*** START OF THE PROJECT GUTENBERG EBOOK THE WOMAN
OBSESSION ***

The Woman Obsession

By William Campbell Gault

**Surely Collins was an idiot. He
kept dreaming of women in a
world that knew nothing of love's
delight. But where there's life—**

**[Transcriber's Note: This etext was produced from
Fantastic Universe September 1954.
Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

Few writers possess William Campbell Gault's sensitive capacity for balancing delicacy with daring in themes which gracefully skirt the edge of the outrageous, and open up entire new worlds of speculation which future historians will most assuredly encounter in their travels time and time again. Seldom has he written a story more imaginatively audacious than this.

It was on the Mars-Jupiter run, a trip flea-bitten with asteroids, and needing a Level-One navigator. In all the galaxy, there were three Level-One navigators, and Horse Collins was one, and he was ours. By 'ours,' I mean *Gideon Shipping, Inc.* Twelve years I've piloted for them, and I think they're the best in the business.

Johnny "Horse" Collins was a typical space bum in one way. He was restless, he wanted to see what was out there. But he lacked discipline. And his thinking was earth-bound conventional. He'd even played football at college, and that's where he'd picked up the 'Horse' nickname. He'd been an All-Earth fullback, and why he'd gone on to navigator's school from there I'm not competent to judge. A man who can make All-Earth in a game dominated by robots is bound to have some body. No one but a sportswriter would suspect he might also have a mind.

Horse had a fine mind for his business; otherwise he was, as I've said, rather conventional, like a fullback. He liked women, for one thing.

"Why?" I asked him one day. "Their primary function is handled better by the Massago-Lust. If they have any secondary functions, I've forgotten them."

"You never knew any of their functions, except through books," Horse answered. "Second-hand living."

I stared at him. If traveling among the stars wasn't living, then what the hell was? I asked him that pointblank.

"It's nothing I could explain to you," he said. "You're space-happy."

"Why are you here, Horse?" I asked him quietly.

"Because I thought there'd be adventure, out here. Strange lands and strange people."

"Jupiter isn't a *strange* land. It's simply a land of ice and lava, a grotesque, fascinating, frightening...."

"No people," Horse interrupted. "And how about Mars?"

"Mars is a disappointment, sure. I was talking about Jupiter, and you say 'no people.' Earth is full of people. Too full. That's why we have the Massago-Lust."

"And the women rationed to the scientists. Who do they think they are?"

"They're the people who cut our shackles, fullback. They're the people who refused to be earth-bound."

"Mmm-hmm. And they're the cuties who could just as well maintain the population quota with artificial insemination, too. But do they? Come to think of it, why don't they?"

"You'd better check your orbit log," I told him. "We're getting into asteroid alley."

"Yes, Chief. Yes, Boss. Yes, *Sir!*" He pulled out the flats, and looked through the electronic scanner. Then he picked up a stylus and adjusted it to the graph arm, and took another look through the scanner.

He seemed to be frozen there. "Mi Gawd—"

"What's happened? You damned fullback, if you've lost our line to—"

He waved, stiff-armed. "Shut up. We're right on orbit. I just saw a woman. And *what* a woman. She was waving to me!"

In all the galaxy there had been three Level-One navigators. There were now two.

"Naturally," I said patiently. "You would. That would be *your* mirage—a woman."

"I saw a woman," Horse insisted evenly, "on—" He was consulting his flats, frowning. "On—Well, I'll be damned."

"You also saw a planetoid that doesn't exist. I'll name it for you, Horse's Asteroid. A fitting name."

Collins didn't answer, right away. He was flipping levers, connecting the scanner to the chart, and also to the controls. Then he said, "Okay, Skipper. We're under mechanical control. Relax, if you know how."

I locked the board and stretched my neck. Horse lighted a cigarette, a vice I deny myself. His eyes looked—bemused.

I said, "You saw a woman where there could be no women. I'll have to enter it in the log, Johnny."

"Sure," he said. He took a deep and weary breath. "You know what the boys call you?"

"Slide Rule Sam," I answered. "I'm proud of it."

"Why? A robot could handle your job."

"For a man who made his reputation in a robot's game, you're talking rather haughtily, fullback. If a robot *could* handle my job, a robot would be giving you orders right now. Gideon Shipping is cost-conscious enough for that, despite the wages they pay."

"Wages," Johnny said. "Is that all a man works for, wages?"

"At our level, that's all a man works for," I assured him. "You're talking like a Capitalist, Horse." I watched for a reaction.

He started to say something, then shook his head. "You'd probably enter that in the log, too, if I said it." He put out his cigarette thoughtfully. "Sam, on the way back I want you to look through that scanner. If we delay our trip back an hour, the orbits of the other planetoids will be about right, and that one should be, too. Then you can enter the fact that we *both* saw it. You think I'm space-simple. But you won't be able to doubt what you'll see with your own eyes."

I said evenly, "I've traveled this line for twelve years and I've had navigators before who saw mirages. You're just not emotionally stable, Horse."

"I'm not punchy, either," Horse said. "You can have my resignation right now, Sam."

"Resignation? That's a word I've forgotten, Horse. You'll be re-assigned when we return to base."

He lighted another cigarette and went back to his desk. And I wondered who we'd get to take his place. The schools hadn't had a Level-One navigator in six years and the only two graduates who met that specification were very happy on other runs. Maybe, he wasn't completely gone.... Maybe...? But that wasn't scientific thinking.

Horse said, "Ever read about the old trains on Earth, Sam?"

"Second-hand living," I quoted him. "That's what you called reading."

"All right. It's better than not living at all. Anyway, in those old days, people along the tracks used to wave at the passengers as the trains roared by, for no reason I can think of. At any rate, for no *scientific* reason. What happened to me was pretty much like that. Sort of romantic, wasn't it?"

"An earth-bound iron sluggard moving through cow pastures. Is that romantic to a man who's seen Jupiter?"

"No, I guess not," Horse said quietly. "Only to me, I guess."

I turned on the video-viewer above the board, and as the glow brightened, I could see the robot quarters and Van Elling playing bridge with three of our brightest automatons. Van's a great boy to buck impossible odds, but otherwise rational. He's our robot master.

Van looked up from the game at the signal light, and smiled, "About time, Skipper?"

"You'd have to ask the navigator."

Van's eyes shifted. "What's he sulking about?"

Horse waved. "How you coming with the master-minds?"

"I'm winning. I've found a system." He looked back at me. "Skipper, there should be two robot masters on this run, and you know it."

Horse laughed. "A partner, eh, Van?"

"Why not? Psychic bids, that's what throws them off. But it throws off my partner, too, and I don't make what I should. How about it, Sam?"

I said, "You wanted a report from the navigator. I'm holding the screen open for that."

Van Elling's face stiffened, and his eyes went to Horse's. Collins said, "Seven hours and twelve minutes." I turned off the viewer.

Silence in the cabin and I was uncomfortable. Damn it, there had to be discipline on board, and I was in command.

Horse said quietly, "Are you a natural son-of-a-broomstick, or do you work at it?"

Rage flamed in me, and I waited until it had languished. Then I said calmly, "I'm your superior, and I've been too lenient. I'm not strong enough to fight you but I'm powerful enough to destroy you. I intend to. Look forward to a long career in the mines of Mars, fullback."

"Even you, with all your connections, couldn't rig that," Horse said lightly. "You can ground me, and hope I get court-martialed for insubordination. I've a few connections, too."

Silence, again. I went over to his scanner and checked our co-ordinates. I brought out the log and entered his mirage and his insubordination. Why quibble? Let the record speak.

Europa loomed below us, now, and Jupiter dead ahead. The oxygenator sent its draft along the back of my neck, and I shifted in my seat, remembering his question about artificial insemination. That in itself could be considered subversive. Not that I hadn't thought it, and millions of others, but he'd *voiced* it.

The scientists had the money, the power, the commerce. And hadn't they earned it? Hadn't they made all this quite possible?

We hadn't said a word right up to the time I put the forward blasters on for the Jupiter mooring.

The buzzer from the rear hatch was buzzing now, and I threw the switch to open it. Van Elling came in with his duryllium helmet on, beating his hands

on his thighs.

Collins helped him with the helmet, and Van said, "Cold, cold, cold, cold, cold. Chief, we might lose a couple minutes on the loading. Those boys aren't what they were when we bought them."

Through the oxygenator, I could smell ammonia and burning elgeron. I went to the viewer room and switched to the landing ramp. The robots were moving down the ramp at a pace which might have been slower than usual, but didn't seem so to me.

Behind me, I could hear Van Elling and Horse Collins whispering. Mutiny?

I watched the first of the robots go into the big hole that led to the elgeron deposits, and came back to see Van at the duplicate robot control board we had to use at the end of a trip. Van was looking worried, but it could have been feigned.

"A few minutes?" I asked. "How many is a few?"

"I said 'a couple' only, Chief, but I think that was a bad guess. It might be an hour."

Horse was smiling. Van kept his face averted.

"Delayed an hour?" I asked, and then it came to me. Horse wanted another look at his asteroid. That's why they'd whispered.

"I'm afraid," I said, "an hour's delay would be too long, and I hope neither of you think I'm being fooled by your cute little tricks. This isn't the time for trickery."

"Sorry, Chief," Van said. "I'm doing the best I can."

He kept his attention on the control board and Horse bent over his charts. They ignored me. Well, I had a lot of strings to pull. They'd regret this day, both of them.

The smell of molten elgeron was heavy now, and the bite of ammonia. The robots were coming back up the ramp, carrying enormous chunks of the solidified, translucent stuff. On Mars, it would be crushed in the huge, automatic grinders and mixed with the stygium of that planet, and sent in radiation-proof ships to the laboratories of Earth.

One robot seemed to falter for a second, and I glanced quickly back toward the cabin where I could just see Van at the control board. I couldn't tell by his manipulation of the toggles whether the robot's falter was deliberate or not, but I saw him glance at Collins and smile.

Rage simmered in me, pulsated, and I stood there for seconds in the viewing room, waiting for it to recede. The whole line of robots was stationary now and the one who'd faltered was leaning over against the guard rail of the ramp.

I came into the cabin and said, "You'd better put on your suit, Van. There's a robot out there holding up the line."

Jupiter was no place to venture without proper radiation shielding, and our space suits weren't the best in the world for radiation protection.

He said, "I think I can handle it from here, Chief."

Horse said quickly, "I'll go out and see what I can do. No sense in taking a chance on jamming the whole line, Van." Collins glanced at me for confirmation.

I shrugged. "Suit yourself. But remember—I didn't order you out."

"Unless you'd like to go, Chief," Horse said meaningfully.

I shook my head. I flushed, too, though there wasn't any reason for it. Unnecessary risks are not a part of a pilot's job.

Horse murmured something that sounded like "gutless" and I said sharply, "Would you repeat that?"

His gaze met mine levelly. "I didn't say a word, Chief. I'll get my suit on."

In a little while, I saw him out there on the ramp putting on a great show of trying to adjust the robot's delemeter, which is what gives them their uncanny balance.

After about twenty minutes, he waved and stood to one side, and Van Elling sent the impulse through. The robot staggered, and then came back to an upright position. Collins stood at the broad part of the ramp as the line began to move again.

Discipline begins with self-discipline, I told myself. No man ever achieved anything without self-control.

The more complex robots stayed in the storeroom of the ship, checking the tonnage, and classifying the elgeron according to quality. These were just the haulers, on the ramp, and Van controlled them completely from his board.

His word regarding their breakdown would be the accepted word with the bosses. I would have a difficult job getting anything on Van Elling.

But Horse Collins? Horse had seen a woman on an asteroid that didn't exist. Horse had been guilty of insubordination. He would need more friends than he had to wriggle out from under those charges.

There was another breakdown before we were finished loading, and they'd timed it well. We blasted off an hour later than usual.

Van went back to the robot quarters and Horse to his charts, and I had some more entries for the log. I'm not a talkative man, but Horse was. The silence in the cabin must have bothered him.

He said, "Chief, we could start over. We could forget the nasty things that have been said."

"I have forgotten them," I said. "Once I enter something in the log, I forget it."

"All that happened you entered in the log?"

"All. Including your earlier request to delay our return an hour." I paused. "The disciplinary board can read whatever inferences they want from that, in the light of what happened later."

"I see. The report would put Van in the soup, too, Chief."

"I suppose."

"That'll lose you *two* good men."

"Will it?"

Silence for over an hour, and then Horse said, "Before the company filled you full of that discipline garbage, were you human, Sam? Did you dream of a better world, a normal world, a world with women?"

"Some things we outgrow," I said. "I'm doing exactly what I want to do."

Horse sighed, and the silence grew again.

I was dozing the next time he opened his mouth. "It's not necessary to stick it to Van, too, is it, Chief?"

"I record," I said. "I don't judge."

"It wasn't necessary to record my request. Don't give me that, Chief."

"In my opinion, it was necessary."

"Okay. Would you check my co-ordinates?"

He'd caught me in a nap, and I didn't think of the time. It was a routine request in a routine voice and I rose without thinking and went over to the scanner.

I put my eye to the eye-piece and saw *her*. A dark girl, without clothes, more beautifully shaped than any picture I'd ever carried as an adolescent. And she was waving!

A trembling possessed me, but I fought it. I looked up instantly at Horse, and I said, "You've increased the magnification about three million times beyond the requirements of the co-ordinate check. How do you expect me to substantiate your findings?"

Horse was smiling. "I know, I know. What'd you see, Chief?"

"Nothing. There was nothing to see. This will be recorded, too, Collins."

Collins was still smiling. "You'll record there was nothing to see?"

"I certainly will, and that you had the electronic scanner up to its full magnification for no apparent reason. That should finish you, Collins."

"Chief, if you saw nothing through that scanner, you're already finished. I don't want to stay in a service that would make something like you out of me."

"You haven't the stuff to become something like me," I told him, and went back to my chair.

"The service," he said gently, "is looking for planets or planetoids that will support our kind of life. And you've just seen our kind of life. And you're

not going to report it. That's going to be your cross. Because, Slide Rule, I'm not going to report it, either. That's my secret, back there. That's *mine*."

"Whatever it was you think you saw, you'll never see it again, Collins," I told him. "This is the only line from Mars to Jupiter and you're going to be out of work once we're back to base."

"You think," he said. "You hope. You pray."

I wonder what he thought I'd been doing in my twelve years with Gideon? I wonder if he thought I was so stupid I wouldn't have a few lines to the right people in twelve years? Did he think only the noisy ones could play this political game?

Once out of asteroid alley, I dozed. And dozing, dreamed of that black haired temptress waving, dreamed of her like some pimply-faced young idiot. Gad, if a man couldn't discipline himself after *my* training....

I awakened to find Horse nodding over his board.

I said sharply, "I'm ready to eat, Collins."

His head jerked upright, and he stared at me a few seconds. Then he stood up and went out to the small galley.

A stinking fullback trying to play the political game with Slide Rule Sam. How these athletes loved to over-rate themselves.

He brought my food, and then went into the galley to eat his.

When he came out, he said, "I'd like to nap, if you're going to be awake, Chief."

"I'll be awake for two hours. You'd better sleep fast."

"You're the boss," he said, which was his admission.

I gave him a bad time the rest of the trip and got not a single complaint out of him. And at Mars, we put on our suits and went ashore, and I entered my complaints with the subsidiary board at the company headquarters there.

They got us transportation to Earth next morning, and both Van and Horse were held for trial the following week.

That gave me time, and I pulled every string I knew in the four days before the trial. Horse was almost irreplaceable; Van could be replaced in five minutes.

But there was no need to worry about Collins. He didn't fight. He pulled no strings I knew of, and when he went up in front of the board, he pleaded space insanity.

He'd seen a mirage, he'd insisted on my checking it, he'd called me names and he took the full responsibility for the robot breakdown. Trying to save Van, I suppose, with that last.

Horse had a company lawyer, and he tried to establish the line that perhaps there had been life on the asteroid and that a discovery of that importance over-shadowed the charges of insubordination and temporary space insanity.

I got on the stand and swore there had been no sign of life and not even an asteroid where Horse had fixed the scanner. I was safe enough, I knew. There were only a few ships on the run, and no other with a scanner of our power.

I hadn't wasted the four days. For three years, I'd been studying navigation in my spare time. I wasn't really qualified for the Mars-Jupiter run, but I had men high in the company who thought I was. I'd get by until I learned.

I didn't want anyone else on *that* scanner.

Van Elling was fired without prejudice, but I knew he'd have some time trying to get back into the service after the publicity of the trial.

Collins was held over for a higher review of his case on the possibility that his background was subversive. I was sure they'd find some capitalistic group he'd belonged to briefly in college.

I was back on Mars when I got word through the new pilot that Horse had never been brought before the higher tribunal. Somewhere, Van had managed to buy an obsolete, atomic two seater, and Horse had broken out of Embardo. The two of them had been seen by one of the Gideon ships a few million miles beyond Galaxy E.

Typical fullback thinking—that—taking off into space. If he'd wanted to hide, Earth was the place for it. Where could he get to with a clunk of a two

seater? He was a navigator, granted. But he'd have to have something worthwhile to navigate.

Both the new pilot and the new robot master were young and properly respectful, space-dedicated boys, and my life, I knew, was going to be pleasant. And once I had mastered navigation, I was going to be damned near irreplaceable.

As we bored through space on the old familiar run, the thought came to me that probably Horse would head for his asteroid, and if he should make it, wouldn't that be something? Two men and one girl. I wonder how long Van would live.

Van was no fullback, nor a reasonably accurate facsimile thereof. Unless he had a weapon, he'd be no match for Horse.

The image of the girl came back to haunt me. I knew there'd been an expedition or two lost in asteroid alley on early exploratory trips, but they hadn't carried women. And her face was familiar.

I went to a library and thumbed through some old newsprints. Of course! The photograph fairly leapt at me. Elsbeth Parrish, the science hater, the woman who'd gone on a lecture tour ridiculing the powers that be, making converts first in the women's schools and then in the co-educational institutions. The 'Live for Love' girl, Elsbeth Parrish.

Naturally the government had cracked down and tried to deport her to Mars. She'd disappeared a week before the trial, and one of those old Interplan Rocket Sedans had disappeared with her. The government had given her up as lost in space.

I could understand now why Horse had made the confession at his trial and why he'd been so submissive on the return trip from Jupiter. He'd tricked me into swearing there was no life on the asteroid. And now he could safely head there, because I was the one man alive besides him and Van Elling who knew there *was* life there, and my future depended on my not revealing it.

But could he make it in an atomic two seater? And two men for one woman—if he did make it? I had to know the answer.

When we came into asteroid alley, I had the scanner's magnification on at full strength, and I also had the automatic scanning control adjusted to the orbits I wanted. Even Horse Collins couldn't have pin-pointed it any better.

I wish I'd missed it. For both of them were there, Horse and Van, looking up my way and smiling, too. The slobs. There wasn't *one* woman there. There were three, all beautiful.

Two men and *three* women.

The dirty, science-hating sons.

*** END OF THE PROJECT GUTENBERG EBOOK THE WOMAN
OBSESSION ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project GutenbergTM License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
