Sciences of Philadelphia; of the Academy of Sciences, Chicago; of the Linnæan Soc. of New York; Member of the International Copyright League; Member of the Anthropometrical Soc.; Member of the American Association for the Advancement of Science; Member American Society of Anatomists, etc., etc.

INDIAN TYPES OF BEAUTY.

One of the most interesting studies in the entire range of the science of ethnology is the estimate of beauty arrived at by various peoples. It really seems that the lower the race in the scale of civilization the more fixed and restricted are their ideas in this direction; that is to say, the men among the lower races can see beauty in the women of their own tribe presenting certain characteristics, as the women of the same tribe see comeliness in certain of the men, but neither of them recognize any beauty in those considered beautiful or handsome by the members of other tribes. On the other hand, the majority of the men, at least among the Indo-Europeans, can often see beauty in women of the greatest variety of other countries than their own. Perhaps one of the best proofs of this is the fact that they sometimes marry them. Even here in the United States it is not difficult to find instances, and these, too, in any plane of society we may select, where men have married women of other races and nationalities. And as a wise philosopher and observer has said, "In civilized life man is largely, but by no means exclusively, influenced in the choice of his wife by external appearance," it is fair to presume that the man in any case was attracted by what he considered to be the woman's beauty. In my own personal experience, cases have been met with where those among us have married negro women, and negro women as black as ever graced the banks of the Congo of the West Coast. Others have married Chinese women, and a friend of mine has a very talented little Japanese wife. Nor is the Englishman Rolfe the only white man that ever married an Indian woman; one of the generals in our own army married such, and there is every reason to believe that he was influenced by her beauty alone.

With respect to the lower races, Mr. Darwin has said, quoting Mr. Winwood Reade's observations upon the native Africans, that these "negroes do not like the color of our skin; they look on blue eyes with aversion, and they think our noses too long and our lips too thin." He does not think it probable that negroes would ever prefer the most beautiful European woman, on the mere grounds of physical admiration, to a good-looking negress. And again, "A man of Cochin China spoke with contempt

of the wife of the English ambassador, that she had white teeth like “a dog, and a rosy color like that of potato-flowers.”

We have seen that the Chinese dislike our white skin, and that the North Americans admire “a tawny hide.” In South America the Yuracaras, who inhabit the wooded, damp slopes of the Eastern Cordilleras, are remarkably pale-colored, as their name in their own language expresses; nevertheless they consider European women as inferior to their own.”

Who but a Hottentot man, may we ask, can admire one of their ridiculous-appearing steatopygous women? Yet the men of that race can see beauty in no other form, and the idea of a woman lacking any development in the gluteal region is, to them, absolutely loathsome. Thus we might proceed and furnish almost innumerable cases illustrating this interesting study, and comparing the various standards of taste in this particular among the many races of the world, but enough has been said to serve our purpose here. In general terms it may be stated, then, confining ourselves to the ideas of the men, that it will be found in some races that a woman with a black skin, black eyes, a broad face and flattened nose, and a head of coarse kinky hair, is admired; others see beauty in a thickset figure, a lighter skin and an enormous development of fat over the gluteals. Some admire the body rendered entirely devoid of hair; some a lithe form, others a ponderous one; while every variety of taste exists in reference to the color of the skin, the set of the eyes, and the form of every individual feature of the face. Nor do such other structures as the ears, the neck, the shoulders and the *mammæ* escape attention or consideration—for all of them and all of the forms they may assume, have not escaped the critical eye of men, and they have each contributed their share in forming his estimate of beauty. No doubt among the higher races intellectuality and the impress it makes upon the features has also had its weight. Indeed, whatever type of beauty may be chosen among women, that has its host of admirers among the men, we are pretty sure to find among the latter in some other quarter of the world, those that consider the same type as almost hideous; and these again have a very different standard of female beauty for their ideal, and see only ugliness in its opposite, the various shades of opinion among men as a whole wearing every degree of diversity, and being almost limitless in their expression.

Closely associated with this phase of our subject and quite inseparable from it, is the question of the ornamentation of the person, which is

indulged in, the world over, as much by the men as it is by the women; and, we may add, the various kinds of adornment practiced by the women of all races is everywhere to make themselves attractive to the opposite sex. Among the higher races, such as for example among the Indo-Europeans, there are a great many individual cases where women habitually delight in adorning their persons, where the just mentioned object has, of course, been entirely lost sight of; but this is by no means the case among savages low in the scale of civilization. As numerous as are the various tastes with respect to the appreciation of the beauty of women, among the races of the world, the means resorted to, to enhance that beauty, are none the less so. These means resolve themselves principally into moderate exaggerations of personal charms already possessed; into a tattooing and coloring of the face and other parts of the body; into the wearing of trinkets, jewelry, and adopting peculiar styles of dress; into removing the hair from the body entirely, or else encouraging its growth, and wearing it dressed in extravagant modes; and finally, in the production of physical deformities, and these sometimes coupled with the wearing of some mechanical contrivances associated with it.

Every traveler of any distinction, who has published an account of his explorations, whatsoever part of the world he has examined, mentions more or fewer cases under either one or several of these various heads, and so familiar to us all have the more conspicuous of them become that to repeat them here would be quite superfluous. My own studies have been limited to the Africans, far less so to the Chinese and Japanese, while to many tribes of our North American Indians I have devoted no little attention, the opportunities having been afforded by a life among them extending over a period of more than ten years.

Now as interesting and important as such a study is among our northern tribes of Indians, it can hardly be compared in either of these particulars, with similar investigations undertaken among those races of Indians found south of the 37th parallel, and west of the Rocky Mountains. Here we meet with the Navajos, the Apaches, the Mojaves, as representative field Indians; and the Zunians, the Lagunas, the Moquis, and various other remnants of nations, as the most interesting examples of the sedentary or Pueblo tribes. Among all or any of these we find much applying to which your attention has been invited in the foregoing paragraphs. In some directions they have

been slightly influenced by the steady advance of our civilization, but this applies, in so far as it concerns us here, more especially to the opportunities it has offered for the there-considered beautiful women to adorn themselves in the matter of dress and trinkets. As a study, let us select as our first example a woman from among the Navajos, and one considered by them to be a type of beauty, in their estimation. I have chosen Anserino, the wife of Pedro, the ironsmith, who, by the way, is deemed a handsome man by those people (see Fig. 1.) Both these Indians the writer knew personally for several years, and judging from what other men of the tribe have said, Anserino has the reputation of being a pretty woman among them.

It will be observed from the accompanying picture I am enabled to present of her, that she is of but medium height, of a good figure, and well developed. As among most Indian women her hands and wrists are very large, and this also applies to her feet, which cannot be seen in the illustration. She shows no tattoo-marks or mutilations anywhere upon her face or body, though in this statement must not be included the fact of the removal of all hair except that which grows so abundantly upon the head and the brows. This latter is black, rather long, and frequently dressed. It is worn parted for a short distance in the middle in front; drawn off the face, and braided up and tied behind. She wears no ornaments in her hair beyond the wrappings of her braid. Her skin is smooth and of a tawny chocolate color, and her head well-poised upon her rounded shoulders.

FIG. 1. A NAVAJO MAN AND HIS WIFE.

The face is oval, with the forehead of medium height and rather broad; the jet black eyes are well-set and she has a fine aquiline nose—the latter not exhibiting much spread to the nostrils. A rounded chin, and her weakest feature, her mouth, finish her face.

Were it not for the slight cynical expression this face wears, when its features are at rest, there is much in it we could see to admire, for it is thoroughly expressive of the Indian mother, and its various parts are by no means homely. Anserino is a much better looking woman, when engaged in an animated conversation, but we cannot get that in her picture. It will be seen that she is very fond of ornamental trinkets, and a massive chain of beads are hung about her neck, while large silver ornaments and beads are attached to the loopings at her shoulder, and to her waist-sash. Often these beads are of native turquoise, purchased from the Zunians, or obtained in exchange for Navajo blankets, from the same tribe. Now Anserino belongs to a race, wherein the women work as hard as the men; they live much out of doors, and in a climate where the summers are hot, but a few severe months of cold weather occur every winter. At night they may sleep in one of their conical “hogans” or lodges, which, as a rule, are badly ventilated and not one of the most favorable factors that in historic time has assisted to produce a race, where we may often find beautiful Indian women. They are the greatest and best of all the blanket weavers among our indigenous tribes; and some of the men work in silver and iron. The ornaments worn by Anserino, in the cut, are of Navajo manufacture. The Navajos also have their peculiar form of government; their priesthood and religious rites; their songs and their simple arts, and are wealthy in many instances in the possession of great herds of sheep. I simply mention these matters briefly in order to show the native phase of civilization to which this woman belongs. Both this civilization and tribe are old, very old, and it is interesting to see the kind of men and women it has produced. A very different and far more attractive style of beauty is seen in one of the daughters of Puebla of Laguna (Fig. 2). Tzashima, of whom we present an illustration, is an Indian beauty in every sense of the word. She has a fine, rather tall figure, and her carriage is good; as with all Indians, however, almost without exception her feet and hands are rather large, though this, not a defect in the eyes of many, in no way detracts from the peculiar beauty of her face. Her hair is as black

and as glossy as a raven's wing, and at the dances she wears it in a rich, unbridled downfall, as far as the waist behind, while in front it is cut off at the sides, so as to be on the level of the neck; it is parted in the middle in front, as seen in the illustration. The forehead is rather contracted but not too low, and surmounts a face smooth and oval to a fault. Her brows are very broad, and support fine eyebrows of a jetty blackness. A very slight obliquity, far less than we see in the Mongolian, characterizes her eyelids, and these shield a gorgeous pair of Indian eyes that, Tzashima very well knows, are the rivals of her hair in their inky tints. For an Indian, her nose is exquisite in its proportions, and might stand almost for a perfect model of this defining feature of the face. Her lips are finely arched, though the mouth is rather large, while the elegantly rounded chin, moderately prominent in its contour, fades gently away at the lower sides of the face, and as we mount upward we are struck with the high cheek bones, which, in due keeping, mar not the just balancing of the features of the face of this Pueblan beauty. In tint, her skin is of a pale mahogany, much lighter than that of the Navajo women already described. Her jacket and sash become her well, as does the barbaric silver necklace, and mass of beads she wears about her neck. Heavy silver bracelets surround her wrists, and nearly every finger has its one or more great silver rings.

FIG. 2. A BELLE OF THE LAGUNA PUEBLA.

The nature of the civilization that has produced this woman is quite different from that of which the Navajo, Anserino, was the outcome. Pueblo Indians in their civilization possess much in common; they are sedentary types, and their history extends far, far back into time. They occupy in Arizona and New Mexico, in our day, not far isolated groups, of what may be called agglomerations of rubble sandstone houses laid in mud and piled one upon another, with narrow streets among them. These remnants of a departing nation are in some instances found huddled together upon some plain, near a river's bank, as in the case of Zuni and others; or they may cap some rocky crag, a young rugged mountain, with sides precipitous, as in the case of Wolapi. Much in the crude philosophy, the mythology, and opinions of these people is wise and beautiful; and much there is, too, that is low and debasing and richly tinctured with the more degraded myths of savagery. These several Pueblan groups have their governments most peculiar, and they, too, as a people have produced their agriculturists, their warriors, their workers in silver and iron, their manufacturers of clay pottery, and weavers of blankets; and those that have followed the simpler industrial arts.

FIG. 3. THE DAUGHTER OF PALIWAHTIWA, GOVERNOR OF ZUNI.

Many of their religious rites have descended through generations from ages quite remote, ages wherein the rootlets of this civilization were nurtured in rank paganism. Some of their ideas partake strongly of the poetic, while others pass into lascivious channels. Their many and varied songs are stamped alike with both these characters.

As for the status of the women in one of these Pueblos, nowadays, suffice it to say that they grow up in the traditions of their people; are dealt with on a basis of crude justice by the men; marry and rear their children; and are the workers in the household; have little or nothing to do with the government of the tribe, but engage in some of the dances. They are the adepts at blanket weaving, and the manufacture of pottery. Briefly stated then, it is out of a civilization of this kind, that a woman, the type of which is seen in Tzashima, has been evolved.

Passing from Laguna to Zuni, a Pueblo that I have personally visited and studied, the style of women seems to change very materially, for it is difficult there to find a woman that can lay any claim to being beautiful—that is in my eyes.

To present an illustration of the style of their young women, I here offer a portrait of the daughter of Paliwahtiwa, the Governor of Zuni, several years ago (Fig. 3). This girl is just approaching womanhood, and is a very good type of what a Zunian would consider to be a young belle. It will be seen that she has a good figure, and is of a very much darker skin than Tzashima of Laguna. Her heavy head of hair is, as usual, jetty black, and she parts it upon the left side, cutting it off lateralwise on the level with the lips. It almost gives the upper part of the face the appearance of being set in a massive frame, thus adding materially to the stolid and oldish cast of her countenance. The deep black eyes, entirely devoid of any obliquity, are placed wide apart, and their lids are inclined to be thick and heavy. They are surrounded by broad eyebrows having the same glossy shades as her hair. Suboval in outline, this girl's face is completed by moderately high cheekbones only; a nose that suggests a lack of fine chiseling; and a mouth devoid of very much character.

FIG. 4. A ZUNIAN WOMAN OF ADVANCED AGE.

She wears but little jewelry, such ornament being confined to a chain of large silver beads, bearing the usual double crescent below, and worn about her neck; on the last three fingers of her left hand are some heavy silver rings. A blanket skirt coming down to the knees, and girded at the waist by a sash, with a blanket thrown over her shoulders, constitutes her principal attire. A pair of plain moccasins cover her feet, and a buckskin bandage, wrapped round and round, in spiral turns, either leg below the knee.

After the bearing of one child, Zunian women seem to part forever with all the beauty they ever possessed, and in old age they become very ugly and exceedingly masculine in their cast of countenances. They still continue at that age to wear their hair as they did in their girlhood, and even their costume is quite similar, as may be seen in the portrait I am here enabled to give of a Zunian woman that has passed the sixties.

I have never met this Indian, but I believe I am correct in stating that she is the wife of the governor, and so, mother of the Zunian girl whose description we have just given (Fig. 4).

As rich and as romantic a field as is the study of the Pueblo of Zuni for the ethnologist, the group of Moquian Pueblos are, in many particulars, even still more so. Their system of agriculture is exceedingly interesting, as are their peculiar notions of architecture, and all the habits of these remarkable people. Moreover, their strange history, as a nation, reaches far back into time, and their knowledge of it is largely traditional, all of which adds to the zest of investigation. The very country they inhabit, Arizona, is filled with romance for the student, and overflows with material for the archæologist.

Moquis have strange religious rites and ceremonies; unique dances, such as their snake dance; a curious government, and social definitions. They also stand among the most skillful of blanket weavers and pottery manufacturers; and a great many of their household utensils are made by them, as are all varieties of savage jewelry, trinkets, toys, and other objects. Comparatively little of their inner home life is as yet known to science, and in some particulars they are slowly changing before the advance guard of our own civilization. But let us turn our attention to one of the young

maidens of this tribe, and the one shown in the figure has been chosen for her savage beauty (Fig. 5).

FIG. 5. A GIRL OF MOQUI.

Prior to marriage, one of these girls, as may be seen, does up her hair in the most extraordinary manner; it is parted in the middle, combed out at the sides, and then done up over slender twigs carefully wrapped with woolen yarn, into two great whorls, one standing out upon either side of the head immediately above the ears. In front of this a lock hangs down over the temple and side of the face. This latter is a true oval, and its various features combine to make it bright and intelligent. The brows are arched, the nose well shapen, the cheekbones by no means prominent; and, indeed, upon the whole the face may be said to be quite a pretty one. They do not wear near as much jewelry as do the Navajos, while in most respects their costume agrees with the Zuni girls; but our Moqui maiden is more prone to go about barefooted, and often neglects to wear the leggins of buckskin, so characteristic of both Navajos and Zunians alike. These Moqui girls marry young, often at ten years of age, and they are monogamists. Bourke, in his wonderfully interesting work upon these people, says: "Boys and girls of advanced age roam unconcernedly through the streets of the different towns, especially of those farthest to the west, in a condition repugnant to our notions of modesty and delicacy. The traveler among the Moquis learns as much of the customs of the Garden of Eden, in respect to dress, as he is ever likely to in any other part of the world."

"The women, according to all accounts, have a powerful voice in determining their own future." And, after marriage this author has said of the Moqui matron, that "she has her faults—the faults of her sex, of our common human nature; but she makes a dutiful wife, and a fond, affectionate mother."

Passing on through Arizona to the southward and westward, from the Pueblos to the Moquis, we meet first with that fierce and brave race of field Indians, the Apaches, as they are popularly known; and afterward as we near the Californian line, the Apache-Yumas and the Apache-Mojaves, still very different kinds of Indians.

Of these three groups of Indians it has been said by Dr. W. H. Corbusier of the Army that "The Apache-Yumas, Tulkepaias or Natchons, belong to the Yuma, or Katchan family of Indians. The name Apache-Yuma was given to them by the whites, but they are known to the Indians of the Yuma family

as Tulkepaia, or in full, Tulkepaiá (sparrow?) venùna (belly) tchehwàle (spotted), and to those of the Tennai family—the so-called Apaches—as Natchon (lizards). Their country is in Arizona, north of the Gila River, between the Verde and the Colorado.”

“The Apache-Mojaves, Yavapaias, or Kohenins, also belong to the Yuma family. The whites call them Apache-Mojaves, but the Indians related to them call them Yavape, Yavapaia, or Nyavapai, and the Tennai call them Kohenin. They claim as their country the whole of the valley of the Verde River and the Black Mesa, as far north as Bill Williams’ Mountain.”^[1]

Of the others of these groups, Mr. Henry Gannet has said in the *Encyclopædia Britannica*, in 1881, that “The Apaches are a branch of the Athabasca family which has wandered far from the parent region, and now range over large parts of New Mexico and Arizona. It is a powerful, warlike tribe, at war with the whites almost continually since the latter entered the country. A large part of the tribe is on the Fort Stanton reservation in Eastern New Mexico, while another portion, under the Chief Victoria, has for a long time been devastating the border settlements of New Mexico. The Tonto-Apaches collected in large numbers on the San Carlos reservation in Arizona, where they are doing something at farming, are of Yuma stock. Besides these there are several bands of Apaches scattered about on other reservations, or roaming without a fixed habitat, swelling the total to about 10,600.”^[2]

For brevity’s sake, in the present connection, I shall designate these three groups of Indians, simply as the Apaches, the Mojaves and the Yumas. It will be remembered that several years ago we whipped the Apaches in Arizona into submission, and numbers of them were gathered together and transported on the railroad out of their country to reservations at different points in Florida and again in Alabama. These were of Geronimo’s band, spoken collectively, and it is from this ungovernable tribe that I choose one of their comeliest maidens to represent the style of beauty found among their women. The last the writer saw of this girl she was peering from the car window, as the train which rapidly conveyed those captive people to the far Eastward, momentarily stopped at Wingate, New Mexico.

The Apaches, as a general rule, both men and women, possess splendidly proportioned figures, and in the case of the type I have selected for

illustration no exception is found, although, as will be seen in her portrait, her costume precludes the possibility of our judging upon this point. This girl bears the name of Natuende in her tribe, and her garb indicates that she has not yet married—the buckskin over-jacket with its peculiar trimmings, and even the mode of doing up her not very abundant black hair, all having its meaning—a meaning which I am not as yet fully informed upon—that is, sufficiently to render an account of here. She has a smooth dark skin, which is of a deeper or darker tint in winter than it is in summer, and it is prone to change as Natuende happens to be influenced by any of the emotions common to all humanity. Her face has almost the cast of some of the prettier Chinese women, and for this the slight obliquity of her eyes are chiefly responsible. These black orbs can snap out their anger when occasion offers, or tell the tale of the opposite passion, as they no doubt have done long since, to that successful warrior who first inclosed her in his serape. Her narrow, black eyebrows are finely arched, and other features of her face inclined to be clean cut, and their expression upon the whole by no means entirely devoid of intelligence, or even attractiveness (Fig. 6).

But these Apaches, as I have already said, both men and women, are as a rule principally distinguished for their almost faultless figures, their graceful movements, and a certain elasticity of step so characteristic of the typical field Indians, so that when we do find an individual among their young women having any claim to beauty at all, it cannot fail to be enhanced by these facts.

FIG. 6. AN APACHE MAIDEN.

The men among the Mojaves, too, are generally splendid examples of muscular development, and have finely proportioned figures, whereas it is the exception to find, in this interesting tribe, any women that we would even consider to be at all good-looking. My figure presents two Mojave women; the one sitting down is Sowatcha, and the other standing at her side is Luli-pah. They are both married, as is indicated by the vertical tattoo lines upon their chins, and a glance is sufficient to satisfy us that they are very different appearing from any of the Indian women we have thus far examined. Sowatcha typifies her sex as we find them among this tribe. Her costume consists solely of a half dozen coils of beads worn as a necklace about her neck, and a calico skirt made fast at the waist by a string, and falling as far as the feet. Luli-pah, her companion, even lacks the necklace, otherwise her dress is the same (Fig. 7).

These women have heavy heads of black hair, which they bang square across just above the eyes, to points immediately in front of the temples; here it falls again down the sides of the face and head, being cut squarely off below at a level with the shoulders. Sowatcha has a broad, homely face, with very high cheek-bones, made the more conspicuous by the horizontally disposed figures she has painted upon them. The redeeming feature is the nose, which is straight and aquiline, and of just proportions; and the eyes beam with good nature and merriment, and these Mojave women are noted for dispositions that fully respond to both these characteristics.

Younger than Sowatcha, Luli-pah is far better looking, a fact that is principally due to a lack of prominence of her cheek-bones, and her regular suboval face. She has also a better mouth and nose, and is decidedly more shapely in other particulars.

Unconfined by any of the contrivances for the distortion of the figure in use by the sex of our own people, the forms of these Mojave women are from Nature's own mold, and in contour correspond to all that Nature has designed. Take Luli-pah as an example, and it will be seen that she has a fine chest and shoulders, and what is still more remarkable, her waist has a natural girth about equaling in circumference that of her chest. Judged in the light of what critical anthropometric law often demands, such a figure must be considered quite symmetrical, and in some respects should delight

the eye of the anthropologist. Her arms are decidedly well formed, the wrists and hands small, and the fingers tapering, and, as we might naturally expect, these native gifts are sustained by a harmony in outline for the remainder of her figure.

FIG. 7. MOJAVE WOMEN.

Mojavian history, both past and present, is replete with interest; their traditional myths; their religious practices and dances; the very meaning of all their various corporeal tattooings; their medical arts, manufactures, pictographs, and notions of the universe being by no means behind in this particular those of the other tribes of Indians herein enumerated. I cannot, however, dwell upon them in this place; but must pass to the consideration of those differences seen in the appearances of a woman coming from the tribe of the Yumas. Such a one is shown in an accompanying illustration, and, whatever the male representatives of these remarkable Indians may think of her claims to beauty, I am constrained to believe, that we must draw the line here. Indeed, as we gaze upon the features and costume of this Yuma squaw, it must seem strange to many of us that she is in reality an inhabitant, with many of her kind, of the same country as ourselves. Her hair is worn much in the same style as we found it among the Mojave women, but has been allowed to grow longer at the sides. She has painted it across in four horizontal bands—one near the top of the head, one an inch or more above her bangs, another on the line of the mouth, and the last one on the ends. The two latter, of course, are interrupted by the face and neck. This paint is usually made of ochre, clay, charcoal and oil, but the various paints they use, their methods of preparing them, and their reasons for using them, would form quite a long chapter of itself. This woman has also painted certain significant lines upon her chin, and cross-marks upon her cheeks. Her face seems to wear an expression of sadness, and to me has nothing attractive in it, although some of the individual features are not bad. She wears a calico dress—waist and skirt, and is ornamented by a mass of beads around her neck, a bracelet of the same surrounding the left wrist. Silver rings are upon the middle finger of either hand, one on each, and a large silver ornament is suspended from her neck by a bead chain, which allows it to hang down as far as the waist in front (Fig. 8).

FIG. 8. A YUMA SQUAW.

The Yumas never have as good looking women among them as there are to be found among the Mojaves, and in my opinion, the prettiest and most intelligent faces of all are possessed by the young unmarried girls of the Pueblos, especially those of Moqui, Laguna and Acoma.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
