet. Cool.

Use a candy thermometer to take the guesswork out of candy-making when cooking to a specific temperature.

1 cup firmly packed dark brown sugar
1 cup granulated sugar
 $\frac{2}{3}$ cup (small can) undiluted Carnation Evaporated Milk

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.
