The Lenni Lenape or Delaware Indians

AN ADDRESS BY EDWIN ROBERT WALKER BEFORE THE NEW JERSEY HISTORICAL SOCIETY AT NEWARK, OCTOBER 31ST, 1917.

In commencing this address I shall take the liberty of paraphrasing the opening of Sir Walter Scott's charming novel "Ivanhoe," and say:

In that pleasant district of North America formerly known as Nova Caesarea or New Jersey, and latterly as New Jersey, there extended in ancient times a large forest covering the greater part of the beautiful hills and plains which lie between the Atlantic Ocean and the river Delaware. The remains of this extensive wood are to be seen at this day in the deciduous trees of the northern and the ever verdant pines of the southern section of our state. Here haunted of yore the stag and the doe, here were fought several of the most desperate battles of the War of the Revolution, and here also flourished in ancient times those bands of roving savages whose deeds have been rendered so popular in American story.

These aborigines are familiarly known to us as the Delaware Indians. They were known to themselves as the Lenni Lenape. I shall call them indifferently "Lenape" and "Delawares."

The name bestowed upon New Jersey by the Indians was "Shéjachbi," (pronounced as if spelled "Shá-ak-bee.") They claimed the whole area comprising New Jersey. Their great chief Teedyescung stated at the conference at Easton, Pennsylvania, in 1757, that their lands reached eastward from river to sea.

When I was a boy I presumed that the word "Delaware" was an Indian name, evolved by the savages themselves and by them bestowed upon the river and bay. I was well grown up before I learned that the word was originally three words "De La Warr," and that it was the name of an ancient English family ennobled in the time of Edward II, who reigned from 1307 to 1327. The particular scion of that ancient house for whom the Delaware River and Bay and the State of Delaware were named, was Thomas West, Lord De La Warr, born July 9, 1557. He succeeded his father in the peerage

in 1602 and interested himself in the plans for the colonization of Virginia; became a member of the Council of Virginia in 1609, and the next year was appointed governor and captain general for life. He sailed for Virginia in March, 1610, arriving at Jamestown in June following with additional emigrants and supplies, just in time to forestall the abandonment of the colony. He returned to England in 1611 and sailed again for Virginia in 1618, but died on the voyage.

It was from the lordly title of this distinguished nobleman and adventurer that we get our present name "Delaware." It is undoubtedly of Norman origin, that is, "De La Warr" is.

I cannot claim anything original for this address. Much has been written about the Indians and I have read much of what has been written. What follows has, of course, been drawn from the sources of information in works upon the Indians to be found in most of the extensive libraries.

The word Lenni Lenape is not pronounced as it is spelled,—that is, the last word is not. That, phonetically, would be Len-apee, but it is to be pronounced as though spelled Len-au- pay,—Lenâpé. The river known to us as the Delaware they called the Lenape Wihittuck, meaning river or stream of the Lenape.

The Lenape were divided into three sub-tribes, (1) the Minsi (2) the Unami and (3) the Unalachtigo. "Minsi" means people of the stony country, or mountaineers; "Unami," the people down the river, and "Unalachtigo," people who live near the ocean. The three sub-tribes had each its totemic animal from which it claimed a mystical descent. The Minsi had the wolf, the Unami the turtle and the Unalachtigo the turkey.

Whence came the Indians? Rafinesque, in "The American Nations," says that the annals of the Lenni Lenape contain an account of creation, telling of Kitanitowill, a God, the first and eternal being, who caused the earth, water, sun, moon and stars. This legend also tells of a bad spirit, Makimani, although the theory about an Indian satan seems not to be accepted by some historians,—and it seems that such a being was not believed in by the Lenape when the white men first went among them.

These annals of the Lenni Lenape given by Rafinesque tell also of a flood and the passage of the Indians and their settlement in America. From

whence they passed does not appear, and doubtless this mystery is destined to remain forever unsolved.

In 1822 Rafinesque procured in Kentucky a record pictured on wood giving some of the legends of the Lenape Indians. This record is called the Walam Olum or Red Score. The original is not in existence so far as is known, but a manuscript copy made by Rafinesque in 1833 is preserved. The first accurate reproduction of this, figures and text, was published in 1885 in "The Lenape and their Legends," with complete text and symbols of the Walam Olum, by Dr. Daniel G. Brinton, of Philadelphia.

Dr. Brinton thus summarizes the narrative of the Walam Olum:

"At some remote period the ancestors of the Lenape dwelt probably in Labrador. They journeyed south and west to the St. Lawrence, near Lake Ontario. Next they dwelt for some generations in the pine and hemlock regions of New York, fighting often with the Snake people and the Talega, agricultural nations, living in fortified towns in Ohio and Indiana. They drove out the former but the latter remained in the Upper Ohio and its branches. The Lenape, now settled on the streams in Indiana, wished to remove to the East to join the Mohegans and others of their kin who had moved there directly from northern New York. So they united with the Hurons to drive out the Talega from the Upper Ohio, which was not fully accomplished for many centuries, some Cherokees lingering there as late as 1730."

The Indians almost universally believed the dry land they knew to be a part of a great island surrounded by waters whose limits were unknown and beyond which was the home of the Light and Sun. The Delawares believed that the whole was supported by a fabled turtle, whose movements caused earthquakes, and who had been their first preserver; their legend in that respect being as follows: Back in the far distant past there was a great overflow of water, submerging the earth, and but few people survived. They took refuge on the back of a turtle. Presently a loon flew by, which they asked to dive and bring up the land. Trying, but failing in the immediate vicinity, he tried afar off and returned with a small quantity of earth in his bill. The turtle, guided by the loon, swam to the place where the earth was found and the survivors there settled and repopled the land.

It will probably be a matter of some surprise to most of you to learn that there is authority for believing that New Jersey was a wilderness, uninhabited by human beings until the year 1396, when King Wolomenap (Hollow Man) led his people into the Delaware Valley where they settled and overran New Jersey.

The Reverend Mr. Beatty, in his mission from New York in 1766, to the western Indians, received from a person whom he credited, the following tradition, which he had from some old men among the Delaware tribe: That of old time their people were divided by a river, and one part tarried behind; that they knew not for a certainty how they first came to this continent, but gave this account: that a king of their nation, when they formerly lived far to the west, left his kingdom to his two sons; that the one son making war upon the other, the latter thereupon determined to depart, and seek some new habitation; accordingly he set out accompanied by a number of people, and after wandering to and fro for the space of forty years, they at length came to the Delaware where they settled three hundred and seventy years before, that is, before 1766, which goes back to 1396. The way they kept account of this was by putting a black bead of wampum every year on a belt which they used for that purpose. Rafinesque gives a list of Lenape Kings and says their annals tell of Wolomenap (Hollow Man), the 77th, and that he was king at the falls of the Delaware (Trenton); the first one there, according to the legend.

The earliest white travelers in this part of the country looked upon the natives as simply savages and little different from the wild beasts about them, and did not trouble themselves to study their institutions or traditions, and that has been done in comparatively recent times.

The Indians found here by the first explorers and travelers were splendid physical specimens, well built and strong, with broad shoulders and small waists, dark eyes, white teeth, coarse black hair, of which the men left but a single tuft on the top of the head to accommodate an enemy's scalping knife. There were few that were crippled or deformed.

History tells us of at least one Indian who was not straight,—of stature, I mean,—and that was Billy Bowlegs, a Seminole chief, who fought in the Florida wars. But he was not a Jersey Indian.

The Indians had a habit of anointing their bodies with oil and the fat of beasts and fishes which they claimed protected their skins from the fierce rays of the summer sun and the penetrating cold of winter.

As they lived mainly by hunting and fishing, their habitations, which were called “wigwams,” were temporary structures which could easily be removed when occasion required. They generally slept on skin or leaves spread on the bare ground, and some had crude board floors, which inspired Roger Williams to indict these lines:

“God gives them sleep on ground or straw,
On sedge mats or on board,
When English beds of softest down
Sometimes no sleep afford.”

From these humble lodgings no one was ever turned away and the generous hospitality of the Indians was noticed with admiration by travelers. The Indian’s dinner generally consisted of meat and vegetables, cooked in the same vessel, which was rarely, if ever, cleansed. His breakfast generally consisted of maize, that is, Indian corn, pounded in a mortar till crushed and then boiled. This was his *ach-poan*, whence comes the name “corn-pone,” which we all know, and, I may say, all like. Their thirst was quenched by drinking the broth of boiled meat, or by drafts of pure water. They had no intoxicating liquors until the advent of the white man. Their only stimulant was tobacco, which they smoked in pipes manufactured by themselves. They had no cigars, and the festive cigarette was entirely unknown to them, in fact was then unknown to everybody.

The Lenape did not depend solely on the trophies of the chase for their subsistence. They were, to a comparatively large extent, engaged in agriculture and raised a variety of edible plants, corn, beans, sweet potatoes and squashes, among them. A hardy variety of tobacco was also cultivated.

The art of the potter was not unknown to the Delawares, and their skill in bead work and feather mantles, and dressing animal skins, excited admiration. Their weapons were mostly of stone, but there was considerable native copper used for arrow heads, and also for pipes and ornaments. They had paints and dyes made from vegetables and minerals found in their neighborhood.

In making a canoe they would fell a tree by means of their stone axes or by burning into the trunk at the base and would hollow out the trunk by fire, or in later times, would make a framework and cover it with bark and thus make a vessel large enough to carry a dozen or more men and to bear a thousand pounds or more of freight, and yet it would be so light that two or three men could carry it.

Although they were usually clad only in the skins of animals they had learned to make a coarse cloth from the fiber of nettles and other plants which they twisted and wove with their fingers. They made rope, purses and bags in the same way, and had needles made of small bones and wooden splints, with which they were quite dexterous. Like all primitive people the Indians were very fond of ornaments and adorned themselves with shells and beads and other articles skillfully and decoratively fashioned by themselves. The white beads made by the Indians were called “wampum” and the blue, purple or violet ones “suckanhoch.” They were made of shells and other suitable materials. Used first merely for ornamentation, this wampum came to be so much in demand that it assumed the character of currency, and it was so used by the white settlers as well as the Indians as neither had any other kind of money. Some white men tried to make wampum but their crude product was promptly rejected as counterfeit.

As the straight-limbed and erect Indians had no intoxicating liquors, pimpled noses were not to be found among them. Nor did they use profane language, so far as I have been able to learn. What a contrast between them and some of their white brethren! The late W. Clark Russell, in one of his inimitable sea stories, thus describes the English captain of a vessel: “His face was purple with grog blossoms, his legs were bent like the tines of a pitch-fork and he was charged to the throat with a fo-castle vocabulary,” which is, as you may have heard, redolent of profanity.

The Indians were never very numerous in New Jersey, at least not after the advent of the white settlers. It has been estimated that in 1648 there were in the various tribes about 2,000 warriors all told, which would make a total population of about 8,000. After this time they disappeared rapidly. In 1721 they were said to be few and friendly,—the fewer the more friendly, doubtless.

Kalm, a Swedish traveler, who spent some time here in 1747, observed that the disappearance of the native population was principally due to two agencies,—smallpox and brandy. It will be remembered, I believe, by everyone, that intoxicating liquors were sold to the Indians by the whites even in defiance of colonial statutes forbidding it. The practice of violating excise laws, which we have every reason to believe still goes on, appears, therefore, to be of ancient origin and to be founded upon considerable historic precedent.

The cupidity of the early settlers led them to sell liquor to the Indians and countless evils ensued. One day in 1643, at Pavonia in this state, an Indian who had become intoxicated through the Dutch plying him with liquor, was asked if he could make good use of his bow and arrow. For an answer he aimed at a Dutchman thatching a house and shot him dead. An Englishman had been killed a few days before by some Indians of the Achter Col village. The whites were exasperated and demanded the surrender of the murderers, which was refused, being contrary to Indian custom. Some of the whites trespassed on the Indians' cornfields, and when resisted shot three of the savages dead. A war seemed imminent, and in alarm many of the Indians fled for protection to the neighborhood of the Fort on Manhattan Island. The Dutch took advantage of this opportunity, and on the night of February 25, 1643, one party slaughtered their unsuspecting guests on the Island, while another party came to Pavonia and attacked the Indian village there, when the women and children were all asleep. The ferocity displayed by the whites on this occasion was never exceeded by the Indians. I will spare you any detailed account of the horrible tragedy, and will only add that as the result of the night's butchery about eighty Indians were killed and thirty made prisoners. Eleven tribes arose to avenge this cruel slaughter, but were no match for the well-armed whites, and a thousand Indians were slain. Peace was concluded at a conference, April 22, 1643, Oratamy, sachem of the Indians living at Achinheshacky (Ach-in-hesk-acky), who declared himself commissioned by the Indians, answering for them. Yet, more trouble followed, but in 1645 another treaty was made between the whites and the Indians, Oratamy making his mark thereto. In 1649 a number of leading Indians made further propositions for a lasting peace, the principal speaker being Pennekeck (the chief behind the Col), in the neighborhood of Cummipaw,—probably a considerable village of the Hackensacks. Chief Oratamy was present but said nothing. However, his

superiority was recognized by the gift of some tobacco and a gun, while the members of the tribe received only small presents.

During the ten years from 1645 to 1655, there were occasional encounters between Indians and whites, ten to fourteen of the latter being killed in that period in the vicinity of New Amsterdam.

The whites were constantly encroaching on the natives everywhere, and in the neighborhood of Pavonia a considerable settlement of Dutch had grown up. The Indians became restive as they saw their lands slipping away from them, and finally seem to have planned the extirpation of the invaders. Very early on the morning of September 15, 1655, sixty-four canoes, filled with five hundred armed Indians, landed on Manhattan Island, and the warriors speedily scattered through the village. Many altercations occurred between them and the Dutch during the day. Toward evening they were joined by two hundred more Indians. Three Dutchmen and as many Indians were killed. The Indians then crossed over to Pavonia and to Staten Island, and in the course of three days destroyed buildings and cattle, killed about fifty whites and carried off eighty men, women and children into captivity. It was the last expiring effort of the natives near New York to check the resistless advance of the Swannekins, as they called the Dutch.

For a time the Indians believed they had the advantage, and proceeded to profit by it with great shrewdness. They brought some of their prisoners to Pavonia and treated with the whites for their ransom, demanding cloth, powder, lead, wampum, knives, hatchets, pipes and other supplies. Chief Pennekeck finally sent fourteen of his prisoners over to the Dutch authorities and asked for powder and lead in return; he got what he wanted and two Indian prisoners besides. The negotiations continued, until Pennekeck had secured an ample supply of ammunition, and the Dutch had received most of their people back again. To the credit of the Indians it should be said that no complaint was made of the treatment of their captives.

The authorities of New Netherlands were greatly disturbed by the brief but destructive war just mentioned, and as a precaution against the recurrence of such an event advised the erection of a block-house of logs, in sight of the Indians, near Achinheshaky. Affairs seem to have gone smoothly between the Dutch and the Hackensacks thereafter.

When the English conquered New Netherlands in 1664, they were careful to cultivate the friendship of the Hackensack chief, and Governor Philip Carteret wrote two letters in 1666 to Oraton, as he called him, in relation to the proposed purchase of the site of Newark. The chief was very old at this time and unable to travel from Hackensack to Newark to attend the conference between the whites and the natives. And so there passed from view that striking figure in the Indian history of New Jersey. It is said that he was prudent and sagacious in council, prompt, energetic and decisive in war, as the Dutch found to their cost when they recklessly provoked him to vengeance.

The few glimpses we are afforded of this Indian chieftain clearly show him to have been a notable man among men in his day, and that he was recognized as such not only by the aborigines of New Jersey, but by the Dutch rulers with whom he came in contact. Mr. Nelson says that the name of such a man is surely worthy of commemoration, even two centuries after his spirit has joined his kindred in the happy hunting ground of his race. He was unaware, or had forgotten, that there is a public hall in Newark called "Oraton Hall" in honor of the great chief.

The names, number and position of all the New Jersey tribes have not been ascertained, but it is known that about 1650 the tribe occupying the area around the Falls of the Delaware, quaintly written "ye ffalles of ye De La Ware," where Trenton now stands, was named "Sanhican." Their chief was Mosilian, who commanded about 200 braves at the falls. An artificial stream of considerable beauty, paralleling the Delaware River and running along the southwesterly boundary of the city, built originally to supply water power to mills, but now disused for that purpose, has been named Sanhican Creek.

The Sanhicans were noted for the manufacture of stone implements, making beautiful lance and arrow heads of quartz and jasper. There are several vocabularies of their dialect extant.

Each tribe had a sachem or head chief. After the death and burial of one, the subordinate chiefs, called sagamores, met with the councillors and people, the new sachem being agreed upon, they prepared the speeches and necessary belts. They then marched to the town where the candidate was and one of the chiefs declared him to be the sachem in place of the

deceased. The common chiefs were chosen for their personal merit,—their bravery, wisdom or eloquence, and the office was not hereditary. When one was elected a sachem or chief, his name was taken from him and a new one bestowed at the time of his installation. He could be deposed at any time by the council of his tribe and his office was vacated by removal to another locality.

The council of each tribe was composed of the sachem and other chiefs, experienced warriors or aged and respected heads of families, elected by the tribe. The executive functions of the government were performed by the sachems and chiefs, who were also members of the council, which was legislature and court combined. Here matters concerning the welfare of the tribe were discussed and offences against the good order of the tribe were considered; crimes committed against individuals were not regarded as sins, and they were settled between the persons and families concerned, upon the principle *lex talionis*.

There are exceptions to all rules, and the rule of the Indians that they would not revenge wrongs upon individuals but would leave their kin to do so, seems sometimes to have been departed from, as will appear from the following: In 1671 two Dutchmen were murdered on Matinicum (now Burlington) Island in the river Delaware, by Indians, because Tashiwycan, whose sister was dead, said that he would requite her by killing Christians, which he and another Indian proceeded to do. This was reported to, and considered by, the whites in council, who were informed that two sagamores of the nation of the murderers promised their assistance to bring them in or have them knocked in the head. This scheme of vengeance was carried out, and two Indians sent by the sachems to take the murderers, came upon Tachiwycan's wigwam in the night and one of them shot him dead, and they carried his body to New Castle where it was hung in chains. The other murderer, hearing the shot, bolted into the woods and was never caught.

Each tribe had its totem, generally an animal, which was a sort of heraldic device like the coat of arms of an armor-bearing family. Each totem of the Lenape recognized a chieftain, a sachem. These were "peace chiefs." They could neither go to war themselves nor send or receive the war belt. War was declared by the people at the instigation of "war

captains,” valorous “braves,” who had distinguished themselves by personal prowess, and especially by success in forays against an enemy.

Every Indian boy was trained in the craft of field, wood and water. They were early taught to use the bow and arrow, to fish with hook and line,—hooks of bone and lines of hemp,—to spear fish with a forked pole and to trap them by means of a brush net. As the boy grew older he learned to wield the stone hatchet, known to the whites as a “tommy-hawk.” He was now expected to distinguish himself in the hunt, especially in the killing of deer, the noblest game of man,—white or red.

We are told that the Indians were wonderful archers. Presumably most of them were, and probably some of them were not. I suppose they had their William Tells and Sir Walter Tyrrels.

We all remember the legend of William Tell’s great feat in archery in 1307 when an Austrian bailiff demanded homage of him which Tell refused, and for which he was sentenced to death, but was given the chance of ransoming himself by shooting an apple from off his son’s head at very long range, a feat which he triumphantly performed.

The misadventure of Sir Walter Tyrrel was, that on August 2d, in the year 1100, William II, surnamed Rufus or the Red Rover (from the color of his hair), was hunting in the New Forest accompanied by Sir Walter Tyrrel, a French gentleman. A stag suddenly started up and Tyrrel let fly at him an arrow which struck a tree, and, glancing off, hit the King in the breast, killing him instantly. Sir Walter immediately put spurs to his horse, gained the channel coast and embarked for France, where he joined the Crusades as a voluntary penance for his involuntary crime. There is a fine old English ballad commemorating this regicidal tragedy, the refrain of which is: “Instead of a royal stag that day a King of England fell.”

When a mere boy the Indian would be permitted to sit at the council fire and hear discoursed, by the sages of his tribe, the affairs of state. When old enough to go on the war-path he was taught the war-whoop, *kowamo*, and how to hurl the war-club, and to use the tomahawk.

The Indians were fairly accurate in the computation of time. The Lenape did not have a fixed beginning to their year, but reckoned from one seeding time to another, or from when the corn was ripe. They had a word

“grachtin” for year and counted their ages and the sequence of events by yearly periods. The records of their people, preserving the memory of events, myths and fables, were kept on marked sticks. At first they were marked with fire, but latterly they were painted, the colors as well as the figures having certain meanings.

The character of the Delawares was estimated very differently. The missionaries were severe upon them. One said they were unspeakably indolent and slothful, had little or no ambition, not one in a thousand had the spirit of a man. Another spoke of their alleged bravery with the utmost contempt, and characterized them as the most ordinary and the vilest of savages. Yet, still another missionary wrote that he did not believe that there were any people on the earth more attached to their relatives and friends than were the Indians.

For more than forty years after the founding of Pennsylvania there was not a murder of a settler committed by an Indian. And General William H. Harrison wrote that a long and intimate knowledge of the Delawares, in peace and war, as friends and enemies, had left upon his mind the most favorable impressions of their character for bravery, generosity, and fidelity to their engagements.

The religious beliefs of the Delawares resembled closely those of the other Indian nations. They were the worship of Light, especially in its concrete manifestations of fire and sun; of the four winds, as the rain bringers; and of the Totemic animals. The idea of a bad spirit, a devil, appears to have been wholly unknown to the Indians until instilled into their minds by the whites, as already remarked. They had a general belief in the soul or spiritual part of man. Their doctrine was that after death the soul went South where it would enjoy a happy life for a certain time and would then return and be born again into the world.

An important class among the Indians were those who were by the whites called “medicine men,” who were really the native priests. They were of two schools, one devoting themselves to divination, the other to healing. The title of the former among the Delawares was “powwow,” meaning dreamer. They claimed the power of dreaming truthfully of the future, and were the interpreters of the dreams of others. Of course they were fakirs, though palpably so only to themselves and not at all to their followers. The

other school of the priestly class was called “medeu,” meaning conjurer. Some of them professed great austerity of life, had no fixed abode, exorcised sickness and officiated at funeral rites.

When the white settlers first came to New Jersey the Lenape had not reached the stage of progress where the office of priest had been separated from that of physician. Nor was the “profession” at all exclusive. Anyone was eligible to enter it. The Lenape were tolerant of the religious beliefs of others, although some of the medicine men tried to incite their dupes to massacre certain missionaries. The Grand Council of the Delawares in 1775 decreed religious liberty.

When the missionaries came among the Indians these shrewd and able medicine men, “powwow” and “medeu,” accustomed to practice upon the credulity of the unsuspecting red-skin, foresaw that the new faith would destroy their power and incidentally curtail their revenues, and therefore they vigorously attacked the gospel teachings, and often the self-sacrificing missionaries to the Indians were compelled to complain of the evil influence exerted by these false prophets upon the aborigines.

The principal sacred ceremony of the Indians was the dance and accompanying song. This was called the “kanti kanti,” meaning to sing. From this noisy rite the white settlers coined the word “cantico,” which still survives and is a word with us.

The early English occupants of America gave little attention to the Indian language beyond an acquisition of what was indispensable to trading with the natives. Dr. Brinton declares that William Penn professed to have acquired a mastery of it, but says that from the specimens Penn gives it is evident that all he studied was the traders’ jargon, which was about a near pure Lenape as pigeon English is to Macaulay’s periods.

In the Lenape language, which contains two slightly different dialects, all words are derived from simple monosyllabic roots, by means of affixes and suffixes, and they do not come within our grammatical category as nouns, adjectives, verbs and other parts of speech, but are indifferent themes, and to this there appear to be few exceptions. The genius of the language is *holophrastic*, that is, its effort is to express the relationship of several ideas by combining them in one word. This is an example: “popochpoalimawoawoll” (po-poch-po-al-i-ma-wo-a-woll), meaning “they

beat them” and “wunshillawoawoll” (wun-shill-a-wo-woll), meaning “they killed them.”

During the War of the Revolution the Delawares were first neutral and then partisans of the Americans and thus prevented attack by hostile Indians on the Jersey towns and settlements.

The Delawares were passionately fond of their ancestral traditions and their forefathers, and cherished the belief that they were the wisest and bravest of men. They loved to rehearse their genealogies. They were so skilled at it that they could repeat the chief and collateral lines with the utmost readiness.

The Indians were all passionately fond of games and were mostly inveterate gamblers, yet, according to authority, they cultivated among themselves a most scrupulous honesty, always kept their promises, insulted no one, were hospitable to strangers and faithful to their friends even unto death.

On the subject of the Indians’ devotion to gambling the following may be pardoned. Bret Harte, in one of his humorous and purposely ungrammatical wild western poems, speaking of his friend Bill Nye’s visit to a mining camp, said:

“For the camp has gone wild
On this lottery game,
And has even beguiled
Injin Dick’ by the same.”

and, later on,

“When Nye next met my view
Injin Dick was his mate;
And the two around town was a-lying
In a frightfully dissolute state.”

and, continuing,

“Which the war dance they had
Round a tree at the Bend
Was a sight that was sad;
And it seemed that the end

Would not justify the proceeding
As I quiet remarked to a friend.”

The Indians never forgot and rarely forgave an injury. They imitated the wild beasts in their cruelty and ferocity in wreaking vengeance on a foe. Their crude idea of justice included an eye for an eye, a tooth for a tooth, and so on. By their unwritten code the thief was compelled to restore the stolen article or its value, and for a second offense he was stripped of all his goods. When one killed another it was left to the dead Indian’s relatives to slay the offender, but unless this was done within twenty-four hours, it was usual to accept a pecuniary recompense, payable in wampum.

The simple savage, living in close contact with nature, sees only health as the normal condition of man. When the form, once animated and vigorous, lay still and cold, it was an unfathomable mystery to him, and, according to Dr. Brinton, in all the Indian tribes, there was no notion of natural death. No Indian “died,” he was always “killed.” Death in the course of nature was unknown to the Indians. When one died by disease they supposed he had been killed by sorcery, or some unknown venomous creature.

The Indians’ dread of death would lead them to speak of it by circumlocution or euphemism, as “You are about to see your grandfathers,” or, as among the whites, “If anything should happen.” They had a vague belief that the spirit of the dead haunted their earthly homes, which Philip Freneau has thus apostrophized:

“By midnight moons, o’er moistening dews,
In vestments for the chase arrayed,
The hunter still the deer pursues,
The hunter and the deer, a shade.”

A very important feature of conference with the Indians was an exchange of presents. The wily savages saw no sense in giving away valuables unless they received presents of equal value in return, and if their gifts were not reciprocated they quietly took them back, whence we get the phrase “Indian giver,” which we learn in childhood to call the playmate who gives us an apple or a stick of candy and later takes it back.

The conferences between the colonists and the Indians were attended with much formality and ceremony. At a conference held at Easton,

Pennsylvania, October 16th, 1758, there were present the governors of New Jersey and Pennsylvania, gentlemen of their councils, Indians and interpreters.

Governor Francis Bernard of New Jersey spoke to the Indians, and said:

“Brethren of all the confederated nations:

As you proposed your questions concerning Teedyescung separately, I think proper to give you a separate answer thereto.

I know not who made Teedyescung so great a man; nor do I know that he is any greater than a chief of the Delaware Indians settled at Wyomink. The title of king could not be given him by an English governor; for we know very well that there is no such person among the Indians, as what we call a king. And if we call him so, we mean no more than sachem or chief. I observe in his treaties which he has held with the governor of Pennsylvania (which I have perused since our last meeting) that he says he was a woman, till you made him a man, by putting a tomahawk into his hand; and through all of those treaties, especially in the last, held at this town, he calls you his uncles, and professes that he is dependent on you; and I know not that anything has since happened to alter his relation to you. I therefore consider him still to be your nephew.

Brethren,

I am obliged to you for your kind promises, to return the captives which have been taken from us. I hope you will not only do so, but will also engage such of our allies and nephews, as have taken captives from us, to do the same. That you may be mindful of this I give you this belt.”

After the governor had done speaking, and his answers were interpreted in the united nations and Delaware languages, the Indian chiefs were asked if they had anything to say. On which Tagashata arose, and made a speech to his cousins the Delaware and Minisink Indians, directing his discourse to Teedyescung, and said:

“Nephews,

You may remember all that passed at this council-fire. The governors who sit there have put you in mind of what was agreed upon last year: They both put you in mind of this promise, and desire you will perform it: You have promised it, and must perform it. We your uncles promised to return the prisoners. We your uncles, have promised to return all the English prisoners among us, and therefore we expect that you our cousins and nephews will do the same. As soon as you come home, we desire that you will search carefully in your towns for all the prisoners among you that have been taken out of every province, and cause them to be delivered up to your brethren. You know that it is an article of this peace that was made between you and your brethren: In conformity of which you received a large peace belt; of which belt we desire you to give an account, and let us know what is become of it, and how far you have proceeded in it.”

After this was interpreted in the Delaware language, it was observed that there were no Minisink Indians present; the governors therefore desired that Mr. Peters and Mr. Read would procure a meeting of the chiefs of the united nations, Delawares and Minisinks, and cause the speech of Tagashata to be interpreted to the Minisinks in the presence of their uncles.

A word about the title to lands in New Jersey will be of interest. After the English conquest of New Netherlands in 1664, King Charles II granted to his brother James, Duke of York, afterwards James II, certain territory including New Jersey; and the Duke of York, in the same year granted New Jersey to Lord John Berkeley and Sir George Carteret, in recognition of, and in reward for, valiant services performed by those noblemen for the unfortunate Charles I, father of the Duke. It is certainly unfortunate for anyone to have his head chopped off or be otherwise executed, and it is in that sense alone I use the word “unfortunate” with reference to the perfidious King. The tribunal that tried Charles I pronounced him a traitor, murderer and public enemy. And I agree entirely with the declaration of that illustrious martyr to liberty. Colonel Algernon Sidney, who, speaking of the execution of Charles I, said it was the

“justest and bravest action that was ever done in England or anywhere else.”

Lord Berkeley granted and conveyed his undivided one-half interest in New Jersey to John Fenwick, who conveyed the same to William Penn, Gawn Lawry and Nicholas Lucas, but in which Edward Byllynge claimed to have an equitable interest by reason of matters that are immaterial to this story. In this situation and on July 1, 1676, Sir George Carteret, William Penn, Gawn Lawry, Nicholas Lucas and Edward Byllynge, five persons, made the famous *quintipartite* deed dividing the province into East and West Jersey, whereby Sir George Carteret became the owner in severalty of East Jersey, and Penn, Lawry and Lucas of West Jersey, subject to the same trust for Byllynge as the same was subject (not disclosing what it was).

William Penn acquired this interest in New Jersey before he obtained any in Pennsylvania, and several years before he visited America the first time. Sir George Carteret, owner of East Jersey, pledged himself to purchase lands from the Indians from time to time as required by the settlers; and Penn, the dominant owner of West Jersey, found the practice of acquiring title from the Indians an old and established custom, and followed it. In 1682 the legislature passed an act in which it was provided that no person should buy lands from the Indians without a written authorization of the Province, the grant to be to the proprietors who would reimburse the purchasers. In practice, however, the deeds always appear to have been made to the purchaser, who bought of the proprietors on presentation of the deeds to them. The actual title to the soil was derived from the King of England who claimed it by right of discovery and conquest. The Indian title was a possessory one, that of an occupant only, and was not of the fee, and “fee” means the absolute ownership. Taking deeds from the Indians, therefore, was a sort of buying one’s peace in the possession and occupancy of the soil in which the grantee had the fee. The Indians had no ownership in “severalty,” which means that they did not own lots or tracts whereon they dwelt themselves or which were in possession of their tenants, but the ownership of the land, such as it was, was common to the tribe.

Perhaps you would be interested in knowing the contents of an Indian deed. I shall insert one in this paper. It appears by recital and covenant in it that the Indian grantors claimed that they were the only true, sole and proper owners of the land conveyed. The deed was made by certain Indian

sachems to certain of the council of proprietors of West Jersey. It is recorded in Liber AAA of Deeds in the office of the secretary of state, at page 434, etc., and is taken from the record *verbatim et literatim*, as follows:

“To all person to whome these presents shall Come we Caponohkamhcon Chekanthakainan Kelelaman Hokontoman all Indian Sachemas and the onely sole and proper owners of the tract of Land hereafter described and by these presents bargained and sould send Greetings Know ye that we the said Indian Sachemas for and in consideration of fivety fathom of Wampum thirty blew matchcotes thirty Red mattchcotes Eight inglish cotes twenty white blankets twenty stroudwaters thirty shirts fourty pare of Sotckings twenty one Kettles Tenn Gunns Twenty Hoes Twenty Hatchets fivety knives thirty Tobacko Boxes thirty Tobacko tongs thirty Lookeing glasses one Pound of Read Lead one rundlett of Gun Powder fourty barrs of Lead one pound of Beads one hundred tobacco pipes five hundred fishhookes five hundred Needles one hundred and fivety awles sixty flints twnety paire of Scissors and fiveteen Gallons of Rum to us in hand paid by Mahlon Stacy Samuell Jennnigs Thomas Gardiner George Deacon Christopher Wetherell John Wills John Hugg Jun Isaac Sharp and John Reading all of them members of the Councill of Proprietors for the time being within the westerne division of the Province of New Jersey The Receipt of all which said goods above mentioned We the said Sachemas doe hereby acknowledge and therewith to be fully contented satisfied and paid have granted bargained and sold aliened Enfoeffed Released and confirmed and by these presents doe fully freely and absolutely Grant Bargaine and sell Alyene enfoeffe Release and confirme unto the said Mahlon Stacy Samuell Jennings Thomas Gardiner George Deacon Christopher Wetherill John Wills John Hugg Isaac Sharpe and John Reading and to ther heires and Assignes forever all that tract or parcell of Land Situate above the falls of Delawar and lying and being within the Western division of the province of New Jersey aforesaid being Limited and bounded in manner following That is to say Begining at the River Dellawar at the mouth of a westarne brooke called Laokolong as from thence along the old Indian purchase line which was formerly made by

Coponakonkikon:	X his marke (L. S.).
Hurkanntaman:	X his marke (L. S.)
Chekanshakaman:	X his marke (L. S.).
Kelalaman:	X his marke (L. S.).”

Each nation had its boundaries, the lands within which were subdivided between the tribes. These boundaries were generally marked by mountains, rivers and lakes, and encroachments on their lands by neighboring tribes were resented as a sort of poaching on their hunting and fishing domains. There were, however, Indian paths which were common highways through the territory of the various tribes, which, later, in numerous instances, were widened into public roads, many of which exist unto this day. The Indians freely traveled by these paths from the ocean to the interior, especially to the ancient council fires at Easton, Pennsylvania.

By 1757 the Delawares had become comparatively few and a conference was held at Crosswicks with the view of settling matters in difference between them and the inhabitants of the colony, and the legislature appointed commissioners with power to inquire into the matter. Another conference was held at Crosswicks in 1758, at which Teedyescung, King of the Delawares, was present with a large number of Indians, and progress was made. The Delawares asked that a tract of land in Burlington county be bought for their occupancy for which they agreed to release all their rights to lands in New Jersey. The legislature appropriated £1600 to carry that project into effect and a tract of land of about 3,000 acres was purchased for the purpose. This place was called "Brotherton" and about 200 Indians located on it. In 1822 the remnant of the Delawares removed from New Jersey, the legislature appropriating some \$3,500 for the purchase of their new homes and transportation to them. In 1832 an appropriation of \$2,000, asked for by the Delawares, was made in final extinguishment of all Indian claims in New Jersey which arose out of the reservation to them of certain hunting and fishing rights in the treaty of 1758. In acknowledgment of the benefaction of New Jersey to the Delawares in 1822 their representative, Bartholomew S. Calvin, himself an Indian, wrote a letter to the legislature in which he said: "Not a drop of our blood have you spilled in battle—not an acre of our land have you taken but by our consent. They place the character of New Jersey in bold relief, a bright example to those states within whose territorial limits our brethren still remain. Nothing save benison can fall upon her from the lips of a Lenno Lenape."

This was the valedictory of the Lenape in New Jersey; and the haunts that knew them formerly knew them no more.

As “along the banks of the sacred Nile, Isis no longer wandering weeps, searching for the dead Osiris,” so along the banks of the historic Delaware, the Indian maiden no longer watches, waiting the return of her dusky lover from the war-path or the chase. As “the divine fires of Persia and of the Aztecs, have died out in the ashes of the past, and there is none to rekindle, and none to feed the holy flames,” so the camp fires of the Indians in New Jersey have flickered and expired, never to be relighted, never again to send a gleam athwart the nocturnal skies.

Lord Campbell concludes the introduction to his monumental work, the “Lives of the Lord Chancellors of England,” by quoting from Lord Chief Justice Crewe, and says:

“Time hath its revolutions; there must be a period and an end to all temporal things—*finis rerum*—an end of names and dignities, and whatever is *terrene*—for where is Bohun? Where is Mowbray? Where is Mortimer? Nay, which is more and most of all, where is PLANTAGENET? They are entombed in the urns and sepulchres of mortality!”

And I ask: Where are the Lenni Lenape?

Teedyescung, Oraton, Mosilian and the other sachems and sagamores of old Schéjachbi (New Jersey) have long since gone to the happy hunting ground, and the remnant of their tribes is on a reservation in the far West, perishing as a type and destined to become extinct as a people.

The Indians have gone from New Jersey, never, never to return. But we shall not forget them! While pictures are painted; while books are printed; while children perennially play Indians all around us, we shall ever be vividly reminded of those bands of roving savages whose deeds have been rendered so popular in American story.

Transcriber's Notes

A few minor errors in punctuation were fixed.

[Page 3](#): “desidious trees” changed to “deciduous trees”

[Page 5](#): “Rafineseque gives” changed to “Rafinesque gives”

[Page 12](#): “him to vengeance” changed to “him to vengeance”

[Page 15](#): “did not belive” changed to “did not believe”, “committd by an” changed to “committed by an”

[Page 16](#): “ws the “profession”” changed to “was the “profession””

[Page 20](#): “Teedyuscung so great” changed to “Teedyescung so great”

[Page 21](#): “woud procure a meting” changed to “would procure a meeting”

*** END OF THE PROJECT GUTENBERG EBOOK THE LENNI
LENAPE, OR DELAWARE INDIANS ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
