Introduction Kuwait

Background:

Britain oversaw foreign relations and defense for the ruling Kuwaiti AL-SABAH dynasty from 1899 until independence in 1961. Kuwait was attacked and overrun by Iraq on 2 August 1990. Following several weeks of aerial bombardment, a US-led, UN coalition began a ground assault on 23 February 1991 that liberated Kuwait in four days. Kuwait spent more than \$5 billion to repair oil infrastructure damaged during 1990-91.

Economy Kuwait

Economy - overview:

Kuwait is a small, rich, relatively open economy with proved crude oil reserves of about 96 billion barrels - 10% of world reserves. Petroleum accounts for nearly half of GDP, 95% of export revenues, and 80% of government income. Kuwait's climate limits agricultural development. Consequently, with the exception of fish, it depends almost wholly on food imports. About 75% of potable water must be distilled or imported. Kuwait continues its discussions with foreign oil companies to develop fields in the northern part of the country.

Introduction Kyrgyzstan

Background:

A Central Asian country of incredible natural beauty and proud nomadic traditions, Kyrgyzstan was annexed by Russia in 1864; it achieved independence from the Soviet Union in 1991. Nation-wide demonstrations in the spring of 2005 resulted in the ouster of President Askar AKAYEV, who had run the country since 1990. Subsequent presidential elections in July of 2005 were won overwhelmingly by former prime minister Kurmanbek BAKIYEV. Current concerns include: privatization of state-owned enterprises, expansion of democracy and political freedoms, interethnic relations, and combating terrorism.

Economy Kyrgyzstan

Economy - overview:

Kyrgyzstan is a poor, mountainous country with a predominantly agricultural economy. Cotton, tobacco, wool, and meat are the main agricultural products, although only tobacco and cotton are exported in any quantity. Industrial exports include gold, mercury, uranium, and natural gas and electricity. Kyrgyzstan has been fairly progressive in carrying out market reforms, such as an improved regulatory system and land reform. Kyrgyzstan was the first CIS

country to be accepted into the World Trade Organization. With fits and starts, inflation has been lowered to an estimated 7% in 2001, 2.1% in 2002, 4% in 2003, and 3.2% in 2004. Much of the government's stock in enterprises has been sold. Drops in production had been severe after the breakup of the Soviet Union in December 1991, but by mid-1995 production began to recover and exports began to increase. Kyrgyzstan has distinguished itself by adopting relatively liberal economic policies. The drop in output at the Kumtor gold mine sparked a 0.5% decline in GDP in 2002, but GDP growth bounced back to 6% in 2003 and 2004. The government has made steady strides in controlling its substantial fiscal deficit and aims to reduce the deficit to 3% of GDP in 2004. The government and the international financial institutions have been engaged in a comprehensive medium-term poverty reduction and economic growth strategy. Further restructuring of domestic industry and success in attracting foreign investment are keys to future growth.

Introduction Laos

Background:

Laos was under the control of Siam (Thailand) from the late 18th century until the late 19th century when it became part of French Indochina. The Franco-Siamese Treaty of 1907 defined the current Lao border with Thailand. In 1975, the Communist Pathet Lao took control of the government, ending a six-century-old monarchy. Initial closer ties to Vietnam and socialization were replaced with a gradual return to private enterprise, a liberalization of foreign investment laws, and the admission into ASEAN in 1997.

Economy Laos

Economy - overview:

The government of Laos - one of the few remaining official Communist states - began decentralizing control and encouraging private enterprise in 1986. The results, starting from an extremely low base, were striking - growth averaged 6% in 1988-2004 except during the short-lived drop caused by the Asian financial crisis

beginning in 1997. Despite this high growth rate, Laos remains a country with a primitive infrastructure; it has no railroads, a rudimentary road system, and limited external and internal telecommunications. The government has sponsored major improvements in the road system. Electricity is available in only a few urban areas. Subsistence agriculture accounts for half of GDP and provides 80% of total employment. The economy will continue to benefit from aid from the IMF and other international sources and from new foreign investment in food processing and mining. In late 2004, Laos gained Normal Trade Relations status with the US, allowing Laos-based producers to face lower tariffs on their exports; this may help spur growth.

Laos is one of the world's least developed countries; the Lao People's Armed Forces are small, poorly funded, and ineffectively resourced; there is little political will to allocate sparse funding to the military, and the armed forces' gradual degradation is likely to continue; the massive drug production and trafficking industry centered in the Golden Triangle makes Laos an important narcotics transit country, and armed Wa and Chinese smugglers are active on the Lao-Burma border (2005)

Transnational Issues Laos

Disputes - international:
Southeast Asian states have enhanced border surveillance to check the spread of avian flu; Laos and Thailand pledge to complete demarcation of boundaries in 2005, while ongoing disputes over squatters and boundary encroachment by Thailand including Mekong River islets persist; in 2004 Cambodian-Laotian boundary commission agrees to re-erect missing markers in two adjoining provinces; concern among Mekong Commission members that China's construction of dams on the Mekong River will affect water levels

Illicit drugs:
estimated cultivation in 2004 - 10,000 hectares, a 45% decrease

from 2003; estimated potential production in 2004 - 49 metric tons,
a significant decrease from 200 metric tons in 2003 (2005)

Introduction Latvia

Background:

After a brief period of independence between the two World Wars, Latvia was annexed by the USSR in 1940. It reestablished its independence in 1991 following the breakup of the Soviet Union. Although the last Russian troops left in 1994, the status of the Russian minority (some 30% of the population) remains of concern to Moscow. Latvia joined both NATO and the EU in the spring of 2004.

Economy Latvia

Economy - overview:

Latvia's transitional economy recovered from the 1998 Russian financial crisis, largely due to the government's budget stringency and a gradual reorientation of exports toward EU countries, lessening Latvia's trade dependency on Russia. The majority of companies, banks, and real estate have been privatized, although the state still holds sizable stakes in a few large enterprises. Latvia officially joined the World Trade Organization in February 1999. EU membership, a top foreign policy goal, came in May 2004. The current account and internal government deficits remain major concerns, but the government's efforts to increase efficiency in revenue collection may lessen the budget deficit. A growing perception that many of Latvia's banks facilitate illicit activity could damage the country's vibrant financial sector.

Transnational Issues Latvia

Disputes - international:
the Latvian-Russian boundary treaty of 1997 remains unsigned and unratified with Russia linking it to better Latvian treatment of ethnic Russians and Latvian politicians demanding Russian agreement to a declaration that admits Soviet aggression during the Second World War and other issues; the Latvian parliament has not ratified its 1998 maritime boundary treaty with Lithuania, primarily due to concerns over oil exploration rights; as a member state that forms part of the EU's external border, Latvia must implement the strict Schengen border rules

Illicit drugs:

transshipment point for opiates and cannabis from Central and Southwest Asia to Western Europe and Scandinavia and Latin American cocaine and some synthetics from Western Europe to CIS; vulnerable to money laundering despite improved legislation due to nascent enforcement capabilities and comparatively weak regulation of offshore companies and the gaming industry; organized crime (including counterfeiting, corruption, extortion, stolen cars, and prostitution) accounts for most laundered proceeds

Introduction Lebanon

Background:

Lebanon has made progress toward rebuilding its political institutions since 1991 and the end of the devastating 15-year civil war. Under the Ta'if Accord - the blueprint for national reconciliation - the Lebanese have established a more equitable political system, particularly by giving Muslims a greater say in

the political process while institutionalizing sectarian divisions in the government. Since the end of the war, the Lebanese have conducted several successful elections, most of the militias have been weakened or disbanded, and the Lebanese Armed Forces (LAF) have extended central government authority over about two-thirds of the country. Hizballah, a radical Shia organization, retains its weapons. During Lebanon's civil war, the Arab League legitimized in the Ta'if Accord Syria's troop deployment, numbering about 16,000 based mainly east of Beirut and in the Bekaa Valley. Damascus justified its continued military presence in Lebanon by citing Beirut's requests and the failure of the Lebanese Government to implement all of the constitutional reforms in the Ta'if Accord. Israel's withdrawal from southern Lebanon in May 2000, however, encouraged some Lebanese groups to demand that Syria withdraw its forces as well. The passage of UNSCR 1559 in early October 2004 - a resolution calling for Syria to withdraw from Lebanon and end its interference in Lebanese affairs - further emboldened Lebanese groups opposed to Syria's presence in Lebanon. Syria finally withdrew the remainder of its forces from Lebanon in April of 2005.

Economy Lebanon

Economy - overview:

The 1975-91 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and all but ended Lebanon's position as a Middle Eastern entrepot and banking hub. In the years since, Lebanon has rebuilt much of its war-torn physical and financial infrastructure by borrowing heavily - mostly from domestic banks. In an attempt to reduce the ballooning national debt, the HARIRI government began an austerity program, reining in government expenditures, increasing revenue collection, and privatizing state enterprises. In November 2002, the government met with international donors at the Paris II conference to seek bilateral assistance in restructuring its massive domestic debt at lower rates of interest. Substantial receipts from donor nations stabilized government finances in 2003, but did little to reduce the debt, which stood at nearly 180% of GDP. In 2004 the HARIRI government issued Eurobonds in an effort to manage maturing debt, and the KARAMI government has continued this practice. However, privatization of state-owned enterprises had not occurred by the end of 2004, as promised during the Paris II conference.

Introduction Lesotho

Background:

Basutoland was renamed the Kingdom of Lesotho upon independence from the UK in 1966. King MOSHOESHOE was exiled in 1990, but returned to Lesotho in 1992 and reinstated in 1995. Constitutional government was restored in 1993 after 23 years of military rule. In 1998, violent protests and a military mutiny following a contentious election prompted a brief but bloody intervention by South African and Botswanan military forces under the aegis of the Southern African Development Community. Constitutional reforms have since restored political stability; peaceful parliamentary elections were held in 2002.

Economy Lesotho

Economy - overview:

Small, landlocked, and mountainous, Lesotho relies on remittances from miners employed in South Africa and customs duties from the Southern Africa Customs Union for the majority of government revenue, but the government has strengthened its tax system to reduce dependency on customs duties. Completion of a major hydropower facility in January 1998 now permits the sale of water to South Africa, also generating royalties for Lesotho. As the number of mineworkers has declined steadily over the past several years, a

small manufacturing base has developed based on farm products that support the milling, canning, leather, and jute industries and a rapidly growing apparel-assembly sector. The garment industry has grown significantly, mainly due to Lesotho qualifying for the trade benefits contained in the Africa Growth and Opportunity Act. The economy is still primarily based on subsistence agriculture, especially livestock, although drought has decreased agricultural activity. The extreme inequality in the distribution of income remains a major drawback. Lesotho has signed an Interim Poverty Reduction and Growth Facility with the IMF.

Introduction Liberia

Background:

In August 2003, a comprehensive peace agreement ended 14 years of civil war and prompted the resignation of former president Charles TAYLOR, who was exiled to Nigeria. The National Transitional Government of Liberia (NTGL) - composed of rebel, government, and civil society groups - assumed control in October 2003. Chairman Gyude BRYANT, who was given a two-year mandate to oversee efforts to rebuild Liberia, heads the new government. The United Nations Mission in Liberia (UNMIL), which maintains a strong presence throughout the country, completed a disarmament program for former combatants in late 2004, but the security situation is still volatile and the process of rebuilding the social and economic structure of this war-torn country remains sluggish.

Economy Liberia

Economy - overview:

Civil war and government mismanagement have destroyed much of Liberia's economy, especially the infrastructure in and around Monrovia, while continued international sanctions on diamonds and timber exports will limit growth prospects for the foreseeable future. Many businessmen have fled the country, taking capital and expertise with them. Some have returned, but many will not. Richly endowed with water, mineral resources, forests, and a climate favorable to agriculture, Liberia had been a producer and exporter of basic products - primarily raw timber and rubber. Local manufacturing, mainly foreign owned, had been small in scope. The departure of the former president, Charles TAYLOR, to Nigeria in August 2003, the establishment of the all-inclusive Transitional Government, and the arrival of a UN mission are all necessary for the eventual end of the political crisis, but thus far have done little to encourage economic development. The reconstruction of infrastructure and the raising of incomes in this ravaged economy will largely depend on generous financial support and technical assistance from donor countries.

Introduction Libya

Background:

From the earliest days of his rule following his 1969 military coup, Col. Muammar Abu Minyar al-QADHAFI has espoused his own political system, the Third Universal Theory. The system is a combination of socialism and Islam derived in part from tribal practices and is supposed to be implemented by the Libyan people

themselves in a unique form of "direct democracy." QADHAFI has always seen himself as a revolutionary and visionary leader. He used oil funds during the 1970s and 1980s to promote his ideology outside Libya, supporting subversives and terrorists abroad to hasten the end of Marxism and capitalism. In addition, beginning in 1973, he engaged in military operations in northern Chad's Aozou Strip - to gain access to minerals and to use as a base of influence in Chadian politics - but was forced to retreat in 1987. UN sanctions in 1992 isolated QADHAFI politically following the downing of Pan AM Flight 103 over Lockerbie, Scotland. Libyan support for terrorism appeared to have decreased after the imposition of sanctions. During the 1990s, QADHAFI also began to rebuild his relationships with Europe. UN sanctions were suspended in April 1999 and finally lifted in September 2003 after Libya resolved the Lockerbie case. In December 2003, Libya announced that it had agreed to reveal and end its programs to develop weapons of mass destruction, and QADHAFI has made significant strides in normalizing relations with western nations since then. He has received various Western European leaders as well as many working-level and commercial delegations, and made his first trip to Western Europe in 15 years when he traveled to Brussels in April 2004. QADHAFI also finally resolved in 2004 several outstanding cases against his government for terrorist activities in the 1980s by paying compensation to the families of victims of the UTA and La Belle disco bombings.

Economy Libya

Economy - overview:

The Libyan economy depends primarily upon revenues from the oil sector, which contribute practically all export earnings and about one-quarter of GDP. These oil revenues and a small population give Libya one of the highest per capita GDPs in Africa, but little of this income flows down to the lower orders of society. Libyan officials in the past four years have made progress on economic reforms as part of a broader campaign to reintegrate the country into the international fold. This effort picked up steam after UN sanctions were lifted in September 2003 and as Libya announced in December 2003 that it would abandon programs to build weapons of

mass destruction. Almost all US unilateral sanctions against Libya were removed in April 2004. Libya faces a long road ahead in liberalizing the socialist-oriented economy, but initial steps - including applying for WTO membership, reducing some subsidies, and announcing plans for privatization - are laying the groundwork for a transition to a more market-based economy. The non-oil manufacturing and construction sectors, which account for about 20% of GDP, have expanded from processing mostly agricultural products to include the production of petrochemicals, iron, steel, and aluminum. Climatic conditions and poor soils severely limit agricultural output, and Libya imports about 75% of its food.

Introduction Liechtenstein

Background:

The Principality of Liechtenstein was established within the Holy Roman Empire in 1719; it became a sovereign state in 1806. Until the end of World War I, it was closely tied to Austria, but the economic devastation caused by that conflict forced Liechtenstein to enter into a customs and monetary union with Switzerland. Since World War II (in which Liechtenstein remained neutral), the country's low taxes have spurred outstanding economic growth. Shortcomings in banking regulatory oversight have resulted in concerns about the use of the financial institutions for money laundering. Liechtenstein has, however, implemented new anti-money-laundering legislation and recently concluded a Mutual Legal Assistance Treaty with the US.

Economy Liechtenstein

Economy - overview:

Despite its small size and limited natural resources, Liechtenstein has developed into a prosperous, highly industrialized, free-enterprise economy with a vital financial service sector and living standards on a par with its large European neighbors. The Liechtenstein economy is widely diversified with a large number of small businesses. Low business taxes - the maximum tax rate is 20% - and easy incorporation rules have induced many holding or so-called

letter box companies to establish nominal offices in Liechtenstein, providing 30% of state revenues. The country participates in a customs union with Switzerland and uses the Swiss franc as its national currency. It imports more than 90% of its energy requirements. Liechtenstein has been a member of the European Economic Area (an organization serving as a bridge between the European Free Trade Association (EFTA) and the EU) since May 1995. The government is working to harmonize its economic policies with those of an integrated Europe.

Introduction Lithuania

Background:

Independent between the two World Wars, Lithuania was annexed by the USSR in 1940. On 11 March 1990, Lithuania became the first of the Soviet republics to declare its independence, but Moscow did not recognize this proclamation until September of 1991 (following the abortive coup in Moscow). The last Russian troops withdrew in 1993. Lithuania subsequently restructured its economy for integration into

Western European institutions; it joined both NATO and the EU in the spring of 2004.

Economy Lithuania

Economy - overview:

Lithuania, the Baltic state that has conducted the most trade with Russia, has slowly rebounded from the 1998 Russian financial crisis. Unemployment dropped from 11% in 2003 to 8% in 2004. Growing domestic consumption and increased investment have furthered recovery. Trade has been increasingly oriented toward the West. Lithuania has gained membership in the World Trade Organization and joined the EU in May 2004. Privatization of the large, state-owned utilities, particularly in the energy sector, is nearing completion. Overall, more than 80% of enterprises have been privatized. Foreign government and business support have helped in the transition from the old command economy to a market economy.

Transnational Issues Lithuania

Disputes - international:

in 2003, the Lithuania-Russia land and maritime boundary treaty was ratified and a transit regime established through Lithuania linking Russia and its Kaliningrad coastal exclave, leaving only improvements to the border demarcation in 2005; by 2004, a third of the Belarus-Lithuania boundary had been demarcated; the Latvian parliament has not ratified its 1998 maritime boundary treaty with

Lithuania, primarily due to concerns over oil; as a member state that forms part of the EU's external border, Lithuania must implement the strict Schengen border rules

Illicit drugs:
transshipment point for opiates and other illicit drugs from Southwest Asia, Latin America, and Western Europe to Western Europe and Scandinavia; limited production of methamphetamine and ecstasy; susceptible to money laundering despite changes to banking legislation

Introduction Luxembourg

Background:
Founded in 963, Luxembourg became a grand duchy in 1815 and an independent state under the Netherlands. It lost more than half of its territory to Belgium in 1839, but gained a larger measure of autonomy. Full independence was attained in 1867. Overrun by Germany in both World Wars, it ended its neutrality in 1948 when it entered

into the Benelux Customs Union and when it joined NATO the following year. In 1957, Luxembourg became one of the six founding countries of the European Economic Community (later the European Union), and in 1999 it joined the euro currency area.

Economy Luxembourg

Economy - overview:

This stable, high-income economy - in between France, Belgium, and Germany - features solid growth, low inflation, and low unemployment. The industrial sector, initially dominated by steel, has become increasingly diversified to include chemicals, rubber, and other products. Growth in the financial sector, which now accounts for about 22% of GDP, has more than compensated for the decline in steel. Most banks are foreign-owned and have extensive foreign dealings. Agriculture is based on small family-owned farms. The economy depends on foreign and cross-border workers for more than 30% of its labor force. Although Luxembourg, like all EU members, has suffered from the global economic slump, the country enjoys an extraordinarily high standard of living.

Introduction Macau

Background:

Colonized by the Portuguese in the 16th century, Macau was the first European settlement in the Far East. Pursuant to an agreement signed by China and Portugal on 13 April 1987, Macau became the Macau Special Administrative Region (SAR) of China on 20 December 1999. China has promised that, under its "one country, two systems" formula, China's socialist economic system will not be practiced in

Macau, and that Macau will enjoy a high degree of autonomy in all matters except foreign and defense affairs for the next 50 years.

Economy Macau

Economy - overview:
Macau's well-to-do economy has remained one of the most open in the world since its reversion to China in 1999. Apparel exports and tourism are mainstays of the economy. Although the territory was hit hard by the 1998 Asian financial crisis and the global downturn in 2001, its economy grew 9.5% in 2002 and 15.6% in 2003. During the first three quarters of 2004, Macau registered year-on-year GDP increases of more than 20 percent. A rapid rise in the number of mainland visitors because of China's easing of restrictions on travel, increased public works expenditures, and significant investment inflows associated with the liberalization of Macau's gaming industry drove the recovery. The budget also returned to surplus in 2002 because of the surge in visitors from China and a hike in taxes on gambling profits, which generated about 70% of government revenue. The three companies awarded gambling licenses have pledged to invest \$2.2 billion in the territory, which will boost GDP growth. Much of Macau's textile industry may move to the mainland as the Multi-Fiber Agreement is phased out. The territory may have to rely more on gambling and trade-related services to generate growth. Two new casinos were opened by new foreign gambling

licensees in 2004; development of new infrastructure and facilities in preparation for Macau's hosting of the 2005 East Asian Games will bolster the construction sector. The Closer Economic Partnership Agreement (CEPA) between Macau and mainland China that came into effect on 1 January 2004 offers many Macau-made products tariff-free access to the mainland, and the range of products covered by CEPA was to be expanded on 1 January 2005.

Introduction Macedonia

Background:

International recognition of Macedonia's independence from Yugoslavia in 1991 was delayed by Greece's objection to the new state's use of what it considered a Hellenic name and symbols. Greece finally lifted its trade blockade in 1995 and the two countries agreed to normalize relations, although differences over Macedonia's name remain. The undetermined status of neighboring Kosovo, implementation of the Framework Agreement - which ended the 2001 ethnic Albanian armed insurgency - and a weak economy continue to be challenges for Macedonia.

Economy Macedonia

Economy - overview:

At independence in September 1991, Macedonia was the least developed of the Yugoslav republics, producing a mere 5% of the total federal output of goods and services. The collapse of Yugoslavia ended transfer payments from the center and eliminated advantages from inclusion in a de facto free trade area. An absence of infrastructure, UN sanctions on the down-sized Yugoslavia, one of its largest markets, and a Greek economic embargo over a dispute about the country's constitutional name and flag hindered economic growth until 1996. GDP subsequently rose each year through 2000. However, the leadership's commitment to economic reform, free trade, and regional integration was undermined by the ethnic Albanian insurgency of 2001. The economy shrank 4.5% because of decreased trade, intermittent border closures, increased deficit spending on security needs, and investor uncertainty. Growth barely recovered in 2002 to 0.9%, then rose by a moderate 3.4% in 2003, and is estimated at 1.3% in 2004. Unemployment at one-third of the workforce remains a critical economic problem. Much of the extensive grey market activity falls outside official statistics.

Introduction Madagascar

Background:

Formerly an independent kingdom, Madagascar became a French colony in 1896, but regained its independence in 1960. During 1992-93, free presidential and National Assembly elections were held, ending 17 years of single-party rule. In 1997, in the second presidential race, Didier RATSIRAKA, the leader during the 1970s and 1980s, was returned to the presidency. The 2001 presidential election was contested between the followers of Didier RATSIRAKA and Marc RAVALOMANANA, nearly causing secession of half of the country. In April 2002, the High Constitutional Court announced RAVALOMANANA the winner.

Economy Madagascar

Economy - overview:

Having discarded past socialist economic policies, Madagascar has since the mid 1990s followed a World Bank and IMF led policy of privatization and liberalization. This strategy has placed the country on a slow and steady growth path from an extremely low level. Agriculture, including fishing and forestry, is a mainstay of the economy, accounting for more than one-fourth of GDP and employing 80% of the population. Exports of apparel have boomed in recent years primarily due to duty-free access to the United States. Deforestation and erosion, aggravated by the use of firewood as the primary source of fuel are serious concerns. President RAVALOMANANA

has worked aggressively to revive the economy following the 2002 political crisis, which triggered a 12% drop in GDP that year. Poverty reduction and combating corruption will be the centerpieces of economic policy for the next few years.

Introduction Malawi

Background:

Established in 1891, the British protectorate of Nyasaland became the independent nation of Malawi in 1964. After three decades of one-party rule under President Hastings Kamuzu BANDA the country held multiparty elections in 1994, under a provisional constitution, which came into full effect the following year. Current President

Bingu wa MUTHARIKA, elected in May 2004 after the previous president

failed to amend the constitution to permit another term, has struggled to assert his authority against his predecessor, who still leads their shared political party. MATHARIKA's anti-corruption efforts have led to several high-level arrests but no convictions. Increasing corruption, population growth, increasing pressure on agricultural lands, and HIV/AIDS pose major problems for the country.

Economy Malawi

Economy - overview:
Landlocked Malawi ranks among the world's least developed countries. The economy is predominately agricultural, with about 90% of the population living in rural areas. Agriculture accounted for nearly 40% of GDP and 88% of export revenues in 2001. The performance of the tobacco sector is key to short-term growth as tobacco accounts for over 50% of exports. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. In late 2000, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program. The government faces strong challenges, including developing a market economy, improving educational facilities, facing up to environmental problems, dealing with the rapidly growing problem of HIV/AIDS, and satisfying foreign donors that

fiscal discipline is being tightened. In 2005, the anticorruption campaign championed by President MUTHARIKA may help encourage investment and economic growth.

Introduction Malaysia

Background:

During the late 18th and 19th centuries, Great Britain established colonies and protectorates in the area of current Malaysia; these were occupied by Japan from 1942 to 1945. In 1948, the British-ruled territories on the Malay Peninsula formed the Federation of Malaya, which became independent in 1957. Malaysia was formed in 1963 when the former British colonies of Singapore and the East Malaysian states of Sabah and Sarawak on the northern coast of Borneo joined the Federation. The first several years of the country's history were marred by Indonesian efforts to control Malaysia, Philippine claims to Sabah, and Singapore's secession from the Federation in 1965.

Economy Malaysia

Economy - overview:

Malaysia, a middle-income country, transformed itself from 1971 through the late 1990's from a producer of raw materials into an emerging multi-sector economy. Growth was almost exclusively driven by exports - particularly of electronics. As a result, Malaysia was hard hit by the global economic downturn and the slump in the information technology (IT) sector in 2001 and 2002. GDP in 2001 grew only 0.5% due to an estimated 11% contraction in exports, but a substantial fiscal stimulus package equal to US \$1.9 billion mitigated the worst of the recession and the economy rebounded in 2002 with a 4.1% increase. The economy grew 4.9% in 2003, notwithstanding a difficult first half, when external pressures from SARS and the Iraq War led to caution in the business community.

Growth topped 7% in 2004. Healthy foreign exchange reserves, low inflation, and a small external debt are all strengths that make it unlikely that Malaysia will experience a financial crisis similar to the one in 1997. The economy remains dependent on continued growth in the US, China, and Japan, top export destinations and key sources of foreign investment.

land boundary with Brunei around Limbang is in dispute; piracy remains a problem in the Malacca Strait

Introduction Maldives

Background:

The Maldives was long a sultanate, first under Dutch and then under British protection. It became a republic in 1968, three years after independence. Since 1978, President Maumoon Abdul GAYOOM - currently

in his sixth term in office - has dominated the islands' political scene. Following riots in the capital Male in August 2004, the president and his government have pledged to embark upon democratic reforms, including a more representative political system and

expanded political freedoms. Tourism and fishing are being developed on the archipelago.

Economy Maldives

Economy - overview:
Tourism, Maldives' largest industry, accounts for 20% of GDP and more than 60% of the Maldives' foreign exchange receipts. Over 90% of government tax revenue comes from import duties and tourism-related taxes. Fishing is a second leading sector. The Maldivian Government began an economic reform program in 1989 initially by lifting import quotas and opening some exports to the private sector. Subsequently, it has liberalized regulations to allow more foreign investment. Agriculture and manufacturing continue to play a lesser role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Most staple foods must be imported. Industry, which consists mainly of garment production, boat building, and handicrafts, accounts for about 18% of GDP. Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is one meter or less above sea level. In late December 2004, a major tsunami left more than 100 dead, 12,000 displaced, and property damage exceeding \$300 million.

Introduction Mali

Background:
The Sudanese Republic and Senegal became independent of France in 1960 as the Mali Federation. When Senegal withdrew after only a few

months, what formerly made up the Sudanese Republic was renamed Mali. Rule by dictatorship was brought to a close in 1991 with a transitional government and in 1992 when Mali's first democratic presidential election was held. After his reelection in 1997, President Alpha KONARE continued to push through political and economic reforms and to fight corruption. In keeping with Mali's two-term constitutional limit, he stepped down in 2002 and was succeeded by Amadou TOURE.

Economy Mali

Economy - overview:

Mali is among the poorest countries in the world, with 65% of its land area desert or semidesert and with a highly unequal

distribution of income. Economic activity is largely confined to the riverine area irrigated by the Niger. About 10% of the population is nomadic and some 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm commodities. Mali is heavily dependent on foreign aid and vulnerable to fluctuations in world prices for cotton, its main export, along with gold. The government has continued its successful implementation of an IMF-recommended structural adjustment program that is helping the economy grow, diversify, and attract foreign investment. Mali's adherence to economic reform and the 50% devaluation of the African franc in January 1994 have pushed up economic growth to a sturdy 5% average in 1996-2004. Worker remittances and external trade routes have been jeopardized by continued unrest in neighboring Cote d'Ivoire.

@Malta

Introduction Malta

Background:

Great Britain formally acquired possession of Malta in 1814. The island staunchly supported the UK through both World Wars and remained in the Commonwealth when it became independent in 1964. A decade later Malta became a republic. Since about the mid-1980s, the island has transformed itself into a freight transshipment point, a financial center, and a tourist destination. Malta became an EU member in May of 2004.

Geography Malta

Geography - note:

the country comprises an archipelago, with only the three largest
islands (Malta, Ghawdex or Gozo, and Kemmuna or Comino) being
inhabited; numerous bays provide good harbors; Malta and Tunisia are
discussing the commercial exploitation of the continental shelf
between their countries, particularly for oil exploration

@Marshall Islands

Introduction Marshall Islands

Background:

After almost four decades under US administration as the easternmost part of the UN Trust Territory of the Pacific Islands, the Marshall Islands attained independence in 1986 under a Compact of Free Association. Compensation claims continue as a result of US nuclear testing on some of the atolls between 1947 and 1962. The Marshall Islands hosts the US Army Kwajalein Atoll (USAKA) Reagan Missile Test Site, a key installation in the US missile defense network.

Economy Marshall Islands

Economy - overview:
US Government assistance is the mainstay of this tiny island
economy. Agricultural production, primarily subsistence, is
concentrated on small farms; the most important commercial crops are
coconuts and breadfruit. Small-scale industry is limited to
handicrafts, tuna processing, and copra. The tourist industry, now a
small source of foreign exchange employing less than 10% of the
labor force, remains the best hope for future added income. The
islands have few natural resources, and imports far exceed exports.
Under the terms of the Amended Compact of Free Association, the US
will provide millions of dollars per year to the Marshall Islands
(RMI) through 2023, at which time a Trust Fund made up of US and RMI
contributions will begin perpetual annual payouts. Government

downsizing, drought, a drop in construction, the decline in tourism and foreign investment due to the Asian financial difficulties, and less income from the renewal of fishing vessel licenses have held GDP growth to an average of 1% over the past decade.

Economy Martinique

Economy - overview:

The economy is based on sugarcane, bananas, tourism, and light industry. Agriculture accounts for about 6% of GDP and the small industrial sector for 11%. Sugar production has declined, with most of the sugarcane now used for the production of rum. Banana exports are increasing, going mostly to France. The bulk of meat, vegetable, and grain requirements must be imported, contributing to a chronic trade deficit that requires large annual transfers of aid from France. Tourism, which employs more than 11,000 people, has become more important than agricultural exports as a source of foreign exchange.

@Mauritania

Introduction Mauritania

Background:

Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976, but relinquished it after three years of raids by the Polisario guerrilla front seeking independence for the territory. Maaouya Ould Sid Ahmed TAYA siezed power in a coup in 1984. Opposition parties were legalized and a new constitution approved in 1991. Two multiparty presidential elections since then were widely seen as flawed, but October 2001 legislative and municipal elections were generally free and open. A bloodless coup in August 2005 deposed President TAYA and ushered in a military council headed by Col. Ely Ould Mohamed VALL, which declared it would remain in power for up to

two years while it created conditions for genuine democratic institutions. For now, however, Mauritania remains, a one-party state. The country continues to experience ethnic tensions between its black population and the Maur (Arab-Berber) populace.

Economy Mauritania

Economy - overview:

Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania has extensive deposits of iron ore, which account for nearly 40% of total exports. The decline in world demand for this ore, however, has led to cutbacks in production. The nation's coastal waters are among the richest fishing areas in the world, but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. In the past, drought and economic mismanagement resulted in a buildup of foreign debt. In February 2000, Mauritania qualified for debt relief under the Heavily Indebted Poor Countries (HIPC) initiative and in December 2001 received strong support from donor and lending countries at a triennial Consultative Group review. In 2001, exploratory oil wells in tracts 80 km offshore indicated potential extraction at current world oil prices. A new investment code approved in December 2001 improved the opportunities for direct foreign investment. Ongoing negotiations with the IMF involve problems of economic reforms and fiscal discipline. Substantial oil production and exports probably will not begin until 2006. Meantime the government emphasizes reduction of poverty, improvement of health and education, and promoting privatization of the economy.

Introduction Mauritius

Background:

Discovered by the Portuguese in 1505, Mauritius was subsequently held by the Dutch, French, and British before independence was attained in 1968. A stable democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has earned one of Africa's highest per capita incomes. Recent poor weather and declining sugar

prices have slowed economic growth, leading to some protests over standards of living in the Creole community.

Economy Mauritius

Economy - overview:

Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. For most of the period, annual growth has been in the order of 5% to 6%. This remarkable achievement has been reflected in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure. Sugarcane is grown on about 90% of the cultivated land area and accounts for 25% of export earnings. The government's development strategy centers on expanding local financial institutions and building a domestic information telecommunications industry. Mauritius has attracted more than 9,000 offshore entities, many aimed at commerce in India and South Africa, and investment in the banking sector alone has reached over \$1 billion. Mauritius, with its strong textile sector, has been well poised to take advantage of the Africa Growth and Opportunity Act (AGOA).

@Mexico

Introduction Mexico

Background:

The site of advanced Amerindian civilizations, Mexico came under Spanish rule for three centuries before achieving independence early in the 19th century. A devaluation of the peso in late 1994 threw

Mexico into economic turmoil, triggering the worst recession in over half a century. The nation continues to make an impressive recovery. Ongoing economic and social concerns include low real wages, underemployment for a large segment of the population, inequitable income distribution, and few advancement opportunities for the largely Amerindian population in the impoverished southern states. Elections held in July 2000 marked the first time since the 1910 Mexican Revolution that the opposition defeated the party in government, the Institutional Revolutionary Party (PRI). Vicente FOX of the National Action Party (PAN) was sworn in on 1 December 2000 as the first chief executive elected in free and fair elections.

Economy Mexico

Economy - overview:

Mexico has a free market economy that recently entered the trillion dollar class. It contains a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. Recent administrations have expanded competition in seaports, railroads, telecommunications, electricity generation, natural gas distribution, and airports. Per capita income is one-fourth that of the US; income distribution remains highly unequal. Trade with the US and Canada has tripled since the implementation of NAFTA in 1994. Mexico has 12 free trade agreements with over 40 countries including, Guatemala, Honduras, El Salvador, the European Free Trade Area, and Japan, putting more than 90% of trade under free trade agreements. The government is cognizant of the need to upgrade infrastructure, modernize the tax system and labor laws, and provide incentives to invest in the energy sector, but progress is slow.

@Micronesia, Federated States of

Introduction Micronesia, Federated States of

Background:

In 1979 the Federated States of Micronesia, a UN Trust Territory under US administration, adopted a constitution. In 1986 independence was attained under a Compact of Free Association with the US, which was amended and renewed in 2004. Present concerns include large-scale unemployment, overfishing, and overdependence on US aid.

Economy Micronesia, Federated States of

Economy - overview:

Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The potential for a tourist industry exists, but the remote location, a lack of adequate facilities, and limited air connections hinder development. The Amended Compact of Free Association with the US guarantees the Federated States of Micronesia (FSM) millions of dollars in annual aid through 2023, and establishes a Trust Fund into which the US and the FSM make annual contributions in order to provide annual payouts to the FSM in perpetuity after 2023. The country's medium-term economic outlook appears fragile due not only to the reduction in US assistance but also to the slow growth of the private sector. Geographical isolation and a poorly developed infrastructure remain major impediments to long-term growth.

@Midway Islands

Introduction Midway Islands

Background:

The US took formal possession of the islands in 1867. The laying of

the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for trans-Pacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a national wildlife refuge. From 1996 to 2001 the refuge was open to the public; it is now temporarily closed.

Introduction Moldova

Background:

Formerly part of Romania, Moldova was incorporated into the Soviet Union at the close of World War II. Although independent from the USSR since 1991, Russian forces have remained on Moldovan territory east of the Dniester River supporting the Slavic majority population, mostly Ukrainians and Russians, who have proclaimed a "Transnistria" republic. The poorest nation in Europe, Moldova became the first former Soviet state to elect a Communist as its president in 2001.

Economy Moldova

Economy - overview:

Moldova remains one of the poorest countries in Europe despite recent progress from its small economic base. It enjoys a favorable climate and good farmland but has no major mineral deposits. As a result, the economy depends heavily on agriculture, featuring fruits, vegetables, wine, and tobacco. Moldova must import almost all of its energy supplies from Russia. Energy shortages contributed to sharp production declines after the breakup of the Soviet Union in December 1991. As part of an ambitious reform effort after independence, Moldova introduced a convertible currency, freed prices, stopped issuing preferential credits to state enterprises, backed steady land privatization, removed export controls, and freed interest rates. The government entered into agreements with the World Bank and the IMF to promote growth and reduce poverty. The economy returned to positive growth of 2.1% in 2000, 6.1% in 2001, 7.2% in 2002, 6.3% in 2003, and 6.8% in 2004. Further reforms will come slowly because of strong political forces backing government controls. The economy remains vulnerable to higher fuel prices, poor agricultural weather, and the skepticism of foreign investors.

Economy Monaco

Economy - overview:
Monaco, bordering France on the Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. In 2001, a major construction project extended the pier used by cruise ships in the main harbor. The principality has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas. Monaco does not publish national income figures; the estimates below are extremely rough.

@Mongolia

Introduction Mongolia

Background:

The Mongols gained fame in the 13th century when under Chinggis KHAN they conquered a huge Eurasian empire. After his death the empire was divided into several powerful Mongol states, but these broke apart in the 14th century. The Mongols eventually retired to their original steppe homelands and later came under Chinese rule. Mongolia won its independence in 1921 with Soviet backing. A Communist regime was installed in 1924. During the early 1990s, the

ex-Communist Mongolian People's Revolutionary Party (MPRP) gradually yielded its monopoly on power to the Democratic Union Coalition (DUC), which defeated the MPRP in a national election in 1996. Since then, parliamentary elections returned the MPRP overwhelmingly to power in 2000 and produced a coalition government in 2004.

Economy Mongolia

Economy - overview:
Economic activity in Mongolia has traditionally been based on herding and agriculture. Mongolia has extensive mineral deposits;

copper, coal, molybdenum, tin, tungsten and gold account for a large part of industrial production. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990 and 1991 at the time of the dismantlement of the USSR. The following decade saw Mongolia endure both deep recession due to political inaction and natural disasters, as well as economic growth due to reform embracing free-market economics and extensive privatization of the formerly state-run economy. Severe winters and summer droughts in 2000, 2001, and 2002 resulted in massive livestock die-off and zero or negative GDP growth. This was compounded by falling prices for Mongolia's primary sector exports and widespread opposition to privatization. Growth improved from 2002 at 4% to 2003 at 5%, due largely to high copper prices and new gold production, with the government claiming a 10.6% growth rate for 2004 that is unconfirmed. Mongolia's economy continues to be heavily impacted by its neighbors. For example, Mongolia purchases 80% of its petroleum products and a substantial amount of electric power from Russia, leaving it vulnerable to price increases. China is Mongolia's chief export partner and a main source of the "shadow" or "grey" economy. The World Bank and other international financial institutions estimate the grey economy to be at least equal to that of the official economy. The actual size of this grey - largely cash - economy is difficult to calculate since the money does not pass through the hands of tax authorities or the banking sector. Remittances from Mongolians working abroad both legally and illegally constitute a sizeable portion. Money laundering is growing as an accompanying concern. Mongolia settled its \$11 billion debt with Russia at the end of 2003 on very favorable terms. Mongolia, which joined the World Trade Organization in 1997, seeks to expand

its participation and integration into Asian regional economic and trade regimes.

Economy Montserrat

Economy - overview:
Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airports and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998, but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcano and on public sector construction activity. The UK has launched a three-year \$122.8 million aid program to help reconstruct the economy. Half of the island is expected to remain uninhabitable for another decade.

Introduction Morocco

Background:

In 788, about a century after the Arab conquest of North Africa,

successive Moorish dynasties began to rule in Morocco. In the 16th century, the Sa'adi monarchy, particularly under Ahmad AL-MANSUR (1578-1603), repelled foreign invaders and inaugurated a golden age. In 1860, Spain occupied northern Morocco and ushered in a half century of trade rivalry among European powers that saw Morocco's sovereignty steadily eroded; in 1912, the French imposed a protectorate over the country. A protracted independence struggle with France ended successfully in 1956. The internationalized city of Tangier and most Spanish possessions were turned over to the new country that same year. Morocco virtually annexed Western Sahara during the late 1970s, but final resolution on the status of the territory remains unresolved. Gradual political reforms in the 1990s resulted in the establishment of a bicameral legislature in 1997. Parliamentary elections were held for the second time in September 2002 and municipal elections were held in September 2003.

Economy Morocco

Economy - overview:

Morocco faces problems typical for developing countries: restraining government spending, reducing constraints on private activity and foreign trade, and achieving sustainable growth. Despite structural adjustment programs supported by the IMF, the World Bank, and the Paris Club, the dirham is only fully convertible for current account transactions. In 2004 Moroccan authorities instituted measures to boost foreign direct investment and trade by signing a free trade agreement with the US and selling government shares in the state telecommunications company and in the largest state-owned bank. Favorable rainfall over the past two years has boosted agricultural output and GDP growth passed 4% in 2004. In 2005 the budget deficit is expected to rise sharply - from 1.9% of GDP in 2004 - because of substantial increases in wages and oil subsidies. Long-term challenges include preparing the economy for freer trade with the US and European Union, improving education and job prospects for Morocco's youth, and raising living standards.

Transnational Issues Morocco

Disputes - international:
claims and administers Western Sahara whose sovereignty remains unresolved - UN-administered cease-fire has remained in effect since September 1991, but attempts to hold a referendum have failed and parties thus far have rejected all brokered proposals; Morocco protests Spain's control over the coastal enclaves of Ceuta, Melilla, and Penon de Velez de la Gomera, the islands of Penon de Alhucemas and Islas Chafarinas, and surrounding waters; discussions have not progressed on a comprehensive maritime delimitation setting limits on exploration and refugee interdiction since Morocco's 2002 rejection of Spain's unilateral designation of a median line from the Canary Islands; Morocco serves as one of the primary launching areas of illegal migration into Spain from North Africa

Illicit drugs:
illicit producer of hashish; shipments of hashish mostly directed
to Western Europe; transit point for cocaine from South America
destined for Western Europe

Introduction Mozambique

Background:

Almost five centuries as a Portuguese colony came to a close with
independence in 1975. Large-scale emigration by whites, economic
dependence on South Africa, a severe drought, and a prolonged civil
war hindered the country's development. The ruling Front for the

Liberation of Mozambique (FRELIMO) party formally abandoned
Marxism

in 1989, and a new constitution the following year provided for
multiparty elections and a free market economy. A UN-negotiated
peace agreement between FRELIMO and rebel Mozambique National
Resistance (RENAMO) forces ended the fighting in 1992. In December

2004, Mozambique underwent a delicate transition as Joaquim CHISSANO

stepped down after 18 years in office. His newly elected successor,

Armando Emilio GUEBUZA, has promised to continue the sound economic

policies that have encouraged foreign investment.

Economy Mozambique

Economy - overview:
At independence in 1975, Mozambique was one of the world's poorest countries. Socialist mismanagement and a brutal civil war from 1977-92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the

economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, have led to dramatic improvements in the country's growth rate. Inflation was reduced to single digits during the late 1990s although it returned to double digits in 2000-03. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remains dependent upon foreign assistance for much of its annual budget, and the majority of the population remains below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's workforce. A substantial trade imbalance persists although the opening of the MOZAL aluminum smelter, the country's largest foreign investment project to date has increased export earnings. Additional investment projects in titanium extraction and processing and garment manufacturing should further close the import/export gap. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level.

Introduction Namibia

Background:

South Africa occupied the German colony of South-West Africa during World War I and administered it as a mandate until after World War II, when it annexed the territory. In 1966 the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that was soon named Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Namibia won its independence in 1990 and has been governed by SWAPO since. Hifikepunye POHAMBA was elected president in November 2004 in a landslide victory replacing Sam NUJOMA who led the country during its first 14 years of self rule.

Economy Namibia

Economy - overview:

The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 20% of GDP. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Namibia is the fourth-largest exporter of nonfuel minerals in Africa, the world's fifth-largest producer of uranium, and the producer of large quantities of lead, zinc, tin, silver, and tungsten. The mining sector employs only about 3% of the population while about half of the population depends on subsistence agriculture for its livelihood. Namibia normally imports about 50% of its cereal requirements; in drought years food shortages are a major problem in rural areas. A high per capita GDP, relative to the region, hides the great inequality of income distribution; nearly one-third of Namibians had annual incomes of less than \$1,400 in constant 1994 dollars, according to a 1993 study. The Namibian economy is closely linked to South Africa with the Namibian dollar pegged to the South African rand. Privatization of several enterprises in coming years may stimulate long-run foreign

investment. Mining of zinc, copper, and silver and increased fish production led growth in 2003-04.

Introduction Nauru

Background:

Nauru's phosphate deposits began to be mined early in the 20th

century by a German-British consortium; the island was occupied by Australian forces in World War I. Nauru achieved independence in 1968 and joined the UN in 1999. Nauru is the world's smallest independent republic.

Economy Nauru

Economy - overview:

Revenues of this tiny island have traditionally come from exports of phosphates, but reserves are now depleted. Few other resources exist with most necessities being imported, mainly from Australia, its former occupier and later major source of support. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of phosphate income have been invested in trust funds to help cushion the transition and provide for Nauru's economic future. As a result of heavy spending from the trust funds, the government faces virtual bankruptcy. To cut costs the government has called for a freeze on

wages, a reduction of over-staffed public service departments, privatization of numerous government agencies, and closure of some overseas consulates. In recent years Nauru has encouraged the registration of offshore banks and corporations. In 2004 the deterioration in housing, hospitals, and other capital plant continued, and the cost to Australia of keeping the government and economy afloat has substantially mounted. Few comprehensive statistics on the Nauru economy exist, with estimates of Nauru's GDP varying widely.

@Navassa Island

Introduction Navassa Island

Background:

This uninhabited island was claimed by the US in 1857 for its guano. Mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the Coast Guard to the Department of the Interior. A 1998 scientific expedition to the island described it as a unique preserve of Caribbean biodiversity; the following year it became a National Wildlife Refuge and annual scientific expeditions have continued.

@Nepal

Introduction Nepal

Background:

In 1951, the Nepalese monarch ended the century-old system of rule by hereditary premiers and instituted a cabinet system of government. Reforms in 1990 established a multiparty democracy within the framework of a constitutional monarchy. A Maoist insurgency, launched in 1996, has gained traction and is threatening to bring down the regime, especially after a negotiated cease-fire between the Maoists and government forces broke down in August 2003. In 2001, the crown prince massacred ten members of the royal family, including the king and queen, and then took his own life. In October 2002, the new king dismissed the prime minister and his cabinet for "incompetence" after they dissolved the parliament and were subsequently unable to hold elections because of the ongoing insurgency. While stopping short of reestablishing parliament, the

king in June 2004 reinstated the most recently elected prime minister who formed a four-party coalition government, which the king subsequently tasked with paving the way for elections to be held in spring of 2005. Citing dissatisfaction with the government's lack of progress in addressing the Maoist insurgency, the king in February 2005 dissolved the government and assumed power.

Economy Nepal

Economy - overview:

Nepal is among the poorest and least developed countries in the world with 40% of its population living below the poverty line. Agriculture is the mainstay of the economy, providing a livelihood for over 80% of the population and accounting for 40% of GDP. Industrial activity mainly involves the processing of agricultural produce including jute, sugarcane, tobacco, and grain. Security concerns in the wake of the Maoist conflict have led to a decrease in tourism, a key source of foreign exchange. Nepal has considerable scope for exploiting its potential in hydropower and tourism, areas of recent foreign investment interest. Prospects for foreign trade or investment in other sectors will remain poor, however, because of the small size of the economy, its technological backwardness, its remoteness, its landlocked geographic location, its civil strife, and its susceptibility to natural disaster.

Introduction Netherlands

Background:

The Kingdom of the Netherlands was formed in 1815. In 1830 Belgium seceded and formed a separate kingdom. The Netherlands remained neutral in World War I, but suffered invasion and occupation by Germany in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EEC (now the EU), and participated in the introduction of the euro in 1999.

Economy Netherlands

Economy - overview:

The Netherlands has a prosperous and open economy, which depends heavily on foreign trade. The economy is noted for stable industrial relations, moderate unemployment and inflation, a sizable current account surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs no more than 4% of the labor force but provides large surpluses for the food-processing industry and for exports. The Netherlands, along with 11 of its EU partners, began circulating the euro currency on 1 January 2002. The country

continues to be one of the leading European nations for attracting foreign direct investment. Economic growth slowed considerably in 2001-04, as part of the global economic slowdown, but for the four years before that, annual growth averaged nearly 4%, well above the EU average.

@Netherlands Antilles

Introduction Netherlands Antilles

Background:

Once the center of the Caribbean slave trade, the island of Curacao was hard hit by the abolition of slavery in 1863. Its prosperity (and that of neighboring Aruba) was restored in the early 20th century with the construction of oil refineries to service the newly discovered Venezuelan oil fields. The island of Saint Martin is shared with France; its southern portion is named Sint Maarten and is part of the Netherlands Antilles; its northern portion is called Saint-Martin and is part of Guadeloupe (France).

Economy Netherlands Antilles

Economy - overview:

Tourism, petroleum refining, and offshore finance are the mainstays of this small economy, which is closely tied to the outside world. Although GDP has declined or grown slightly in each of the past eight years, the islands enjoy a high per capita income and a well-developed infrastructure compared with other countries in the region. Almost all consumer and capital goods are imported, the US and Mexico being the major suppliers. Poor soils and inadequate water supplies hamper the development of agriculture. Budgetary problems hamper reform of the health and pension systems of an aging population.

Economy New Caledonia

Economy - overview:

New Caledonia has about 25% of the world's known nickel resources. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France - equal to more than one-fourth of GDP - and tourism are keys to the health of the economy. Substantial new investment in the nickel industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.

@New Zealand

Introduction New Zealand

Background:

The Polynesian Maori reached New Zealand in about A.D. 800. In 1840, their chieftains entered into a compact with Britain, the Treaty of Waitangi, in which they ceded sovereignty to Queen Victoria while retaining territorial rights. In that same year, the British began the first organized colonial settlement. A series of land wars between 1843 and 1872 ended with the defeat of the native peoples. The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both World Wars. New Zealand's full participation in a number of defense alliances lapsed by the 1980s. In recent years, the government has sought to address longstanding Maori grievances.

Economy New Zealand

Economy - overview:

Over the past 20 years the government has transformed New Zealand from an agrarian economy dependent on concessionary British market access to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes (but left behind many at the bottom of the ladder), broadened and deepened the technological capabilities of the industrial sector, and contained inflationary pressures. Per capita income has risen for six consecutive years and is now more than \$23,000 in purchasing power parity terms. New Zealand is heavily dependent on trade - particularly in agricultural products - to drive growth. Exports are equal to about 20% of GDP. Thus far the economy has been resilient, and the Labor Government promises that expenditures on health, education, and pensions will increase proportionately to output.

Introduction Nicaragua

Background:

The Pacific Coast of Nicaragua was settled as a Spanish colony from Panama in the early 16th century. Independence from Spain was declared in 1821 and the country became an independent republic in 1838. Britain occupied the Caribbean Coast in the first half of the 19th century, but gradually ceded control of the region in subsequent decades. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979. Nicaraguan aid to leftist rebels in El Salvador caused the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. Free elections in 1990, 1996, and again in 2001 saw the Sandinistas defeated. The country has slowly rebuilt its economy during the 1990s, but was hard hit by Hurricane Mitch in 1998.

Economy Nicaragua

Economy - overview:

Nicaragua, one of the hemisphere's poorest countries, faces low per

capita income, massive unemployment, and huge external debt. Distribution of income is one of the most unequal on the globe. While the country has made progress toward macroeconomic stability over the past few years, GDP annual growth has been far too low to meet the country's needs. As a result of successful performance under its International Monetary Fund policy program and other efforts, Nicaragua qualified in early 2004 for some \$4 billion in foreign debt reduction under the Heavily Indebted Poor Countries (HIPC) initiative. Even after this reduction, however, the government continues to bear a significant foreign and domestic debt burden. If ratified, the US-Central America Free Trade Agreement (CAFTA) will provide an opportunity for Nicaragua to attract investment, create jobs, and deepen economic development. While President BOLANOS enjoys the support of the international financial bodies, his internal political base is meager.

Introduction Niger

Background:

Not until 1993, 33 years after independence from France, did Niger hold its first free and open elections. A 1995 peace accord ended a five-year Tuareg insurgency in the north. Coups in 1996 and 1999 were followed by the creation of a National Reconciliation Council that effected a transition to civilian rule by December 1999. Niger is one of the poorest countries in the world with minimal government services and insufficient funds to develop its resource base. The largely agrarian and subsistence-based economy is frequently disrupted by extended droughts common to the Sahel region of Africa.

Economy Niger

Economy - overview:

Niger is one of the poorest countries in the world, a landlocked Sub-Saharan nation, whose economy centers on subsistence crops, livestock, and some of the world's largest uranium deposits. Drought cycles, desertification, a 3.3% population growth rate, and the drop in world demand for uranium have undercut the economy. Niger shares a common currency, the CFA franc, and a common central bank, the Central Bank of West African States (BCEAO), with seven other members of the West African Monetary Union. In December 2000, Niger qualified for enhanced debt relief under the International Monetary Fund program for Highly Indebted Poor Countries (HIPC) and concluded

an agreement with the Fund on a Poverty Reduction and Growth Facility (PRGF). Debt relief provided under the enhanced HIPC initiative significantly reduces Niger's annual debt service obligations, freeing funds for expenditures on basic health care, primary education, HIV/AIDS prevention, rural infrastructure, and other programs geared at poverty reduction. Nearly half of the government's budget is derived from foreign donor resources. Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources.

Introduction Nigeria

Background:

Following nearly 16 years of military rule, a new constitution was adopted in 1999, and a peaceful transition to civilian government was completed. The president faces the daunting task of rebuilding a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement, and institutionalizing democracy. In addition, the OBASANJO administration must defuse longstanding ethnic and religious tensions, if it is to build a sound foundation for economic growth and political stability. Despite some irregularities, the April 2003 elections marked the first civilian transfer of power in Nigeria's history.

Economy Nigeria

Economy - overview:

Oil-rich Nigeria, long hobbled by political instability, corruption, inadequate infrastructure, and poor macroeconomic management, is undertaking some reforms under the new civilian administration. Nigeria's former military rulers failed to diversify the economy away from overdependence on the capital-intensive oil sector, which provides 20% of GDP, 95% of foreign exchange earnings, and about 65% of budgetary revenues. The largely subsistence agricultural sector has failed to keep up with rapid population growth - Nigeria is Africa's most populous country - and the country, once a large net exporter of food, now must import food. Following the signing of an IMF stand-by agreement in August 2000,

Nigeria received a debt-restructuring deal from the Paris Club and a \$1 billion credit from the IMF, both contingent on economic reforms. Nigeria pulled out of its IMF program in April 2002, after failing to meet spending and exchange rate targets, making it ineligible for additional debt forgiveness from the Paris Club. In the last year the government has begun showing the political will to implement the market-oriented reforms urged by the IMF, such as to modernize the banking system, to curb inflation by blocking excessive wage demands, and to resolve regional disputes over the distribution of earnings from the oil industry. During 2003 the government began deregulating fuel prices, announced the privatization of the country's four oil refineries, and instituted the National Economic Empowerment Development Strategy, a domestically designed and run program modeled on the IMF's Poverty Reduction and Growth Facility for fiscal and monetary management. GDP rose strongly in 2004.

Disputes - international:
ICJ ruled in 2002 on the entire Cameroon-Nigeria land and maritime boundary but the parties formed a Joint Border Commission to resolve differences bilaterally and have commenced with demarcation in less-contested sections of the boundary, starting in Lake Chad in the north; Nigeria initially rejected cession of the Bakassi Peninsula, then agreed, but has yet to withdraw its forces while much of the indigenous population opposes cession; in 2004, some 17,000 Nigerian refugees fleeing ethnic conflicts between pastoralists and farmers in 2002 still reside in Cameroon; the ICJ ruled on an equidistance settlement of Cameroon-Equatorial Guinea-Nigeria maritime boundary in the Gulf of Guinea, but imprecisely defined coordinates in the ICJ decision, the unresolved Bakasi allocation, and a sovereignty dispute between Equatorial Guinea and Cameroon over an island at the mouth of the Ntem River all contribute to the delay in implementation; a joint task force was established in 2004 that resolved disputes over and redrew the

maritime and the 870-km land boundary with Benin on the Okpara River; only Nigeria and Cameroon have heeded the Lake Chad Commission's admonition to ratify the delimitation treaty which also includes Chad and Niger

@Niue

Introduction Niue

Background:

Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the rest of the Cook Islands, have caused it to be separately administered. The population of the island continues to drop (from a peak of 5,200 in 1966 to about 2,150 in 2005), with substantial emigration to New Zealand, 2,400 km to the southwest.

Economy Niue

Economy - overview:

The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening,

although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of migration of Niueans to New Zealand. Efforts to increase GDP include the promotion of tourism and a financial services industry, although former Premier LAKATANI announced in February 2002 that Niue will shut down the offshore banking industry. Economic aid from New Zealand in 2002 was about \$2.6 million. Niue suffered a devastating hurricane in January 2004, which decimated nascent economic programs. While in the process of rebuilding, Niue has been dependent on foreign aid.

@Norfolk Island

Introduction Norfolk Island

Background:

Two British attempts at establishing the island as a penal colony (1788-1814 and 1825-55) were ultimately abandoned. In 1856, the island was resettled by Pitcairn Islanders, descendants of the Bounty mutineers and their Tahitian companions.

@Northern Mariana Islands

Introduction Northern Mariana Islands

Background:

Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the

1970s not to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the US was approved in 1975. A new government and constitution went into effect in 1978.

Geography Northern Mariana Islands

Location:

Economy Northern Mariana Islands

Economy - overview:

The economy benefits substantially from financial assistance from the US. The rate of funding has declined as locally generated government revenues have grown. The key tourist industry employs about 50% of the work force and accounts for roughly one-fourth of GDP. Japanese tourists predominate. Annual tourist entries have exceeded one-half million in recent years, but financial difficulties in Japan have caused a temporary slowdown. The agricultural sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Garment production is by far the most important industry with employment of

17,500 mostly Chinese workers and sizable shipments to the US under duty and quota exemptions.

@Norway

Introduction Norway

Background:

Two centuries of Viking raids into Europe tapered off following the adoption of Christianity by King Olav TRYGGVASON in 994.

Conversion

of the Norwegian kingdom occurred over the next several decades. In 1397, Norway was absorbed into a union with Denmark that was to last for more than four centuries. In 1814, Norwegians resisted the cession of their country to Sweden and adopted a new constitution.

Sweden then invaded Norway but agreed to let Norway keep its constitution in return for accepting the union under a Swedish king.

Rising nationalism throughout the 19th century led to a 1905 referendum granting Norway independence. Although Norway remained neutral in World War I, it suffered heavy losses to its shipping.

Norway proclaimed its neutrality at the outset of World War II, but

was nonetheless occupied for five years by Nazi Germany (1940-45). In 1949, neutrality was abandoned and Norway became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. The current focus is on containing spending on the extensive welfare system and planning for the time when petroleum reserves are depleted. In referenda held in 1972 and 1994, Norway rejected joining the EU.

Economy Norway

Economy - overview:

The Norwegian economy is a prosperous bastion of welfare capitalism, featuring a combination of free market activity and government intervention. The government controls key areas, such as the vital petroleum sector (through large-scale state enterprises).

The country is richly endowed with natural resources - petroleum, hydropower, fish, forests, and minerals - and is highly dependent on its oil production and international oil prices, with oil and gas accounting for one-third of exports. Only Saudi Arabia and Russia

export more oil than Norway. Norway opted to stay out of the EU during a referendum in November 1994; nonetheless, it contributes sizably to the EU budget. The government has moved ahead with privatization. With arguably the highest quality of life worldwide, Norwegians still worry about that time in the next two decades when the oil and gas will begin to run out. Accordingly, Norway has been saving its oil-boasted budget surpluses in a Government Petroleum Fund, which is invested abroad and now is valued at more than \$150 billion. After lackluster growth of 1% in 2002 and 0.5% in 2003, GDP growth picked up to 3.3% in 2004.

Introduction Oman

Background:

In 1970, QABOOS bin Said Al Said ousted his father and has ruled as sultan ever since. His extensive modernization program has opened the country to the outside world and has preserved a long-standing political and military relationship with the UK. Oman's moderate, independent foreign policy has sought to maintain good relations with all Middle Eastern countries.

Geography Oman

Location:

Middle East, bordering the Arabian Sea, Gulf of Oman, and Persian Gulf, between Yemen and UAE

Economy Oman

Economy - overview:
Oman is a middle-income economy in the Middle East with notable oil
and gas resources, a substantial trade surplus, and low inflation.
The government is privatizing its utilities and diversifying its
economy to attract foreign investment. Oman continues to liberalize
its markets and joined the World Trade Organization (WTO) in
November 2000. To reduce unemployment and limit dependence on
foreign countries, the government is encouraging the replacement of
expatriate workers with local people, i.e., Omanization. Training in
information technology, business management, and English support
this objective. Industrial development plans focus on gas resources,
metal manufacturing, petrochemicals, and international transshipment
ports.

@Pacific Ocean

Introduction Pacific Ocean

Background:
The Pacific Ocean is the largest of the world's five oceans
(followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and
Arctic Ocean). Strategically important access waterways include the

La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth ocean, the Southern Ocean, removed the portion of the Pacific Ocean south of 60 degrees south.

Geography Pacific Ocean

Location:

body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates:

0 00 N, 160 00 W

Map references:

Political Map of the World

Area:

total: 155.557 million sq km

note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Gulf of Tonkin, Philippine Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Area - comparative:

about 15 times the size of the US; covers about 28% of the global surface; larger than the total land area of the world

Coastline:

135,663 km

Climate:

planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude in the North Pacific Ocean; the western Pacific is monsoonal - a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain:

surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation extremes:

lowest point: Challenger Deep in the Mariana Trench -10,924 m

highest point: sea level 0 m

Natural resources:

oil and gas fields, polymetallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards:

surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the "Pacific Ring of Fire"; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment - current issues:

endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea

Geography - note:

the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

Economy Pacific Ocean

Economy - overview:

The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy supplies of the US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has led to fluctuations in new drillings.

Transportation Pacific Ocean

Ports and harbors:

Bangkok (Thailand), Hong Kong (China), Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Transportation - note:

Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state)

Transnational Issues Pacific Ocean

Disputes - international: some maritime disputes (see littoral states)

@Pakistan

Introduction Pakistan

Background:

The separation in 1947 of British India into the Muslim state of Pakistan (with two sections West and East) and largely Hindu India was never satisfactorily resolved, and India and Pakistan have fought two wars - in 1947-48 and 1965 - over the disputed Kashmir territory. A third war between these countries in 1971 - in which India capitalized on Islamabad's marginalization of Bengalis in Pakistani politics - resulted in East Pakistan becoming the separate nation of Bangladesh. In response to Indian nuclear weapons testing, Pakistan conducted its own tests in 1998. The dispute over the state of Kashmir is ongoing, but recent discussions and confidence-building measures may be a start toward lessened tensions.

Economy Pakistan

Economy - overview:

Pakistan, an impoverished and underdeveloped country, has suffered from decades of internal political disputes, low levels of foreign investment, and a costly, ongoing confrontation with neighboring India. However, IMF-approved government policies, bolstered by generous foreign assistance and renewed access to global markets since 2001, have generated solid macroeconomic recovery the last three years. The government has made substantial macroeconomic reforms since 2000, although progress on more politically sensitive reforms has slowed. For example, in the third and final year of its \$1.3 billion IMF Poverty Reduction and Growth Facility, Islamabad has continued to require waivers for energy sector reforms. While long-term prospects remain uncertain, given Pakistan's low level of development, medium-term prospects for job creation and poverty reduction are the best in nearly a decade. Islamabad has raised development spending from about 2% of GDP in the 1990s to 4% in 2003, a necessary step towards reversing the broad underdevelopment of its social sector. GDP growth, spurred by double-digit gains in industrial production over the past year, has become less dependent on agriculture. Foreign exchange reserves continued to reach new levels in 2004, supported by robust export growth and steady worker remittances.

Transnational Issues Pakistan

Disputes - international:
recent talks and confidence-building measures have begun to defuse tensions over Kashmir, site of the world's largest and most militarized territorial dispute with portions under the de facto administration of China (Aksai Chin), India (Jammu and Kashmir), and Pakistan (Azad Kashmir and Northern Areas); UN Military Observer Group in India and Pakistan (UNMOGIP) has maintained a small group of peacekeepers since 1949; India does not recognize Pakistan's ceding historic Kashmir lands to China in 1964; in 2004, India and Pakistan instituted a cease fire in the Kashmir, and in 2005 restored bus service across the highly militarized Line of Control; Pakistan has taken its dispute on the impact and benefits of India's

building the Baglihar dam on the Chenab River in Jammu and Kashmir to the World Bank for arbitration and in general the two states still dispute Indus River water sharing; to defuse tensions and prepare for discussions on a maritime boundary, India and Pakistan resurveyed a portion of the disputed Sir Creek estuary at the mouth of the Rann of Kutch in 2004; Pakistani maps continue to show Junagadh in India's Gujarat State; by 2005, Pakistan with UN assistance had repatriated 2.3 million Afghan refugees and has undertaken a census to count the remaining million or more, many of whom remain at their own choosing; Pakistan maintains troops in remote tribal areas to control the border with Afghanistan and root out organized terrorist and other illegal cross-border activities; regular meetings with Afghan and Coalition allies aim to resolve periodic claims of boundary encroachments

Refugees and internally displaced persons:
refugees (country of origin): 1,064,230 (Afghanistan)
IDPs: undetermined (government strikes on Islamic militants in South Waziristan) (2004)

Illicit drugs:
opium poppy in Federally Administered Tribal Areas, North-West Frontier Province, and Balochistan Province has rebounded since it was nearly eliminated in 2001; key transit point for Afghan drugs, including heroin, opium, morphine, and hashish, bound for Western markets, the Gulf States, and Africa; financial crimes related to drug trafficking, terrorism, corruption, and smuggling remain problems

Introduction Palau

Background:

After three decades as part of the UN Trust Territory of the Pacific under US administration, this westernmost cluster of the Caroline Islands opted for independence in 1978 rather than join the Federated States of Micronesia. A Compact of Free Association with the US was approved in 1986, but not ratified until 1993. It entered into force the following year, when the islands gained independence.

Economy Palau

Economy - overview:

The economy consists primarily of tourism, subsistence agriculture, and fishing. The government is the major employer of the work force, relying heavily on financial assistance from the US. Business and tourist arrivals numbered 63,000 in 2003. The population enjoys a per capita income twice that of the Philippines and much of Micronesia. Long-run prospects for the key tourist sector have been

greatly bolstered by the expansion of air travel in the Pacific, the rising prosperity of leading East Asian countries, and the willingness of foreigners to finance infrastructure development.

@Palmyra Atoll

Introduction Palmyra Atoll

Background:

The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now privately owned by the Nature Conservancy. This organization is managing the atoll as a nature preserve. The lagoons and surrounding waters within the 12 nautical mile US territorial seas were transferred to the US Fish and Wildlife Service and were designated a National Wildlife Refuge in January 2001.

@Panama

Introduction Panama

Background:

With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. On 7 September 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of 1999. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the intervening years. With US help, dictator Manuel NORIEGA was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were turned over to Panama by or on 31 December 1999.

Economy Panama

Economy - overview:

Panama's dollarised economy rests primarily on a well-developed services sector that accounts for four-fifths of GDP. Services include operating the Panama Canal, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. A slump in Colon Free Zone and agricultural exports, the global slowdown, and the withdrawal of US military forces held back economic growth in 2000-03; growth picked up in 2004 led by export-oriented services and a construction boom stimulated by tax incentives. The government has been backing tax reforms, reform of the social security program, new regional trade agreements, and development of tourism. Unemployment remains high.

on 10 February 1990, the government of then President ENDARA abolished Panama's military and reformed the security apparatus by creating the Panamanian Public Forces; in October 1994, Panama's Legislative Assembly approved a constitutional amendment prohibiting the creation of a standing military force, but allowing the temporary establishment of special police units to counter acts of "external aggression"

Transnational Issues Panama

Disputes - international: organized illegal narcotics operations in Colombia operate within the border region with Panama

Illicit drugs:

major cocaine transshipment point and primary money-laundering center for narcotics revenue; money-laundering activity is especially heavy in the Colon Free Zone; offshore financial center; negligible signs of coca cultivation; monitoring of financial transactions is improving; official corruption remains a major problem

@Papua New Guinea

Introduction Papua New Guinea

Background:

The eastern half of the island of New Guinea - second largest in the world - was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997 after claiming some 20,000 lives.

Economy Papua New Guinea

Economy - overview:

Papua New Guinea is richly endowed with natural resources, but exploitation has been hampered by rugged terrain and the high cost of developing infrastructure. Agriculture provides a subsistence livelihood for 85% of the population. Mineral deposits, including oil, copper, and gold, account for 72% of export earnings. The economy has improved over the past two years, following a prolonged period of instability. Former Prime Minister Mekere MORAUTA had tried to restore integrity to state institutions, to stabilize the kina, restore stability to the national budget, to privatize public enterprises where appropriate, and to ensure ongoing peace on Bougainville. Australia annually supplies \$240 million in aid, which accounts for 20% of the national budget. Challenges face Prime Minister Michael SOMARE, including gaining further investor confidence, continuing efforts to privatize government assets, maintaining the support of members of Parliament, and balancing relations with Australia, the former colonial ruler.

@Paracel Islands

Introduction Paracel Islands

Background:
The Paracel Islands are surrounded by productive fishing grounds
and by potential oil and gas reserves. In 1932, French Indochina
annexed the islands and set up a weather station on Pattle Island;
maintenance was continued by its successor, Vietnam. China has

occupied the Paracel Islands since 1974, when its troops seized a South Vietnamese garrison occupying the western islands. The islands are claimed by Taiwan and Vietnam.

@Paraguay

Introduction Paraguay

Background:

In the disastrous War of the Triple Alliance (1865-70), Paraguay lost two-thirds of all adult males and much of its territory. It stagnated economically for the next half century. In the Chaco War of 1932-35, large, economically important areas were won from Bolivia. The 35-year military dictatorship of Alfredo STROESSNER was overthrown in 1989, and, despite a marked increase in political infighting in recent years, relatively free and regular presidential elections have been held since then.

Economy Paraguay

Economy - overview:

Landlocked Paraguay has a market economy marked by a large informal sector. This sector features both reexport of imported consumer goods to neighboring countries as well as the activities of thousands of microenterprises and urban street vendors. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. A large percentage of the population derives their living from agricultural activity, often on a subsistence basis. The formal economy grew by an average of about 3% annually in 1995-97, but averaged near-zero growth in 1998-2001 and contracted by 2.3 percent in 2002, in response to regional contagion and an outbreak of hoof-and-mouth disease. On a per capita basis, real income has stagnated at 1980 levels. Most observers attribute Paraguay's poor economic performance to political uncertainty,

corruption, lack of progress on structural reform, substantial internal and external debt, and deficient infrastructure. Aided by a firmer exchange rate and perhaps a greater confidence in the economic policy of the Duarte FRUTOS administration, the economy rebounded in 2003 and 2004, posting modest growth each year.

Introduction Peru

Background:

Ancient Peru was the seat of several prominent Andean civilizations, most notably that of the Incas whose empire was captured by the Spanish conquistadors in 1533. Peruvian independence was declared in 1821, and remaining Spanish forces defeated in 1824.

After a dozen years of military rule, Peru returned to democratic leadership in 1980, but experienced economic problems and the growth of a violent insurgency. President Alberto FUJIMORI's election in 1990 ushered in a decade that saw a dramatic turnaround in the economy and significant progress in curtailing guerrilla activity. Nevertheless, the president's increasing reliance on authoritarian measures and an economic slump in the late 1990s generated mounting dissatisfaction with his regime. FUJIMORI won reelection to a third term in the spring of 2000, but international pressure and corruption scandals led to his ouster by Congress in November of that year. A caretaker government oversaw new elections in the spring of 2001, which ushered in Alejandro TOLEDO as the new head of government; his presidency has been hampered by allegations of corruption.

Economy Peru

Economy - overview:

Peru's economy reflects its varied geography - an arid coastal region, the Andes further inland, and tropical lands bordering Colombia and Brazil. Abundant mineral resources are found in the mountainous areas, and Peru's coastal waters provide excellent fishing grounds. However, overdependence on minerals and metals subjects the economy to fluctuations in world prices, and a lack of infrastructure deters trade and investment. After several years of inconsistent economic performance, the Peruvian economy grew by an average 4 percent per year during the period 2002-2004, with a stable exchange rate and low inflation. Risk premiums on Peruvian bonds on secondary markets reached historically low levels in late 2004, reflecting investor optimism regarding the government's prudent fiscal policies and openness to trade and investment. Despite the strong macroeconomic performance, the TOLEDO administration remained unpopular in 2004, and unemployment and poverty have stayed persistently high.

Introduction Philippines

Background:

The Philippine Islands became a Spanish colony during the 16th century; they were ceded to the US in 1898 following the Spanish-American War. In 1935 the Philippines became a self-governing commonwealth. Manuel QUEZON was elected President and

was tasked with preparing the country for independence after a 10-year transition. In 1942 the islands fell under Japanese occupation during WWII, and US forces and Filipinos fought together during 1944-45 to regain control. On 4 July 1946 the Philippines attained their independence. The 21-year rule of Ferdinand MARCOS ended in 1986, when a widespread popular rebellion forced him into exile and installed Corazon AQUINO as president. Her presidency was hampered by several coup attempts, which prevented a return to full political stability and economic development. Fidel RAMOS was elected president in 1992 and his administration was marked by greater stability and progress on economic reforms. In 1992, the US closed its last military bases on the islands. Joseph ESTRADA was elected president in 1998, but was succeeded by his vice-president, Gloria MACAPAGAL-ARROYO, in January 2001 after ESTRADA's stormy impeachment trial on corruption charges broke down and widespread demonstrations led to his ouster. MACAPAGAL-ARROYO was elected to a six-year term in May 2004. The Philippine Government faces threats from armed communist insurgencies and from Muslim separatists in the south.

Flag description:

two equal horizontal bands of blue (top; representing peace and justice) and red (representing courage); a white equilateral triangle based on the hoist side represents equality; the center of the triangle displays a yellow sun with eight primary rays, each representing one of the first eight provinces that sought independence from Spain; each corner of the triangle contains a small, yellow, five-pointed star representing the three major geographical divisions of the country: Luzon, Visayas, and Mindanao; the design of the flag dates to 1897; in wartime the flag is flown upside down with the red band at the top

Economy Philippines

Economy - overview:

The Philippines was less severely affected by the Asian financial crisis of 1998 than its neighbors, aided in part by annual remittances of \$7-8 billion from overseas workers and no sustained runup in asset prices or foreign borrowing prior to the crisis. From a 0.6% decline in 1998, GDP expanded by 2.4% in 1999, and 4.4% in 2000, but slowed to 3.2% in 2001 in the context of a global economic slowdown, an export slump, and political and security concerns. GDP growth accelerated to 4.3% in 2002, 4.7% in 2003, and about 6% in 2004, reflecting the continued resilience of the service sector, and improved exports and agricultural output. Nonetheless, it will take a higher, sustained growth path to make appreciable progress in poverty alleviation given the Philippines' high annual population growth rate and unequal distribution of income. The Philippines also faces higher oil prices, higher interest rates on its dollar borrowings, and higher inflation. Fiscal constraints limit Manila's ability to finance infrastructure and social spending. The Philippines' consistently large budget deficit has produced a high debt level and has forced Manila to spend a large portion of the national government budget on debt service. Large, unprofitable public enterprises, especially in the energy sector, contribute to the government's debt because of slow progress on privatization. Credit rating agencies are increasingly concerned about the Philippines' ability to sustain the debt; legislative progress on new revenue measures will weigh heavily on credit rating decisions.

Disputes - international:

The Philippines claims sovereignty over certain of the Spratly Islands, known locally as the Kalayaan (Freedom) Islands, also claimed by China, Malaysia, Taiwan, and Vietnam; the 2002 "Declaration on the Conduct of Parties in the South China Sea," has eased tensions in the Spratly Islands but falls short of a legally binding "code of conduct" desired by several of the disputants; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Philippines retains a dormant

claim to Malaysia's Sabah State in northern Borneo based on the Sultanate of Sulu's granting the Philippines Government power of attorney to pursue a sovereignty claim on his behalf

@Pitcairn Islands

Introduction Pitcairn Islands

Background:

Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to less than 50 today.

Economy Pitcairn Islands

Economy - overview:

The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and

the sale of handicrafts to passing ships. In October 2004, more than one-quarter of Pitcairn's labor force was arrested, putting the economy in a bind, since their services were required as lighter crew to load or unload passing ships.

@Poland

Introduction Poland

Background:

Poland is an ancient nation that was conceived near the middle of the 10th century. Its golden age occurred in the 16th century. During the following century, the strengthening of the gentry and internal disorders weakened the nation. In a series of agreements between 1772 and 1795, Russia, Prussia, and Austria partitioned Poland amongst themselves. Poland regained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite state following the war, but its government was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union "Solidarity" that over time became a political force and by 1990 had swept parliamentary elections and the presidency. A "shock therapy" program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe, but Poland currently suffers low GDP growth and high unemployment. Solidarity suffered a major defeat in the 2001 parliamentary elections when it failed to elect a single deputy to the lower house of Parliament, and the new leaders of the Solidarity Trade Union subsequently pledged to reduce the Trade Union's political role. Poland joined NATO in 1999 and the European Union in 2004.

situation has improved since 1989 due to decline in heavy industry and increased environmental concern by post-Communist governments; air pollution nonetheless remains serious because of sulfur dioxide emissions from coal-fired power plants, and the resulting acid rain has caused forest damage; water pollution from industrial and municipal sources is also a problem, as is disposal of hazardous wastes; pollution levels should continue to decrease as industrial establishments bring their facilities up to European Union code, but at substantial cost to business and the government

Economy Poland

Economy - overview:

Poland has steadfastly pursued a policy of economic liberalization throughout the 1990s and today stands out as a success story among transition economies. Even so, much remains to be done, especially in bringing down unemployment. The privatization of small and medium-sized state-owned companies and a liberal law on establishing new firms has encouraged the development of the private business sector, but legal and bureaucratic obstacles alongside persistent corruption are hampering its further development. Poland's agricultural sector remains handicapped by surplus labor, inefficient small farms, and lack of investment. Restructuring and privatization of "sensitive sectors" (e.g., coal, steel, railroads, and energy), while recently initiated, have stalled. Reforms in health care, education, the pension system, and state administration have resulted in larger-than-expected fiscal pressures. Further progress in public finance depends mainly on reducing losses in Polish state enterprises, restraining entitlements, and overhauling the tax code to incorporate the growing gray economy and farmers, most of whom pay no tax. The government has introduced a package of

social and administrative spending cuts to reduce public spending by about \$17 billion through 2007. Additional reductions are under discussion in the legislature but could be trumped by election-year politics in 2005. Poland joined the EU in May 2004, and surging exports to the EU contributed to Poland's strong growth in 2004, though its competitiveness could be threatened by the zloty's appreciation. GDP per capita roughly equals that of the three Baltic states. Poland stands to benefit from nearly \$13.5 billion in EU funds, available through 2006. Farmers have already begun to reap the rewards of membership via higher food prices and EU agricultural subsidies.

Introduction Portugal

Background:

Following its heyday as a world power during the 15th and 16th centuries, Portugal lost much of its wealth and status with the destruction of Lisbon in a 1755 earthquake, occupation during the Napoleonic Wars, and the independence in 1822 of Brazil as a colony. A 1910 revolution deposed the monarchy; for most of the next six decades, repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year, Portugal granted independence to all of its African colonies. Portugal is a founding member of NATO and entered the EC (now the EU) in 1986.

Economy Portugal

Economy - overview:

Portugal has become a diversified and increasingly service-based economy since joining the European Community in 1986. Over the past decade, successive governments have privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country qualified for the European Monetary Union (EMU) in 1998 and began circulating the euro on 1 January 2002 along with 11 other EU member economies. Economic growth had been above the EU average for much of the past decade, but fell back in 2001-04. GDP per capita stands at two-thirds that of the Big Four EU economies. A poor educational system, in particular, has been an obstacle to greater productivity and growth. Portugal has been increasingly overshadowed by lower-cost producers in Central Europe and Asia as a target for foreign direct investment. The government faces tough choices in its attempts to boost Portugal's economic competitiveness while keeping the budget deficit within the eurozone's 3%-of-GDP ceiling.

@Puerto Rico

Introduction Puerto Rico

Background:

Populated for centuries by aboriginal peoples, the island was claimed by the Spanish Crown in 1493 following Columbus' second voyage to the Americas. In 1898, after 400 years of colonial rule that saw the indigenous population nearly exterminated and African slave labor introduced, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917. Popularly-elected governors have served since 1948. In 1952, a constitution was enacted providing for internal self government. In plebiscites held in 1967, 1993, and 1998, voters chose to retain commonwealth status.

Economy Puerto Rico

Economy - overview:

Puerto Rico has one of the most dynamic economies in the Caribbean region. A diverse industrial sector has far surpassed agriculture as the primary locus of economic activity and income. Encouraged by duty-free access to the US and by tax incentives, US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income, with estimated arrivals of nearly 5 million tourists in 1999. Growth fell off in 2001-03, largely due to the slowdown in the US economy, and has recovered in 2004.

Introduction Qatar

Background:

Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the amir, who had ruled the country since 1972. His son, the current Amir HAMAD bin Khalifa Al Thani, overthrew him in a bloodless coup in 1995. In 2001, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. Oil and natural gas revenues enable Qatar to have one of the highest per capita incomes in the world.

Economy Qatar

Economy - overview:
Oil and gas account for more than 55% of GDP, roughly 85% of export earnings, and 70% of government revenues. Oil and gas have given Qatar a per capita GDP about 80% of that of the leading West European industrial countries. Proved oil reserves of 16 billion barrels should ensure continued output at current levels for 23 years. Qatar's proved reserves of natural gas exceed 14 trillion cubic meters, more than 5% of the world total and third largest in the world. Long-term goals feature the development of offshore natural gas reserves to offset the ultimate decline in oil production. In recent years, Qatar has consistently posted trade surpluses largely because of high oil prices and increased natural gas exports, becoming one of the world's fastest growing and highest per-capita income countries.

Introduction Reunion

Background:

The Portuguese discovered the uninhabited island in 1513. From the 17th to the 19th centuries, French immigration, supplemented by influxes of Africans, Chinese, Malays, and Malabar Indians, gave the island its ethnic mix. The opening of the Suez Canal in 1869 cost the island its importance as a stopover on the East Indies trade route.

Economy Reunion

Economy - overview:

The economy has traditionally been based on agriculture, but services now dominate. Sugarcane has been the primary crop for more than a century, and in some years it accounts for 85% of exports. The government has been pushing the development of a tourist industry to relieve high unemployment, which amounts to one-third of the labor force. The gap in Reunion between the well-off and the poor is extraordinary and accounts for the persistent social tensions. The white and Indian communities are substantially better off than other segments of the population, often approaching European standards, whereas minority groups suffer the poverty and unemployment typical of the poorer nations of the African continent. The outbreak of severe rioting in February 1991 illustrates the seriousness of socioeconomic tensions. The economic well-being of Reunion depends heavily on continued financial assistance from France.

Introduction Romania

Background:

The principalities of Wallachia and Moldavia - for centuries under the suzerainty of the Turkish Ottoman Empire - secured their autonomy in 1856; they united in 1859 and a few years later adopted the new name of Romania. The country gained recognition of its independence in 1878. It joined the Allied Powers in World War I and acquired new territories following the conflict. In 1940, it allied with the Axis powers and participated in the 1941 German invasion of the USSR. Three years later, overrun by the Soviets, Romania signed an armistice. The post-war Soviet occupation led to the formation of a Communist "people's republic" in 1947 and the abdication of the king. The decades-long rule of dictator Nicolae CEAUSESCU, who took power in 1965, and his Securitate police state became increasingly oppressive and draconian through the 1980s. CEAUSESCU was overthrown

and executed in late 1989. Former Communists dominated the government until 1996, when they were swept from power by a fractious coalition of centrist parties. In 2000, the center-left Social Democratic Party (PSD) became Romania's leading party, governing with the support of the Democratic Union of Hungarians in Romania (UDMR). The opposition center-right alliance formed by the National Liberal Party (PNL) and the Democratic Party (PD) scored a surprise victory over the ruling PSD in December 2004 presidential elections. The PNL-PD alliance maintains a parliamentary majority with the support of the UDMR, the Humanist Party (PUR), and various ethnic minority groups. Although Romania completed accession talks

with the European Union (EU) in December 2004, it must continue to address rampant corruption - while invigorating lagging economic and democratic reforms - before it can achieve its hope of joining the EU, tentatively set for 2007. Romania joined NATO in March of 2004.

Economy Romania

Economy - overview:

Romania began the transition from Communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. The country emerged in 2000 from a punishing three-year recession thanks to strong demand in EU export markets. Despite the global slowdown in 2001-02, strong domestic activity in construction, agriculture, and consumption have kept growth above 4%. An IMF standby agreement, signed in 2001, has been accompanied by slow but palpable gains in privatization, deficit reduction, and

the curbing of inflation. The IMF Board approved Romania's completion of the standby agreement in October 2003, the first time Romania has successfully concluded an IMF agreement since the 1989 revolution. In July 2004, the executive board of the IMF approved a 24-month standby agreement for \$367 million. The Romanian authorities do not intend to draw on this agreement, however, viewing it simply as a precaution. Meanwhile, recent macroeconomic gains have done little to address Romania's widespread poverty, while corruption and red tape continue to handicap the business environment.

Transnational Issues Romania

Disputes - international:
Romania and Ukraine have taken their dispute over Ukrainian-administered Zmiyiny (Snake) Island and Black Sea maritime boundary to the ICJ for adjudication; Romania also opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea; Hungary amended the status law extending special social and cultural benefits to ethnic Hungarians in Romania, to which Romania had objected

Illicit drugs:
major transshipment point for Southwest Asian heroin transiting the Balkan route and small amounts of Latin American cocaine bound for Western Europe; although not a significant financial center, role as a narcotics conduit leaves it vulnerable to laundering which occurs via the banking system, currency exchange houses, and casinos

Introduction Russia

Background:

Founded in the 12th century, the Principality of Muscovy, was able to emerge from over 200 years of Mongol domination (13th-15th centuries) and to gradually conquer and absorb surrounding principalities. In the early 17th century, a new Romanov Dynasty continued this policy of expansion across Siberia to the Pacific. Under PETER I (ruled 1682-1725), hegemony was extended to the Baltic Sea and the country was renamed the Russian Empire. During the 19th century, more territorial acquisitions were made in Europe and Asia. Repeated devastating defeats of the Russian army in World War I led to widespread rioting in the major cities of the Russian Empire and to the overthrow in 1917 of the imperial household. The Communists under Vladimir LENIN seized power soon after and formed the USSR. The brutal rule of Josef STALIN (1928-53) strengthened Russian dominance of the Soviet Union at a cost of tens of millions of lives. The Soviet economy and society stagnated in the following decades until General Secretary Mikhail GORBACHEV (1985-91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize Communism, but his initiatives inadvertently released forces that by December 1991 splintered the USSR into 15 independent republics. Since then, Russia has struggled in its

efforts to build a democratic political system and market economy to replace the strict social, political, and economic controls of the Communist period. While some progress has been made on the economic front, recent years have seen a recentralization of power under Vladimir PUTIN and an erosion in nascent democratic institutions. A determined guerrilla conflict still plagues Russia in Chechnya.

Maritime claims:

territorial sea: 12 nm

exclusive economic zone: 200 nm

continental shelf: 200-m depth or to the depth of exploitation

Climate:

ranges from steppes in the south through humid continental in much of European Russia; subarctic in Siberia to tundra climate in the polar north; winters vary from cool along Black Sea coast to frigid in Siberia; summers vary from warm in the steppes to cool along Arctic coast

Terrain:

broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains along southern border regions

Elevation extremes:

lowest point: Caspian Sea -28 m

highest point: Gora El'brus 5,633 m

Natural resources:

wide natural resource base including major deposits of oil, natural gas, coal, and many strategic minerals, timber

note: formidable obstacles of climate, terrain, and distance hinder exploitation of natural resources

Land use: arable land: 7.33% permanent crops: 0.11% other: 92.56% (2001)

Irrigated land:
46,630 sq km (1998 est.)

Natural hazards:
permafrost over much of Siberia is a major impediment to development; volcanic activity in the Kuril Islands; volcanoes and earthquakes on the Kamchatka Peninsula; spring floods and summer/autumn forest fires throughout Siberia and parts of European Russia

Environment - current issues:
air pollution from heavy industry, emissions of coal-fired electric plants, and transportation in major cities; industrial, municipal, and agricultural pollution of inland waterways and seacoasts; deforestation; soil erosion; soil contamination from improper application of agricultural chemicals; scattered areas of sometimes intense radioactive contamination; groundwater contamination from toxic waste; urban solid waste management; abandoned stocks of obsolete pesticides

Environment - international agreements:
party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulfur 85, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Endangered Species, Environmental Modification, Hazardous Wastes,

Economy Russia

Economy - overview:

Russia ended 2004 with its sixth straight year of growth, averaging 6.5% annually since the financial crisis of 1998. Although high oil prices and a relatively cheap ruble are important drivers of this economic rebound, since 2000 investment and consumer-driven demand have played a noticeably increasing role. Real fixed capital investments have averaged gains greater than 10% over the last five years, and real personal incomes have realized average increases over 12%. Russia has also improved its international financial position since the 1998 financial crisis, with its foreign debt declining from 90% of GDP to around 28%. Strong oil export earnings have allowed Russia to increase its foreign reserves from only \$12 billion to some \$120 billion at yearend 2004. These achievements, along with a renewed government effort to advance structural reforms, have raised business and investor confidence in Russia's economic prospects. Nevertheless, serious problems persist. Economic growth slowed down in the second half of 2004 and the Russian government forecasts growth of only 4.5% to 6.2% for 2005. Oil, natural gas, metals, and timber account for more than 80% of exports, leaving the country vulnerable to swings in world prices. Russia's manufacturing base is dilapidated and must be replaced or modernized if the country is to achieve broad-based economic growth. Other problems include a weak banking system, a poor business climate that discourages both domestic and foreign investors, corruption, and widespread lack of trust in institutions. In addition, a string of investigations launched against a major Russian oil company, culminating with the arrest of its CEO in the fall of 2003, have raised concerns by some observers that President PUTIN is granting more influence to forces within his government that desire to reassert state control over the economy.

Transnational Issues Russia

Disputes - international:
in 2004, China and Russia divided up the islands in the Amur, Ussuri, and Argun Rivers, ending a century-old border dispute; the sovereignty dispute over the islands of Etorofu, Kunashiri, Shikotan, and the Habomai group, known in Japan as the "Northern Territories" and in Russia as the "Southern Kurils," occupied by the Soviet Union in 1945, now administered by Russia, and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Russia and Georgia agree on delimiting 80% of their common border, leaving certain small, strategic segments and the maritime boundary unresolved; OSCE observers monitor volatile areas such as the Pankisi Gorge in the Akhmeti region and the Kodori Gorge in Abkhazia; equidistant seabed treaties were signed and ratified with Azerbaijan and Kazakhstan in the Caspian Sea but no consensus exists on dividing the water column among the littoral states; Russia and Norway dispute their maritime limits in the Barents Sea and Russia's fishing rights beyond

Svalbard's territorial limits within the Svalbard Treaty zone; various groups in Finland advocate restoration of Karelia and other areas ceded to the Soviet Union following the Second World War but the Finnish Government asserts no territorial demands; in 1996, the Estonia-Russia technical border agreement was initialed but both have been hesitant to sign and ratify it, with Russia asserting that Estonia needs to better assimilate Russian-speakers and Estonian groups advocating realignment of the boundary based more closely on the 1920 Tartu Peace Treaty that would bring the now divided ethnic Setu people and parts of the Narva region within Estonia; the Latvian-Russian boundary treaty of 1997 remains unsigned and unratified with Russia linking it to better Latvian treatment of ethnic Russians and Latvian politicians demanding Russian agreement to a declaration that admits Soviet aggression during the Second World War and other issues; in 2003, the Lithuania-Russia land and maritime boundary treaty was ratified and a transit regime established through Lithuania linking Russia and its Kaliningrad coastal exclave, leaving only improvements to the border demarcation in 2005; delimitation of land boundary with Ukraine is complete, but states have agreed to defer demarcation; Russia and Ukraine continue talks but still dispute the alignment of a maritime boundary through the Kerch Strait and Sea of Azov; Kazakhstan and Russia continue demarcation of their long border; Russian Duma has not yet ratified 1990 Maritime Boundary Agreement with the US in the Bering Sea

Refugees and internally displaced persons:

IDPs: 368,000 (displacement from Chechnya and North Ossetia) (2004)

Illicit drugs:

limited cultivation of illicit cannabis and opium poppy and producer of methamphetamine, mostly for domestic consumption;

government has active illicit crop eradication program; used as transshipment point for Asian opiates, cannabis, and Latin American cocaine bound for growing domestic markets, to a lesser extent Western and Central Europe, and occasionally to the US; major source of heroin precursor chemicals; corruption and organized crime are key concerns; heroin increasingly popular in domestic market

Introduction Rwanda

Background:

In 1959, three years before independence from Belgium, the majority ethnic group, the Hutus, overthrew the ruling Tutsi king. Over the next several years, thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF), and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions, culminating in April 1994 in the genocide of roughly 800,000 Tutsis

and moderate Hutus. The Tutsi rebels defeated the Hutu regime and ended the killing in July 1994, but approximately 2 million Hutu refugees - many fearing Tutsi retribution - fled to neighboring Burundi, Tanzania, Uganda, and the former Zaire. Since then, most of the refugees have returned to Rwanda, but about 10,000 that remain in the neighboring Democratic Republic of the Congo have formed an extremist insurgency bent on retaking Rwanda, much as the RPF tried in 1990. Despite substantial international assistance and political reforms - including Rwanda's first local elections in March 1999 and its first post-genocide presidential and legislative elections in August and September 2003, respectively - the country continues to struggle to boost investment and agricultural output, and ethnic reconciliation is complicated by the real and perceived Tutsi political dominance. Kigali's increasing centralization and intolerance of dissent, the nagging Hutu extremist insurgency across the border, and Rwandan involvement in two wars in recent years in the neighboring Democratic Republic of the Congo continue to hinder Rwanda's efforts to escape its bloody legacy.

Economy Rwanda

Economy - overview:

Rwanda is a poor rural country with about 90% of the population engaged in (mainly subsistence) agriculture. It is the most densely populated country in Africa; landlocked with few natural resources and minimal industry. Primary foreign exchange earners are coffee and tea. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and eroded the country's ability to attract private and external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels, although poverty levels are higher now. GDP has rebounded and inflation has been curbed. Export earnings, however, have been hindered by low beverage prices, depriving the country of much needed hard currency. Despite Rwanda's fertile ecosystem, food production often does not keep pace with population growth, requiring food imports. Rwanda continues to receive substantial aid money and was approved for IMF-World Bank Heavily Indebted Poor Country (HIPC) initiative debt relief in late 2000. Kigali's high defense expenditures have caused tension between the government and international donors and lending agencies. An energy shortage and instability in neighboring states may slow growth in 2005, while the lack of adequate transportation linkages to other countries continues to handicap export growth.

@Saint Helena

Introduction Saint Helena

Background:

Uninhabited when first discovered by the Portuguese in 1502, Saint Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile, from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. Ascension Island is the site of a US Air Force auxiliary airfield; Gough Island has a meteorological station.

@Saint Kitts and Nevis

Introduction Saint Kitts and Nevis

Background:

First settled by the British in 1623, the islands became an associated state with full internal autonomy in 1967. The island of

Anguilla rebelled and was allowed to secede in 1971. Saint Kitts and Nevis achieved independence in 1983. In 1998, a vote in Nevis on a referendum to separate from Saint Kitts fell short of the two-thirds majority needed. Nevis is once more trying to separate from the Saint Kitts.

Economy Saint Kitts and Nevis

Economy - overview:
Sugar was the traditional mainstay of the Saint Kitts economy until the 1970s. Although the crop still dominates the agricultural sector, activities such as tourism, export-oriented manufacturing, and offshore banking have assumed larger roles in the economy. Tourism revenues are now the chief source of the islands' foreign exchange. The opening of a 470-room resort in February 2003 was expected to bring in much-needed revenue.

Economy Saint Pierre and Miquelon

Economy - overview:

The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. The islands are heavily subsidized by France to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects. Recent test drilling for oil may pave the way for development of the energy sector.

Economy Saint Vincent and the Grenadines

Economy - overview:

Economic growth in this lower-middle-income country hinges upon seasonal variations in the agricultural and tourism sectors.

Tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002, and tourism in the Eastern Caribbean has suffered low arrivals following 11 September 2001. Saint Vincent is home to a small offshore banking sector and has moved to adopt international

regulatory standards. Saint Vincent is also a large producer of marijuana and is being used as a transshipment point for illegal narcotics from South America.

Introduction Samoa

Background:

New Zealand occupied the German protectorate of Western Samoa at the outbreak of World War I in 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the "Western" from its name in 1997.

Economy Samoa

Economy - overview:

The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, agriculture, and fishing. The country is vulnerable to devastating storms. Agriculture employs two-thirds of the labor force, and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. The decline of fish stocks in the area is a continuing problem. Tourism is an expanding sector, accounting for 25% of GDP; about 88,000 tourists visited the islands in 2001. One factory in the Foreign Trade Zone employs 3,000 people to make automobile electrical harnesses for an assembly plant in Australia. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline, meantime protecting the environment. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

@San Marino

Introduction San Marino

Background:

The third smallest state in Europe (after the Holy See and Monaco) also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named Marino in 301 A.D. San Marino's foreign policy is aligned with that of Italy. Social and political trends in the republic also track closely with those of its larger neighbor.

@Sao Tome and Principe

Introduction Sao Tome and Principe

Background:

Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century - all grown with plantation slave labor, a form of which lingered into the 20th century. Although independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. Though the first free elections were held in 1991, the political environment has been one of continued instability with frequent changes in leadership and coup attempts in 1995 and 2003. The recent discovery of oil in the Gulf of Guinea is likely to have a significant impact on the country's economy.

Economy Sao Tome and Principe

Economy - overview:

This small poor island economy has become increasingly dependent on cocoa since independence in 1975. Cocoa production has substantially declined in recent years because of drought and mismanagement, but strengthening prices helped boost export earnings in 2003. Sao Tome has to import all fuels, most manufactured goods, consumer goods, and a substantial amount of food. Over the years, it has had difficulty servicing its external debt and has relied heavily on concessional aid and debt rescheduling. Sao Tome benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program, but lacking a formal poverty reduction program with the IMF, it has not benefited from subsequent HIPC debt reductions. Sao Tome's external debt stands at over \$300 million. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies. Sao Tome is optimistic about the development of petroleum resources in its territorial waters in the oil-rich Gulf of Guinea. The first production license was sold to a consortium led by US-based oil firms. Much of the 2005 budget is dependent upon the sale of additional production licenses.

@Saudi Arabia

Introduction Saudi Arabia

Background:

In 1902, ABD AL-AZIZ bin Abd al-Rahman Al Saud captured Riyadh and set out on a 30-year campaign to unify the Arabian Peninsula. A son of ABD AL-AZIZ rules the country today, and the country's Basic Law stipulates that the throne shall remain in the hands of the aging sons and grandsons of the kingdom's founder. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. The continuing presence of foreign troops on Saudi soil after Operation Desert Storm remained a source of tension between the royal family and the public until the US military's near-complete withdrawal to neighboring Qatar in 2003. The first major terrorist attacks in Saudi Arabia in several years, which occurred in May and November 2003, prompted renewed efforts on the part of the Saudi government to counter domestic terrorism and extremism, which also coincided with a slight upsurge in media freedom and announcement of government plans to phase in partial political representation. A burgeoning population, aquifer depletion, and an economy largely dependent on petroleum output and prices are all ongoing governmental concerns.

Economy Saudi Arabia

Economy - overview:
This is an oil-based economy with strong government controls over major economic activities. Saudi Arabia possesses 25% of the world's proven petroleum reserves, ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 75% of budget revenues, 45% of GDP, and 90% of

export earnings. About 40% of GDP comes from the private sector. Roughly five and a half million foreign workers play an important role in the Saudi economy, for example, in the oil and service sectors. The government in 1999 announced plans to begin privatizing the electricity companies, which follows the ongoing privatization of the telecommunications company. The government is encouraging private sector growth to lessen the kingdom's dependence on oil and increase employment opportunities for the swelling Saudi population. Priorities for government spending in the short term include additional funds for education and for the water and sewage systems. Economic reforms proceed cautiously because of deep-rooted political and social conservatism.

Introduction Senegal

Background:
Independent from France in 1960, Senegal joined with The Gambia to
form the nominal confederation of Senegambia in 1982. However, the
envisaged integration of the two countries was never carried out,
and the union was dissolved in 1989. Despite peace talks, a southern
separatist group sporadically has clashed with government forces
since 1982. Senegal has a long history of participating in
international peacekeeping.

Economy Senegal

Economy - overview:

In January 1994, Senegal undertook a bold and ambitious economic reform program with the support of the international donor community. This reform began with a 50% devaluation of Senegal's currency, the CFA franc, which was linked at a fixed rate to the French franc. Government price controls and subsidies have been steadily dismantled. After seeing its economy contract by 2.1% in 1993, Senegal made an important turnaround, thanks to the reform program, with real growth in GDP averaging 5% annually during 1995-2003. Annual inflation had been pushed down to the low single digits. As a member of the West African Economic and Monetary Union (WAEMU), Senegal is working toward greater regional integration with a unified external tariff and a more stable monetary policy. Senegal still relies heavily upon outside donor assistance, however. Under the IMF's Highly Indebted Poor Countries debt relief program, Senegal will benefit from eradication of two-thirds of its bilateral, multilateral, and private sector debt.

@Serbia and Montenegro

Introduction Serbia and Montenegro

Background:

The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Occupation by Nazi Germany in 1941 was resisted by various paramilitary bands that fought each other as well as the invaders. The group headed by Marshal TITO took full control upon German expulsion in 1945. Although Communist, his new government and its successors (he died in 1980) managed to steer their own path between the Warsaw Pact nations and the West for the next four and a half decades. In the early 1990s, post-TITO Yugoslavia began to unravel along ethnic lines: Slovenia, Croatia, Macedonia, and Bosnia and Herzegovina were recognized as independent states in 1992. The remaining republics of Serbia and Montenegro declared a new "Federal Republic of Yugoslavia" (FRY) in April 1992 and, under President Slobodan MILOSEVIC, Serbia led various military intervention efforts to unite ethnic Serbs in neighboring republics into a "Greater Serbia." All of these efforts were ultimately unsuccessful and led to Yugoslavia being ousted from the UN in 1992. In 1998-99, massive expulsions by FRY forces and Serb paramilitaries of ethnic Albanians living in Kosovo provoked an international response, including the NATO bombing of Serbia and the stationing of a NATO-led force (KFOR), in Kosovo. Federal elections in the fall of

2000, brought about the ouster of MILOSEVIC and installed Vojislav KOSTUNICA as president. The arrest of MILOSEVIC in 2001 allowed for

his subsequent transfer to the International Criminal Tribunal for the Former Yugoslavia in The Hague to be tried for crimes against humanity. In 2001, the country's suspension from the UN was lifted, and it was once more accepted into UN organizations under the name of the Federal Republic of Yugoslavia. Kosovo has been governed by the UN Interim Administration Mission in Kosovo (UNMIK) since June 1999, under the authority of UN Security Council Resolution 1244, pending a determination by the international community of its future status. In 2002, the Serbian and Montenegrin components of Yugoslavia began negotiations to forge a looser relationship. These talks became a reality in February 2003 when lawmakers restructured the country into a loose federation of two republics called Serbia and Montenegro. The Constitutional Charter of Serbia and Montenegro includes a provision that allows either republic to hold a referendum after three years that would allow for their independence from the state union.

Economy Serbia and Montenegro

Economy - overview:

MILOSEVIC-era mismanagement of the economy, an extended period of

economic sanctions, and the damage to Yugoslavia's infrastructure and industry during the NATO airstrikes in 1999 left the economy only half the size it was in 1990. After the ousting of former Federal Yugoslav President MILOSEVIC in October 2000, the Democratic Opposition of Serbia (DOS) coalition government implemented stabilization measures and embarked on an aggressive market reform program. After renewing its membership in the IMF in December 2000, a down-sized Yugoslavia continued to reintegrate into the international community by rejoining the World Bank (IBRD) and the European Bank for Reconstruction and Development (EBRD). A World Bank-European Commission sponsored Donors' Conference held in June 2001 raised \$1.3 billion for economic restructuring. An agreement rescheduling the country's \$4.5 billion Paris Club government debts was concluded in November 2001 - it wrote off 66% of the debt - and the London Club of private creditors forgave \$1.7 billion of debt, just over half the total owed, in July 2004. The smaller republic of Montenegro severed its economy from federal control and from Serbia during the MILOSEVIC era and continues to maintain its own central bank, uses the euro instead of the Yugoslav dinar as official currency, collects customs tariffs, and manages its own budget. Kosovo's economy continues to transition to a market-based system, and is largely dependent on the international community and the diaspora for financial and technical assistance. The euro and the Yugoslav dinar are both accepted currencies in Kosovo. While maintaining ultimate oversight, UNMIK continues to work with the European Union and Kosovo's local provisional government to accelerate economic growth, lower unemployment, and attract foreign investment to help Kosovo integrate into regional economic structures. The complexity of Serbia and Montenegro political relationships, slow progress in privatization, legal uncertainty

over property rights, scarcity of foreign-investment and a substantial foreign trade deficit are holding back the economy. Arrangements with the IMF, especially requirements for fiscal discipline, are an important element in policy formation. Severe unemployment remains a key political economic problem for this entire region.

Introduction Seychelles

Background:

A lengthy struggle between France and Great Britain for the islands ended in 1814, when they were ceded to the latter. Independence came in 1976. Socialist rule was brought to a close with a new constitution and free elections in 1993. The most recent presidential elections were held in 2001; President RENE, who had served since 1977, was re-elected. In April 2004 RENE stepped down and Vice President James MICHEL was sworn in as president.

Economy Seychelles

Economy - overview:

Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the old near-subsistence level. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years the government has encouraged foreign investment in order to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. A sharp drop illustrated the vulnerability of the tourist sector in 1991-92 due largely to the Gulf war, and once again following the 11 September 2001 terrorist attacks on the US. Growth slowed in 1998-2002, and fell in 2003, due to sluggish tourist and tuna sectors, but resumed in 2004, erasing a persistent budget deficit. Tight controls on exchange rates and the scarcity of foreign exchange have impaired short-term economic prospects. The black market value of the Seychelles rupee is half the official exchange rate; without a devaluation of the currency the tourist sector may remain sluggish as vacationers seek cheaper destinations such as Comoros, Mauritius, and Madagascar.

Introduction Sierra Leone

Background:

The 1991 to 2002 civil war between the government and the
Revolutionary United Front (RUF) resulted in tens of thousands of

deaths and the displacement of more than 2 million people (about one-third of the population), many of whom are now refugees in neighboring countries. With the support of the UN peacekeeping force and contributions from the World Bank and international community, demobilization and disarmament of the RUF and Civil Defense Forces (CDF) combatants has been completed. National elections were held in May 2002 and the government continues to slowly reestablish its authority. However, the gradual withdrawal of most UN Mission in Sierra Leone (UNAMSIL) peacekeepers in 2004 and early 2005, deteriorating political and economic conditions in Guinea, and the tenuous security situation in neighboring Liberia may present challenges to the continuation of Sierra Leone's stability.

Economy Sierra Leone

Economy - overview:
Sierra Leone is an extremely poor African nation with tremendous inequality in income distribution. While it possesses substantial mineral, agricultural, and fishery resources, its economic and social infrastructure is not well developed, and serious social disorders continue to hamper economic development. About two-thirds of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Plans to reopen bauxite and rutile mines shut down during an 11 year civil war have not been implemented due to lack of foreign investment. Alluvial diamond mining remains the major source of hard currency earnings. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad,

which is essential to offset the severe trade imbalance and supplement government revenues. International financial institutions contributed over \$600 million in development aid and budgetary support in 2003.

Economy Singapore

Economy - overview:
Singapore, a highly developed and successful free market economy,
enjoys a remarkably open and corruption-free environment, stable
prices, and a per capita GDP equal to that of the Big 4 West
European countries. The economy depends heavily on exports,
particularly in electronics and manufacturing. It was hard hit in
2001-03 by the global recession, by the slump in the technology
sector, and by an outbreak of Severe Acute Respiratory Syndrome in
2003, which curbed tourism and consumer spending. The government
hopes to establish a new growth path that will be less vulnerable to

the external business cycle and will continue efforts to establish Singapore as Southeast Asia's financial and high-tech hub. Fiscal stimulus, low interest rates, a surge in exports, and internal flexibility led to vigorous growth in 2004, with real GDP rising by 8 percent, by far the economy's best performance since 2000.

Introduction Slovakia

Background:

In 1918 the Slovaks joined the closely related Czechs to form Czechoslovakia. Following the chaos of World War II, Czechoslovakia became a Communist nation within Soviet-ruled Eastern Europe. Soviet influence collapsed in 1989 and Czechoslovakia once more became free. The Slovaks and the Czechs agreed to separate peacefully on 1 January 1993. Slovakia joined both NATO and the EU in the spring of 2004.

Economy Slovakia

Economy - overview:

Slovakia has mastered much of the difficult transition from a centrally planned economy to a modern market economy. The DZURINDA

government made excellent progress during 2001-04 in macroeconomic stabilization and structural reform. Major privatizations are nearly complete, the banking sector is almost completely in foreign hands, and the government has helped facilitate a foreign investment boom with business-friendly policies, such as labor market liberalization and a 19% flat tax. Slovakia's economic growth exceeded expectations in 2001-04, despite the general European slowdown. Unemployment, at an unacceptable 15% in 2003-04, remains the economy's Achilles heel. Slovakia joined the EU on 1 May 2004.

Introduction Slovenia

Background:

The Slovene lands were part of the Holy Roman Empire and Austria until 1918 when the Slovenes joined the Serbs and Croats in forming a new multinational state, renamed Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though Communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power by the majority Serbs, the Slovenes succeeded in establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy have assisted in Slovenia's transformation to a

modern state. Slovenia acceded to both NATO and the EU in the spring of 2004.

Economy Slovenia

Economy - overview:

Slovenia, with its historical ties to Western Europe, enjoys a GDP per capita substantially higher than that of the other transitioning economies of Central Europe. In March 2004, Slovenia became the first transition country to graduate from borrower status to donor partner at the World Bank. Privatization of the economy proceeded at an accelerated pace in 2002-04. Despite lackluster performance in

Europe in 2001-04, Slovenia maintained moderate growth. Structural reforms to improve the business environment have allowed for greater foreign participation in Slovenia's economy and have helped to lower unemployment. Further measures to curb inflation are still needed. Corruption and the high degree of coordination between government, business, and central bank policy were issues of concern in the run-up to Slovenia's 1 May 2004 accession to the European Union. In mid-2004 Slovenia agreed to adopt the euro by 2007 and, therefore, must keep its debt levels, budget deficits, interest rates, and inflation levels within the EU's Maastricht criteria.

@Solomon Islands

Introduction Solomon Islands

Background:

The UK established a protectorate over the Solomon Islands in the 1890s. Some of the bitterest fighting of World War II occurred on these islands. Self-government was achieved in 1976 and independence two years later. Ethnic violence, government malfeasance, and endemic crime have undermined stability and civil society. In June 2003, Prime Minister Sir Allen KEMAKEZA sought the assistance of Australia in reestablishing law and order; the following month, an Australian-led multinational force arrived to restore peace and disarm ethnic militias. The Regional Assistance Mission to the Solomon Islands (RAMSI) has been very effective in restoring law and order and rebuilding government institutions.

By the end of 2004 the Regional Assistance Mission to the Solomon Islands (RAMSI) had been scaled back to 302 police officers and 120 military in addition to civilian technical advisors.

Economy Solomon Islands

Economy - overview:

The bulk of the population depends on agriculture, fishing, and forestry for at least part of their livelihood. Most manufactured

goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. Prior to the arrival of the Regional Assistance Mission to the Solomon Islands (RAMSI), severe ethnic violence, the closing of key businesses, and an empty government treasury culminated in economic collapse. RAMSI has enabled a return to law and order, a new period of economic stability, and modest growth as the economy rebuilds.

Introduction Somalia

Background:

The regime of Mohamed SIAD Barre was ousted in January 1991; turmoil, factional fighting, and anarchy have followed in the years since. In May of 1991, northern clans declared an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence, aided by the overwhelming dominance of a ruling clan and economic infrastructure left behind by British, Russian, and American military assistance programs. The regions of Bari and Nugaal and northern Mudug comprise a neighboring self-declared autonomous state of Puntland, which has been self-governing since 1998, but does not aim at independence; it has also made strides towards reconstructing a legitimate, representative government, but has suffered some civil strife. Puntland disputes its border with Somaliland as it also claims portions of eastern Sool and Sanaag. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. The mandate of the Transitional National Government (TNG), created in August 2000 in Arta, Djibouti,

expired in August 2003. New Somali President Abdullahi YUSUF Ahmed has formed a new Transitional Federal Government (TFG) consisting of a 275-member parliament. It was established in October 2004 to replace the TNG but has not yet moved to Mogadishu. Discussions regarding the establishment of a new government in Mogadishu are ongoing in Kenya. Numerous warlords and factions are still fighting for control of the capital city as well as for other southern regions. Suspicion of Somali links with global terrorism further complicates the picture.

Economy Somalia

Economy - overview:

Somalia's economic fortunes are driven by its deep political divisions. The northwestern area has declared its independence as the "Republic of Somaliland"; the northeastern region of Puntland is a semi-autonomous state; and the remaining southern portion is riddled with the struggles of rival factions. Economic life continues, in part because much activity is local and relatively easily protected. Agriculture is the most important sector, with livestock normally accounting for about 40% of GDP and about 65% of export earnings, but Saudi Arabia's recent ban on Somali livestock, because of Rift Valley Fever concerns, has severely hampered the sector. Nomads and semi-nomads, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar, sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and sold as scrap metal. Despite the seeming anarchy, Somalia's service sector has managed to survive and grow.

Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money exchange services have sprouted throughout the country, handling between \$500 million and \$1 billion in remittances annually. Mogadishu's main market offers a variety of goods from food to the newest electronic gadgets. Hotels continue to operate, and militias provide security. The ongoing civil disturbances and clan rivalries, however, have interfered with any broad-based economic development and international aid arrangements. In 2004 Somalia's overdue financial obligations to the IMF continued to grow. Statistics on Somalia's GDP, growth, per capita income, and inflation should be viewed skeptically. In late December 2004, a major tsunami took an estimated 150 lives and caused destruction of property in coastal areas.

@South Africa

Introduction South Africa

Background:

After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred

wealth and immigration and intensified the subjugation of the native inhabitants. The Boers resisted British encroachments, but were defeated in the Boer War (1899-1902). The resulting Union of South Africa operated under a policy of apartheid - the separate development of the races. The 1990s brought an end to apartheid politically and ushered in black majority rule.

Capital:

Pretoria; note - Cape Town is the legislative center and Bloemfontein the judicial center

Administrative divisions:

9 provinces; Eastern Cape, Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga, North-West, Northern Cape, Western Cape

Independence:

31 May 1910 (from UK); note - South Africa became a republic in 1961 following an October 1960 referendum

National holiday:

Freedom Day, 27 April (1994)

Constitution:

10 December 1996; this new constitution was certified by the Constitutional Court on 4 December 1996, was signed by then President MANDELA on 10 December 1996, and entered into effect on 3 February 1997; it is being implemented in phases

Legal system:

based on Roman-Dutch law and English common law; accepts compulsory ICJ jurisdiction, with reservations

Suffrage:

18 years of age; universal

Executive branch:

chief of state: President Thabo MBEKI (since 16 June 1999);

Economy South Africa

Economy - overview:

South Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors; a stock exchange that ranks among the 10 largest in the world; and a modern infrastructure supporting an efficient distribution of goods to major urban centers throughout the region. However, growth has not been strong enough to lower South Africa's high unemployment rate; and daunting economic problems remain from the apartheid era, especially poverty and lack

of economic empowerment among the disadvantaged groups. South African economic policy is fiscally conservative, but pragmatic, focusing on targeting inflation and liberalizing trade as means to increase job growth and household income.

Transnational Issues South Africa

Disputes - international:

South Africa has placed military along the border to stem the thousands of Zimbabweans fleeing to find work and escape political persecution; managed dispute with Namibia over the location of the boundary in the Orange River

Illicit drugs:

transshipment center for heroin, hashish, marijuana, and cocaine; cocaine consumption on the rise; world's largest market for illicit methaqualone, usually imported illegally from India through various east African countries; illicit cultivation of marijuana; attractive venue for money launderers given the increasing level of organized criminal and narcotics activity in the region

@Southern Ocean

Introduction Southern Ocean

Background:

A decision by the International Hydrographic Organization in the spring of 2000 delimited a fifth world ocean - the Southern Ocean - from the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude, which coincides with the Antarctic Treaty Limit. The Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean).

Geography Southern Ocean

Location:

body of water between 60 degrees south latitude and Antarctica

Geographic coordinates:

65 00 S, 0 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references:

Antarctic Region

Area:

total: 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake

Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area - comparative:

slightly more than twice the size of the US

Coastline:

17,968 km

Climate:

sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain:

the Southern Ocean is deep, 4,000 to 5,000 meters over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 meters (the global mean is 133 meters); the Antarctic icepack grows from an average minimum of 2.6 million square kilometers in March to about 18.8 million square kilometers in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current,

transporting 130 million cubic meters of water per second - 100 times the flow of all the world's rivers

Elevation extremes:

lowest point: -7,235 m at the southern end of the South Sandwich Trench

highest point: sea level 0 m

Natural resources:

probable large and possible giant oil and gas fields on the continental margin, manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals - none exploited; krill, fishes

Natural hazards:

huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 meter thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Environment - current issues:

increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton) by as much as 15% and damaging the DNA of some fish; illegal, unreported, and unregulated fishing in recent years, especially the landing of an estimated five to six times more Patagonian toothfish than the regulated fishery, which is likely to affect the sustainability of the stock; large amount of incidental mortality of seabirds resulting from long-line fishing for toothfish

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment - international agreements:

the Southern Ocean is subject to all international agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)

note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence) which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the very cold polar surface waters to the south and the warmer waters to the north

Geography - note:

the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the very cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

Economy Southern Ocean

Economy - overview:

Fisheries in 2000-01 (1 July to 30 June) landed 112,934 metric tons, of which 87% was krill and 11% Patagonian toothfish. International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and antarctic toothfish. In the 2000-01 antarctic summer 12,248 tourists, most of them seaborne, visited the Southern Ocean and Antarctica, compared to 14,762 the previous year.

Transportation Southern Ocean

Ports and harbors:

McMurdo, Palmer, and offshore anchorages in Antarctica
note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most of them to short periods in midsummer; even then some cannot be entered without icebreaker escort; most antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels; vessels in any port south of 60 degrees south are subject to inspection by Antarctic Treaty observers (see Article 7)

Transportation - note:

Drake Passage offers alternative to transit through the Panama Canal

Transnational Issues Southern Ocean

Disputes - international:

Antarctic Treaty defers claims (see Antarctica entry), but Argentina, Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the United Nations Convention on the Law of the Sea (UNCLOS) to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west

@South Georgia and the South Sandwich Islands

Introduction South Georgia and the South Sandwich Islands

Background:

The islands lie approximately 1,000 km east of the Falkland Islands and have been under British administration since 1908, except for a

brief period in 1982 when Argentina occupied them. Grytviken, on South Georgia, was a 19th and early 20th century whaling station. Famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses scientists from the British Antarctic Survey. The islands have large bird and seal populations, and, recognizing the importance of preserving the marine stocks in adjacent waters, the UK, in 1993, extended the exclusive fishing zone from 12 nm to 200 nm around each island.

Economy South Georgia and the South Sandwich Islands

Economy - overview:

Some fishing takes place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from postage stamps produced in the UK, sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

@Spain

Introduction Spain

Background:

Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic

and political power. Spain remained neutral in World Wars I and II, but suffered through a devastating civil war (1936-39). In the second half of the 20th century, Spain has played a catch-up role in the western international community; it joined the EU in 1986. Continuing challenges include Basque Fatherland and Liberty (ETA) terrorism and further reductions in unemployment.

Economy Spain

Economy - overview:

The Spanish economy boomed from 1986 to 1990, averaging five percent annual growth. After a European-wide recession in the early 1990s, the Spanish economy resumed moderate growth starting in 1994. Spain's mixed capitalist economy supports a GDP that on a per capita basis is 80% that of the four leading West European economies. The center-right government of former President AZNAR successfully worked to gain admission to the first group of countries launching the European single currency (the euro) on 1 January 1999. The AZNAR administration continued to advocate liberalization, privatization, and deregulation of the economy and introduced some tax reforms to that end. Unemployment fell steadily under the AZNAR administration but remains high at 10.4%. Growth of 2.5% in 2003 and 2.6% in 2004 was satisfactory given the background of a faltering European economy. The socialist president, RODRIGUEZ ZAPATERO, has initiated economic and social reforms that are generally popular among the masses of people but that are anathema to religious and other conservative elements. Adjusting to the monetary and other economic policies of an integrated Europe, reducing unemployment, and absorbing widespread social changes will pose challenges to Spain over the next few years.

@Spratly Islands

Introduction Spratly Islands

Background:

The Spratly Islands consist of more than 100 small islands or reefs. They are surrounded by rich fishing grounds and potentially by gas and oil deposits. They are claimed in their entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. About 45 islands are occupied by relatively small numbers of military forces from China, Malaysia, the Philippines, Taiwan, and Vietnam. Brunei has established a fishing zone that overlaps a southern reef, but has not made any formal claim.

Geography Spratly Islands

Location:

Southeastern Asia, group of reefs and islands in the South China Sea, about two-thirds of the way from southern Vietnam to the southern Philippines

Economy Spratly Islands

Economy - overview:

Economic activity is limited to commercial fishing. The proximity to nearby oil- and gas-producing sedimentary basins suggests the potential for oil and gas deposits, but the region is largely unexplored; there are no reliable estimates of potential reserves; commercial exploitation has yet to be developed.

Transnational Issues Spratly Islands

Disputes - international:
all of the Spratly Islands are claimed by China, Taiwan, and Vietnam; parts of them are claimed by Malaysia and the Philippines; in 1984, Brunei established an exclusive fishing zone that encompasses Louisa Reef in the southern Spratly Islands but has not publicly claimed the reef; claimants in November 2002 signed the "Declaration on the Conduct of Parties in the South China Sea,"

which has eased tensions but falls short of a legally binding "code of conduct"; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratlys

@Sri Lanka

Introduction Sri Lanka

Background:

The Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced beginning in about the mid-third century B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty seized power in the north and established a Tamil kingdom. Occupied by the Portuguese in the 16th century and by the Dutch in the 17th century, the island was ceded to the British in 1796, became a crown colony in 1802, and was united under British rule by 1815. As Ceylon, it became independent

in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted into war in 1983. Tens of thousands have died in an ethnic conflict that continues to fester. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam formalized a cease-fire in February 2002, with Norway brokering peace negotiations.

Economy Sri Lanka

Economy - overview:
In 1977, Colombo abandoned statist economic policies and its import substitution trade policy for market-oriented policies and export-oriented trade. Sri Lanka's most dynamic sectors now are food processing, textiles and apparel, food and beverages, telecommunications, and insurance and banking. In 2003, plantation crops made up only 15% of exports (compared with 93% in 1970), while textiles and garments accounted for 63%. GDP grew at an average annual rate of 5.5% in the early 1990s until a drought and a deteriorating security situation lowered growth to 3.8% in 1996. The economy rebounded in 1997-2000 with average growth of 5.3%, but 2001 saw the first contraction in the country's history, -1.4%, due to a combination of power shortages, severe budgetary problems, the global slowdown, and continuing civil strife. Growth recovered to 4.0% in 2002 and to 5.2% in both 2003 and 2004. About 800,000 Sri

Lankans work abroad, 90% in the Middle East. They send home about \$1 billion a year. The struggle by the Tamil Tigers of the north and east for a largely independent homeland continues to cast a shadow over the economy. In late December 2004, a major tsunami took about 31,000 lives, left more than 6,300 missing and 443,000 displaced, and destroyed an estimated \$1.5 billion worth of property.

Introduction Sudan

Background:

Military regimes favoring Islamic-oriented governments have dominated national politics since independence from the UK in 1956. Sudan was embroiled in two prolonged civil wars during most of the remainder of the 20th century. These conflicts were rooted in northern economic, political, and social domination of non-Muslim, non-Arab southern Sudanese. The first civil war ended in 1972, but broke out again in 1983. The second war and famine-related effects

resulted in more than 2 million deaths and over 4 million people displaced over a period of two decades. Peace talks gained momentum in 2002-04 with the signing of several accords; a final Naivasha peace treaty of January 2005 granted the southern rebels autonomy for six years, after which a referendum for independence is scheduled to be held. A separate conflict that broke out in the western region of Darfur in 2003 resulted in tens of thousands of deaths and over 1 million displaced, but by early 2005, peacekeeping troops had stabilized the situation.

Economy Sudan

Economy - overview:

Sudan has turned around a struggling economy with sound economic policies and infrastructure investments, but it still faces formidable economic problems, starting from its low level of per capita output. From 1997 to date, Sudan has been implementing IMF macroeconomic reforms. In 1999, Sudan began exporting crude oil and in the last quarter of 1999 recorded its first trade surplus, which, along with monetary policy, has stabilized the exchange rate. Increased oil production, revived light industry, and expanded

export processing zones helped sustain GDP growth at 6.4% in 2004. Agriculture production remains Sudan's most important sector, employing 80% of the work force, contributing 39% of GDP, and accounting for most of GDP growth, but most farms remain rain-fed and susceptible to drought. Chronic instability - including the long-standing civil war between the Muslim north and the Christian/pagan south, adverse weather, and weak world agricultural prices - ensure that much of the population will remain at or below the poverty line for years.

accuses Eritrea of supporting Sudanese rebel groups; efforts to demarcate the porous boundary with Ethiopia have been delayed by civil and ethnic fighting in Sudan; Kenya's administrative boundary extends into the southern Sudan, creating the "Ilemi Triangle"; Egypt and Sudan retain claims to administer triangular areas that extend north and south of the 1899 Treaty boundary along the 22nd Parallel, but have withdrawn their military presence; Egypt is economically developing the "Hala'ib Triangle" north of the Treaty Line; periodic violent skirmishes with Sudanese residents over water and grazing rights persist among related pastoral populations from the Central African Republic along the border

Introduction Suriname

Background:

Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by a military regime that soon declared a socialist republic. It continued to rule through a succession of nominally civilian administrations until 1987, when international pressure finally forced a democratic election. In 1989, the military overthrew the civilian government, but a democratically-elected government returned to power in 1991.

Economy Suriname

Economy - overview:

The economy is dominated by the alumina industry, which accounts for more than 15% of GDP and 70% of export earnings. Suriname's economic prospects for the medium term will depend on continued commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition. The government of Ronald VENETIAAN has begun an austerity program, raised taxes, and attempted to control spending. While - in 2002 - President VENETIAAN agreed to a large pay raise for civil servants, threatening his earlier gains in stabilizing the economy, he has not repeated this promise in the run-up to the May 2005 elections. The Dutch Government has agreed to restart the aid flow, which will allow Suriname to access international development financing, but plans to phase out funds over the next five years. The short-term economic outlook depends on the government's ability to control inflation and on the development of projects in the bauxite and gold mining sectors. Prospects for local onshore oil production are good, as a drilling program is underway. Offshore oil drilling was given a boost in 2004 when the State Oil Company (Staatsolie) signed exploration agreements with Repsol and Mearsk.

Economy Svalbard

Economy - overview:
Coal mining is the major economic activity on Svalbard. The treaty of 9 February 1920 gives the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still mining are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some hunting of seal, reindeer, and fox.

@Swaziland

Introduction Swaziland

Background:

Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted in 1968. Student and labor unrest during the 1990s pressured the monarchy (one of the oldest on the continent) to grudgingly allow political reform and greater democracy. Swaziland recently surpassed Botswana as the country with the world's highest known rates of HIV/AIDS infection

Economy Swaziland

Economy - overview:

In this small, landlocked economy, subsistence agriculture occupies more than 80% of the population. The manufacturing sector has diversified since the mid-1980s. Sugar and wood pulp remain important foreign exchange earners. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Surrounded by South Africa, except for a short border with Mozambique, Swaziland is heavily dependent on South Africa from which it receives about nine-tenths of its imports and to which it sends nearly three-quarters of its exports. Customs duties from the Southern African Customs Union and worker remittances from South Africa substantially supplement domestically earned income. The government is trying to improve the atmosphere for foreign investment. Overgrazing, soil depletion, drought, and sometimes floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2004 because of drought, and more than one-third of the adult population was infected by HIV/AIDS.

Introduction Sweden

Background:

A military power during the 17th century, Sweden has not participated in any war in almost two centuries. An armed neutrality was preserved in both World Wars. Sweden's long-successful economic formula of a capitalist system interlarded with substantial welfare elements was challenged in the 1990s by high unemployment and in 2000-02 by the global economic downturn, but fiscal discipline over the past several years has allowed the country to weather economic vagaries. Indecision over the country's role in the political and economic integration of Europe delayed Sweden's entry into the EU until 1995, and waived the introduction of the euro in 1999.

Economy Sweden

Economy - overview:

Aided by peace and neutrality for the whole 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for only 2% of GDP and 2% of the jobs. The government's commitment to fiscal discipline resulted in a substantial budgetary surplus in 2001, which was cut by more than half in 2002, due to the global economic slowdown, declining revenue, and increased spending. The Swedish central bank (the Riksbank) focuses on price stability with its inflation target of 2%. Growth remained sluggish in 2003, but picked up in 2004. Presumably because of generous sicktime benefits, Swedish workers report in sick more often than other Europeans. On 14 September 2003, Swedish voters turned down entry into the euro system, concerned about the impact on democracy and sovereignty.

Introduction Switzerland

Background:

The Swiss Confederation was founded in 1291 as a defensive alliance among three cantons. In succeeding years, other localities joined the original three. The Swiss Confederation secured its independence

from the Holy Roman Empire in 1499. Switzerland's sovereignty and neutrality have long been honored by the major European powers, and the country was not involved in either of the two World Wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active in many UN and international organizations, but retains a strong commitment to neutrality.

Economy Switzerland

Economy - overview:

Switzerland is a peaceful, prosperous, and stable modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP larger than that of the big Western European economies. The Swiss in recent years have brought their economic practices largely into conformity with the EU's to enhance their international competitiveness. Switzerland remains a safe haven for investors, because it has maintained a degree of bank secrecy and has kept up the franc's long-term external value. Reflecting the anemic economic conditions of Europe, GDP growth dropped in 2001 to about 0.8%, to 0.2% in 2002, and to -0.3% in 2003, with a small rise to 1.8% in 2004. Even so, unemployment has remained at less than half the EU average.

Introduction Syria

Background:
Following the breakup of the Ottoman Empire during World War I, Syria was administered by the French until independence in 1946. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. Syrian troops - stationed in Lebanon since 1976 in an ostensible peacekeeping role - were withdrawn in April of 2005. Over the past

decade, Syria and Israel have held occasional peace talks over the return of the Golan Heights.

Economy Syria

Economy - overview:

Real GDP growth rose to 2.3 percent in 2004, a slight increase from 2003 when the predominantly statist economy suffered from disruptions caused by the war in Iraq and other developments in the region. Annual real GDP growth has averaged 2.3 percent for the last seven years. The Government of Syria has implemented modest economic reforms in the last few years, including cutting interest rates, opening private banks, consolidating some of the multiple exchange

rates, and raising prices on some subsidized foodstuffs. Nevertheless, the economy remains highly controlled by the government. Long run economic constraints include declining oil production and exports and pressure on water supplies caused by rapid population growth, industrial expansion, and increased water pollution.

@Taiwan

Introduction Taiwan

Background:
In 1895, military defeat forced China to cede Taiwan to Japan.

Taiwan reverted to Chinese control after World War II. Following the Communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the 1946 constitution drawn up for all of China. Over the next five decades, the ruling authorities gradually democratized and incorporated the native population within the governing structure. In 2000, Taiwan underwent its first peaceful transfer of power from the Nationalist to the Democratic Progressive Party. Throughout this period, the island prospered and became one of East Asia's economic "Tigers." The dominant political issues continue to be the relationship between Taiwan and China - specifically the question of eventual unification - as well as domestic political and economic reform.

Economy Taiwan

Economy - overview:

Taiwan has a dynamic capitalist economy with gradually decreasing guidance of investment and foreign trade by government authorities. In keeping with this trend, some large government-owned banks and industrial firms are being privatized. Exports have provided the primary impetus for industrialization. The trade surplus is substantial, and foreign reserves are the world's third largest. Agriculture contributes less than 2% to GDP, down from 32% in 1952. Taiwan is a major investor throughout Southeast Asia. China has overtaken the US to become Taiwan's largest export market. Because of its conservative financial approach and its entrepreneurial strengths, Taiwan suffered little compared with many of its neighbors from the Asian financial crisis in 1998. The global economic downturn, combined with problems in policy coordination by the administration and bad debts in the banking system, pushed Taiwan into recession in 2001, the first year of negative growth

ever recorded. Unemployment also reached record levels. Output recovered moderately in 2002 in the face of continued global slowdown, fragile consumer confidence, and bad bank loans; and the essentially vibrant economy pushed ahead in 2003-04. Growing economic ties with China are a dominant long-term factor, e.g., exports to China of parts and equipment for the assembly of goods for export to developed countries.

Introduction Tajikistan

Background:

The Tajik people came under Russian rule in the 1860s and 1870s, but Russia's hold on Central Asia weakened following the Revolution of 1917. Bolshevik control of the area was fiercely contested and not fully reestablished until 1925. Tajikistan became independent in 1991 following the breakup of the Soviet Union and has now completed its transition from the civil war that plagued the country from 1992 to 1997. There have been no major security incidents in recent years, although the country remains the poorest in the region. Attention by the international community in the wake of the war in Afghanistan has brought increased economic development assistance, which could create jobs and increase stability in the long term. Tajikistan is in the early stages of seeking World Trade Organization membership and has joined NATO's Partnership for Peace.

Economy Tajikistan

Economy - overview:

Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. Only 5% to 6% of the land area is arable. Cotton is the most important crop. Mineral resources, varied but limited in amount, include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992-97) severely damaged the already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Even though 60% of its people continue to live in abject poverty, Tajikistan has experienced steady economic growth since 1997. Continued privatization of medium and large state-owned enterprises will further increase productivity. Tajikistan's economic situation, however, remains fragile due to uneven implementation of structural reforms, weak governance, widespread unemployment, and the external debt burden. A debt restructuring agreement was reached with Russia in December 2002, including an interest rate of 4%, a 3-year grace

period, and a US \$49.8 million credit to the Central Bank of Tajikistan.

Introduction Tanzania

Background:

Shortly after independence, Tanganyika and Zanzibar merged to form

the nation of Tanzania in 1964. One-party rule came to an end in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition have led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities.

Economy Tanzania

Economy - overview:

Tanzania is one of the poorest countries in the world. The economy depends heavily on agriculture, which accounts for almost half of GDP, provides 85% of exports, and employs 80% of the work force. Topography and climatic conditions, however, limit cultivated crops to only 4% of the land area. Industry traditionally featured the

processing of agricultural products and light consumer goods. The World Bank, the International Monetary Fund, and bilateral donors have provided funds to rehabilitate Tanzania's out-of-date economic infrastructure and to alleviate poverty. Growth in 1991-2002 featured a pickup in industrial production and a substantial increase in output of minerals, led by gold. Recent banking reforms have helped increase private sector growth and investment. Continued donor assistance and solid macroeconomic policies supported real GDP growth of nearly 6% in 2004.

Introduction Thailand

Background:

A unified Thai kingdom was established in the mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US ally following the conflict. Thailand is currently facing armed violence in its three Muslim-majority southernmost provinces.

Economy Thailand

Economy - overview:

Thailand has a well developed infrastructure, a free-enterprise economy, and welcomes foreign investment. Thailand has fully recovered from the 1997-98 Asian Financial Crisis and was one of East Asia's best performers in 2002-04. Increased consumption and investment spending and strong export growth pushed GDP growth up to 6.9% in 2003 and 6.1% in 2004 despite a sluggish global economy. The highly popular government's expansionist policy, including major support of village economic development, has raised concerns about fiscal discipline and the health of financial institutions. Bangkok has pursued preferential trade agreements with a variety of partners in an effort to boost exports and maintain high growth, and in 2004 began negotiations on a Free Trade Agreement with the US. In late December 2004, a major tsunami took 8,500 lives in Thailand and

caused massive destruction of property in the southern provinces of Krabi, Phangnga, and Phuket.

Introduction Togo

Background:

French Togoland became Togo in 1960. Gen. Gnassingbe EYADEMA, installed as military ruler in 1967, continued to rule well into the 21st century. Despite the facade of multiparty elections instituted in the early 1990s, the government continued to be dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party maintained power almost continually since 1967. Togo has come under fire from international organizations for human rights abuses and is plagued by political unrest. While most bilateral and multilateral aid to Togo remains frozen, the European Union initiated a partial resumption of cooperation and development aid to Togo in late 2004. Upon his death in February 2005, President EYADEMA was succeeded by his son Faure GNASSINGBE. The succession, supported by the military and in contravention of the nation's constitution, was challenged by popular protest and a threat of sanctions from regional leaders. GNASSINGBE succumbed to pressure and agreed to hold elections in late April 2005.

Economy Togo

Economy - overview:

This small sub-Saharan economy is heavily dependent on both commercial and subsistence agriculture, which provides employment for 65% of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings, with cotton being the most important cash crop. Togo is the world's fourth-largest producer of phosphate, but production fell an estimated 22% in 2002 due to power shortages and the cost of developing new deposits. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on following through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors.

Economy Tonga

Economy - overview:
Tonga, a small, open, South Pacific island economy, has a narrow export base in agricultural goods. Squash, coconuts, bananas, and vanilla beans are the main crops, and agricultural exports make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. Tourism is the second largest source of hard currency earnings following remittances. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well-developed social services. High unemployment among the young, a continuing upturn in inflation, and rising civil service expenditures are major issues facing the government.

Economy Trinidad and Tobago

Economy - overview:

Trinidad and Tobago, the leading Caribbean producer of oil and gas, has earned a reputation as an excellent investment site for international businesses. Tourism is a growing sector, although not proportionately as important as in many other Caribbean islands. The economy benefits from low inflation and a growing trade surplus.

Prospects for growth in 2004 are good as prices for oil, petrochemicals, and liquified natural gas are expected to remain high, and foreign direct investment continues to grow to support expanded capacity in the energy sector. The government is coping with a rise in violent crime.

@Tunisia

Introduction Tunisia

Background:

Following independence from France in 1956, President Habib BOURGUIBA established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In recent years, Tunisia has taken a moderate, non-aligned stance in its foreign relations. Domestically, it has sought to defuse rising pressure for a more open political society.

Geography Tunisia

Location:

Economy Tunisia

Economy - overview:
Tunisia has a diverse economy, with important agricultural, mining,
energy, tourism, and manufacturing sectors. Governmental control of
economic affairs while still heavy has gradually lessened over the
past decade with increasing privatization, simplification of the tax
structure, and a prudent approach to debt. Progressive social
policies also have helped raise living conditions in Tunisia
relative to the region. Real growth slowed to a 15-year low of 1.9%
in 2002 because of agricultural drought and lackluster tourism.
Better rains in 2003 and 2004, however, helped push GDP growth above
5% for these years. Tourism also recovered after the end of combat
operations in Iraq. Tunisia is gradually removing barriers to trade
with the European Union. Broader privatization, further
liberalization of the investment code to increase foreign
investment, improvements in government efficiency, and reduction of
the trade deficit are among the challenges ahead.

Introduction Turkey

Background:

Modern Turkey was founded in 1923 from the Anatolian remnants of the defeated Ottoman Empire by national hero Mustafa KEMAL, who was later honored with the title Atatürk, or "Father of the Turks."

Under his authoritarian leadership, the country adopted wide-ranging social, legal, and political reforms. After a period of one-party rule, an experiment with multi-party politics led to the 1950 election victory of the opposition Democratic Party and the peaceful transfer of power. Since then, Turkish political parties have multiplied, but democracy has been fractured by periods of instability and intermittent military coups (1960, 1971, 1980), which in each case eventually resulted in a return of political power to civilians. In 1997, the military again helped engineer the ouster - popularly dubbed a "post-modern coup" - of the then Islamic-oriented government. Turkey intervened militarily on Cyprus in 1974 to prevent a Greek takeover of the island and has since acted as patron state to the "Turkish Republic of Northern Cyprus," which only Turkey recognizes. A separatist insurgency begun in 1984 by the Kurdistan Workers' Party (PKK) - now known as the People's Congress of Kurdistan or Kongra-Gel (KGK) - has dominated the Turkish military's attention and claimed more than 30,000 lives, but after the capture of the group's leader in 1999, the insurgents largely withdrew from Turkey, mainly to northern Iraq. In 2004, KGK announced an end to its ceasefire and attacks attributed to the KGK increased. Turkey joined the UN in 1945 and in 1952 it became a member of NATO. In 1964, Turkey became an associate member of the European Community; over the past decade, it has undertaken many reforms to strengthen its democracy and economy, enabling it to begin accession membership talks with the European Union.

Economy Turkey

Economy - overview:

Turkey's dynamic economy is a complex mix of modern industry and commerce along with a traditional agriculture sector that in 2004 still accounted for more than 35% of employment. It has a strong and rapidly growing private sector, yet the state still plays a major role in basic industry, banking, transport, and communication. The largest industrial sector is textiles and clothing, which accounts for one-third of industrial employment; it faces stiff competition in international markets with the end of the global quota system. However, other sectors, notably the automotive and electronics industries, are rising in importance within Turkey's export mix. In recent years the economic situation has been marked by erratic economic growth and serious imbalances. Real GNP growth has exceeded

6% in many years, but this strong expansion has been interrupted by sharp declines in output in 1994, 1999, and 2001. Inflation, in recent years in the high double-digit range, fell to 9.3% by 2004 - a 30-year low. Despite these strong economic gains in 2002-04, which were largely due to renewed investor interest in emerging markets, IMF backing, and tighter fiscal policy, the economy is still plagued with high debt and deficits. The public sector fiscal deficit exceeds 6% of GDP - due in large part to the huge burden of interest payments, which accounted for more than 40% of central government spending in 2004, and to populist spending. Foreign direct investment (FDI) in Turkey remains low - averaging less than \$1 billion annually, but further economic and judicial reforms and prospective EU membership are expected to boost FDI. A major political and economic issue over the next decade is whether or not Turkey will become a member of the EU.

Military - note:
in the early 1990s, the Turkish Land Force was a large but badly

equipped infantry force; there were 14 infantry divisions, but only one was mechanized, and out of 16 infantry brigades, only six were mechanized; the overhaul that has taken place since has produced highly mobile forces with greatly enhanced firepower in accordance with NATO's new strategic concept (2005)

Transnational Issues Turkey

Disputes - international:

complex maritime, air, and territorial disputes with Greece in the Aegean Sea; status of north Cyprus question remains; Syria and Iraq protest Turkish hydrological projects to control upper Euphrates waters; Turkey has expressed concern over the status of Kurds in Iraq; border with Armenia remains closed over Nagorno-Karabakh

Refugees and internally displaced persons:

IDPs: 350,000-1,000,000 (fighting from 1984-99 between Kurdish PKK and Turkish military; most IDPs in southeastern provinces) (2004)

Illicit drugs:

key transit route for Southwest Asian heroin to Western Europe and - to a far lesser extent the US - via air, land, and sea routes; major Turkish, Iranian, and other international trafficking organizations operate out of Istanbul; laboratories to convert imported morphine base into heroin are in remote regions of Turkey as well as near Istanbul; government maintains strict controls over areas of legal opium poppy cultivation and output of poppy straw concentrate

Introduction Turkmenistan

Background:

Annexed by Russia between 1865 and 1885, Turkmenistan became a Soviet republic in 1924. It achieved its independence upon the dissolution of the USSR in 1991. President NIYAZOV retains absolute control over the country and opposition is not tolerated. Extensive hydrocarbon/natural gas reserves could prove a boon to this underdeveloped country if extraction and delivery projects were to be expanded. The Turkmenistan Government is actively seeking to develop alternative petroleum transportation routes in order to break Russia's pipeline monopoly.

head of government: President and Chairman of the Cabinet of Ministers Saparmurat NIYAZOV (since 27 October 1990, when the first direct presidential election occurred); note - the president is both the chief of state and head of government

cabinet: Cabinet of Ministers appointed by the president

note: NIYAZOV's term in office was extended indefinitely on 28 December 1999 during a session of the People's Council (Halk Maslahaty)

elections: president elected by popular vote for a five-year term;

election last held 21 June 1992 (next to be held in 2008 when NIYAZOV turns 70 and is constitutionally ineligible to run); note - President NIYAZOV was unanimously approved as president for life by the People's Council on 28 December 1999; deputy chairmen of the cabinet of ministers are appointed by the president
election results: Saparmurat NIYAZOV elected president without opposition; percent of vote - Saparmurat NIYAZOV 99.5%

Legislative branch:

under the 1992 constitution, there are two parliamentary bodies, a unicameral People's Council or Halk Maslahaty (supreme legislative body of up to 2,500 delegates, some of whom are elected by popular vote and some of whom are appointed; meets at least yearly) and a unicameral Parliament or Mejlis (50 seats; members are elected by popular vote to serve five-year terms)

elections: People's Council - last held in April 2003; Mejlis - last held 19 December 2004 (next to be held December 2009)

election results: Mejlis - DPT 100%; seats by party - DPT 50; note - all 50 elected officials are members of the Democratic Party of Turkmenistan and are preapproved by President NIYAZOV

note: in late 2003, a new law was adopted, reducing the powers of the Mejlis and making the Halk Maslahaty the supreme legislative organ; the Halk Maslahaty can now legally dissolve the Mejlis, and the president is now able to participate in the Mejlis as its supreme leader; the Mejlis can no longer adopt or amend the constitution, or announce referendums or its elections; since the president is both the "Chairman for Life" of the Halk Maslahaty and the supreme leader of the Mejlis, the 2003 law has the effect of making him the sole authority of both the executive and legislative branches of government

Economy Turkmenistan

Economy - overview:
Turkmenistan is largely desert country with intensive agriculture
in irrigated oases and large gas and oil resources. One-half of its
irrigated land is planted in cotton; formerly it was the world's
tenth-largest producer. Poor harvests in recent years have led to a
nearly 46% decline in cotton exports. With an authoritarian
ex-Communist regime in power and a tribally based social structure,
Turkmenistan has taken a cautious approach to economic reform,
hoping to use gas and cotton sales to sustain its inefficient
economy. Privatization goals remain limited. In 1998-2004,
Turkmenistan suffered from the continued lack of adequate export
routes for natural gas and from obligations on extensive short-term
external debt. At the same time, however, total exports rose by
perhaps 30% in 2003 and 19% in 2004, largely because of higher
international oil and gas prices. Overall prospects in the near

future are discouraging because of widespread internal poverty, the burden of foreign debt, the government's irrational use of oil and gas revenues, and its unwillingness to adopt market-oriented reforms. Turkmenistan's economic statistics are state secrets, and GDP and other figures are subject to wide margins of error. In particular, the rate of GDP growth is uncertain.

@Turks and Caicos Islands

Introduction Turks and Caicos Islands

Background:

The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands remain a British overseas territory.

@Tuvalu

Introduction Tuvalu

Background:

In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain name ".tv" for \$50 million in royalties over the next dozen years.

Geography Tuvalu

Natural hazards:

severe tropical storms are usually rare, but, in 1997, there were three cyclones; low level of islands make them very sensitive to changes in sea level

Environment - current issues:

since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities (the Japanese Government has built one desalination plant and plans to build one other); beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from the spread of the Crown of Thorns starfish; Tuvalu is very concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which threaten the country's underground water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary

Environment - international agreements:

party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Law of the Sea, Ozone Layer Protection, Ship Pollution

signed, but not ratified: none of the selected agreements

Geography - note:

one of the smallest and most remote countries on Earth; six of the coral atolls - Nanumea, Nui, Vaitupu, Nukufetau, Funafuti, and

Nukulaelae - have lagoons open to the ocean; Nanumaya and Niutao have landlocked lagoons; Niulakita does not have a lagoon

Economy Tuvalu

Economy - overview:

Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. The country has no known mineral resources and few exports. Subsistence farming and fishing are the primary economic activities. Fewer than 1,000 tourists, on average, visit Tuvalu annually. Government revenues largely come from the sale of stamps and coins and worker remittances. About 1,000 Tuvaluans work in Nauru in the phosphate mining industry. Nauru has begun repatriating Tuvaluans, however, as phosphate resources decline. Substantial income is received annually from an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this fund has grown from an initial \$17 million to over \$35 million in 1999. The US government is also a major revenue source for Tuvalu because of payments from a 1988 treaty on fisheries. In an effort to reduce its dependence on foreign aid, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts of up to 7%. In 1998, Tuvalu began deriving revenue from use of its area code for "900" lines and in 2000, from the lease of its ".tv" Internet domain name. Royalties from these new technology sources could increase substantially over the next decade. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and income from overseas investments.

@Uganda

Introduction Uganda

Background:

Uganda achieved independence from the UK in 1962. The dictatorial regime of Idi AMIN (1971-79) was responsible for the deaths of some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980-85) claimed at least another 100,000 lives. During the 1990s, the government promulgated non-party presidential and legislative elections.

Economy Uganda

Economy - overview:

Uganda has substantial natural resources, including fertile soils, regular rainfall, and sizable mineral deposits of copper and cobalt. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for the bulk of export revenues. Since 1986, the government - with the support of foreign countries and international agencies - has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are

especially aimed at dampening inflation and boosting production and export earnings. During 1990-2001, the economy turned in a solid performance based on continued investment in the rehabilitation of infrastructure, improved incentives for production and exports, reduced inflation, gradually improved domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Corruption within the government and slippage in the government's determination to press reforms raise doubts about the continuation of strong growth. In 2000, Uganda qualified for enhanced Highly Indebted Poor Countries (HIPC) debt relief worth \$1.3 billion and Paris Club debt relief worth \$145 million. These amounts combined with the original HIPC debt relief added up to about \$2 billion. Growth for 2001-02 was solid despite continued decline in the price of coffee, Uganda's principal export. Solid growth in 2003-04 reflected an upturn in Uganda's export markets.

Introduction Ukraine

Background:

Ukraine was the center of the first Slavic state, Kievan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by internecine quarrels and Mongol invasions, Kievan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kievan Rus laid the foundation for Ukrainian nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by the Russian Empire. Following the collapse of czarist Russia in 1917, Ukraine was able to bring about a short-lived period of independence (1917-20), but was reconquered and forced to endure a brutal Soviet rule that engineered two artificial famines (1921-22 and 1932-33) in which over 8 million died. In World War II, German and Soviet armies were responsible for some 7 to 8 million more deaths. Although final independence for Ukraine was achieved in 1991 with the dissolution of the USSR, democracy remained elusive as the legacy of state control and endemic corruption stalled efforts at economic reform, privatization, and civil liberties. A peaceful mass protest "Orange Revolution" in the closing months of 2004 forced the authorities to overturn a rigged presidential election and to allow a new internationally monitored vote that swept into power a reformist slate under Viktor YUSHCHENKO. The new government presents its citizens with hope that the country may at last attain true freedom and prosperity.

Economy Ukraine

Economy - overview: After Russia, the Ukrainian republic was far and away the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Ukraine depends on imports of energy, especially natural gas, to meet some 85% of its annual energy requirements. Shortly after independence in December 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Loose monetary policies pushed inflation to hyperinflationary levels in late 1993. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Ukrainian government officials have taken some steps to reform the country's Byzantine tax code, such as the implementation of lower tax rates aimed at bringing more economic activity out of Ukraine's large shadow economy, but more improvements are needed, including closing tax loopholes and eliminating tax privileges and exemptions. Reforms in the more politically sensitive areas of structural reform and land privatization are still lagging. Outside institutions - particularly the IMF - have encouraged Ukraine to quicken the pace and scope of reforms. GDP in 2000 showed strong export-based growth of 6% - the first growth since independence - and industrial production grew 12.9%. The economy

continued to expand in 2001 as real GDP rose 9% and industrial output grew by over 14%. Growth of 4.6% in 2002 was more moderate, in part a reflection of faltering growth in the developed world. In general, growth has been undergirded by strong domestic demand, low inflation, and solid consumer and investor confidence. Growth was a sturdy 9.3% in 2003 and a remarkable 12% in 2004, despite a loss of momentum in needed economic reforms.

Telephone system:
general assessment: Ukraine's telecommunication development plan, running through 2005, emphasizes improving domestic trunk lines,

international connections, and the mobile cellular system
domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is now rising slowly and the domestic trunk system is being improved; the mobile cellular telephone system is expanding at a high rate

international: country code - 380; two new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and three Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems

Transnational Issues Ukraine

Disputes - international:
1997 boundary treaty with Belarus remains un-ratified due to unresolved financial claims, stalling demarcation and reducing border security; delimitation of land boundary with Russia is complete but the parties have agreed to defer demarcation; maritime boundary through the Sea of Azov and Kerch Strait remains unresolved despite a December 2003 framework agreement and on-going expert-level discussions; Moldova and Ukraine have established joint customs posts to monitor transit through Moldova's break-away Transnistria Region which remains under OSCE supervision; Ukraine and Romania have taken their dispute over Ukrainian-administered

Zmiyinyy (Snake) Island and Black Sea maritime boundary to the ICJ for adjudication; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through the Ukraine to the Black Sea

Illicit drugs:

limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; Ukraine has improved anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in February 2004; Ukraine's anti-money-laundering regime continues to be monitored by FATF

Introduction United Arab Emirates

Background:

The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states - Abu Zaby, 'Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn - merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra's al Khaymah. The UAE's per capita GDP is on par with those of leading West European nations. Its generosity with oil revenues and its moderate foreign policy stance have allowed the UAE to play a vital role in the affairs of the region.

Economy United Arab Emirates

Economy - overview:
The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Its wealth is based on oil and gas output (about 30% of GDP), and the fortunes of the economy fluctuate with the prices of those commodities. Since the discovery of oil in the UAE more than 30 years ago, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. At present levels of production, oil and gas reserves should last for more than 100 years. The government has increased spending on job creation and infrastructure expansion and is opening up its utilities to greater private sector involvement. In April 2004, the UAE signed a Trade and Investment Framework Agreement (TIFA) with Washington and in November 2004 agreed to undertake negotiations toward a Free Trade Agreement (FTA) with the US.

Introduction United Kingdom

Background:

Great Britain, the dominant industrial and maritime power of the 19th century, played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two World Wars. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council, a founding member of NATO, and of the Commonwealth, the UK pursues a global approach to foreign policy; it currently is weighing the degree of its integration with continental Europe. A member of the EU, it chose to remain outside the Economic and Monetary Union for the time being. Constitutional reform is also a significant issue in the UK. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1999, but the latter is suspended due to bickering over the peace process.

Independence:

England has existed as a unified entity since the 10th century; the union between England and Wales, begun in 1284 with the Statute of Rhuddlan, was not formalized until 1536 with an Act of Union; in another Act of Union in 1707, England and Scotland agreed to permanently join as Great Britain; the legislative union of Great Britain and Ireland was implemented in 1801, with the adoption of the name the United Kingdom of Great Britain and Ireland; the Anglo-Irish treaty of 1921 formalized a partition of Ireland; six northern Irish counties remained part of the United Kingdom as

Northern Ireland and the current name of the country, the United Kingdom of Great Britain and Northern Ireland, was adopted in 1927

National holiday:
the UK does not celebrate one particular national holiday

Constitution:
unwritten; partly statutes, partly common law and practice

cabinet: Cabinet of Ministers appointed by the prime minister
elections: none; the monarchy is hereditary; following legislative elections, the leader of the majority party or the leader of the majority coalition is usually the prime minister

Legislative branch:
bicameral Parliament comprised of House of Lords (consists of approximately 500 life peers, 92 hereditary peers and 26 clergy) and House of Commons (646 seats since 2005 elections; members are

elected by popular vote to serve five-year terms unless the House is dissolved earlier)

elections: House of Lords - no elections (note - in 1999, as provided by the House of Lords Act, elections were held in the House of Lords to determine the 92 hereditary peers who would remain there; pending further reforms, elections are held only as vacancies in the hereditary peerage arise); House of Commons - last held 5 May 2005 (next to be held by May 2010)

election results: House of Commons - percent of vote by party - Labor 35.2%, Conservative 32.3%, Liberal Democrats 22%, other 10.5%; seats by party - Labor 356, Conservative 197, Liberal Democrat 62, other 31; note - as of 30 September 2005 the seats by party - Labor 354, Conservative 196, Liberal Democrat 62, other 34

note: in 1998 elections were held for a Northern Ireland Assembly (because of unresolved disputes among existing parties, the transfer of power from London to Northern Ireland came only at the end of 1999 and has been suspended four times the latest occurring in October 2002); in 1999 there were elections for a new Scottish Parliament and a new Welsh Assembly

blue field with the red cross of Saint George (patron saint of England) edged in white superimposed on the diagonal red cross of Saint Patrick (patron saint of Ireland), which is superimposed on the diagonal white cross of Saint Andrew (patron saint of Scotland); properly known as the Union Flag, but commonly called the Union Jack; the design and colors (especially the Blue Ensign) have been the basis for a number of other flags including other Commonwealth countries and their constituent states or provinces, as well as British overseas territories

Economy United Kingdom

Economy - overview:

The UK, a leading trading power and financial center, is one of the quartet of trillion dollar economies of Western Europe. Over the past two decades the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards,

producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, natural gas, and oil reserves; primary energy production accounts for 10% of GDP, one of the highest shares of any industrial nation. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. GDP growth slipped in 2001-03 as the global downturn, the high value of the pound, and the bursting of the "new economy" bubble hurt manufacturing and exports. Output recovered in 2004, to 3.2% growth. The economy is one of the strongest in Europe; inflation, interest rates, and unemployment remain low. The relatively good economic performance has complicated the BLAIR government's efforts to make a case for Britain to join the European Economic and Monetary Union (EMU). Critics point out that the economy is doing well outside of EMU, and they cite public opinion polls that continue to show a majority of Britons opposed to the euro. Meantime, the government has been speeding up the improvement of education, transport, and health services, at a cost in higher taxes.

@United States

Introduction United States

Background:

Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65) and the Great Depression of the 1930s. Buoyed by victories in World Wars I and II

and the end of the Cold War in 1991, the US remains the world's most powerful nation state. The economy is marked by steady growth, low unemployment and inflation, and rapid advances in technology.

Geography United States

Location:

North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

Geographic coordinates:

38 00 N, 97 00 W

Map references:

North America

Area:

total: 9,631,418 sq km

land: 9,161,923 sq km

water: 469,495 sq km

note: includes only the 50 states and District of Columbia

Area - comparative:

about half the size of Russia; about three-tenths the size of Africa; about half the size of South America (or slightly larger than Brazil); slightly larger than China; almost two and a half times the size of the European Union

Land boundaries:

total: 12,034 km

border countries: Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,141 km

note: US Naval Base at Guantanamo Bay, Cuba is leased by the US and is part of Cuba; the base boundary is 29 km

Coastline:

19,924 km

Maritime claims: territorial sea: 12 nm contiguous zone: 24 nm exclusive economic zone: 200 nm continental shelf: not specified

Climate:

mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain:

vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes:

lowest point: Death Valley -86 m

highest point: Mount McKinley 6,194 m

Natural resources:

coal, copper, lead, molybdenum, phosphates, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

Land use:

arable land: 19.13%

permanent crops: 0.22%

other: 80.65% (2001)

Irrigated land:

214,000 sq km (1998 est.)

Natural hazards:

tsunamis, volcanoes, and earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the midwest and southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

Environment - current issues:

air pollution resulting in acid rain in both the US and Canada; the US is the largest single emitter of carbon dioxide from the burning of fossil fuels; water pollution from runoff of pesticides and fertilizers; limited natural fresh water resources in much of the western part of the country require careful management; desertification

Environment - international agreements:

party to: Air Pollution, Air Pollution-Nitrogen Oxides, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Climate Change, Desertification, Endangered Species, Environmental Modification, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling
signed, but not ratified: Air Pollution-Persistent Organic

Pollutants, Air Pollution-Volatile Organic Compounds, Biodiversity,
Climate Change-Kyoto Protocol, Hazardous Wastes

Geography - note:

world's third-largest country by size (after Russia and Canada) and
by population (after China and India); Mt. McKinley is highest point
in North America and Death Valley the lowest point on the continent

Economy United States

Economy - overview:

The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$40,100. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy considerably greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, they face higher barriers to entry in their rivals' home markets than the barriers to entry of foreign firms in US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment; their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. The response to the terrorist attacks of 11 September 2001 showed the remarkable resilience of the economy. The

war in March/April 2003 between a US-led coalition and Iraq, and the subsequent occupation of Iraq, required major shifts in national resources to the military. The rise in GDP in 2004 was undergirded by substantial gains in labor productivity. The economy suffered from a sharp increase in energy prices in the second half of 2004. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical and pension costs of an aging population, sizable trade and budget deficits, and stagnation of family income in the lower economic groups.

Introduction Uruguay

Background:

Montevideo, founded by the Spanish in 1726 as a military stronghold, soon took advantage of its natural harbor to become an important commercial center. Annexed by Brazil as a separate province in 1821, Uruguay declared its independence four years later and secured its freedom in 1828 after a three-year struggle. The administrations of President BATLLE in the early 20th century established widespread political, social, and economic reforms. A violent Marxist urban guerrilla movement, the Tupamaros, launched in the late 1960s, led Uruguay's president to agree to military control of his administration in 1973. By yearend, the rebels had been crushed, but the military continued to expand its hold throughout the government. Civilian rule was not restored until 1985. Uruguay's political and labor conditions are among the freest on the continent.

Economy Uruguay

Economy - overview:

Uruguay's well-to-do economy is characterized by an export-oriented agricultural sector, a well-educated workforce, and high levels of social spending. After averaging growth of 5% annually during 1996-98, in 1999-2002 the economy suffered a major downturn, stemming largely from the spillover effects of the economic problems of its large neighbors, Argentina and Brazil. For instance, in 2001-02 massive withdrawals by Argentina of dollars deposited in Uruguayan banks led to a plunge in the Uruguayan peso and a massive rise in unemployment. Total GDP in these four years dropped by nearly 20%, with 2002 the worst year due to the serious banking crisis. Unemployment rose to nearly 20% in 2002, inflation surged, and the burden of external debt doubled. Cooperation with the IMF limited the damage. The debt swap with private creditors carried out in 2003, which extended the maturity dates on nearly half of Uruguay's \$11.3 billion in public debt, substantially alleviated the country's amortization burden in the coming years and restored public confidence. The economy grew about 10% in 2004 as a result of high commodity prices for Uruguayan exports, the weakness of the dollar against the euro, growth in the region, low international interest rates, and greater export competitiveness.

Introduction Uzbekistan

Background:

Russia conquered Uzbekistan in the late 19th century. Stiff resistance to the Red Army after World War I was eventually suppressed and a socialist republic set up in 1924. During the Soviet era, intensive production of "white gold" (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land poisoned and the Aral Sea and certain rivers half dry. Independent since 1991, the country seeks to gradually lessen its dependence on agriculture while developing its mineral and petroleum reserves. Current concerns include terrorism by Islamic militants, economic stagnation, and the curtailment of human rights and democratization.

Kyrgyzstan 1,099 km, Tajikistan 1,161 km, Turkmenistan 1,621 km

Coastline:

0 km (doubly landlocked); note - Uzbekistan includes the southern portion of the Aral Sea with a 420 km shoreline

Maritime claims:

none (doubly landlocked)

Climate:

mostly midlatitude desert, long, hot summers, mild winters;
semiarid grassland in east

Terrain:

mostly flat-to-rolling sandy desert with dunes; broad, flat
intensely irrigated river valleys along course of Amu Darya, Syr
Darya (Sirdaryo), and Zarafshon; Fergana Valley in east surrounded
by mountainous Tajikistan and Kyrgyzstan; shrinking Aral Sea in west

Elevation extremes:

lowest point: Sariqarnish Kuli -12 m

highest point: Adelunga Toghi 4,301 m

Natural resources:

Environment - current issues:

shrinkage of the Aral Sea is resulting in growing concentrations of chemical pesticides and natural salts; these substances are then blown from the increasingly exposed lake bed and contribute to desertification; water pollution from industrial wastes and the heavy use of fertilizers and pesticides is the cause of many human health disorders; increasing soil salination; soil contamination from buried nuclear processing and agricultural chemicals, including DDT

Economy Uzbekistan

Economy - overview:

Uzbekistan is a dry, landlocked country of which 11% consists of intensely cultivated, irrigated river valleys. More than 60% of its population lives in densely populated rural communities. Uzbekistan is now the world's second-largest cotton exporter, a large producer of gold and oil, and a regionally significant producer of chemicals and machinery. Following independence in December 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. Uzbekistan responded to the negative external conditions generated by the Asian

and Russian financial crises by emphasizing import substitute industrialization and by tightening export and currency controls within its already largely closed economy. The government, while aware of the need to improve the investment climate, sponsors measures that often increase, not decrease, the government's control over business decisions. A sharp increase in the inequality of income distribution has hurt the lower ranks of society since independence. In 2003, the government accepted the obligations of Article VIII under the International Monetary Fund (IMF), providing for full currency convertibility. However, strict currency controls and tightening of borders have lessened the effects of convertibility and have also led to some shortages that have further stifled economic activity.

Economy Vanuatu

Economy - overview:

This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for 65% of the population. Fishing, offshore financial services, and tourism, with about 50,000 visitors in 2004, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. GDP growth rose less than 3% on average in the 1990s. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. In mid-2002 the government stepped up efforts to boost tourism. Agriculture, especially livestock farming, is a second target for growth. Australia and New Zealand are the main suppliers of tourists and foreign aid.

Introduction Venezuela

Background:

Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Colombia and Ecuador). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Current concerns include: a polarized political environment, a politicized military, drug-related violence along the Colombian border, increasing internal drug consumption, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

Economy Venezuela

Economy - overview:

Venezuela continues to be highly dependent on the petroleum sector, accounting for roughly one-third of GDP, around 80% of export earnings, and over half of government operating revenues. A disastrous two-month national oil strike from December 2002 to February 2003, temporarily halted economic activity. The economy remained in depression in 2003, declining by 9.2% after an 8.9% fall in 2002. Despite continued domestic instability, output recovered strongly in 2004, aided by high oil prices. Both inflation and unemployment remain fundamental problems.

claims all of the area west of the Essequibo River in Guyana, preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before UNCLOS that the Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; dispute with Colombia over Los Monjes islands and maritime boundary near the Gulf of Venezuela; Colombian-organized illegal narcotics and paramilitary activities penetrate Venezuela's shared border region resulting in several thousand residents migrating away from the border; US, France and the Netherlands recognize Venezuela's claim to give full effect to Aves Island, which creates a Venezuelan EEZ/continental shelf extending over a large portion of the Caribbean Sea; Dominica, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines protest Venezuela's claim that Aves Island sustains human habitation and other states' recognition of it

Illicit drugs:

small-scale illicit producer of opium and coca for the processing of opiates and coca derivatives; however, large quantities of cocaine, heroin, and marijuana transit the country from Colombia bound for US and Europe; significant narcotics-related money-laundering activity, especially along the border with Colombia and on Margarita Island; active eradication program primarily targeting opium; increasing signs of drug-related activities by Colombian insurgents on border

Introduction Vietnam

Background:

The conquest of Vietnam by France began in 1858 and was completed by 1884. It became part of French Indochina in 1887. Independence was declared after World War II, but the French continued to rule until 1954 when they were defeated by Communist forces under Ho Chi MINH, who took control of the North. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South. Despite the return of peace, for over two decades the country experienced little economic growth because of conservative leadership policies. Since 2001, Vietnamese authorities have committed to economic liberalization and enacted structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The country continues to experience protests from the Montagnard ethnic minority population

of the Central Highlands over loss of land to Vietnamese settlers and religious persecution.

Economy Vietnam

Economy - overview:

Vietnam is a densely-populated, developing country that in the last
30 years has had to recover from the ravages of war, the loss of
financial support from the old Soviet Bloc, and the rigidities of a
centrally planned economy. Substantial progress was achieved from
1986 to 1997 in moving forward from an extremely low level of
development and significantly reducing poverty. Growth averaged
around 9% per year from 1993 to 1997. The 1997 Asian financial
crisis highlighted the problems in the Vietnamese economy and
temporarily allowed opponents of reform to slow progress towards a
market oriented economy. GDP growth of 8.5% in 1997 fell to 6% in
1998 and 5% in 1999. Growth then rose to 7% in 2000-04 even against
the background of global recession. Since 2001, however, Vietnamese

authorities have reaffirmed their commitment to economic liberalization and international integration. They have moved to implement the structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. However, equitization of state-owned enterprises and reduction in the proportion of non-performing loans has fallen behind schedule. Vietnam's membership in the ASEAN Free Trade Area (AFTA) and entry into force of the US-Vietnam Bilateral Trade in December 2001 have led to even more rapid changes in Vietnam's trade and economic regime. Vietnam's exports to the US doubled in 2002 and again in 2003. Vietnam is working toward accession to the WTO in 2005. Among other benefits, accession will allow Vietnam to take advantage of the phase out of the Agreement on Textiles and Clothing, which eliminated quotas on textiles and clothing for WTO partners on 1 January 2005. Vietnam is working to promote job creation to keep up with the country's high population growth rate. However, in 2004, high levels of inflation prompted Vietnamese authorities to tighten monetary and fiscal policies.

binding "code of conduct" desired by several of the disputants;
Vietnam continues to expand construction of facilities in the
Spratly Islands; in March 2005, the national oil companies of China,
the Philippines, and Vietnam signed a joint accord to conduct marine
seismic activities in the Spratly Islands

@Virgin Islands

Introduction Virgin Islands

Background: During the 17th century, the archipelago was divided into
two territorial units, one English and the other Danish. Sugarcane, produced
by slave labor, drove the islands' economy during the 18th and early 19th
centuries. In 1917, the US purchased the Danish portion, which had been in
economic decline since the abolition of slavery in 1848.

Economy Virgin Islands

Economy - overview:

Tourism is the primary economic activity, accounting for 80% of GDP and employment. The islands normally host 2 million visitors a year. The manufacturing sector consists of petroleum refining, textiles, electronics, pharmaceuticals, and watch assembly. The agricultural sector is small, with most food being imported. International business and financial services are a small but growing component of the economy. One of the world's largest petroleum refineries is at Saint Croix. The islands are subject to substantial damage from storms. The government is working to improve fiscal discipline, to support construction projects in the private sector, to expand tourist facilities, to reduce crime, and to protect the environment.

@Wake Island

Introduction Wake Island

Background:

The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940-41. In December 1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake was developed as a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military and some commercial cargo planes, as well as for emergency landings. There are over 700 landings a year on the island.

@Wallis and Futuna

Introduction Wallis and Futuna

Background:

Although discovered by the Dutch and the British in the 17th and 18th centuries, it was the French who declared a protectorate over the islands in 1842. In 1959, the inhabitants of the islands voted to become a French overseas territory.

@West Bank

Introduction West Bank

Background:

The Israel-PLO Declaration of Principles on Interim Self-Government Arrangements (the DOP), signed in Washington on 13 September 1993, provided for a transitional period not exceeding five years of Palestinian interim self-government in the Gaza Strip and the West Bank. Under the DOP, Israel agreed to transfer certain powers and responsibilities to the Palestinian Authority, which includes the Palestinian Legislative Council elected in January 1996, as part of the interim self-governing arrangements in the West Bank and Gaza Strip. A transfer of powers and responsibilities for the Gaza Strip and Jericho took place pursuant to the Israel-PLO 4 May 1994 Cairo Agreement on the Gaza Strip and the Jericho Area and in additional areas of the West Bank pursuant to the Israel-PLO 28 September 1995 Interim Agreement, the Israel-PLO 15 January 1997 Protocol Concerning Redeployment in Hebron, the Israel-PLO 23 October 1998 Wye River Memorandum, and the 4 September 1999 Sharm el-Sheikh Agreement. The DOP provides that Israel will retain responsibility during the transitional period for external and internal security and for public order of settlements and Israeli citizens. Direct negotiations to determine the permanent status of Gaza and West Bank that began in September 1999 after a three-year hiatus, were

derailed by a second intifadah that broke out in September 2000. The resulting widespread violence in the West Bank and Gaza Strip, Israel's military response, and instability within the Palestinian Authority continue to undermine progress toward a permanent agreement. Following the death of longtime Palestinian leader Yasir

ARAFAT in November 2004, the election of his successor Mahmud ABBAS

in January 2005 could bring a turning point in the conflict.

Economy West Bank

Economy - overview:

The West Bank - the larger of the two areas under the Palestine Authority - has experienced a general decline in economic growth and a degradation in economic conditions made worse since the second intifadah began in September 2000. The downturn has been largely the result of the Israeli closure policies - the imposition of border closures in response to security incidents in Israel - which disrupted labor and commodity market relationships. In 2001, and even more severely in 2002, Israeli military measures in Palestine Authority areas resulted in the destruction of much capital plant, the disruption of administrative structure, and widespread business closures. Including the Gaza Strip, the UN estimates that more than 100,000 Palestinians out of the 125,000 who used to work in Israeli settlements, or in joint industrial zones, have lost their jobs. International aid of \$2 billion to the West Bank and Gaza strip in 2004 prevented the complete collapse of the economy and allowed some reforms in the government's financial operations. Meanwhile, unemployment has continued at more than half the labor force. ARAFAT's death in 2004 leaves open more political options that could affect the economy.

@Western Sahara

Introduction Western Sahara

Background:

Morocco virtually annexed the northern two-thirds of Western Sahara (formerly Spanish Sahara) in 1976, and the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Rabat's sovereignty ended in a 1991

UN-brokered cease-fire; a UN-organized referendum on final status has been repeatedly postponed.

Economy Western Sahara

Economy - overview:

Western Sahara depends on pastoral nomadism, fishing, and phosphate mining as the principal sources of income for the population. The territory lacks sufficient rainfall for sustainable agricultural production, and most of the food for the urban population must be imported. All trade and other economic activities are controlled by the Moroccan Government. Moroccan energy interests in 2001 signed contracts to explore for oil off the coast of Western Sahara, which has angered the Polisario. Incomes and standards of living in Western Sahara are substantially below the Moroccan level.

@World

Introduction World

Background:

Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance

and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about the environment, including loss of forests, shortages of energy and water, the decline in biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820, to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1988, and 6 billion in 2000. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances in medicine) and fears (e.g., development of even more lethal weapons of war).

Maritime claims:

a variety of situations exist, but in general, most countries make the following claims measured from the mean low-tide baseline as described in the 1982 UN Convention on the Law of the Sea: territorial sea - 12 nm , contiguous zone - 24 nm , and exclusive economic zone - 200 nm ; additional zones provide for exploitation of continental shelf resources and an exclusive fishing zone; boundary situations with neighboring states prevent many countries from extending their fishing or economic zones to a full 200 nm

Climate:

two large areas of polar climates separated by two rather narrow temperate zones form a wide equatorial band of tropical to subtropical climates

Terrain:

the greatest ocean depth is the Mariana Trench at 10,924 m in the Pacific Ocean

Elevation extremes:

lowest point: Bentley Subglacial Trench -2,540 m

note: in the oceanic realm, Challenger Deep in the Mariana Trench is the lowest point, lying -10,924 m below the surface of the Pacific Ocean

highest point: Mount Everest 8,850 m

Natural resources:

the rapid depletion of nonrenewable mineral resources, the depletion of forest areas and wetlands, the extinction of animal and plant species, and the deterioration in air and water quality (especially in Eastern Europe, the former USSR, and China) pose serious long-term problems that governments and peoples are only beginning to address

Economy World

Economy - overview: Global output rose by 4.9% in 2004, led by China (9.1%), Russia (6.7%), and India (6.2%). The other 14 successor nations of the USSR and the other old Warsaw Pact nations again experienced widely divergent growth rates; the three Baltic nations continued as strong performers, in the 7% range of growth. Growth results posted by the major industrial countries varied from a small gain in Italy (1.3%) to a strong gain by the United States (4.4%). The developing nations also varied in their growth results, with many countries facing population increases that erode gains in output. Externally, the nation-state, as a bedrock economic-political

institution, is steadily losing control over international flows of people, goods, funds, and technology. Internally, the central government often finds its control over resources slipping as separatist regional movements - typically based on ethnicity - gain momentum, e.g., in many of the successor states of the former Soviet Union, in the former Yugoslavia, in India, in Iraq, in Indonesia, and in Canada. Externally, the central government is losing decisionmaking powers to international bodies, notably the European Union. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. The addition of 75 million people each year to an already overcrowded globe is exacerbating the problems of pollution, desertification, underemployment, epidemics, and famine. Because of their own internal problems and priorities, the industrialized countries devote insufficient resources to deal effectively with the poorer areas of the world, which, at least from an economic point of view, are becoming further marginalized. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, poses economic risks because of varying levels of income and cultural and political differences among the participating nations. The terrorist attacks on the US on 11 September 2001 accentuate a further growing risk to global prosperity, illustrated, for example, by the reallocation of resources away from investment to anti-terrorist programs. The opening of war in March 2003 between a US-led coalition and Iraq added new uncertainties to global economic prospects. After the coalition victory, the complex political difficulties and the high economic cost of establishing domestic order in Iraq became major global problems that continued into 2005.

Transnational Issues World

Disputes - international:

stretching over 250,000 km, the world's 325 international land boundaries separate the 192 independent states and 73 dependencies, areas of special sovereignty, and other miscellaneous entities; ethnicity, culture, race, religion, and language have divided states into separate political entities as much as history, physical terrain, political fiat, or conquest, resulting in sometimes arbitrary and imposed boundaries; maritime states have claimed limits and have so far established over 130 maritime boundaries and joint development zones to allocate ocean resources and to provide for national security at sea; boundary, borderland/resource, and territorial disputes vary in intensity from managed or dormant to violent or militarized; most disputes over the alignment of political boundaries are confined to short segments and are today less common and less hostile than borderland, resource, and territorial disputes; undemarcated, indefinite, porous, and unmanaged boundaries, however, encourage illegal cross-border activities, uncontrolled migration, and confrontation; territorial disputes may evolve from historical and/or cultural claims, or they may be brought on by resource competition; ethnic clashes continue to be responsible for much of the territorial fragmentation around the world; disputes over islands at sea or in rivers frequently form the source of territorial and boundary conflict; other sources of contention include access to water and mineral (especially petroleum) resources, fisheries, and arable land; nonetheless, most nations cooperate to clarify their international boundaries and to resolve territorial and resource disputes peacefully; regional discord directly affects the sustenance and welfare of local

populations, often leaving the world community to cope with resultant refugees, hunger, disease, impoverishment, deforestation, and desertification

Refugees and internally displaced persons:
the United Nations High Commissioner for Refugees (UNHCR) estimated that in December 2003 there was a global population of 9.7 million refugees and as many as 25 million IDPs

Illicit drugs:
cocaine: worldwide, coca is grown on an estimated 173,450 hectares - almost exclusively in South America with 70% in Colombia; potential cocaine production during 2003 is estimated at 728 metric tons (or 835 metric tons of export quality cocaine); coca eradication programs continue in Bolivia, Colombia, and Peru; 376 metric tons of export quality cocaine are documented to have been seized in 2003, and 26 metric tons disrupted (jettisoned or destroyed); consumption of export quality cocaine is estimated to have been 800 metric tons
opiates: cultivation of opium poppy occurred on an estimated 137,944 hectares in 2003 - mostly in Southwest and Southeast Asia - with 44% in Afghanistan, potentially produced 3,775 metric tons of opium, which conceivably could be converted to the equivalent of 429 metric tons of pure heroin; opium eradication programs have been undertaken in Afghanistan, Burma, Colombia, Mexico, Pakistan, Thailand, and Vietnam

Introduction Yemen

Background:

North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border.

Economy Yemen

Economy - overview:

Yemen, one of the poorest countries in the Arab world, has reported strong growth since 2000, but its economic fortunes depend mostly on oil. Yemen has embarked on an IMF-supported structural adjustment program designed to modernize and streamline the economy, which has led to substantial foreign debt relief and restructuring. Yemen has worked to maintain tight control over spending and to implement additional components of the IMF program, but a high population growth rate and internal political dissension complicate the government's task. Plans include a diversification of the economy, encouragement of tourism, and more efficient use of scarce water resources.

Introduction Zambia

Background:

The territory of Northern Rhodesia was administered by the South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule, but the subsequent vote in 1996 saw blatant harassment of opposition parties. The election in 2001 was marked by administrative problems with three parties filing a legal petition challenging the election of ruling party candidate Levy Mwanawasa. The new president launched a far-reaching anti-corruption campaign in 2002, which resulted in the prosecution of former President Frederick Chiluba and many of his supporters in late 2003. Opposition parties currently hold a majority of seats in the National Assembly.

Economy Zambia

Economy - overview:

Despite progress in privatization and budgetary reform, Zambia's economic growth remains somewhat below the 5% to 7% needed to reduce

poverty significantly. Privatization of government-owned copper mines relieved the government from covering mammoth losses generated by the industry and greatly improved the chances for copper mining to return to profitability and spur economic growth. Copper output increased in 2004 and is expected to increase again in 2005, due to higher copper prices and the opening of new mines. The maize harvest was again good in 2004, helping boost GDP and agricultural exports. Cooperation continues with international bodies on programs to reduce poverty, including a new lending arrangement with the IMF in the second quarter, 2004. A tighter monetary policy will help cut

inflation, but Zambia still has a serious problem with fiscal discipline.

Introduction Zimbabwe

Background:

The UK annexed Southern Rhodesia from the South Africa Company in 1923. A 1961 constitution was formulated that favored whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded more complete voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign begun in 2000 caused an exodus of white farmers, crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection. Opposition and labor groups launched general strikes in 2003 to pressure MUGABE to retire early; security forces continued their brutal repression of regime opponents.

Economy Zimbabwe

Economy - overview:

The government of Zimbabwe faces a wide variety of difficult economic problems as it struggles with an unsustainable fiscal deficit, an overvalued exchange rate, soaring inflation, and bare shelves. Its 1998-2002 involvement in the war in the Democratic Republic of the Congo, for example, drained hundreds of millions of dollars from the economy. Badly needed support from the IMF has been suspended because of the country's failure to meet budgetary goals. Inflation rose from an annual rate of 32% in 1998 to 133% at the end of 2004, while the exchange rate fell from 24 Zimbabwean dollars per US dollar to 6,200 in the same time period. The government's land reform program, characterized by chaos and violence, has badly damaged the commercial farming sector, the traditional source of exports and foreign exchange and the provider of 400,000 jobs.

Transnational Issues Zimbabwe

Disputes - international:

Botswana has built electric fences and South Africa has placed military along the border to stem the flow of thousands of

Zimbabweans fleeing to find work and escape political persecution;
Namibia has supported and in 2004 Zimbabwe dropped objections to
plans between Botswana and Zambia to build a bridge over the Zambezi
River, thereby de facto recognizing a short, but not clearly
delimited Botswana-Zambia boundary in the river

Refugees and internally displaced persons:
IDPs: 100,000-150,000 (MUGABE-led political violence, human rights
violations, land reform, and economic collapse) (2004)

Illicit drugs:
transit point for African cannabis and South Asian heroin, mandrax,
and methamphetamines destined for the South African and European
markets
