Economy - overview: A majority of the population still depends on agriculture and livestock for a livelihood, even though most of the nomads and many subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania has extensive deposits of iron ore, which account for half of total exports. The decline in world demand for this ore, however, has led to cutbacks in production. The nation's coastal waters are among the richest fishing areas in the world, but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. In the past, drought and economic mismanagement have resulted in a buildup of foreign debt. In March 1999, the government signed an agreement with a joint World Bank-IMF mission on a \$54 million enhanced structural adjustment facility (ESAF). Mauritania withdrew its membership in the Economic Community of West African States (ECOWAS) in 2000. Privatization and debt relief are

in full swing, and the rate of economic growth appears to be accelerating, especially in the construction, telecommunication, and information sectors. Diamonds and petroleum are beginning to be explored and exploited.

Mauritius Introduction

Background: Discovered by the Portuguese in 1505, Mauritius was subsequently held by the Dutch, French, and British before independence was attained in 1968. A stable democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has earned one of Africa's highest per capita incomes. Recent poor weather and declining sugar prices have slowed economic growth leading to some protests over standards of living in the Creole community.

Mauritius Economy

Economy - overview: Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. For most of the period, annual growth has been in the order of 5%

to 6%. This remarkable achievement has been reflected in increased life expectancy, lowered infant mortality, and a much-improved infrastructure. Sugarcane is grown on about 90% of the cultivated land area and accounts for 25% of export earnings. The government's development strategy centers on foreign investment. Mauritius has attracted more than 9,000 offshore entities, many aimed at commerce in India and South Africa, and investment in the banking sector alone has reached over \$1 billion. Economic performance since 1991 has continued strong with solid growth and low unemployment.

Economy - overview: Economic activity is based primarily on the agricultural sector, including fishing and livestock raising. Mayotte is not self-sufficient and must import a large portion of its food requirements, mainly from France. The economy and future development of the island are heavily dependent on French financial assistance, an important supplement to GDP. Mayotte's remote location is an obstacle to the development of tourism.

Mexico Introduction

Background: The site of advanced Amerindian civilizations, Mexico came under Spanish rule for three centuries before achieving independence early in the 19th century. A devaluation of the peso in late 1994 threw Mexico into economic turmoil, triggering the worst recession in over half a century. The nation continues to make an impressive recovery. Ongoing economic and social concerns include low real wages, underemployment for a large segment of the population, inequitable income distribution, and few advancement opportunities for the largely Amerindian population in the impoverished southern states.

Mexico Economy

Economy - overview: Mexico has a free market economy with a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. The number of state-owned enterprises in Mexico has fallen from more than 1,000 in 1982 to fewer than 200 in 2000. The ZEDILLO administration privatized and expanded competition in seaports, railroads, telecommunications, electricity, natural gas distribution, and airports. A strong export sector helped to cushion the economy's decline in 1995 and led the recovery in 1996-2000. Private consumption became the leading driver of growth in 2000, accompanied by increased employment and higher real wages. Mexico still needs to overcome many structural problems as it strives to modernize its economy and raise living standards. Income distribution is very unequal, with the top 20% of income earners accounting for 55% of income. Trade with the US and Canada has tripled since NAFTA was implemented in 1994. Mexico completed free trade agreements with the EU, Israel, El Salvador, Honduras, and Guatemala in 2000, and is pursuing additional trade agreements with countries in Latin America and Asia to lessen its dependence on the US.

Micronesia, Federated States of Economy

Economy - overview: Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The potential for a tourist industry exists, but the remoteness of the location and a lack of adequate facilities hinder development. In 1996, the country experienced a 20% reduction in revenues from the Compact of Free Association - the agreement between the US and Micronesia in which Micronesia receives \$1.3 billion in financial and technical assistance over a 15-year period until 2001 - as a result of the second step-down under the agreement. Since these revenues accounted for 57% of consolidated government revenues, reduced Compact funding resulted in a severe depression. While Micronesia's economy appears to have bottomed out in 1999, the country's medium-term economic outlook remains fragile due to likely further reductions in external grants made under the US Compact funding. Geographical isolation and a poorly developed infrastructure remain major impediments to long-term growth.

@Midway Islands

Midway Islands Introduction

Background: The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for trans-Pacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a wildlife refuge open to the public.

@Moldova

Moldova Introduction

Background: Formerly ruled by Romania, Moldova became part of the Soviet Union at the close of World War II. Although independent from the USSR since 1991, Russian forces have remained on Moldovan territory east of the Nistru (Dnister) River supporting the Slavic majority population, mostly Ukrainians and Russians, who have proclaimed a "Transnistria" republic. One of the poorest nations in Europe and plagued by a moribund economy, in 2001 Moldova became the first former Soviet state to elect a communist as its president.

Moldova Economy

Economy - overview: Moldova enjoys a favorable climate and good farmland but has no major mineral deposits. As a result, the economy depends heavily on agriculture, featuring fruits, vegetables, wine, and tobacco. Moldova must import all of its supplies of oil, coal, and natural gas, largely from Russia. Energy shortages contributed to sharp production declines after the breakup of the Soviet Union in 1991. As part of an ambitious reform effort, Moldova introduced a convertible currency, freed all prices, stopped issuing preferential credits to state enterprises, backed steady land privatization, removed export controls, and freed interest rates. Yet these efforts could not offset the impact of political and economic difficulties, both internal and regional. In 1998, the economic troubles of Russia, by far Moldova's leading trade partner, were a major cause of the 8.6% drop in GDP. In 1999, GDP fell again, by 4.4%, the fifth drop in the past seven years; exports were down, and energy supplies continued to be erratic. GDP declined slightly in 2000, with a serious drought hurting agriculture. Growth should turn positive in 2001.

Monaco Economy

Economy - overview: Monaco, situated on the French Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. The Principality has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas. Monaco does not publish national income figures; the estimates below are extremely rough.

Mongolia Introduction

Background: Long a province of China, Mongolia won its independence in 1921 with Soviet backing. A communist regime was installed in 1924. During the early 1990s, the ex-communist Mongolian People's Revolutionary Party (MPRP) gradually yielded its monopoly on power. In 1996, the Democratic Union Coalition (DUC) defeated the MPRP in a national election. Over the next four years the Coalition implemented a number of key reforms to modernize the economy and institutionalize democratic reforms. However, the former communists were a strong opposition that stalled additional reforms and made implementation difficult. In 2000, the MPRP won 72 of the 76 seats in Parliament and completely reshuffled the government. While it continues many of the reform policies, the MPRP is focusing on social welfare and public order priorities.

Mongolia Economy

Economy - overview: Economic activity traditionally has been based on agriculture and breeding of livestock. Mongolia also has extensive mineral deposits: copper, coal, molybdenum, tin, tungsten, and gold account for a large part of industrial production. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990-91, at the time of the dismantlement of the USSR. Mongolia was driven into deep recession, which was prolonged by the Mongolian People's Revolutionary Party's (MPRP) reluctance to undertake serious economic reform. The Democratic Coalition (DC) government has embraced free-market economics, easing price controls, liberalizing domestic and international trade, and attempting to restructure the banking system and the energy sector. Major domestic

privatization programs were undertaken, as well as the fostering of foreign investment through international tender of the oil distribution company, a leading cashmere company, and banks. Reform was held back by the ex-communist MPRP opposition and by the political instability brought about through four successive governments under the DC. Economic growth picked up in 1997-99 after stalling in 1996 due to a series of natural disasters and declines in world prices of copper and cashmere. In August and September 1999, the economy suffered from a temporary Russian ban on exports of oil and oil products, and Mongolia remains vulnerable in this sector. Mongolia joined the World Trade Organization (WTrO) in 1997. The international donor community pledged over \$300 million per year at the last Consultative Group Meeting, held in Ulaanbaatar in June 1999. The MPRP government, elected in July 2000, is anxious to improve the investment climate; it must also deal with a heavy burden of external debt.

Montserrat Economy

Economy - overview: Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airports and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998, but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcano and on public sector construction activity. The UK committed to a three year \$125 million aid program in 1999 to help reconstruct the economy.

Morocco Introduction

Background: Morocco's long struggle for independence from France ended in 1956. The internationalized city of Tangier was turned over to the new country that same year. Morocco virtually annexed Western Sahara during the late 1970s, but final resolution on the status of the territory remains unresolved. Gradual political reforms in the 1990s resulted in the establishment of a bicameral legislature in 1997.

Morocco Economy

Economy - overview: Morocco faces the problems typical of developing countries - restraining government spending, reducing constraints on private activity and foreign trade, and achieving sustainable economic growth. Following structural adjustment programs supported by the IMF, World Bank, and the Paris Club, the dirham is now fully convertible for current account transactions, and reforms of the financial sector have been implemented. Drought conditions depressed activity in the key agricultural sector and contributed to a stagnant economy in 1999 and 2000. During that time, however, Morocco reported large foreign exchange inflows from the sale of a mobile telephone license and partial privatization of the state-owned telecommunications company. Favorable rainfalls have led Morocco to predict a growth of 1% for 2001. Formidable long-term challenges include: servicing the external debt; preparing the economy for freer trade with the EU; and improving education and attracting foreign investment to boost living standards and job prospects for Morocco's youthful population.

Mozambique Introduction

Background: Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration by whites, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development. The ruling party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement with rebel forces ended the fighting in 1992.

Mozambique Economy

Economy - overview: Before the peace accord of October 1992, Mozambique's economy was devastated by a protracted civil war and socialist mismanagement. In 1994, it ranked as one of the poorest countries in the world. Since then, Mozambique has undertaken a series of economic reforms. Almost all aspects of the economy have been liberalized to some extent. More than 900 state enterprises have been privatized. A value-added tax, introduced in 1999, launched the government's comprehensive tax

reform program. Pending are much needed commercial code reform and greater private sector involvement in the transportation, telecommunications, and energy sectors. Since 1996, inflation has been low and foreign exchange rates relatively stable. Albeit from a small base, Mozambique's economy grew at an annual 10% rate in 1997-99, one of the highest growth rates in the world. Growth slowed and inflation rose in 2000 due to devastating flooding in the early part of the year. Both indicators should recover in 2001. The country depends on foreign assistance to balance the budget and to pay for a trade imbalance in which imports greatly outnumber exports. The trade situation should improve in the medium term, however, as trade and transportation links to South Africa and the rest of the region have been improved and sizeable foreign investments are beginning to materialize. Among these investments are metal production (aluminum, steel), natural gas, power generation, agriculture, fishing, timber, and transportation services. Mozambique has received a formal cancellation of a large portion of its external debt through an IMF initiative and is scheduled to receive additional relief.

Namibia Introduction

Background: South Africa occupied the German colony of Sud-West Afrika during World War I and administered it as a mandate until after World War II when it annexed the territory. In 1966 the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that was soon named Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Independence came in 1990.

Namibia Economy

Economy - overview: The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 20% of GDP. Namibia is the fourth-largest exporter of nonfuel minerals in Africa and the world's fifth-largest producer of uranium. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Namibia also produces large quantities of lead, zinc, tin, silver, and tungsten. Half of the population depends on agriculture (largely subsistence agriculture) for its livelihood. Namibia must import some of its food. Although per capita GDP is four times the per capita GDP of Africa's poorer countries, the majority of Namibia's people live in pronounced poverty because of large-scale unemployment, the great inequality of income distribution, and the large amount of wealth going to foreigners. The Namibian economy has close links to South Africa. GDP growth in 2000 was led by gains in the diamond and fish sectors. Agreement has been reached on the privatization of several more enterprises in coming years, which should stimulate long-run foreign investment. Growth in 2001 could be 5.5% provided the world economy remains stable.

Nauru Introduction

Background: Nauru's phosphate deposits began to be mined early in the 20th century by a German-British consortium; the island was occupied by Australian forces in World War I. Upon achieving independence in 1968, Nauru became the smallest independent republic in the world; it joined the UN in 1999.

Nauru Economy

Economy - overview: Revenues of this tiny island have come from exports of phosphates, but reserves are expected to be exhausted within five to ten years. Phosphate production has declined since 1989, as demand has fallen in traditional markets and as the marginal cost of extracting the remaining phosphate increases, making it less internationally competitive.

While phosphates have given Nauruans one of the highest per capita incomes in the Third World, few other resources exist with most necessities being imported, including fresh water from Australia. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of phosphate income have been invested in trust funds to help cushion the transition and provide for Nauru's economic future. The government has been borrowing heavily from the trusts to finance fiscal deficits. To cut costs the government has called for a freezing of wages, a reduction of over-staffed public service departments, privatization of numerous government agencies, and closure of some overseas consulates. In recent years Nauru has encouraged the registration of offshore banks and corporations. Tens of billions of dollars have been channeled through their accounts. Few comprehensive statistics on the Nauru economy exist, with estimates of Nauru's per capita GDP varying widely.

Navassa Island Introduction

Background: This uninhabited island was claimed by the US in 1857 for its guano, and mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the Coast Guard to the Department of the Interior. A 1998 scientific expedition to the island described it as a unique preserve of Caribbean biodiversity; the following year it became a National Wildlife Refuge.

Nepal Economy

Economy - overview: Nepal is among the poorest and least developed countries in the world with nearly half of its population living below the

poverty line. Agriculture is the mainstay of the economy, providing a livelihood for over 80% of the population and accounting for 41% of GDP. Industrial activity mainly involves the processing of agricultural produce including jute, sugarcane, tobacco, and grain. Production of textiles and carpets has expanded recently and accounted for about 80% of foreign exchange earnings in the past three years. Agricultural production is growing by about 5% on average as compared with annual population growth of 2.3%. Since May 1991, the government has been moving forward with economic reforms, particularly those that encourage trade and foreign investment, e.g., by reducing business licenses and registration requirements in order to simplify investment procedures. The government has also been cutting expenditures by reducing subsidies, privatizing state industries, and laying off civil servants. More recently, however, political instability - five different governments over the past few years - has hampered Kathmandu's ability to forge consensus to implement key economic reforms. Nepal has considerable scope for accelerating economic growth by exploiting its potential in hydropower and tourism, areas of recent foreign investment interest. Prospects for foreign trade or investment in other sectors will remain poor, however, because of the small size of the economy, its technological backwardness, its remoteness, its landlocked geographic location, and its susceptibility to natural disaster. The international community's role of funding more than 60% of Nepal's development budget and more than 28% of total budgetary expenditures will likely continue as a major ingredient of growth.

Netherlands Economy

Economy - overview: The Netherlands is a prosperous and open economy depending heavily on foreign trade. The economy is noted for stable industrial relations, moderate inflation, a sizable current account surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs no more than 4% of the labor force but provides large surpluses for the food-processing industry and for exports. The Dutch rank third worldwide in value of agricultural exports, behind the US and France. The Dutch economy has expanded by 3% or more in each of the last four years and real GDP growth is likely to be about 3.6% in 2001. The government in 2001 will implement its most comprehensive tax reform since World War II,

designed to reduce high income tax levels and redirect the fiscal burden onto consumption. The Dutch were among the first 11 EU countries establishing the euro currency zone on 1 January 1999.

Netherlands Antilles Introduction

Background: Once the center of the Caribbean slave trade, the island of Curacao was hard hit by the abolition of slavery in 1863. Its prosperity (and that of neighboring Aruba) was restored in the early 20th century with the construction of oil refineries to service the newly discovered Venezuelan oil fields. The island of Sint Maarten is shared with France; its northern portion is named Saint Martin and is part of Guadeloupe.

Netherlands Antilles Economy

Economy - overview: Tourism, petroleum refining, and offshore finance are the mainstays of this small economy, which is closely tied to the outside world. Although GDP has declined slightly in each of the past five years, the islands enjoy a high per capita income and a well-developed infrastructure as compared with other countries in the region. Almost all consumer and capital goods are imported, with Venezuela, the US, and Mexico being the major suppliers. Poor soils and inadequate water supplies hamper the development of agriculture.

New Caledonia Economy

Economy - overview: New Caledonia has more than 20% of the world's known nickel resources. In recent years, the economy has suffered because of depressed international demand for nickel, the principal source of export earnings. Only a negligible amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, the substantial financial support from France and tourism are keys to the health of the economy. The situation in 1998 was clouded by the spillover of financial problems in East Asia and by lower prices for nickel. Nickel prices jumped in 1999-2000, and large additions were made to capacity. French Government interests in the New Caledonian nickel industry are being transferred to local ownership.

New Zealand Introduction

Background: The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both World Wars. New Zealand withdrew from a number of defense alliances during the 1970s and 1980s. In recent years the government has sought to address longstanding native Maori grievances.

New Zealand Economy

Economy - overview: Since 1984 the government has accomplished major economic restructuring, moving an agrarian economy dependent on concessionary British market access toward a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes, broadened and deepened the technological capabilities of the industrial sector, and contained inflationary pressures. Inflation remains among the lowest in the industrial world. Per capita GDP has been moving up toward the levels of the big West European economies. New Zealand's heavy dependence on trade leaves its growth prospects vulnerable to economic performance in Asia, Europe, and the US. With the FY00/01 budget pushing up pension and other public outlays, the government's ability to meet fiscal targets will depend on sustained economic growth.

Nicaragua Introduction

Background: Settled as a colony of Spain in the 1520s, Nicaragua gained its independence in 1821. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979.

Nicaraguan aid to leftist rebels in El Salvador caused the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. Free elections in 1990 and again in 1996 saw the Sandinistas defeated. The country has slowly rebuilt its economy during the 1990s, but was hard hit by Hurricane Mitch in 1998.

Nicaragua Economy

Economy - overview: Nicaragua, one of the hemisphere's poorest countries, faces low per capita income, flagging socio-economic indicators, and huge external debt. While the country has made progress toward macro-economic stabilization over the past few years, a banking crisis and scandal has shaken the economy. Managua will continue to be dependent on international aid and debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. Donors have made aid conditional on improving governability, the openness of government financial operation, poverty alleviation, and human rights. Nicaragua met the conditions for additional debt service relief in December 2000. Growth should remain moderate to high in 2001.

Niger Introduction

Background: Not until 1993, 33 years after independence from France, did Niger hold its first free and open elections. A 1995 peace accord ended a five-year Tuareg insurgency in the north. Coups in 1996 and 1999 were followed by the creation of a National Reconciliation Council that effected a transition to civilian rule in December 1999.

Niger Economy

Economy - overview: Niger is a poor, landlocked Sub-Saharan nation, whose economy centers on subsistence agriculture, animal husbandry, reexport trade, and increasingly less on uranium, because of declining world demand. The 50% devaluation of the West African franc in January 1994 boosted exports of livestock, cowpeas, onions, and the products of Niger's small cotton industry. The government relies on bilateral and multilateral aid - which was suspended following the April 1999 coup d'etat - for operating expenses and public investment. In 2000, the World Bank approved a structural adjustment loan of \$35 million to help support fiscal reforms. However, reforms could prove difficult given the government's bleak financial situation.

Nigeria Introduction

Background: Following nearly 16 years of military rule, a new constitution was adopted in 1999 and a peaceful transition to civilian government completed. The new president faces the daunting task of rebuilding a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement, and institutionalizing democracy. In addition, the OBASANJO administration must defuse longstanding ethnic and religious tensions, if it is to build a sound foundation for economic growth and political stability.

Nigeria Economy

Economy - overview: The oil-rich Nigerian economy, long hobbled by political instability, corruption, and poor macroeconomic management, is undergoing substantial economic reform under the new civilian administration. Nigeria's former military rulers failed to diversify the economy away from overdependence on the capital-intensive oil sector, which provides 20% of GDP, 95% of foreign exchange earnings, and about 65% of budgetary revenues. The largely subsistence agricultural sector has failed to keep up with rapid population growth, and Nigeria, once a large

net exporter of food, now must import food. Following the signing of an IMF stand-by agreement in August 2000, Nigeria received a debt-restructuring deal from the Paris Club and a \$1 billion loan from the IMF, both contingent on economic reforms. Increases in foreign investment and oil production combined with high world oil prices should push growth over 4% in 2001-02.

Niue Introduction

Background: Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the rest of the Cook Islands, have caused it to be separately administered. The population of the island continues to drop (from a peak of 5,200 in 1966 to 2,100 in 2000) with substantial emigration to New Zealand.

Niue Economy

Economy - overview: Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of migration of Niueans to New Zealand. Efforts to increase GDP include the promotion of tourism and a financial services industry.

Northern Mariana Islands Introduction

Background: Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the 1970s not to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the US was approved in 1975. A new government and constitution went into effect in 1978.

Northern Mariana Islands Economy

Economy - overview: The economy benefits substantially from financial assistance from the US. The rate of funding has declined as locally generated government revenues have grown. The key tourist industry employs about 50% of the work force and accounts for roughly one-fourth of GDP. Japanese tourists predominate. Annual tourist entries have exceeded one-half million in recent years, but financial difficulties in Japan have caused a temporary slowdown. The agricultural sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Garment production is by far the most important industry with employment of 12,000 mostly Chinese workers and sizable shipments to the US under duty and quota exemptions.

@Norway

Norway Introduction

Background: Despite its neutrality, Norway was not able to avoid occupation by Germany in World War II. In 1949, neutrality was abandoned and Norway became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. The current focus is on containing spending on the extensive welfare system and planning for the time when petroleum reserves are depleted. In referenda held in 1972 and 1994, Norway rejected joining the EU.

Norway Economy

Economy - overview: The Norwegian economy is a prosperous bastion of welfare capitalism, featuring a combination of free market activity and government intervention. The government controls key areas, such as the vital petroleum sector (through large-scale state enterprises). The country is richly endowed with natural resources - petroleum, hydropower, fish, forests, and minerals - and is highly dependent on its oil production and international oil prices; in 1999, oil and gas accounted for 35% of exports. Only Saudi Arabia exports more oil than Norway. Oslo opted to stay out of the EU during a referendum in November 1994. Growth picked up in 2000 to 2.7%, compared to the meager 0.8% of 1999, but may fall back in 2001. The government moved ahead with privatization in 2000, even proposing the sale of up to one-third of the 100% state-owned oil company Statoil. Despite their high per capita income and generous welfare benefits, Norwegians worry about that time in the next two decades when the oil and gas begin to run out. Accordingly, Norway has been saving its oil-boasted budget surpluses in a Government Petroleum Fund, which is invested abroad and now is valued at more than \$43 billion.

Oman Economy

Economy - overview: Oman's economic performance improved significantly in 2000 due largely to the upturn in oil prices. The government is moving ahead with privatization of its utilities, the development of a body of commercial law to facilitate foreign investment, and increased budgetary outlays. Oman continues to liberalize its markets and joined the World Trade Organization (WTrO) in November 2000.

@Pacific Ocean

Pacific Ocean Introduction Top of Page

Background: The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean). Strategically important access waterways include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Pacific Ocean south of 60 degrees south.

Pacific Ocean Geography

Location: body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates: 0 00 N, 160 00 W

Map references: World

Area: total: 155.557 million sq km

note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Flores Sea, Gulf of Alaska, Gulf of Tonkin, Java Sea,

Philippine Sea, Savu Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, Timor Sea, and other tributary water bodies

Area - comparative: about 15 times the size of the US; covers about 28% of the global surface; larger than the total land area of the world

Coastline: 135,663 km

Climate: planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal - a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain: surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation extremes: lowest point: Challenger Deep in the Mariana Trench -10,924 m

highest point: sea level 0 m

Natural resources: oil and gas fields, polymetallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards: surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the "Pacific Ring of Fire"; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment - current issues: endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea

Geography - note: the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

Pacific Ocean Economy

Economy - overview: The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It

provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of Australia, NZ, China, US, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has slowed but not stopped new drillings.

Pacific Ocean Transportation

Ports and harbors: Bangkok (Thailand), Hong Kong, Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Transportation - note: Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state)

Pacific Ocean Transnational Issues

Disputes - international: some maritime disputes (see littoral states)

Pakistan Introduction

Background: The separation in 1947 of British India into the Muslim state of Pakistan (with two sections West and East) and largely Hindu India was never satisfactorily resolved. A third war between these countries in 1971 resulted in East Pakistan seceding and becoming the separate nation of Bangladesh. A dispute over the state of Kashmir is ongoing. In response to Indian nuclear weapons testing, Pakistan conducted its own tests in 1998.

Pakistan Geography

Location: Southern Asia, bordering the Arabian Sea, between India on the east and Iran and Afghanistan on the west and China in the north

Geographic coordinates: 30 00 N, 70 00 E

Map references: Asia

Area: total: 803,940 sq km

land: 778,720 sq km

water: 25,220 sq km

Pakistan Economy

Economy - overview: Pakistan is a poor, heavily populated country, suffering from internal political disputes, lack of foreign investment, and a costly confrontation with neighboring India. Pakistan's economic outlook continues to be marred by its weak foreign exchange position, which relies on international creditors for hard currency inflows. The MUSHARRAF government will face an estimated \$21 billion in foreign debt coming due in 2000-03, despite having rescheduled nearly \$2 billion in debt with Paris Club members. Foreign loans and grants provide approximately 25% of government revenue, but debt service obligations total nearly 50% of government expenditure. Although Pakistan successfully negotiated a \$600 million IMF Stand-By Arrangement, future loan installments will be jeopardized if Pakistan misses critical IMF benchmarks on revenue collection and the fiscal deficit. MUSHARRAF has complied largely with IMF recommendations to raise petroleum prices, widen the tax net, privatize public sector assets, and improve the balance of trade. However, Pakistan's economic prospects remain uncertain; too little has changed despite the new administration's intentions. Foreign exchange reserves hover at roughly \$1 billion, GDP growth hinges on crop performance, the import bill has been hammered by high oil prices, and both foreign and domestic investors remain wary of committing to projects in Pakistan.

@Palmyra Atoll

Palmyra Atoll Introduction

Background: The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now privately owned by the Nature Conservancy. This organization is managing the atoll as a nature preserve. The lagoons and surrounding waters within the 12 nautical mile US territorial seas were transferred to the US Fish and Wildlife service and designated a National Wildlife Refuge in January 2001.

Panama Introduction

Background: With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. On 7 September 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of 1999. Certain portions of the Zone and increasing

responsibility over the Canal were turned over in the intervening years. With US help, dictator Manuel NORIEGA was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were turned over to Panama by or on 31 December 1999.

Panama Economy

Economy - overview: Panama's economy is based primarily on a well-developed services sector that accounts for three-fourths of GDP. Services include the Panama Canal, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. A slump in Colon Free Zone and agricultural exports, high oil prices, and the withdrawal of US military forces held back economic growth in 2000. The government plans public works programs, tax reforms, and new regional trade agreements in order to stimulate growth in 2001.

@Papua New Guinea

Papua New Guinea Introduction

Background: The eastern half of the island of New Guinea - second largest in the world - was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997, after claiming some 20,000 lives.

Papua New Guinea Economy

Economy - overview: Papua New Guinea is richly endowed with natural resources, but exploitation has been hampered by the rugged terrain and the high cost of developing infrastructure. Agriculture provides a subsistence livelihood for 85% of the population. Mineral deposits, including oil, copper, and gold, account for 72% of export earnings. The 3.4% average annual growth rate of GDP during 1979-1998 conceals considerable year-to-year variation resulting from external economic shocks, natural disasters, and economic management problems. There has been little growth in the last half of the 1990s, with real GDP in 1999 barely 3% higher than in 1994, not enough to compensate for population growth. A new administration under the leadership of Prime Minister Mekere MORAUTA in July 1999 has promised to restore integrity to state institutions, to stabilize the kina, to restore stability to the national budget, to privatize public enterprises where appropriate, and to ensure ongoing peace on Bougainville. The government has had considerable success in attracting international support, specifically gaining the support of the IMF and the World Bank in securing development assistance loans. Significant challenges remain for MORAUTA, however, including gaining further investor confidence, specifically for the proposed Papua New Guinea-Australia oil pipeline, continuing efforts to privatize government assets, and in maintaining the support from members of Parliament who after 15 July 2001 can dismiss him with a vote of no-confidence.

Paracel Islands Introduction Top of Page

Background: This archipelago is surrounded by productive fishing grounds and potentially large oil reserves. In 1932, French Indochina annexed the islands and set up a weather station on Prattle Island; maintenance was continued by its successor Vietnam. China has occupied the Paracel Islands since 1974, when its troops captured a South Vietnamese garrison occupying the western islands. However, the islands are still claimed by Vietnam and Taiwan.

Paraguay Introduction

Background: In the disastrous War of the Triple Alliance (1865-70), Paraguay lost two-thirds of all adult males and much of its territory. It stagnated economically for the next half century. In the Chaco War of 1932-35, large, economically important areas were won from Bolivia. The 35-year military dictatorship of Alfredo STROESSNER was overthrown in 1989, and, despite a marked increase in political infighting in recent years, relatively free and regular presidential elections have been held since then.

Paraguay Economy

Economy - overview: Paraguay has a market economy marked by a large informal sector. The informal sector features both reexport of imported consumer goods to neighboring countries as well as the activities of thousands of microenterprises and urban street vendors. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. A large percentage of the population derives their living from agricultural activity, often on a subsistence basis. The formal economy grew by an average of about 3% annually in 1995-97, but GDP declined slightly in 1998 and 1999. On a per capita basis, real income has stagnated at 1980 levels. Most observers attribute Paraguay's poor economic performance to political uncertainty, corruption, lack of progress on structural reform,

substantial internal and external debt, and deficient infrastructure. Growth rebounded slightly in 2000.

Peru Economy

Economy - overview: The Peruvian economy has become increasingly market-oriented, with major privatizations completed since 1990 in the mining, electricity, and telecommunications industries. Thanks to strong foreign investment and the cooperation between the FUJIMORI government and the IMF and World Bank, growth was strong in 1994-97 and inflation was brought under control. In 1998, El Nino's impact on agriculture, the financial crisis in Asia, and instability in Brazilian markets undercut growth. And 1999 was another lean year for Peru, with the aftermath of El Nino and the Asian financial crisis working its way through the economy. Political instability resulting from the presidential election and FUJIMORI's subsequent departure from office limited economic growth in 2000.

Philippines Introduction

Background: The Philippines were ceded by Spain to the US in 1898 following the Spanish-American War. They attained their independence in 1946 after being occupied by the Japanese in World War II. The 21-year rule of Ferdinand MARCOS ended in 1986 when a widespread popular rebellion forced him into exile. In 1992, the US closed down its last military bases on the islands. The Philippines has had two electoral presidential transitions since Marcos' removal by "people power." In January 2001, the Supreme Court declared Joseph ESTRADA unable to rule in view of mass resignations from his government and administered the oath of office to Vice President Gloria MACAPAGAL-ARROYO as his constitutional successor. The government continues to struggle with ongoing Muslim insurgencies in the south.

Philippines Economy

Economy - overview: In 1998 the Philippine economy - a mixture of agriculture, light industry, and supporting services - deteriorated as a result of spillover from the Asian financial crisis and poor weather conditions. Growth fell to about -0.5% in 1998 from 5% in 1997, but recovered to about 3% in 1999 and 3.6% in 2000. The government has promised to continue its economic reforms to help the Philippines match the pace of development in the newly industrialized countries of East Asia. The strategy includes improving infrastructure, overhauling the tax system to bolster government revenues, moving toward further deregulation and privatization of the economy, and increasing trade integration with the region.

@Pitcairn Islands

Pitcairn Islands Introduction

Background: Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to about 50 today.

Poland Introduction

Background: Poland gained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite country following the war, but one that was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union "Solidarity" that over time became a political force and by 1990 had swept parliamentary elections and the presidency. A "shock therapy" program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe, boosting hopes for acceptance to the EU. Poland joined the NATO alliance in 1999.

Poland Geography

Location: Central Europe, east of Germany

Geographic coordinates: 52 00 N, 20 00 E

Map references: Europe

Area: total: 312,685 sq km

land: 304,465 sq km

water: 8,220 sq km

Area - comparative: slightly smaller than New Mexico

Land boundaries: total: 2,888 km

border countries: Belarus 605 km, Czech Republic 658 km, Germany 456 km, Lithuania 91 km, Russia (Kaliningrad Oblast) 206 km, Slovakia 444 km, Ukraine 428 km

Coastline: 491 km

Maritime claims: exclusive economic zone: defined by international treaties

territorial sea: 12 NM

Climate: temperate with cold, cloudy, moderately severe winters with frequent precipitation; mild summers with frequent showers and thundershowers

Terrain: mostly flat plain; mountains along southern border

Elevation extremes: lowest point: Raczki Elblaskie -2 m

highest point: Rysy 2,499 m

Natural resources: coal, sulfur, copper, natural gas, silver, lead, salt, arable land

Land use: arable land: 47%

permanent pastures: 13%

forests and woodland: 29%

other: 10% (1993 est.)

Irrigated land: 1,000 sq km (1993 est.)

Natural hazards: NA

Environment - current issues: situation has improved since 1989 due to decline in heavy industry and increased environmental concern by postcommunist governments; air pollution nonetheless remains serious because of sulfur dioxide emissions from coal-fired power plants, and the resulting acid rain has caused forest damage; water pollution from industrial and municipal sources is also a problem, as is disposal of hazardous wastes

Environment - international agreements: party to: Air Pollution, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Wetlands

signed, but not ratified: Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulphur 94, Climate Change-Kyoto Protocol

Geography - note: historically, an area of conflict because of flat terrain and the lack of natural barriers on the North European Plain

Poland Economy

Economy - overview: Poland has steadfastly pursued a policy of liberalizing the economy and today stands out as one of the most successful and open transition economies. GDP growth has been strong and steady since 1992 - the best performance in the region. The privatization of small and medium state-owned companies and a liberal law on establishing new firms has allowed for the rapid development of a vibrant private sector. In contrast, Poland's large agricultural sector remains handicapped by structural problems, surplus labor, inefficient small farms, and lack of investment. Restructuring and privatization of "sensitive sectors" (e.g., coal, steel, railroads, and energy) has begun. Structural reforms in health care, education, the pension system, and state administration have resulted in larger than expected fiscal pressures. Further progress in public finance depends mainly on privatization of Poland's remaining state sector. The government's determination to enter the EU as soon as possible affects most aspects of its economic policies. Improving Poland's outsized current account deficit and reining in inflation are priorities. Warsaw leads the region in foreign investment and needs a continued large inflow.

Portugal Introduction

Background: Following its heyday as a world power during the 15th and 16th centuries, Portugal lost much of its wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the Napoleonic Wars, and the independence in 1822 of Brazil as a colony. A 1910 revolution deposed the monarchy; for most of the next six decades repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year Portugal granted independence to all of its African colonies. Portugal entered the EC in 1985.

Portugal Economy

Economy - overview: Portugal is an upcoming capitalist economy with a per capita GDP two-thirds that of the four big West European economies. The country qualified for the European Monetary Union (EMU) in 1998 and joined with 10 other European countries in launching the euro on 1 January 1999. The year 2000 was marked by moderation in growth, inflation, and unemployment. The country continues to run a sizable trade deficit. The government is working to reform the tax system, to modernize capital plant, and to increase the country's competitiveness in the increasingly integrated world markets. Growth is expected to fall off slightly in 2001. Improvement in the education sector is critical to the long-run catch-up process.

Puerto Rico Economy

Economy - overview: Puerto Rico has one of the most dynamic economies in the Caribbean region. A diverse industrial sector has surpassed agriculture as the primary locus of economic activity and income. Encouraged by duty-free access to the US and by tax incentives, US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income, with estimated arrivals of nearly 5 million tourists in 1999. Prospects for 2001 are clouded by a probable slowing down in both the construction and tourist sectors and by increasing inflation, particularly in energy and food prices; estimated growth will be 2%.

Qatar Introduction

Background: Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the amir who had ruled the country since 1972. He was overthrown by his son, the current Amir HAMAD bin Khalifa Al Thani, in a bloodless coup in 1995. In 2001, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. Oil and natural gas revenues enable Qatar to have a per capita income not far below the leading industrial countries of Western Europe.

Qatar Economy

Economy - overview: Oil accounts for more than 30% of GDP, roughly 80% of export earnings, and 66% of government revenues. Proved oil reserves of 3.7 billion barrels should ensure continued output at current levels for 23 years. Oil has given Qatar a per capita GDP comparable to that of the leading West European industrial countries. Qatar's proved reserves of natural gas exceed 7 trillion cubic meters, more than 5% of the world total, third largest in the world. Production and export of natural gas are becoming increasingly important. Long-term goals feature the development of offshore petroleum and the diversification of the economy. In 2000,

Qatar posted its highest ever trade surplus of \$6 billion, due mainly to high oil prices and increased natural gas exports.

Reunion Introduction

Background: The Portuguese discovered the uninhabited island in 1513. From the 17th to the 19th centuries, French immigration supplemented by influxes of Africans, Chinese, Malays, and Malabar Indians gave the island its ethnic mix. The opening of the Suez Canal in 1869 cost the island its importance as a stopover on the East Indies trade route.

Reunion Economy

Economy - overview: The economy has traditionally been based on agriculture. Sugarcane has been the primary crop for more than a century, and in some years it accounts for 85% of exports. The government has been pushing the development of a tourist industry to relieve high unemployment, which amounts to more than 40% of the labor force. The gap in Reunion between the well-off and the poor is extraordinary and accounts for the persistent social tensions. The white and Indian communities are substantially better off than other segments of the population, often approaching European standards, whereas minority groups suffer the poverty and unemployment typical of the poorer nations

of the African continent. The outbreak of severe rioting in February 1991 illustrates the seriousness of socioeconomic tensions. The economic well-being of Reunion depends heavily on continued financial assistance from France.

Romania Introduction

Background: Soviet occupation following World War II led to the formation of a communist "peoples republic" in 1947 and the abdication of the king. The decades-long rule of President Nicolae CEAUSESCU became increasingly draconian through the 1980s. He was overthrown and executed in late 1989. Former communists dominated the government until 1996 when they were swept from power. Much economic restructuring remains to be carried out before Romania can achieve its hope of joining the EU.

Romania Economy

Economy - overview: Romania, one of the poorest countries in Central and Eastern Europe, began the transition from communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. Over the past decade economic restructuring has lagged behind most other countries in the region. Consequently, living standards have continued to fall - real wages are down over 40%. Corruption too has worsened. The EU ranks Romania last among enlargement candidates, and the European Bank for Reconstruction and Development (EBRD) rates Romania's transition progress the region's worst. The country emerged in

2000 from a punishing three-year recession thanks to strong demand in EU export markets. A new government elected in November 2000 promises to promote economic reform. Bucharest hopes to receive financial and technical assistance from international financial institutions and Western governments; negotiations over a new IMF standby agreement are to begin early in 2001. If reform stalls, Romania's ability to borrow from both public and private sources could quickly dry up, leading to another financial crisis.

Russia Introduction

Background: The defeat of the Russian Empire in World War I led to the seizure of power by the communists and the formation of the USSR. The brutal rule of Josef STALIN (1924-53) strengthened Russian dominance of the Soviet Union at a cost of tens of millions of lives. The Soviet economy and society stagnated in the following decades until General Secretary Mikhail GORBACHEV (1985-91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize communism, but his initiatives inadvertently released forces that by December 1991 splintered the USSR into 15 independent republics. Since then, Russia has struggled in its efforts to build a democratic political system and market economy to replace the strict social, political, and economic controls of the communist period.

Russia Geography

Location: Northern Asia (that part west of the Urals is sometimes included with Europe), bordering the Arctic Ocean, between Europe and the North Pacific Ocean

Geographic coordinates: 60 00 N, 100 00 E

Map references: Asia

Area: total: 17,075,200 sq km

land: 16,995,800 sq km

water: 79,400 sq km

Area - comparative: slightly less than 1.8 times the size of the US

Land boundaries: total: 19,961 km

border countries: Azerbaijan 284 km, Belarus 959 km, China (southeast) 3,605 km, China (south) 40 km, Estonia 294 km, Finland 1,313 km, Georgia 723 km, Kazakhstan 6,846 km, North Korea 19 km, Latvia 217 km, Lithuania (Kaliningrad Oblast) 227 km, Mongolia 3,485 km, Norway 167 km, Poland (Kaliningrad Oblast) 206 km, Ukraine 1,576 km

Coastline: 37,653 km

Maritime claims: continental shelf: 200-m depth or to the depth of exploitation

exclusive economic zone: 200 NM

territorial sea: 12 NM

Climate: ranges from steppes in the south through humid continental in much of European Russia; subarctic in Siberia to tundra climate in the polar north; winters vary from cool along Black Sea coast to frigid in Siberia; summers vary from warm in the steppes to cool along Arctic coast

Terrain: broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains along southern border regions

Elevation extremes: lowest point: Caspian Sea -28 m

highest point: Gora El'brus 5,633 m

Natural resources: wide natural resource base including major deposits of oil, natural gas, coal, and many strategic minerals, timber

note: formidable obstacles of climate, terrain, and distance hinder exploitation of natural resources

Land use: arable land: 8%

permanent crops: 0%

permanent pastures: 4%

forests and woodland: 46%

other: 42% (1993 est.)

Irrigated land: 40,000 sq km (1993 est.)

Natural hazards: permafrost over much of Siberia is a major impediment to development; volcanic activity in the Kuril Islands; volcanoes and earthquakes on the Kamchatka Peninsula

Environment - current issues: air pollution from heavy industry, emissions of coal-fired electric plants, and transportation in major cities; industrial, municipal, and agricultural pollution of inland waterways and sea coasts; deforestation; soil erosion; soil contamination from improper application of agricultural chemicals; scattered areas of sometimes intense radioactive contamination; ground water contamination from toxic waste

Environment - international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulphur 85, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Wetlands, Whaling

signed, but not ratified: Air Pollution-Sulphur 94, Climate Change-Kyoto Protocol

Geography - note: largest country in the world in terms of area but unfavorably located in relation to major sea lanes of the world; despite its size, much of the country lacks proper soils and climates (either too cold or too dry) for agriculture

Russia Economy

Economy - overview: A decade after the implosion of the Soviet Union in 1991, Russia is still struggling to establish a modern market economy and achieve strong economic growth. In contrast to its trading partners in Central Europe - which were able to overcome the initial production declines that accompanied the launch of market reforms within three to five years - Russia saw its economy contract for five years, as the executive and legislature dithered over the implementation of many of the basic foundations of a market economy. Russia achieved a slight recovery in 1997, but the government's stubborn budget deficits and the country's poor business climate made it vulnerable when the global financial crisis swept through in 1998. The crisis culminated in the August depreciation of the ruble, a debt default by the government, and a sharp deterioration in living standards for most of the population. The economy rebounded in 1999 and

2000, buoyed by the competitive boost from the weak ruble and a surging trade surplus fueled by rising world oil prices. This recovery, along with a renewed government effort in 2000 to advance lagging structural reforms, have raised business and investor confidence over Russia's prospects in its second decade of transition. Yet serious problems persist. Russia remains heavily dependent on exports of commodities, particularly oil, natural gas, metals, and timber, which account for over 80% of exports, leaving the country vulnerable to swings in world prices. Russia's agricultural sector remains beset by uncertainty over land ownership rights, which has discouraged needed investment and restructuring. Another threat is negative demographic trends, fueled by low birth rates and a deteriorating health situation - including an alarming rise in AIDS cases - that have contributed to a nearly 2% drop in the population since 1992. Russia's industrial base is increasingly dilapidated and must be replaced or modernized if the country is to achieve sustainable economic growth. Other problems include widespread corruption, capital flight, and brain drain.

Russia Transnational Issues

Disputes - international: dispute over at least two small sections of the boundary with China remains to be settled, despite 1997 boundary agreement; islands of Etorofu, Kunashiri, and Shikotan and the Habomai group occupied by the Soviet Union in 1945, now administered by Russia, claimed by Japan; Caspian Sea boundaries are not yet determined among Azerbaijan, Iran, Kazakhstan, Russia, and Turkmenistan; Estonian and Russian negotiators reached a technical border agreement in December 1996, which has not been signed or ratified by Russia as of February 2001; draft treaty delimiting the boundary with Latvia has not been signed; 1997 border agreement with Lithuania not yet ratified; has made no territorial claim in Antarctica (but has reserved the right to do so) and does not recognize the claims of any other nation; Svalbard is the focus of a maritime boundary dispute between Norway and Russia

Illicit drugs: limited cultivation of illicit cannabis and opium poppy and producer of amphetamine, mostly for domestic consumption; government has active eradication program; increasingly used as transshipment point for Southwest and Southeast Asian opiates and cannabis and Latin American cocaine to Western Europe, possibly to the US, and growing domestic market; major source of heroin precursor chemicals; corruption and

organized crime are major concerns; heroin an increasing threat in domestic drug market

Rwanda Introduction

Background: In 1959, three years before independence, the majority ethnic group, the Hutus overthrew the ruling Tutsi king. Over the next several years thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF) and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions culminating in April 1994 in the genocide of roughly 800,000 Tutsis and moderate Hutus. The Tutsi rebels defeated the Hutu regime and ended the killing in July 1994, but approximately 2 million Hutu refugees - many fearing Tutsi retribution - fled to neighboring Burundi, Tanzania, Uganda, and Zaire, now called the Democratic Republic of the Congo (DROC). Since then most of the refugees have returned to Rwanda. Despite substantial international assistance and political reforms - including Rwanda's first local elections in March 1999 - the country continues to struggle to boost investment and agricultural output and to foster reconciliation. A series of massive population displacements, a nagging Hutu extremist insurgency, and Rwandan involvement in two wars over the past four years in the neighboring DROC continue to hinder Rwanda's efforts.

Rwanda Economy

Economy - overview: Rwanda is a rural country with about 90% of the population engaged in (mainly subsistence) agriculture. It is the most densely populated country in Africa; is landlocked; and has few natural resources and minimal industry. Primary exports are coffee and tea. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and eroded the country's ability to attract private and external investment. However, Rwanda has made significant progress in stabilizing and rehabilitating its economy. GDP has rebounded, and inflation has been curbed. In June 1998, Rwanda signed an Enhanced Structural Adjustment Facility (ESAF) with the IMF.

Rwanda has also embarked upon an ambitious privatization program with the World Bank. Continued growth in 2001 depends on the maintenance of international aid levels and the strengthening of world prices of coffee and tea.

Saint Helena Introduction

Background: Uninhabited when first discovered by the Portuguese in 1502, St. Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile, from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. Ascension Island is the site of a US Air Force auxiliary airfield; Gough Island has a meteorological station.

Saint Kitts and Nevis Economy

Economy - overview: The economy has traditionally depended on the growing and processing of sugarcane; decreasing world prices have hurt the industry in recent years. Tourism, export-oriented manufacturing, and offshore banking activity have assumed larger roles. Most food is imported. The government has undertaken a program designed to revitalize the faltering sugar sector. It is also working to improve revenue collection in order to better fund social programs. In 1997 some leaders in Nevis were urging separation from Saint Kitts on the basis that Nevis was paying far more in taxes than it was receiving in government services, but the vote on cessation failed in August 1998. In late September 1998, Hurricane Georges caused approximately \$445 million in damages and limited GDP growth for the year.

Saint Lucia Economy

Economy - overview: The recent changes in the EU import preference regime and the increased competition from Latin American bananas have made economic diversification increasingly important in Saint Lucia.

Improvement in the construction sector and growth of the tourism industry helped expand GDP in 1998-99. The agriculture sector registered its fifth year of decline in 1997 primarily because of a severe decline in banana production. The manufacturing sector is the most diverse in the Eastern Caribbean, and the government is beginning to develop regulations for the small offshore financial sector.

Saint Pierre and Miquelon Economy

Economy - overview: The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. The islands are heavily subsidized by France to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects.

Saint Vincent and the Grenadines Economy

Economy - overview: Agriculture, dominated by banana production, is the most important sector of this lower-middle-income economy. The services sector, based mostly on a growing tourist industry, is also important. The government has been relatively unsuccessful at introducing new industries, and a high unemployment rate persists. The continuing dependence on a single crop represents the biggest obstacle to the islands' development; tropical storms wiped out substantial portions of crops in both 1994 and 1995. The tourism sector has considerable potential for development over the next decade. Recent growth has been stimulated by strong activity in the construction sector and an improvement in tourism. There is a small manufacturing sector and a small offshore financial sector whose particularly restrictive secrecy laws have caused some international concern.

Samoa Economy

Economy - overview: The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, and agricultural exports. The country is vulnerable to devastating storms. Agriculture employs two-thirds of the labor force, and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. Tourism is an expanding sector, accounting for 15% of GDP; about 85,000 tourists visited the islands in 2000. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

@San Marino

San Marino Introduction

Background: The third smallest state in Europe (after The Holy See and Monaco) also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named Marinus in 301 A.D. San Marino's foreign policy is aligned with that of Italy. Social and political trends in the republic also track closely with those of its larger neighbor.

@Sao Tome and Principe

Sao Tome and Principe Introduction

Background: Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century - all grown with plantation slave labor, a form of which lingered into the 20th century. Although independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. The first free elections were held in 1991.

Sao Tome and Principe Economy

Economy - overview: This small poor island economy has become increasingly dependent on cocoa since independence 25 years ago. However, cocoa production has substantially declined because of drought and mismanagement. The resulting shortage of cocoa for export has created a persistent balance-of-payments problem. Sao Tome has to import all fuels, most manufactured goods, consumer goods, and a significant amount of food. Over the years, it has been unable to service its external debt and has had to depend on concessional aid and debt rescheduling. Sao Tome benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies, but economic growth has remained sluggish. Sao Tome is also optimistic that significant petroleum discoveries are forthcoming in its territorial waters in the oil-rich waters of the Gulf of Guinea. Corruption scandals continue to weaken the economy. At the same time, progress in the economic reform program has attracted

international financial institutions' support, and GDP growth will likely rise to at least 4% in 2001-02.

@Saudi Arabia

Saudi Arabia Introduction

Background: In 1902 Abdul al-Aziz Ibn SAUD captured Riyadh and set out on a 30-year campaign to unify the Arabian peninsula. In the 1930s, the discovery of oil transformed the country. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. A burgeoning population, aquifer depletion, and an economy largely dependent on petroleum output and prices are all major governmental concerns.

Saudi Arabia Economy

Economy - overview: This is an oil-based economy with strong government controls over major economic activities. Saudi Arabia has the largest reserves of petroleum in the world (26% of the proved reserves), ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 75% of budget revenues, 40% of GDP, and 90% of export earnings. About 35% of GDP comes from the private sector. Roughly 5 million foreign workers play an important role in the Saudi economy, for example, in the oil and service sectors. Saudi Arabia was a key player in the successful efforts of OPEC and other oil producing countries to raise the price of oil in 1999-2000 to its highest level since the Gulf war by reducing production. Riyadh expects to have a moderate budget deficit in 2001, in part because of increased spending for education and other social programs. The government in 1999 announced plans to begin privatizing the electricity companies, which follows the ongoing privatization of the telecommunications company. The government is expected to continue calling for private sector growth to lessen the kingdom's dependence on oil and increase employment opportunities for the swelling Saudi population. Shortages of water and rapid population growth will constrain government efforts to increase self-sufficiency in agricultural products.

Senegal Introduction

Background: Independent from France in 1960, Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. However, the envisaged integration of the two countries was never carried out, and the union was dissolved in 1989. Despite peace talks, a southern separatist group sporadically has clashed with government forces since 1982. Senegal has a long history of participating in international peacekeeping.

Senegal Economy

Economy - overview: In January 1994, Senegal undertook a bold and ambitious economic reform program with the support of the international donor community. This reform began with a 50% devaluation of Senegal's currency, the CFA franc, which is linked at a fixed rate to the French franc. Government price controls and subsidies have been steadily dismantled. After seeing its economy contract by 2.1% in 1993, Senegal made an important turnaround, thanks to the reform program, with real growth in GDP averaging 5% annually in 1995-99. Annual inflation has been pushed down to 2%, and the fiscal deficit has been cut to less than 1.5% of GDP. Investment rose steadily from 13.8% of GDP in 1993 to 16.5% in 1997. As a member of the West African Economic and Monetary Union (UEMOA), Senegal is working toward greater regional integration with a unified external tariff. Senegal also realized full Internet connectivity in 1996, creating a miniboom in information technology-based services. Private

activity now accounts for 82% of GDP. On the negative side, Senegal faces deep-seated urban problems of chronic unemployment, juvenile delinquency, and drug addiction. Real GDP growth is expected to rise above 6%, while inflation is likely to hold at 2% in 2001-02.

Seychelles Economy

Economy - overview: Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the old near-subsistence level. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years the government has encouraged foreign investment in order to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. The vulnerability of the tourist sector was illustrated by the sharp drop in 1991-92 due largely to the Gulf war. Although the industry has rebounded, the government recognizes the continuing need for upgrading the sector in the face of stiff international competition. Other issues facing the government are the curbing of the budget deficit and further privatization of public enterprises. Growth

slowed in 1998-2000, due to sluggish tourist and tuna sectors. Tight controls on exchange rates and the scarcity of foreign exchange have hindered short-term economic prospects. The black market value of the Seychelles rupee is half the official exchange rate; without a devaluation of the currency the tourist sector should remain sluggish as vacationers seek cheaper destinations such as Comoros, Mauritius, and Madagascar.

Sierra Leone Introduction

Background: Since 1991, civil war between the government and the Revolutionary United Front (RUF) has resulted in tens of thousands of deaths and the displacement of more than 2 million people (well over one-third of the population) many of whom are now refugees in neighboring countries. A peace agreement, signed in July 1999, collapsed in May 2000 after the RUF took over 500 UN peacekeepers hostage. The RUF stepped up attacks on Guinea in December 2000, despite a cease-fire that it signed with the Freetown government one month earlier. As of late 2000, up to 13,000 UN peacekeepers were protecting the capital and key towns in the south. A UK force of 750 was helping to reinforce security and train the Sierra Leone army.

Sierra Leone Economy

Economy - overview: Sierra Leone is an extremely poor African nation with tremendous inequality in income distribution. It does have substantial mineral, agricultural, and fishery resources. However, the economic and social infrastructure is not well developed, and serious social disorders continue to hamper economic development. About two-thirds of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Bauxite and rutile mines have been shut down by civil strife. The major source of hard currency is found in the mining of diamonds, the large majority of which are smuggled out of the country. The resurgence of internal warfare in 1999 brought another substantial drop in GDP, with GNP recovering part of the way in 2000. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad.

Singapore Economy

Economy - overview: Singapore is blessed with a highly developed and successful free-market economy, a remarkably open and corruption-free business environment, stable prices, and the fifth highest per capita GDP in the world. Exports, particularly in electronics and chemicals, and services are the main drivers of the economy. Mainly because of robust exports, especially electronic goods, the economy grew 10.1% in 2000. Forecasters, however, are projecting only 4%-6% growth in 2001 largely because of weaker global demand, especially in the US. The government promotes high levels of savings and investment through a mandatory savings scheme and spends heavily in education and technology. It also owns government-linked companies (GLCs) - particularly in manufacturing - that operate as commercial entities. As Singapore looks to a future increasingly marked by globalization, the country is positioning itself as the region's financial and high-tech hub.

Slovakia Introduction

Background: In 1918 the Slovaks joined the closely related Czechs to form Czechoslovakia. Following the chaos of World War II, Czechoslovakia became a communist nation within Soviet-ruled Eastern Europe. Soviet influence collapsed in 1989 and Czechoslovakia once more became free. The Slovaks and the Czechs agreed to separate peacefully on 1 January 1993. Historic, political, and geographic factors have caused Slovakia to experience more difficulty in developing a modern market economy than some of its Central European neighbors.

Slovakia Economy

Economy - overview: Slovakia continues the difficult transition from a centrally planned economy to a modern market economy. The economic slowdown in 1999 stemmed from large budget and current account deficits, fast-growing external debt, and persistent corruption. Even though GDP growth reached only 2.2% in 2000, the year was marked by positive developments such as foreign direct investment of \$1.5 billion, strong export performance, restructuring and privatization in the banking sector, entry into the OECD, and initial efforts to stem corruption. Strong challenges face the government in 2001, especially the maintenance of fiscal balance, the further privatization of the economy, and the reduction of unemployment.

Slovenia Introduction

Background: In 1918 the Slovenes joined the Serbs and Croats in forming a new nation, renamed Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power of the majority Serbs, the Slovenes succeeded in establishing their independence in 1991. Historical ties to Western Europe, a strong economy, and a stable democracy make Slovenia a leading candidate for future membership in the EU and NATO.

Slovenia Economy

Economy - overview: Although Slovenia enjoys one of the highest GDPs per capita among the transition economies of Central Europe, it needs to speed up the privatization process and the dismantling of restrictions on foreign investment. About 45% of the economy remains in state hands, and the level of foreign direct investment inflows as a percent of GDP is the lowest in the region. Analysts are predicting between 4.0% and 4.2% growth for 2001. Export growth is expected to slow in 2001 and 2002 as EU markets soften. Inflation rose from 6.1% to 8.9% in 2000 and remains a matter of concern.

Solomon Islands Economy

Economy - overview: The bulk of the population depends on agriculture, fishing, and forestry for at least part of their livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. However, severe ethnic violence, the closing of key business enterprises, and an empty government treasury have led to a continuing economic downslide. Deliveries of crucial fuel supplies (including those for electrical

generation) by tankers have become sporadic due to the government's inability to pay and attacks against ships. Telecommunications are threatened by the lack of technical and maintenance staff many of whom have left the country.

@Somalia

Somalia Introduction

Background: A SIAD BARRE regime was ousted in January 1991; turmoil, factional fighting, and anarchy followed for nine years. In May of 1991, northern clans declared an independent Republic of Somaliland which now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence, aided by the overwhelming dominance of the ruling clan and economic infrastructure left behind by British, Russian, and American military assistance programs. The regions of Bari and Nugaal comprise a neighboring self-declared Republic of Puntland, which has also made strides towards reconstructing legitimate, representative government. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. A Transitional National Government (TNG) was created in October 2000 in Arta, Djibouti which was attended by a broad representation of Somali clans. The TNG has a three-year mandate to create a permanent national Somali government. The TNG does not recognize Somaliland or Puntland as independent republics but so far has been unable to reunite them with the unstable regions in the south; numerous warlords and factions are still fighting for control of Mogadishu and the other southern regions.

Government - note: An interim Transitional National Government - with a president, prime minister, and 245-member National Assembly - was formed in October 2000. However, other governing bodies continue to exist and control various cities and regions of the country, including Somaliland, Puntland, and traditional clan and faction strongholds.

Somalia Economy

Economy - overview: One of the world's poorest and least developed countries, Somalia has few resources. Moreover, much of the economy has been devastated by the civil war. Agriculture is the most important sector, with livestock accounting for about 40% of GDP and about 65% of export earnings. Nomads and semi-nomads, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock and bananas are the principal exports; sugar, sorghum, corn, fish, and qat are products for the domestic market. The small industrial sector, based on the processing of agricultural products, accounts for 10% of GDP; most facilities have been shut down because of the civil strife. Moreover, ongoing civil disturbances in Mogadishu and outlying areas have interfered with any substantial economic advance and with international aid arrangements. Due to the civil strife, economic data is susceptible to an exceptionally wide margin of error.

South Africa Introduction

Background: After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Boers resisted British encroachments, but were defeated in the Boer War (1899-1902). The resulting Union of South Africa operated under a policy of apartheid - the separate development of the races. The 1990s brought an end to apartheid politically and ushered in black majority rule.

South Africa Geography

Flag description: two equal width horizontal bands of red (top) and blue separated by a central green band which splits into a horizontal Y, the arms of which end at the corners of the hoist side; the Y embraces a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes

note: prior to 26 April 1994, the flag was actually four flags in one - three miniature flags reproduced in the center of the white band of the former flag of the Netherlands, which had three equal horizontal bands of orange (top), white, and blue; the miniature flags were a vertically hanging flag of the old Orange Free State with a horizontal flag of the UK adjoining on the hoist side and a horizontal flag of the old Transvaal Republic adjoining on the other side

South Africa Economy

Economy - overview: South Africa is a middle-income, developing country with an abundant supply of resources, well-developed financial, legal, communications, energy, and transport sectors, a stock exchange that ranks among the 10 largest in the world, and a modern infrastructure supporting an efficient distribution of goods to major urban centers throughout the region. However, growth has not been strong enough to cut

into the 30% unemployment, and daunting economic problems remain from the apartheid era, especially the problems of poverty and lack of economic empowerment among the disadvantaged groups. Other problems are crime, corruption, and HIV/AIDS. At the start of 2000, President MBEKI vowed to promote economic growth and foreign investment, and to reduce poverty by relaxing restrictive labor laws, stepping up the pace of privatization, and cutting unneeded governmental spending.

@Southern Ocean

Southern Ocean Introduction Top of Page

Background: A decision by the International Hydrographic Organization in the spring of 2000 delimited a fifth world ocean - the Southern Ocean - from the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude which coincides with the Antarctic Treaty Limit. The Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean).

Southern Ocean Geography

Location: body of water between 60 degrees south latitude and Antarctica

Geographic coordinates: 65 00 S, 0 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica, and encompasses 360 degrees of longitude

Map references: Antarctic Region

Area: total: 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area - comparative: slightly more than twice the size of the US

Coastline: 17,968 km

Climate: sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain: the Southern Ocean is deep, 4,000 to 5,000 meters over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep - its edge lying at depths of

400 to 800 meters (the global mean is 133 meters); the Antarctic icepack grows from an average minimum of 2.6 million square kilometers in March to about 18.8 million square kilometers in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second - 100 times the flow of all the world's rivers

Elevation extremes: lowest point: -7,235 m at the southern end of the South Sandwich Trench

highest point: sea level 0 m

Natural resources: probable large and possible giant oil and gas fields on the continental margin, manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs, squid, whales, and seals - none exploited; krill, fishes

Natural hazards: huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 meter thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Environment - current issues: increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton) by as much as 15% and damaging the DNA of some fish; illegal, unreported, and unregulated fishing in recent years, especially the landing of an estimated five to six times more Patagonian toothfish than the regulated fishery, which is likely to affect the

sustainability of the stock; large amount of incidental mortality of seabirds resulting from long-line fishing for toothfish

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment - international agreements: the Southern Ocean is subject to all international agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)

note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence) which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the very cold polar surface waters to the south and the warmer waters to the north

Geography - note: the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the very cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

Southern Ocean Economy

Economy - overview: Fisheries in 1998-99 (1 July to 30 June) landed 119,898 metric tons, of which 85% was krill and 14% Patagonian toothfish. International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 1998-99 season landed five to six times more Patagonian toothfish than the regulated fishery. In the 1999-2000 antarctic summer 13,193 tourists, most of them seaborne, visited the Southern Ocean and Antarctica, compared to 10,013 the previous year. Nearly 16,000 tourists are expected during the 2000-01 season.

Southern Ocean Transportation

Ports and harbors: McMurdo, Palmer, and offshore anchorages in Antarctica

note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most of them to short periods in midsummer; even then some cannot be entered without icebreaker escort; most antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels; vessels in any port south of 60 degrees south are subject to inspection by Antarctic Treaty observers

Transportation - note: Drake Passage offers alternative to transit through the Panama Canal

Southern Ocean Transnational Issues

Disputes - international: Antarctic Treaty defers claims (see Antarctic Treaty Summary in the Antarctica entry); sections (some overlapping) claimed by Argentina, Australia, Chile, France, New Zealand, Norway, and UK; the US and most other nations do not recognize the maritime claims of other nations and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims have been made in the sector between 90 degrees west and 150 degrees west

@South Georgia and the South Sandwich

South Georgia and the South Sandwich Islands Introduction Top of Page

Background: The islands lie approximately 1,000 km east of the Falkland Islands. Grytviken, on South Georgia, was a 19th and early 20th century whaling station. The famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses a small military garrison. The islands have large bird and seal populations and, recognizing the importance of preserving the marine stocks in adjacent waters, the UK, in 1993, extended the exclusive fishing zone from 12 miles to 200 miles around each island.

South Georgia and the South Sandwich Islands Geography

Location: Southern South America, islands in the South Atlantic Ocean, east of the tip of South America

Geographic coordinates: 54 30 S, 37 00 W

Map references: Antarctic Region

Area: total: 3,903 sq km

land: 3,903 sq km

water: 0 sq km

note: includes Shag Rocks, Black Rock, Clerke Rocks, South Georgia Island, Bird Island, and the South Sandwich Islands, which consist of some nine islands

Area - comparative: slightly larger than Rhode Island

Land boundaries: 0 km

Coastline: NA km

Maritime claims: exclusive fishing zone: 200 NM

territorial sea: 12 NM

Climate: variable, with mostly westerly winds throughout the year interspersed with periods of calm; nearly all precipitation falls as snow

Terrain: most of the islands, rising steeply from the sea, are rugged and mountainous; South Georgia is largely barren and has steep, glacier-covered

mountains; the South Sandwich Islands are of volcanic origin with some active volcanoes

Elevation extremes: lowest point: Atlantic Ocean 0 m

highest point: Mount Paget (South Georgia) 2,934 m

Natural resources: fish

Land use: arable land: 0%

permanent crops: 0%

permanent pastures: 0%

forests and woodland: 0%

other: 100% (largely covered by permanent ice and snow with some sparse vegetation consisting of grass, moss, and lichen)

Irrigated land: 0 sq km (1993)

Natural hazards: the South Sandwich Islands have prevailing weather conditions that generally make them difficult to approach by ship; they are also subject to active volcanism

Environment - current issues: NA

Geography - note: the north coast of South Georgia has several large bays, which provide good anchorage; reindeer, introduced early in this century, live on South Georgia

South Georgia and the South Sandwich Islands People

Population: no indigenous inhabitants

note: the small military garrison on South Georgia withdrew in March 2001, to be replaced by a permanent group of scientists of the British Antarctic Survey which also has a biological station on Bird Island; the South Sandwich Islands are uninhabited (July 2001 est.)

Spain Introduction

Background: Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World Wars I and II, but suffered

through a devastating Civil War (1936-39). In the second half of the 20th century, it has played a catch-up role in the western international community. Continuing concerns are large-scale unemployment and the Basque separatist movement.

Spain Economy

Economy - overview: Spain's mixed capitalist economy supports a GDP that on a per capita basis is 80% that of the four leading West European economies. Its center-right government successfully worked to gain admission to the first group of countries launching the European single currency on 1 January 1999. The AZNAR administration has continued to advocate liberalization, privatization, and deregulation of the economy and has introduced some tax reforms to that end. Unemployment has been steadily falling under the AZNAR administration but remains the highest in the EU at 14%. The government intends to make further progress in changing labor laws and reforming pension schemes, which are key to the sustainability of both Spain's internal economic advances and its competitiveness in a single currency area. Adjusting to the monetary and other economic policies of an integrated Europe - and further reducing unemployment - will pose challenges to Spain in the next few years.

@Spratly Islands

Spratly Islands Introduction Top of Page

Background: Rich fishing grounds and the potential for gas and oil deposits have caused this archipelago to be claimed in its entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. All five parties have occupied certain islands or reefs, and occasional clashes have occurred between Chinese and Vietnamese naval forces

Spratly Islands Geography

Location: Southeastern Asia, group of reefs and islands in the South China Sea, about two-thirds of the way from southern Vietnam to the southern Philippines

Geographic coordinates: 8 38 N, 111 55 E

Map references: Southeast Asia

Area: total: less than 5 sq km

land: less than 5 sq km

water: 0 sq km

note: includes 100 or so islets, coral reefs, and sea mounts scattered over an area of nearly 410,000 sq km of the central South China Sea

Area - comparative: NA

Land boundaries: 0 km

Coastline: 926 km

Maritime claims: NA

Climate: tropical

Terrain: flat

Elevation extremes: lowest point: South China Sea 0 m

highest point: unnamed location on Southwest Cay 4 m

Natural resources: fish, guano, undetermined oil and natural gas potential

Land use: arable land: 0%

permanent crops: 0%

permanent pastures: 0%

forests and woodland: 0%

other: 100%

Irrigated land: 0 sq km (1993)

Natural hazards: typhoons; serious maritime hazard because of numerous reefs and shoals

Environment - current issues: NA

Geography - note: strategically located near several primary shipping lanes in the central South China Sea; includes numerous small islands, atolls, shoals, and coral reefs

Spratly Islands People

Population: no indigenous inhabitants

note: there are scattered garrisons occupied by personnel of several claimant states (July 2001 est.)

Spratly Islands Government

Country name: conventional long form: none

conventional short form: Spratly Islands

Spratly Islands Economy

Economy - overview: Economic activity is limited to commercial fishing. The proximity to nearby oil- and gas-producing sedimentary basins suggests the potential for oil and gas deposits, but the region is largely unexplored, and there are no reliable estimates of potential reserves; commercial exploitation has yet to be developed.

Spratly Islands Transportation

Spratly Islands Military

Military - note: Spratly Islands consist of more than 100 small islands or reefs, of which about 45 are claimed and occupied by China, Malaysia, the Philippines, Taiwan, and Vietnam

Spratly Islands Transnational Issues

Disputes - international: all of the Spratly Islands are claimed by China, Taiwan, and Vietnam; parts of them are claimed by Malaysia and the Philippines; in 1984, Brunei established an exclusive fishing zone that encompasses Louisa Reef in the southern Spratly Islands, but has not publicly claimed the island; in 2000, China joined ASEAN discussions towards creating a South China Sea "code of conduct" - a non-legally binding confidence building measure

Sri Lanka Economy

Economy - overview: In 1977, Colombo abandoned statist economic policies and its import substitution trade policy for market-oriented policies and export-oriented trade. Sri Lanka's most dynamic sectors now are food processing, textiles and apparel, food and beverages, telecommunications, and insurance and banking. By 1996 plantation crops made up only 20% of exports (compared with 93% in 1970), while textiles and garments accounted for 63%. GDP grew at an annual average rate of 5.5% throughout the 1990s until a drought and a deteriorating security situation lowered growth to 3.8% in 1996. The economy rebounded in 1997-98 with growth of 6.4% and 4.7% - but slowed to 4.3% in 1999. Growth increased to 5.6% in 2000, with growth in tourism and exports leading the way. But a resurgence of civil war between the Sinhalese and the minority Tamils and a possible slowdown in tourism dampen prospects for 2001. For the next round of reforms, the central bank of Sri Lanka recommends that Colombo expand market mechanisms in nonplantation agriculture, dismantle the government's monopoly on wheat imports, and promote more competition in the financial sector.

Sudan Economy

Economy - overview: Sudan is buffeted by civil war, chronic instability, adverse weather, weak world agricultural prices, a drop in remittances from abroad, and counterproductive economic policies. The private sector's main areas of activity are agriculture (which employs 80% of the work force), trading, and light industry which is mostly processing of agricultural goods. Most of the 1990s were characterized by sluggish economic growth as the IMF suspended lending, declared Sudan a non-cooperative state, and threatened to expel Sudan from the IMF. Starting in 1997, Sudan began implementing IMF macroeconomic reforms which have successfully stabilized inflation at 10% or less. Sudan continues to have limited international credit resources as over 75% of Sudan's debt of \$24.9 billion is in arrears and Khartoum's continued prosecution of the civil war works to isolate Sudan. In 1999, Sudan began exporting oil and in 1999-2000 had recorded its first trade surpluses. Current oil production stands at 185,000 barrels per day, of which about 70% is exported and the rest refined for domestic consumption. Despite its many infrastructure problems, Sudan's increased oil production, the return of regular rainfall, and recent investments in irrigation schemes should allow the country to achieve economic growth of 6% in 2001.

Suriname Introduction

Background: Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by a military regime that soon declared a socialist republic. It continued to rule through a succession of nominally civilian administrations until 1987, when international pressure finally brought about a democratic election. In 1989, the military overthrew the civilian government, but a democratically elected government returned to power in 1991.

Suriname Economy

Economy - overview: The economy is dominated by the bauxite industry, which accounts for more than 15% of GDP and 70% of export earnings. After assuming power in the fall of 1996, the WIJDENBOSCH government ended the structural adjustment program of the previous government, claiming it was unfair to the poorer elements of society. Tax revenues fell as old taxes lapsed and the government failed to implement new tax alternatives. By the end of 1997, the allocation of new Dutch development funds was frozen as Surinamese Government relations with the Netherlands deteriorated. Economic growth slowed in 1998, with decline in the mining, construction, and utility sectors. Rampant government expenditures, poor tax collection, a bloated civil service, and reduced foreign aid in 1999 contributed to the fiscal deficit, estimated at 11% of GDP. The government sought to cover this deficit through monetary expansion, which led to a dramatic increase in inflation and exchange rate depreciation. Suriname's economic prospects for the medium term will depend on renewed commitment to responsible monetary and fiscal policies and to the

introduction of structural reforms to liberalize markets and promote competition. The new government of Ronald VENETIAAN has begun an austerity program, raised taxes, and attempted to control spending. the exchange rate has responded by stabilizing. The Dutch Government has restarted the aid flow, which will allow Suriname to access international development financing.

Background: First discovered by the Norwegians in the 12th century, the islands served as an international whaling base during the 17th and 18th centuries. Norway's sovereignty was recognized in 1920; five years later it officially took over the territory.

Svalbard Economy

Economy - overview: Coal mining is the major economic activity on Svalbard. The treaty of 9 February 1920 gives the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still mining are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some trapping of seal, polar bear, fox, and walrus.

Swaziland Introduction

Background: Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted 1968. Student and labor unrest during the 1990s have pressured the monarchy (one of the oldest on the continent) to grudgingly allow political reform and greater democracy.

Swaziland Economy

Economy - overview: In this small landlocked economy, subsistence agriculture occupies more than 60% of the population. Manufacturing features a number of agroprocessing factories. Mining has declined in importance in recent years: diamond mines have shut down because of the depletion of easily accessible reserves; high-grade iron ore deposits were depleted by 1978; and health concerns have cut world demand for asbestos. Exports of soft drink concentrate, sugar, and wood pulp are the main earners of hard currency. Surrounded by South Africa, except for a short

border with Mozambique, Swaziland is heavily dependent on South Africa from which it receives four-fifths of its imports and to which it sends two-thirds of its exports. Remittances from the Southern African Customs Union and Swazi workers in South African mines substantially supplement domestically earned income. The government is trying to improve the atmosphere for foreign investment. Overgrazing, soil depletion, drought, and sometimes floods persist as problems for the future. Prospects for 2001 are strengthened by government millennium projects for a new convention center, additional hotels, an amusement park, a new airport, and stepped-up roadbuilding and factory construction plans.

Sweden Introduction

Background: A military power during the 17th century, Sweden has not participated in any war in almost two centuries. An armed neutrality was preserved in both World Wars. Sweden's long-successful economic formula of a capitalist system interlarded with substantial welfare elements has recently been undermined by high unemployment, rising maintenance costs, and a declining position in world markets. Indecision over the country's role in the political and economic integration of Europe caused Sweden not to join the EU until 1995, and to forgo the introduction of the euro in 1999.

Sweden Economy

Economy - overview: Aided by peace and neutrality for the whole twentieth century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for only 2% of GDP and 2% of the jobs. In recent years, however, this extraordinarily favorable picture has been somewhat clouded by budgetary difficulties, high unemployment, and a gradual loss of competitiveness in international markets. Sweden has harmonized its economic policies with those of the EU, which it joined at the start of 1995. GDP growth is forecast for 4% in 2001.

Switzerland Introduction

Background: Switzerland's independence and neutrality have long been honored by the major European powers and Switzerland was not involved in either of the two World Wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, may be rendering obsolete the country's concern for neutrality.

Switzerland Economy

Economy - overview: Switzerland, a prosperous and stable modern market economy with a per capita GDP 20% above that of the big western European economies, experienced solid growth of 3% in 2000, but growth is expected to fall back to about 2% in 2001. The Swiss in recent years have brought their economic practices largely into conformity with the EU's to enhance their international competitiveness. Although the Swiss are not pursuing full EU membership in the near term, in 1999 Bern and Brussels signed agreements to further liberalize trade ties, and the agreements should come into force in 2001. Switzerland is still considered a safe haven for investors, because it has maintained a degree of bank secrecy and has kept up the franc's long-term external value.

Syria Introduction

Background: Following the breakup of the Ottoman Empire during World War I, Syria was administered by the French until independence in 1946. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. Since 1976, Syrian troops have been stationed in Lebanon, ostensibly in a peacekeeping capacity. In recent years, Syria and Israel have held occasional peace talks over the return of the Golan Heights.

Syria Economy

Economy - overview: Syria's predominantly statist economy is on a shaky footing because of Damascus's failure to implement extensive economic reform. The dominant agricultural sector remains underdeveloped, with roughly 80% of agricultural land still dependent on rain-fed sources. Although Syria has sufficient water supplies in the aggregate at normal levels of precipitation, the great distance between major water supplies and population centers poses serious distribution problems. The water problem is exacerbated by rapid population growth, industrial expansion, and increased water pollution. Private investment is critical to the modernization of the agricultural, energy, and export sectors. Oil production is leveling off, and the efforts of the nonoil sector to penetrate international markets have fallen short. Syria's inadequate infrastructure, outmoded technological base, and weak educational system make it vulnerable to future shocks and hamper competition with neighbors

such as Jordan and Israel. The government recognizes the need to open the economy to additional domestic and foreign investment.

Taiwan Introduction

Background: In 1895, military defeat forced China to cede Taiwan to Japan, however it reverted to Chinese control after World War II. Following the communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the 1947 constitution drawn up for all of China. Over the next five decades, the ruling authorities gradually democratized and incorporated the native population within its governing structure. Throughout this period, the island has prospered to become one of East Asia's economic "Tigers." The dominant political issue continues to be the relationship between Taiwan and China and the question of eventual reunification.

Taiwan Economy

Economy - overview: Taiwan has a dynamic capitalist economy with gradually decreasing guidance of investment and foreign trade by government authorities. In keeping with this trend, some large government-owned banks and industrial firms are being privatized. Real growth in GDP has averaged about 8% during the past three decades. Exports have grown even faster and have provided the primary impetus for industrialization. Inflation and unemployment are low; the trade surplus is substantial; and foreign reserves are the world's fourth largest. Agriculture contributes 3% to GDP, down from 35% in 1952. Traditional labor-intensive industries are

steadily being moved offshore and replaced with more capital- and technology-intensive industries. Taiwan has become a major investor in China, Thailand, Indonesia, the Philippines, Malaysia, and Vietnam. The tightening of labor markets has led to an influx of foreign workers, both legal and illegal. Because of its conservative financial approach and its entrepreneurial strengths, Taiwan suffered little compared with many of its neighbors from the Asian financial crisis in 1998-99. Growth in 2001 will depend largely on conditions in Taiwan's export markets and may be about 5%.

Tajikistan Introduction

Background: Tajikistan has experienced three changes in government and a five-year civil war since it gained independence in 1991 from the USSR. A peace agreement among rival factions was signed in 1997, and implementation reportedly completed by late 1999. Part of the agreement required the legalization of opposition political parties prior to the 1999 elections, which occurred, but such parties have made little progress in successful participation in government. Random criminal and political violence in the country remains a complication impairing Tajikistan's ability to engage internationally.

Tajikistan Economy

Economy - overview: Tajikistan has the lowest per capita GDP among the 15 former Soviet republics. Cotton is the most important crop. Mineral resources, varied but limited in amount, include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The Tajikistani economy has been gravely weakened by six years of civil conflict and by the loss of subsidies from Moscow and of markets for its products. Most of its people live in abject poverty. Tajikistan depends on aid from Russia and Uzbekistan and on international humanitarian assistance for much of its basic subsistence needs. The future of Tajikistan's economy and the potential for attracting foreign investment depend upon stability and continued progress in the peace process.

Tanzania Introduction

Background: Shortly after independence, Tanganyika and Zanzibar merged to form the nation of Tanzania in 1964. One-party rule came to an end in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition have led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities.

Tanzania Economy

Economy - overview: Tanzania is one of the poorest countries in the world. The economy is heavily dependent on agriculture, which accounts

for half of GDP, provides 85% of exports, and employs 80% of the work force. Topography and climatic conditions, however, limit cultivated crops to only 4% of the land area. Industry is mainly limited to processing agricultural products and light consumer goods. The World Bank, the International Monetary Fund, and bilateral donors have provided funds to rehabilitate Tanzania's deteriorated economic infrastructure. Growth in 1991-2000 featured a pick up in industrial production and a substantial increase in output of minerals, led by gold. Natural gas exploration in the Rufiji Delta looks promising and production could start by 2002. Recent banking reforms have helped increase private sector growth and investment. Continued donor support and solid macroeconomic policies should allow Tanzania to achieve real GDP growth of 6% in 2001 and in 2002.

Thailand Introduction

Background: A unified Thai kingdom was established in the mid-14th century; it was known as Siam until 1939. Thailand is the only southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US ally following the conflict.

Thailand Economy

Economy - overview: After enjoying the world's highest growth rate from 1985 to 1995 - averaging almost 9% annually - increased speculative pressure on Thailand's currency in 1997 led to a crisis that uncovered financial sector weaknesses and forced the government to float the baht. Long pegged at 25 to the dollar, the baht reached its lowest point of 56 to the dollar in January 1998 and the economy contracted by 10.2% that same year. Thailand entered a recovery stage in 1999, expanding 4.2% and grew about the same amount in 2000, largely due to strong exports - which increased about 20% in 2000. An ailing financial sector and the slow pace of corporate debt restructuring, combined with a softening of global demand, is likely to slow growth in 2001.

Togo Introduction

Background: French Togoland became Togo in 1960. General Gnassingbe EYADEMA, installed as military ruler in 1967, is Africa's longest-serving head of state. Despite the facade of multiparty elections that resulted in EYADEMA's victory in 1993, the government continues to be dominated by the military. In addition, Togo has come under fire from international organizations for human rights abuses and is plagued by political unrest. Most bilateral and multilateral aid to Togo remains frozen.

Togo Economy

Economy - overview: This small sub-Saharan economy is heavily
dependent on both commercial and subsistence agriculture, which provides
employment for 65% of the labor force. Some basic foodstuffs must still be

imported. Together, cocoa, coffee, and cotton generate some 40% of export earnings, with cotton being the most significant cash crop despite falling prices on the world market. In the industrial sector, phosphate mining is by far the most important activity. Togo is the world's fourth largest producer, and geological advantages keep production costs low. The recently privatized mining operation, Office Togolais des Phosphates (OTP), is slowly recovering from a steep fall in prices in the early 1990's, but continues to face the challenge of tough foreign competition, exacerbated by weakening demand. Togo serves as a regional commercial and trade center. It continues to expand its duty-free export-processing zone (EPZ), launched in 1989, which has attracted enterprises from France, Italy, Scandinavia, the US, India, and China and created jobs for Togolese nationals. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has stalled. Progress depends on following through on privatization, increased openness in government financial operations, progress towards legislative elections, and possible downsizing of the military, on which the regime has depended to stay in place. Lack of foreign aid, deterioration of the financial sector, energy shortages, and depressed commodity prices continue to constrain economic growth; however, Togo did realize a 3% gain in GDP in 1999. The takeover of the national power company by a Franco-Canadian consortium in 2000 should ease the energy crisis and if successful legislative elections pave the way for increased aid, growth should rise to 5% a year in 2001-02.

Tonga Economy

Economy - overview: Tonga has a small, open economy with a narrow export base in agricultural goods, which contributes 30% to GDP. Squash, coconuts, bananas, and vanilla beans are the main crops, and agricultural exports make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. The industrial sector accounts for only 10% of GDP. Tourism is the primary source of hard currency earnings. The country remains dependent on sizable external aid and remittances from Tongan communities overseas to offset its trade deficit. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonable basic infrastructure and well-developed social services.

Trinidad and Tobago Economy

Economy - overview: Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses. Successful economic

reforms were implemented in 1995, and foreign investment and trade are flourishing. Persistently high unemployment remains one of the chief challenges of the government. The petrochemical sector has spurred growth in other related sectors, reinforcing the government's commitment to economic diversification. Tourism is growing, especially in the pleasure boat sector. New investment and construction also will continue to drive the economy.

Tunisia Introduction

Background: Following independence from France in 1956, President Habib BOURGUIUBA established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In recent years, Tunisia has taken a moderate, non-aligned stance in its foreign relations. Domestically, it has sought to diffuse rising pressure for a more open political society.

Tunisia Economy

Economy - overview: Tunisia has a diverse economy, with important agricultural, mining, energy, tourism, and manufacturing sectors. Governmental control of economic affairs while still heavy has gradually lessened over the past decade with increasing privatization, simplification of the tax structure, and a prudent approach to debt. Real growth averaged 5.5% in the past four years, and inflation is slowing. Growth in tourism and increased trade have been key elements in this steady growth. Tunisia's association agreement with the European Union entered into force on 1 March 1998, the first such accord between the EU and Mediterranean countries to be activated. Under the agreement Tunisia will gradually remove barriers to trade with the EU over the next decade. Broader privatization, further liberalization of the investment code to increase foreign investment, and improvements in government efficiency are among the challenges for the future.

Turkey Introduction

Background: Turkey was created in 1923 from the Turkish remnants of the Ottoman Empire. Soon thereafter the country instituted secular laws to replace traditional religious fiats. In 1945 Turkey joined the UN and in 1952 it became a member of NATO. Turkey occupied the northern portion of Cyprus in 1974 to prevent a Greek takeover of the island; relations between the two countries remain strained. Periodic military offensives against Kurdish separatists have dislocated part of the population in southeast Turkey and have drawn international condemnation.

Turkey Geography

Location: southeastern Europe and southwestern Asia (that portion of Turkey west of the Bosphorus is geographically part of Europe), bordering the Black Sea, between Bulgaria and Georgia, and bordering the Aegean Sea and the Mediterranean Sea, between Greece and Syria

Turkey Economy

Economy - overview: Turkey's dynamic economy is a complex mix of modern industry and commerce along with traditional agriculture that still accounts for nearly 40% of employment. It has a strong and rapidly growing private sector, yet the state still plays a major role in basic industry, banking, transport, and communication. The most important industry - and largest exporter - is textiles and clothing, which is almost entirely in private hands. In recent years the economic situation has been marked by erratic economic growth and serious imbalances. Real GNP growth has exceeded 6% in most years, but this strong expansion was interrupted by sharp declines in output in 1994 and 1999. Meanwhile the public sector fiscal deficit has regularly exceeded 10% of GDP - due in large part to the huge burden of interest payments, which now account for more than 40% of central government spending - while inflation has remained in the high double digit range. Perhaps because of these problems, foreign direct investment in Turkey remains low - less than \$1 billion annually. Prospects for the future are improving, however, because the ECEVIT government since June 1999 has been implementing an IMF-backed reform program, including a tighter budget, social security reform, banking reorganization, and accelerated privatization. As a result, the fiscal situation is greatly improved and inflation has dropped below 40% - the lowest rate since 1987. The country experienced a financial crisis in late 2000, including sharp drops in the stock market and foreign exchange reserves, but is recovering rapidly, thanks to additional IMF support and the government's commitment to a specific timetable of economic reforms.

Turkmenistan Introduction

Background: Annexed by Russia between 1865 and 1885, Turkmenistan became a Soviet republic in 1925. It achieved its independence upon the dissolution of the USSR in 1991. President NIYAZOV retains absolute control over the country and opposition is not tolerated. Extensive hydrocarbon/natural gas reserves could prove a boon to this underdeveloped country if extraction and delivery projects can be worked out.

Turkmenistan Economy

Economy - overview: Turkmenistan is largely desert country with intensive agriculture in irrigated oases and huge gas (fifth largest reserves in the world) and oil resources. One-half of its irrigated land is planted in cotton, making it the world's tenth largest producer. Until the end of 1993, Turkmenistan had experienced less economic disruption than other former Soviet states because its economy received a boost from higher prices for oil and gas and a sharp increase in hard currency earnings. In 1994, Russia's refusal to export Turkmen gas to hard currency markets and mounting debts of its major customers in the former USSR for gas deliveries contributed to a sharp fall in industrial production and caused the budget to shift from a surplus to a slight deficit. With an authoritarian ex-communist regime in power and a tribally based social structure, Turkmenistan has taken a cautious approach to economic reform, hoping to use gas and cotton sales to sustain its inefficient economy. Privatization goals remain limited. In 1998-2000, Turkmenistan suffered from the continued lack of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose sharply because of higher international oil and gas prices. Prospects in the near future are discouraging because of widespread internal poverty and the burden of foreign debt. IMF assistance would seem to be necessary, yet the government is not as yet ready to accept IMF requirements. Turkmenistan's 1999 deal to ship 20 billion cubic meters (bcm) of natural gas through Russia's Gazprom pipeline helped alleviate the 2000 fiscal shortfall. Inadequate fiscal restraint and the tenuous nature of Turkmenistan's 2001 gas deals, combined with a lack of economic reform, will limit progress in the near term.

Turks and Caicos Islands Introduction

Background: The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands are presently a British overseas territory.

Tuvalu Introduction

Background: In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a

contract leasing its Internet domain name ".tv" for \$50 million in royalties over the next dozen years.

Tuvalu Geography

Location: Oceania, island group consisting of nine coral atolls in the South Pacific Ocean, about one-half of the way from Hawaii to Australia

Geographic coordinates: 8 00 S, 178 00 E

Natural hazards: severe tropical storms are usually rare, but, in 1997, there were three cyclones; low level of islands make them very sensitive to changes in sea level

Environment - current issues: since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities (the Japanese Government has built one desalination plant and plans to build one other); beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from the spread of the Crown of Thorns starfish; Tuvalu is very concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which threaten the country's underground water table

Environment - international agreements: party to: Climate Change, Climate Change-Kyoto Protocol, Desertification, Ozone Layer Protection, Ship Pollution

signed, but not ratified: Biodiversity, Law of the Sea

Tuvalu Economy

Economy - overview: Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. The country has no known mineral resources and few exports. Subsistence farming and fishing are the primary economic activities. Government revenues largely come from the sale of stamps and coins and worker remittances. About 1,000 Tuvaluans work in Nauru in the phosphate mining industry. Nauru has begun repatriating Tuvaluans, however, as phosphate resources decline. Substantial income is received annually from an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this Fund has grown from an initial \$17 million to over \$35 million in 1999. The US government is also a major revenue source for Tuvalu, with 1999 payments from a 1988 treaty on fisheries at about \$9 million, a total which is expected to rise annually. In an effort to reduce its dependence on foreign aid, the

government is pursuing public sector reforms, including privatization of some government functions and personnel cuts of up to 7%. In 1998, Tuvalu began deriving revenue from use of its area code for "900" lines and in 2000, from the sale of its ".tv" Internet domain name. Royalties from these new technology sources could raise GDP three or more times over the next decade. In 1999, with merchandise exports falling and financing reaching less than 5% of imports, continued reliance was placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and investment income from overseas assets to cover the trade deficit.

Uganda Introduction

Background: Uganda achieved independence from the UK in 1962. The dictatorial regime of Idi AMIN (1971-79) was responsible for the deaths of some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980-85) claimed another 100,000 lives. During the 1990s

the government promulgated non-party presidential and legislative elections.

Uganda Economy

Economy - overview: Uganda has substantial natural resources, including fertile soils, regular rainfall, and sizable mineral deposits of copper and cobalt. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee is the major export crop and accounts for the bulk of export revenues. Since 1986, the government - with the support of foreign countries and international agencies - has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. In 1990-2000, the economy turned in a solid performance based on continued investment in the rehabilitation of infrastructure, improved incentives for production and exports, reduced inflation, gradually improved domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Ongoing Ugandan involvement in the war in the Democratic Republic of the Congo, corruption within the government, and slippage in the government's determination to press reforms raise doubts about the continuation of strong growth. In 2000, Uganda qualified for enhanced HIPC debt relief worth \$1.3 billion and Paris Club debt relief worth \$145 million. These amounts combined with the original Highly Indebted Poor Countries HIPC debt relief add up to about \$2 billion. Growth for 2001 should be somewhat lower than in 2000, because of a decline in the price of coffee, Uganda's principal export.

Ukraine Introduction

Background: Richly endowed in natural resources, Ukraine has been fought over and subjugated for centuries; its 20th-century struggle for liberty is not yet complete. A short-lived independence from Russia (1917-1920) was followed by brutal Soviet rule that engineered two artificial famines (1921-22 and 1932-33) in which over 8 million died, and World War II, in which German and Soviet armies were responsible for some 7 million more deaths. Although independence was attained in 1991 with the dissolution of the USSR, true freedom remains elusive as many of the former Soviet elite remain entrenched, stalling efforts at economic reform, privatization, and civic liberties.

Ukraine Economy

Economy - overview: After Russia, the Ukrainian republic was far and away the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its

fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Ukraine depends on imports of energy, especially natural gas, to meet some 85% of its annual energy requirements. Shortly after independence in late 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output in 1992-99 fell to less than 40% the 1991 level. Loose monetary policies pushed inflation to hyperinflationary levels in late 1993. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Now in his second term, President KUCHMA has pledged to reduce the number of government agencies and streamline the regulation process, create a legal environment to encourage entrepreneurs and protect ownership rights, and enact a comprehensive tax overhaul. Reforms in the more politically sensitive areas of structural reform and land privatization are still lagging. Outside institutions - particularly the IMF - have encouraged Ukraine to quicken the pace and scope of reforms and have threatened to withdraw financial support. GDP in 2000 showed strong export-based growth of 6% - the first growth since independence - and industrial production grew 12.9%. As the capacity for further export-based economic expansion diminishes, GDP growth in 2001 is likely to decline to around 3%.

United Arab Emirates Introduction

Background: The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states - Abu Zaby, 'Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn - merged to form the UAE. They were joined in 1972 by Ra's al Khaymah. The UAE's per capita GDP is not far below those of the leading West European nations. Its generosity with oil revenues and its moderate foreign policy stance have allowed it to play a vital role in the affairs of the region.

United Arab Emirates Economy

Economy - overview: The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Its wealth is based on oil and gas output (about 33% of GDP), and the fortunes of the economy fluctuate with the prices of those commodities. Since 1973, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. At present levels of production, oil and gas reserves should last for more than 100 years. Despite higher oil revenues in 1999-2000, the government has not drawn back from the economic reforms implemented during the 1998 oil price depression. The government has increased spending on job creation and infrastructure expansion and is opening up its utilities to greater private-sector involvement.

Illicit drugs: growing role as heroin transshipment and money-laundering center due to its proximity to southwest Asian producing countries and the bustling free trade zone in Dubai

United Kingdom Introduction

Background: Great Britain, the dominant industrial and maritime power of the 19th century, played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two World Wars. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council, a founding member of NATO, and of the Commonwealth, the UK pursues a global approach to foreign policy; it currently is weighing the degree of its integration with continental Europe. A member of the EU, it chose to remain outside of the European Monetary Union for the time being. Constitutional reform is also a significant issue in the UK. Regional assemblies with varying degrees of power opened in Scotland, Wales, and Northern Ireland in 1999.

United Kingdom Geography

Location: Western Europe, islands including the northern one-sixth of the island of Ireland between the North Atlantic Ocean and the North Sea, northwest of France

Independence: England has existed as a unified entity since the 10th century; the union between England and Wales was enacted under the Statute of Rhuddlan in 1284; in the Act of Union of 1707, England and Scotland agreed to permanent union as Great Britain; the legislative union of Great Britain and Ireland was implemented in 1801, with the adoption of the name the United Kingdom of Great Britain and Ireland; the Anglo-Irish treaty of 1921 formalized a partition of Ireland; six northern Irish counties remained part of the United Kingdom as Northern Ireland and the current name of the country, the United Kingdom of Great Britain and Northern Ireland, was adopted in 1927

National holiday: Birthday of Queen ELIZABETH II, celebrated on the second Saturday in June (1926)

Constitution: unwritten; partly statutes, partly common law and practice

Legal system: common law tradition with early Roman and modern continental influences; no judicial review of Acts of Parliament; accepts compulsory ICJ jurisdiction, with reservations; British courts and legislation are increasingly subject to review by European Union courts

Suffrage: 18 years of age; universal

Executive branch: chief of state: Queen ELIZABETH II (since 6 February 1952); Heir Apparent Prince CHARLES (son of the queen, born 14 November 1948)

head of government: Prime Minister Anthony C. L. (Tony) BLAIR (since 2 May 1997)

cabinet: Cabinet of Ministers appointed by the prime minister

elections: none; the monarch is hereditary; the prime minister is the leader of the majority party in the House of Commons (assuming there is no majority party, a prime minister would have a majority coalition or at least a coalition that was not rejected by the majority)

Legislative branch: bicameral Parliament comprised of House of Lords (consists of approximately 500 life peers, 92 hereditary peers and 26 clergy) and House of Commons (659 seats; members are elected by popular vote to serve five-year terms unless the House is dissolved earlier)

elections: House of Lords - no elections (some proposals for further reform include elections); House of Commons - last held 7 June 2001 (next

to be held by NA May 2006)

election results: House of Commons - percent of vote by party - NA%; seats by party - Labor 412, Conservative and Unionist 166, Liberal Democrat 52, other 29

note: in 1998 elections were held for a Northern Ireland Parliament (because of unresolved disputes among existing parties, the transfer of power from London to Northern Ireland came only at the end of 1999 and was rescinded in February 2000); in 1999 there were elections for a new Scottish Parliament and a new Welsh Assembly

Judicial branch: House of Lords (highest court of appeal; several Lords of Appeal in Ordinary are appointed by the monarch for life); Supreme Courts of England, Wales, and Northern Ireland (comprising the Courts of Appeal, the High Courts of Justice, and the Crown Courts); Scotland's Court of Session and Court of the Justiciary

United Kingdom Economy

Economy - overview: The UK, a leading trading power and financial center, deploys an essentially capitalistic economy, one of the quartet of trillion dollar economies of Western Europe. Over the past two decades the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with only 1% of the labor force. The UK has large coal, natural gas, and oil reserves; primary energy production accounts for 10% of GDP, one of the highest shares of any industrial nation. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. The economy has grown steadily, at just above or below 3%, for the last several years. The BLAIR government has put off the question of participation in the euro

system until after the next election, in June of 2001; Chancellor of the Exchequer BROWN has identified some key economic tests to determine whether the UK should join the common currency system, but it will largely be a political decision. A serious short-term problem is foot-and-mouth disease, which by early 2001 had broken out in nearly 600 farms and slaughterhouses and had resulted in the killing of 400,000 animals.

United States Introduction

Background: The United States became the world's first modern democracy after its break with Great Britain (1776) and the adoption of a constitution (1789). During the 19th century, many new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65) and the Great Depression of the 1930s. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's

most powerful nation-state. The economy is marked by steady growth, low unemployment and inflation, and rapid advances in technology.

United States Geography

Location: North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

Geographic coordinates: 38 00 N, 97 00 W

Map references: North America

Area: total: 9,629,091 sq km

land: 9,158,960 sq km

water: 470,131 sq km

note: includes only the 50 states and District of Columbia

Area - comparative: about one-half the size of Russia; about three-tenths the size of Africa; about one-half the size of South America (or slightly larger than Brazil); slightly larger than China; about two and one-half times the size of Western Europe

Land boundaries: total: 12,248 km

border countries: Canada 8,893 km (including 2,477 km with Alaska), Cuba 29 km (US Naval Base at Guantanamo Bay), Mexico 3,326 km

note: Guantanamo Naval Base is leased by the US and thus remains part of Cuba

Coastline: 19,924 km

Maritime claims: contiguous zone: 24 NM

continental shelf: not specified

exclusive economic zone: 200 NM

territorial sea: 12 NM

Climate: mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain: vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes: lowest point: Death Valley -86 m

highest point: Mount McKinley 6,194 m

Natural resources: coal, copper, lead, molybdenum, phosphates, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

Land use: arable land: 19%

permanent crops: 0%

permanent pastures: 25%

forests and woodland: 30%

other: 26% (1993 est.)

Irrigated land: 207,000 sq km (1993 est.)

Natural hazards: tsunamis, volcanoes, and earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the midwest and southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

Environment - current issues: air pollution resulting in acid rain in both the US and Canada; the US is the largest single emitter of carbon dioxide from the burning of fossil fuels; water pollution from runoff of pesticides and fertilizers; very limited natural fresh water resources in much of the western part of the country require careful management; desertification

Environment - international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Climate Change, Desertification, Endangered Species, Environmental Modification, Marine Dumping, Marine Life Conservation, Nuclear Test Ban, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling

signed, but not ratified: Air Pollution-Persistent Organic Pollutants, Air Pollution-Volatile Organic Compounds, Biodiversity, Climate Change-Kyoto Protocol, Hazardous Wastes

Geography - note: world's third-largest country (after Russia and Canada)

United States Economy

Economy - overview: The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$36,200. In this market-oriented economy, private individuals and business firms make most of the decisions, and government buys needed goods and services

predominantly in the private marketplace. US business firms enjoy considerably greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, lay off surplus workers, and develop new products. At the same time, they face higher barriers to entry in their rivals' home markets than the barriers to entry of foreign firms in US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment, although their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. The years 1994-2000 witnessed solid increases in real output, low inflation rates, and a drop in unemployment to below 5%. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical costs of an aging population, sizable trade deficits, and stagnation of family income in the lower economic groups. Growth weakened in the fourth quarter of 2000; growth for the year 2001 almost certainly will be substantially lower than the strong 5% of 2000. The outlook for 2001 is further clouded by the continued economic problems of Japan, Russia, Indonesia, Brazil, and many other countries.

Uruguay Introduction

Background: A violent Marxist urban guerrilla movement, the Tupamaros, launched in the late 1960s, led Uruguay's president to agree to military control of his administration in 1973. By the end of the year the rebels had been crushed, but the military continued to expand its hold throughout the government. Civilian rule was not restored until 1985. Uruguay's political and labor conditions are among the freest on the continent.

Uruguay Economy

Economy - overview: Uruguay's economy is characterized by an export-oriented agricultural sector, a well-educated workforce, relatively even income distribution, and high levels of social spending. After averaging growth of 5% annually in 1996-98, in 1999-2000 the economy suffered from lower demand in Argentina and Brazil, which together account for about half of Uruguay's exports. Despite the severity of the trade shocks, Uruguay's financial indicators remained more stable than those of its neighbors, a reflection of its solid reputation among investors and its investment-grade sovereign bond rating - one of only two in Latin America. Challenges for the government of President Jorge BATLLE include expanding Uruguay's trade ties beyond its MERCOSUR trade partners and reducing the costs of public services. GDP fell by 1.1% in 2000 and will grow by perhaps 1.5% in 2001.

Uzbekistan Introduction

Background: Russia conquered Uzbekistan in the late 19th century. Stiff resistance to the Red Army after World War I was eventually suppressed

and a socialist republic set up in 1925. During the Soviet era, intensive production of "white gold" (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land poisoned and the Aral Sea and certain rivers half dry. Independent since 1991, the country seeks to gradually lessen its dependence on agriculture while developing its mineral and petroleum reserves. Current concerns include insurgency by Islamic militants based in Tajikistan and Afghanistan, a non-convertible currency, and the curtailment of human rights and democratization.

Coastline: 0 km; note - Uzbekistan includes the southern portion of the Aral Sea with a 420 km shoreline

Maritime claims: none (doubly landlocked)

Climate: mostly midlatitude desert, long, hot summers, mild winters; semiarid grassland in east

Terrain: mostly flat-to-rolling sandy desert with dunes; broad, flat intensely irrigated river valleys along course of Amu Darya, Sirdaryo (Syr Darya), and Zarafshon; Fergana Valley in east surrounded by mountainous Tajikistan and Kyrgyzstan; shrinking Aral Sea in west

Elevation extremes: lowest point: Saryqarnish Kuli -12 m

highest point: Adelunga Toghi 4,301 m

Natural resources: natural gas, petroleum, coal, gold, uranium, silver, copper, lead and zinc, tungsten, molybdenum

Land use: arable land: 9%

permanent crops: 1%

permanent pastures: 46%

forests and woodland: 3%

other: 41% (1993 est.)

Irrigated land: 40,000 sq km (1993 est.)

Natural hazards: NA

Environment - current issues: drying up of the Aral Sea is resulting in growing concentrations of chemical pesticides and natural salts; these substances are then blown from the increasingly exposed lake bed and contribute to desertification; water pollution from industrial wastes and the heavy use of fertilizers and pesticides is the cause of many human health disorders; increasing soil salination; soil contamination from agricultural chemicals, including DDT

Environment - international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Ozone Layer Protection

signed, but not ratified: none of the selected agreements

Geography - note: along with Liechtenstein, one of the only two doubly landlocked countries in the world

Uzbekistan Economy

Economy - overview: Uzbekistan is a dry, landlocked country of which 10% consists of intensely cultivated, irrigated river valleys. More than 60% of its population lives in densely populated rural communities. Uzbekistan is now the world's third largest cotton exporter, a large producer of gold and oil, and a regionally significant producer of chemicals and machinery. Following independence in December 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. Faced with high rates of inflation, however, the government began to reform in mid-1994, by introducing tighter monetary policies, expanding privatization, slightly reducing the role of the state in the economy, and improving the environment for foreign investors. The state continues to be a dominating influence in the economy and has so far failed to bring about much-needed structural changes. The IMF suspended Uzbekistan's \$185 million standby arrangement in late 1996 because of governmental steps that made impossible fulfillment of Fund conditions. Uzbekistan has responded to the negative external conditions generated by

the Asian and Russian financial crises by tightening export and currency controls within its already largely closed economy. Economic policies that have repelled foreign investment are a major factor in the economy's stagnation. A growing debt burden, persistent inflation, and a poor business climate led to stagnant growth in 2000, with little improvement predicted for 2001.

Vanuatu Economy

Economy - overview: The economy is based primarily on subsistence or small-scale agriculture which provides a living for 65% of the population. Fishing, offshore financial services, and tourism, with about 50,000 visitors in 1997, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. The most recent natural disaster, a severe earthquake in November 1999 followed by a tsunami, caused extensive damage to the northern island of Pentecote and left thousands homeless. GDP growth has risen less than 3%

on average in the 1990s. In response to foreign concerns, the government is moving to tighten regulation of its offshore financial center.

Venezuela Introduction

Background: Venezuela was one of the three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Colombia and Ecuador). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Current concerns include: drug-related conflicts along the Colombian border, increasing internal drug consumption, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

Venezuela Economy

Economy - overview: The petroleum sector dominates the economy, accounting for roughly a third of GDP, around 80% of export earnings, and more than half of government operating revenues. Venezuelan officials estimate that GDP grew by 3.2% in 2000. A strong rebound in international oil prices fueled the recovery from the steep recession in 1999. Nevertheless, a weak nonoil sector and capital flight undercut the recovery. The bolivar is widely believed to be overvalued by as much as 50%. The government is still rebuilding after massive flooding and landslides in December 1999 caused an estimated \$15 billion to \$20 billion in damage.

Vietnam Introduction

Background: France occupied all of Vietnam by 1884. Independence was declared after World War II, but the French continued to rule until 1954 when they were defeated by communist forces under Ho Chi MINH, who took control of the north. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later North Vietnamese forces overran the south. Economic reconstruction of the reunited country has proven difficult as aging Communist Party leaders have only grudgingly initiated reforms necessary for a free market.

Vietnam Economy

Economy - overview: Vietnam is a poor, densely populated country that has had to recover from the ravages of war, the loss of financial support from the old Soviet Bloc, and the rigidities of a centrally planned economy. Substantial progress was achieved from 1986 to 1996 in moving forward from an extremely low starting point - growth averaged around 9% per year from 1993 to 1997. The 1997 Asian financial crisis highlighted the problems existing in the Vietnamese economy but, rather than prompting reform, reaffirmed the government's belief that shifting to a market oriented economy leads to disaster. GDP growth of 8.5% in 1997 fell to 6% in 1998 and 5% in 1999. Growth continued at the moderately strong level of 5.5%, a level that should be matched in 2001. These numbers mask some major difficulties in economic performance. Many domestic industries, including coal, cement, steel, and paper, have reported large stockpiles of inventory and tough competition from more efficient foreign producers; this problem apparently eased in 2000. Foreign direct investment fell dramatically, from \$8.3 billion in 1996 to about \$1.6 billion in 1999. Meanwhile, Vietnamese authorities have moved slowly in implementing the structural reforms needed to revitalize the economy and produce more competitive, export-driven industries.

@Virgin Islands

Virgin Islands Introduction

Background: During the 17th century, the archipelago was divided into two territorial units, one English and the other Danish. Sugarcane, produced by slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish portion, which had been in economic decline since the abolition of slavery in 1848.

Virgin Islands Economy

Economy - overview: Tourism is the primary economic activity, accounting for more than 70% of GDP and 70% of employment. The islands normally host 2 million visitors a year. The manufacturing sector consists of petroleum refining, textiles, electronics, pharmaceuticals, and watch assembly. The agricultural sector is small, with most food being imported. International business and financial services are a small but growing component of the economy. One of the world's largest petroleum refineries is at Saint Croix. The islands are subject to substantial damage from storms. The government is working to improve fiscal discipline, support construction projects in the private sector, expand tourist facilities, and protect the environment.

@Wake Island

Wake Island Introduction

Background: The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940-41. In December 1941 the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake was developed as a stopover and refueling site for military and commercial aircraft transiting the Pacific.

Since 1974, the island's airstrip has been used by the US military and some commercial cargo planes, as well as for emergency landings. There are over 700 landings a year on the island.

@West Bank

West Bank Introduction

Background: The Israel-PLO Declaration of Principles on Interim Self-Government Arrangements (the DOP), signed in Washington on 13 September 1993, provided for a transitional period not exceeding five years of Palestinian interim self-government in the Gaza Strip and the West Bank. Under the DOP, Israel agreed to transfer certain powers and responsibilities to the Palestinian Authority, which includes the Palestinian Legislative Council elected in January 1996, as part of interim self-governing arrangements in the West Bank and Gaza Strip. A transfer of powers and responsibilities for the Gaza Strip and Jericho took place pursuant to the Israel-PLO 4 May 1994 Cairo Agreement on the Gaza Strip and the Jericho Area and in additional areas of the West Bank pursuant to the Israel-PLO 28

September 1995 Interim Agreement, the Israel-PLO 15 January 1997 Protocol Concerning Redeployment in Hebron, the Israel-PLO 23 October 1998 Wye River Memorandum, and the 4 September 1999 Sharm el-Sheikh Agreement. The DOP provides that Israel will retain responsibility during the transitional period for external security and for internal security and public order of settlements and Israeli citizens. Permanent status is to be determined through direct negotiations, which resumed in September 1999 after a three-year hiatus. An intifadah broke out in September 2000; the resulting widespread violence in the West Bank and Gaza Strip, Israel's military response, and instability in the Palestinian Authority are undermining progress toward a permanent settlement.

West Bank Economy

Economy - overview: Economic output in the West Bank is governed by the Paris Economic Protocol of April 1994 between Israel and the Palestinian Authority. Real per capita GDP for the West Bank and Gaza Strip (WBGs) declined by 36.1% between 1992 and 1996 owing to the combined effect of falling aggregate incomes and rapid population growth. The downturn in economic activity was largely the result of Israeli closure policies - the imposition of border closures in response to security incidents in Israel - which disrupted established labor and commodity market relationships between Israel and the WBGs. The most serious social effect of this downturn was rising unemployment; unemployment in the WBGs during the 1980s was generally under 5%; by 1995 it had risen to over 20%. Since 1997 Israel's use of comprehensive closures has decreased and, in 1998, Israel implemented new policies to reduce the impact of closures and other security procedures on the movement of Palestinian goods and labor. These changes fueled an almost three-year long economic recovery in the West Bank and Gaza Strip; real GDP grew by 5% in 1998 and 6% in 1999.

Recovery was upended in the last quarter of 2000 with the outbreak of Palestinian violence, which triggered tight Israeli closures of Palestinian self-rule areas and a severe disruption of trade and labor movements.

Western Sahara Introduction

Background: Morocco virtually annexed the northern two-thirds of Western Sahara (formerly Spanish Sahara) in 1976, and the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Rabat's sovereignty ended in a 1991 cease-fire; a referendum on final status has been repeatedly postponed and is not expected to occur until at least 2002.

World Introduction Top of Page

Background: Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about the environment, including loss of forests, shortages of energy and water, the drop in biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820, to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1988, and 6 billion in 2000. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances in medicine) and fears (e.g., development of even more lethal weapons of war).

World Economy

Economy - overview: Growth in global output (gross world product, GWP) rose to 4.8% in 2000 from 3.5% in 1999, despite continued low

growth in Japan, severe financial difficulties in other East Asian countries, and widespread dislocations in several transition economies. The US economy continued its remarkable sustained prosperity, growing at 5% in 2000, although growth slowed in fourth quarter 2000; the US accounted for 23% of GWP. The EU economies grew at 3.3% and produced 20% of GWP. China, the second largest economy in the world, continued its strong growth and accounted for 10% of GWP. Japan grew at only 1.3% in 2000; its share in GWP is 7%. As usual, the 15 successor nations of the USSR and the other old Warsaw Pact nations experienced widely different rates of growth. The developing nations also varied in their growth results, with many countries facing population increases that eat up gains in output. Externally, the nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of people, goods, funds, and technology. Internally, the central government often finds its control over resources slipping as separatist regional movements - typically based on ethnicity - gain momentum, e.g., in many of the successor states of the former Soviet Union, in the former Yugoslavia, in India, and in Canada. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of pollution, desertification, underemployment, epidemics, and famine. Because of their own internal problems and priorities, the industrialized countries devote insufficient resources to deal effectively with the poorer areas of the world, which, at least from the economic point of view, are becoming further marginalized. Continued financial difficulties in East Asia, Russia, and many African nations, as well as the slowdown in US economic growth, cast a shadow over short-term global economic prospects; GWP probably will grow at 3-4% in 2001. The introduction of the euro as the common currency of much of Western

Europe in January 1999, while paving the way for an integrated economic powerhouse, poses serious economic risks because of varying levels of income and cultural and political differences among the participating nations. (For specific economic developments in each country of the world in 2000, see the individual country entries.)

Yemen Introduction

Background: North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border.

Yemen Economy

Economy - overview: Yemen, one of the poorest countries in the Arab world, reported strong growth in the mid-1990s with the onset of oil production, but was harmed by low oil prices in 1998. Yemen has embarked on an IMF-supported structural adjustment program designed to modernize and streamline the economy, which has led to foreign debt relief and restructuring. Aided by higher oil prices in 1999-2000, Yemen worked to maintain tight control over spending and implement additional components of the IMF program. A high population growth rate of nearly 3.4% and internal political dissension complicate the government's task.

Yugoslavia Introduction

Background: The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Occupation by Nazi Germany in 1941 was resisted by various partisan bands that fought themselves as well as the invaders. The group headed by Marshal TITO took full control upon German expulsion in 1945. Although communist in name, his new government successfully steered its own path between the Warsaw Pact nations and the West for the next four and a half decades. In the early 1990s, post-TITO Yugoslavia began to unravel along ethnic lines: Slovenia, Croatia, and The Former Yugoslav Republic of Macedonia all declared their independence in 1991; Bosnia and Herzegovina in 1992. The remaining republics of Serbia and Montenegro declared a new "Federal Republic of Yugoslavia" in 1992 and, under President Slobodan MILOSEVIC, Serbia led various military intervention efforts to unite Serbs in neighboring republics into a "Greater Serbia." All of these efforts were ultimately unsuccessful. In 1999, massive expulsions by Serbs of ethnic Albanians living in the autonomous republic of Kosovo provoked an international response, including the NATO bombing of Serbia and the stationing of NATO and Russian peacekeepers in Kosovo. Blatant attempts to manipulate presidential balloting in October of 2000 were followed by

massive nationwide demonstrations and strikes that saw the election winner, Vojislav KOSTUNICA, replace MILOSEVIC.

Yugoslavia Economy

Economy - overview: The swift collapse of the Yugoslav federation in 1991 was followed by highly destructive warfare, the destabilization of republic boundaries, and the breakup of important interrepublic trade flows. Output in Yugoslavia dropped by half in 1992-93. Like the other former Yugoslav republics, it had depended on its sister republics for large amounts of energy and manufactures. Wide differences in climate, mineral resources, and levels of technology among the republics accentuated this interdependence, as did the communist practice of concentrating much industrial output in a small number of giant plants. The breakup of many of the trade links, the sharp drop in output as industrial plants lost suppliers and markets, and the destruction of physical assets in the fighting all have contributed to the economic difficulties of the republics. Hyperinflation ended with the establishment of a new currency unit in June 1993; prices were relatively stable from 1995 through 1997, but inflationary pressures resurged in 1998. Reliable statistics continue to be hard to come by, and the GDP estimate is extremely rough. The economic boom anticipated by the

government after the suspension of UN sanctions in December 1995 has failed to materialize. Government mismanagement of the economy is largely to blame, but the damage to Yugoslavia's infrastructure and industry by the NATO bombing during the war in Kosovo have added to problems. All sanctions now have been lifted. Yugoslavia is in the first stage of economic reform. Severe electricity shortages are chronic, the result of lack of investment by former regimes, depleted hydropower reservoirs due to extended drought, and lack of funds. GDP growth in 2000 was perhaps 15%, which made up for a large part of the 20% decline of 1999.

Zambia Introduction

Background: The territory of Northern Rhodesia was administered by the South Africa Company from 1891 until takeover by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule, but the subsequent vote in 1996 saw blatant harassment of opposition parties.

Zambia Economy

Economy - overview: Despite progress in privatization and budgetary reform, Zambia's economy has a long way to go. Privatization of government-owned copper mines relieved the government from covering mammoth losses generated by the industry and greatly improved the chances for copper mining to return to profitability and spur economic growth. In late 2000, Zambia was determined to be eligible for debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. Inflation and unemployment rates remain high, but the GDP growth rate should rise in 2001.

Zimbabwe Introduction

Background: The UK annexed Southern Rhodesia from the South Africa Company in 1923. A 1961 constitution was formulated to keep whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded voting rights for the black

African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence.

Zimbabwe Economy

Economy - overview: The government of Zimbabwe faces a wide variety of difficult economic problems as it struggles to consolidate earlier moves to develop a market-oriented economy. Its involvement in the war in the Democratic Republic of the Congo, for example, has already drained hundreds of millions of dollars from the economy. Badly needed support from the IMF suffers delays in part because of the country's failure to meet budgetary goals. Inflation rose from an annual rate of 32% in 1998 to 59% in 1999 and 60% in 2000. The economy is being steadily weakened by excessive government deficits and AIDS; Zimbabwe has the highest rate of infection in the world. Per capita GDP, which is twice the average of the poorer sub-Saharan nations, will increase little if any in the near-term, and

Zimbabwe will suffer continued frustrations in developing its agricultural and mineral resources.

@Background

Afghanistan:
Afghanistan was invaded and occupied by the Soviet Union in 1979. The USSR was forced to withdraw 10 years later by anti-communist mujahidin forces supplied and trained by the US, Saudi Arabia, Pakistan, and others. Fighting subsequently continued among the various mujahidin factions, but the fundamentalist Islamic

Taliban movement has been able to seize most of the country. In addition to the continuing civil strife, the country suffers from enormous poverty, a crumbling infrastructure, and widespread land mines.

Albania:

In 1990 Albania ended 44 years of xenophobic communist rule and established a multiparty democracy. The transition has proven difficult as corrupt governments have tried to deal with high unemployment, a dilapidated infrastructure, widespread gangsterism, and disruptive political opponents. International observers judged local elections in 2000 to be acceptable and a step toward democratic development, but serious deficiencies remain to be corrected before the the 2001 parliamentary elections.

Algeria:

After a century of rule by France, Algeria became independent in 1962. The surprising first round success of the fundamentalist FIS (Islamic Salvation Front) party in December 1991 balloting caused the army to intervene, crack down on the FIS, and postpone the subsequent elections. The FIS response has resulted in a continuous low-grade civil conflict with the secular state apparatus, which nonetheless has allowed elections featuring pro-government and moderate religious-based parties. FIS's armed wing, the Islamic Salvation Army, disbanded itself in January 2000 and many armed militants surrendered under an amnesty program designed to promote national reconciliation. Nevertheless, residual fighting continues. Other concerns include large-scale unemployment and the need to diversify the petroleum-based economy.

American Samoa:

Settled as early as 1000 B. C., Samoa was "discovered" by European explorers in the 18th century. International rivalries in the latter half of the 19th century were settled by an 1899 treaty in which Germany and the US divided the Samoan archipelago. The US formally occupied its portion - a smaller group of eastern islands with the excellent harbor of Pago Pago - the following year.

Andorra:

Long isolated and impoverished, mountainous Andorra has achieved considerable prosperity since World War II through its tourist industry. Many immigrants (legal and illegal) are attracted to the thriving economy with its lack of income taxes.

Angola:

Civil war has been the norm in Angola since independence from Portugal in 1975. A 1994 peace accord between the government and the National Union for the Total Independence of Angola (UNITA) provided for the integration of former UNITA insurgents into the government and armed forces. A national unity government was installed in April of 1997, but serious fighting resumed in late 1998, rendering hundreds of thousands of people homeless. Up to 1.5 million lives may have been lost in fighting over the past quarter century.

Anguilla:

Colonized by English settlers from Saint Kitts in 1650, Anguilla was administered by Great Britain until the early 19th century, when the island - against the wishes of the inhabitants - was incorporated into a single British dependency along with Saint

Kitts and Nevis. Several attempts at separation failed. In 1971, two years after a revolt, Anguilla was finally allowed to secede; this arrangement was formally recognized in 1980 with Anguilla becoming a separate British dependency.

Antarctica:

Speculation over the existence of a "southern land" was not confirmed until the early 1820s when British and American commercial operators and British and Russian national expeditions began exploring the Peninsula region and areas south of the Antarctic Circle. Not until 1838 was it established that Antarctica was indeed a continent and not just a group of islands. Various "firsts" were achieved in the early 20th century, including: 1902, first balloon flight (by British explorer Robert Falcon SCOTT); 1912, first to the South Pole (five Norwegian explorers under Roald AMUNDSEN); 1928, first fixed-wing aircraft flight (by Australian adventurer/explorer Sir Hubert WILKINS); 1929, first flight over the South Pole (by Americans Richard BYRD and Bernt BALCHEN); and 1935, first transantarctic flight (American Lincoln ELLSWORTH). Following World War II, there was an upsurge in scientific research on the continent. A number of countries have set up year-round research stations on Antarctica. Seven have made territorial claims, but no other country recognizes these claims. In order to form a legal framework for the activities of nations on the continent, an Antarctic Treaty was negotiated that neither denies nor gives recognition to existing territorial claims; signed in 1959, it entered into force in 1961.

Antigua and Barbuda:

The islands of Antigua and Barbuda became an

independent state within the British Commonwealth of Nations in 1981. Some 3,000 refugees fleeing a volcanic eruption on nearby Montserrat have settled in Antigua and Barbuda since 1995.

Arctic Ocean:

The Arctic Ocean is the smallest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, Indian Ocean, and the recently delimited Southern Ocean). The Northwest Passage (US and Canada) and Northern Sea Route (Norway and Russia) are two important seasonal waterways. A sparse network of air, ocean, river, and land routes circumscribes the Arctic Ocean.

Argentina:

Following independence from Spain in 1816, Argentina experienced periods of internal political conflict between conservatives and liberals and between civilian and military factions. After World War II, a long period of Peronist dictatorship was followed by a military junta that took power in 1976. Democracy returned in 1983, and numerous elections since then have underscored Argentina's progress in democratic consolidation.

Armenia:

An Orthodox Christian country, Armenia was incorporated into Russia in 1828 and the USSR in 1920. Armenian leaders remain preoccupied by the long conflict with Azerbaijan over Nagorno-Karabakh, a primarily Armenian-populated exclave, assigned to Soviet Azerbaijan in the 1920s by Moscow. Armenia and Azerbaijan began fighting over the exclave in 1988; the struggle escalated after both countries attained independence from the Soviet Union in 1991. By May 1994, when a cease-fire took hold, Armenian forces held not only Nagorno-Karabakh but also a significant portion of

Azerbaijan proper. The economies of both sides have been hurt by their inability to make substantial progress toward a peaceful resolution.

Aruba:

Discovered and claimed for Spain in 1499, Aruba was acquired by the Dutch in 1636. The island's economy has been dominated by three main industries. A 19th century gold rush was followed by prosperity brought on by the opening in 1924 of an oil refinery. The last decades of the 20th century saw a boom in the tourism industry. Aruba seceded from the Netherlands Antilles in 1986 and became a separate, autonomous member of the Kingdom of the Netherlands. Movement toward full independence was halted at Aruba's request in 1990.

Ashmore and Cartier Islands: These uninhabited islands came under Australian authority in 1931; formal administration began two years later. Ashmore Reef supports a rich and diverse avian and marine habitat; in 1983 it became a National Nature Reserve. Recent geological explorations have indicated promising petroleum formations.

Atlantic Ocean:

The Atlantic Ocean is the second-largest of the world's five oceans (after the Pacific Ocean, but larger than the Indian Ocean, Southern Ocean, and Arctic Ocean). The Kiel Canal (Germany), Oresund (Denmark-Sweden), Bosphorus (Turkey), Strait of Gibraltar (Morocco-Spain), and the St. Lawrence Seaway (Canada-US) are important strategic access waterways. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth world ocean, the Southern Ocean, removed the portion of the Atlantic Ocean south of 60 degrees south.

Australia:

Australia became a commonwealth of the British Empire in 1901. It was able to take advantage of its natural resources to rapidly develop its agricultural and manufacturing industries and to make a major contribution to the British effort in World Wars I and II. Long-term concerns include pollution, particularly depletion of the ozone layer, and management and conservation of coastal areas, especially the Great Barrier Reef. A referendum to change Australia's status, from a commonwealth headed by the British monarch to an independent republic, was defeated in 1999.

Austria:

Once the center of power for the large Austro-Hungarian Empire, Austria was reduced to a small republic after its defeat in World War I. Following annexation by Nazi Germany in 1938 and subsequent occupation by the victorious Allies, Austria's 1955 State Treaty declared the country "permanently neutral" as a condition of Soviet military withdrawal. Neutrality, once ingrained as part of the Austrian cultural identity, has been called into question since the Soviet collapse of 1991 and Austria's increasingly prominent role in European affairs. A prosperous country, Austria joined the European Union in 1995 and the euro monetary system in 1999.

Azerbaijan:

Azerbaijan - a nation of Turkic Muslims - has been an independent republic since the collapse of the Soviet Union in 1991. Despite a cease-fire, in place since 1994, Azerbaijan has yet to resolve its conflict with Armenia over the Azerbaijani Nagorno-Karabakh enclave (largely Armenian populated). Azerbaijan has lost almost 20% of its territory and must support some 750,000 refugees and internally displaced persons (IDPs) as a result of the

conflict. Corruption is ubiquitous and the promise of widespread wealth from Azerbaijan's undeveloped petroleum resources remains largely unfulfilled.

Bahamas, The:

Since attaining independence from the UK in 1973, The Bahamas have prospered through tourism and international banking and investment management. Because of its geography, the country is a major transshipment point for illegal drugs, particularly shipments to the US, and its territory is used for smuggling illegal migrants into the US.

Bahrain:

Bahrain's small size and central location among Persian Gulf countries require it to play a delicate balancing act in foreign affairs among its larger neighbors. Possessing minimal oil reserves, Bahrain has turned to petroleum processing and refining, and has transformed itself into an international banking center. The new amir is pushing economic and political reforms, and has worked to improve relations with the Shi'a community. In 2001, the International Court of Justice awarded the Hawar Islands, long disputed with Qatar, to Bahrain.

Baker Island:

The US took possession of the island in 1857, and its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization was begun on this island - as well as on nearby Howland Island - but was disrupted by World War II and thereafter abandoned. Presently the island is a National Wildlife Refuge run by the US

Department of the Interior; a day beacon is situated near the middle of the west coast.

Bangladesh:

Bangladesh came into existence in 1971 when Bengali East Pakistan seceded from its union with West Pakistan. About a third of this extremely poor country annually floods during the monsoon rainy season, hampering economic development.

Barbados:

The island was uninhabited when first settled by the British in 1627. Its economy remained heavily dependent on sugar, rum, and molasses production through most of the 20th century. In the 1990s, tourism and manufacturing surpassed the sugar industry in economic importance.

Bassas da India:

This atoll is a volcanic rock surrounded by reefs and is awash at high tide. A French possession since 1897, it was placed under the administration of a commissioner residing in Reunion in 1968.

Belarus:

After seven decades as a constituent republic of the USSR, Belarus attained its independence in 1991. It has retained closer political and economic ties to Russia than any of the other former Soviet republics. Belarus and Russia signed a treaty on a two-state union on 8 December 1999 envisioning greater political and economic integration but, to date, neither side has actively sought to implement the accord.

Belgium:

Belgium became independent from the Netherlands in 1830 and was occupied by Germany during World Wars I and II. It has prospered in the past half century as a modern, technologically advanced European state and member of NATO and the EU. Tensions between the Dutch-speaking Flemings of the north and the French-speaking Walloons of the south have led in recent years to constitutional amendments granting these regions formal recognition and autonomy.

Belize:

Territorial disputes between the UK and Guatemala delayed the independence of Belize (formerly British Honduras) until 1981. Guatemala refused to recognize the new nation until 1992. Tourism has become the mainstay of the economy. The country remains plagued by high unemployment, growing involvement in the South American drug trade, and increased urban crime.

Benin:

Dahomey gained its independence from France in 1960; the name was changed to Benin in 1975. From 1974 to 1989 the country was a socialist state; free elections were reestablished in 1991.

Bermuda:

Bermuda was first settled in 1609 by shipwrecked English colonists headed for Virginia. Tourism to the island to escape North American winters first developed in Victorian times. Bermuda has developed into a highly successful offshore financial center. A referendum on independence was soundly defeated in 1995.

Bhutan:

Under British influence a monarchy was set up in 1907; three years later a treaty was signed whereby the country became a British

protectorate. Independence was attained in 1949, with India subsequently guiding foreign relations and supplying aid. A refugee issue of some 100,000 Bhutanese in Nepal remains unresolved; 90% of these displaced persons are housed in seven United Nations Office of the High Commissioner for Refugees (UNHCR) camps. Maoist Assamese separatists from India, who have established themselves in the southeast portion of Bhutan, have drawn Indian cross-border incursions.

Bolivia:

Bolivia, named after independence fighter Simon BOLIVAR, broke away from Spanish rule in 1825; much of its subsequent history has consisted of a series of nearly 200 coups and counter-coups. Comparatively democratic civilian rule was established in the 1980s, but leaders have faced difficult problems of deep-seated poverty, social unrest, and drug production. Current goals include attracting foreign investment, strengthening the educational system, continuing the privatization program, and waging an anti-corruption campaign.

Bosnia and Herzegovina:

Bosnia and Herzegovina's declaration of sovereignty in October 1991, was followed by a referendum for independence from the former Yugoslavia in February 1992. The Bosnian Serbs - supported by neighboring Serbia - responded with armed resistance aimed at partitioning the republic along ethnic lines and joining Serb-held areas to form a "greater Serbia." In March 1994, Bosniaks and Croats reduced the number of warring factions from three to two by signing an agreement creating a joint Bosniak/Croat Federation of Bosnia and Herzegovina. On 21 November 1995, in Dayton, Ohio, the warring parties signed a peace agreement that brought to a halt the three years of interethnic civil strife

(the final agreement was signed in Paris on 14 December 1995). The Dayton Agreement retained Bosnia and Herzegovina's international boundaries and created a joint multi-ethnic and democratic government. This national government is charged with conducting foreign, economic, and fiscal policy. Also recognized was a second tier of government comprised of two entities roughly equal in size: the Bosniak/Croat Federation of Bosnia and Herzegovina and the Bosnian Serb-led Republika Srpska (RS). The Federation and RS governments are charged with overseeing internal functions. In 1995-96, a NATO-led international peacekeeping force (IFOR) of 60,000 troops served in Bosnia to implement and monitor the military aspects of the agreement. IFOR was succeeded by a smaller, NATO-led Stabilization Force (SFOR) whose mission is to deter renewed hostilities. SFOR remains in place at a level of approximately 21,000 troops.

Botswana:

Formerly the British protectorate of Bechuanaland, Botswana adopted its new name upon independence in 1966. The economy, one of the most robust on the continent, is dominated by diamond mining.

Bouvet Island:

This uninhabited volcanic island is almost entirely covered by glaciers and is difficult to approach. It was discovered in 1739 by a French naval officer after whom the island was named. No claim was made until 1825 when the British flag was raised. In 1928, the UK waived its claim in favor of Norway, which had occupied the island the previous year. In 1971, Bouvet Island and the adjacent territorial waters were designated a nature reserve. Since

1977, Norway has run an automated meteorological station on the island.

Brazil:

Following three centuries under the rule of Portugal, Brazil became an independent nation in 1822. By far the largest and most populous country in South America, Brazil has overcome more than half a century of military intervention in the governance of the country to pursue industrial and agricultural growth and development of the interior. Exploiting vast natural resources and a large labor pool, Brazil became Latin America's leading economic power by the 1970s. Highly unequal income distribution remains a pressing problem.

British Indian Ocean Territory: Established as a territory of the UK in 1965, a number of the British Indian Ocean Territory (BIOT) islands were transferred to the Seychelles when it attained independence in 1976. Subsequently, BIOT has consisted only of the six main island groups comprising the Chagos Archipelago. The largest and most southerly of the islands, Diego Garcia, contains a joint UK-US naval support facility. All of the remaining islands are uninhabited. Former agricultural workers, earlier resident in the islands, were relocated primarily to Mauritius but also to the Seychelles, between 1967 and 1973. In 2000, a British High Court ruling invalidated the local immigration order which had excluded them from the archipelago, but upheld the special military status of Diego Garcia.

British Virgin Islands:

First settled by the Dutch in 1648, the islands were soon after (1672) annexed by the English. The economy is closely tied to the larger and more populous US Virgin Islands to the west; the US dollar is the legal currency.

Brunei:

The Sultanate of Brunei's heyday occurred between the 15th and 17th centuries, when its control extended over coastal areas of northwest Borneo and the southern Philippines. Brunei subsequently entered a period of decline brought on by internal strife over royal succession, colonial expansion of European powers, and piracy. In 1888, Brunei became a British protectorate; independence was achieved in 1984. Brunei benefits from extensive petroleum and natural gas fields, the source of one of the highest per capita GDPs in the less developed countries. The same family has now ruled in Brunei for over six centuries.

Bulgaria:

Bulgaria earned its independence from the Ottoman Empire in 1878, but having fought on the losing side in both World Wars, it fell within the Soviet sphere of influence and became a People's Republic in 1946. Communist domination ended in 1990, when Bulgaria held its first multi-party election since World War II and began the contentious process of moving toward political democracy and a market economy while combating inflation, unemployment, corruption, and crime. Today, reforms and democratization keep Bulgaria on a path toward eventual integration into NATO and the EU - with which it began accession negotiations in 2000.

Burkina Faso:

Independence from France came to Burkina Faso (formerly Upper Volta) in 1960. Governmental instability during the 1970s and 1980s was followed by multiparty elections in the early 1990s. Several hundred thousand farm workers migrate south every year to Cote d'Ivoire and Ghana.

Burma:

Despite multiparty elections in 1990 that resulted in the main opposition party winning a decisive victory, the military junta ruling the country refused to hand over power. Key opposition leader and Nobel Peace Prize recipient AUNG San Suu Kyi, under house arrest from 1989 to 1995, was again placed under house detention in September 2000; her supporters are routinely harassed or jailed.

Burundi:

Between 1993 and 2000, wide-spread, often intense ethnic violence between Hutu and Tutsi factions in Burundi created hundreds of thousands of refugees and left tens of thousands dead. Although some refugees have returned from neighboring countries, continued ethnic strife has forced many others to flee. Burundian troops, seeking to secure their borders, have intervened in the conflict in the Democratic Republic of the Congo.

Cambodia:

Following a five-year struggle, communist Khmer Rouge forces captured Phnom Penh in 1975 and ordered the evacuation of all cities and towns; over 1 million displaced people died from execution or enforced hardships. A 1978 Vietnamese invasion drove the Khmer Rouge into the countryside and touched off 13 years of fighting. UN-sponsored elections in 1993 helped restore some semblance of normalcy, as did the rapid diminishment of the Khmer Rouge in the mid-1990s. A coalition government, formed after national elections in 1998, brought renewed political stability and the surrender of remaining Khmer Rouge forces.

Cameroon:

The former French Cameroon and part of British Cameroon

merged in 1961 to form the present country. Cameroon has generally enjoyed stability, which has permitted the development of agriculture, roads, and railways, as well as a petroleum industry. Despite movement toward democratic reform, political power remains firmly in the hands of an ethnic oligarchy.

Canada:

A land of vast distances and rich natural resources, Canada became a self-governing dominion in 1867 while retaining ties to the British crown. Economically and technologically the nation has developed in parallel with the US, its neighbor to the south across an unfortified border. Its paramount political problem continues to be the relationship of the province of Quebec, with its French-speaking residents and unique culture, to the remainder of the country.

Cape Verde:

The uninhabited islands were discovered and colonized by the Portuguese in the 15th century; they subsequently became a trading center for African slaves. Most Cape Verdeans descend from both groups. Independence was achieved in 1975.

Cayman Islands:

The Cayman Islands were colonized from Jamaica by the British during the 18th and 19th centuries. Administered by Jamaica from 1863, they remained a British dependency after 1962 when the former became independent.

Central African Republic:

The former French colony of Ubangi-Shari became the Central African Republic upon independence in 1960. After

three tumultuous decades of misrule - mostly by military governments
- a civilian government was installed in 1993.

Chad:

Chad, part of France's African holdings until 1960, endured three decades of ethnic warfare as well as invasions by Libya before a semblance of peace was finally restored in 1990. The government eventually suppressed or came to terms with most political-military groups, settled a territorial dispute with Libya on terms favorable to Chad, drafted a democratic constitution, and held multiparty presidential and National Assembly elections in 1996 and 1997 respectively. In 1998 a new rebellion broke out in northern Chad, which continued to escalate throughout 2000. Despite movement toward democratic reform, power remains in the hands of a northern ethnic oligarchy.

Chile:

A three-year-old Marxist government was overthrown in 1973 by a dictatorial military regime led by Augusto PINOCHET, which ruled until a freely elected president was installed in 1990. Sound economic policies, first implemented by the PINOCHET dictatorship, led to unprecedented growth in 1991-97 and have helped secure the country's commitment to democratic and representative government. Growth slowed in 1998-99, but recovered strongly in 2000.

China:

For centuries China has stood as a leading civilization, outpacing the rest of the world in the arts and sciences. But in the first half of the 20th century, China was beset by major famines, civil unrest, military defeats, and foreign occupation. After World War II, the Communists under MAO Zedong established a dictatorship

that, while ensuring China's sovereignty, imposed strict controls over everyday life and cost the lives of tens of millions of people. After 1978, his successor DENG Xiaoping gradually introduced market-oriented reforms and decentralized economic decision making. Output quadrupled in the next 20 years and China now has the world's second largest GDP. Political controls remain tight even while economic controls continue to weaken.

Christmas Island:

Named in 1643 for the day of its discovery, the island was annexed and settlement was begun by the UK in 1888. Phosphate mining began in the 1890s. The UK transferred sovereignty to Australia in 1958. The phosphate mine, closed in 1987, was reopened four years later, but the need for an alternative industry has spurred investment in tourism. Old mining areas are being restored, and almost two-thirds of the island has been declared a national park.

Clipperton Island:

This isolated island was named for John CLIPPERTON, a pirate who made it his hideout early in the 18th century. Annexed by France in 1855, it was seized by Mexico in 1897. Arbitration eventually awarded the island to France, which took possession in 1935.

Cocos (Keeling) Islands:

The islands were discovered in 1609, but remained uninhabited until the 19th century. Annexed by the UK in 1857, they were transferred to the Australian Government in 1955. The population on the two inhabited islands is split between the mostly Europeans on West Island and the Malays on Home Island.

Colombia:

Colombia was one of the three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and Venezuela). A 40-year insurgent campaign to overthrow the Colombian Government escalated during the 1990s, undergirded in part by funds from the drug trade. Although the violence is deadly and large swaths of the countryside are under guerrilla influence, the movement lacks the military strength or popular support necessary to overthrow the government. While Bogota continues to try to negotiate a settlement, neighboring countries worry about the violence spilling over their borders.

Comoros:

Unstable Comoros has endured 19 coups or attempted coups since gaining independence from France in 1975. In 1997, the islands of Anjouan and Moheli declared their independence from Comoros. In 1999, military chief Col. AZALI seized power. He has pledged to resolve the secessionist crisis through the 2000 Fomboni Accord, a confederal arrangement that the Organization of African Unity has yet to recognize.

Congo, Democratic Republic of the:

Since 1994 the Democratic Republic of the Congo (DROC; formerly called Zaire) has been rent by ethnic strife and civil war, touched off by a massive inflow of refugees from the fighting in Rwanda and Burundi. The government of former president MOBUTU Sese Seko was toppled by a rebellion led by Laurent KABILA in May 1997; his regime was subsequently challenged by a Rwanda- and Uganda-backed rebellion in August 1998. Troops from Zimbabwe, Angola, Namibia, Chad, and Sudan intervened to support the Kinshasa regime. A cease-fire was signed on 10 July 1999, but

sporadic fighting continued. KABILA was assassinated in January 2001 and his son Joseph KABILA was named head of state. The new president quickly began overtures to end the war.

Congo, Republic of the:

Upon independence in 1960, the former French region of Middle Congo became the Republic of the Congo. A quarter century of experimentation with Marxism was abandoned in 1990 and a democratically elected government installed in 1992. A brief civil war in 1997 restored former Marxist President SASSOU-NGUESSO.

Cook Islands:

Named after Captain Cook, who sighted them in 1770, the islands became a British protectorate in 1888. By 1900, administrative control was transferred to New Zealand; in 1965 residents chose self-government in free association with New Zealand. The emigration of skilled workers to New Zealand and government deficits are continuing problems.

Coral Sea Islands:

Scattered over some 1 million square kilometers of ocean, the Coral Sea Islands were declared a territory of Australia in 1969. They are uninhabited except for a small meteorological staff on Willis Island. Automated weather stations, beacons, and a lighthouse occupy many other islands and reefs.

Costa Rica:

Costa Rica is a Central American success story: since the late 19th century, only two brief periods of violence have marred its democratic development. Although still a largely agricultural country, it has achieved a relatively high standard of

living. Land ownership is widespread. Tourism is a rapidly expanding industry.

Cote d'Ivoire:

Close ties to France since independence in 1960, the development of cocoa production for export, and foreign investment made Cote d'Ivoire one of the most prosperous of the tropical African states. Falling cocoa prices and political turmoil, however, sparked an economic downturn in 1999 and 2000. On 25 December 1999, a military coup - the first ever in Cote d'Ivoire's history - overthrew the government led by President Henri Konan BEDIE.

Presidential and legislative elections held in October and December 2000 provoked violence due to the exclusion of opposition leader

Alassane OUATTARA. In October 2000, Laurent GBAGBO replaced junta

leader Robert GUEI as president, ending 10 months of military rule.

Croatia:

In 1918, the Croats, Serbs, and Slovenes formed a kingdom known after 1929 as Yugoslavia. Following World War II, Yugoslavia became an independent communist state under the strong hand of Marshal TITO. Although Croatia declared its independence from Yugoslavia in 1991, it took four years of sporadic, but often bitter, fighting before occupying Serb armies were mostly cleared from Croatian lands. Under UN supervision the last Serb-held enclave in eastern Slavonia was returned to Croatia in 1998.

Cuba:

Fidel CASTRO led a rebel army to victory in 1959; his iron rule has held the country together since. Cuba's communist revolution, with Soviet support, was exported throughout Latin

America and Africa during the 1960s, 70s, and 80s. The country is now slowly recovering from a severe economic recession in 1990, following the withdrawal of former Soviet subsidies, worth \$4 billion to \$6 billion annually. Havana portrays its difficulties as the result of the US embargo in place since 1961. Illicit migration to the US - using homemade rafts, alien smugglers, or falsified visas - is a continuing problem. Some 3,000 Cubans took to the Straits of Florida in 2000; the US Coast Guard interdicted only about 35% of these.

Cyprus:

Independence from the UK was approved in 1960 with constitutional guarantees by the Greek Cypriot majority to the Turkish Cypriot minority. In 1974, a Greek-sponsored attempt to seize the government was met by military intervention from Turkey, which soon controlled almost 40% of the island. In 1983, the Turkish-held area declared itself the "Turkish Republic of Northern Cyprus", but it is recognized only by Turkey. UN-led talks on the status of Cyprus resumed in December 1999 to prepare the ground for meaningful negotiations leading to a comprehensive settlement.

Czech Republic:

After World War II, Czechoslovakia fell within the Soviet sphere of influence. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize party rule and create "socialism with a human face." Anti-Soviet demonstrations the following year ushered in a period of harsh repression. With the collapse of Soviet authority in 1989, Czechoslovakia regained its freedom through a peaceful "Velvet Revolution." On 1 January 1993, the country underwent a "velvet divorce" into its two national components, the Czech Republic and

Slovakia. Now a member of NATO, the Czech Republic has moved toward integration in world markets, a development that poses both opportunities and risks.

Denmark:

Once the seat of Viking raiders and later a major north European power, Denmark has evolved into a modern, prosperous nation that is participating in the political and economic integration of Europe. So far, however, the country has opted out of some aspects of the European Union's Maastricht Treaty, including the economic and monetary system (EMU) and issues concerning certain internal affairs.

Djibouti:

The French Territory of the Afars and the Issas became Djibouti in 1977. A peace accord in 1994 ended a three-year uprising by Afars rebels.

Dominica:

Dominica was the last of the Caribbean islands to be colonized by Europeans, due chiefly to the fierce resistance of the native Caribs. France ceded possession to Great Britain in 1763, which made the island a colony in 1805. In 1980, two years after independence, Dominica's fortunes improved when a corrupt and tyrannical administration was replaced by that of Mary Eugenia CHARLES, the first female prime minister in the Caribbean, who remained in office for 15 years.

Dominican Republic:

A legacy of unsettled, mostly non-representative, rule for much of the 20th century was brought to

an end in 1996 when free and open elections ushered in a new government.

Ecuador:

The "Republic of the Equator" was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Colombia and Venezuela). Between 1904 and 1942, Ecuador lost territories in a series of conflicts with its neighbors. A border war with Peru that flared in 1995 was resolved in 1999.

Egypt:

Nominally independent from the UK in 1922, Egypt acquired full sovereignty following World War II. The completion of the Aswan High Dam in 1971 and the resultant Lake Nasser have altered the time-honored place of the Nile river in the agriculture and ecology of Egypt. A rapidly growing population (the largest in the Arab world), limited arable land, and dependence on the Nile all continue to overtax resources and stress society. The government has struggled to ready the economy for the new millennium through economic reform and massive investment in communications and physical infrastructure.

El Salvador:

El Salvador achieved independence from Spain in 1821 and from the Central American Federation in 1839. A 12-year civil war, which cost the lives of some 75,000 people, was brought to a close in 1992 when the government and leftist rebels signed a treaty that provided for military and political reforms.

Equatorial Guinea:

Composed of a mainland portion and five inhabited islands, Equatorial Guinea has been ruled by ruthless leaders who

have badly mismanaged the economy since independence from 190 years of Spanish rule in 1968. Although nominally a constitutional democracy since 1991, the 1996 presidential and 1999 legislative elections were widely seen as being flawed.

Eritrea:

Eritrea was awarded to Ethiopia in 1952 as part of a federation. Ethiopia's annexation of Eritrea as a province 10 years later sparked a 30-year struggle for independence that ended in 1991 with Eritrean rebels defeating governmental forces; independence was overwhelmingly approved in a 1993 referendum. A two and a half year border war with Ethiopia that erupted in 1998 ended under UN auspices on 12 December 2000.

Estonia:

After centuries of Swedish and Russian rule, Estonia attained independence in 1918. Forcibly incorporated into the USSR in 1940, it regained its freedom in 1991 with the collapse of the Soviet Union. Since the last Russian troops left in 1994, Estonia has been free to promote economic and political ties with Western Europe.

Ethiopia:

Unique among African countries, the ancient Ethiopian monarchy maintained its freedom from colonial rule, one exception being the Italian occupation of 1936-41. In 1974 a military junta, the Derg, deposed Emperor Haile SELASSIE (who had ruled since 1930) and established a socialist state. Torn by bloody coups, uprisings, wide-scale drought, and massive refugee problems, the regime was finally toppled by a coalition of rebel forces, the Ethiopian People's Revolutionary Democratic Front (EPRDF), in 1991. A

constitution was adopted in 1994 and Ethiopia's first multiparty elections were held in 1995. A two and a half year border war with Eritrea that ended with a peace treaty on 12 December 2000 has strengthened the ruling coalition, but has hurt the nation's economy.

Europa Island:

A French possession since 1897, the island is heavily wooded; it is the site of a small military garrison that staffs a weather station.

Falkland Islands (Islas Malvinas):

Although first sighted by an English navigator in 1592, the first landing (English) did not occur until almost a century later in 1690, and the first settlement (French) was not established until 1764. The colony was turned over to Spain two years later and the islands have since been the subject of a territorial dispute, first between Britain and Spain, then between Britain and Argentina. The UK asserted its claim to the islands by establishing a naval garrison there in 1833. Argentina invaded the islands on 2 April 1982. The British responded with an expeditionary force that landed seven weeks later and after fierce fighting forced Argentine surrender on 14 June 1982.

Faroe Islands:

The population of the Faroe Islands is largely descended from Viking settlers who arrived in the 9th century. The islands have been connected politically to Denmark since the 14th century. A high degree of self-government was attained in 1948.

Fiji:

Fiji became independent in 1970, after nearly a century as a British colony. Democratic rule was interrupted by two military

coups in 1987, caused by concern over a government perceived as dominated by the Indian community (descendants of contract laborers brought to the islands by the British in the 19th century). A 1990 constitution favored native Melanesian control of Fiji, but led to heavy Indian emigration; the population loss resulted in economic difficulties, but ensured that Melanesians became the majority. Amendments enacted in 1997 made the constitution more equitable. Free and peaceful elections in 1999 resulted in a government led by an Indo-Fijian, but a coup in May of 2000 ushered in a prolonged period of political turmoil. New elections are scheduled for August 2001.

Finland:

Ruled by Sweden from the 12th to the 19th centuries and by Russia from 1809, Finland finally won its independence in 1917. During World War II, it was able to successfully defend its freedom and fend off invasions by the Soviet Union and Germany. In the subsequent half century, the Finns have made a remarkable transformation from a farm/forest economy to a diversified modern industrial economy; per capita income is now on par with Western Europe. As a member of the European Union, Finland was the only Nordic state to join the euro system at its initiation in January 1999.

France:

Although ultimately a victor in World Wars I and II, France suffered extensive losses in its empire, wealth, manpower, and rank as a dominant nation-state. Nevertheless, France today is one of the most modern countries in the world and is a leader among European nations. Since 1958, it has constructed a presidential democracy resistant to the instabilities experienced in earlier parliamentary democracies. In recent years, its reconciliation and cooperation with Germany have proved central to the economic integration of Europe, including the advent of the euro in January 1999. Presently, France is at the forefront of European states seeking to exploit the momentum of monetary union to advance the creation of a more unified and capable European defense and security apparatus.

French Guiana:

First settled by the French in 1604, French Guiana was the site of notorious penal settlements until 1951. The European Space Agency launches its communication satellites from Kourou.

French Polynesia:

The French annexed various Polynesian island groups during the 19th century. In September 1995, France stirred up widespread protests by resuming nuclear testing on the Mururoa atoll after a three-year moratorium. The tests were suspended in January 1996.

French Southern and Antarctic Lands:

The Southern Lands consist of two archipelagos, Iles Crozet and Iles Kerguelen, and two volcanic islands, Ile Amsterdam and Ile Saint-Paul. They contain no permanent inhabitants and are visited only by researchers studying the native

fauna. The Antarctic portion consists of "Adelie Land," a thin slice of the Antarctic continent discovered and claimed by the French in 1840.

Gabon:

Ruled by autocratic presidents since independence from France in 1960, Gabon introduced a multiparty system and a new constitution in the early 1990s that allowed for a more transparent electoral process and for reforms of governmental institutions. A small population, abundant natural resources, and foreign private investment have helped make Gabon one of the more prosperous black African countries.

Gambia, The:

The Gambia gained its independence from the UK in 1965; it formed a short-lived federation of Senegambia with Senegal between 1982 and 1989. In 1991 the two nations signed a friendship and cooperation treaty. A military coup in 1994 overthrew the president and banned political activity, but a new 1996 constitution and presidential elections, followed by parliamentary balloting in 1997, have completed a nominal return to civilian rule.

Gaza Strip:

The Israel-PLO Declaration of Principles on Interim Self-Government Arrangements (the DOP), signed in Washington on 13 September 1993, provided for a transitional period not exceeding five years of Palestinian interim self-government in the Gaza Strip and the West Bank. Under the DOP, Israel agreed to transfer certain powers and responsibilities to the Palestinian Authority, which includes the Palestinian Legislative Council elected in January 1996, as part of the interim self-governing arrangements in the West

Bank and Gaza Strip. A transfer of powers and responsibilities for the Gaza Strip and Jericho took place pursuant to the Israel-PLO 4 May 1994 Cairo Agreement on the Gaza Strip and the Jericho Area and in additional areas of the West Bank pursuant to the Israel-PLO 28 September 1995 Interim Agreement, the Israel-PLO 15 January 1997 Protocol Concerning Redeployment in Hebron, the Israel-PLO 23 October 1998 Wye River Memorandum, and the 4 September 1999 Sharm el-Sheikh Agreement. The DOP provides that Israel will retain responsibility during the transitional period for external security and for internal security and public order of settlements and Israeli citizens. Permanent status is to be determined through direct negotiations, which resumed in September 1999 after a three-year hiatus. An intifadah broke out in September 2000; the resulting widespread violence in the West Bank and Gaza Strip, Israel's military response, and instability in the Palestinian Authority are undermining progress toward a permanent settlement.

Georgia:

Georgia was absorbed into the Russian Empire in the 19th century. Independent for three years (1918-1921) following the Russian revolution, it was forcibly incorporated into the USSR until the Soviet Union dissolved in 1991. Russian troops remain garrisoned at four military bases and as peacekeepers in the separatist regions of Abkhazia and South Ossetia (but are scheduled to withdraw from two of the bases by July 2001). Despite a badly degraded transportation network - brought on by ethnic conflict, criminal activities, and fuel shortages - the country continues to move toward a market economy and greater integration with Western institutions.

Germany:

As Western Europe's richest and most populous nation, Germany remains a key member of the continent's economic, political, and defense organizations. European power struggles immersed the country in two devastating World Wars in the first half of the 20th century and left the country occupied by the victorious Allied powers of the US, UK, France, and the Soviet Union in 1945. With the advent of the Cold War, two German states were formed in 1949: the western Federal Republic of Germany (FRG) and the eastern German Democratic Republic (GDR). The democratic FRG embedded itself in key Western economic and security organizations, the EC and NATO, while the communist GDR was on the front line of the Soviet-led Warsaw Pact. The decline of the USSR and the end of the Cold War allowed for German unification in 1990. Since then Germany has expended considerable funds to bring eastern productivity and wages up to western standards. In January 1999, Germany and 10 other EU countries formed a common European currency, the euro.

Ghana:

Formed from the merger of the British colony of the Gold Coast and the Togoland trust territory, Ghana in 1957 became the first country in colonial Africa to gain its independence. A long series of coups resulted in the suspension of the constitution in 1981 and the banning of political parties. A new constitution, restoring multiparty politics, was approved in 1992. Lt. Jerry RAWLINGS, head of state since 1981, won presidential elections in 1992 and 1996, but was constitutionally prevented from running for a third term in 2000. He was succeeded by John KUFUOR.

Gibraltar:

Strategically important, Gibraltar was ceded to Great

Britain by Spain in the 1713 Treaty of Utrecht; the British garrison was formally declared a colony in 1830. In a 1967 referendum, Gibraltarians ignored Spanish pressure and voted overwhelmingly to remain a British dependency.

Glorioso Islands:

A French possession since 1892, the Glorioso Islands are composed of two lushly vegetated islands (Ile Glorieuse and Ile du Lys) and three rock islets. A military garrison operates a weather and radio station on Ile Glorieuse.

Greece:

Greece achieved its independence from the Ottoman Empire in 1829. During the second half of the 19th century and the first half of the 20th century, it gradually added neighboring islands and territories with Greek-speaking populations. Following the defeat of communist rebels in 1949, Greece joined NATO in 1952. A military dictatorship, which in 1967 suspended many political liberties and forced the king to flee the country, lasted seven years. Democratic elections in 1974 and a referendum created a parliamentary republic and abolished the monarchy; Greece joined the European Community or EC in 1981 (which became the EU in 1992).

Greenland:

The world's largest island, about 84% ice-capped, Greenland was granted self-government in 1978 by the Danish parliament. The law went into effect the following year. Denmark continues to exercise control of Greenland's foreign affairs.

Grenada:

One of the smallest independent countries in the western hemisphere, Grenada was seized by a Marxist military council on 19

October 1983. Six days later the island was invaded by US forces and those of six other Caribbean nations, which quickly captured the ringleaders and their hundreds of Cuban advisers. Free elections were reinstituted the following year.

Guadeloupe:

Guadeloupe has been a French possession since 1635. The island of Saint-Martin is divided with the Netherlands (whose southern portion is named Sint Maarten and is part of the Netherlands Antilles).

Guam:

Guam was ceded to the US by Spain in 1898. Captured by the Japanese in 1941, it was retaken by the US three years later. The military installation on the island is one of the most strategically important US bases in the Pacific.

Guatemala:

Guatemala was freed of Spanish colonial rule in 1821. During the second half of the 20th century, it experienced a variety of military and civilian governments as well as a 36-year guerrilla war. In 1996, the government signed a peace agreement formally ending the conflict, which had led to the death of more than 100,000 people and had created some 1 million refugees.

Guernsey:

The island of Guernsey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy, which held sway in both France and England. The islands were the only British soil occupied by German troops in World War II.

Guinea:

Independent from France since 1958, Guinea did not hold democratic elections until 1993 when Gen. Lansana CONTE (head of the military government) was elected president of the civilian government. He was reelected in 1998. Unrest in Sierra Leone has spilled over into Guinea, threatening stability and creating a humanitarian emergency.

Guinea-Bissau:

In 1994, 20 years after independence from Portugal, the country's first multiparty legislative and presidential elections were held. An army uprising that triggered a bloody civil war in 1998, created hundreds of thousands of displaced persons. The president was ousted by a military junta in May 1999. An interim government turned over power in February 2000 when opposition leader Koumba YALLA took office following two rounds of transparent presidential elections. Guinea-Bissau's transition back to democracy will be complicated by a crippled economy devastated by civil war and the military's predilection for governmental meddling.

Guyana:

Guyana achieved independence from the UK in 1966 and became a republic in 1970. In 1989 Guyana launched an Economic Recovery Program, which marked a dramatic reversal from a state-controlled, socialist economy towards a more open, free market system. Results through the first decade have proven encouraging.

Haiti:

One of the poorest countries in the Western Hemisphere, Haiti has been plagued by political violence for most of its history. Over three decades of dictatorship followed by military rule ended in

1990 when Jean-Bertrand ARISTIDE was elected president. Most of his term was usurped by a military takeover, but he was able to return to office in 1994 and oversee the installation of a close associate to the presidency in 1996. ARISTIDE won a second term as president in 2000, and took office early the following year.

Heard Island and McDonald Islands:

These uninhabited, barren islands were transferred from the UK to Australia in 1947. Populated by large numbers of seal and bird species, the islands have been designated a nature preserve.

Holy See (Vatican City):

Popes in their secular role ruled much of the Italian peninsula for more than a thousand years until the mid 19th century, when many of the Papal States were seized by the newly united Kingdom of Italy. In 1870, the pope's holdings were further circumscribed when Rome itself was annexed. Disputes between a series of "prisoner" popes and Italy were resolved in 1929 by three Lateran Treaties, which established the independent state of Vatican City and granted Roman Catholicism special status in Italy. In 1984, a concordat between the Vatican and Italy modified certain of the earlier treaty provisions, including the primacy of Roman Catholicism as the Italian state religion. Present concerns of the Holy See include the failing health of Pope John Paul II, interreligious dialogue and reconciliation, and the adjustment of church doctrine in an era of rapid change and globalization. About 1 billion people worldwide profess the Catholic faith.

Honduras:

Part of Spain's vast empire in the New World, Honduras

became an independent nation in 1821. After two and one-half decades of mostly military rule, a freely elected civilian government came to power in 1982. During the 1980s, Honduras proved a haven for anti-Sandinista contras fighting the Marxist Nicaraguan Government and an ally to Salvadoran Government forces fighting against leftist guerrillas.

Hong Kong:

Occupied by the UK in 1841, Hong Kong was formally ceded by China the following year; various adjacent lands were added later in the 19th century. Pursuant to an agreement signed by China and the UK on 19 December 1984, Hong Kong became the Hong Kong Special

Administrative Region (SAR) of China on 1 July 1997. In this agreement, China has promised that, under its "one country, two systems" formula, China's socialist economic system will not be practiced in Hong Kong and that Hong Kong will enjoy a high degree of autonomy in all matters except foreign and defense affairs for the next 50 years.

Howland Island:

Discovered by the US early in the 19th century, the island was officially claimed by the US in 1857. Both US and British companies mined for guano until about 1890. Earhart Light is a day beacon near the middle of the west coast that was partially destroyed during World War II, but has since been rebuilt; it is named in memory of famed aviatrix Amelia EARHART. The island is administered by the US Department of the Interior as a National Wildlife Refuge.

Hungary:

Hungary was part of the polyglot Austro-Hungarian Empire, which collapsed during World War I. The country fell under communist rule following World War II. In 1956, a revolt and announced withdrawal from the Warsaw Pact were met with a massive military intervention by Moscow. In the more open GORBACHEV years, Hungary led the movement to dissolve the Warsaw Pact and steadily shifted toward multiparty democracy and a market-oriented economy. Following the collapse of the USSR in 1991, Hungary developed close political and economic ties to Western Europe. It joined NATO in 1999 and is a frontrunner in a future expansion of the EU.

Iceland:

Settled by Norwegian and Celtic (Scottish and Irish) immigrants during the late 9th and 10th centuries A.D., Iceland boasts the world's oldest functioning legislative assembly, the Althing, established in 930. Independent for over 300 years, Iceland was subsequently ruled by Norway and Denmark. Fallout from the Askja volcano of 1875 devastated the Icelandic economy and caused widespread famine. Over the next quarter century, 20% of the island's population emigrated, mostly to Canada and the US. Limited home rule from Denmark was granted in 1874 and complete independence attained in 1944. Literacy, longevity, income, and social cohesion are first-rate by world standards.

India:

The Indus Valley civilization, one of the oldest in the world, goes back at least 5,000 years. Aryan tribes from the northwest invaded about 1500 B.C.; their merger with the earlier inhabitants created classical Indian culture. Arab incursions starting in the 8th century and Turkish in 12th were followed by

European traders beginning in the late 15th century. By the 19th century, Britain had assumed political control of virtually all Indian lands. Nonviolent resistance to British colonialism under Mohandas GANDHI and Jawaharlal NEHRU led to independence in 1947.

The subcontinent was divided into the secular state of India and the smaller Muslim state of Pakistan. A third war between the two countries in 1971 resulted in East Pakistan becoming the separate nation of Bangladesh. Fundamental concerns in India include the ongoing dispute with Pakistan over Kashmir, massive overpopulation, environmental degradation, extensive poverty, and ethnic strife, all this despite impressive gains in economic investment and output.

Indian Ocean:

The Indian Ocean is the third-largest of the world's five oceans (after the Pacific Ocean and Atlantic Ocean, but larger than the Southern Ocean and Arctic Ocean). Four critically important access waterways are the Suez Canal (Egypt), Bab el Mandeb (Djibouti-Yemen), Strait of Hormuz (Iran-Oman), and Strait of Malacca (Indonesia-Malaysia). The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Indian Ocean south of 60 degrees south.

Indonesia:

The world's largest archipelago, Indonesia achieved independence from the Netherlands in 1949. Current issues include: implementing IMF-mandated reforms of the banking sector, effecting a transition to a popularly elected government after four decades of authoritarianism, addressing charges of cronyism and corruption, holding the military accountable for human rights violations, and

resolving growing separatist pressures in Aceh and Irian Jaya. On 30 August 1999 a provincial referendum for independence was overwhelmingly approved by the people of Timor Timur. Concurrence followed by Indonesia's national legislature, and the name East Timor was provisionally adopted. The independent status of East Timor - now under UN administration - has yet to be formally established.

Iran:

Known as Persia until 1935, Iran became an Islamic republic in 1979 after the ruling shah was forced into exile. Conservative clerical forces subsequently crushed westernizing liberal elements. Militant Iranian students seized the US Embassy in Tehran on 4 November 1979 and held it until 20 January 1981. During 1980-88, Iran fought a bloody, indecisive war with Iraq over disputed territory. The key current issue is how rapidly the country should open up to the modernizing influences of the outside world.

Iraq:

Formerly part of the Ottoman Empire, Iraq became an independent kingdom in 1932. A "republic" was proclaimed in 1958, but in actuality a series of military strongmen have ruled the country since then, the latest being SADDAM Husayn. Territorial disputes with Iran led to an inconclusive and costly eight-year war (1980-1988). In August 1990 Iraq seized Kuwait, but was expelled by US-led, UN coalition forces during January-February 1991. The victors did not occupy Iraq, however, thus allowing the regime to stay in control. Following Kuwait's liberation, the UN Security Council (UNSC) required Iraq to scrap all weapons of mass destruction and long-range missiles and to allow UN verification

inspections. UN trade sanctions remain in effect due to incomplete Iraqi compliance with relevant UNSC resolutions.

Ireland:

A failed 1916 Easter Monday Rebellion touched off several years of guerrilla warfare that in 1921 resulted in independence from the UK for the 26 southern counties; the six northern counties (Ulster) remained part of Great Britain. In 1948 Ireland withdrew from the British Commonwealth; it joined the European Community in 1973. Irish governments have sought the peaceful unification of Ireland and have cooperated with Britain against terrorist groups. A peace settlement for Northern Ireland, approved in 1998, was implemented the following year.

Israel:

Following World War II, the British withdrew from their mandate of Palestine, and the UN partitioned the area into Arab and Jewish states, an arrangement rejected by the Arabs. Subsequently, the Israelis defeated the Arabs in a series of wars without ending the deep tensions between the two sides. The territories occupied by Israel since the 1967 war are not included in the Israel country profile, unless otherwise noted. In keeping with the framework established at the Madrid Conference in October 1991, bilateral negotiations are being conducted between Israel and Palestinian representatives (from the Israeli-occupied West Bank and Gaza Strip) and Israel and Syria, to achieve a permanent settlement. On 25 April 1982, Israel withdrew from the Sinai pursuant to the 1979 Israel-Egypt Peace Treaty. Outstanding territorial and other disputes with Jordan were resolved in the 26 October 1994 Israel-Jordan Treaty of Peace. On 25 May 2000, Israel withdrew unilaterally from southern Lebanon, which it had occupied since 1982.

Italy:

Italy became a nation-state belatedly - in 1861 when the city-states of the peninsula, along with Sardinia and Sicily, were united under King Victor EMMANUEL. An era of parliamentary government came to a close in the early 1920s when Benito MUSSOLINI established a Fascist dictatorship. His disastrous alliance with Nazi Germany led to Italy's defeat in World War II. A democratic republic replaced the monarchy in 1946 and economic revival followed. Italy was a charter member of NATO and the European Economic Community (EEC). It has been at the forefront of European economic and political unification, joining the European Monetary Union in 1999. Persistent problems include illegal immigration, the ravages of organized crime, corruption, high unemployment, and the low incomes and technical standards of southern Italy compared with the more prosperous north.

Jamaica:

Jamaica gained full independence within the British Commonwealth in 1962. Deteriorating economic conditions during the 1970s led to recurrent violence and a dropoff in tourism. Elections in 1980 saw the democratic socialists voted out of office. Subsequent governments have been open market oriented. Political violence marred elections during the 1990s.

Jan Mayen:

This desolate, mountainous island was named after a Dutch whaling captain who indisputably discovered it in 1614 (earlier claims are inconclusive). Visited only occasionally by seal hunters and trappers over the following centuries, the island came under Norwegian sovereignty in 1929. The long dormant Beerenberg volcano

resumed activity in 1970; it is the northernmost active volcano on earth.

Japan:

While retaining its time-honored culture, Japan rapidly absorbed Western technology during the late 19th and early 20th centuries. After its devastating defeat in World War II, Japan recovered to become the second most powerful economy in the world and a staunch ally of the US. While the emperor retains his throne as a symbol of national unity, actual power rests in networks of powerful politicians, bureaucrats, and business executives. The economy experienced a major slowdown in the 1990s following three decades of unprecedented growth.

Jarvis Island:

First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858, but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889, but never carried out plans for further exploitation. The US occupied and reclaimed the island in 1935. Abandoned after World War II, the island is currently a National Wildlife Refuge administered by the US Department of the Interior; a day beacon is situated near the middle of the west coast.

Jersey:

The island of Jersey and the other Channel Islands represent the last remnants of the medieval Dukedom of Normandy that held sway in both France and England. These islands were the only British soil occupied by German troops in World War II.

Johnston Atoll:

Both the US and the Kingdom of Hawaii annexed

Johnston Atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. The US Navy took over the atoll in 1934, and subsequently the US Air Force assumed control in 1948. The site was used for high altitude nuclear tests in the 1950s and 1960s, and until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons. Munitions destruction is now complete, and cleanup and closure of the facility is progressing.

Jordan:

For most of its history since independence from British administration in 1946, Jordan was ruled by King HUSSEIN (1953-1999). A pragmatic ruler, he successfully navigated competing pressures from the major powers (US, USSR, and UK), various Arab states, Israel, and a large internal Palestinian population, through several wars and coup attempts. In 1989 he resumed parliamentary elections and gradually permitted political liberalization; in 1994 a formal peace treaty was signed with Israel. King ABDALLAH II - the eldest son of King HUSSEIN and Princess MUNA - assumed the throne following his father's death in February 1999. Since then, he has consolidated his power and established his domestic priorities.

Juan de Nova Island:

Named after a famous 15th century Spanish navigator and explorer, the island has been a French possession since 1897. It has been exploited for its guano and phosphate. Presently a small military garrison oversees a meteorological station.

Kazakhstan:

Native Kazakhs, a mix of Turkic and Mongol nomadic tribes who migrated into the region in the 13th century, were rarely

united as a single nation. The area was conquered by Russia in the 18th century and Kazakhstan became a Soviet Republic in 1936. During the 1950s and 1960s agricultural "Virgin Lands" program, Soviet citizens were encouraged to help cultivate Kazakhstan's northern pastures. This influx of immigrants (mostly Russians, but also some other deported nationalities) skewed the ethnic mixture and enabled non-Kazakhs to outnumber natives. Independence has caused many of these newcomers to emigrate. Current issues include: developing a cohesive national identity; expanding the development of the country's vast energy resources and exporting them to world markets; and continuing to strengthen relations with neighboring states and other foreign powers.

Kenya:

Revered president and liberation struggle icon Jomo KENYATTA led Kenya from independence until his death in 1978, when current President Daniel Toroitich arap MOI took power in a constitutional succession. The country was a de facto one-party state from 1969 until 1982 when the ruling Kenya African National Union (KANU) made itself the sole legal party in Kenya. MOI acceded to internal and external pressure for political liberalization in late 1991. The ethnically fractured opposition failed to dislodge KANU from power in elections in 1992 and 1997, which were marred by violence and fraud, but are viewed as having generally reflected the will of the Kenyan people. The country faces a period of political uncertainty because MOI is constitutionally required to step down at the next elections that have to be held by early 2003.

Kingman Reef:

The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa

flights during the late 1930s. There is no flora on the reef, which is frequently awash, but it does support an abundant and diverse marine fauna. In 2001, the waters surrounding the reef were designated a National Wildlife Refuge.

Kiribati:

The Gilbert Islands were granted self-rule by the UK in 1971 and complete independence in 1979 under the new name of Kiribati. The US relinquished all claims to the sparsely inhabited Phoenix and Line Island groups in a 1979 treaty of friendship with Kiribati.

Korea, North:

Following World War II, Korea was split into a northern, communist half and a southern, Western-oriented half. KIM Chong-il has ruled North Korea since his father and the country's founder, president KIM Il-song, died in 1994. After decades of mismanagement, the North relies heavily on international food aid to feed its population, while continuing to expend resources to maintain an army of about 1 million. North Korea's long-range missile development and research into nuclear and chemical weapons are of major concern to the international community.

Korea, South:

After World War II, a republic was set up in the southern half of the Korean Peninsula while a communist-style government was installed in the north. The Korean War (1950-53) had US and other UN forces intervene to defend South Korea from North Korean attacks supported by the Chinese. An armistice was signed in 1953 splitting the peninsula at the 38th parallel known as the DMZ. Thereafter, South Korea achieved rapid economic growth, with per

capita income rising to 13 times the level of North Korea. In 1997, the nation suffered a severe financial crisis from which it continues to make a solid recovery. South Korea has also maintained its commitment to democratize its political processes. In June 2000, a historic first south-north summit took place between the south's President KIM Dae-jung and the north's leader KIM Chong-il. In December 2000, President KIM Dae-jung won the Noble Peace Prize for his lifelong commitment to democracy and human rights in Asia. He is the first Korean to win a Nobel Prize.

Kuwait:

Kuwait was attacked and overrun by Iraq on 2 August 1990. Following several weeks of aerial bombardment, a US-led UN coalition began a ground assault on 23 February 1991 that completely liberated Kuwait in four days. Kuwait has spent more than \$5 billion to repair oil infrastructure damaged during 1990-91.

Kyrgyzstan:

A Central Asian country of incredible natural beauty and proud nomadic traditions, Kyrgyzstan was annexed by Russia in 1864; it achieved independence from the Soviet Union in 1991. Current concerns include: privatization of state-owned enterprises, expansion of democracy and political freedoms, inter-ethnic relations, and terrorism.

Laos:

In 1975 the communist Pathet Lao took control of the government, ending a six-century-old monarchy. Initial closer ties to Vietnam and socialization were replaced with a gradual return to private enterprise, an easing of foreign investment laws, and the admission into ASEAN in 1997.

Latvia:

After a brief period of independence between the two World Wars, Latvia was annexed by the USSR in 1940. It reestablished its independence in 1991 following the breakup of the Soviet Union. Although the last Russian troops left in 1994, the status of the Russian minority (some 30% of the population) remains of concern to Moscow. Latvia continues to revamp its economy for eventual integration into various Western European political and economic institutions.

Lebanon:

Lebanon has made progress toward rebuilding its political institutions and regaining its national sovereignty since 1991 and the end of the devastating 16-year civil war. Under the Ta'if Accord - the blueprint for national reconciliation - the Lebanese have established a more equitable political system, particularly by giving Muslims a greater say in the political process while institutionalizing sectarian divisions in the government. Since the end of the war, the Lebanese have conducted several successful elections, most of the militias have been weakened or disbanded, and the Lebanese Armed Forces (LAF) have extended central government authority over about two-thirds of the country. Hizballah, the radical Shi'a party, retains its weapons. Syria maintains about 25,000 troops in Lebanon based mainly in Beirut, North Lebanon, and the Bekaa Valley. Syria's troop deployment was legitimized by the Arab League during Lebanon's civil war and in the Ta'if Accord. Damascus justifies its continued military presence in Lebanon by citing the continued weakness of the LAF, Beirut's requests, and the failure of the Lebanese Government to implement all of the constitutional reforms in the Ta'if Accord. Israel's withdrawal from its security zone in southern Lebanon in May of 2000, however, has

emboldened some Lebanese Christians and Druze to demand that Syria withdraw its forces as well.

Lesotho:

Basutoland was renamed the Kingdom of Lesotho upon independence from the UK in 1966. Constitutional government was restored in 1993 after 23 years of military rule.

Liberia:

Seven years of civil strife were brought to a close in 1996 when free and open presidential and legislative elections were held. President TAYLOR now holds strong executive power with no real political opposition. The years of fighting coupled with the flight of most businesses have disrupted formal economic activity. A still unsettled domestic security situation has slowed the process of rebuilding the social and economic structure of this war-torn country.

Libya:

Since he took power in a 1969 military coup, Col. Muammar Abu Minyar al-QADHAFI has espoused his own political system - a combination of socialism and Islam - which he calls the Third International Theory. Viewing himself as a revolutionary leader, he used oil funds during the 1970s and 1980s to promote his ideology outside Libya, even supporting subversives and terrorists abroad to hasten the end of Marxism and capitalism. Libyan military adventures failed, e.g., the prolonged foray of Libyan troops into the Aozou Strip in northern Chad was finally repulsed in 1987. Libyan support for terrorism decreased after UN sanctions were imposed in 1992. Those sanctions were suspended in April 1999.

Liechtenstein:

The Principality of Liechtenstein was established within the Holy Roman Empire in 1719; it became a sovereign state in 1806. Until the end of World War I, it was closely tied to Austria, but the economic devastation caused by that conflict forced Liechtenstein to conclude a customs and monetary union with Switzerland. Since World War II (in which Liechtenstein remained neutral) the country's low taxes have spurred outstanding economic growth. However, shortcomings in banking regulatory oversight have resulted in concerns about the use of the financial institutions for money laundering.

Lithuania:

Independent between the two World Wars, Lithuania was annexed by the USSR in 1940. On 11 March 1990, Lithuania became the first of the Soviet republics to declare its independence, but this proclamation was not generally recognized until September of 1991 (following the abortive coup in Moscow). The last Russian troops withdrew in 1993. Lithuania subsequently has restructured its economy for eventual integration into Western European institutions.

Luxembourg:

Founded in 963, Luxembourg became a grand duchy in 1815 and an independent state under the Netherlands. It lost more than half of its territory to Belgium in 1839, but gained a larger measure of autonomy. Full independence was attained in 1867. Overrun by Germany in both World Wars, it ended its neutrality in 1948 when it entered into the Benelux Customs Union and when it joined NATO the following year. In 1957, Luxembourg became one of the six founding countries of the European Economic Community (later the European Union) and in 1999 it joined the euro currency area.

Macau:

Colonized by the Portuguese in the 16th century, Macau was the first European settlement in the Far East. Pursuant to an agreement signed by China and Portugal on 13 April 1987, Macau became the Macau Special Administrative Region (SAR) of China on 20 December 1999. China has promised that, under its "one country, two systems" formula, China's socialist economic system will not be practiced in Macau and that Macau will enjoy a high degree of autonomy in all matters except foreign and defense affairs.

Macedonia, The Former Yugoslav Republic of:

International

recognition of The Former Yugoslav Republic of Macedonia's (FYROM) independence from Yugoslavia in 1991 was delayed by Greece's objection to the new state's use of what it considered a Hellenic name and symbols. Greece finally lifted its trade blockade in 1995, and the two countries agreed to normalize relations, despite continued disagreement over FYROM's use of "Macedonia." FYROM's large Albanian minority and the de facto independence of neighboring Kosovo continue to be sources of ethnic tension.

Madagascar:

Formerly an independent kingdom, Madagascar became a French colony in 1886, but regained its independence in 1960. During 1992-93, free presidential and National Assembly elections were held, ending 17 years of single-party rule. In 1997 in the second presidential race, Didier RATSIRAKA, the leader during the 1970s and 1980s, was returned to the presidency.

Malawi:

Established in 1891, the British protectorate of Nyasaland

became the independent nation of Malawi in 1964. After three decades of one-party rule, the country held multiparty elections in 1994 under a provisional constitution, which took full effect the following year. National multiparty elections were held again in 1999.

Malaysia:

Malaysia was created in 1963 through the merging of Malaya (independent in 1957) and the former British Singapore, both of which formed West Malaysia, and Sabah and Sarawak in north Borneo, which composed East Malaysia. The first three years of independence were marred by hostilities with Indonesia. Singapore separated from the union in 1965.

Maldives:

The Maldives were long a sultanate, first under Dutch and then under British protection. They became a republic in 1968, three years after independence. Tourism and fishing are being developed on the archipelago.

Mali:

The Sudanese Republic and Senegal became independent of France in 1960 as the Mali Federation. When Senegal withdrew after only a few months, the Sudanese Republic was renamed Mali. Rule by dictatorship was brought to a close in 1991 with a transitional government, and in 1992 when Mali's first democratic presidential election was held. Since his reelection in 1997, President KONARE has continued to push through political and economic reforms and to fight corruption. In 1999 he indicated he would not run for a third term.

Malta:

Great Britain formally acquired possession of Malta in 1814.

The island staunchly supported the UK through both World Wars and remained in the Commonwealth when it became independent in 1964. A decade later Malta became a republic. Over the last 15 years, the island has become a major freight transshipment point, financial center, and tourist destination. It is an official candidate for EU membership.

Man, Isle of:

Part of the Norwegian Kingdom of the Hebrides until the 13th century when it was ceded to Scotland, the isle came under the British crown in 1765. Current concerns include reviving the almost extinct Manx Celtic language.

Marshall Islands:

After almost four decades under US administration as the easternmost part of the UN Trust Territory of the Pacific Islands, the Marshall Islands attained independence in 1986 under a Compact of Free Association. Compensation claims continue as a result of US nuclear testing on some of the islands between 1947 and 1962.

Martinique:

Colonized by France in 1635, the island has subsequently remained a French possession except for three brief periods of foreign occupation.

Mauritania:

Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976, but relinquished it after three years of raids by the

Polisario guerrilla front seeking independence for the territory. Opposition parties were legalized and a new constitution approved in 1991. Two multiparty presidential elections since then were widely seen as being flawed; Mauritania remains, in reality, a one-party state. The country continues to experience ethnic tensions between its black minority population and the dominant Maur (Arab-Berber) populace.

Mauritius:

Discovered by the Portuguese in 1505, Mauritius was subsequently held by the Dutch, French, and British before independence was attained in 1968. A stable democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has earned one of Africa's highest per capita incomes. Recent poor weather and declining sugar prices have slowed economic growth leading to some protests over standards of living in the Creole community.

Mayotte:

Mayotte was ceded to France along with the other Comoros in 1843. It was the only island in the archipelago that voted in 1974 to retain its link with France and forgo independence.

Mexico:

The site of advanced Amerindian civilizations, Mexico came under Spanish rule for three centuries before achieving independence early in the 19th century. A devaluation of the peso in late 1994 threw Mexico into economic turmoil, triggering the worst recession in over half a century. The nation continues to make an impressive recovery. Ongoing economic and social concerns include low real wages, underemployment for a large segment of the population,

inequitable income distribution, and few advancement opportunities for the largely Amerindian population in the impoverished southern states.

Micronesia, Federated States of:

In 1979 the Federated States of

Micronesia, a UN Trust Territory under US administration, adopted a constitution. In 1986 independence was attained under a Compact of Free Association with the United States. Present concerns include large-scale unemployment, overfishing, and overdependence on US aid.

Midway Islands:

The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for trans-Pacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a wildlife refuge open to the public.

Moldova:

Formerly ruled by Romania, Moldova became part of the Soviet Union at the close of World War II. Although independent from the USSR since 1991, Russian forces have remained on Moldovan territory east of the Nistru (Dnister) River supporting the Slavic majority population, mostly Ukrainians and Russians, who have proclaimed a "Transnistria" republic. One of the poorest nations in Europe and plagued by a moribund economy, in 2001 Moldova became the first former Soviet state to elect a communist as its president.

Monaco:

Economic development was spurred in the late 19th century with a railroad linkup to France and the opening of a casino. Since then, the principality's mild climate, splendid scenery, and gambling facilities have made Monaco world famous as a tourist and recreation center.

Mongolia:

Long a province of China, Mongolia won its independence in 1921 with Soviet backing. A communist regime was installed in 1924. During the early 1990s, the ex-communist Mongolian People's Revolutionary Party (MPRP) gradually yielded its monopoly on power. In 1996, the Democratic Union Coalition (DUC) defeated the MPRP in a national election. Over the next four years the Coalition implemented a number of key reforms to modernize the economy and institutionalize democratic reforms. However, the former communists were a strong opposition that stalled additional reforms and made implementation difficult. In 2000, the MPRP won 72 of the 76 seats in Parliament and completely reshuffled the government. While it continues many of the reform policies, the MPRP is focusing on social welfare and public order priorities.

Montserrat:

Much of this island has been devastated and two-thirds of the population has fled abroad due to the eruption of the Soufriere Hills volcano that began on 18 July 1995.

Morocco:

Morocco's long struggle for independence from France ended in 1956. The internationalized city of Tangier was turned over to the new country that same year. Morocco virtually annexed Western

Sahara during the late 1970s, but final resolution on the status of the territory remains unresolved. Gradual political reforms in the 1990s resulted in the establishment of a bicameral legislature in 1997.

Mozambique:

Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration by whites, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development. The ruling party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement with rebel forces ended the fighting in 1992.

Namibia:

South Africa occupied the German colony of Sud-West Afrika during World War I and administered it as a mandate until after World War II when it annexed the territory. In 1966 the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that was soon named Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Independence came in 1990.

Nauru:

Nauru's phosphate deposits began to be mined early in the 20th century by a German-British consortium; the island was occupied by Australian forces in World War I. Upon achieving independence in 1968, Nauru became the smallest independent republic in the world; it joined the UN in 1999.

Navassa Island:

This uninhabited island was claimed by the US in 1857 for its guano, and mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the Coast Guard to the Department of the Interior. A 1998 scientific expedition to the island described it as a unique preserve of Caribbean biodiversity; the following year it became a National Wildlife Refuge.

Nepal:

In 1951, the Nepalese monarch ended the century-old system of rule by hereditary premiers and instituted a cabinet system of government. Reforms in 1990 established a multiparty democracy within the framework of a constitutional monarchy. The refugee issue of some 100,000 Bhutanese in Nepal remains unresolved; 90% of these displaced persons are housed in seven United Nations Offices of the High Commissioner for Refugees (UNHCR) camps.

Netherlands:

The Kingdom of the Netherlands was formed in 1815. In 1830 Belgium seceded and formed a separate kingdom. The Netherlands remained neutral in World War I but suffered a brutal invasion and occupation by Germany in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EC, and participated in the introduction of the euro in 1999.

Netherlands Antilles:

Once the center of the Caribbean slave trade, the island of Curacao was hard hit by the abolition of slavery in 1863. Its prosperity (and that of neighboring Aruba) was restored in

the early 20th century with the construction of oil refineries to service the newly discovered Venezuelan oil fields. The island of Sint Maarten is shared with France; its northern portion is named Saint Martin and is part of Guadeloupe.

New Caledonia:

Settled by both Britain and France during the first half of the 19th century, the island was made a French possession in 1853. It served as a penal colony for four decades after 1864. Agitation for independence during the 1980s and early 1990s seems to have dissipated.

New Zealand:

The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both World Wars. New Zealand withdrew from a number of defense alliances during the 1970s and 1980s. In recent years the government has sought to address longstanding native Maori grievances.

Nicaragua:

Settled as a colony of Spain in the 1520s, Nicaragua gained its independence in 1821. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979. Nicaraguan aid to leftist rebels in El Salvador caused the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. Free elections in 1990 and again in 1996 saw the Sandinistas defeated. The country has slowly rebuilt its economy during the 1990s, but was hard hit by Hurricane Mitch in 1998.

Niger:

Not until 1993, 33 years after independence from France, did Niger hold its first free and open elections. A 1995 peace accord ended a five-year Tuareg insurgency in the north. Coups in 1996 and 1999 were followed by the creation of a National Reconciliation Council that effected a transition to civilian rule in December 1999.

Nigeria:

Following nearly 16 years of military rule, a new constitution was adopted in 1999 and a peaceful transition to civilian government completed. The new president faces the daunting task of rebuilding a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement, and institutionalizing democracy. In addition, the OBASANJO administration must defuse longstanding ethnic and religious tensions, if it is to build a sound foundation for economic growth and political stability.

Niue:

Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the rest of the Cook Islands, have caused it to be separately administered. The population of the island continues to drop (from a peak of 5,200 in 1966 to 2,100 in 2000) with substantial emigration to New Zealand.

Norfolk Island:

Two British attempts at establishing the island as a penal colony (1788-1814 and 1825-55) were ultimately abandoned. In 1856, the island was resettled by Pitcairn Islanders, descendants of the Bounty mutineers and their Tahitian companions.

Northern Mariana Islands:

Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the 1970s not to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the US was approved in 1975. A new government and constitution went into effect in 1978.

Norway:

Despite its neutrality, Norway was not able to avoid occupation by Germany in World War II. In 1949, neutrality was abandoned and Norway became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. The current focus is on containing spending on the extensive welfare system and planning for the time when petroleum reserves are depleted. In referenda held in 1972 and 1994, Norway rejected joining the EU.

Oman:

In 1970, QABOOS bin Said Al Said ousted his father and has ruled as sultan ever since. His extensive modernization program has opened the country to the outside world and has preserved a long-standing political and military relationship with the UK. Oman's moderate, independent foreign policy has sought to maintain good relations with all Middle Eastern countries.

Pacific Ocean:

The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean). Strategically important access waterways

include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Pacific Ocean south of 60 degrees south.

Pakistan:

The separation in 1947 of British India into the Muslim state of Pakistan (with two sections West and East) and largely Hindu India was never satisfactorily resolved. A third war between these countries in 1971 resulted in East Pakistan seceding and becoming the separate nation of Bangladesh. A dispute over the state of Kashmir is ongoing. In response to Indian nuclear weapons testing, Pakistan conducted its own tests in 1998.

Palau:

After three decades as part of the UN Trust Territory of the Pacific under US administration, this westernmost cluster of the Caroline Islands opted for independent status in 1978 rather than join the Federated States of Micronesia. A Compact of Free Association with the US was approved in 1986, but not ratified until 1993. It entered into force the following year when the islands gained their independence.

Palmyra Atoll:

The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now privately owned by the Nature Conservancy. This organization is managing the atoll as a nature preserve. The lagoons and surrounding waters within the 12 nautical

mile US territorial seas were transferred to the US Fish and Wildlife service and designated a National Wildlife Refuge in January 2001.

Panama:

With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. On 7 September 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of 1999. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the intervening years. With US help, dictator Manuel NORIEGA was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were turned over to Panama by or on 31 December 1999.

Papua New Guinea:

The eastern half of the island of New Guinea - second largest in the world - was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997, after claiming some 20,000 lives.

Paracel Islands:

This archipelago is surrounded by productive fishing grounds and potentially large oil reserves. In 1932, French Indochina annexed the islands and set up a weather station on

Prattle Island; maintenance was continued by its successor Vietnam. China has occupied the Paracel Islands since 1974, when its troops captured a South Vietnamese garrison occupying the western islands. However, the islands are still claimed by Vietnam and Taiwan.

Paraguay:

In the disastrous War of the Triple Alliance (1865-70), Paraguay lost two-thirds of all adult males and much of its territory. It stagnated economically for the next half century. In the Chaco War of 1932-35, large, economically important areas were won from Bolivia. The 35-year military dictatorship of Alfredo STROESSNER was overthrown in 1989, and, despite a marked increase in political infighting in recent years, relatively free and regular presidential elections have been held since then.

Peru:

After a dozen years of military rule, Peru returned to democratic leadership in 1980. In recent years, bold reform programs and significant progress in curtailing guerrilla activity and drug trafficking have resulted in solid economic growth.

Philippines:

The Philippines were ceded by Spain to the US in 1898 following the Spanish-American War. They attained their independence in 1946 after being occupied by the Japanese in World War II. The 21-year rule of Ferdinand MARCOS ended in 1986 when a widespread popular rebellion forced him into exile. In 1992, the US closed down its last military bases on the islands. The Philippines has had two electoral presidential transitions since Marcos' removal by "people power." In January 2001, the Supreme Court declared Joseph ESTRADA unable to rule in view of mass resignations from his government and

administered the oath of office to Vice President Gloria MACAPAGAL-ARROYO as his constitutional successor. The government continues to struggle with ongoing Muslim insurgencies in the south.

Pitcairn Islands:

Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to about 50 today.

Poland:

Poland gained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite country following the war, but one that was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union "Solidarity" that over time became a political force and by 1990 had swept parliamentary elections and the presidency. A "shock therapy" program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe, boosting hopes for acceptance to the EU. Poland joined the NATO alliance in 1999.

Portugal:

Following its heyday as a world power during the 15th and 16th centuries, Portugal lost much of its wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the Napoleonic Wars, and the independence in 1822 of Brazil as a colony.

A 1910 revolution deposed the monarchy; for most of the next six decades repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year Portugal granted independence to all of its African colonies. Portugal entered the EC in 1985.

Puerto Rico:

Discovered by Columbus in 1493, the island was ceded by Spain to the US in 1898 following the Spanish-American War. A popularly elected governor has served since 1948. In plebiscites held in 1967 and 1993, voters chose to retain commonwealth status.

Qatar:

Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the amir who had ruled the country since 1972. He was overthrown by his son, the current Amir HAMAD bin Khalifa Al Thani, in a bloodless coup in 1995. In 2001, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. Oil and natural gas revenues enable Qatar to have a per capita income not far below the leading industrial countries of Western Europe.

Reunion:

The Portuguese discovered the uninhabited island in 1513. From the 17th to the 19th centuries, French immigration supplemented by influxes of Africans, Chinese, Malays, and Malabar Indians gave the island its ethnic mix. The opening of the Suez Canal in 1869

cost the island its importance as a stopover on the East Indies trade route.

Romania:

Soviet occupation following World War II led to the formation of a communist "peoples republic" in 1947 and the abdication of the king. The decades-long rule of President Nicolae CEAUSESCU became increasingly draconian through the 1980s. He was overthrown and executed in late 1989. Former communists dominated the government until 1996 when they were swept from power. Much economic restructuring remains to be carried out before Romania can achieve its hope of joining the EU.

Russia:

The defeat of the Russian Empire in World War I led to the seizure of power by the communists and the formation of the USSR. The brutal rule of Josef STALIN (1924-53) strengthened Russian dominance of the Soviet Union at a cost of tens of millions of lives. The Soviet economy and society stagnated in the following decades until General Secretary Mikhail GORBACHEV (1985-91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize communism, but his initiatives inadvertently released forces that by December 1991 splintered the USSR into 15 independent republics. Since then, Russia has struggled in its efforts to build a democratic political system and market economy to replace the strict social, political, and economic controls of the communist period.

Rwanda:

In 1959, three years before independence, the majority ethnic group, the Hutus overthrew the ruling Tutsi king. Over the

next several years thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF) and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions culminating in April 1994 in the genocide of roughly 800,000 Tutsis and moderate Hutus. The Tutsi rebels defeated the Hutu regime and ended the killing in July 1994, but approximately 2 million Hutu refugees - many fearing Tutsi retribution - fled to neighboring Burundi, Tanzania, Uganda, and Zaire, now called the Democratic Republic of the Congo (DROC). Since then most of the refugees have returned to Rwanda. Despite substantial international assistance and political reforms - including Rwanda's first local elections in March 1999 - the country continues to struggle to boost investment and agricultural output and to foster reconciliation. A series of massive population displacements, a nagging Hutu extremist insurgency, and Rwandan involvement in two wars over the past four years in the neighboring DROC continue to hinder Rwanda's efforts.

Saint Helena:

Uninhabited when first discovered by the Portuguese in 1502, St. Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile, from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. Ascension Island is the site of a US Air Force auxiliary airfield; Gough Island has a meteorological station.

Saint Kitts and Nevis:

First settled by the British in 1623, the islands became an associated state with full internal autonomy in

1967. The island of Anguilla rebelled and was allowed to secede in 1971. Saint Kitts and Nevis achieved independence in 1983. In 1998, a vote in Nevis on a referendum to separate from Saint Kitts fell short of the two-thirds majority needed.

Saint Lucia:

The island, with its fine natural harbor at Castries, was contested between England and France throughout the 17th and early 18th centuries (changing possession 14 times); it was finally ceded to the UK in 1814. Self-government was granted in 1967 and independence in 1979.

Saint Pierre and Miquelon:

First settled by the French in the early 17th century, the islands represent the sole remaining vestige of France's once vast North American possessions.

Saint Vincent and the Grenadines:

Disputed between France and Great Britain in the 18th century, Saint Vincent was ceded to the latter in 1783. Autonomy was granted in 1969, and independence in 1979.

Samoa:

New Zealand occupied the German protectorate of Western Samoa at the outbreak of World War I in 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the "Western" from its name in 1997.

San Marino:

The third smallest state in Europe (after The Holy See

and Monaco) also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named Marinus in 301 A.D. San Marino's foreign policy is aligned with that of Italy. Social and political trends in the republic also track closely with those of its larger neighbor.

Sao Tome and Principe:

Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century - all grown with plantation slave labor, a form of which lingered into the 20th century. Although independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. The first free elections were held in 1991.

Saudi Arabia:

In 1902 Abdul al-Aziz Ibn SAUD captured Riyadh and set out on a 30-year campaign to unify the Arabian peninsula. In the 1930s, the discovery of oil transformed the country. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. A burgeoning population, aquifer depletion, and an economy largely dependent on petroleum output and prices are all major governmental concerns.

Senegal:

Independent from France in 1960, Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. However, the envisaged integration of the two countries was never carried out, and the union was dissolved in 1989. Despite peace

talks, a southern separatist group sporadically has clashed with government forces since 1982. Senegal has a long history of participating in international peacekeeping.

Seychelles:

A lengthy struggle between France and Great Britain for the islands ended in 1814, when they were ceded to the latter. Independence came in 1976. Socialist rule was brought to a close with a new constitution and free elections in 1993.

Sierra Leone:

Since 1991, civil war between the government and the Revolutionary United Front (RUF) has resulted in tens of thousands of deaths and the displacement of more than 2 million people (well over one-third of the population) many of whom are now refugees in neighboring countries. A peace agreement, signed in July 1999, collapsed in May 2000 after the RUF took over 500 UN peacekeepers hostage. The RUF stepped up attacks on Guinea in December 2000, despite a cease-fire that it signed with the Freetown government one month earlier. As of late 2000, up to 13,000 UN peacekeepers were protecting the capital and key towns in the south. A UK force of 750 was helping to reinforce security and train the Sierra Leone army.

Singapore:

Founded as a British trading colony in 1819, Singapore joined Malaysia in 1963, but withdrew two years later and became independent. It subsequently became one of the world's most prosperous countries, with strong international trading links (its port is one of the world's busiest) and with per capita GDP above that of the leading nations of Western Europe.

Slovakia:

In 1918 the Slovaks joined the closely related Czechs to form Czechoslovakia. Following the chaos of World War II, Czechoslovakia became a communist nation within Soviet-ruled Eastern Europe. Soviet influence collapsed in 1989 and Czechoslovakia once more became free. The Slovaks and the Czechs agreed to separate peacefully on 1 January 1993. Historic, political, and geographic factors have caused Slovakia to experience more difficulty in developing a modern market economy than some of its Central European neighbors.

Slovenia:

In 1918 the Slovenes joined the Serbs and Croats in forming a new nation, renamed Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power of the majority Serbs, the Slovenes succeeded in establishing their independence in 1991. Historical ties to Western Europe, a strong economy, and a stable democracy make Slovenia a leading candidate for future membership in the EU and NATO.

Solomon Islands:

The UK established a protectorate over the Solomon Islands in the 1890s. Some of the bitterest fighting of World War II occurred on these islands. Self-government was achieved in 1976 and independence two years later. Current issues include government deficits, deforestation, and malaria control.

Somalia:

A SIAD BARRE regime was ousted in January 1991; turmoil,

factional fighting, and anarchy followed for nine years. In May of 1991, northern clans declared an independent Republic of Somaliland which now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence, aided by the overwhelming dominance of the ruling clan and economic infrastructure left behind by British, Russian, and American military assistance programs. The regions of Bari and Nugaal comprise a neighboring self-declared Republic of Puntland, which has also made strides towards reconstructing legitimate, representative government. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. A Transitional National Government (TNG) was created in October 2000 in Arta, Djibouti which was attended by a broad representation of Somali clans. The TNG has a three-year mandate to create a permanent national Somali government. The TNG does not recognize Somaliland or Puntland as independent republics but so far has been unable to reunite them with the unstable regions in the south; numerous warlords and factions are still fighting for control of Mogadishu and the other southern regions.

South Africa:

After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Boers resisted British encroachments, but were defeated in the Boer War (1899-1902). The resulting Union of South Africa operated under a policy of apartheid

- the separate development of the races. The 1990s brought an end to apartheid politically and ushered in black majority rule.

South Georgia and the South Sandwich Islands:

The islands lie

approximately 1,000 km east of the Falkland Islands. Grytviken, on South Georgia, was a 19th and early 20th century whaling station.

The famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses a small military garrison. The islands have large bird and seal populations and, recognizing the importance of preserving the marine stocks in adjacent waters, the UK, in 1993, extended the exclusive fishing zone from 12 miles to 200 miles around each island.

Southern Ocean:

A decision by the International Hydrographic

Organization in the spring of 2000 delimited a fifth world ocean - the Southern Ocean - from the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude which coincides with the Antarctic Treaty Limit. The Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean).

Spain:

Spain's powerful world empire of the 16th and 17th centuries

ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World Wars I and II, but suffered through a devastating Civil War (1936-39). In the second half of the 20th century, it has played a catch-up role in the western international community. Continuing concerns are large-scale unemployment and the Basque separatist movement.

Spratly Islands:

Rich fishing grounds and the potential for gas and oil deposits have caused this archipelago to be claimed in its entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. All five parties have occupied certain islands or reefs, and occasional clashes have occurred between Chinese and Vietnamese naval forces

Sri Lanka:

Occupied by the Portuguese in the 16th century and the Dutch in the 17th century, the island was ceded to the British in 1802. As Ceylon it became independent in 1948; its name was changed in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted in violence in the mid-1980s. Tens of thousands have died in an ethnic war that continues to fester.

Sudan:

Military dictatorships promulgating an Islamic government have mostly run the country since independence from the UK in 1956. Over the past two decades, a civil war pitting black Christians and animists in the south against the Arab-Muslims of the north has cost

at least 1.5 million lives in war- and famine-related deaths, as well as the displacement of millions of others.

Suriname:

Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by a military regime that soon declared a socialist republic. It continued to rule through a succession of nominally civilian administrations until 1987, when international pressure finally brought about a democratic election. In 1989, the military overthrew the civilian government, but a democratically elected government returned to power in 1991.

Svalbard:

First discovered by the Norwegians in the 12th century, the islands served as an international whaling base during the 17th and 18th centuries. Norway's sovereignty was recognized in 1920; five years later it officially took over the territory.

Swaziland:

Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted 1968. Student and labor unrest during the 1990s have pressured the monarchy (one of the oldest on the continent) to grudgingly allow political reform and greater democracy.

Sweden:

A military power during the 17th century, Sweden has not participated in any war in almost two centuries. An armed neutrality was preserved in both World Wars. Sweden's long-successful economic formula of a capitalist system interlarded with substantial welfare elements has recently been undermined by high unemployment, rising maintenance costs, and a declining position in world markets.

Indecision over the country's role in the political and economic integration of Europe caused Sweden not to join the EU until 1995, and to forgo the introduction of the euro in 1999.

Switzerland:

Switzerland's independence and neutrality have long been honored by the major European powers and Switzerland was not involved in either of the two World Wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, may be rendering obsolete the country's concern for neutrality.

Syria:

Following the breakup of the Ottoman Empire during World War I, Syria was administered by the French until independence in 1946. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. Since 1976, Syrian troops have been stationed in Lebanon, ostensibly in a peacekeeping capacity. In recent years, Syria and Israel have held occasional peace talks over the return of the Golan Heights.

Tajikistan:

Tajikistan has experienced three changes in government and a five-year civil war since it gained independence in 1991 from the USSR. A peace agreement among rival factions was signed in 1997, and implementation reportedly completed by late 1999. Part of the agreement required the legalization of opposition political parties prior to the 1999 elections, which occurred, but such parties have made little progress in successful participation in government. Random criminal and political violence in the country remains a

complication impairing Tajikistan's ability to engage internationally.

Tanzania:

Shortly after independence, Tanganyika and Zanzibar merged to form the nation of Tanzania in 1964. One-party rule came to an end in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition have led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities.

Thailand:

A unified Thai kingdom was established in the mid-14th century; it was known as Siam until 1939. Thailand is the only southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US ally following the conflict.

Togo:

French Togoland became Togo in 1960. General Gnassingbe EYADEMA, installed as military ruler in 1967, is Africa's longest-serving head of state. Despite the facade of multiparty elections that resulted in EYADEMA's victory in 1993, the government continues to be dominated by the military. In addition, Togo has come under fire from international organizations for human rights abuses and is plagued by political unrest. Most bilateral and multilateral aid to Togo remains frozen.

Tokelau:

Originally settled by Polynesian emigrants from surrounding

island groups, the Tokelau Islands were made a British protectorate in 1889. They were transferred to New Zealand administration in 1925. According to a UN report, these low-lying islands will disappear in the 21st century, if global warming continues to raise sea levels.

Tonga:

The archipelago of "The Friendly Islands" was united into a Polynesian kingdom in 1845. It became a constitutional monarchy in 1875 and a British protectorate in 1900. Tonga acquired its independence in 1970 and became a member of the Commonwealth of Nations. It remains the only monarchy in the Pacific.

Trinidad and Tobago:

The islands came under British control in the 19th century; independence was granted in 1962. The country is one of the most prosperous in the Caribbean thanks largely to petroleum and natural gas production and processing. Tourism, mostly in Tobago, is targeted for expansion and is growing.

Tromelin Island:

First explored by the French in 1776, the island came under the jurisdiction of Reunion in 1814. At present, it serves as a sea turtle sanctuary and is the site of an important meteorological station.

Tunisia:

Following independence from France in 1956, President Habib BOURGUIBA established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In recent years, Tunisia has taken a moderate, non-aligned stance in

its foreign relations. Domestically, it has sought to diffuse rising pressure for a more open political society.

Turkey:

Turkey was created in 1923 from the Turkish remnants of the Ottoman Empire. Soon thereafter the country instituted secular laws to replace traditional religious fiats. In 1945 Turkey joined the UN and in 1952 it became a member of NATO. Turkey occupied the northern portion of Cyprus in 1974 to prevent a Greek takeover of the island; relations between the two countries remain strained. Periodic military offensives against Kurdish separatists have dislocated part of the population in southeast Turkey and have drawn international condemnation.

Turkmenistan:

Annexed by Russia between 1865 and 1885, Turkmenistan became a Soviet republic in 1925. It achieved its independence upon the dissolution of the USSR in 1991. President NIYAZOV retains absolute control over the country and opposition is not tolerated. Extensive hydrocarbon/natural gas reserves could prove a boon to this underdeveloped country if extraction and delivery projects can be worked out.

Turks and Caicos Islands:

The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands are presently a British overseas territory.

Tuvalu:

In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain name ".tv" for \$50 million in royalties over the next dozen years.

Uganda:

Uganda achieved independence from the UK in 1962. The dictatorial regime of Idi AMIN (1971-79) was responsible for the deaths of some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980-85) claimed another 100,000 lives. During the 1990s the government promulgated non-party presidential and legislative elections.

Ukraine:

Richly endowed in natural resources, Ukraine has been fought over and subjugated for centuries; its 20th-century struggle for liberty is not yet complete. A short-lived independence from Russia (1917-1920) was followed by brutal Soviet rule that engineered two artificial famines (1921-22 and 1932-33) in which over 8 million died, and World War II, in which German and Soviet armies were responsible for some 7 million more deaths. Although independence was attained in 1991 with the dissolution of the USSR, true freedom remains elusive as many of the former Soviet elite remain entrenched, stalling efforts at economic reform, privatization, and civic liberties.

United Arab Emirates:

The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states - Abu Zaby, 'Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn - merged to form the UAE. They were joined in 1972 by Ra's al Khaymah. The UAE's per capita GDP is not far below those of the leading West European nations. Its generosity with oil revenues and its moderate foreign policy stance have allowed it to play a vital role in the affairs of the region.

United Kingdom:

Great Britain, the dominant industrial and maritime power of the 19th century, played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two World Wars. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council, a founding member of NATO, and of the Commonwealth, the UK pursues a global approach to foreign policy; it currently is weighing the degree of its integration with continental Europe. A member of the EU, it chose to remain outside of the European Monetary Union for the time being. Constitutional reform is also a significant issue in the UK. Regional assemblies with varying degrees of power opened in Scotland, Wales, and Northern Ireland in 1999.

United States:

The United States became the world's first modern

democracy after its break with Great Britain (1776) and the adoption of a constitution (1789). During the 19th century, many new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65) and the Great Depression of the 1930s. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation-state. The economy is marked by steady growth, low unemployment and inflation, and rapid advances in technology.

Uruguay:

A violent Marxist urban guerrilla movement, the Tupamaros, launched in the late 1960s, led Uruguay's president to agree to military control of his administration in 1973. By the end of the year the rebels had been crushed, but the military continued to expand its hold throughout the government. Civilian rule was not restored until 1985. Uruguay's political and labor conditions are among the freest on the continent.

Uzbekistan:

Russia conquered Uzbekistan in the late 19th century. Stiff resistance to the Red Army after World War I was eventually suppressed and a socialist republic set up in 1925. During the Soviet era, intensive production of "white gold" (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land poisoned and the Aral Sea and certain rivers half dry. Independent since 1991, the country seeks to gradually lessen its dependence on agriculture while developing its mineral and petroleum reserves. Current concerns include insurgency by Islamic militants based in Tajikistan and Afghanistan, a

non-convertible currency, and the curtailment of human rights and democratization.

Vanuatu:

The British and French who settled the New Hebrides in the 19th century, agreed in 1906 to an Anglo-French Condominium, which administered the islands until independence in 1980.

Venezuela:

Venezuela was one of the three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Colombia and Ecuador). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Current concerns include: drug-related conflicts along the Colombian border, increasing internal drug consumption, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

Vietnam:

France occupied all of Vietnam by 1884. Independence was declared after World War II, but the French continued to rule until 1954 when they were defeated by communist forces under Ho Chi MINH, who took control of the north. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later North Vietnamese forces overran the south. Economic reconstruction of the reunited

country has proven difficult as aging Communist Party leaders have only grudgingly initiated reforms necessary for a free market.

Virgin Islands: During the 17th century, the archipelago was divided into two territorial units, one English and the other Danish. Sugarcane, produced by slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish portion, which had been in economic decline since the abolition of slavery in 1848.

Wake Island:

The US annexed Wake Island in 1899 for a cable station.

An important air and naval base was constructed in 1940-41. In December 1941 the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake was developed as a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military and some commercial cargo planes, as well as for emergency landings. There are over 700 landings a year on the island.

Wallis and Futuna:

Although discovered by the Dutch and the British in the 17th and 18th centuries, it was the French who declared a protectorate over the islands in 1842. In 1959, the inhabitants of the islands voted to become a French overseas territory.

West Bank:

The Israel-PLO Declaration of Principles on Interim Self-Government Arrangements (the DOP), signed in Washington on 13 September 1993, provided for a transitional period not exceeding five years of Palestinian interim self-government in the Gaza Strip and the West Bank. Under the DOP, Israel agreed to transfer certain

powers and responsibilities to the Palestinian Authority, which includes the Palestinian Legislative Council elected in January 1996, as part of interim self-governing arrangements in the West Bank and Gaza Strip. A transfer of powers and responsibilities for the Gaza Strip and Jericho took place pursuant to the Israel-PLO 4 May 1994 Cairo Agreement on the Gaza Strip and the Jericho Area and in additional areas of the West Bank pursuant to the Israel-PLO 28 September 1995 Interim Agreement, the Israel-PLO 15 January 1997 Protocol Concerning Redeployment in Hebron, the Israel-PLO 23 October 1998 Wye River Memorandum, and the 4 September 1999 Sharm el-Sheikh Agreement. The DOP provides that Israel will retain responsibility during the transitional period for external security and for internal security and public order of settlements and Israeli citizens. Permanent status is to be determined through direct negotiations, which resumed in September 1999 after a three-year hiatus. An intifadah broke out in September 2000; the resulting widespread violence in the West Bank and Gaza Strip, Israel's military response, and instability in the Palestinian Authority are undermining progress toward a permanent settlement.

Western Sahara:

Morocco virtually annexed the northern two-thirds of Western Sahara (formerly Spanish Sahara) in 1976, and the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Rabat's sovereignty ended in a 1991 cease-fire; a referendum on final status has been repeatedly postponed and is not expected to occur until at least 2002.

World:

Globally, the 20th century was marked by: (a) two devastating

world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about the environment, including loss of forests, shortages of energy and water, the drop in biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820, to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1988, and 6 billion in 2000. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances in medicine) and fears (e.g., development of even more lethal weapons of war).

Yemen:

North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border.

Yugoslavia:

The Kingdom of Serbs, Croats, and Slovenes was formed in

1918; its name was changed to Yugoslavia in 1929. Occupation by Nazi Germany in 1941 was resisted by various partisan bands that fought themselves as well as the invaders. The group headed by Marshal TITO took full control upon German expulsion in 1945. Although communist in name, his new government successfully steered its own path between the Warsaw Pact nations and the West for the next four and a half decades. In the early 1990s, post-TITO Yugoslavia began to unravel along ethnic lines: Slovenia, Croatia, and The Former Yugoslav Republic of Macedonia all declared their independence in 1991; Bosnia and Herzegovina in 1992. The remaining republics of Serbia and Montenegro declared a new "Federal Republic of Yugoslavia" in 1992 and, under President Slobodan MILOSEVIC, Serbia led various military intervention efforts to unite Serbs in neighboring republics into a "Greater Serbia." All of these efforts were ultimately unsuccessful. In 1999, massive expulsions by Serbs of ethnic Albanians living in the autonomous republic of Kosovo provoked an international response, including the NATO bombing of Serbia and the stationing of NATO and Russian peacekeepers in Kosovo. Blatant attempts to manipulate presidential balloting in October of 2000 were followed by massive nationwide demonstrations and strikes that saw the election winner, Vojislav KOSTUNICA, replace MILOSEVIC.

Zambia:

The territory of Northern Rhodesia was administered by the South Africa Company from 1891 until takeover by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices and a prolonged drought hurt the economy. Elections in 1991 brought an end

to one-party rule, but the subsequent vote in 1996 saw blatant harassment of opposition parties.

Zimbabwe:

The UK annexed Southern Rhodesia from the South Africa Company in 1923. A 1961 constitution was formulated to keep whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence.

Taiwan:

In 1895, military defeat forced China to cede Taiwan to Japan, however it reverted to Chinese control after World War II. Following the communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the 1947 constitution drawn up for all of China. Over the next five decades, the ruling authorities gradually democratized and incorporated the native population within its governing structure. Throughout this period, the island has prospered to become one of East Asia's economic "Tigers." The dominant political issue continues to be the relationship between Taiwan and China and the question of eventual reunification.

tropical; semiarid where mountains in east cut off trade winds

Heard Island and McDonald Islands:

antarctic

Holy See (Vatican City): temperate; mild, rainy winters (September to mid-May) with hot, dry summers (May to September)

Honduras:

subtropical in lowlands, temperate in mountains

Hong Kong:

tropical monsoon; cool and humid in winter, hot and rainy from spring through summer, warm and sunny in fall

Howland Island:

equatorial; scant rainfall, constant wind, burning sun

Hungary:

temperate; cold, cloudy, humid winters; warm summers

Iceland:

temperate; moderated by North Atlantic Current; mild, windy winters; damp, cool summers

India:

varies from tropical monsoon in south to temperate in north

Indian Ocean:

northeast monsoon (December to April), southwest monsoon (June to October); tropical cyclones occur during May/June and October/November in the northern Indian Ocean and January/February in the southern Indian Ocean

Indonesia:

tropical; hot, humid; more moderate in highlands

Iran:

mostly arid or semiarid, subtropical along Caspian coast

Iraq:

mostly desert; mild to cool winters with dry, hot, cloudless summers; northern mountainous regions along Iranian and Turkish borders experience cold winters with occasionally heavy snows that melt in early spring, sometimes causing extensive flooding in central and southern Iraq

Ireland:

temperate maritime; modified by North Atlantic Current;

mild winters, cool summers; consistently humid; overcast about half the time

Israel:

temperate; hot and dry in southern and eastern desert areas

Italy:

predominantly Mediterranean; Alpine in far north; hot, dry in south

Jamaica:

tropical; hot, humid; temperate interior

Jan Mayen:

arctic maritime with frequent storms and persistent fog

Japan:

varies from tropical in south to cool temperate in north

Jarvis Island:

tropical; scant rainfall, constant wind, burning sun

Jersey:

temperate; mild winters and cool summers

Johnston Atoll:

tropical, but generally dry; consistent northeast trade winds with little seasonal temperature variation

Jordan:

mostly arid desert; rainy season in west (November to April)

Juan de Nova Island:
tropical

Kazakhstan:
continental, cold winters and hot summers, arid and semiarid

Kenya:
varies from tropical along coast to arid in interior

Kingman Reef:
tropical, but moderated by prevailing winds

Kiribati:
tropical; marine, hot and humid, moderated by trade winds

Korea, North:
temperate with rainfall concentrated in summer

Korea, South:
temperate, with rainfall heavier in summer than winter

Kuwait:
dry desert; intensely hot summers; short, cool winters

Kyrgyzstan:
dry continental to polar in high Tien Shan; subtropical in southwest (Fergana Valley); temperate in northern foothill zone

Laos:
tropical monsoon; rainy season (May to November); dry season (December to April)

Latvia:

maritime; wet, moderate winters

Lebanon:

Mediterranean; mild to cool, wet winters with hot, dry summers; Lebanon mountains experience heavy winter snows

Lesotho:

temperate; cool to cold, dry winters; hot, wet summers

Liberia:

tropical; hot, humid; dry winters with hot days and cool to cold nights; wet, cloudy summers with frequent heavy showers

Libya:

Mediterranean along coast; dry, extreme desert interior

Liechtenstein:

continental; cold, cloudy winters with frequent snow or rain; cool to moderately warm, cloudy, humid summers

Lithuania:

transitional, between maritime and continental; wet, moderate winters and summers

Luxembourg:

modified continental with mild winters, cool summers

Macau:

subtropical; marine with cool winters, warm summers

Macedonia, The Former Yugoslav Republic of: warm, dry summers and autumns and relatively cold winters with heavy snowfall

Madagascar:

tropical along coast, temperate inland, arid in south

Malawi:

sub-tropical; rainy season (November to May); dry season (May to November)

Malaysia:

tropical; annual southwest (April to October) and northeast (October to February) monsoons

Maldives:

tropical; hot, humid; dry, northeast monsoon (November to March); rainy, southwest monsoon (June to August)

Mali:

subtropical to arid; hot and dry February to June; rainy, humid, and mild June to November; cool and dry November to February

Malta:

Mediterranean with mild, rainy winters and hot, dry summers

Man, Isle of:

cool summers and mild winters; temperate; overcast about one-third of the time

Marshall Islands:

wet season from May to November; hot and humid; islands border typhoon belt

Martinique:

tropical; moderated by trade winds; rainy season (June

to October); vulnerable to devastating cyclones (hurricanes) every eight years on average; average temperature 17.3 degrees C; humid

Mauritania:

desert; constantly hot, dry, dusty

Mauritius:

tropical, modified by southeast trade winds; warm, dry winter (May to November); hot, wet, humid summer (November to May)

Mayotte:

tropical; marine; hot, humid, rainy season during northeastern monsoon (November to May); dry season is cooler (May to November)

Mexico:

varies from tropical to desert

Micronesia, Federated States of:

tropical; heavy year-round rainfall, especially in the eastern islands; located on southern edge of the typhoon belt with occasionally severe damage

Midway Islands:

subtropical, but moderated by prevailing easterly winds

Moldova:

moderate winters, warm summers

Monaco:

Mediterranean with mild, wet winters and hot, dry summers

Mongolia:

desert; continental (large daily and seasonal temperature ranges)

Montserrat:

tropical; little daily or seasonal temperature variation

Morocco:

Mediterranean, becoming more extreme in the interior

Mozambique:

tropical to subtropical

Namibia:

desert; hot, dry; rainfall sparse and erratic

Nauru:

tropical; monsoonal; rainy season (November to February)

Navassa Island:

marine, tropical

Nepal:

varies from cool summers and severe winters in north to subtropical summers and mild winters in south

Netherlands:

temperate; marine; cool summers and mild winters

Netherlands Antilles:

tropical; ameliorated by northeast trade winds

New Caledonia:

tropical; modified by southeast trade winds; hot, humid

New Zealand:

temperate with sharp regional contrasts

Nicaragua:

tropical in lowlands, cooler in highlands

Niger:

desert; mostly hot, dry, dusty; tropical in extreme south

Nigeria:

varies; equatorial in south, tropical in center, arid in north

Niue:

tropical; modified by southeast trade winds

Norfolk Island:

subtropical, mild, little seasonal temperature variation

Northern Mariana Islands:

tropical marine; moderated by northeast trade winds, little seasonal temperature variation; dry season December to June, rainy season July to October

Norway:

temperate along coast, modified by North Atlantic Current; colder interior with increased precipitation and colder summers causing glaciers to grow; rainy year-round on west coast

Oman:

dry desert; hot, humid along coast; hot, dry interior; strong southwest summer monsoon (May to September) in far south

Pacific Ocean:

planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal - a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Pakistan:

mostly hot, dry desert; temperate in northwest; arctic in north

Palau:

wet season May to November; hot and humid

Palmyra Atoll:

equatorial, hot, and very rainy

Panama:

tropical maritime; hot, humid, cloudy; prolonged rainy season (May to January), short dry season (January to May)

Papua New Guinea:

tropical; northwest monsoon (December to March),
southeast monsoon (May to October); slight seasonal temperature
variation

Paracel Islands:

tropical

Paraguay:

subtropical to temperate; substantial rainfall in the
eastern portions, becoming semiarid in the far west

Peru:

varies from tropical in east to dry desert in west; temperate
to frigid in Andes

Philippines:

tropical marine; northeast monsoon (November to April);
southwest monsoon (May to October)

Pitcairn Islands:

tropical, hot, humid; modified by southeast trade
winds; rainy season (November to March)

Poland:

temperate with cold, cloudy, moderately severe winters with
frequent precipitation; mild summers with frequent showers and
thundershowers

Portugal:

maritime temperate; cool and rainy in north, warmer and
drier in south

Puerto Rico:

tropical marine, mild; little seasonal temperature variation

Qatar:

desert; hot, dry; humid and sultry in summer

Reunion:

tropical, but temperature moderates with elevation; cool and dry from May to November, hot and rainy from November to April

Romania:

temperate; cold, cloudy winters with frequent snow and fog; sunny summers with frequent showers and thunderstorms

Russia:

ranges from steppes in the south through humid continental in much of European Russia; subarctic in Siberia to tundra climate in the polar north; winters vary from cool along Black Sea coast to frigid in Siberia; summers vary from warm in the steppes to cool along Arctic coast

Rwanda:

temperate; two rainy seasons (February to April, November to January); mild in mountains with frost and snow possible

Saint Helena:

Saint Helena - tropical; marine; mild, tempered by trade winds; Tristan da Cunha - temperate; marine, mild, tempered by trade winds (tends to be cooler than Saint Helena)

Saint Kitts and Nevis:

tropical tempered by constant sea breezes;

little seasonal temperature variation; rainy season (May to November)

Saint Lucia:

tropical, moderated by northeast trade winds; dry

season from January to April, rainy season from May to August

Saint Pierre and Miquelon:

cold and wet, with much mist and fog;

spring and autumn are windy

Saint Vincent and the Grenadines:

tropical; little seasonal

temperature variation; rainy season (May to November)

Samoa:

tropical; rainy season (October to March), dry season (May to October)

San Marino:

Mediterranean; mild to cool winters; warm, sunny summers

Sao Tome and Principe:

tropical; hot, humid; one rainy season

(October to May)

Saudi Arabia:

harsh, dry desert with great extremes of temperature

Senegal:

tropical; hot, humid; rainy season (May to November) has

strong southeast winds; dry season (December to April) dominated by hot, dry, harmattan wind

Seychelles:

tropical marine; humid; cooler season during southeast monsoon (late May to September); warmer season during northwest monsoon (March to May)

Sierra Leone:

tropical; hot, humid; summer rainy season (May to December); winter dry season (December to April)

Singapore:

tropical; hot, humid, rainy; two distinct monsoon seasons
- Northeastern monsoon from December to March and Southwestern monsoon from June to September; inter-monsoon - frequent afternoon and early evening thunderstorms

Slovakia:

temperate; cool summers; cold, cloudy, humid winters

Slovenia:

Mediterranean climate on the coast, continental climate with mild to hot summers and cold winters in the plateaus and valleys to the east

Solomon Islands:

tropical monsoon; few extremes of temperature and weather

Somalia:

principally desert; December to February - northeast

monsoon, moderate temperatures in north and very hot in south; May to October - southwest monsoon, torrid in the north and hot in the south, irregular rainfall, hot and humid periods (tangambili) between monsoons

South Africa:

mostly semiarid; subtropical along east coast; sunny days, cool nights

South Georgia and the South Sandwich Islands:

variable, with mostly westerly winds throughout the year interspersed with periods of calm; nearly all precipitation falls as snow

Southern Ocean:

sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Spain:

temperate; clear, hot summers in interior, more moderate and cloudy along coast; cloudy, cold winters in interior, partly cloudy and cool along coast

Spratly Islands:
tropical

Sri Lanka:
tropical monsoon; northeast monsoon (December to March);
southwest monsoon (June to October)

Sudan:
tropical in south; arid desert in north; rainy season (April
to October)

Suriname:
tropical; moderated by trade winds

Svalbard:
arctic, tempered by warm North Atlantic Current; cool
summers, cold winters; North Atlantic Current flows along west and
north coasts of Spitsbergen, keeping water open and navigable most
of the year

Swaziland:
varies from tropical to near temperate

Sweden:
temperate in south with cold, cloudy winters and cool,
partly cloudy summers; subarctic in north

Switzerland:
temperate, but varies with altitude; cold, cloudy,
rainy/snowy winters; cool to warm, cloudy, humid summers with
occasional showers

Syria:

mostly desert; hot, dry, sunny summers (June to August) and mild, rainy winters (December to February) along coast; cold weather with snow or sleet periodically hitting Damascus

Tajikistan:

midlatitude continental, hot summers, mild winters; semiarid to polar in Pamir Mountains

Tanzania:

varies from tropical along coast to temperate in highlands

Thailand:

tropical; rainy, warm, cloudy southwest monsoon (mid-May to September); dry, cool northeast monsoon (November to mid-March); southern isthmus always hot and humid

Togo:

tropical; hot, humid in south; semiarid in north

Tokelau:

tropical; moderated by trade winds (April to November)

Tonga:

tropical; modified by trade winds; warm season (December to May), cool season (May to December)

Trinidad and Tobago:

tropical; rainy season (June to December)

Tromelin Island:

tropical

Tunisia:

temperate in north with mild, rainy winters and hot, dry summers; desert in south

Turkey:

temperate; hot, dry summers with mild, wet winters; harsher in interior

Turkmenistan:

subtropical desert

Turks and Caicos Islands:

tropical; marine; moderated by trade winds; sunny and relatively dry

Tuvalu:

tropical; moderated by easterly trade winds (March to November); westerly gales and heavy rain (November to March)

Uganda:

tropical; generally rainy with two dry seasons (December to February, June to August); semiarid in northeast

Ukraine:

temperate continental; Mediterranean only on the southern Crimean coast; precipitation disproportionately distributed, highest in west and north, lesser in east and southeast; winters vary from cool along the Black Sea to cold farther inland; summers are warm across the greater part of the country, hot in the south

United Arab Emirates:

desert; cooler in eastern mountains

United Kingdom:

temperate; moderated by prevailing southwest winds over the North Atlantic Current; more than one-half of the days are overcast

United States:

mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Uruguay:

warm temperate; freezing temperatures almost unknown

Uzbekistan:

mostly midlatitude desert, long, hot summers, mild winters; semiarid grassland in east

Vanuatu:

tropical; moderated by southeast trade winds

Venezuela:

tropical; hot, humid; more moderate in highlands

Vietnam:

tropical in south; monsoonal in north with hot, rainy season (mid-May to mid-September) and warm, dry season (mid-October to mid-March)

Virgin Islands:

subtropical, tempered by easterly trade winds,
relatively low humidity, little seasonal temperature variation;
rainy season May to November

Wake Island:

tropical

Wallis and Futuna:

tropical; hot, rainy season (November to April);
cool, dry season (May to October); rains 2,500-3,000 mm per year
(80% humidity); average temperature 26.6 degrees C

West Bank:

temperate, temperature and precipitation vary with
altitude, warm to hot summers, cool to mild winters

Western Sahara:

hot, dry desert; rain is rare; cold offshore air
currents produce fog and heavy dew

World:

two large areas of polar climates separated by two rather
narrow temperate zones from a wide equatorial band of tropical to
subtropical climates

Yemen:

mostly desert; hot and humid along west coast; temperate in
western mountains affected by seasonal monsoon; extraordinarily hot,
dry, harsh desert in east

Yugoslavia:

in the north, continental climate (cold winters and hot, humid summers with well distributed rainfall); central portion, continental and Mediterranean climate; to the south, Adriatic climate along the coast, hot, dry summers and autumns and relatively cold winters with heavy snowfall inland

Zambia:

tropical; modified by altitude; rainy season (October to April)

Zimbabwe:

tropical; moderated by altitude; rainy season (November to March)

Taiwan:

tropical; marine; rainy season during southwest monsoon (June to August); cloudiness is persistent and extensive all year
