BOOMERANG ***

OPERATION BOOMERANG

BY GEORGE REVELLE

*There are all kinds of heroes. And the
irony of it all lies in the fact that the
bravest are those who are unknown and unsung.*

**[Transcriber's Note: This etext was produced from
Worlds of If Science Fiction, April 1957.

Wade Boeman let his eyes wander up the hull of the huge silver ship. He thought; *if only Tomer were here now!* He caught himself and quickly erased the thought before he remembered more ... things that were better left alone, hidden behind the thin veil he had created in his mind.

The quick blink of a signal light from the tower caught the corner of his eye. H-hour minus fifteen minutes. The ground crews had cleared the area. He hadn't noticed. He turned to the huge, blond man standing beside him.

"Well, Allen. This is it. I've checked everything myself. You should have no trouble. Be sure and strap yourself in tightly and don't forget to check the gyro. Its the only thing we can't double check from the tower."

"You're all through instructing now, *teacher*," the blond man said. "I can take it from here. And I can't say I'm sorry."

Wade wanted to say then all the little things that had been building up within him during the past long months. He bit back the words. It took much effort.

He said: "Good luck, Captain. I really mean it."

Allen gave him a tight smile. "Drop dead, Colonel."

Wade dropped his outstretched hand as the big man ignored him. Ackerson turned his back and began to climb the metal rungs leading up the hull of the ship.

Tomer, Wade thought. If only it could be Tomer instead of Ackerson.

He waited until the blond man entered the hatch before he climbed into the jeep. He glanced once more at the silver hull of the *Starfrost*, then he jammed down on the accelerator. Hate was a word Wade seldom used. There was too much of it in the world already. But he was beginning to hate Ackerson.

He parked the jeep beside the concrete and steel structure housing Operations. The instant his hand touched the door handle he tried to cease being Wade Boeman the man. He tried to become Colonel Wadon G. Boeman, senior officer in charge of 'Operation Boomerang,' with no personal feelings. It didn't come off fully.

The four walls were lined with banks of instruments. Small lights flickered and died, only to come alive again the next instant. A man coughed.

He nodded at a communications man, a civilian, as he hurried to the small table where the television set was resting. The closed circuit showed the *Starfrost* resting alone on the sand with her nose pointed toward the sky.

He took off his cap, then lighted a cigarette. He checked his wrist watch with the large clock on the wall. He set the sweep second hand to coincide with the larger one.

"Twelve minutes, Colonel," someone behind Wade said.

He wiped his dry lips as he flicked his eyes in the direction of the Major in charge of the control panel. The Major gave him a tight smile. Wade nodded. Major Gormely was a good man ... they were all good men. Wade felt proud to be part of the team.

He took in the radar man checking the never-ending sweep of the beam. Frank Piluis, a tall, lanky man of twenty-three. He was checking the screen, adjusting, as if his own life depended on its operation instead of a man he hardly knew.

Wade checked his own screen again.

The *Starfrost* was so silent ... so latent ... so important. Wade found Tomer creeping into his thoughts again. He shut the thought out quickly. Wade was a military man. He had orders to forget Tomer. He gave orders. He also had to take them.

Wade became mindful of someone standing behind him. He turned. The man was tall, wearing the cloak of authority in the very way he smiled. Distinguished looking streaks of gray ran over his once brown hair. Tiny wrinkles at the eyes told that he was a man with a sense of humor even though pressed with responsibility.

"A penny for your thoughts, Wade." The Secretary of Defense said as Boeman got up. Wade wondered if the man had been in the control room all the time. He hadn't seen him.

"They aren't worth it, Harry," he answered, offering his hand.

"As bad as that," the Secretary laughed. "Here we are on the edge of a History making moment and you're wasting your time with worthless thoughts."

Worthless thoughts. Wade wondered if they were, really.

Wade first met Harry Lowe a long time ago when the project was just a dream on the drawing boards. Since that time he had come to know the Secretary intimately. Now, suddenly, he felt awkward before the man. Perhaps it was because Lowe seemed to have a special talent for reading peoples' expressions, converting them into sentences. Like now, Wade felt the man was reading his face like a book.

"That's right, Harry. History is being made isn't it?"

The Secretary's face became very serious. "More than that, Wade. Perhaps salvation depends on it."

"Ten minutes," a voice said.

Wade nodded at the technician. Tiny lights came into play on the control panel as Major Gormely began closing circuits. The communications man made a final type check on the huge P.C.R. set.

"*Starfrost*. This is Mother. How do you read me? Over."

"Mother. This is *Starfrost*. Loud and clear. Five by five." Ackerson's strong voice came from the loud-speaker located in the center of the equipment. "Oxygen checks. I've bedded down. Give the Colonel my love."

The radio man looked at Wade. There had been no mistaking the sarcasm in Ackerson's voice. Wade felt his face grow red.

"He hasn't changed," he heard the Secretary say.

"No. He hasn't changed." Wade said softly.

"Don't let it throw you, Wade. You've done a good job. We both know that nothing counts but the Project."

Nothing counts but the project. Personal feelings, ideals, not even human lives. *Nothing counts but the project.* How many times had he said that to himself, trying to be convincing.

"It's Tomer. Isn't it?" the Secretary said.

Wade's eyes locked with those of the older man. There was no sense going over that now. They had had it out a dozen times already.

"That and other things," he said.

"Like Ackerson's attitude, I suppose."

"Like Ackerson's attitude."

The Secretary gave a tight smile. "We all have reasons for doing things, Wade. To you this is a military feat that could spell security for years to come. To me it does that and more. It could be the opening of a new frontier, something that will provide a new outlet for humanity instead of war."

Wade said: "And to Ackerson it will mean fame and fortune. Nothing more. His name will go in the history books. There will be personal appearances, contracts, money. He has no feelings at all about what this will mean to his country."

The Secretary nodded. "You're a professional military man, Wade. You're making it your life. I understand how you feel."

Wade laughed bitterly, inside. *Did* Harry know how he felt? Did he think that military men were just brass and polish with no feelings, no friends to worry about, no cares outside of regulations and orders!

"Eight minutes." The voice came again.

Wade left the Secretary, went to the mike resting on the communications desk.

"*Starfrost*. This is Mother," he said.

"Go ahead, Mother." Ackerson recognized his voice.

"Double check everything. Repeat. Double check everything, oxygen, hammock straps, loose objects, everything."

"Relax, Mother! You sound like you're going to have another baby." Ackerson laughed over the loud-speaker.

Wade gave the mike back to the radio man carefully. He walked back to the small television screen and sat down. The *Starfrost* looked like a silver

monument standing alone out there on the sand. Soon there would be nothing there but sand. Wade felt like a mother hen waiting for her first egg. He adjusted the contrast, brightened the picture. Perhaps the Secretary was right. Everyone had their reasons for doing things. He wondered what Tomer's were?

"Do you think he will make it, Wade?"

The Secretary sat down on the edge of the desk. He looked out of place. He should have been behind one, a large mahogany one.

"I think he will," Wade said softly. "The test ship we sent made it. There is no reason to believe a ship with a man in it should fail."

"Do you want him to make it?"

The words jarred Boeman. He searched the Secretary's face. "Of course I do. What makes you say a thing like that?"

The Secretary toyed with his tie. He said nothing.

Wade got up. He could feel the anger begin to seep through his body. "You know what this trip means to me—to the country." He faced the gray-haired man squarely. "If you're insinuating that I want him to fail because I disagree with his reasons for volunteering, you're wrong. Dead wrong."

Wade found himself lighting a cigarette. "Sure. I dislike Ackerson. Dislike him violently. I've taken more lip from him in the past months than I've taken during my entire life. And when he returns that will be finished or I'll finish him. One way or another." Wade inhaled deeply. "It's the project that counts. Only the project. It's bigger than one man ... it's bigger than all of us put together."

Lowe smiled. His face seemed younger. "I knew you felt that way, Wade. I just wanted you to say it for your own benefit. Perhaps it will make this entire thing easier for you."

The Secretary moved then, over to the communication panel.

"Three minutes," someone said.

Wade looked at the narrow back of Harry Lowe. And he knew how the man became Secretary of Defense. It was shrewd getting him to open up like

that. They both knew how lucky they were to have Allen Ackerson. Finding men capable of making such a flight hadn't been easy. Of the dozen volunteers only Ackerson remained. Mental and physical tests had eliminated all but a few. Those remaining were unfit for space travel, weeded out by the psychological teams, unable to cope with the morbid phobia of being alone so long wrapped in a metal cocoon. Only Ackerson and Tomer had succeeded. Now there was only Ackerson.

"Colonel!" Wade turned and faced the rawboned sergeant standing beside him. Meyers was a big man with a deep tan browning his face.

"What is it, sergeant?"

Meyers handed him a large white envelope. "Captain Ackerson said to give this to you just before take-off."

"Thanks, sergeant."

"Two minutes," someone said. Wade stuffed the envelope inside his jacket. Then he hurried over to the radar man. The envelope had to wait, there was no time now.

"Are we set?" he asked. The man nodded as he adjusted the dials. Wade smiled. These men were experts in their fields. To double check them would be to insult them. Besides, this wasn't the first time for them. The same crew had been operating when they fired the test rocket. He knew they wouldn't fail.

"One minute ... 59 ... 58 ... 57...." Wade found himself counting under his breath while he stared at the small screen on the table. Would the reactors work? They would go on at 30. And the *Starfrost*! Would it lift—or would it, like some others before it, slowly hesitate, then begin a weird, frightening slide to the side to become a flaming blowtorch of death.

"30!" Major Gormely closed the switch. Wade became conscious of the Secretary watching the screen with him.

"... 5 ... 4 ... 3 ... 2...." The counter continued. "FIRE!"

The *Starfrost* shivered.

Wade felt his heart skip a beat. Slowly, ever so slowly, the huge ship began to move. Dust, sand and smoke mingled with the sheets of flame pouring

from her stern. The platform disappeared in a puff of smoke.

The *Starfrost* lifted.

"Thank God!" the Secretary sighed.

"Amen." Wade muttered. He took out another cigarette. He was glad it had begun; the project. Now there was only the long wait.

"Ackerson's a brave man." The Secretary said.

"Of course he is." Wade never had any doubts about Allen's intestinal fortitude. The man had a good war record. Confidence seemed to ooze out of the man. It was his attitude, damn it.

Wade drew deeply on the cigarette. Tomer had been the same type in many ways. Eager, filled with the enthusiasm, unafraid. A small man compared to the blond Ackerson, he seemed to carry himself tall. And his attitude. He felt the same intensity about National defense as Boeman did himself. Perhaps that was another reason he had felt close to the boy. Tomer would have made this trip with no thought whatsoever about the financial rewards or what the history books would have to say about him.

"... Sixty thousand ..." someone said.

"Start communication," Wade commanded automatically.

"Romeo." The commo picked up the small hand mike. All eyes in the room centered on the silent speaker on the wall.

"*Starfrost*. This is Mother. How do you read me, over?"

The speaker remained silent.

"*Starfrost*. Can you read me. Over!"

The Secretary looked at Wade. His face was tight and drawn. "What do you think, Wade. Are we getting through?"

"It's hard to say. He's moving pretty fast. He could outrun the signal. We've never had a practical voice test."

Lowe's face had a worried expression covering it. "Didn't you have communications with the test rocket?"

"That was unmanned ... remember?"

"This silence doesn't worry you?" the Secretary asked with amazement.

"Ackerson was trained for this. He knows there is nothing we can do for him. *He's on his own.* Communications would be to our advantage, to be sure. But Ackerson knows that ship like you know the back of your hand. Besides ... perhaps he is too busy to answer right now. He has to be sure there is no wobble."

"Wobble!"

"Sure. The ship could begin to oscillate. If it does that he is done. He has to keep his eye on the gyro."

The Secretary's eyes penetrated. "I can't help but feel that you would be more concerned if Tomer were in the *Starfrost* instead of Ackerson. Wade ... don't let the fact that you hate Ackerson cloud the issue. He is doing us a great service."

"Stop it, Harry!"

"After all. The first man to circle the Moon is entitled to a place in the history books. I can share his feelings, in a way. It's a great thing he's doing."

"Others have done more," Wade said sharply.

"Of course they have. But remember one thing. If Ackerson succeeds we will get the appropriations we need to *build* up there on that cold chunk of rock. We need that ... need it badly."

"I tell you we have nothing to worry about yet," Wade said quickly.

"Have it your way, Wade. But remember, we can't land on the Moon until we have appropriations for installations. It all takes money; landing sites, protection against the elements, and most important, take-off facilities. It's a big order. Ackerson can give us all of that if he is successful. The public will back us to the limit if we prove we have mastered space travel." The Secretary watched Wade carefully. "Ackerson *is* important!"

"I never said he wasn't."

"I know, Wade." The Secretary toyed with his tie. "But did you let your feelings toward Tomer interfere with your attitude toward Ackerson? He came to me you know, about halfway through the course. He said you were babying Tomer to the point where it was interfering with *his* instruction."

"He lied," Wade cut in. He threw down the cigarette he was holding and ground his heel into it. "You know me better than that!"

"Of course. But perhaps Ackerson did have *something*. Perhaps you spent more time with Tomer than you intended. Unconsciously you may have favored him to the point where Ackerson did suffer."

Wade let his eyes wander over to the small television screen. It was still operating. Flat, empty sand and a burned out area was all that remained of the *Starfrost*. He wondered: Did I do that? Did I forget to teach Ackerson something while I was working with Tomer?

The loud-speaker crackled.

"Mother. This is *Starfrost*. Over."

The operations room came alive. Wade and Lowe hurried over to stand beneath the speaker, as if that would put them closer to the *Starfrost*.

"Go ahead, *Starfrost*. This is Mother." The communications man held the mike in a hand that wasn't quite as steady as it should be.

"This is *Starfrost*. Everything in the green. Repeat, everything in the green. Over."

Wade took the mike. "How is the gyro, *Starfrost*!"

The loud-speaker laughed. "Tsk, ts, Colonel. Where is your radio procedure? You forgot to say over." There was a pause and Boeman knew why. "Don't tell me you're worrying about ole Ack. I've got this thing sewed up. Why don't you take a walk around the park and see if you can find that little guy? What was his name? You know the one I mean. The one who got cold feet and dropped out before you finished feeding him. Over."

Wade handed the mike back to the commo man without a word. He looked at the Secretary. Lowe's eyes cautioned him. Wade swallowed the things he was going to say. Orders. Damn them. He wanted to stick a pin in

Ackerson's ego. And it would be so easy. So damn easy. Orders. He gave them and he had taken them.

Wade turned and got the mike again. "This is Mother. Keep an eye on the hull temperature. Watch that gyro. If you feel the slightest vibration be sure to start the auxiliary immediately. Over."

"Romeo, Mother. Take care of my letter. I—" the speaker became silent.

Major Gormely moved like a blur of light. Wade knew what was wrong the instant he looked at the pip on the radar scope. Major Gormely hurriedly began checking instruments. But he had seen too. The equipment was in order. It was the *Starfrost*. It had all indications of a "wobble".

"This is serious, isn't it, Wade?"

Boeman didn't look at the Secretary when he answered. His eyes were glued to the radar scanner. "Pretty much. It could be the end if he doesn't catch it in time."

"What can we do?"

"Nothing but wait. He isn't finished yet. He has the extra gyro. That should do it. If not he can try the fuel as a last resort. It's only theory plus but he might be able to blast something with substance against the dorsel fin. If he plays it carefully he might be able to give the gyro a hand. It will be tricky but we think it can be done."

"What effect will that have on the mission? He has only so much fuel!"

"He can waste thirty seconds. After that he is cutting himself short on the leg home."

"The wobble stopped," Major Gormely said quickly.

It was true. The course was slightly erratic but Ackerson had the *Starfrost* back under control. Wade wiped the back of his hand over his lips. Suddenly he felt tired and old. He wanted to sit down. "Keep trying on the radio, Mike," he said.

He walked over to the small table with the television set on it. He switched it off. He didn't want to look at that empty sand. He lighted another cigarette. Then he reached inside his blouse and withdrew the letter Ackerson had left for him. He didn't want to read it. For the first time he

had felt close to the blond man ... felt sorry for him. The letter could say something to change that.

"Why don't you read it, Wade?" the Secretary said.

Wade looked up quickly. The Secretary was smiling with that know-all look of his. Wade reached in his pocket and brought out the pack of cigarettes. Then he caught himself. But the older man hadn't missed the one smoldering in the ashtray.

A tight smile creased Wade's face. He felt like a small boy caught with his hand in the cookie jar. "I know a nice quiet spot in upper New York. Phonecia! There's a nice trout stream beside the only hotel. The people are simple and tolerant. And there is a small, private bar where a man can really relax. I think I'll go up there for a few years when this is all over."

"Now you're reading *my* mind," the Secretary said.

They both laughed.

"Seriously, Wade. I think you should take a long rest when this is over. A man with your knowledge of the human body should realize that you're fighting fatigue. In fact I've already spoken to General Dominick about it."

Wade shook his head. "You know I can't do that. I've got another job I have to take care of first."

"Tomer?"

"Of course."

"I thought we settled on that. Someone else can take over in your place and handle that. You can supervise if you wish. But not until after you've had a rest."

"You know better, Harry. This is my baby and I'll handle it. It isn't that I haven't tried to keep him out of my mind. I have. Yet he always comes back to haunt me. If not because of my own feelings, then it's Ackerson reminding me. It's no use. I can't rest with him on my mind."

"Not even when you've had orders?"

Wade snuffed out the cigarette. "I'm finding out that feelings can sometimes rebel against orders."

"That isn't a good trait for an Army Officer to acquire."

Wade's face took on a sardonic expression. "No. It isn't, is it?" he said softly.

The time piece on the wall was broken. It had to be. Wade had been watching it for hours and it hardly seemed to move. The *Starfrost* had disappeared behind the dark side of the Moon and a press release had been duly passed on to the anxious public. The world was electrified. Man had ventured into space. The public hadn't been told that there was no communication with the *Starfrost*. It was better that way.

Wade fished for another cigarette as he followed the sweep second hand with his eyes. It was ironic, in a way. Man had ventured to the Moon and could not land. He dared not. To set foot on the cold, dead satellite when there was no possible way of return would be inviting suicide. The test rocket fired at the silent world, and the *Starfrost* had eaten up the last of the appropriations and it would take a battery of ships to carry the supplies necessary for the building of take-off facilities.

That was what Wade wanted, an installation on the Moon before another nation could make it. It was no secret that the nation that controlled the Moon in the next war would be in the driver's seat. It would be a fortress in the sky. And it was no secret that another nation was almost ready to launch a ship. Wade wanted to get there first.

Wade could feel the sweat on his hands. They felt cold and clammy. The *Starfrost* should have reappeared on the radar set an hour ago. He dared not think of what would happen to Ackerson if the big blond man miscalculated while in orbit. To shoot off alone into black, empty space, hurtling out into a void of nothing, where there was only a cold, quiet death awaiting was no way for a man to die.

Damn it. Where was that silver cocoon? Ackerson had to make it. Everything depended on the success of the *Starfrost*.

"I think I've got something," Major Gormely cried.

Wade came out of his dream world with a rush. His swift steps covered the distance to the radar set in a matter of seconds.

Gormely was bending over working with Piluis. And it was there ... a tiny speck that could only be one thing.

Wade heard himself mutter: "Thank God!"

The control room became a beehive of excitement. These men were accustomed to success in the face of overwhelming pessimism. Yet this was almost the ultimate. They were part of a team that had projected an earthbound object into space. Now it was coming home. "Operation Boomerang" was nearing fulfilment. The long hours of sweat and worry were beginning to pay off. The cork was ready to burst out of their bottled up emotions.

Sergeant Meyers' face was beaming. He was exuberant with excitement. "I guess that calls for a drink." He took Wade by the arm. "I've been saving a quart of homemade corn for just this occasion."

Suddenly Meyers stopped. His tan face became a gray mask.

"... pardon me, Colonel ... sir!" He came to rigid attention.

Wade laughed heavily. "I think one drink would be in perfect order, sergeant. Where do you hide this liquid cob?"

Meyers' face became bright again. He almost tripped as he tried to salute, about-face, and run at the same time. He was going out the door when he called back over his shoulder. "In the water closet on one of the thrones in the latrine ... Sir."

It was Wade Boeman who ruined Allen Ackerson's exit. He had the staff car pick up the pilot as soon as the hull of the *Starfrost* cooled. The official car had sped back over the barren sand, through the waiting throng of newsmen, straight to the small office located in the control building, without a stop. To say that it peeved Ackerson would be putting it mildly. His face was still burning with anger after twenty minutes of interrogation. Wade knew it was only the presence of the Defense Secretary keeping him

in line. For that reason he tried to keep each question brief and simple. Ackerson was dying to get outside that door and receive some of the acclaim that he was being denied.

"You say you had a chance to look at the test rocket we fired?" Wade asked.

"Yes sir. It was resting in a red crater, fairly well beat up. It must have come down hard. In fact it looked like it may have struck a wobble at the last minute. Of course the terrain is pretty rough up there and it could have toppled after it hit. I'm sure the camera shots I took will tell us much more."

Wade felt a sudden twitch in his shoulder. "You said the crater was red."

"Yes, sir. A bright red. I thought it was strange. It was as if something spilled out of the ship when she hit."

Wade and the Secretary exchanged glances.

"It was a marking dye so you could pick up the location of the ship," Wade said too quickly.

Allen twisted his head as the sound of many voices pierced the quiet room. Someone cheered loudly. Allen shifted his large frame.

"How was she lying?" Wade asked.

Allen brought his attention back to the two men. It was obvious, he was becoming annoyed. "Down tail-first. The nose section looked intact. That's what makes me believe she took on a wobble at the last second. The nose should have been buried out of sight."

Another cheer forced its way into the room. Suddenly Allen burst out. "Tell me, Colonel. How's Tomer these days. You remember, that little guy who quit on you just before the training ended."

The words had the effect the big man had hoped for. Boeman came out of the chair. His face was a vivid white. "You ..." he began.

The Secretary moved quickly. He was between the two men before Wade could continue. "That's all for now Captain Ackerson," he said, "or should I say Mister Ackerson. Your papers have been processed as you wished. You're a civilian, after sixty days terminal leave, of course."

Ackerson watched the play of emotions on Wade's face. He was enjoying every second of it. Wade wanted to smash that smug face all over the floor. Yet he was powerless. Ackerson was still an officer and there was too much left undone to risk everything now. He sat back down on the chair. There would be time when the blond man was a civilian.

"Thank you, sir." Allen grinned.

The Secretary extended his hand. "Congratulations again for a job well done." They shook hands.

"Don't forget, Ackerson," Boeman said as Allen hurried to the door. "The next week is mine. Solid interrogation. You're still in the service."

"Yes, Sir."

"And one more thing, Ackerson. I know your communication was working. Why didn't you answer our calls?"

"I thought that would make you sweat a little. I can see that it did."

The door slammed shut.

Neither man spoke when the door closed behind Ackerson. The silence was long. Finally it was Boeman who moved. He opened the top left drawer of the desk and withdrew a small glass and a bottle. He poured a drink and offered it to the Secretary with a glance of his eyes. The Secretary shook his head.

Boeman lifted the tumbler to his lips and poured the liquid down with a quick motion. He made a face as it burned. He poured another, toyed with it before he tossed it down.

"Well, he made it." Boeman said finally, placing the empty glass on the desk. "To the Moon and back—non stop."

"You knew he would, didn't you."

Boeman nodded, staring at the glass.

There was another awkward silence as both men were wrapped in thought.

"Disappointed, Wade?"

"Not disappointed. Disgusted."

"He gave us what we wanted. The appropriations will be easy now."

"I know."

"Then what's wrong? Certainly you can't blame Ackerson fully. He doesn't know the entire story."

"Perhaps that's what's wrong. If I could just tell the full story I might feel better."

"Impossible. Can you imagine the entire nation carrying a load on its back the way you are now?"

Wade laughed bitterly. "It might wake them up."

"I understand, Wade. My insides feel it too. But let him be the hero."

"He will be," Wade said, reaching for the bottle again. "He will be."

"Then let him. We have more important things to think about now." The Secretary got up. Wade grasped the empty tumbler in the palm of his hand, squeezing tightly.

"Ackerson said red."

"I know," replied the Secretary.

"Red means danger. The crater should have been stained yellow."

"Perhaps there was a mix-up in containers."

"You don't believe that, Frank."

"But the radio is still operating! A steady C.W. beam is coming in. If there was any danger we would be getting code."

Wade forced a smile. "You should have been a minister. There is always hope ... is that it?"

The Secretary placed his hat carefully on his head. "I'd better get over to the lab and take a look at those movies he took."

"It must be so lonely ..." Boeman said loosely.

"Perhaps not. Tomer was a quiet man. Those kind don't seem to mind."

A sudden, loud cheer broke the near silence in the room. Wade glanced toward the window. Then he got up slowly with the action of an old man. He went to the window and looked out.

Ackerson was being carried through a path of humanity aloft on dozens of shoulders. He was waving to the hundreds of well-wishers as he was carried toward the battery of microphones waiting on the wooden platform erected

for the occasion. Wade couldn't help but think of a hero of another age. Lindbergh. It must have been the same then. And who remembered those that followed him? Or those that paved the way so he could make it? Wade shook his head.

He turned away from the window quickly, heading for the desk and the bottle. The Secretary followed him with his eyes, undecided.

Boeman lifted the bottle high above his head in a toasting gesture. "To the hero."

"Don't, Wade."

The bottle paused there while the eyes of the two men met. Finally the bottle returned to the desk as Wade surrendered. Then he slumped down in the chair.

The Secretary placed his hand on Wade's shoulder. Boeman shook it off, and he was sorry instantly. "O.K. Frank. You win. Ackerson wins."

"Good," the Secretary said softly. "That's the way we want it. We have to prevent everyone from feeling the way you do now. It isn't that you're jealous of Ackerson getting the glory. And you know that Tomer doesn't mind. It's your worrying about him that's clouding your mind. Everyone would be feeling the same way."

The Secretary looked out the window. "We couldn't have that. It would have set space travel back years. Ackerson is powerful evidence that space flight is safe. Tomer is our insurance. We need that just as badly. We had no choice. We had to stake a claim on the Moon."

Wade poured another drink. "And that conceited ass is getting all the credit while Tomer is sweating it out up there on that cold chunk of rock—while everyone thinks he quit the project because he got cold feet."

"True." The Secretary shook his head. "But Tomer is our ace-in-the-hole if the iron curtain announces their intentions to land up there."

"Tomer can be contacted. He can set off the signal for the world to see. In the meantime we will be working to make the next flight a complete one. It won't take long. Tomer will manage."

"But Ackerson said the crater was red!"

"I know. And I'm wasting time talking with you. I should be looking at those movies he took."

Wade didn't watch the Secretary leave. He picked up the bottle and glass and went to the window.

Down on the ramp the P.A. began to crackle. Ackerson was beginning his speech.

Wade took out the letter that Ackerson had sent to him. He took out a match and touched the flame to it. It was better that way. He was finished with Ackerson. He had a job to do now, one that would consume him. He had to get the *Starfrost II* underway. He had to get there to get Tomer.

Suddenly he understood. There were all kinds of heroes. Men like Ackerson were driven by the lure of fame and money. Tomer became one because the job had to be done and there was no one else to do it. Lowe was one, in a way, fighting for peace against a world that was always in unrest. In a way Wade himself might fall in one category. The thought made him smile.

The Secretary was right, of course. The public would crucify them if they knew Tomer had been in the supposedly unmanned test rocket fired at the Moon with no way home.

Wade lifted his drink high in the air as Ackerson's deep voice carried into the room from the ramp below. "To a hero," he said. "A lonely hero." Wade's eyes were on the sky when he said it, on a spot where the Moon would be some hours later.

*** END OF THE PROJECT GUTENBERG EBOOK OPERATION
BOOMERANG ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
