**A DEFENCE
OF THE INQUIRY INTO
MESMERISM & PHRENOLOGY,
CHIEFLY IN RELATION
TO RECENT EVENTS IN LYNN.**

BY
WILLIAM ARMES.

LYNN:
PUBLISHED BY J. W. AIKIN, AND J. THEW,
HIGH STREET.

1843.

A DEFENCE &c.

In offering this address to the consideration of the candid and sober minded of my fellow Townsmen, I am guided by no desire to prop, by my small influence, any new, and possibly false, theory; or to cry down, without examination, the pretensions of any science (so called) however adverse to my preconceived ideas.

The subject of Mesmerism and of Mesmeric Phrenology has, for some time past, occupied the attention of the inhabitants of Lynn, and the various phenomena exhibited, as might have been expected, have called forth the credulous wonder of one class, the unworthy ridicule of another, and the patient and quiet examination of a third.

Two pamphlets have appeared upon the subject, which it is not my intention to remark upon at any length. The first (written, I have no doubt, with the very best intention) is from the pen of an individual who was associated with a small party, employed in the rigid scrutiny of the exhibitions of the Lecturer; who did not, in the Meetings held for that purpose, express his doubt or dissent to much of the most novel and startling phenomena; but, who thought it not inconsistent with his position, to leave his friends in the midst of their unfinished inquiry; and, prejudging the question, to placard the Town, with yellow handbills, after the style of other Pamphleteers, advertizing his proportion. This publication, certainly, in the estimation of most intelligent men, is not remarkable for any thing approaching critical investigation or inquiry; but may, possibly, amuse the children and the vulgar, by the low exhibitions of art, imitating wit, by which the author has adorned it.

The last Pamphlet, by Mr. Cotton, published under the ambiguous title of "Popular delusions applied to Mesmerism," has just issued from the press; I

have read it very carefully, and am perfectly astonished to find how very little Mr. C. to say upon the subject.

I can well believe him when he says, “We have gone out of our way to draw up these lines,” it really appears so, and I feel persuaded, that, whatever opinion his readers may form of the entire work, this passage, at least, will be universally received as perfectly clear and veracious.

Mr. C. tells us, at the outset, he is “but a gatherer,” this also is very evident, and, I only regret that he had not been directed to quarters where he might have gathered something upon the subject; or, at least, more relevant than the conglomerated mass of hard names and phrases, with which he has soiled his pages; which can only induce the head-ache in any of his readers, who should be induced to follow him, in his mental meanderings. And, I have no doubt, this has been the result to the Author, in his toilsome “gathering” of such mighty material!

These two gentlemen, sheltering themselves under the names of those great men, who, it is very true, have discarded, or thrown doubt upon the subject of Mesmerism, have pleased themselves with the idea of their honourable companionship: they have exulted in the presumption of being influenced by the same genius; and, looking at the track, marked out by these larger vessels, they have sung to themselves very innocently,

“There let my little bark, attendant, sail,
Pursue the triumph and partake the gale.”

Indeed Mr. Taylor says, “I would not have sent it thus hurriedly to the press, but, fearing that Mesmerism might die a natural death, before I had given it one kick, I would not delay.” Very unkind indeed towards a falling phantom, which needed not, it appears from our author, a blow so heavy, as must be the consequence of a kick from so weighty a man as Mr. Taylor!

Had Mr. Taylor and Mr. Cotton merely exercised their right of publishing to the Town their own opinions; or, had they only recorded the opinions of others, I should not have felt it my duty to have taken any special notice of their labors; but, when Mr. Cotton, at the close of his labored essay, which, indeed treats of almost every subject save that of Mesmerism, and to produce which, he must have been very diligent in poring over the pages of

the several books upon his shelves; when, at the close of his toil, he charges those, who have seen it to be their duty to enquire into the subject, with “Wonder, Impressibility, and Credulity;” with affording “partisanship, patronage, and encouragement to their Mesmeric Protogees,” I may perhaps be excused for offering to my fellow Townsmen, some remarks upon the subject, which, but for the attempts at satire of Messrs. Taylor and Cotton, would, possibly, not have appeared.

When Mr. Brookes first lectured in Lynn, I was induced to attend, as I had been informed that he would experiment on a lad who was my apprentice. I went to that Meeting quite as skeptical as any person could be, having seen nothing in Mesmerism, myself, and, having read only as much as gave me a most unfavorable opinion of its pretensions. I saw the experiments; I endeavoured to account for them, but, was unable. I confess, honestly, that I was astonished at what I saw. I found, that the Lecturer was applauded by the mass of the audience. I felt persuaded that a clever impostor was deluding the people; or, that a power, in Nature, was, then, brought before me of which I had had no previous conception. At the close of his experiments, being desirous that the intelligence of the Town should be brought to the examination of these new phenomena, I proposed, to the Lecturer, that I should endeavour to procure a Meeting at the Town Hall, of a class of persons competent to the investigation. To this he readily assented, with the definite understanding that on his part it would be quite gratuitous; and, that my only object was a rigid examination of his experiments. The Meeting was held; and, I can appeal to those who were present whether there was not, on the part of the audience, a disposition to debate every inch of the argument, as the experiments proceeded.

The result of that Meeting was quite what I expected; The Medical and Scientific Gentlemen present, departed, not satisfied; but, disposed still farther to investigate. Many smaller Meetings have been held, at the houses of the several Gentlemen engaged in the inquiry, and, at those Meetings, a process of examination and of testing the experiments has been pursued, which, could not be adopted at a Public Meeting. I would here remark, that, at all these Meetings, Mr. Brookes has, cheerfully and gratuitously, afforded every possible opportunity of testing his exhibitions; and, I feel assured, that he will not dissent from my testimony to the courteous, though careful and rigid, character of the investigation.

I wish the reader to bear in mind that, in any statement or opinion I may place upon these pages, I particularly disclaim any intention to commit any Gentleman engaged in the investigation of the subject; whether they may or not hereafter be disposed to publish the result of the inquiry, I am not prepared to say; but, all I now write is upon my own exclusive responsibility.

For myself, I state clearly, that, while I dissent from the extraneous and ridiculous nonsense by which the subject has been allayed and encumbered; yet, that I have seen, in the Meetings to which I refer, such manifestations as were undeniably genuine in their character, and, could certainly not be accounted for by the power of Imagination, laid down by Mr. Taylor; or by any of the hard Words by the employment of which Mr. Cotton has endeavoured to impress the Public with a high idea of his Wisdom.

Of the facts which have been seen, in the course of the inquiry, I, at present, state no more than this. That nothing has been credited upon doubtful evidence; but, that the Inquirers have trod in the investigation with the utmost caution, doubting every thing, debating every thing, and only advancing to a judgment as they were enabled to connect, link by link, the increasing chain of evidence.

I disclaim for myself, and I feel sure I may for the Gentlemen with whom I have been connected, any design or desire to promote Mesmerism, or to advance the interest of the Lecturer. With the Individual none of us has had the most remote connection, before his visit to Lynn; and for the Science we could not be supposed to have any great predilections or regard. Our only object has been, as far as possible, to examine the facts, and to prevent, if in our power, any imposture being palmed upon the Town; and I submit that we have been as honorably employed as Messrs. Taylor and Cotton in their mere attempts at ridicule. To the latter Gentleman I would recommend the perusal of Dr. Dickson's "Fallacies of the Faculty," where he would learn that he is not the first *professional* person who has employed ridicule, instead of scrutiny, on the introduction of new theories, some of which, by the way, are now adopted by Mr. Cotton himself, in common with the profession generally.

With the doubts or convictions, resting upon the minds of those who have examined the subject, I have nothing to do; each individual has the power, given him by the Creator, to examine for himself; and he should be guided by his own convictions, and by those convictions alone; but, when any person is determined to shut his eyes to evidence, and then tells me he cannot see, I can only reply, "It would be *Mesmerism* indeed if you could;" but, if in addition, he require me to follow his example, and to blindfold my perception, I entertain for such person feelings bordering on contempt.

What I have seen has made an impression on my mind; the nature of that impression is very unimportant to the Public, and I only feel called upon to justify the course I have pursued in the inquiry; or rather, to justify the inquiry itself.

In order to this, I shall briefly reply to the arguments *against inquiry* into the subject of Mesmerism and Phrenology as I have heard them advanced.

The first, and certainly the most futile of all the reasons alledged why we should not inquire into the fact or fallacy of Mesmeric and Phrenological phenomena is this. *That the Lecturer is connected with the Chartists.* Had I not heard this myself, and had not Mr. Taylor thrown out in his pamphlet the same insinuation, I confess, I should not have conjectured there was a single individual who could be, at all, influenced by such petty, not to say stupid considerations. Who ever dreamed of inquiring, except as matters of historic interest, in relation to the individuals themselves, whether Newton, Harvey, Franklin, and the various discoverers of the useful Arts and Sciences were Whigs or Tories? and, I presume, that the individuals making this objection ride very comfortably in the vehicles of the Country, undisturbed as to whether the inventors of stage coaches belonged to their own, or to an opposite class of Politicians. For myself, in examining the Theory, I conclude I have as little guarantee for its truth from the Chartism, as I should expect from the Toryism of its Lecturer. In all such matters I judge from the facts, and not the individuals; and am too well assured that no political party stands so high in virtue as to offer me a complete security against fraud and imposture.

It is argued, also, *That if there had been any truth in Mesmerism, it would since the days of its discoverer, have certainly made more progress. That, it*

has now been many years before the public, and remains, as to any useful purpose, in its original position.

It were sufficient to reply to this argument, that, if no parallel could be found in the introduction of other discoveries, now held to be useful to the public; that the presumption is quite illogical, that I must not credit what I see, and what my senses assure me to be fact, because similar exhibitions have been before, and often shown to the eyes, and ears, of other persons and they have discarded them.

I conceive, the more philosophical mode to be to come to the examination without prejudging it; and to inquire as closely and carefully as if the subject was being introduced for the first time.

No person, being at all acquainted with History, needs to be informed by what slow process the most useful discoveries have made way in the world. Every thing new comes to us clothed with suspicion; and the most intelligent and best men are reluctant to forego long cherished ideas and hypothesis in favour of a new doctrine, and too hastily to adopt the novelty, among such persons, is to lose cast in society, and to incur the appellation of Enthusiasts in the world.

Farther, when the bare truth of any discovery has been generally allowed, we find, that the movement has been very slow indeed by which it has advanced to perfection.

By what tardy steps has Naval Architecture advanced from the time that the first Savage ventured upon a plank across the brook, until, in our day, the Navies of the Nations are spreading their canvas up the oceans of the world?

It is now, in the fulness of our knowledge, difficult to go back, in idea, from the recent launch of the “Great Britain,” to the remote period when, the power of Steam was first observed, by some old Lady, when boiling her kettle on the kitchen fire.

We are told, by Mr. Cotton, of several individuals, deservedly eminent in literature, who have discarded the new Science; but, if Mr. C. be on that account entitled to any advantage, might not Mr. Brookes retort upon him, “You have all the advantage of their researches, and surely, if it be

imposture, they could have discovered it; I now bring my facts before you, and, after all your experience, challenge your investigation?" and I cannot but think the labour of the learned has been ill employed, for so many years, if they have been able, after all, to lay down no plan by which to detect this presumed imposture.

It is argued also, That, if Mesmerism be true it can be of no real use in Society; and that it may possibly be ill employed.

The answer to this objection I hold to be, that at present, we have nothing to do with the use or abuse of the assumed power; our only object is, to inquire into its existence; that must necessarily be ascertained before it can, in any way, be employed: I feel assured, that, if the power, claimed by Mesmerism, do really exist, it, in common with all the powers of Nature, is capable of producing good; and I would caution Objectors against the reflection upon Providence obviously implied in the opposite idea.

If the real use of a discovery were required, before it could be advanced to the world, it would operate most fatally to the interests of Science.

Had Dr. Franklin been called upon to prove the use of Electricity, before he was allowed to exhibit his discoveries, he would have been stopped on the very threshold of his experiments, and much of his ingenious discovery would have been lost to the world.

I am here speaking of Mesmerism, alone, as I shall hereafter have to speak of Phrenology. As to any remedial effect to be expected from the practice of Mesmerism, in cases of physical or of nervous disease, it would be quite out of my province, publicly, even to conjecture: I can only state, that I have heard, on most unquestionable authority, of cases of cure, of a most important kind; but, that, in the estimation of Medical men, the result would have been, fairly attributable to the operation of Mesmerism I presume not to determine.

It is creditable to the Medical Gentlemen of Lynn, that they have, with few exceptions, applied themselves to the consideration of the subject, and I have no doubt, would be glad to find in Mesmerism, as in any thing else, an additional auxiliary in their endeavours to ease the couch of suffering, and to lessen the amount of human misery. The curative properties we may

leave to the better information of the Faculty, while we employ our perceptive powers in endeavouring to ascertain the fact, or fallacy, of the presumed Science.

That the discovery may be abused is at once admitted, though by no means, to the extent of the fears of some individuals; but, we do well to inquire how the same idea applies to other matters. I incline to the belief that there are few powers in Nature not capable of being abused.

Who is not aware of the destructive properties of Fire, and how often it is employed, by the Incendiary, to the damage of the honest and unsuspecting? Who has not heard, day after day, of Juries sitting upon the bodies of unfortunate persons who have been destroyed by this powerful element of Nature? and yet, who ever heard of any sane person who would argue, that it had been better for Mankind had Fire not been known?

Who does not know the mighty power for ill, as well as for good, the *Materia Medica* confers upon the professional part of civilized Society? yet, who would argue, that it would be better for mankind to discontinue the use and practice of Medicine?

The exhibitions of Mesmerism have been compared to the feats of the Jugglers of India, and, we have been pressed with the assurance, *that the Mesmeriser is quite outdone by the Juggler*. It may be so, but I submit, that there is a clear line of distinction to be drawn between the two cases.

The Indian comes before you professing to deceive, he defies you indeed to discern the process of imposture, and sometimes the observer is so astonished that he falls back on the only idea that can serve him at the moment, (so completely are his senses paralyzed) that, there must be some superhuman agency employed; but, after all, it only professes to be the feat of a Conjuror, and he offers you no clue to the practice of the same delusion.

The Mesmeriser exhibits, before your eyes, phenomena very strange and startling, but he says "I am no Conjuror; I only profess to show you a latent power in Nature, as yet but imperfectly developed; I believe that its knowledge may be useful to Society; I profess to do nothing which you

cannot do yourselves; test my experiments in every possible way, *I will assist you to do so.*”

Who, I ask, does not at once see, that in the one case, we are imposed upon by a clever Impostor, and cannot help ourselves; while in the other, we can test almost every experiment by trials of our own, and need draw no conclusion but from the result of our own individual and absolute experiment.

The only remaining argument advanced against inquiring into the assumed sciences, of which we are speaking, is this, that *The establishment of the truth of Mesmerism, and specially of Phrenology, would be destructive to the Christian Religion, and would subvert the authority of the Scriptures upon which that Religion is based.*

To my mind, this is, by far, the gravest argument with which we have to deal, and I should be sorry indeed to treat it in an improper or unbecoming manner; yet, I feel that I should be failing in the duty I have imposed upon myself, were I not to look the presumed difficulty fairly in the face; and at least endeavour to justify my own conduct in regard to it; and if possible, to remove the delusion which, I humbly suggest, hangs upon the mind of those who make this objection.

I am quite aware that it is impossible that I should do complete justice to this part of my subject; or, offer more than a comparatively very small part of the argument which might be adduced. My purpose, in this publication, would not be served by a long treatise; and I shall therefore endeavour to compress the argument as much as possible, begging the reader to judge impartially of what I do advance; and not to condemn the argument because I have been unable to compress that which would require a volume, into the pages of a small pamphlet.

Before I proceed farther, I would altogether dismiss the objection, *That we cannot comprehend the phenomena*, observing, merely, that that remark applies, with equal force, to a vast variety of subjects and objects, which we are compelled to believe.

“Go ask your mother Earth why Oaks are made
Taller or stouter than the Weeds they shade.”

To the serious, christian man, upon whom this objection has any influence, I would remark, that he who is disposed to admit the truth of that only which he can comprehend, confines his faith in a very narrow circle, within the circumference of which there can be no God!

I here feel it incumbent upon me to state, that I have no sympathy with those individuals who would foster and encourage any Theory by which they hope to damage Christianity; and I wonder that any person can be found so hardy as to endeavour, covertly, to undermine the rock upon which the hopes of so many have been founded; to put out the light which has, for ages, served to guide the pious, humble christian in his journey through life; to take away and to destroy that feeling, with regard to a future world of happiness, which has been the Hope of the pious in all ages, which Hope they have cherished in their hearts, in every difficulty and in every distress, and which has been to them, on the stormy ocean of the World, as an “anchor to the soul.”

Mine is a far different object, I desire to shew the unlettered Christian that he has not believed in a “cunningly devised fable,” but, that his Faith rests upon a sure basis, and that he may take his Bible in his hand and laugh to scorn the insidious attempts of the learned infidelity and skepticism of the world. [\[19\]](#)

I believe much harm is done to Religion by the well intentioned but idle fears of Christians, upon the introduction of any new Science; their Faith and not their Fears should be called into exercise. I believe the Bible to be given by the Author of Nature, and that he never gave any information to his Creatures which could ever be adverse or inconsistent to any subsequent development that Nature could afford.

I dare not admit the idea that the testimony of Scripture depends for its acceptance upon the sufferance of Modern Science. I take vastly higher ground, and believe that the Christian man may approach with confidence to the investigation of any phenomena in Nature, in the assurance that, so far as it is true, it will not be found inconsonant with what he rightly considers to be the Word of God.

Much of the difficulty in the minds of well meaning Christians, in all ages, in relation to discoveries in Nature has doubtless arisen from the peculiar

and poetical language in which the Scriptural Record is expressed. In the fact that it was just so expressed as to be understood by the particular people to whom it was originally given. That it does not profess to be a guide to man, in his researches through the arcanum of Nature; but, incidentally alludes to natural phenomena only so far as the people of that age were acquainted with such subjects, and in order only, to give a proper impression as to the greatness and goodness of God.

Had these propositions been more generally observed, I venture to suggest, that Religion and Science would not have been found so often in circumstances of apparent collision.

The best men have, in all ages, been too much disposed to put their Faith in abeyance, while their Fears have been allowed to proclaim a danger to Religion; and, alas! too often to persecute those who have made the most useful and important discoveries.

It is well known that the Copernican System was declared by the Pope, on its introduction, in a bull, specially issued for the purpose, to be “false in fact and heretical in religion,” and its author was doomed to imprisonment for his discovery! and we find that while Plato, Cicero, Aristotle, Strabo, and other heathen authors allowed the rotundity of the earth, that Lactantius, *one of the Christian Fathers*, influenced by the well meaning, but ill employed fear I have described, contended for the old opinion. He asks, “Is any one so foolish, as to believe that there are men whose feet are higher than their heads; trees growing downwards; rain, snow, and hail, falling upwards?”

Lactantius feared that his Religion and the new theory could not exist together. We have become assured of the truth of the theory, and who *now* fears for the Scriptures on account of the globular form of the Earth?

Some few years since Geology was introduced as a science, the Christian World became alarmed; the pens of divines were busily employed to write down the supposed delusion; the patient Investigators of the structure of the Earth continued their labor, and we now find that, as the science makes way the fear subsides, and Geology, in the present day, numbers among its supporters and defenders some of the brightest ornaments of the Christian Church.

It may not be familiar to my readers, that even Navigation, by the discovery and pursuit of which mankind in our day are always passing in large numbers upon the Ocean, which we term in modern language, the “Highway of Nations;” which is quite indispensable to the intercourse and commerce of the world; which conduces so much, and in so many ways, to human happiness: by the aid of which the providential bounties of the Torrid are conveyed to the Inhabitants of the Frigid Zone: and even the Polar Seas themselves are laid under contribution and made to minister to the comfort and enjoyment of the Inhabitants of more temperate climes.

It may, possibly, astonish some of my Christian Readers to be informed that Navigation without which the precept of the Scripture “Preach the Gospel to every Creature” could never be complied with; and the abandonment of which would involve the annihilation to a large extent of Benevolent and Missionary enterprise, it may astonish them to know that even Navigation has been denounced as impiety, but such is the fact! we find the accomplished Horace writing thus:—“In vain did a God *purposely*, cut off the lands from the Ocean, *forbidding all intercourse*, if, nevertheless, the impious Barks bound contemptuously over the seas not to be touched.” [\[23\]](#)

The difficulty appears to be, to get mankind to understand that the wonders of Nature are no less wonderful because we are permitted, successfully, to explore the various laws and modes of her operations.

Are we at all less indebted to Providence for the “showers that water the Earth” because we now know that the moisture is exhaled from our planet before it is dropped from the cloud?

Is the genial influence of the Sun of less importance because we are, now, aware that the Earth revolves around it, instead of (as our fathers supposed) the Sun revolving round the Earth?

Is the planetary system at all less interesting to us because the extension of telescopic vision has shewn us new worlds beyond the ken and credence of our forefathers? Surely not! But, should we not rather be the more impressed with the greatness and the condescension of God, just in proportion as we are permitted to advance, cautiously and tremblingly indeed, in the contemplation and understanding of his work?

Man is a complex being, “fearfully and wonderfully made,” having, besides his bodily powers, some principle which keeps the machine in motion, and some unseen, yet evident power of volition by the aid, and at the command of which his several actions are performed.

In what part of the system that power is deposited was long held to be doubtful; but, it is now generally allowed that the seat of that power is the brain, and several industrious and learned men have, of late years, been carefully engaged in endeavours to understand the anatomy of that part of the human frame.

The result of their inquiries, as might be supposed, has been variously stated by different individuals; among other ideas, some have supposed they were able to trace, with tolerable correctness, the various parts of the brain which impelled the individual to various actions; and they endeavoured to assign to each class of human sentiment and faculty its peculiar portion which they have designated Organs.

They have, in pursuance of their Theory, mapped out the human scull into compartments, to each of which they have assigned a particular faculty or sentiment, and they profess to tell, with some degree of accuracy, the individual character by the peculiar formation of the head.

The reader will bear in mind, that I profess not even to conjecture, in this argument, the truth or fallacy of the system, that Phrenologists have laid down; I am only endeavouring to disabuse the mind of the serious and pious man of any fears for his Religion, on the possibility that Phrenology should be found true.

No man can have observed human Nature, with even common or ordinary care, but must have been impressed with the fact, that there is as much diversity in the development of mind as is apparent, to common observation, in the structure of the body. One man is mentally competent to, and would excel in one department of Art or Science or of ordinary Business in which another would certainly fail, while the first would be equally deficient in another department, not by any means requiring more than common sagacity to insure success. This is a matter of such common observation that I need not enlarge upon it.

My position then is this; That allowing, as we must, the great diversity of mental, human character, it will do no damage to Religion if Phrenology should succeed in exhibiting that, minutely and in detail, which we already admit in the mass.

The Milky Way is not the less brilliant because to the Telescopic eye it exhibits a cluster of beauties, while to common observation, these minutiae are concealed.

It can release no man from the common obligations which all owe to God, who judgeth not according to the sight of the eye: but, who “judgeth righteous judgment.”

If Phrenology be true, it may indeed teach us lessons of forbearance and charity to human frailty; but can in no respect affect our duty and obligations toward God.

In conclusion I observe, that I am, individually, quite unconcerned as to whether the Sciences, as they are termed, which we have been considering, should prove, on farther and fuller examination, to be true or to be false.

Possibly their promoters, in the sanguine pursuit of a new Theory, may have asked of the Public a too unsuspecting confidence, and may have pushed their Theory beyond its legitimate position. This I leave to them and to the Public to determine.

I sat down to write this address in order to defend myself, and as far as I may have expressed their sentiments, my friends also, from the unsparing censure which has been passed upon us *for our efforts to ascertain for ourselves the truth or falsehood of these phenomena.*

How far I have succeeded the Reader and the Public must determine. I have designed offence to no one, and I hope that no one has been offended. As to the remarks I felt compelled to make upon the Gentlemen who have published upon the subject, I think the reader will allow that I was justified, by the pamphlets themselves, for the course I have pursued.

I now take leave of the subject, careless as to the success of Mesmerism or Phrenology; and only solicitous that every facility should be afforded for the complete exhibition and testing of so important phenomena.

FOOTNOTES.

[19] Dr. Chalmers says—“Perhaps the most singular attempt to graft Infidelity on any thing called a Science, is by those who associate their denial of the Christian Revelation with the doctrines of Phrenology, as if there were any earthly connection between the form of the human skull, or its effects upon the human character upon the one hand, and the truth or falsehood of our Religion on the other; for, granting them all their Organs, it no more tells either to the confirmation or disparagement of our historical evidence for the visitation of this earth by a messenger from Heaven, than it tells on the historical evidence for the invasion of Britain by Julius Cæsar. And we venture to affirm of all the other Sciences, that no discovery has been made in any of them, which is not in every way as inconsequential to the point at issue; and that the truths of all Philosophy put together as little interfere with the truths of the Gospel as the discoveries of the Astronomer interfere with the discoveries of the Anatomist.”

Preface to Modern Philosophy.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
