CORRECTION OF UNDERWEIGHT AND OVERWEIGHT BY EXERCISE

About one-fifth of the American people are burdened with overweight. This is a tragedy, for excessive weight is an impediment to an active, vigorous, and normal life. It is not only a threat to health, but it also decreases the chance for longevity. While this portion of the book is prepared for those who are overweight and wish to reduce, it must be said that prevention of overweight is much better than a cure. Young adults who recognize the first warning of overweight should at once revise their manner of living as regards diet and exercise, so as to keep the body within normal limits.

The first step in production of overweight is the lessening of activity and exercise. With this comes the deposition of fats around and in the vital organs of the body which may cause interference with the action of the heart, kidneys and blood vessels. This added fat lays a mechanical stress and strain on all the organs, not to mention the deadly strain on the eliminating organs. Disease of these organs is a common accompaniment of overweight.

Generally when men break down we ascribe it to over-work. It is over-work, but not over-work of the brain and nerves, but rather over-work of the stomach, liver and kidneys. Very few physically healthy men and women are in such danger of ever breaking down from over-work even though they labor most strenuously and ceaselessly.

Most cases of overweight are first noticed about the twenty-fifth year. Chief among the causative factors is the leading of a sedentary, inactive life in which over-eating and under-exercising play an important part. With this comes an accumulation of fat which tends to become a permanent fixture unless the style of living is immediately changed. Thus, the body accommodates itself to this added weight burden which curtails activity and makes further increases in weight easy. In some persons, however, disease of the glands of internal secretion causes overweight.

Overweight means too much food or too little exercise, or both. As people grow older they cut down their activity and exercise but at the same time their appetite for food continues or even increases. Thus, less and less of the

food they take in the body is burned up in work, and more and more is stored in the form of fat. There is a strain upon the heart for every pound the person puts on above the normal weight. Such overweight is about equally prevalent among women and men.

It is very fortunate indeed that overweight in almost every case can be controlled. Even the hereditary tendency to overweight which sometimes makes the struggle seem hopeless can be overcome in most cases.

Since overweight is brought on chiefly by over-eating and under-exercising, we can reverse this process to the limits of safety which vary with the individual and have its correction.

Reduced eating does not mean starvation, but merely means control of the appetite and the avoidance of the concentrated portion of the diet.

In regard to the diet, it would be advisable to consult a physician, but it is also advisable to go lightly on sugar, butter, cream, fats, pastry, sweets, olive oil, etc. Meals should be light and frequent rather than hearty and infrequent. A light breakfast is advisable. One or two poached eggs, weak tea or coffee, hardly any sugar, with a very small quantity of bread and butter. For luncheon and dinner meat should be eaten in moderate portions, and celery, spinach, lettuce, string beans, turnips, and other bulky vegetables of low food value may be taken if desired.

It must be said at this point that increased mental work does not mean increased diet, but increased physical work means increased diet.

The plan of dieting and weight reduction is to eliminate the concentrated, starchy and fatty foods and substitute bulky foods which contain less fat producing qualities, but which give adequate nourishment and satisfy the appetite.

Concentrated foods which are fat forming are grouped into three classes: First, oils, such as vegetable oil, nuts, cream, butter, etc. Second, sweets and sugars. Third, starchy foods as pastry, bread, etc. A highly concentrated food is a piece of bread and butter.

Eating between meals is very largely responsible for many cases of overweight, and this is especially true of those who cook the food in the home. However, of all the foods taken between meals, candy is the worse. A few harmless pieces of candy may contain more calories than a large meal.

The habit of eating only three meals a day should be the first step in one's reduction scheme. Candy should be eaten as a dessert.

The non-fat forming foods are bulky vegetables, fruits, lean meat, fish and fowl without fat, etc.

REDUCING DRUGS

Reducing drugs as advertised make wildly extravagant claims—claims that are impossible of substantiation, for they nearly always promise to reduce without dieting or exercising. This cannot be done unless dangerous drugs are employed. All sorts of soap, powders, rollers, breads, are usually a scheme purely to make money. They are either useless, dangerous, or both.

HOW TO REDUCE SANELY

In order to reduce sanely, four things must be done.

First, a thorough physical examination by a competent physician which means do not try to reduce without consulting a physician or specialist. Second, a diet should be planned from time to time so as to give adequate reduction and provide satisfactory nourishment. Third, determination of the time one will take in eliminating overweight. It must be remembered that determination and persistence are the very essence of success in weight reduction. Unless one determines at the outset to follow the matter through, it is quite well never to begin. The fourth step, and the one that I am particularly interested in, is the exercises suitable for weight reduction. It must be remembered that more care in reducing is necessary with older persons and with individuals whose overweight is of long standing than with ones who have recently acquired extra weight.

A group of exercises will be found later on in this book. Indulging in these exercises daily and a planned diet will eliminate overweight eventually. Through proper exercise excessive weight is burned up and gotten rid of. Exercise in the open air is especially beneficial to the health. It is imperative to follow the prescribed calisthenics for ten or twenty minutes each day in addition to such out-of-door activity as can be included.

One of the best exercises for overweight people is walking and a brisk tramp of three or four miles a day will work wonders. However, if you get fatigued or breathless, begin with shorter distances and work up to longer ones.

It must be remembered that a daily movement of the bowels is essential for good health and it is very important for one undertaking a weight reducing regime. You will find, however, that the prescribed calisthenics will stimulate the bowels to some extent. Movement of the bowels will be stimulated naturally by proper exercise and diet. Laxatives and drugs should never be used except upon advice of a competent physician. A daily evening hot bath aids in cleansing that great organ of elimination of poison, the skin. After taking your morning exercises a shower or tub bath should be taken

for two minutes with the temperature of the water between 95 and 100 degrees for cleansing purposes. This should be followed by a quick, cold sponge rub over the entire body. Dry with a rough towel until the skin glows. This should be followed by a cold wet towel rubbed on the abdomen for a few minutes until the abdomen attains a reddish glow. Then dry the body thoroughly, dress quickly and you will have a keen appetite for the morning meal, and be ready to start the day off in the proper manner.

Before going into exercises that are weight reducing, it must be remembered that over-exercise is as harmful as under-exercise. I will plan the first week's exercises in order that you will become accustomed to physical work. After that time pick any exercises from the general group and plan your program.

EXERCISES

Monday

Exercise 1.

Position: Body erect, arms at side.

Action: Slowly inhale and raise arms sideways, palms downward until level with shoulders. Turn palms upward and continue to raise arms until same extend upward from the shoulders. Slowly reverse movement and exhale. Do this five times.

Exercise 2.

Position: Stand erect with head up and shoulders squared with hands on hips.

Action: Bend body right and left from the erect position. Be sure to bend at the waist only. There should be no motion in the legs and the head and neck should be kept in the same relative position as in the position of attention. This exercise can be done with the feet together or apart. Bend six times to each side.

Exercise 3.

Position: Sitting on floor, legs straight together in front of body. Back should be straight with hands resting on floor.

Action: Bend knee placing the left foot on the floor near the seat. Return left leg to normal position and repeat with the right leg. Repeat exercise eight times with both legs.

Exercise 4.

Position: Stand erect with arms at sides.

Action: Raise arms over head at the same time raising on the toes. See how high you can reach. Hold position a few seconds; then return arms and feet to the normal position. Repeat exercise ten times.

Exercise 5.

Position: Lying on floor with hands at sides.

Action: Raise arms above head on floor. Inhale. Try to draw the abdominal contents into the chest; at the same time see how long you can make yourself. Return to the normal position slowly and exhale. Repeat exercise eight times.

You are now ready for your morning bath.

Tuesday

Exercise 1.

Repeat Exercise 5 of Monday's group.

Exercise 2.

Position: Sitting on floor with hands on hips, feet spread.

Action: Reach forward with left hand and touch right foot. Repeat with right hand on left foot. At first, you will probably not be able to touch the feet but reach forward as far as possible. Repeat exercise ten times with each hand.

Exercise 3.

Position: Body erect, arms sideways shoulder level.

Action: Turn body right as far as possible at the same time swinging the arms. Return to normal position and twist body left. Return to normal

position. Do this exercise quickly, trying to twist from the hips only. Repeat exercise ten times.

Exercise 4.

Position: Body erect, hands on neck with the finger tips touching each other. Elbows extended sideways and held back with the shoulders held down.

Action: Bend the neck backward as far as possible, keeping chin in, and return to normal position. Do this four times.

Exercise 5.

Position: Body erect, with hands above head. Elbows, straight and palms facing each other. Feet together.

Action: Bend to the left. Return to normal position and bend to the right. Bending should be done from the hips only. The arms should be in the same relative position all through the exercise, that is, parallel with the body. Stretch as high as possible while doing this exercise five times to each side.

Exercise 6.

Repeat breathing exercise.

Wednesday

Exercise 1.

Repeat breathing exercise.

Exercise 2.

Position: Hands on hips, body erect, feet together.

Action: Bend trunk slowly forward as far as possible. Return trunk to normal position, then bend backward not too far. Return trunk to starting

position. Repeat exercise ten times.

Exercise 3.

Position: Sitting on floor, hands on hips, body erect.

Action: Reach forward with both hands and touch toes, keeping knees straight. If you are unable to touch your toes do not become discouraged. However, reach forward as far as possible. Continue exercise ten times.

Exercise 4.

Position: Lying on floor face downward. Hands above head on floor.

Action: Stretch as long as possible. Raise hands and feet simultaneously as high as possible keeping knees and elbows straight. Hold a few seconds and return to normal position. Repeat exercise five times.

Exercise 5.

Position: Body erect, hands clasped behind neck.

Action: Twist body to the left as far as possible, twisting at hips only. Return to normal position. Repeat to the right. Do this exercise six times to each side.

Exercise 6.

Repeat breathing exercise.

Thursday

Exercise 1.

Repeat breathing exercise.

Exercise 2.

Position: Stand erect with arms at sides.

Action: Bend trunk left with the left hand touching as far below the knee as possible without twisting the trunk, which means bend directly sideways. Repeat to the right side with the right hand. Bend six times in each direction.

Exercise 3.

Position: Lying on floor with hands above head, knees straight.

Action: Raise feet six inches off the floor, keeping knees straight. Hold a few seconds and return to normal position. Do this exercise four times.

Exercise 4.

Position: Hands on hips, body erect.

Action: Twist body to the left slowly. Be sure that body rotates from the hips only and that there is no motion in the legs. Twist as far as possible, keeping an erect position. Repeat to the right side. Continue exercise five times to each side.

Exercise 5.

Position: Lying on back on floor. Hands at sides, legs straight with the weight of from two to four pounds on the abdomen.

Action: Breathe slowly and deeply. The abdomen should rise and fall rhythmically as you breathe. Repeat exercise for five minutes.

Friday

Exercise 1.

Repeat breathing exercise.

Exercise 2.

Position: Lying on back on floor, hands at sides, legs straight.

Action: Arch the body upward forming a bridge with the weight resting on the heels and shoulders. Hold position a few seconds. Return to normal. Form a bridge six times.

Exercise 3.

Position: Hands on hips, body erect.

Action: Bend trunk forward, back straight, left sideways, backward, right sideways, and forward, thus making a complete circle. Avoid rotation of the body. Make a complete circle three times.

Exercise 4.

Position: Body erect, hands on hips.

Action: Raise the right knee so that thigh is parallel with floor and the lower leg at an angle of 90 degrees with the thigh. The toes should be depressed and pointed to the floor as much as possible. This position should be held a few seconds before returning to normal position. Repeat with left leg. Raise each knee six times.

Exercise 5.

Position: Body erect, arms sideways shoulder high, elbows straight.

Action: Bend trunk forward so that back is parallel with floor. Spine should be straight and not curved. Return to upright position. Arms retain the same relative position throughout exercise. Bend forward six times.

Exercise 6.

Repeat breathing exercise.

Saturday

Exercise 1.

Repeat breathing exercise.

Exercise 2.

Position: Lie flat on the floor, face downward with feet extended and arms folded across back.

Action: Raise head and turn it to right; then to left. Return to normal position. Repeat six times.

Exercise 3.

Position: Hands on shoulders, elbows shoulder high and in plane with the body. Feet two feet apart.

Action: Lower body forward slowly to an angle of 90 degrees with the legs. The head, neck, and back should be straight and rigid with the bend at the waist only. This is a difficult exercise and attention to form is necessary. Repeat five times.

Exercise 4.

Position: Hands on hips, body erect.

Action: The body should be raised first on toes, and then by bending the knees, the body should be lowered. The back should be perpendicular to the floor during the whole movement, and in no instance should the head and body be allowed to tip forward. Go through this exercise slowly endeavoring to keep evenly balanced. Repeat exercise six times.

Exercise 5.

Position: Body erect with hands clasped behind neck, elbows shoulder high and well back.

Action: Press head backward as far as possible, keeping the chin in. Return to normal position. While doing this exercise, keep spine straight and draw

the chest up as high as possible. Try to draw the abdominal organs into the chest cavity. Repeat six times.

Exercise 6.

Position: Stand erect, with chest up, chin in.

Action: Bend or sway from side to side, moving only from the hips. The arms should wave loosely like the branches of a tree. Continue exercise for three minutes.

Exercise 7.

Repeat breathing exercise.

Sunday

Exercise 1.

Since Sunday provides a splendid opportunity to hike and tramp a few miles or participate in some form of game or contest, it is advisable to refrain from the formal exercises I have given in favor of an outdoor program.

At this point you are expected to plan your own program of exercise. Give yourself enough work so as to burn up the excess fat. After the physician examines your case, good hard work may be required from two weeks to one year, before you return to your normal healthy weight. Do not be discouraged if no effects are immediate. Be patient and stay with it and you will come out on top.

GENERAL EXERCISES

Exercise 1.

Position: Lying on back with body well relaxed.

Action: Expand the chest, pulling it well up and letting the abdomen become hollow. Count six, then make the chest small pushing down and making the abdomen large, and count two.

Remarks: Do this three to five times without breathing; then take several slow, long, deep breaths. Repeat this exercise from fifteen to twenty times.

Exercise 2.

Position: Stand erect, with hands resting on hips.

Action: Stationary run with high knee action, that is, bring your knees up well in front of you and landing on the balls of the feet.

Exercise 3.

Position: Stand erect with hands resting on hips.

Action: Draw right knee to chest and squeeze with both arms. Raise on toe of left foot. Replace right leg and continue exercise by repeating with left leg. An alternate compression and stretching movement is given to the abdominal organs.

Exercise 4.

Position: Lying on back with hands tightly closed on shoulders.

Action: Lift the chest and take a deep breath. Put your head back then bend body to the right; then stretch left arm forward and right arm sideways. Stretch vigorously; exhale and return to normal position. Repeat to the left side.

Remarks: This is an excellent first exercise in the morning workout. It can be done while lying in bed. Yawn, stretch, and grunt as much as you wish for the circulation is stimulating.

Exercise 5.

Position: Body erect, hands on hips.

Action: Bend forward very slowly, hinging only at hips while keeping back straight and face to front. Bend low enough so that back is parallel with floor. Return to normal position slowly.

Remarks: You will not like this exercise at first, but it is a very helpful exercise.

Exercise 6.

Position: Lying on floor, hands by sides, legs straight.

Action: Draw the right knee to the chest and exhale. As right knee is returned to its normal position, the left knee is drawn to the chest.

Exercise 7.

Position: Stand erect with chest up, chin in.

Action: Bend or sway from side to side, moving only from the hips. The arms should wave loosely like the branches of a tree.

Exercise 8.

Position: Stand erect with hands resting on hips.

Action: Raise the right knee until at right angles with the body, toes pointing towards the floor. Extend foot forward until knee is straight, and stretch. Return leg to normal position and repeat with left leg.

Exercise 9.

Position: Lying on back on floor, hands on sides, legs straight.

Action: Arch the body upward forming a bridge with the weight resting on the heels and shoulders.

Exercise 10.

Position: Stand erect with hands on hips.

Action: Bend right and reach towards the floor or ground. Reverse movement to the left.

Remarks: In reaching towards the floor bring the hand to the knee at first, and then with each successive time bend a little lower until the ground is reached.

Exercise 11.

Position: Feet apart, arms sides shoulder level.

Action: Twist the body to the right side. Bend slightly forward, keeping the knees straight and touch the right foot with the left hand. The right being stretched straight up over body towards the ceiling. Exhale and draw abdomen well in. Repeat exercise, twisting the body to the left side and touching left foot with right hand.

Exercise 12.

Position: Lie on back in form of a cross with arms extended.

Action: Carry right foot up to the left until it touches the left hand. Repeat, using left foot and touching right hand.

Remarks: A difficult variation of this exercise may be done by doing the exercise in a standing position.

Exercise 13.

Position: Body erect, hands on hips, feet apart with knees straight.

Action: Bend to the right, then to the left, then forward, then backward. Do not bend too far backward. Repeat this exercise about a dozen times.

Exercise 14.

Position: Lying on back with arms above head on the floor, keeping knees straight.

Action: Assume a sitting position and touch toes with hands; exhale. Return to sitting position, keeping abdomen in; then slowly return to normal position, stretch and inhale deeply.

Exercise 15.

Position: Feet together, standing with hands above head.

Action: Twist the body to the left side, place the left hand on the hip, and with the body in that twisted position touch the outside of the left heel with the right hand and exhale. Return to normal position and repeat to the right side.

Remarks: Knees should be straight during the entire exercise. It may be impossible to touch the heel, but stretch as far as possible. In returning to the normal position, bring the hand out and up.

THE CORRECTION OF UNDERWEIGHT OR MALNUTRITION

Underweight is of two types; first, pathological, or that kind associated with disease, and second, physiological.

In the pathological type is found the danger sign which is apt to be an actual loss of weight though it may be inability to gain. Any loss of weight which is sudden or gradual should be investigated immediately by a competent physician.

Normal underweight, that is twenty percent below the normal weight, is more desirable than the same degree of overweight, because underweight persons as a class, live longer and are healthier than the overweight class.

CAUSES OF UNDERWEIGHT

1. Defects that are commonly found in the individual such as decayed teeth, infected tonsils, adenoids, etc.
2. Failure of following proper health habits.
3. Inability to digest and assimilate food.
4. Dietary errors such as too many sweets, irregular eating, fast eating, washing down the food with water or drink, insufficient breakfast, too long a time between meals, poor diet.
5. Hereditary tendency to a slight body build.
6. Constant worry often causes underweight. This cause should never be overlooked.
7. Late hours, lack of exercise, dissipation, and general errors in living.

If the degree of underweight is over twenty percent from the standard there may be a decided handicap causing lack of endurance, energy, etc. In order to alter this condition, five things should be done: first, immediate physical examination by a competent physician to determine that no disease is causing underweight. Second, plenty of rest and sleep is needed. Third, a correct diet should be given by the physician and the following out of that diet. This is a big factor. Spinach, lettuce, turnip are essential to good health. Four proper exercises.

It must be remembered that normal underweight itself, unless extreme, is desirable from a standpoint of longevity. If it is dangerous or the pathological type, it should be corrected immediately.

Physical education prescribes for the underweight individual the following program: A, proper diet. B, plenty of sleep. C, no smoking. D, light exercise. E, fresh air and sunshine. F, no tea or coffee. G, plenty of milk. H, nourishing food regularly. I, plenty of water. J, massage. K, daily bowel

movement. L, avoidance of fatigue and worry. M, a daily bath. N, plain food should be eaten. O, cleanliness.

It is well to rest fifteen minutes before eating and fifteen minutes or longer immediately after. Lie down, close the eyes and relax. Forget everything, especially work. This rest before eating aids the body in preparing itself for food, and resting after the meal helps the body to send more blood to the digestive tract.

For building up a definite group of muscles slow tensing exercises are given with the antagonistic muscles acting as resistance to the movement. However, it must be remembered that proper rest and diet rank on a par with exercise for the under nourished individual. Given the right dosage of exercise, stopping before the point of fatigue is reached, will develop the individual because of the better circulation, respiration, and elimination. An over dose of exercise for the individual who is under nourished will cause an actual burning up of the body tissues and a building up which is not enough to offset the loss.

Walking is an excellent exercise for it increases the respiration, whips up the circulation, and promotes better elimination. Good posture is absolutely necessary so as to give the vital organs a chance to work without interference.

Hydrotherapy is often used for its tonic effect. A vigorous, dry rub with a coarse, cold, wet towel varying from 60 degrees F and ending at 40 degrees F will increase the circulation and give a good tonic reaction. Sun baths are also recommended, especially if the person is anemic.

Before going into exercises it must be remembered that it is not good policy to work the body until a point of fatigue is reached, but rather to lightly stimulate the body so that when nourishment is taken the body will be receptive and the nourishment will be assimilated much more readily.

SPECIAL EXERCISES FOR THE CORRECTION OF UNDERWEIGHT

Exercise 1.

Position: Body erect, hands at sides.

Action: Raise arms sideways to shoulder level, raise arms over head, stretch toward ceiling, raise on toes and inhale. Return arms to side slowly and exhale.

Exercise 2.

Position: Lying on back with body well relaxed.

Action: Expand the chest, pulling it well up and letting the abdomen become hollow. Count six, then make chest small, pushing down and making abdomen large, and count two.

Remarks: Do this three to five times without breathing; then take several slow, long, deep breaths. Repeat this exercise for fifteen or twenty minutes.

Exercise 3.

Position: Hands on hips, body erect.

Action: The body should be raised first on toes, and then by bending the knees, the body should be lowered. Keep back perpendicular to the floor. Go through exercise slowly.

Exercise 4.

Position: Lying on back, knees bent, hands at sides.

Action: Slowly raise arms toward ceiling and overhead in line with body, reach in line with body and inhale. Return arms to normal position slowly

exhaling. Keep abdomen in and chest up.

Exercise 5.

Position: Body erect, hands clasped behind neck, elbows extended well back.

Action: Bend neck backward as far as possible keeping chin in. Inhale deeply throwing shoulders back. Return to normal position and exhale.

TRANSCRIBER'S NOTES

[Page 9](#): "candy is the worse" grammatical error retained.

[Page 15](#): Stray comma in [Exercise 4](#) corrected.

[Page 18](#): missing comma in [Exercise 5](#) added.

Normalized hyphenation.

*** END OF THE PROJECT GUTENBERG EBOOK CORRECTION OF
UNDERWEIGHT AND OVERWEIGHT BY EXERCISE ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the

collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with

this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official

version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, “Information about donations to the Project Gutenberg Literary Archive Foundation.”
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works

possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.

- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party

distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by

the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
