WELCOME TO PARADISE

By Allyn Donnelson

**A civilian like me has no business getting
mixed up in top secret government projects. But
this one I got into—and you should be as lucky!**

**[Transcriber's Note: This etext was produced from
Imagination Stories of Science and Fantasy
September 1954**

**Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

President of the United States
The White House
Washington, D.C.

Dear Mr. President:

I don't know who else to appeal to about the fix I'm in, because I'm afraid I would be revealing top secret material to someone who isn't entitled to hear it. That's why I wouldn't tell the FBI anything and that's why I told them I don't want a lawyer.

I know you've got lots on your mind, Mr. President, and I hope hearing about my blunder doesn't throw you off your game this weekend or anything like that, but I sure would appreciate it if you could find time to help me out.

You see, I'm not a spy, and I sure didn't stumble into this stuff of my own accord, but how was I to know I was setting off a spark that had something to do with space travel? After all, when you stop to think about it, I only did what the foreman told me to, but he didn't know any better either, so I wouldn't want to get him in Dutch.

You see, I work at the Diversified Metal Products Co. up here in Chicago. I'm a spot welder and one job I had to do about every six weeks was make six welds on a geedunk we called a "manhole cover." We didn't know what they were, except that they were something special for the Signal Corps, and they looked about as much like manhole covers as anything else.

Well, the way the work is supposed to be scheduled, my welding job is the first thing after it comes off the presses, just before the little coils are put in. So the foreman comes over to me one night—it was October 10, the last day of the World Series—and shows me one of the covers after it's been wired up. One of the welds has come loose—maybe because the material was dirty or something like that—and it looks like the whole thing will have to be scrapped.

So he says to me "Tuck" (my name is Joe Peters, but they call me Tuck for Kentucky where I come from)—he says, "Tuck, do you suppose you can save this piece by welding it again, right there between those two coils?"

I look the geedunk over, and there isn't much room to play around, but I decide it's not near enough the coils to melt the wires. So if I spoil it, so what? It'd be scrap anyhow. How was I to know the points of the welder would establish an electrical contact?

So I take the piece and tell him I'll try it after I finish the truckload of stuff I'm working on. But along about coffee time, I go and burn my hand kind of bad on the welder, and have to get the nurse to bandage it up for me, and that slows me up a good bit.

Everybody else in the department had left for washup by the time I put the gismo in the machine. I kicked the pedal just like I always do, and whoosh! I was out like a rookie the first time he faces Allie Reynolds. Seems like I saw a flash of bluish-greenish light, but I don't know for sure.

Next thing I knew, a squatty guy with broad shoulders and bushy eyebrows was standing over me. He said, "Well, did the Yankees win the Series?" and his accent sounded like he should be following the Dodgers instead.

I looked around. It was kinda dark, like just after the sun goes down. I was sitting on a big strip of limestone, and I could see a few trees and some small hills, and lots more of those limestone rocks, or cliffs. It wasn't like any part of the country I've ever seen before.

The guy starts giving me the once over, too. "What monkey in that zoo they call the Pentagon picked *you* for a job like this? I knew the Defense Department was hard up, but I didn't think they were *that* hard up!"

Then I notice this geezer has a uniform sporting top sergeant's stripes. I jump up and back away from him.

"Look," I says, "I don't know what happened, but I know I didn't volunteer for no army job, and I'm too old to be drafted again. I must have had amnesia. I wanna lawyer. Lemmee out of here—you're not giving me that army routine again—no siree."

(Mr. President, please don't misunderstand me. I'm as patriotic as the next guy, and I assure you I won't shirk no duty if I'm needed, but I don't have to

like it, do I?)

The guy's dumbfounded. He doesn't give me a strong-arm deal like I'd expect from a top-sarge—he just looks as if he can't figure it out. Then he grabs me by the shoulder.

"Wait a minute, Mac, let's sit down and talk this over. Who the hell are you? Where did you come from? Who sent you?"

I'm about to say "Groucho sent me," but I decide maybe I'd better be serious. I tell him my name, and that I ain't got the faintest idea where I am.

"Okay, Tuck," he says. "They call me Yogi. Now let's take it from the beginning, slow and easy, huh?"

So I tell him what happened in the plant, and before I get done Yogi is laughing like crazy, in fact he sits down on the rock and almost knocks himself out.

"Well, what in Sam Hill is so all-fired funny? Who kidnapped me while I was knocked out and dumped me on this God-forsaken army post?"

Yogi manages to stop laughing. He takes me across a strip of this funny-looking, bare limestone rock, where a contraption is standing that looks like a radio tower about ten feet high. Inside it is a box about the size and shape of those reducing cabinets you see in cartoons. The top to the box is open, and Yogi points to it.

"Is this the kind of doohicky you're talking about—what you call a manhole cover?"

I look close, and sure enough, that's just what it is. I nod to Yogi, and he sighs real serious like.

"Well, Tuck, my boy, you maybe made yourself famous tonight. One thing for sure—you're the first civilian to travel by HHF, and the first one to set foot on Lunette."

"And where on God's green earth is Lunette?"

"That's what's so funny, Tuck. It's not on God's green earth at all. Lunette is a satellite of the Earth, discovered just a few months ago. It's a sort of little moon—that's why we named it Lunette. It's got enough atmosphere so we

don't need space suits, and it's about half-way between Earth and the moon."

I guess I was giving him a "tell me another" look. He pointed in back of me. "Look at the moon coming up over there, if you don't believe me. Did you ever see anything like that on Earth?"

That convinced me. The old moon was huge, and I could see mountains and rivers and seas on it, and even that natural bridge I'd read about. Besides, I could even see the curve of the ground on Lunette!

But how in blazes did I get here?

"This contraption," Yogi explains, "we call a Matter BARS, short for Matter Broadcasting and Receiving Station. It works on HHF—hyper high frequency—and instead of sending out the ordinary type of radio wave lengths it broadcasts matter. It won't work between two points on Earth; it has to have a distance of at least 200,000 miles to bounce from. We bounce stuff off the moon, and broadcast people, equipment—anything of less than 250 pounds—between Earth and Lunette."

"Who bounces them? Who in tarnation bounced me here?"

"You bounced yourself, friend. Your spotweld machine set up a contact here between these two coils. Our regular operators establish contact by moving these two balls near each other like a Leyden jar. Your machine had the same effect, and whoosh, here you are."

"Look, Bud, I remember a Leyden jar from high school science, but durned if I follow the rest of that malarky."

Yogi's getting impatient with me. "It's very simple, Peters. Suppose you wandered into a TV studio when the circuits were open—your picture and voice would be broadcast over that station. Well, that Matter BARS cover was set at the right frequency for sending objects or people to Lunette and you were broadcast here. You wouldn't have been knocked out if you had been inside the insulating cabinet; it would have just felt like a sneeze."

"So what are you doing here?" This guy is selling me fast.

"Guess I'd probably better let the CO talk to you about that. But first tell me about the Series."

So we bat the breeze a while about what is going on back on Earth, and I start to wonder how am I going to get back there. Yogi tells me to let the CO worry about that, and in the meantime offers to show me around the joint.

There's not much to see on Lunette—nothing but salt water lakes, limestone cliffs, a few scrawny trees, and some weird bushes with round things dangling from them that you'd think was grapefruit, or something like that, until you found out they were hard as coconuts.

All of the plant life looked like the chlorophyll people had been there already, and had taken a big haul back to their toothpaste factories. The grass and leaves were either a kind of chartreuse or a pale color like weak orangeade. Finally we take off for the CO.

The Captain turned out to be a right guy, but he sure was upset about the security angle. He couldn't help grinning, though, when Yogi said,

"I still think it's damned funny that a civilian could stumble into a top secret army base 100,000 miles from home!"

"Well, Peters," the Captain said, "we can't very well send you back tonight anyway, because both the regular station and the test station at your plant in Chicago are closed now. Under ordinary circumstances I'd have to lock you up, but I don't see how you can escape from us! Go bunk with Yogi and let me think it over."

He stopped us as we started out of the tent. "And men, keep your lips buttoned."

We join the fellows and talked about baseball for a couple hours. We organized a game for the next day, and I agreed to play shortstop, even though I'm hoping I won't be around for it. The Captain's remarks hadn't made me feel too easy on that score.

I ask Yogi how come all the bicycles over by the pueblo castle and he explains that they can be broadcast, unassembled, where the parts to a jeep or any other big vehicle would be too heavy for the Matter BARS to handle. He says they're used by the crews assigned to surveying and mapping Lunette, making geological and botanical surveys, and that sort of thing.

Yogi gets me a sleeping bag and we stretch out under the stars in front of the limestone castle. (Man, that thing is pretty in the moonlight, Mr. President.) Lanterns hanging in some of the caves made it sparkle here and there like a giant hunk of jewelry. And I never breathed such fresh, sweet air as that, anyplace.

The next day the CO calls Yogi in for a conference that doesn't include me, so I get in on the baseball game after all. It was a lot of fun, too. Lunette's gravity is much less that of Earth so I made some pretty wild throws until I got oriented.

At chow time I latched onto Yogi. "Hey, kid, when do I get out of here? This is a fine adventure, but after all, I got obligations back on Earth."

"It may not be that easy, Tuck. The Captain doesn't know what to do. HQ is going to bust a gasket when they find out about you. After all, the Captain is the only one who has made any trips back since we got here, and the project is so secret that not more than 20 people on Earth have any inkling of it."

I began to flip my lid. "Yogi," I said, "how much does this project cost?"

"Plenty, Tuck, more than you'd imagine. The equipment the guys use for their surveys is pretty high-powered stuff. Why?"

"Because it's coming out of my pocket, that's why. And me and a lot of my buddies who are paying the freight on these deals are getting sick of hearing that only two or three or twenty people in the whole USA knows about this or that secret project. Security is okay, but don't you think we ought to know something about what our money's going for?"

Boy, am I a genius at putting my foot in it! The lighter gravity on Lunette must of gone to my head. Yogi gave me a real funny look, got up from the mess table, and walked off.

I started to sweat. What the heck made me blow off like that? Now they really would think I was a security risk, and maybe they'd decide not to let me go back at all, at least not until they had a court-martial or something. Naturally I have plenty of respect for military secrets; it's just that I think voters should have a little more information and a little more say-so about how our money is spent. It's a sore point with me. But what a stupid time I pick to sound off about it!

A soldier comes along and tells me the CO wants to see me. Now I know this is it.

But Yogi and the Captain both looked as friendly as ever. "Peters," the CO said, "I think you can be useful to us."

Oh, oh, here it comes. They're going to try to talk me into staying up here.

"I suppose you have figured out by now what the Lunette Project is all about," the Captain went on. "You remember stories in the papers a few years ago on the possibility of creating an artificial satellite to use as a base for guided missiles in case of war?"

I nodded.

"The stories were hushed up pretty fast, and the reason was that Lunette was discovered just about then. They stopped talking about it just as they stopped talking about atomic research after the Manhattan project started."

"Listen, Captain, please," I said. "Beg pardon for interrupting, but please don't tell me anything a civilian isn't supposed to know, because—no offense—I don't want to get roped into the Army just because I know too much."

"No offense to *you*, Peters—I'm not trying to get you into the Army." He grinned, and I felt a lot better. "Let me go on. Yogi tells me that he explained to you something about the Matter BARS. Did you understand it?"

"Pretty well, sir. He should have been a teacher if he could make me see a glimmer of light in that stuff."

The Captain laughed and Yogi got red.

"He was. Assistant Professor of Electronics at Columbia, before the Signal Corps persuaded him to become a Space Cadet."

My face was red then.

"Well, on the military nature of our mission we have just a few more wrinkles to iron out," the Captain went on, "but something else has come up that we think has a lot more significance than guided missiles."

"I told the Captain I thought you'd help us," Yogi said, "because of what you said about secret projects a while ago."

Now I *am* confused. So I don't like so much secrecy, so they think I can help their project? I don't get it. I don't get it at all.

"Yogi will explain the science part," the Captain said. "I'm just a publicity man myself, not a teacher. But as a publicity man, Peters, I think we can use you. Would you be game to try a job that could be very important?"

I nodded, still confused but willing.

Yogi started by explaining that Lunette came into existence about a hundred million years ago, a figure the geologists came up with by measuring the radioactivity of the uranium here and comparing it with that of uranium on Earth.

"But, in studying the radioactivity of the elements here," he said, "we have discovered something else ... something that could change the whole picture of things back on Earth. We found out about it, at least a glimmer of it, almost as soon as we got up here, but we wanted to run a whole slew of experiments before we let ourselves believe that it was true.

"Say, Tuck, what's that bandage on your hand for?"

I was surprised at his sudden change of subject, but I told him how I had burned my hand on the spotweld machine the night before.

"Does it hurt now?"

"Heck, it ain't nothing, Yogi. Let's get on with my physics lesson."

"Do me a favor, please. Take off the bandage."

He was real serious, so I unwound the bandage the nurse put on. There was just a tiny white scar where the burn had been. It looked like I had done it at least a couple of weeks ago!

Yogi and the Captain looked at each other and grinned like they were real proud of something.

"That's part of the lesson, Tuck. Our big discovery is that the increased radioactivity of the elements here on Lunette seems to have a miraculous healing power on any infectious or communicable disease, and on any injury to body tissues. Maybe you remember reading a little about the strange effect that the Bikini tests had on some of the animals used experimentally."

I nodded.

Yogi continued. "We don't know yet just how this radioactivity works on the body. In fact, we're not even sure it is the radioactivity alone. There may be some added effect from the Lunette climate or water. But we have proved, to the satisfaction of everyone here, that almost all Earth diseases and most injuries can be cured on Lunette.

"The mess sergeant had a trick knee when he came here. The trouble disappeared completely when we arrived. One of the geologists had an ulcer. Hasn't felt a pain since the second day. Another guy had some bad powder burns from a lab experiment that disappeared over night, just like your burn did.

"When we first suspected what was going on, we asked the crew at Silver Spring to send up white rats, guinea pigs, and dogs, with everything from cancer and T.B. through rabies to polio, and the results were one hundred per cent perfect, with complete recovery in every case inside of a week. *And*, this is important, they stayed cured when sent back to Earth."

Yogi's eyes were burning like one of them gospel preachers at a revival, and his voice was shaking. I was catching the excitement myself. The Captain took over the story.

"I suppose you're wondering what we want of you?"

"I sure am. This is a big deal, isn't it?" I looked at the little scar on my hand again, to convince myself nobody was kidding.

"Here's our problem, and our plan, Tuck. Yogi told me what you said about the taxpayers' right to know where their money is going, and it ties in with what a lot of us up here have been discussing.

"Most of our fellows are like Yogi—technicians who chose their line of work because they thought they could help make the world a better place to live in. Now that they have the chance to make the biggest contribution of their whole lives, they're all hemmed in by military rigamarole and red tape. It goes against the grain for scientists."

"You mean the Army is keeping the place top secret, so it can't be used for a ... well, a health resort?"

The Captain nodded. "I'm not arguing with the military reasons for security. Maybe they're right on that score. But in the meantime, thousands of people are dying every day of disease, needlessly, while the Army keeps the secret that could end those deaths. The people will find out about it eventually, and I don't think they'll like it. Suppose your mother were to die of cancer a few months from now, and you were to find out later that her death was unnecessary, and that your own government could have stopped it. What would you think? How about it, Peters, are you with us? What do you say?"

The Captain had been talking louder and faster till he was practically out of breath.

"I got just one thing to say, Captain. My baby sister died of T.B. just before her eighteenth birthday last year. You can bet your bottom nickel I'm with you on this deal, right down the line. Just give me the scoop. I'll go along."

Yogi and the CO slapped me on the back.

They explained to me, Mr. President, all about this secret Congressional hearing to be held on the Lunette project next week, and how I should go to Washington and get my Congressman to spring me as a surprise witness—a civilian who had been to Lunette and knew the score.

They knew all about what strings to pull to be sure I could get in, and they helped me figure out what I should say. They seemed to think that my word, you know, the guy on the street or something like that, would carry some weight and make Congress see that the health angle on this Lunette project is a darned sight more important than keeping the secret of a guided missile station. Why, for Pete's sake, Mr. President Uncle Sam owns Lunette, doesn't he? When the other side hears about this they'll want to get in on it so bad they'll be awful anxious to stay in our good graces. Probably turn out to be an even better military defense than guided missiles.

Time was important now, so just at five o'clock, when I generally report for work, Yogi and I walked down to the Matter BARS and shook hands. Yogi took a polaroid picture of me standing there and gave me the print. You know, Mr. President, I kind of hated to leave. That Lunette sure is a pretty place.

Yogi moved the two little balls together, and sure enough, like he had told me, I felt like I was catching a fit of sneezing. That was all, and there I was back at Diversified, in the restricted Signal Corps section, with the inspector staring at me.

He looks ready to pull a gun on me, so I laugh at him, nervous as heck inside but trying not to show it. "What's the matter, you seen a ghost?"

"How did you get in that cabinet, Peters?" He's really mad, and I'm wondering if I can pull it off.

"Well, I know you spend all your time over here by yourself, so I thought maybe someone should break the monotony. I just crawled in there a couple of minutes ago to surprise you." (That was true in a way, wasn't it?)

"Don't do that again, Peters. No harm done, I guess, but if I had moved those two little balls together without seeing you in there I don't know what would have happened to you!"

Mebbe you don't, but I do, I thought to myself. I scrambled out of there as soon as I was sure I had him sold on my story.

And that's all there is to the story, Mr. President, except that last week like a darned fool I had to drop that picture. It was one Yogi took of me with his Polaroid, standing by the Matter BARS with a bunch of Lunette coconuts (the boys call them Ikenuts, sir).

So my foreman sees the manhole cover in the picture and thinks that something must be funny and turns it in to our personnel manager. And *he* turns it over to the FBI, and I wouldn't tell em anything, and here I am in the clink.

So it looks like I've fouled up the boys' plans to use me as a secret weapon, and it looks like I've fouled up my own life real good unless you can figure out a way to help me.

I think I will close now and leave the whole mess up to you.

Obediently yours,
Joe Peters.

THE WHITE HOUSE
Washington, D. C.

Dear Mr. Peters:

We are happy to learn that, in accordance with instructions from this office, you have been reinstated in your job and that the FBI and your employer are reassured as to your loyalty.

The President has asked me to extend his personal invitation to you to have lunch at the White House next Friday when you are in Washington for the hearing.

Your story interested him so much that he investigated it personally and thoroughly. As a result he has a special surprise in store for Congress and the American people on Friday. All I can divulge to you at this time is that his barber fainted this morning when he called at the White House to give the President his weekly trim.

Very truly yours,
Robert Kenwood
Special Assistant to the
President of the United States

*** END OF THE PROJECT GUTENBERG EBOOK WELCOME TO
PARADISE ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
