CASTAWAY ***

THE CASTAWAY

By GEORGE DANZELL

**Who was this bearded castaway of space?
Some said he was Jonah. Others thought
him a long-lost, mad scientist. But
Lieutenant Brait knew him by a name
that was old when the world was young.**

**[Transcriber's Note: This etext was produced from
Planet Stories Winter 1940.**

**Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

There was an ad in the classified columns of this week's *Spaceways Weekly*. It asked for information concerning the whereabouts of one "Paul Moran, last known to have taken off from Long Island Spaceport for parts unlogged." Captain McNeally drew the notice to my attention. He said, "Look at this, Brait. Wasn't Moran the chap we picked up in the asteroids? It seems to me I remember—"

"You should," I told him. "You see his name twice every shuttle, engraved on cold steel. And you can be thankful for that. But I don't think he'll answer this ad. I don't think they'll ever hear from him."

"That," scoffed the Shipper, "is nonsense! Do you realize what this means, Brait? This ad was inserted by the Government Patent Office. There's a fortune waiting for Mr. Moran back on Earth, when he sees this—"

"A fortune waiting," I said softly, "when and if he ever sees it. But I wonder, Skipper. I wonder."

We were about three thousand miles north, west and loft of Ceres when we first sighted him. I remember that well, because I was on the Bridge, and our Sparks, Toby Frisch, had just handed me a free clearance report from the space commander of that planetoid.

I read it and chuckled. I said, "Sparks, this bit of transcription is a masterpiece. Nobody expects a radioman to be good-looking or have brains, but blue space above, man, your spelling and grammar—"

"Leave my relatives," said Sparks stiffly, "out of this. Is the message O.Q. or ain't it?"

"Yes," I told him, "with a light sprinkling of no. Sometimes I wish we had a good operator aboard the *Antigone*. Like one of those Donovan brothers, for instance."

"Them guys!" sniffed Sparks. "Too wise for their britches, both of 'em. I'm a bug-pounder, not a joke-book. If it's smart cracks you want, why don't you

buy an audio?"

It was at this point that Lt. Russ Bartlett, First Mate of our ship, who had been shooting the azimuth through the perilens, turned and waved to me excitedly.

"Brait, take a look! Quick! There's a man down below! On one of the minor asteroids!"

I said, "A joke, Bartlett? You'd better check the alignment of that perilens. That's the Man in the Moon you see."

Gunner McCoy, Bartlett's staunchest friend and admirer, looked up from the rotor port, wrinkled his leathery, space-toughed cheeks into a frown, and squirted mekel-juice at a distant goblin.

"Mebbe you better look, Mr. Brait," he said. "If Russ says there's a man there, then there's a man there."

So I looked. And to look was to act. I cut in my intercommunicating unit and bawled a stop hypo order to Chief Lester in the engine room below. Bartlett was right. There was a single, bulge-clad figure sprawled on the craggy rock of a tiny asteroid hurtling beneath us. A man who lay there quietly, did not rise, did not wave, gave no sign of noticing our approach even when I dropped the *Antigone* down toward the spatial island.

Bartlett, peering through the duplicate lens, said, "Dead, Brait. He must have cracked up. He's not moving."

But there was no wrecked spaceship anywhere around. I said, "We'll know in a few minutes." And then the Skipper burst into the bridge, startled and curious. "Something haywire, boys? Here, I'll take over."

He was a good man, Cap McNeally. A hardened spacehound, canny and wise to the ways of the void, always on deck in moments of emergency. That's why the IPS, the Corporation for which we work, had placed him in command of the *Antigone*, finest and fastest ship in the fleet.

But I calmed his rotors. "Everything O.K., sir," I told him. "We're standing by to take on a space-wrecked sailor. I think."

My guess was right. A few minutes later we threw out a grapple, space-anchored the *Aunty*, and a rescue party landed on the asteroid. They brought

back with them a sad looking specimen of the genus *Homo sapiens*. His cheeks were drained and sunken beneath a bristling, unkempt beard; his skin was blistered frightfully from long exposure to solars and cosemics; his limbs were so feeble that he couldn't walk unaided. He had to be carried.

Someone unscrewed his face-port for him. He drew a long, deep breath of the pure *Antigone* air. His wan eyes lighted dimly and he spoke in a voice that was a thin husk of sound.

"Thank you, gentlemen. I had hoped that at last I might—But you meant well, I suppose."

Which was, I thought at the time, a damned strange speech of gratitude. But I had no time to answer. For his knees suddenly buckled beneath him, his eyes closed. Had it not been for the friendly hands that supported him, he would have pitched forward on his face.

Cap McNeally snapped, "Sick-bay! Snap it up, you lubbers! The man's in bad shape. Out on his feet, cold!"

Sparks whispered, "Gosh, he looks like a corpus!" as the sailors bore our unexpected passenger away. I stared at him disgustedly.

"Corpse." I said.

"Huh?" said Sparks.

"Corpse!" I repeated. "Corpse!"

"You," suggested Sparks, "oughta take somethin' for that indigestion, Lootenant. My sister had it. It made her a physical reek."

It's against the rules for a Second Mate to punch a radioman. So I kicked him. There are limits.

That was our first meeting with the mysterious Paul Moran. We didn't know his name then, of course. We learned that several days later. After Doc Jurnegan, our medico, had coaxed, bulldozed and sulfanilamided him back off the brink of the dark and nasty.

Doc was the first to tag Moran with the adjective we all, eventually, accepted.

"It's the damndest thing," he told me, "I've ever seen. Brait, I'll swear on a pile of prescriptions that he didn't have one chance in a million of pulling through. But he's still alive!

"By rights, he should have been dead two weeks before we found him. Do you know he was on that asteroid five solid weeks? Without food. With

only one container of water. With the oxygen reserve in his tank practically exhausted!

"And his condition—" Jurnegan shook his head uncomprehendingly. "Deplorable! He was dessicated, undernourished, fouled from weeks in a bulger. Acute cyanosis alone should have killed him. But—"

I said, "The will-to-live, Doc. It's the determining factor in many a borderline case. I've heard of men with holes in their heads you could drive a stratoplane through who simply refused to—"

"That's just it," said Jurnegan. "He *wants* to die! He refused to take food. I had to feed him intravenously and force him to drink. But in spite of his physical and mental condition, he still lives. It—it's mysterious, Brait!"

So I went in to visit our strange passenger.

He wasn't a bad looking chap, now that his whiskers had been plowed. Thin, of course; hollow of cheek and eye. His skin was sallow, faintly olive; the contours of his head long and narrow, short-indexed. He was a typical Mediterranean, if what my profs taught me is right. Medium stature, small-boned, thin, tapering fingers. Crisp, oily hair, black as space.

I said, "Well, you look like a new man!"—which he did, and, "You're looking fine!" I said—which he wasn't.

He turned his head slowly, studied me with grave, questioning eyes. His voice was faint, but low and pleasing.

"You are Mr. Brait, the Second Mate? I believe I have you to thank for having rescued me?"

"That's all right," I told him.

"Why," he interrupted gently, "did you do it?"

I said, "Oh, come now! You've got to perk up! You get a little flesh on your bones and you'll feel better."

But he went on, as though not hearing my words, "It was a chance. The best chance I've had for years—a thousand years—and you took it from me. Out there I might have found peace at last. The power cannot—it *must* not—extend into the depths of space."

His voice had risen; there was a light of madness, of strange, savage intensity in his eyes. I felt the little hairs on the back of my neck pringling. I knew, now, that the man had not come unscathed through his experience. He was space crazy. Wildly, desperately so. I said, in what I hoped was a soothing voice,

"Now, take it easy, Mr.—er—Moran, isn't it?"

The ghost of a smile touched his lips, and his body became less tense. He said wearily, "Moran—yes. Or Ader. Or Cart—Oh, anything you choose. It hardly seems important any more. I've had so many, many names."

That wasn't exactly encouraging. But at least he was quieter now. And I had to know a few things about him to put in the ship's log. I asked, "How did you get on that asteroid, Moran? Were you space-wrecked? If so, what was the name of your craft? The authorities will want to know."

He answered, almost mockingly, "I was marooned."

"Marooned! But—but that's criminal! Who did it? We'll have them picked up and punished!"

"You'll do nothing of the sort. They marooned me on that asteroid because I deserved it and I respect and thank them for it!" His voice was rising again; higher, shriller. "I thank them, do you hear? I bless them, a hundred, thousand, million times. Though their effort was in vain. I was, and am, a Jonah. A Jonah, Jonah, *Jonah*!"

He sat bolt upright in bed, screaming the word defiantly. Doc Jurnegan raced in, glanced at me reproachfully and took his patient in hand. "You'd better go, Brait," he suggested.

So I left. The sweat on my forehead was damp and cold. I needed a drink.

When I told Cap McNeally of my experience, he nodded soberly.

"I know, Brait. I saw him before you did. And he acted just as loony toward me. Warned me he was a Jonah—"

"I'm not superstitious," I interrupted, "but there *are* such things as Jonahs. Men whose very presence aboard a spaceship seems to cause trouble,

dissent, disaster. You remember that Venusian blaster on the *Goddard III*? The survivors always swore he caused the crack-up."

"Moran's case," frowned the skipper, "is more than just superstition. He told me that he never wanted to see Earth again. When I told him that was too bad, that we were headed for Earth right now, he warned me solemnly that he'd do everything in his power to prevent our getting there. So what do you think of that?"

"I think," I said glumly, "he's nuts! And if we pay any attention to him, we'll all be nuts, too. Well, I've got to go, Cap. I've got to check the shield generators before we go busting into Earth's H-layer."

And I left.

Well, I was busy for the next four days on my job. It was a plenty important job, and had to be done carefully. The H-layer of the planets—the Kennelly-Heaviside layer—is a supertensioned field of force similar in composition to the corona of a star. A wide swath of ionized gas with high potential, serving as a shield against the murderous Q- and ultra-violet rays that emanate from solar bodies.

But the H-layer is a barrier as well as a shield. The first space-flight experimenters learned that, and the knowledge cost them their lives. For their craft hit the H-layer unguarded; and where had been a glistening ship, now was pitted, blackened metal; where had been life, now there was charred carbon.

Now all spaceships were equipped with shield generators. They were "generators" by courtesy only; actually they were huge condensers fed by cable lines tied at intervals to the hull plates. The theory was that as the craft plunged into and through the H-layer, these condensers would absorb the excess potential, thus allowing the ship to pass through unharmed.

And it worked swell, most of the time. Oh, every year a few ships would get theirs—would blow out in a blue wreath of coruscating flame—but for the most part the trip was safe enough. Except, of course, when a condenser

was in bad condition. Which was why I was giving ours a check and double check.

Still, I could never rid myself of a queasy moment when we hit that blanket of spark-happy ionization. Particularly when a planet was at aphelion as Earth was now. Because at such times the H-layer was more highly activated than usual.

And to tell the truth, I wasn't satisfied with the way my work was going. First I hit my thumb with a monkey-wrench. It didn't hurt the wrench, but the thumb turned pale mauve and throbbed like a sixteen-year-old kid's pulse on his first hayride.

Then I lost a brass collar off the hull-brace, and since we didn't carry a reserve stock I had to ask Chief Lester to make me one. By the time that was ready, I'd busted a .44 coil cable lock, and had to jerry-rig a substitute.

Oh, it was a headache! But I wasn't the only guy on board the *Aunty* who was having troubles. Slops raised a howl to high heaven because his stove went on the squeegee. Gunner McCoy stalked into the officer's mess one afternoon demanding what such-and-such so-and-so had stripped the gears of his pet rotor-gun. Sparks burned out three vacuum tubes in one day, breaking contact with all transmitting stations and almost causing us to crack up on a rogue asteroid. Even Cap McNeally was visited by the plague. He came wailing to me, on the bridge, that the refrigeration units in the No. 3 storage bin had broken down.

"—and we've lost a whole binfull of *clab*, Brait! Worth at least six thousand credits on Earth. The Corporation will be mad as hell."

"That's tough," I said, "but there's nothing we can do about it. It wasn't your fault."

He eyed me curiously. "Brait—" he said.

"Yes, Cap?"

"I've been wondering—do you think there could be anything in what Moran said? About him being a—a—"

"Jonah?" I'd been thinking the same thing myself. "I don't know, Skipper. I wouldn't say yes, and I wouldn't say no. But there's no doubt about it, things

have been going haywire ever since we picked him up. I'll be glad when he lifts grays off the *Aunty*."

Cap said petulantly, "Of course it's just nonsense. Bad luck doesn't hang around one man like that. It's against the law of averages. Still, I wish you'd sort of keep an eye on him for the next three days, Brait. Till we land on Earth. I've got a notion—"

"So has Earth," I grinned. "Five of 'em. Atlantic, Pacific, Indian and the two Etceteras. What's yours?"

"It might," frowned the skipper. "Be sabotage. He said he'd do everything in his power to prevent our reaching Earth. And he's up and around now."

"If you think that," I suggested, "why don't you shove him in the clink, just to make sure?"

"Can't do it. Because I've no *proof* he's responsible for these occurrences, and besides, a rescued passenger is entitled to the courtesy of the ship."

So that's how I assumed, in addition to the rest of my duties, the job of watch-dogging the mysterious Paul Moran. As Cap McNeally had said, Moran was up and about now. He had made what Doc Jurnegan claimed was the swiftest recovery in the annals of medicine. He still looked like a skeleton in search of a square meal. But there was sanity in his eyes. If not always in his speech. Like that afternoon in Sparks' radio turret, for instance.

We had been talking, Sparks and I, about space-flight. What a great thing it was. How, only in its infancy, it was already changing man's outlook, widening the borders of man's domain, creating a newer, greater universe.

"We got," Sparks said, "reason to be proud of ourselves. Gee, I was readin' in the library—"

"You," I interrupted wonderingly, "can read?"

"Comets to you, Lootenant!" sniffed Sparks. "As I was sayin' before I was so rudely ruptured, I was readin' in the library some old books from the

Twentieth Century. Just about a hundred an' fifty years old, mind you! They had the craziest ideas about what men would find on other planets, if an' when they ever got there. Flame-men, an' robots, an' all sorts of things.

"Nothin' like what we actually found. 'Course, we shouldn't laugh at 'em too much. They had no way of knowin'. We're the first people ever traveled in space."

"No!" said Moran.

Sparks said patiently, "Well, I didn't mean us here in this room. Of course we ain't. But I mean the people of our time."

"And I still say," said Moran gravely, "no! Man in all ages is a creature of conceit, self-pride, self-glorification. There was space-flight long before you lived, Sparks. A race, long dead now, from a neighbor planet."

I said gently, "You're thinking of those pyramids found on Venus and Mars, Moran? I know that's a puzzler to modern science. And I've read several theories regarding their builders. But most authorities agree that their mere presence does not necessarily imply the existence of a single race of engineers. The pyramid is a fundamental structural form. Any intelligent race—"

"Man," said Moran almost sadly. "Man the dreamer; Man the doubter. No, Lieutenant, I am not speaking of theories, now. I am speaking of tales I've heard; accounts I've read in archives long molded into dust. At least three times in the past have civilized races spanned the void. It was the dying Martian race that first achieved space-flight. They found Venus a rank and stinking jungle, but on Earth certain of them set up their new abode." He smiled quietly. "And reverted to savagery, as is always the case when civilized men, removed from the source of their culture, find themselves face to face with stark reality."

"Then it was the Moon-creatures who fled their airless world, spanned the distance to nearby earth."

I said, "That's an interesting thought, Moran. It explains the coloration of the races of man, doesn't it? I'd like to read that book you mentioned. Where can I get it?"

He shook his head sadly.

"You can't, Lt. Brait. The last copy of it was destroyed more than twelve centuries ago. Simon Magnus was the last man to read it as I remember. I loaned it to him—"

He stopped abruptly. But Sparks' eyes were plate-sized and incredulous. "—you loaned it to him?"

I spun on Sparks, angry. Jurnegan had told us to humor Moran, help him to a complete recovery. I didn't approve of this, not a little bit. I snapped, "That'll do, Sparks! Good Lord, man—What's the matter, Moran?"

For suddenly his face had paled, his eyes widened in horror, and he was backing away from me. He thrust out a trembling hand, gasped hoarsely, "Have a care, Brait! 'Thou shalt not take the name of the Lord, thy God, in vain—'!"

Then he fled; his running footsteps clattered down the ramp, and the echoes were strangely disturbing. Sparks stared after him, then made a circular motion at his temple.

"Nuts!" he said. "Crazy as a loon, Lootenant."

Oh, he was an odd one, that Moran. Those next days are somehow garbled in my mind. They were so full of incident that now, looking back upon them, I can hardly distinguish between that which actually *was*, and that which an active imagination conjured for me out of fancy.

This I do know—it was the worst trip I've ever experienced in the *Antigone* or any other ship. Something was always wrong. Lt. Russ Bartlett, whose mind is as accurate as the cogs of a computing machine, discovered to his dismay that he had made an error in calculation; that at our present rate of speed we would miss Earth entirely and plunge Sunward at a rate that would destroy us all. He discovered that by sheer accident, and just in time to scream a hasty, "Cut hypos!" to the engine room, else I wouldn't be here to tell it. Then there was that mysterious occurrence in the galley. Our cook had a pet cat, and if it weren't for his habit of feeding the pussy before he fed the crew, half of us would be stiff now. Because the cat slopped up its dinner and forthwith proceeded to give up all nine of its lives

simultaneously. Ptomaine, from faulty food tins. The first time such a thing had happened in more than forty years!

You couldn't say Moran was behind either of these near-disasters. For I was dogging his footsteps; I'll take my oath he was not involved. Physically, that is. But they say a Jonah's curse works even though the Jonah takes no actual part.

Oh, he was an odd one, that Moran. For instance, the time Sparks' selenium plate blew out. It was Moran who got permission to use the machine shop, construct a substitute out of a uranoid-steel atmochamber. We used that freak audio throughout the trip, then replaced it with a standard one when we reached Earth. Like dopes! Because two years later that screwball First Mate of the *Saturn* "invented" a uranium time-speech-trap exactly like the one Moran made us. He earned a quarter million credits from it. Imagine!

Then there was the time, as we were approaching the Lunar outpost, that our calculating machine jammed. Lieutenant Bartlett and Cap McNeally were in a dither trying to figure the approach velocity. It's a fifteen-minute job for the machine; a six-hour job for a man's brain. But Moran, who happened by, glanced casually at the declension chart, said, "Cut to forty-three at 3.05 Earth Standard, Captain. Maintain full speed for point three five parsecs, alter declension to north one, loft seven, fire fore jets twice—"

Having no better idea, McNeally did as Moran suggested. And we warped past the Moon oh-oh-oh on trajectory!

Which put us within scant hours of Earth's H-layer. And which also roused in me the realization that the mysterious Paul Moran was more than the ordinary space-sailor he pretended to be. Maybe I'm snoopy, I don't know. Anyway, I went to the radio room. I told Sparks grimly, "You and I are going to find out just who or what this Moran guy is. Send a message, Sparks. To Fred Bender, at Long Island Spaceport. Tell him to find out if there's a scientist missing who answers to this description. Five feet, seven and a half inches; a hundred and twenty-five pounds, dark hair, brown eyes —"

The relay of that description and the subsequent reply took longer than I had anticipated. That's why Sparks and I were among the last to learn of the new trouble. We didn't learn until, excited, we burst onto the bridge, confronted the skipper with our information.

"Look, Skipper!" I yelled. "No wonder 'Moran' was able to fix Sparks' radio and set your course! Do you—"

And the Captain raised haggard eyes to me.

"Brait, where have you been? I've been audioing all over the ship for you."

"In Sparks' cabin. Listen, though. Moran is—"

"I don't care," said the skipper wearily, "who he is. And in a little while, nobody else will, either. Your check-up, Mr. Brait, was a miserable failure! We are only an hour and a half out of the H-layer—and the shield generators refuse to function!"

I just stared at him for a minute. When I caught my breath, there was only enough of it for one word.

"Impossible!"

"Impossible, maybe," acknowledged the First Mate, "but unfortunately, Don, the Captain's right. Three lead-in cables are broken, the stripping is off the condenser."

"But—but everything was in perfect order an hour ago! I don't understand! Yes, I do! Moran! He said he'd destroy us all if he got a chance! Skipper, there's the answer. He's done it. The madman—"

Then there was a mirthful chuckle in the doorway, and Moran was standing there looking at us, his thin lips wide in a smile.

"You're right, Brait. I *did* do it. But I'm not a madman. I'm a happy man. The happiest man who ever lived!" His eyes lighted triumphantly; he stretched his arms above his head in a great, yearning gesture. "Soon will come freedom! The great, everlasting freedom of death."

"Get him!" said the Skipper succinctly. Gunner McCoy lumbered forward, his long, hairy arms encircled Moran's body. The Skipper pawed his graying thatch. "This is no time for reproaches, Mr. Brait. I told you to guard this

man; for some reason you failed to do so. But now our problem is to repair the damage he has done. Or else—"

His pause was significant. But Moran's quiet, mocking laughter persisted.

"It is useless, Captain. Not in hours, no, not in weeks, will you repair the damage. Don't you see—" There was a feverish light in his eyes, a shuddering vibrancy in his voice. "Don't you see that I bring you the greatest of all boons known to man?"

"Death! Wonderful, blissful death! Death that I have sought so long ... so hopelessly."

Those were the last words I heard for some time. I dashed from the room, Bartlett, Sparks and McCoy at my heels. We picked up the Chief Engineer. We covered the *Antigone* from stern to stern. And our worst fears were realized. It was no use. The damage Moran had done was irreparable.

Russ Bartlett said, "There's only one way out. We mustn't try to penetrate the Heaviside layer. We must shift trajectory, pass Earth and remain in space until we get the shield generator operating again."

And Chief Lester said somberly, "Have you forgotten the trajectory you planned, Lieutenant Bartlett?"

"The trajectory?"

"I thought it was unusual," rumbled the engineer, "when you called it down to me. It's paper-thin, balanced on a knife-edge between counter-gravitations. If we try to shift course now, we'll tear the ship into shreds!"

I knew, now, why Moran had come up with such a ready answer when the computer failed. He had planned well. He had deliberately forced us into this trajectory from which there was no escape.

Back on the bridge, we found Captain McNeally pacing the deck like a caged cat. Moran was silent, watchful intent, with an unholy gleam of justification lighting his curious eyes. The skipper looked up hopefully as we entered.

"Well, gentlemen?"

Bartlett shook his head.

McNeally was silent for a long moment. His glance roved the smart, glistening interior of the *Antigone's* control room. I knew exactly what he was thinking. It was too bad that this smooth perfection, this finest ship built by master craftsmen, should become a brief, winking flame in the atmospheric borders of Earth.

And it was tough that we must all go out together like this. Through no fault of our own. Through the machinations of a space-mad castaway. He turned to me. "Lieutenant Brait, you and Sparks will go to the radio turret. Send a complete report to the Earth authorities. Tell them—" He gulped. "Tell them why the—the *Antigone* will not come in."

I said, "Aye, aye, sir!" mechanically, and started for the door. But Sparks stopped me.

"Ain't you gonna tell 'em what we learned?"

"Eh?"

"About *him*?"

He jerked his head toward 'Moran'.

"It doesn't really make any difference now," I said. "But—" I suppose my voice was scornful. There was scorn and bitterness in my heart. "They might as well know that the man who has condemned us all to death is—or was—one of Earth's greatest scientists. Had he not become a raving lunatic his genius could have stemmed this disaster."

McNeally said, "What's that, Lieutenant? What do you mean?"

"I mean this man's name is not 'Paul Moran'—"

"Names," murmured Moran gently. "What difference does a name make? When one has had thousands of names."

"His name," I continued, "is John Cartaphilus!"

Bartlett said, "Cartaphilus!" In a leap he was at our strange guest's side, his voice eager. "Then he will—he *must*—help us!"

"Cartaphilus, listen to me! Of all men, only you have the genius to devise some way of escaping this peril! You've been mad, sir! Insane from your privations! But now I beg that you cast aside this madness, come to our rescue!"

Moran—or Cartaphilus—brushed his hand aside. A dreamy look was in his eyes.

"Death at last!" he whispered. "Oh, sweet boon of mankind—death! I who have suffered so long, waited such a long time—"

"Can't you hear me, man? Snap out of it! Time is growing short. In a half hour, maybe less, we'll nose into the H-layer. And then—Please, sir!"

But there was no reply. Captain McNeally looked at me uncertainly. "Are you sure, Brait?"

"Positive. I forwarded a description to Bender at L.I. He said Cartaphilus has been missing for a year and a half. He fled Earth because of a scandal. It seems—"

"Never mind that now." McNeally confronted the insane scientist. "Mr. Cartaphilus, you must help us out of this jam! We're not thinking only of ourselves, but of the mothers and children waiting for us on Earth. And of the future of space-travel. If the *Antigone*, the finest ship ever built, blows out in the H-layer, it will strike a heavy blow at all astronavigation. Help us, sir! For Heaven's sake—"

Cartaphilus spoke suddenly, sharply.

"Don't say that!"

"Only Heaven can save us now," said McNeally simply, "if you won't. It's our only hope. May the Lord help us if you—"

"Don't!" The strange, thin man screamed the word. Suddenly he buried his face in his hands, and his words were an incoherent babble of torment.

"Don't you see what you're doing? Man, have you no pity?"

He raised wide, tortured eyes. "The endlessness of time—" he whispered. "But I thought that, free of Earth, lost in the depths of space, I might at last find peace. But now you call upon me to save you in His name.

"I won't do it! I won't! The power cannot force me, here in the void. Two thousand years.... No! No!"

McNeally stepped back, torn between dread and doubt. He shook his head at us. "It's no use. He's completely mad."

Then Russ Bartlett cried, "Wait! *Listen!*"

For Cartaphilus, his face worn and aged, had bowed his head as though surrendering to forces greater than his will-to-die. And he was droning in a drab, lack-lustre voice, "Tell the engineer to reverse the polarity of the alternate hypatomic motors. Transmit the counter electromotive force helically through the forward coils. Use full power. Keep all motors running at top speed. Cut out the intercommunicating and lighting systems; there must be no D.C. current in operation anywhere on the ship. The cross-currents will—"

Chief Engineer Lester's face was a masque of blank dismay. He husked, "A hysteresis bloc! It might work. Nobody ever thought of it before."

"What do you mean?" That was Cap McNeally.

"His suggestion. Heterodyning the web-coils, so we'll counter the H-layer radiation with an alternating current of our own. It's just about one chance in a million!"

"Then take that chance!" cried the skipper. "Try it! Do as he says. And, for God's sake, man, *hurry!*"

Cartaphilus, his eyes drained of all expression, rose sluggishly. Once more he spoke, faintly. "It will work," he said. "It will work, and I have failed again. And all because I would not let Him rest...."

His voice broke in a great, wrenching sob. Then he lurched from the control room like a broken thing.

I never saw him again. No one aboard the *Antigone* ever saw him again. For the next hour we were in a turmoil, rearranging the electrical units of the ship as Cartaphilus had told us. We finished our task just in time; scant seconds after we had thrown on the power we nosed into the web-like field of force which is the H-layer.

It was a breathless moment. Despite our efforts, there was not a man of us but expected a brief, brilliant instant of horror—then oblivion. But we were as wrong as Cartaphilus had been right. There was a jolt as our forcefield met that of Earth's shield; the permalloy hull of the ship sang and hummed and glowed cherry-red under the impact of that terrific electromotive strain, but we slipped through the barrier with greater ease than ever had any ship using the old style shield generators.

In our jubilation we quite forgot the mad scientist whose strange, last-minute change of mind had saved our lives. We landed. And sometime between the moment of landing and the moment when we remembered our passenger, he fled. Disappeared completely from the ship and from our lives.

Cap McNeally was nothing if not a square-shooter. He refused to take credit for the invention that had brought us through the H-layer. The patent rights were taken out in the name of our deranged passenger. The "Moran H-penetrant" it is called. All spaceships used it until just recently; until Cap Hawkins of the *Andromeda* and the Venusian scientist, Jar Farges, discovered Ampies could be used as H-layer shields.

But afterward, Cap McNeally came to me, wondering.

"Why should he have wanted to die, Brait? I can't understand it. A man like John Cartaphilus; wealthy, intelligent, respected—was he really mad, do you think?"

I hesitated. I, too, had been wondering about that. I had gone so far as to look up the life history of the mad scientist. I had found several curious things. No man knew when, or where, John Cartaphilus had been born. All agreed that he was "remarkably youthful" in appearance. It was rumored that he had outlived a wife married in youth; that she had been an elderly woman when she died.

I said, "I told you there had been a scandal in his life, recently, Skipper. It concerned a friend of his, a worker in one of his shops.

"Cartaphilus was, and is, a genius, but he has a reputation for driving his men too hard. They say that on this occasion, seeking the answer to some problem that evaded him, he forced this assistant to labor for weeks, begrudging him even a few hours sleep each night.

"On the eve of the solution of the problem, this worker came to him, nervous, ragged, exhausted, begging for a brief respite. Claiming he was sick with overwork and fatigue. But John Cartaphilus insisted, impatiently, there was no time for rest. He ordered the man to get about his work.

"The job was completed. But the friend died. The doctors said it was a pure case of exhaustion. When he heard this, Cartaphilus' brain snapped. He blamed himself for the man's death, fled Earth. He became—or so we may believe—the wandering spaceman we found in the asteroids."

Cap McNeally frowned.

"Do you believe that story, Brait?"

I started to say no. I started to tell the skipper something else I had discovered while probing into the life history of John Cartaphilus. Something that, to my mind at least, more fully explained the oddness of our erstwhile passenger.

It was an old legend I had run across. The queer story of a man with many names ("I have had so many names," Moran had said) who wandered endlessly about the Earth, perhaps the universe now, simply because he had not let another rest for a moment on his doorsill.

Sometimes this man had been known as Cartaphilus. He had also been known as Juan Espera en Dios, as Ahasverus, and as Butta Deus. The Parisian gazette, "Turkish Spy," had in 1644 A.D. reported his presence in that city traveling under the name of "Paul Marrane." But men in general knew him by a more descriptive name. The Wandering Jew. The Eternal Jew....

But I did not tell Cap McNeally this. After all, it was a fanciful thought. And surely Moran—or Marrane, or Cartaphilus—was mad when he

claimed to have met and talked with Simon Magnus twelve hundred years ago?

Anyway, when we saw that ad in the classified columns of this week's *Spaceways Weekly*, and McNeally claimed Moran would return to claim his reward, it raised again the question in my mind.

Will he return? Or will he find, at last, whatever peace awaits him out there? In the vast emptiness of space, where the power cannot—must not—extend? I wonder....

*** END OF THE PROJECT GUTENBERG EBOOK THE CASTAWAY

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project GutenbergTM License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
