PREFACE.

This book, which is intended as a guide to students of Romance Philology, represents the result of desultory labors extending through a period of twenty years. My first introduction to the scientific pursuit of Provençal linguistics was a course given by Paul Meyer at the École des Chartes in the winter of 1884-85. Since then I have been collecting material both from my own examination of texts and from the works of those philologists who have dealt with the subject. Besides the large Grammars of the Romance Languages by Diez and by Meyer-Lübke, I have utilized H. Suchier's *Die französische und provenzalische Sprache* (in Gröber's *Grundriss der romanischen Philologie*, I, 561), the *Introduzione grammaticale* in V. Crescini's *Manualetto provenzale*, the *Abriss der Formenlehre* in C. Appel's *Provenzalische Chrestomathie*, and many special treatises to which reference will be made in the appropriate places. Conscious of many imperfections in my work, I shall be grateful for corrections.

I have confined myself to the old literary language, believing that to be of the greatest importance to a student of Romance Philology or of Comparative Literature, and fearing lest an enumeration of modern forms, in addition to the ancient, might prove too bewildering. I should add that neither my own knowledge nor the material at my disposal is adequate to a satisfactory presentation of the living idioms of southern France. These dialects have, however, been investigated for the light they throw on the geographical distribution of phonetic variations; my chief source of information has been F. Mistral's monumental *Dictionnaire provençal-français*. Catalan and Franco-Provençal have been considered only incidentally. I have not dealt with word-formation, because one of my students is preparing a treatise on that subject.

Readers desiring a brief description of Provençal literature are referred to H. Suchier and A. Birch-Hirschfeld, *Geschichte der französischen Literatur*, pp. 56-96; A. Stimming, in Gröber's *Grundriss der romanischen Philologie*, II, ii, pp. 1-69; and A. Restori, *Letteratura provenzale*. For a more extended account of the poets they

should consult *Die Poesie der Troubadours* and the *Leben und Werke der Troubadours* by F. Diez; and *The Troubadours at Home* by J. H. Smith. The poetic ideals are discussed by G. Paris in *Romania*, XII, pp. 516-34; and with great fulness by L. F. Mott in *The System of Courtly Love*. The beginnings of the literature are treated by A. Jeanroy in his *Origines de la poésie lyrique en France au moyen âge*, reviewed by G. Paris in a series of important articles in the *Journal des Savants* (November and December, 1891, and March and July, 1892) reprinted separately in 1892 under the same title as Jeanroy's book. Contributions by A. Restori to several volumes of the *Rivista musicale italiana* deal with Provençal music; some tunes in modern notation are to be found in J. H. Smith's *Troubadours at Home*, and in the *Archiv für das Studium der neueren Sprachen*, CX (New Series X), 110 (E. Bohn).^[1] Aside from the editions of individual poets, the best collections of verses are those of C. Appel, *Provenzalische Chrestomathie*; V. Crescini, *Manualetto provenzale*; and K. Bartsch, *Chrestomathie provençale*. Earlier and larger anthologies are M. Raynouard's *Choix des poésies originales des troubadours*, and C. A. F. Mahn's *Werke der Troubadours* and *Gedichte der Troubadours*. The only dictionary of importance for the old language is the *Lexique roman* (six volumes) of M. Raynouard, augmented by the *Supplement-Wörterbuch* of E. Levy (now appearing in instalments). The poetic language of the present day can be studied to advantage in E. Koschwitz's *Grammaire historique de la langue des Félibres*.

C. H. GRANDGENT.

CAMBRIDGE, MASS., NOVEMBER, 1904.

ABBREVIATIONS AND TECHNICAL TERMS.

Abl.: ablative.

Acc.: accusative.

Cl.L.: Classic Latin.

Cond.: conditional.

Cons.: consonant.

Einf.: W. Meyer-Lübke, *Einführung in das Studium der romanischen Sprachwissenschaft*, 1901.

F.: feminine.

Fr.: French.

Free (of vowels): not in position.

Fut.: future.

Gram.: W. Meyer-Lübke, *Grammaire des langues romanes*, 3 vols., 1890-1900.

Grundriss: G. Gröber, *Grundriss der romanischen Philologie*, 2 vols., 1888-1902.

Imp.: imperfect.

Imper.: imperative.

Intertonic (of vowels): following the secondary and preceding the primary accent.

Intervocalic (of consonants): standing between two vowels.

It.: Italian.

Körting: G. Körting, *Lateinisch-romanisches Wörterbuch*, 2d ed., 1901.

Lat.: Latin.

Levy: E. Levy, *Provenzalisches Supplement-Wörterbuch*, 1894-.

Ltblt.: *Literaturblatt für germanische und romanische Philologie*, monthly, Leipzig.

M.: masculine.

Nom.: nominative.

Obj.: objective (case).

Part.: participle.

Perf.: perfect.

Pers.: person.

Phon.: P. Marchot, *Petite phonétique du français pré littéraire*, 1901.

Pl.: plural.

Pr.: Provençal.

Pres.: present.

Pret.: preterit.

Raynouard: M. Raynouard, *Lexique roman*, 6 vols., 1836-44.

Rom.: *Romania*, quarterly, Paris.

Sg.: singular.

V.L.: Vulgar Latin.

Voc.: H. Schuchardt, *Vocalismus des Vulgärlateins*, 3 vols., 1866-68.

Voiced (of consonants): sonant, pronounced with vibration of the glottis.

Voiceless (of consonants): surd, pronounced without glottal vibration.

Vow.: vowel.

Zs.: *Zeitschrift für romanische Philologie*, 4 to 6 nos. a year, Halle.

SIGNS AND PHONETIC SYMBOLS.

N. B.—Phonetic characters not entered in this list are to be pronounced as in Italian. Whenever it is essential to distinguish spelling from pronunciation, *italic* type is used for the former, Roman for the latter.

· (under a vowel): close quality.

, (under a vowel): open quality.

— (over a vowel): long quantity.

˘ (over a vowel): short quantity.

ˆ (under a letter): semivowel, not syllabic.

˙ (over a letter): stress.

˚ (after a consonant): palatal pronunciation.

* (before a word): conjectural, not found.

(between words or letters): derivation, the *source* standing at the *open* end.

+: followed by.

ɑ̃: French *â* in *pâte*.

ɑ̃: French *a* in *patte*.

β: bilabial *v*, as in Spanish.

c: see *k*.

c': palatal *k*, as in English *key*.

ð: English *th* in *this*.

ɛ̃: French *é* in *thé*.

ɛ̃: French *ê* in *fête*.

g: English *g* in *go*.

g': palatal *g*, as in English *geese*.

h: English *h* in *hat*.

ï: French *i* in *si*.

ĩ: English *ĩ* in *pit*.

k: English *k* in *maker*.

k': see c'.

l': palatal *l*, as in Italian *figlio*.

n': palatal *n*, as in Italian *ogni*.

ŋ: English *ng* in *sing*.

o: German *ō*, as in *sohn*.

q: German *ö*, as in *sonne*.

r': palatal *r*.

š: English *sh* in *ship*.

þ: English *th* in *thin*.

u: German *ū*, as in *gut*.

u: German *ů*, as in *butter*.

ü: French *u* in *pur*.

w: English *w* in *woo*.

χ: German *ch* in *ach*.

y: English *y* in *ye*.

z: English *z* in *crazy*.

ž: French *j* in *jour*.

AN OUTLINE OF THE PHONOLOGY AND MORPHOLOGY OF OLD PROVENÇAL.

I. INTRODUCTION.

1. The language here studied is, in the main, that used by the poets of Southern France during the 12th and 13th centuries. The few works that we have earlier than the 12th century must, of course, be utilized for such information as they afford concerning the process of linguistic change; and lacking words or forms must occasionally be sought in writings later than the 13th. Prose literature, moreover, should not be neglected, as it greatly enlarges our vocabulary and throws much light on local divergences. The modern dialects need be cited only to determine the geographical distribution of variations.

2. The extent of the Provençal territory is sufficiently indicated by the map on p. [viii](#). The upper black line separates Provençal on the northwest and north from French, on the northeast from Franco-Provençal; on the east are the Gallo-Italic dialects. The lower black line divides Provençal on the southwest from Basque, on the south from Spanish, on the southeast from Catalan. The boundary line between French and Provençal must be determined somewhat arbitrarily, as there is no distinct natural division; the several linguistic characteristics of each idiom do not end at the same point, and thus one language gradually shades into the other. The line shown on the map is based on the development of free accented Latin *a*, which remains *a* in Provençal, but is changed to *e* in French. The limits of other phonetic phenomena may be found in Suchier's maps at the back of Vol. I of Gröber's *Grundriss*. There may be seen also a large map showing the place of Provençal among the Romance languages. Consult, furthermore, P. Meyer in *Romania*, XXIV, 529.

3. The Spanish and Gallo-Italic frontiers are more clearly defined, and Basque is entirely distinct. Franco-Provençal and Catalan, on the other hand, are closely related to Provençal and not always easy to divide from it. Catalan, in fact, is often classed as a Provençal dialect; but it is sufficiently different to be studied separately.^[2] Franco-Provençal, rated by some philologists as an independent language, has certain characteristics of Provençal and certain features of French, but more of the latter; in some respects it is at variance with both. The Gascon, or southwest, dialects of

Provençal differ in many ways from any of the others and present not a few similarities to Spanish^[3]; they will, however, be included in our study.

4. The Provençal domain embraces, then, the following old provinces: Provence, Languedoc, Foix, part of Béarn, Gascony, Guyenne, Limousin, most of Marche, Auvergne, the southwestern half of Lyonnais and the southern half of Dauphiné. The native speech in this region varies considerably from place to place, and the local dialects are, for convenience, roughly grouped under the names of the provinces; it should be remembered, however, that the political and the linguistic boundaries rarely coincide. For some of the principal dialect differences, see §§ [8](#) and [10-13](#).

5. The language of the poets was sometimes called *lemosí*; and, in fact, the foundation of their literary idiom is the speech of the province of Limousin and the adjacent territory on the north, west, and southwest.^[4] The supremacy of this dialect group is apparently due to the fact that it was generally used for composition earlier than any of the others: popular song, in all probability, had its home in the borderland of Marche^[5]; religious literature in the vulgar tongue developed in the monasteries of this region; the artistic lyric was cultivated, we know, at the court of Ventadour, and it must have found favor at others. Furthermore, many of the leading troubadours belonged by birth or residence to the Limousin district.

6. The troubadours' verses, as we have them, seldom represent any one dialect in its purity. The poet himself was doubtless influenced both by literary tradition and by his particular local usage, as well as by considerations of rhyme and metre. Moreover, his work, before reaching us, passed through the hands of various intermediaries, who left upon it traces of their own pronunciation. It should be said, also, that the Limousin was not a single dialect, but a group of more or less divergent types of speech. For these reasons we must not expect to find in Provençal a uniform linguistic standard.

7. Neither was there a generally accepted system of orthography. When the vulgar tongue was first written, the Roman letters were used with approximately the same values that they had in Latin, as it was then pronounced. As the Provençal sounds changed, there was a conflict between the spellings first established and new notations based on contemporary speech. Furthermore, many Provençal vowels and consonants

had no equivalents in Latin; for these we find a great variety of representations. The signs are very often ambiguous: for instance, *c* before *e* or *i* (as in *cen*, *cinc*) generally stands in the first texts for *ts*, in the more recent ones for *s*, the pronunciation having changed; *z* between vowels in early times usually means *dz* (*plazer*), but later *z* (*roza*); *i* between vowels (*maiór*) indicates either *y* or *dž* (English *j*), according to the dialect; a *g* may signify “hard” *g* (*gerra*), *dž* (“soft” *g*: *ges*), or *tš* (English *ch*: *mieg*). It is probable that for a couple of centuries diphthongs were oftenest written as simple vowels.

8. Some features of the mediæval pronunciation are still obscure. The close *o* was transformed, either during or soon after the literary epoch, into *u* (the sound of French *ou*); hence, when we meet in a late text such a word as *flor*, we cannot be certain whether it is to be sounded *flor* or *flur*. We do not know at what time Latin *ū* in southern France took the sound *ü* (French *u*): some suppose that it was during or shortly before the literary period; if this be true, the letter *u* (as in *tu*, *mur*) may represent in some texts *u*, in others *ü*. In diphthongs and triphthongs whose first element is written *u* (*cu**er*, *fu**olha*, *nueu*, *buou*), this letter came to be pronounced in most of the dialects like French *u* in *huit*, while in others it retained the sound of French *ou* in *oui*; we cannot tell exactly when or where, in ancient times, this development occurred. In the diphthongs *ue*, *uo* (*luec*, *fuoc*), opinions disagree as to which vowel originally bore the stress; subsequent changes seem to indicate that in the 12th and 13th centuries the practice varied in the different dialects. Old Provençal must have had in some words a peculiar type of *r*, which was sufficiently palatal in its articulation to call for an *i*-glide before it (*esclairar*); we do not know precisely how it was formed; in most regions it probably was assimilated to the more usual *r* as early as the 12th century. The *š* and *ž* (palatal *s* and *z*) apparently ranged, in the several dialects, between the sounds of French *ch* and *j* on the one hand, and those of German *ch* (in *ich*) and *j* (in *ja*) on the other; the former types were largely assimilated, doubtless by the 13th century, to *s* and *z* (*pois*, *maisó*), the latter were not (*poih*, *maió*).

9. The following table comprises the Old Provençal sounds with their usual spellings, the latter being arranged, as nearly as may be, in the order of their frequency. Diphthongs and triphthongs are included in the vowel list, compound

consonants in the consonant table. For an explanation of the phonetic symbols, see p. [vii](#). The variant pronunciations are discussed in § [8](#).

VOWELS.

SOUND.	SPELLINGS.	EXAMPLES.
ǎ	<i>a</i>	<i>pan</i>

ž	s, z, i	<i>raso, poizo, maio</i>

10. The Gascon group presents certain striking divergences from the other dialects: (1) it shows a b corresponding to Provençal v, as in *be* = *ve* *věnit*, *abetz* = *avetz* *habētis*; (2) it substitutes r for l between vowels, as in *bera* = *bela* *bělla*; (3) it changes initial f to h, as in *he* = *fe* *řidem*. Other Gascon peculiarities are less ancient, less general, or less important.

11. Some distinctions may be pointed out between the speech of the north and that of the south:—

(1) Latin ca and ga, either at the beginning of a word or after a consonant, became respectively tša and dža in the northern dialects^[12], and remained unchanged in the southern: *canto* *chan can*, *lōnga lonia longa*.

(2) Latin ct and gd became it and id in most of the north and in the southwest^[12], tš and dž in most of the south and in the northwest^[13]: *factum* *fait fach*, *frig(i)da* *freida freia*. Nct became int, nt, n', ntš in different regions: *sanctum* *saint sant sanh sanch*. Cs (Latin x) had various local developments—is, itš, tš—somewhat similar to those of ct: *exīre* *eissir eichir ichir*.

(3) Latin d between vowels disappeared in some spots in the north and northeast^[12], and became z nearly everywhere else: *audīre* *auir auzir*.

(4) Latin ll became l' in some parts of the south^[13], and usually l in other regions: *bělla* *belha bela*.

(5) Provençal final ns remains in the southeast and east, and is elsewhere generally reduced to s: *bōnus* *bons bos*. Provençal final n also falls in a large region, but its history is more intricate; the poets use indifferently forms with and without n: *běne* *ben be*.

12. Several Latin consonants, when combined with a following ɛ or i, give results that are widely different in various localities, but the geographical distribution of the respective forms is complicated and not always clear: *pōdium* *puech poi*; *basiare* *baisar basar baiiar baiar*; *bassiare* *baissar baichar bachar*; *potiōnem* *poizon pozon poio*. The same thing may be said of intervocalic y (Latin j): *major* *mager maier*. Also of intervocalic c, sc, g, ŋg, followed by e or i: *placēre* *plazer plaizer plager*, *nascere* *naisser nasser naicher nacher*, *lēgem* *lei leg*, *ūngere* *onher onger*.

13. In the development of unstressed vowels there are very numerous local variations, which will be discussed later. Even among accented vowels there are some

divergences:—

(1) Provençal a, e, o before nasals become ă, ẹ, ọ in some dialects, especially in those belonging to or bordering on the Limousin group: *canem* cạn cạn, *věnit* vẹn vẹn, *bõnum* bọn bọn. The poets nearly always use the forms with close vowels.

(2) The breaking of ẹ, ọ, under certain conditions, into diphthongs is not common to the whole territory, and the resulting forms show local differences: *měum* mẹu miẹu, *fõcum* fọc fuọc fuẹc füc. Breaking is least common in the southwest.

II. PHONOLOGY.

14. Inasmuch as Provençal, like the other Romance languages, grew out of the Latin commonly spoken under the Roman Empire, we must take this latter language as our starting-point. The transformation was so gradual and continuous that we cannot assign any date at which speech ceases to be Latin and begins to be Provençal; since, however, the various Latin dialects—destined to become later the various Romance languages—began to diverge widely in the 6th and 7th centuries, we may, for the sake of convenience, say that the Latin period ends at about this time. Before this, certain changes (which affected all the Romance tongues) had occurred in the popular language, differentiating it considerably from the classic Latin of the Augustan writers. Although the most important of these alterations have to do with inflections rather than with pronunciation, the sound-changes in Vulgar Latin are by no means insignificant.

15. It is essential at the outset to distinguish “popular” from “learned” words. The former, having always been a part of the spoken vocabulary, have been subject to the operation of all the phonetic laws that have governed the development of the language. The latter class, consisting of words borrowed by clerks, at various periods, from Latin books and from the Latin of the Church, is naturally exempt from sound-changes that occurred in the vulgar tongue before the time of their adoption. The form of learned words depends, in the first place, on the clerical pronunciation of Latin at the date of their borrowing; then, if they came into general use, their form was subject to the influence of any phonetic laws that were subsequently in force. The fate of borrowed terms differs, therefore, according to the time of their introduction and the degree of popularity which they afterwards attained.

1. ACCENT.

16. The place of the *primary* accent, which in Classic Latin was determined by quantity, remained unchanged in Vulgar Latin even after quantitative distinctions were

lost. A short vowel before a mute followed by a liquid may, in Classic Latin, be stressed or unstressed; in Vulgar Latin it is usually stressed: *cathēdra*, *tenēbræ*.^[14]

There are some exceptions to the rule of the persistence of the accent in Vulgar Latin:—

1. An accented e or i immediately followed by the vowel of the penult transfers the stress to this latter vowel, and is itself changed to y: *filíōlus* *filyólus*, *mulíĕrem* *mulyére*. This shift is perhaps due to a tendency to stress the more sonorous of two contiguous vowels.

2. An accented u immediately followed by the vowel of the penult transfers the stress to the preceding syllable, and is itself changed to w: *habúĕrunt* *ábwerunt*, *tenúĕram* *ténwera*. This shift cannot be explained on the same principle as the foregoing one; it is perhaps due in every case to analogy—*hábuĭt*, *ténui*, for instance, being responsible for the change in *habúerunt*, *tenúeram*.

3. Verbs compounded with a prefix, if their constituent parts were fully recognized, were usually replaced in Vulgar Latin by a formation in which the vowel and the accent of the simple verb were preserved: *défcit* *disfácit*, *réddĭdi* *reddédi*, *renĕgo* *renégo*, *réquĭrit* *requærit*. In *recĭpit* *recípĭt* the accent but not the vowel was restored, speakers having ceased to associate this verb with *capiō*. In *cóllĭgo*, *érĭgo*, *éxĕo*, *ínflo* the composite nature of the word was apparently not recognized.

4. The adverbs *illāc*, *illĭc* accented their last syllable, by the analogy of *hāc*, *hĭc*.

17. In Provençal the primary accent falls on the same syllable as in Vulgar Latin: *bonitātem* V. L. *bonitáte* Pr. *bontát*, *compŭtum* V. L. *cómpu**tu* Pr. *cónte*; *cathēdra* V. L. *catédra* Pr. *cadéira*; *filiōlus* V. L. *filyólus* Pr. *filhóls*, *tenuĕram* V. L. *ténwera* Pr. *téngra*, *requĭrit* V. L. *requærit* Pr. *requér*, *illac* V. L. *illác* Pr. *lai*.

1. Some learned words have an irregular accentuation, apparently due to a mispronunciation of the Latin: *cándĭdum* *quandí*, *grammátĭca* *gramatíca*, *láchrŷmo* *lagrím*, *spírĭtum* *esprít* (perhaps from the formula *spirítui sancto*). Others were adopted with the correct stress, but shifted it later: *fábrĭca* *fábrega* *fabréga* (and *fárga*), *fémĭna* *fémena* *feména* (and *fémna*), *láchrŷma* *lágrema* *lagréma*, *sémĭnat* *sémena* *seména* (and *sémna*), *vírgĭnem* *vérgena* *vergína* (and *véрге*).

2. *Dimércres* *dĭe Mercŭrĭ* (perhaps through **dĭe Mércōris*) has evidently been influenced by *divénres* *dĭe Vĕnĕris*.

3. Some irregularities due to inflection will be discussed under Morphology.

18. The *secondary* accent, in Vulgar Latin, seems not to have followed the Classic Latin quantitative rule, but to have fallen regularly on the second syllable from the primary stress: *cógĭtó*, *cupĭdĭtātem*. If this secondary accent *followed* the tonic, its vowel probably developed as an unstressed post-tonic vowel; if it *preceded*, its vowel

was apparently treated as a stressed vowel. This treatment was doubtless continued in Provençal until the intertonic vowel dropped out: *cógĭtó cógĭtánt* *cug cúian* (cf. *cánton cántant* *can cántan*), **comĭnĭtĭāre comén'tiāre coménzár comensár*. As may be seen from this last example, after the fall of the intertonic vowel, the secondary stress, being brought next to the primary, disappeared, and its vowel was henceforth unaccented. Cf. § 45, 1.

19. Short, unemphatic words had no accent in Vulgar Latin, and were attached as particles to the beginning or the end of another word: *te vídet, áma me*. Such words, if they were not monosyllabic, tended to become so; a disyllabic proclitic beginning with a vowel regularly, in Vulgar Latin, lost its first syllable: *illum vídeo* V. L. *lu véyo* Pr. *lo vei*. A word which was used sometimes independently, sometimes as a particle, naturally developed double forms.

2. VOWELS.

QUANTITY.

20. Latin had the following vowels, which might be long or short: a, e, i, o, u. The diphthongs, æ, œ, au, eu, ui, were always long: æ and œ, however, were simplified into monophthongs, mainly in the Republican epoch, æ being sounded ē, œ probably ē; au retained (save in some popular dialects) its old pronunciation; eu did not occur in any word that survived; ui, in *cui*, *illui*, in Vulgar Latin, was accented *úi* (as in *fui*). The simple vowels, except a, were, doubtless from early times, slightly different in quality according to their quantity, the long vowels being sounded close, the short open: ē, ĭ, ō, ū; ĕ, ĭ, ŏ, ŭ.

21. Between the 1st and the 7th century of our era, the Classic Latin quantity died out: it had apparently disappeared from unstressed vowels as early as the 4th century, from stressed by the 6th. It left its traces, however, as we have seen, upon accentuation (§ 16), and also upon vowel quality, the originally long and short remaining differentiated in sound, if they were accented. Of the unaccented vowels, only i shows sure signs of such a differentiation, and even for i the distinction is evident only in a final syllable: *vēnī vĕnĭt* *venĭ venĭt*.

ACCENTED VOWELS.

22. The vowels of Vulgar Latin are a, e, ē, i, ī, o, ō, u, ū, with the diphthongs áu and úi; the old æ and œ had become identical in sound with ē and ē. As early as the 3d century of our era, ī was changed, in nearly all the Empire, to ē, and thus became identical with the vowel coming from original ē. A little later, perhaps, ū, in the greater part of the Empire, became ō, thus coinciding with the vowel that was originally ō. Ypsilon, in words taken from the Greek, was identified, in early borrowings, with Latin u; in later ones, with Latin i: βύρσα Pr. *borsa*, γῦρος Pr. *girs*. Omicron, which apparently had the close sound in Greek, generally (but not always) retained it in recently borrowed words in Vulgar Latin: τόρνος tōrnus (cf. Pr. tōrn), but κόλαφος cōlāphus = cōlapus or cōlapus (cf. Pr. cōlp).

The development of the Vulgar Latin vowels in Provençal will now be examined in detail:—

a

23. Cl. L. ā, ǣ V. L. a Pr. a: ārbōrem arbore, grātum grāt, mǣre > mār.

1. The ending *-arius* shows an irregular development in French and Provençal, the Provençal forms being mainly such as would come from *-ērius*; as in *parlier*, *parleira*. In the earliest stage we find apparently *-er'* and *-er'a*; then *-er* and *-er'a*; next *-er*, *-ier* and *-eira*, *-ieira*; finally, with a reciprocal influence of the two genders, *-er*, *-ier*, *-eir*, and *-era*, *-iera*, *-eira*, *-ieira*: *caballarium* *c(h)avaler -ier*, *-eir*, **man(u)aria* *manera -iera -eira -ieira*. The peculiar treatment of this suffix has not been satisfactorily explained. See E. R. Zimmermann, *Die Geschichte des lateinischen Suffixes -arius in den romanischen Sprachen*, 1895; E. Staaff, *Le suffixe -arius dans les langues romanes*, Upsala, 1896, reviewed by Marchot in *Zs.*, XXI, 296, by Körting in *Zeitschrift für französische Sprache*, XXII, 55; Meyer-Lübke, *Gram.*, I, 222, § 237; Zimmermann in *Zs.*, XXVI, 591; Thomas in *Rom.*, XXXI, 481 and in *Bausteine zur romanischen Philologie*, 641. The likeliest theory is that of Thomas: that *-arius* was associated with the Germanic ending *-ari* and participated in the *umlaut* which affected the latter; cf. *Phon.*, pp. 34-36.

2. In Gascony and Languedoc *ei* is used for *ai* *habeo*. The *ei* perhaps developed first as a future ending (*amar -ei*) by analogy of the preterit ending *-ei* (*amei*): see Morphology, §§ 152, 1, 162, (4), 175, (4), where this latter ending is discussed also. For a different explanation, see Meyer-Lübke, *Gram.*, I, 222, § 237.

3. A few apparent irregularities are to be traced to the vocabulary of Vulgar Latin. For instance, Pr. *sereisa* represents, not Cl. L. *cērāsus*, but V. L. *cērēsēa*: see Meyer-Lübke, *Einf.*, § 103. *Uebre* is from **ōpērit*, or *apērit* modified by **cōpērit* = *cōperit*. *Voig* is from **vōcītum* = *vacuum*: *Einf.*, § 114.

4. Such forms as *fontaina* = *fontana* *fontāna*, etc., and *tres* = *tras* *trans*, etc., are French or belong to the borderland between French and Provençal.

24. In some dialects, particularly in Rouergue, Limousin, Auvergne, and Dauphiné, a became ą before a nasal, and at the end of a monosyllable or an oxytone: *canem* čan, *grandem* grąnt, *cadit* cą, *stat* esta.

1. The conditions differ somewhat in the various dialects, according as the nasal consonant falls or remains, and is followed by another consonant or not. In Limousin the sound is ą before an n that cannot fall: see § 11, (5). In Rouergue and in Dauphiné, ą appears before all nasals. The poets generally follow the Limousin usage. See F. Pfützner, *Ueber die Aussprache des provenzalischen A*, Halle, 1884.

ę

25. Cl. L. ē, ĭ, æ V. L. ę Pr. ę: *habēre* aver, *mē* mę, *ensem* męs, *plēnum* plęn, *rēgem* ręi, *vēndere* vęndre; *inter* ęntre, *fīdem* fę, *malitia* maleza, *minus* męns, *mittēre* mętre, *siccum* sęc, *virīdem* vęrt, *pœna* pęna.

1. Some words have ę instead of ę:—

(a) The ending *-ētis* in the present indicative becomes *-ętz* through the analogy of *ętz* *ęstis*.

(b) *Camel* (also ę), *candela* (also ę), *cruzel*, *fizel* (also ę), *maissela* have ę through the analogy of the suffix *-el* *-ellus*. In *camel* the substitution probably goes back to Vulgar Latin.

(c) Many learned words, including proper names, have ę for ę: *decret*, *Elizabet*, *Moyses*, *pantera*, *requies*, *secret* (ę), *sencer*.

(d) *Eser* for *esper* *spēro*, *quet* for *quet* *qu(i)ētum* are perhaps bad rhymes. Bartolomeo Zorzi, a Venetian, rhymes *-es* with *-ęs*; in Catalan these two endings were not distinguished.

(e) Individual cases: *adeş*, ‘at once,’ probably from *ad id ipsum*, seems to have been affected by *preş* and *apreş* *ad pręssum*; *mostier* *monastērium* shows the influence of *ministērium*; *ner nię* (also *ner neęre*) *nęgrum* perhaps shows the influence of *enter entier* and the numerous adjectives in *-er -ier*; *neų nięu neų* *nivem* has been attracted by *breų greų*, *leų*; *senęstre* (cf. late Lat. *sinexter*) is evidently influenced by *deęstre*.

2. Many words have i instead of ę:—

(a) *Berbitz* = *vervēcem*, *camis* = *camisia*, come from alternative V. L. forms, *berbīcem*, **camīsia*. *Planissa* (also *-eza*), *sebissa*, etc., probably show *-īcia* for *-ītia*. For *dit* = *dīgītum* see § 65, Y, 1.

(b) In many learned words Latin ĭ is represented by i in Provençal: *albir*, *martire*, *edifici*, *iuzizi*, *servizi*, *vici*, etc.; *iusticia*, *leticia*, *tristicia*, etc. *Aurilha* (also ę) *aurīcula*, *cilh*, (also *cieilh*, *sobreselhs*) *cīlium*, *issilh* *exīlium*, *familha* *famīlia*, *maistre* (also *maęstre* *maięstre*) *magīstrum*, *meravilha* (also ę) *mirabīlia*, *perilh* *perīculum*, etc., are probably learned forms. *Máistre* and *mestre* are French.

(c) *Ciri* (*cere*) = *cēreum*, *iure* (cf. *ebriac*) = *ēbrium* (or **ēbrium*), *marquis* (e), *merci* (e), *país* (e) = **pagēnsem*, *plazir* (e), *pris* (e), etc., are French.^[15] For a discussion of *iure* and a different explanation of *ciri*, see P. Savj-Lopez, *Dell' "Umlaut" provenzale*, 1902, p. 4.

(d) *Ins* (also *entz*) *ĩntus*, *dins* (also *dens*) *de ĩntus*, *dintre* (cf. *en*, *entre*) *de ĩnter* have not been satisfactorily explained. Regular forms with e are found in Béarn, Gascony, Dauphiné, and the Alps.

(e) Individual cases: *tapit* τανήτιον shows the modern pronunciation of Greek η; *verin* = *venēnum* is an example of substitution of suffix.

3. *Arnei*, *fei*, *mei* = *me*, *palafrei*, *perquei*, *sei* = *se* are French or Poitevin forms; they are common in William of Poitiers. *Mercey*, *rey* = *re*, used by Marcabru, seem to be due either to an imitation of such forms as the preceding or to the analogy of *crei cre* *crēdo*. Cf. § 65, N, 3.

4. *Contránher* seems to be a fusion of *constrĩngere* and *contrahere*; *vendanha* *vindēmia* shows French influence.

26. An e in hiatus became i: *lĩgat* *lia*, *vĩa* *via*.

27. When there was in the next syllable a final ĩ, V. L. e was changed in Provençal to i: *ecc'ĩllĩ* *cilh*, *ecc'ĩstĩ* *cist*, *fēcĩ* *fis*, **prēsĩ* *pris*, **vēnuĩ* *vinc*, *vigĩntĩ* **vĩntĩ* *vint*.

1. In the nominative plural of masculine nouns and adjectives this change was regularly prevented by the analogy of the singular and the accusative plural: *mĩssĩ* *mes*, *plēnĩ* *plen*. We find, however, *cabil* *capĩllĩ*.

2. *Dec* for **dic* *dēbuĩ* seems to have been attracted by the *dec* *dēbuit* of the third person. *Venguest* for *venguist* **venuĩstĩ* is due both to the influence of the plural forms *venguem*, *venguetz* and to the analogy of the weak preterits, such as *cantest*, *vendest*.

e

28. Cl. L. ě, æ V. L. e Pr. e: *infērnũ* *enfern*, *fērrũ* *fēr*, *pēdem* *pē*; *cælũ* *cēl*, *quærit* *quer*.

1. Such forms as *glisia*, *lire*, *pire*, *pis*, *profit* are French. *Profich* may be a cross between *profieg* and *profit*, or it may be due to the analogy of *dich*.

2. *Cossint*, *mint*, *sint*, used by Arnaut Daniel, are perhaps faulty rhymes.

3. *Auzil* *avicēllĩ*, in the *Boeci*, may be due to the analogy of such plural forms as *cabil* *capĩllĩ*, *il ĩllĩ*, etc. *Briu*, sometimes used for *breu* *brēvem*, is evidently connected with *abrivar*, 'hasten,' the origin of which is uncertain. *Elig* shows the influence either of *eligir* (beside *elegir*) or of *dig*. *Ginh* = *genh* *ingēnium* evidently follows *ginhos* *ingeniōsus* and its derivatives. *Isme* (*esme*) is a post-verbal noun from **ismar* (cf. *azismamen*), a dialect form of *esmar* *æstimare*. *Quis* **quæsi*, *tinc* *tēnui* are due to the analogy of *pris* **prēsĩ*, *vinc* **vēnuĩ*.

4. Beside *nəula* *něbula*, we find *nebla*, *neble*, presumably from the same source, and also *nible*, *niól*, *nióla*, *niúl*, *niúla*, *nivól*. According to Nigra, *Archivio glottologico italiano*, XV, 494, *nūbes* *nūbīlus* **nībūlus* (and **nībūlus?*), whence might be derived **nīūlus* **niūlus*, which would account for *niól-a*, *niúl-a*, and perhaps for a **nívol* *nivól*. *Nible* might be regarded as a cross between *neble* and *niul*. Cf. § 38, 3.

5. In *əş* *əšt* the *ə* probably comes from such combinations as *mə's*, *qe's*, understood as *m'əs*, *qu'əs*. *Espēlh* *spēculum* shows the influence of *cossēlh*, *solēlh*. *Estēla* presupposes a Latin **stēla* or **stēlla* for *stēlla*: cf. the Fr. and It.

6. *Plais*, 'hedge' seems to be a cross between *plēxus* and *paxillus*, 'fence.' *Vianda* (*vivenda?*) is probably French.

7. *Volon* *volentem* shows the influence of the ending *-ūndus*.

8. *Greuga* *con-gregar* has been influenced by *greu* **grēvem* = *gravem* influenced by *lēvem*. Cf. *grey* *grēgem*.

29. Before a nasal, in most of the dialects of Limousin, Languedoc, and Gascony, *ə* became *ɛ*: *bēne* *bən*, *dicēntem* *dizən*, *těmpus* *təms*, *těnet* *tən*, *věniam* *vəha*, *věntum* *vənt*.

30. Early in the history of Provençal, before *u*, *i*, or one of the palatal consonants *l'*, *r'*, *s'*, *z'*, *y*, *tš*, *dž*, an *ə* broke into *iə*, except in a few dialects of the west and north: *děus* *diəus*, *měum* *miəu*; *amāvi* **amai* *aməi* *amiəi*,^[16] **fěria* *fiəira*, **ec(c)lěsia?* (Cf. Zs., XXV, 344) *gliəiza*, *lěctum* *liəit*, *pějus* *piəis*; *větūlum* *věclum* *viəlh*, *ministěrium* *mestiə*, **ec(c)lěsia?* *gliəza*, *mědia* *miəia*, *lěctum* *liəg*. There seems to be also, at least in some dialects, a tendency to break the *ə* before a *g* or a *k*: *lěgunt* *liəgon*; **sěquit* *səc* *siəc*, subjunctive *siəgas* (*səga*), but infinitive *səgre* **sěquere*.^[17]

The breaking was probably due to a premature lifting of the tongue under the influence of a following high vowel or a palatal (or velar) consonant.^[18] Before *u* it occurred everywhere except in the extreme west; before palatals the *ə* apparently remained intact both in the extreme west and in Quercy, Rouergue, Auvergne, and Dauphiné. At first, no doubt, the diphthong was less marked than it became in the 12th and 13th centuries. It is not indicated in our oldest text, the *Boeci* (*breu*, *deu*, *eu*, *mei*, *meler*, *vel*)^[19], and it frequently remains unexpressed even in the writings of the literary period.

It is to be noted that *ę* does not break before *u* nor before *i* *ǫ*: *bēllus* *bēls* *bęus*, *pętra* **pęǫra* *pęira*, *Pętrum* **Pęǫre* *Pęire*, *rętro* **ręǫre* *ręire*^[20]. The breaking must, therefore, have occurred before these developments of *l* and *ǫ*, both of which apparently antedate the *Boeci*: cf. *euz* = *els*, v. 139; *eu* = *el*, v. 155; *Teiric* **Teǫric* *Theodorīcum*, v. 44, etc. On the other hand, there is no diphthong before *ts*, *dz*, *s*, *z* coming from Latin *c'*, *cy*, *pty*, *tty*, *ty*: *dęcem* *dętz*, *pęttia* (or *pęcia*) *pęssa*, *nęptia* *nęssa*, **prętiat* *pręza*, *prętium* *prętz*^[21]. The breaking, therefore, took place after these consonants had ceased to be palatal. We may ascribe it with some confidence to the period between the seventh and tenth centuries.

1. A number of cases of *ię* before *r* are doubtless to be explained by analogy. *Hęri* *ęr*; *autre* + *er* *autręr*, which, through the influence of adjectives in *-ęr* *-ięr*, became *autrięr*: hence the form *ięr*. *Fęrio*, *męreo* *fięr*, *mięr*; hence, by analogy, the first person forms *profięr*, *quięr*, then the third person forms *fięr*, *mięr*, *profięr*, *quięr*, *sięrf* (but *sęrvon*, *sęrva*), and the subjunctives *ofięira*, *sofię(i)ra*.

2. *Ięsc* (= *ęxeo*), *ięskon*, *ięsca* receive their diphthong either from earlier forms with *s'* or from *ięis* *ęxit*.

i

31. Cl. L. *ī* V. L. *ī*: *amīcum* *amīc*, *fīnem* *fīn*, *trīstem* *trīst*.

1. *Fręg*, *fręit* are from V. L. **frīgđum* = *frīgđidum*, the *ī* being perhaps due to the analogy of *rīgđidum*.

32. In the 13th century or earlier the group *iu*, in most dialects, became *ieu*: *captīvum* *caitiu* *caitieu*, *ęstīvum* *estiu* *estieu*, *revīvęre* *reviure* *revieure*, *sī vās* *sius* *sieus*.

o

33. Cl. L. *ō*, *ū* V. L. *o* Pr. *o*, which developed into *u* probably during the literary period: *dolōrem* *dolęr*, *spōnsa* *espoza*, *flōrem* *flęr*; *būcca* *bęca*, *gūla* *gęla*.

1. An irregular *o*, which is found in some words, goes back to Vulgar Latin: *cębra* = *re-cęperat*, *cęsta* (also *o*) = *cōnstat*, *nęra* = *nūra*, *qu* = *ōvum*, *plęia* = *plūvia*, *redębla* = **redęplat*, *sębra* = *sęperat*, *suefre* = *sęffero*. V. L. **cęperat* may be regarded as a fusion of *cęperat* and **cęperit* (§ 40, 1; cf. *Rom.* XXXI, 9); **cęstat* is unexplained; **nęra* shows the influence of *sōror* and *sęcęra*; the *ō* of **ōvum* has been explained as due to differentiation from the following *v*; **plęia* is to be connected with the popular *plōvēre* (cf. Meyer-Lübke, *Einf.*, § 142); **sęperat* follows the analogy of **cęperat*; **sęffero*

evidently follows *offerō*. Redqbla (also q) is not accounted for. If trqba has anything to do with *tūrbat*, it was perhaps influenced by *prōbat* (cf. Zs., XXVIII, 50). Engqissa V. L. **angōstia* = *angŭstia*. See A. Thomas, *Nouveaux essais de philologie française*, 1904, 339.

2. Some words have ü: iūs (also iqs) *deōrsum* shows the influence of sūs *sūrsum*; lūr (usually lq̄r) *illōrum* (cf. *lur* in the dialects of Navarre and Aragon) comes through an **illūrūm* due to the analogy of *illūi* = *illi*; melhūra (q), peiūra (q) perhaps follow aūra **a(u)gūrat*; rancūra is a mixture of *rancōrem* and *cūra*; üis is from V. L. *ūstium* = *ōstium* (cf. Zs., XXV, 355); üpa *ŭpūpa* is due to onomatopœia.

3. The adverbs *ar*, *ara*, *er*, *era*, *eras*, meaning 'now,' are hardly to be connected with *hōra*. Meyer-Lübke takes *era*, etc., from a Latin **era* corresponding to Greek ἀρα; *ara*, *ar* may come directly from ἀρα, ἀρ: cf. Gr., III, 552, note.

4. *Tonleu*, 'tariff,' from τελώνιον, shows double metathesis. For *adoutz*, 'fount,' see A. Thomas, *Essais de philologie française*, 1897, 205.

34. Before tš, dž (and it, id), before n', and before final i, an q becomes ü in various dialects: *cōgītat* cūia cūida, **stūdiat* estūia, *fūgit* fūg, *refūgium* refūg; *jūngēre* iūnher, *ūngēre* ünher, *pūgnum* pūnh; *dūi* dūi, *sūm* sō + i sūi. The ü before tš, dž apparently occurs everywhere except in Dauphiné; before n' it is to be found in nearly all the dialects of the north and west; before final i it seems to be limited to Bordeaux, Auvergne, and a part of Languedoc.

q

35. Cl. L. ō V. L. q Pr. q: *cōr* cqr, *cōrpus* cqrs, *mōrtem* mqrt, *ōpēra* qbra, *rōta* rqda.

1. For demqra (also q) **demōrat*, see Meyer-Lübke, *Gram.*, I, 204, § 220. For prq̄a (also prq̄a, prueva) *prōbat*, see *Rom.*, XXXI, 10, footnote 3.

36. Before a nasal, in most of the dialects of Limousin, Languedoc, and Gascony, q became q̄: *bōnum* bōn, *fōntem* fōnt, *pōntem* pōnt. Cf. E. Levy in *Mélanges de philologie romane dédiés à Carl Wahlund*, 1896, p. 207.

1. If the nasal was n', the vowel remained open in most or all of these dialects: *cōgnīta* coinda *cuenda cuenhda*, *lōnge* lonh *luenh*, *sōmniūm* sonh *suenh*.

37. Early in the history of Provençal, before u, a labial consonant, a g or a k, an i, or one of the palatal consonants l', n', r', s', z', y, tš, dž, an q broke, in most dialects, into a diphthong which developed into ue, üo, üe, or ü[22]: *bōvem* bq̄u būq̄u būeu, **ōvum*

qu üou üeu, *nōvus* nqus nüous nüeus; **cōpero* cqbri cüebre^[23], *nōva* nqva nüeva, *ōpus* qps üops, *prōbat* prqa prüeva, **trōpo?* trqp trüeb; *cōquus* cqcs cüocs cüex, *fōcum* fqc füoc füec füc, *crōcus* grqcs grüocs grüecs, *jōcum* iqc iüoc iüec iüc, *lōcus* lqcs lüocs lüecs, *lōcat* lüoga, *pōtui* püec, *sōc(ě)rum* (sqzer) sqgre süegre (fem. süegra); **ingrōssiat* engrqissa engrüeissa, **angōstia* engqissa engüeissa, *nōctem* nqit nüoit nüeit, *ōcto* qit üeit, *pōstea* pqissas püeissas, *prōximus* prqymes prüeymes; *fōlia* fqlha füolha füelha fülha, *ōculus* qlhs üolhs üelhs ülhs, *lōnge* lqnh lüenh, *sōmnum* sqnh süenh, *cōrium* cqr cüer, *pōstea* pües, *prōximum* prqsmc prüesme, **plōia* plqia plüeia plüia, **inōdiat* enqia enüeia enüia, **pōdiat* pqia püeia püia, *nōctem* nüoch nüech nüh, *ōcto* üeg.

The breaking was probably due to a premature lifting of the tongue under the influence of a following high vowel or a palatal or velar consonant, or to a premature partial closure of the lips in anticipation of a following labial. Before i or a palatal the diphthong was at the start presumably üo; before u or a labial or velar consonant, uo: from these two types, the first of which influenced the second, came the later developments. Ü is a reduction of üo or üe; it apparently does not occur before u.

The dialect conditions are mixed, the development in each region depending somewhat on the following sound. In the southwest, q and ue seem to prevail; in the northwest, ü; in the west, in Limousin, and in Auvergne, üe; in Languedoc, üo; in the east and south, üe, üo, q.

The date of breaking is discussed in § 30.

1. In some words where a diphthong would be expected, none is found, although it may have existed: mqu *mōvet*, nqu *nōvem*, plqu **plōvit*; trqp *prop*; brqcs **brōccus*, iqgon *jōcunt*, lqgui *lōco*. The form püoc or püec *pōtui* is regularly reserved for the first person, *pōtuit* being represented by pqc.

2. A few cases of irregular breaking are easily explained: püosc püesc (= *pōssum*) and püosca püesca (= *pōssim*) owe their diphthong either to earlier forms with s' or to the analogy of püec; sqfre süefre süfre (= *süffert*) are from **sōfferit*, formed upon **ōfferit* = *ōffert* (cf. § 33, 1); vüelc (= *vōlui*) follows the analogy of vüelh (**vōleo* = *vōlo*) and of püec.

38. Cl. L. *ū* V. L. *u* Pr. *ü*: **habūtus* avütz, *jūstum* iüst, *mūrum* mür, *mūtus* mütz, *nūdus* nütz, *plūs* plūs.

The date of the change of *u* into *ü* is not known; there is no *ü* in Catalan, and there may have been none in early Gascon. It seems likely that the Celts, when they adopted Latin, pronounced *ū* a little further forward in the mouth than did the Romans; that their *u* continued to advance gradually toward the front of the mouth until it became *ü*; and that this *ü* spread to the parts of France that were not originally Celtic.^[24] In the literary period the sound was probably *ü* in most or all of the Provençal dialects.

1. Pr. *onze* represents a V. L. **ūndēcim*, which in Gaul and Spain replaced *ūndēcim*. *Lōita lūcha*, *trōcha trūcha* probably go back to Latin double forms, **lūcta lūcta*, **trūcta trūcta*.

2. *Nqssas* **nōptias* = *nūptias*, by analogy of **nōvius*, 'bridegroom,' from *nōvus*.

3. Before *u*, Pr. *ü* apparently became *i*: *nūbem* **nūu* niu, *pūlicem* **pūuze* piuze. See §§ 63, (4); 74, (2).

au

39. Cl. L. *au* V. L. *au* Pr. *au*: *aurum* aur, *gaudium* gaug, *paucum* pauc, *thesaurus* tesaurs.

1. *Bloi* *blauþr*, *ioi*, *ioia*, *ioios*, *lotia* **laubja*, *noiza*, *onta* *hauniþa*, *or*, *sor*, *tesor*, etc., are French or Poitevin; *ioi* is a good Poitevin form. *Iai*, 'joy,' seems to be a fusion of *ioi* and Pr. *iai* = *gai*.

2. *Anta* *hauniþa* is unexplained.

UNACCENTED VOWELS.

40. (1) The fate of an unaccented vowel depended largely upon the syllable in which it stood: in general, unstressed vowels in the initial syllable remained intact, while all vowels, except *a*, fell (at different dates) in the other syllables. The fall of unaccented vowels resulted in many new consonant groups: *collocāre* colcār, *hóminem* ómne, *sábbatum* sápte.

(2) The vowels *e* and *i*, instead of falling or remaining unchanged, became *y* in Vulgar Latin, early in our era: *alea* alya, *diŭrnus* dyurnus, *mĕdium* mĕdyu. Similarly *u* became *w*: *placui* placwi, *tĕnuis* tĕnwis.

1. Apparently, however, eé, ié e; oó, uó o: *prěhěnděre prěnděre; abĭětem *abētem, faciēbat *facēbat, pariētem parētem, quĭētus quētus; cōhōrtem cōrtem, cōōpĕrit cōpĕrit *cōpĕrit; dūōdēcim *dōdēcim*. The short e and o in *prěnděre* and **cōpĕrit* are not accounted for. In *mulĭěrem*^[25] Pr. *molher* the ĭ remained long enough (perhaps under the influence of the nominative *mŭlier*) to palatalize the l.

INITIAL SYLLABLE.

41. Usually, in the literary language, Latin a Pr. a; Latin æ, œ, and e, i (without regard to quantity) Pr. e; Latin o, u (long or short) Pr. o; Lat. au Pr. au, unless the next syllable contained an ú, in which case the au was reduced (in the Vulgar Latin time) to a. Ex.: *amĭcum* amic, *caballus* cavals; *æquālem* egal, **pænĭtĕre* penędre, *dēbĕre* dever, *mĕliōrem* melhōr, *dĭlĕctum* deleĭt, *dĭvĭnum* devin, *dĭvĭdĕre* devire, *fĭnĭre* fenir, *mĭnōrem* menōr; *plōrāre* plorar, *sōlātium* solatz, *cōlōrem* colōr, **vōlĕre* volēr, *mŭstĕla* mostĕla, *sŭbĭnde* soven; *aucĕllum* auzĕl, *audĭre* auzir, *augŭstum* aōst, **augŭrium* aŭr.

1. An initial vowel is occasionally lost, either through elision with the article (**eclĕsia *egleĭsa*, la egleĭsa la gleĭsa) or through the dropping of a prefix (*ingĕnium engenh ghenh*): *epĭscōpus* bisbes, *alauda* lauzeta, *occasiōnem* ocaiso caiso.

2. In a few words the vowel of the initial syllable disappeared, for some unknown reason, before r in Vulgar Latin: **cōrrōtŭlāre *crōtŭlāre* crollar, *dĭrĕctus drĕctus*^[26] dreitz, *quĭrĭtāre *crĭtāre* cridar.

3. *Domne*, used familiarly as a proclitic (§ 19), lost its first syllable, and, before a vowel, was reduced to *n*. The combinations *de n*, *que n* (followed by a proper name) were understood as *d'en*, *qu'en*; hence the title *en*, 'Sir.' See Schultz-Gora in *Zs.*, XXVI, 588; Elise Richter in *Zs.*, XXVII, 193; V. Cescini, *Manualetto provenzale*, 2d ed., 1905, 168 ff.

4. The proclitic *o* probably comes from a V. L. *ot*, not from *aut*.

42. The vowel of the initial syllable, especially in verbs, was extremely subject to the influence of analogy: *cŭlhir* (o) through *cŭlh* (o) *cōllĭgit*, *dizĕn* *dĭcĕntem* through *dire* *dĭcĕre*, *dŭrar* through *dŭr* *dŭrum* and *dŭra* *dŭrat*, *finir* through *fin* *fĭnem*, *fivĕla* through *fibla* *fĭbula*, *puĕiar* (o) through *puĕia* (o) **pōdiat*.

1. *Avangĕli* (e) is perhaps influenced by *avan*; *blisō* (e) *blas* may possibly have been influenced by *tiso*; *gazardō wiđarlōn* shows the influence of *gazanhar*; in *piucĕla* (*pŭlcĕla*) **pŭellicĕlla* (*Zs.*, XXV, 343) the *pŭu* of the first syllable was changed to *piu* just as *pŭlicem* became *piuze* (see § 38, 3); in *vas* = *ves* *ve(r)sus* the *a* is due to the analogy of *az* *ad*; *vais* is unexplained, *vaus* follows *daus* (§ 44, 6). If *desse* is from *de exĭn*, the first syllable is irregular. Beside *maniar* *manducare* are

unexplained forms *meniar miniar*. In *duptar* (o), *suritz* (o) the *u* doubtless represents *u* or *o*, not *ü*.
Girofle Καρούφουλλον and *olifan orifan* *elephantem* are French.

43. Sometimes the initial syllable was altered by a change of prefix or a false idea of etymology: *aucire* *occīdēre* (cf. the Italian and Rumanian forms), *diman* (e) *de máne* (cf. *di dīem*), *dementre* *dum ĭntērim* (cf. *de de*), *engqissa* **angŭstia* (cf. *en in*), *envanezir* *evanēscēre*, *escür* *obscūrum* (cf. *es- ex-*), *preon prefon* (o) *profūndum*, *redon* *rotūndum* (*re- in* V. L.: Schuchardt, *Vokalismus des Vulgärlateins*, II, 213), *trabalh* *trepalium* (cf. *tra- tra- = trans-*). *Dimenge* (also *ditmenge*) is from *dīe domīnīco*.

1. On the same principle are doubtless to be explained such double forms as *evori* (a), *saboros* (e), *socors* (e), *somondre* (e), *soror* (e). *Serori* occurs in a Latin inscription.

2. The prefix *eccu-*, under the influence of *ac* and *atque*, became **accu-* in southern Gaul and elsewhere: *aco* **accu'hoc*, *aquel* **accu'illum*, *aquest* **accu'istum*, *aqui* **accu'hīc*. *Eissi ecce hīc* sometimes becomes *aissi* through the analogy of *aissi ac sīc*.

3. In such forms as *tresanar*, the prefix *tres-* is French.

44. Local or partial phonetic changes affected the initial syllable of many words: *demandar* (do-) *demandāre*, *emplir* (üm-) *implēre*; *ciutat cieutat* *cīvītātem*; *eissir issir* *exīre*, *getar gitar* **jēctāre*; *crear criar* *creāre*; *merce* (mar-) *mercēdem*; *delgat* (dal-) *delicātum*.

1. Nearly everywhere there is a tendency to change *e* to *o*, *u*, or *ü* before a labial, especially before *m*: *premier premier prumier*, *remas romas*, *semblar somblar*, *trebalh trubalh*. So *de ves* **do ves dous*.

2. In the 13th century, nearly everywhere, *iu* *ieu*: *piucela pieucela*.

3. Many dialects of the north and west change *ei* and *e* to *i*: *deissendre dissendre*, *eissam issam*, *eissi issi*, *eissilh issilh*, *leisso lisso*, *meitat mitat*; *degerir* (i), *denhar* (i), *disnar*, *en in*, *enfern* (i), *entrar* (i), *envers* (i), *escien icient*, proclitic *est ist*, *estar* (i), *estiers* (i), *Felip* (i), *gelos* (i), *genhos* (i), *genolh* (i), *gequir* (i), *guereiar* (i), *guerensa* (i), *i(n)vern*, *isnel irnel*, *peior pigor*, proclitic *per pir*, *premier* (i), *semblar* (i), *serven* (i), *serventes* (i), *sevals* (i), *trebalhar* (i), *tremblar* (i). In *disnar*, *ivern*, *isnel* only *i* is found. In some dialects there is an alternation of *e* and *i*, *e* being used when there is an *í* in the next syllable, *i* when there is none, *fenít*, *sirvén*. In *vezí* *vīcīnum* the *e* probably goes back to V. L.: cf. Fr.

4. In a few dialects *e* in hiatus with a following vowel becomes *i*: *crear criar*, *leal lial*, *prear priar*, *preon prion*, *real rial*.

5. In many dialects of the north and west *e* has a tendency to become *a* before *r*: *guerentia garensa*, *merce marce*, *pergamen pargamen*.

6. In some dialects there is a tendency to assimilate e to an á in the next syllable: *delgat dalgat*, *gigant iaian*, *deman (a)*, *semblar (a)*, *serrar (a)*, *tremblar (a)*. So *de vás* (§ 42, 1) *da vás dávas*; hence *daus*, under the influence of *deus de ves*.

INTERTONIC SYLLABLE.

45. The term *intertonic* is applied to the syllable that follows the secondary (§ 18) and precedes the primary accent. In this position all vowels, except a, regularly disappeared in popular words, probably between the 5th and the 8th century^[27]; a apparently remained: **bŭllĭcāre* boiar (bollegar), *bŏnĭtātem* bontat, **carrĭcāre* carcar cargar, *caballĭcāre* cavalcar cavalgar, *cĕrĕbĕllum* cervel, *cĭvĭtātem* ciutat, *cŏllŏcāre* colcar colgar, *dĕlĭcātum* delcat delgat, *excommŭnĭcāre* **excommĭnĭcāre* escomeniar, *vĕrĕcŭndia* vergonha; *calamĕllum* calameļ, *invadĕre* **invadĭre* envazir, *margarĭta* margarida, *mĭrabĭlia* miravilha, *parav(e)rĕdus* palafres.

1. The vowel is preserved in a number of words in which it originally bore the secondary accent (§ 18): *abbreŭiāre* abreuiar, *calŭmniāre* caloniār, **erĭciónem* erisso; on the other hand, **cominĭtiāre* (through **comĭn'tiāre*) *comensar*, *particiónem* (through **pártiónem*) *parso*. Cf. Zs., XXVII, 576, 684, 693, 698, 701, 704. When kept, the vowel is sometimes altered: **carŏnea* **carŏneāta* caraunhada, **cupĭdietŏsus* cobeitos cobitos, *papĭlĭónem* pabalho.

2. The prefix *mĭnus-* was reduced to *mis-* (or *mes-*) in Gaul, perhaps at the close of the Vulgar Latin period: **mĭnus-prĕtiat* *mespreza*. *Menes-* was used also. Cf. P. Marchot, *Phon.*, pp. 43, 44.

3. *Mostier* is from **monistĕrium*, altered, by the influence of *ministĕrium*, from *monastĕrium*. *Comprar* is from V. L. *comperare*. *Calmelh* *calmelha* (cf. *calamel* above) are Provençal formations from *calm*. *Caresma* or *caresme* seems to be from V. L. **quarrĕsĭma* = *quadragĕsĭma*. *Anedier anatarium* shows the influence of *anĕt ánet anātem* (§ 48, 1).

4. In learned words the vowel is generally preserved: *irregulár*, *irritár*, *pelicán*, *philozophía*. The vowel is, however, often altered, the exchange of e and i being particularly frequent: *esperít*, *femeníl*, *orifán*, *peligrí (e)*, *soteirán (sotrán)* *subterraneum* influenced by *dereirán* and *primeirán*.

46. Very often the intertonic vowel was preserved by the analogy of some cognate word or form in which that vowel was stressed: *devinár* through *devín*, *finimén* through *finír*, *guerreíar* through *guerrĕia*, *noiridúra* through *noirír*, *oblidár* through *oblít*, *pertusár* through *pertúsa*, *reusar* through *reúsa*, *servidór* through *servíre*.

1. In such cases the preserved vowel is sometimes altered, the exchange of e and i being especially common: *avinén*, *covinén*, *sovinénsa*, cf. *venír*, *ven*; *enginhár*, *enginhós*, cf. *genh*; *envelzír*, cf. *vil*; *gememén*, cf. *gemír*; *issarnít (eissernít)*, from *excĕrnĕre*; *randóla*, from *hirŭndŭla*, perhaps influenced

by *randón*; *temerós* (o), from **timorōsus*, influenced by *temér*; *traazó* (i), from *tradiōnem*, with a substitution of suffix; *volentiérs*, from *voluntarius*, under the influence of *volén* *volentem*.

PENULT.^[28]

47. (1) The vowel of the penult of proparoxytones fell in many words in Vulgar Latin, especially between a labial and another consonant, and between two consonants one of which was a liquid: **avīca* **auca*, *cōm(i)tem*, *cōmp(u)tum*, *dēb(i)tum*, *dōm(i)nus*^[29]; *alt(e)ra*, *vīg(i)lat*, *cal(i)dus*, *vīr(i)dem*; *frig(i)dus*, *nītīdus* **nītītus*, *pōs(i)tus*, *pūtīdus* **pūtītus*.

(2) The classic Latin *-culus* comprises an original *-clus* (*sæclum*) and an original *-culus* (*aurīcŭla*). In popular Latin both were *-clus* (**macla*, *ōclus*, etc.), to which was assimilated *-tŭlus* in current words (*vētŭlus* *vēclus*, etc.).

(3) Many popular words which in Vulgar Latin had very generally lost the vowel were for some reason introduced into southern Gaul in their classical forms, and not a few were adopted both in the uncontracted and in the syncopated state: *fragīlem* *frágel* (cf. Fr. *fraile*, It. *frale*), *jŭvēnem* *iŏve* (cf. Fr. *iuevne*); *clērīcum* *clērgue* *clēr'cum* *clērc*, *dēbītum* *dēute* *dēb'tum* *dēpte*, *flēbīlem* *frēvol* *flēb'lem* *frēble*, *mal'habītum* *malaute* *mal'hab'tum* *malapte*, *nītīdum* *nēde* **nītītum* *net*, *hōmīnem* *ome* *hōm'nem* *omne*, *pōpŭlum* *pōbol* *pōp'lum* *pōble*.

1. *Cōgnītum* seems to have become **cónhede*, whence *coinde cuende conge*. Cf. § 79, Gnd, Gnt.

48. The unaccented penult vowels that had not already fallen disappeared, in most cases, in the transition from Latin to Provençal: **carrīcat* *carca*, *cōllōcat* *cōlca*, *cŭrrēre* *cōrre*, *spathŭla* *espatla*, **ēssēre* (= *ēsse*) *ēstre*, *ī(n)sŭla* *isla*, *pēssīmum* *pēsme*, *pōnēre* *pōnre*, **rīdēre* *rire*, *tabŭla* *taula*, *tōllēre* *tōlre*.

1. A apparently was more tenacious than other vowels, and frequently remained as an indistinct e: *anātem* *ánet*, which, being associated with the diminutive ending *-ét*, became *anét* (cf. modern Pr. *anèdo*); *cannābim* *cánebe* (learned?); *cōlāphum* **cólebe* *cōlbe*, but *cōl'phum* *cōlp*; *Stēphānum* *Estēve*; *lampāda* *lámpeza*; *ōrgānum* *ōrguene* (later *orguéne*) *órgue*; *ōrphānum* *qrfe*; *raphānum* *rāfe*; *Rhōdānum* *Rqzer*; **sēcāle* (= *sēcāle*) *séguel* (but cf. modern *segle selho*). Cf. A. Thomas in the *Journal des savants*, June, 1901, p. 370. See also P. Marchot, *Phon.*, pp. 90-94. Cf. § 45, footnote. It is noteworthy that **cólebe* ultimately lost its penult, while the other words lost the final syllable or none.

49. Under certain conditions, however, a vowel which had not fallen in the Latin of southern Gaul was often kept in Provençal. It was then probably indistinct in sound, and was written usually *e*, but occasionally *o*.

(1) After *c'*, *g'*, or *y* the vowel was apparently retained in some dialects and lost in others. When the *c'*, *g'*, or *y* was intervocalic, forms with and without the vowel are about equally common; when the *c'*, *g'*, or *y* was preceded by a consonant, forms with the vowel predominate, and after cons. + *c'* the vowel was apparently never lost. After intervocalic *c'*: *cōcēre* (= *cōquēre*) *cqire cqzer*, *dīcēre* *dire dízer*, *dūcēre* *düire *düzzer* (*condücir dedüzir*), *facēre* *faire *fázer* (*fazedor*, etc.), *gracīlem* *graille*, **nōcēre* (= *nōcēre*) *nqire nqzer*, *placītum* *plach*, *sōcērum* *sqzer* (*sqgre* is from *sōcrum*), **vōcītum* (= *vacuum*) *vuech*. After intervocalic *g'* or *y*: *bajūlus* *bailes*, *fragīlem* *frágel*, *imagīnem* *imáge*, *lēgēre* *lēire legír* (through **lēger?*), *rīgīdum* *reide rege*, *rīgīda* *regeza*, **tragēre* (= *trahēre*) *traire tragír* (through **tráger?*). After cons. + *c'*: *carcer* *cárcer*, *crēscēre* *creisser*, *nascēre* *náisser*, *pascēre* *páisser*, *parcēre* *párcer*, **tōrcēre* (= *tōrquēre*) *tqzzer*. After cons. + *g'* or *y*: *angēlum* *ángel* (*learned?*), **cōll'gēre* (= *cōllīgēre*, through *cōllīgo* etc.) *cqlre cuelher colhír*, **dē-ēr'gēre* (= *ērīgēre*) *dēdre dēzzer*, **fūlgērem* (from *fūlger* = *fūlgur*) *fqzzer*, *jūngēre* *iqnher*, *marginem* *marge*, *plangēre* > *planher*, *vīrgīnem* *vergena verge*.

(2) After *ks*, *s*, *ss*, and *sy* the vowel was apparently retained in some dialects and lost in others: *dīxērunt* *diron dissēron* (through **dísseron*)^[30], *dūxērunt* *düystrent düissēron* (**dúissēron*), *fraxīnum* *fraisne fraisse*, *traxērunt* *traissēron* (**tráissēron*), *tōxīcum* *tuēissec*; *asīnum* *asne ase*, *mīsērum* *miser* (*learned*), **prē(n)sērunt* *prēson prežeron* (**prežeron*), *rema(n)sērunt* *remastrent remasēron* (**remásēron*); **ēssēre* (= *ēsse*) *ēstre ēsser* (used in Rouergue, Limousin, Marche, and Dauphiné), **mīssērunt* (= *mīsērunt*) *mestrunt* (*mēsdren*) *mesēron* (**mēssēron*), *passērem* *pásser*; **cō(n)sēre* (= *consuēre*) *coser* (*cozír* is from V. L. **cosīre*).

(3) Between a labial and a dental the vowel was apparently kept: *cūpīdum* *cqbe*,^[31] *fēmīna* *fēmena fēme* (but *fēm'na* *fēmna*), *jūvēnem* *iqve*, **lūmīnem* *lūme*

(*lūmen* lüm), *hōmīnem* ómen óme (but *hōm'nēm* omne), *tēpīdum* tēbe,^[31] *těrmīnum* tərme. Cf. § 48, 1.

(4) Between a dental and a guttural the vowel remained long enough for the guttural to become y (§ 52; § 65, G): *mědīcum* *mędegu *mędeye mędže (= *mege*). If the first consonant was a liquid or a nasal, the vowel apparently allowed the guttural to become y in some dialects, but not in others: **carrīcat* caria carga, *clěrīcum* clērie clęrgue, *mōnāchum* monie mongue. *Caballīcat* cavalga, *cōllōcat* cqlca cqlga show an earlier fall. In *clěr'cum* clęrc the fall goes back to Latin times.

(5) Between lv and r the vowel was kept in some dialects and lost in others: *sōlvěre* sqlver sqlvre, *vōlvěre* vqlver vqlvre, *pŭlvěrem* polvęra.

50. Some learned proparoxytones kept for a while both post-tonic vowels (usually written e), but most of them ultimately either shifted their accent to the penult (§ 17, 1) or dropped their final syllable: *doměstīcum* domęstegue, *lacrīma* lágrema, *měritum* męrite, *hōrrīda* qreza, *rēgīmen* régeme; *řistŭla* festóla, *fragīlem* fragíl, *měritum* merit, *těrmīnum* termíni; *diacōnum* diágue, *flēbīlem* fręvol (cf. *flēb'lem* fręble), *nřtīdum* nęde (cf. **nřttum* nęt), *ōrdīnem* órde, *pōpŭlum* pqlbol (cf. *pōp'lum* pqlble), *prīncīpem* príncep prínce. Cf. § 47, (3).

FINAL SYLLABLE.

51. As early as the 8th century, in popular words, the vowels of final syllables fell, the fall occurring first, perhaps, after liquids: *hěřī* ęr, *malě* mal; *bōnŭs* bos, *cōlāphŭm* cqlp, *cōgřto* cŭg, *paněm* pan, *prětiŭm* prętz.

(1) Latin a, however, remained, being generally pronounced ą: *audiām* auia, *bōnā* bona, *řiliās* filhas.^[32]

(2) Latin final ī probably remained in all dialects later than the 8th century, and in some until the beginning of the literary period: *hābuī* águi aguí. Before it fell, it changed an accented ę in the preceding syllable to ĩ: see § 27.

(3) Latin i and u remained if they were immediately preceded by an accented vowel: *fuī* fŭi, *měī* męi, *sŭī* sŏi; *cavum* *caum chau, *děus* dęus, *ěgo* *ěo *ěu ęu, *rīvum* rīum riu. In such cases the two vowels formed a diphthong.

(4) Before final nt Latin e, u remained as e, o: *cantent* canten, *vēndunt* vēndon.

1. In Aude, Tarn, Aveyron, Corrèze, and a part of Haute-Garonne, final ī was preserved as late as the 12th century: *pagadi*, *salvi*, *solī*. See *Rom.*, XIV, 291-2 and XXXIV, 362. Such forms occur also in Vaud and Dauphiné. Cf. *Gram.*, II, p. 82.—In the dialect of some texts, -ī, before falling, palatalized a preceding l (or ll), n (or nn), nd, nt, or t: *annī* *anh*, *bellī* *beill*, **infantī* *efanh*, **spiritī* *esperih*, *mundī* *monh*. See *Rom.*, XXXIV, 353.

2. In the extreme east there are traces of final -ōs: *aquestos*, *ellos*, *tantos*.

3. *Grau* for *gra* *gradum*, *niu* for *ni* *nīdum* are Catalan. *Amiu* for *amic* *amīcum*, *chastiu* for *chastic* *castīgo* belong to the dialect of Forez, and point to a very early fall of the guttural in that dialect. Cf. § 65, D, G.

4. *Aire*, *vaire*, beside *air* *aĕrem*, *vair* *varium*, probably show the influence of the numerous nouns in -aire (*amaire*, etc.); cf. § 52, (1). *Fores* beside *fors* *fōris*, *nemes* beside *nems* *nīmis*, *senes* beside *sens* *sīne* probably developed the *e* when the next word began with a consonant: see § 62, (3). For *colbe*, see § 48, 1. *Reide rede* perhaps owes its -e to *rege*: § 49, (1). Beside *volp* *vŭlpem* there is a *volpe*.

5. *Coma*, beside *com*, *con*, *co* *quōmō(do)*, apparently owes its -a to the analogy of the adverbs *bona* and *mala* and other adverbs of manner. For a different explanation, see J. Vising in the *Tobler Festschrift* (*Abhandlungen Herrn Prof. Dr. Tobler... dargebracht*, 1895), p. 113.

6. E seems to have been inserted in the second person singular of some verbs, to distinguish it from the third person: *co(g)nōscis* *conq̄isses*, *co(g)nōscit* *conq̄is*.

52. When the fall of the vowel would have resulted in an undesirable consonant group at the end of a word, the vowel was retained as an indistinct e: *dŭbĭto* *dōpte*, *lŭcrum* *lōgre*.

The principal groups that call for a supporting vowel are: (1) a consonant and a liquid; (2) a labial and a dental; (3) in proparoxytones, a consonant and a c' or c originally separated by the vowel of the penult; (4) in proparoxytones, a consonant and an m or n originally separated by the vowel of the penult. Ex.: *ĭnter* *ęntre*; *aptum* *apte*; **dōdĕcim* *dōtze*, *jūdĭco* *iūtge*; **Jacōmus* *Iacmes*, *asĭnum* *asne*.

If the word was a paroxytone, and the first consonant was a palatal and the second an r, the supporting vowel stood between the two: *major* *maier*, *mĕlior* *mĕlher*, *mŭlier* *mōlher*, *pĕjor* *pĕier*, *sĕnior* *sĕnher*. Otherwise the supporting vowel followed the consonant group.

The four classes of groups (aside from the palatal + r just mentioned) will now be examined in detail:—

(1) Examples: *alter* autre, *Carolus* Carles, *dūplus* dōbles, **ēssēre* ęstre, *fabrum* fabre, **mēr(ū)lum* mērle, *nōster* nōstre, *pauper* paubre, *pōp(ū)lum* pōble, *pōnēre* pōnre, *recipēre* recebre, *rūmpēre* rōmpre, *tōllēre* tōlre, *vōlvēre* vōlvre; *masculum* mascle, etc.; *flēb(ī)lem* frēble, etc. Under this head is included r-r (*cūrrere* cōrre, *quærēre* querre), but not ll and rr (*bēllum* bēl, *fērrum* fēr). In Provençal the first element was often changed, later than the 8th century, into a vowel, original b and v becoming u, and d, t, c, g, and y being turned to i: *bībēre* beure, *scribēre* escriure, **mōvēre* mquire, *plōvēre* plquire, *vīvēre* viure; *latro* laire, *matrem* maire, *radēre* raire, **rīdēre* rire, *vītrum* vquire; *desīdēro* desire, etc.; *amātor* amaire, *servītor* servir, etc.; *dīcēre* dire, *dūcēre* dūire, *facēre* faire, *gracīlem* graile, **tacēre* taire; *frīgēre* frire, *weigāro* gaire, *lēgēre* lquire; *bajūlum* baile. Apparent exceptions to the rule are intervocalic cl, gl, which were probably reduced to single consonants before the 8th century: *ōc(ū)lum* ōlh, *vīg(ī)lo* vēlh.

1. The rare forms *frair*, *mair*, *pair*, *Peir* (still used in Gascony), beside regular *fraire*, *maire*, *paire*, *Peire*, are probably due to proclitic use; so *sor* beside *sorre* sōror, and possibly *faur* beside *faure* *faber*. The learned *albir* = *albire* *arbitrium* may be due to the analogy of other double forms. *Dimerc* for *dimercre* (§ 17, 2) perhaps follows *dimenc*.

2. Rr requires a vowel in a few dialects: *corre* = *cor* cūrrit, *ferre* = *fer* fērrum, *torre* = *tor* tūrrem.

(2) Examples: *cūbītum* cōde; *cōmītem* comte; *dēbītum* dēpte dēute, § 47, (3); *dōmnum* domne; *dūbīto* dōpte; *hōspītem* qste; *sabbātum* sapte.

1. *Azaut* seems to be post-verbal from *azautar* *adaptāre*. *Escrit* *scriptum* shows the influence of *dit* *dīctum*. *Malaut*, beside *malaute* *malapte* *mal'habītum*, is reconstructed from the feminine *malauta* on the model of *aut*, *auta*. *Set* *sēptem* must have developed as a proclitic.

(3) Examples: *jūdicem* iūtge^[33]; *pōllīcem* pquze; *quīndēcim* quinze; *salīcem* sauze; *sēdēcim* sēdze;—*canōnīcum* canonge canōrgue,^[34] § 49, (4); *clērīcum* clerge clergue (§ 48, 2); *mēdīcum* mētge; *mōnāchum* monge mongue mōrgue,^[34] § 49, (4); *vīndīco* venie; *viatīcum* viatge, etc.

1. The forms *poutz*, *sautz*, beside *pouse*, *sauze*, would seem to indicate that *lc'* did not require a supporting vowel in all dialects.

2. **Ficotum* (= *jēcur*), a fusion of *συκωτόν* ('fig-fattened') and *ficus*, combined with **hēpāte* (= *hēpar*), became **fēcātu* **fēcitu* **fēgidu*, and then, through the influence of the familiar ending *-igu* (= *īcum*), **fēdigu* *fētge*. See G. Paris in *Miscellanea linguistica in onore di G. Ascoli*, 1901, p. 41; H. Schuchardt in *Zs.*, XXV, 615, and XXVIII, 435; L. Clédar in *Revue de philologie française et de littérature*, XV, 235. *Pege*, for *peich* *pēctus*, seems to be due to the analogy of *fetge*.

(4) Examples: *æstīmo* *esme*; *dēcīnum* *deşme*; *fraxīnum* *fraisne*; *incūdīnem* *enclūtge* (cf. § 80, Dn); **metīpsīnum* *meddeşme*; *pěssīnum* *pęsme*; *prōxīmus* *prqsmes*.

1. *Faim* *facīmu(s)* doubtless lost its *-e* through the analogy of the alternative form *fazēm* **facīmu(s)* and of the usual endings *-ām*, *-ēm*.

(5) In some dialects, at least, *by*, *mby*, *mny*, *py*, *rny* required a supporting vowel: *rūbeum* *rōtge*, *cambio* *camie*, *sōmnum* *songe* *suenh*, *apium* *ache* *api*, **Arvērnium*^[35] *Alvērnhe*; *ratge* (= *rabiem*) is probably French. Original *lm*, *rm*, *sm* required a supporting vowel in some dialects but not in others: *hēlm* *ēlme* *ēlm*, *ūlmum* *ōlme* *ōlm*, *palmum* *palm*; **ērmum* *ērḡmuv* *erm*, *fīrmum* *fērm*, *gērmēn* *gērme*; *spasmus* *espasme*.

(6) Many verbs regularly have an *-e* in the first person singular of the present indicative: *desire*, *dōpte*, *iūtge*, etc. By the analogy of these, *-e* often appears in the first person singular of verbs which need no supporting vowel: *remīro* *remir* *remire*. By the analogy of the preterit (*águi*, *fūi*, etc.), *-i* is very often substituted for this *-e*: *azor* *azōri*, *cant* *canti*, *prētz* *prēzi*, etc.

53. Many late words preserve the final vowel as *-e*: *benigne*, *bisbe* *epīscōpum*, *digne* (cf. *denhar*), *mixte* (cf. *męst*), *regne* (cf. *reing*), *signe* (cf. *sēnh*). Cf. § 50; (for *cqlbe*) § 48, 1; and (for *cqinde*, etc.) § 47, 1. Learned formations from nouns in *-ium* usually end in *-i*, simply dropping the *-um*: *capitōli*, *edifici*, *empēri*, *iüzizi*, *martíri* (*martíre*), *negōci*, *ofíci*, *periūri*, *remęzi*, *servízi*, *vici*. Similar forms in *-i* were sometimes taken from the accusative of nouns and adjectives in *-ius*: *Boęci* *Boēthium*, *prōpri* (*prōpre*) *prōprium*, *savi* *sabium*.

1. It should be remembered that the Latin words, at the time of their adoption, had undergone various phonetic changes in the clerical pronunciation: cf. § 15. A form *remezi*, for instance, presupposes a pronunciation of *remēdium* as *remēđiu(m)*.

3. CONSONANTS.

54. The Latin consonants which we have to consider are: b, c (= k), d, f, g, h, j (= y), l, m, n, p, qu (= kw), r, s, t, v (= w), x (= ks). To these we must add the Vulgar Latin w coming from u, and y coming from e, i; see § 40, (2). Furthermore, in words borrowed from Germanic dialects we find b, ð, h, k, þ, w, which call for special notice; and, in words borrowed from Greek, ch, k, ph, th, z.

The Latin d, f, j, l, p, t call for no remark at present. Latin h, in popular speech, became silent very early (*hōc* *ōc*, *hōmo* *ōmo*), and, although an attempt was made to restore it in polite speech, it left no trace in the Romance languages: cf. *Rom.*, XI, 399. Double consonants were pronounced distinctly longer than single ones: *annus*, *ille*, *ōssum*, *tērra*.

55. Latin b, c, g, m, n, qu, r, s, v, w, x, y show the following developments in popular Latin speech:—

B between vowels became, through failure to close the lips tightly, β (bilabial v), from the 1st to the 3d century of our era: *habēre* aβere. The same change took place, to a certain extent, when the b was not intervocalic, but we have few, if any, traces of it in Provençal. Between vowels, even in learned words, the clerical pronunciation was probably β or v until the 7th century. Cf. V.

C before a front vowel (e, i), as early as the 3d century, doubtless had, in nearly all the Empire, a front or palatal articulation; that is, it was formed as close as possible to the following vowel^[36]: *cēntum* c'ēntu, *dūcēre* dūc'ēre. The next step was the introduction of an audible glide, a brief y, between the c' and the vowel^[37]: c'yēntu, dūc'yere. By the 5th century this c'y had developed into a kind of ty, the c' having been drawn still further forward: t'yēntu dūt'yere. Through a modification of the y-glide, the group then became, in the 6th or 7th century, tš or ts: tšēntu tsēntu. See H. Schuchardt, *Voc.*, I, 151, and *Ltblt.*, XIV, 360; P. E. Guarnerio, in *Supplementi all' Archivio glottologico italiano*, IV (1897), pp. 21-51 (cf. *Rom.*, XXX, 617); G. Paris, in the *Journal des savants*, 1900, 359, in the *Annuaire de l'École pratique des Hautes-Études*, 1893, 7, in the *Comptes rendus des séances de l'Académie des Inscriptions*, 1893, 81, and in *Rom.*, XXXIII, 322; W. Meyer-Lübke, *Einf.*, pp. 123-126; F. G.

Mohl, Zs., XXVI, 595; P. Marchot, *Phon.*, pp. 51-53; W. Meyer-Lübke, in *Bausteine zur romanischen Philologie*, 313. Cf. G and X.^[38]

G between vowels, before the accent, disappeared in some words in at least a part of the Empire: *le(g)ālis*, *li(g)āmen*, *re(g)ālis*, (*realis* is attested for the 8th century); *ēgo*, generally used as a proclitic, everywhere lost its g; on the other hand, g was kept in *castigāre*, *fatigāre*, *ligāre*, *negāre*, *pagānus*. G before a front vowel (e, i), by the 1st or 2d century, was pronounced g' (cf. C): *gēntem* g'ēnte, *fragīlis* frag'īlis. As early as the 4th century this g', through failure to form a close articulation, opened into y^[39]: *yēnte*, *frāyilis*. Before an accented e or i an intervocalic y disappeared, in the greater part of the Empire, being fused with the vowel: *magīster* mayīster *maēster*, **pagēnsis* payēsis paēsis, *regīna* reyīna reīna.^[38]

M and n, when final, were weak and indistinct from the earliest times, except in monosyllables; by the 3d or 4th century they had probably disappeared altogether from the end of polysyllables: *damnu*, *nōme*; but *jam*, *non*.

N before spirants (f, j, s, v), except in the prefixes *con-* and *in-*, became silent during the Republican period, the preceding vowel, if it was short, being lengthened by compensation^[40]: *mē(n)sis*, *pē(n)sare*. If the syllable *con-* or *in-* was not recognized as a prefix, the n fell: *co(n)sul*, *co(n)ventum*, *i(n)fas*. In learned and newly constructed words the n was pronounced. Cf. M.

Qu, gu before o or u were reduced to c, g in the 1st or 2d century: see W.

R before s, in a number of words, became s in the Republican period: *deōrsum* deōssum, *dōrsum* dōssum, *sūrsum* sūssum; so, in a part of the Empire, *pěrsīca* pěssīca, *věrsus* (preposition) věssus. Early in our era ss after a long vowel was reduced to s: *deōsu*, *sūsu*.

S was probably always voiceless, or surd, in classic Latin, but became voiced between vowels, in Gaul, at the end of the Vulgar Latin period: *casa*. To initial s + consonant an i or e was prefixed, at first, no doubt, after a word ending in a consonant: *in schōla* in iscōla; this process began in the 2d century and had become general by the 4th.

V, originally pronounced w, became β probably in the 1st century: *vīvĕre* βīβĕre. Before u, v regularly disappeared, but it was restored by analogy in many words: *flavus* flaus, *ōvum* ōum, *rīvus* rīus; but also *ōvum*, *rīvus*, by the analogy of *ova*, *rivi*. In the greater part of the Empire v apparently fell also before an accented o: *pavōnem* paōne, *pavōrem* paōre. Cf. W. When a β, representing either b or v, became contiguous to a following consonant, it changed to u: **avīca* aβīca auca, *gabāta* gaβata gauta, **flavītat* flaβītat flautat. In several words rv became rb in Latin: *vervēcem* berbĕce berbīce, *cōrvus* cōrbus, *cūrvus* cūrbus.

W coming, in the 2d or 3d century, from u (§ 40) differed from Latin v, then pronounced β, but was probably identical with Germanic w: *dēbuī* dĕbwī, *placuī* placwī, *sapuit* sapwit, *tĕnuis* tĕnwis. W fell between a consonant and o or u: *antīquus* antīcus, *battuo* batto, *carduus* cardus, *cōquus* cōcus, *distīnguo* distīngo, *mōrtuus* mōrtus; so *eccu'hōc* Pr. acq. Cf. Qu.

X (= ks) was reduced to s, in the 2d or 3d century, before a consonant or at the end of a word of more than one syllable: *sĕstus*, *sĕnes*; but *sĕx*. So the prefix *ex-* *es-* before any consonant but s: **exgaudĕre* Pr. esiauzir, **exlucĕre* Pr. esluzir, **exmittĕre* Pr. esmĕtre; *excernĕre* **escernĭre* Pr. eissernir. *Ex-* + s apparently became either *ex-* or *ess-*: **exsanguinātum* Pr. eissancnat, **exsaritāre* Pr. eissartar, **exsĕquĕre* Pr. essĕgre, **exsūrgĕre* Pr. essōrger, **exsūcāre* Pr. eissūgar essūgar.

Y coming, in the 2d or 3d century, from e or i, (§ 40) coincided with Latin j: *habeam* abya, *eāmus* yamus, *tĕneat* tĕnyat; *audio* audyo, *fīlia* fīlya, *vĕniat* vĕnyat. As early as the 4th century the groups dy, gy were reduced to y; and ly, ny probably became l', n': *mĕdius* mĕdyus mĕyus, *corrīgia* corrīgya corĕya; *mĕlior* mĕlyor mĕl'or, *tĕneo* tĕnyo tĕn'ó.

56. Germanic b, ð, h, k, þ, w call for special mention:—

B did not participate in the change of Latin intervocalic b to β: *roubôn* Pr. raubar. The words containing it were evidently adopted after this phonetic law had ceased to operate.

ð, þ were pronounced by the Latins as d, t: **waiðanjan* **wadanyāre* Pr. *gazanhar* (It. *guadagnare*), *þrēscan* **trecāre* Pr. *trescar*.

H, at the beginning of a word, was lost in the greater part of the Empire, including southern Gaul: *hapja* **apya* Pr. *apcha*. H between vowels was lost in some words and replaced by *kk* in others: *spēhôn* Pr. *espiar*, *fēhu* Pr. *fēu*, *jēhan* **yekkīre* Pr. *gequir*. Ht was regularly replaced by *tt*: *slahta* **sclatta* Pr. *esclata*; but *wahta*, perhaps borrowed at a different period, became Pr. *gaita*.

K, in southern Gaul, did not take the palatal pronunciation before front vowels: *skērnon* Pr. *esquernir*, *skina* Pr. *esquina*, *skiuhan* Pr. *esquivar*, **rīk-ītia* Pr. *riqueza*; only the derivatives of *Franko* (doubtless Latinized early) show palatalization, as **Francia* Pr. *Fransa*. G, however, seems to have been palatalized: *gīga* Pr. *giga*, *geisla* Pr. *giscle*. Before a, in words introduced early, k and g were treated like Latin c and g: *kausjan* Pr. *cauzir* *chauzir*, *gāhi* Pr. *gai iai*; see § 11, (1).

W was vigorously pronounced, and, through reinforcement of its velar element, came to be sounded *gw*: *warjan* **warīre* *gwarīre* Pr. *garir*, *wërra* **wërra* *gwërra* Pr. *guërra*.

57. Greek ζ, θ, κ, φ, χ did not exactly correspond to any Latin consonants:—

Z, whatever may have been its original pronunciation, received in Vulgar Latin the value *dy*, which then, like any other *dy*, became *y*: **zelōsus* (from ζῆλος) = *dyelōsus* *yelōsus* Pr. *gelōs*. The infinitive ending *-ίζειν*, introduced in such words as βαπτίζειν, *baptizāre* = *bapti(d)yāre*, became very common in the form *-idyāre* *-iyāre*, and was used to make new verbs: *wërra* + *ίζειν* **werriḍyāre* *gwerriḍyāre* Pr. *guerreiar*.

θ, in the popular speech of Rome, was replaced by *t*: similarly χ was replaced by *c*: σπαθή *spatha* = *spata*; χορδή *chōrda* = *cōrda*.

κ was apparently intermediate in sound between Latin *c* and *g*; it was generally replaced by the former, but sometimes by the latter: κατά *cata*, κυβερνᾶν *gubernare*.

φ, in Greek, was in early times (perhaps until the 4th century of our era) a strongly explosive p; it then developed into f. In words borrowed by the Romans in the early period it was replaced by p; in later words it was sounded f: κόλαφος *cōlāphus* = cqlapus, φασίολος *phaseōlus faseōlus*.

58. The fate of all these consonants in Provençal depended largely on their position in the word: we must therefore distinguish *initial*, *medial*, and *final* consonants. In a general way, the first tended to remain unchanged, the second to weaken, the third to disappear. Furthermore we must separate single consonants from consonant groups: the latter resisted change better than the former; but a group consisting of dissimilar elements tended to assimilate them.

INITIAL CONSONANTS.

59. A consonant preceded by a prefix was treated as an initial consonant as long as the character of this preceding syllable was recognized: *de-cadēre* decazer, *de-pīngēre* depenher, *præ-parāre* preparar, *re-cordāre* recorder, *re-patriāre* repairar, *re-pausāre* repausar, *se-dūcēre* sedüire. If, however, the initial syllable ceased to be recognized as a prefix, the following consonant was treated as a medial consonant: *præpōsītum* prebqst, *retōrta* redqrtā; so, perhaps, *profūndum* preṇ. The rare *rebṇre* (beside *reṇre*) *re-pōnēre* has the special sense 'to bury'.

SINGLE INITIAL CONSONANTS.

60. B, d, l, m, n, p, r, s, t underwent no change: ben, don, lqç, meṇ, nau, pauc, rius, si, tü.

1. For *cremetar* **tremitāre*, see Meyer-Lübke, *Einf.*, § 194. For *granolha* **ranūcūla*, see Körting, *ranuculus*.

61. C, c', f, g, g', β, γ suffered some change. C, g must be distinguished from c', g': § 55, C, G.

C, g before o, u remained unchanged: *colōrem* colqç, *cūra* cūra; *gūla* gōla, *gūtta* gōta. Before a they changed only in the north and northeast, where they became (perhaps from the 7th to the 9th century) respectively tš and dž: *campus* camps champs; *gaudēre* gauzir iauzir.

C' ts, which just before and during the literary period was reduced to s: *cælum* cəl səl, *cīvitātem* ciutat ciptat siptat. For g', see Y.

Y, comprising Latin dy, g', gy, j, and z, became dž (except in Béarn, where it remained y): *diurnālem* iornal (yornal), *deō(r)sum* iqs; *gēlus* gəls, *gentīlem* gentil (yentil), *gŷrāre* girar; *jam* ia, *jōcum* iqc (yqc), *jŷvēnem* iqve; **zelōsus* gelqs.

F remained unchanged, except in Béarn and a part of Gascony, where it became h: *famem* fam ham, *fīdem* fə hə, *fōcum* fqc hüc, *fōlia* fuelha huelha.

β v (the dentilabial spirant), except in Béarn, Gascony, and parts of Languedoc, where it became b: *vēnit* ven be, *vēntum* vent bent, *vērsus* (§ 55, R) vəs bəs, *vōs* vqs bqs.

1. In a few words β , owing to Germanic influence, was replaced by w gw: *vadum* + *watan* *gua*, *vastare* + *wôst* *guastar*. So *vagīna* *guaína*, *Vascōnia* *Gasconha*. Cf. gw below.

INITIAL GROUPS.

62. There are three classes of groups: those ending in l or r, those ending in w, and those beginning with s:—

(1) Bl, br, cl, cr, dr, gl, gr, pl, pr, tr underwent no change: *blasphemāre* *blasmar*, *brēvem* *brēu*, *clarus* *clars*, *crŭcem* *crõt*, *drappus* *draps*, *glaciem* *glatz*, *gradum* *gra*, *plēnum* *plēn*, *precāre* *pregar*, *trans* *tras*. Gras is from *grassus*, a fusion of *crassus* and *grossus*. For grōcs κρόκος see § 57, κ.

(2) Gw (Germanic w) and kw (Latin qu) were reduced, perhaps in the 10th century, to g and k, except in the west, where the w was retained: *wahta* *gaita* *guaita*, *warjan* *garir* *guarir*, *wërra* *gerra* *guerra*, *wīsa* *gisa* *guisa*; *quando* *can* *quan*, *quare* *car* *quar*. It should be noted that the u was commonly kept in the spelling (especially before e and i) after it had ceased to be pronounced, *gu* and *qu* being regarded merely as symbols for “hard” g and c. For *cinc* *quīnque*, see § 87, kw. Sw remained in *suavem* *suau*.

(3) To groups beginning with s a vowel had been prefixed in Vulgar Latin (§ 55, S); this vowel appears in Provençal as e. Sc´ apparently did not occur in any popular word; sl early became scl; the other groups (sc, scl, scr, sp, st, str) remained unchanged, except that in the north and northeast sc stš before a: *scala* *escala* *eschala*, *schōa* *escōla*, *slahta* **sclatta* *esclata*, *scribēre* *escriure*, *spīna* *espina*, *stare* *estar*, *strīngēre* *estrenher*.

MEDIAL CONSONANTS.

63. (1) It is well to note at the outset that when, through the fall of an unaccented vowel (§ 51), an early Provençal b, d, dz, dž, g, z, or ž was made final or contiguous to a final s, it became voiceless: *ōpus* qbus qbs qps, *ōrbum* qrbu qrb qrp: *datum* dadu dad dat, *vīřidem vīřdem* verde verd vęř; *prētium* prędzu prędz pręts (written *pretz*), *vōcem* vōdze vōdz vōts (written *votz*); *mēdium* męyu mędžu mędž męts (written *meg* or *mech*); *amīcus* amigus amigs amics, *largum* largu larg larc; *rīsum* rizu riz ris; *basium* bažu baiž baiš (bais). The combination tšs, however, loses either its second or its third element: **gaudios* gautšs gautš or gauts (both of them often written *gaugz*); so *nōctes* nuetšs nuetš or nuets (*nuegz*). For local variations of g, see (6). For *apud* ab ap am an, see § 65, P. 2.

(2) Under the same conditions, y became i: *vīdeo* vęyo vęy vęi, *pějus* pejus peys pięis.

(3) Under the same conditions, đ, coming from intervocalic d, fell when final, but became t before s: *audit* auđi auđ au; *crūdus* cruđus cruds crüts. So *crūdum* crü, *řidem* fe, *fraudem* frau, *gradum* gra, *nīdum* ni, *nōdum* nō, *pědem* pe, *sapidum* sabe, *těpidum* tębe; *grados* grats, *nōdus* nōts, *nūdus* nüts, *pědes* pęts. The two sets of forms influenced each other: hence *degras*, *fes*,^[41] *nis*, *pes*, etc.; *crut*, *grat*, *not*, *nut*,^[41] etc.

(4) Under the same conditions, β, coming from v or from intervocalic b, became u if preceded by a vowel, but fell if preceded by a consonant: *bībit* beβi beβ beu, *vīvit* βiβi βiβ vü, *claves* claβes claβs claus, *vīvus* βiβus βiβs vü; *salvet* sal, *salvum* sal, *sěrvit* się, *něrvos*

nęrs, *salvus* sals, *sęrvus* sęrs. Sometimes, however, final β preceded by a consonant, instead of falling, became f: *salvet* salf, *salvum* salf, *sęrvit* sięrf, *vęlvit* vęlf; it may be that these are the only regular forms for cons. + β when final, and that *sal*, *sier* are due to the analogy of *sals*, *siers*.

(5) Under the same conditions, final n, if preceded by a vowel, was kept in the extreme west, parts of the north, and all the southeast and east, but fell everywhere else; n before s was generally kept only in the southeast and east: *bęne* be ben, *canem* ca can, *sęnum* so son^[42]; *bęnus* bos bons, *mansięnes* maisęs maisęns. In *męnus* męns the n was kept, perhaps through the analogy of *menęr*. If the n was preceded by a consonant (r), the fall seems to have been even commoner: *cęrnu* cęr cęrn, *tęrno* tęr tęrn; *dięrnus* ięrs ięrns. For ięrnħ *dięrnę*, see § 51, 1. Provenęal n coming from nn never falls: *annus* ans.

(6) Under the same conditions, g, representing original c or g, became c after o or u, and after other vowels either became c or was changed to i (which fused with a preceding i): *fęcum* fęc, *lęcus* lęcs, *paucum* pauc, *Hęgo* Uc; *Aurelięcum* Aurelhac, *dęco* dic di, *Henręcum* Enric Enri, **trago* trac trai. The forms with c are the commoner; they have been most persistent in the west.

(7) The vocalization of l before s (*malus* maus) is a different phenomenon from the foregoing. See § 65, L.

(8) An m or an n that becomes contiguous to final s often develops into mp or nt, but oftener (judging from the spellings) does not: *nęmis* nems *nemps*; *annos* ans anz.

(9) Between a liquid or a nasal and a final s, a b or a p generally fell, unless supported by the analogy of a form in which the b or p was final:

ambos *ams ambs*, *cōrpus* *cors*, *tēmpus* *tems temps*; cf. *balbs* (*balb*), *orbs* (*orb*).

1. The d, n, t of the proclitics *ad*, *quid*, *in*, *aut*, *et* will be treated under Final Consonants.

64. Final ts from any source, in Provence, Limousin, and a part of Languedoc and Gascony, was reduced, during the literary period, to s: *amātis* *amatz amas*, *habētis* *avētz avēs*, *dīcit* *ditz dis*, *grandes* *granz grans*, *latus* *latz las*, *prētium* *prētz prēs*. On the other hand, in a part of Limousin (especially in Limoges), and also in Dauphiné, -ts, in the second person plural of verbs, became t: *habētis* *avēt*.

SINGLE MEDIAL CONSONANTS.

65. The single medial consonants will now be considered separately, in alphabetical order:—

β, coming from b or v, became v; except in the west and a part of the centre, where, if it remained intervocalic, it changed to b: *habētis* *avētz abētz*, *debēre* *dever deβer*, *faba* *fava faba*; *avārum* *avar*, *æstīva* *estiva*, *brēvem* *brēu*,^[43] *clavem* *clau*, *dīe Jōvis* *diiqus*, *lēvat* *lēva*, *novēlla* *novēla nabēra* (Gascon), *vīvus* *vius*. When the preceding or following vowel was o or u, a β before the accent fell in most dialects, being fused with the vowel: *abūndare* *aondar abondar*, *gūbērnare* *goernar governar*, proclitic *ūbī* *o*, *prōbare* *proar*, *sūbīnde* *soēn soven*, *sobēn*, *tribūtum* *treüt*; *Lūdvīcus* *Lozoics*, *Provīncia* *Proęsa*, *Provęsa*, *novēllum* *noēl novēl*, *novēmbrem* *noembre novembre*, *pavōnem* *paōn*, *pavōrem* *paōr* (cf. § 55, V).

1. The perfect endings -avi etc., -ivi etc. had lost their v in Latin. For avia, etc., see § 87, β.

2. *Abans*, beside *avanz*, *avan* *ab ante*, apparently shows the influence of Pr. *ab* = *apud*. *Abet* *abiētem* (§ 40, 1) is unexplained: cf. Italian *abete*. *Abora* is a Provençal

compound of *ab* and *ora*. *Trap*, beside *trau* *trabem*, is doubtless from the nominative *traps* *trabs*, which seems to have been differentiated in meaning from the V. L. nominative *trabis*.

3. *Brey*, *grey*, *ney*, beside *breu* *brëvem*, *greu* **grëvem*, *neu* *nïvem* (cf. § 25, 1, e), have been subjected to the attraction of *grey* *grëgem*, *ley* *lëgem*. *Greug* is a post-verbal noun from *greuiar* **grëviare*.

4. *Natiz* = *natius* *nativus* seems to have been influenced by *mestis* *mixticius*. *Massis* is from **massicius*.

5. *Paziment* = *pavamen* owes its *z* perhaps to the analogy of *aizimen*.

6. In purely learned words, *b* and *v* were written as in Latin: *diabol*, *diluvi*.

C, from the 4th to the 6th century, was voiced to *g*, and then developed like any other *g*. See *G*.

1. After *au*, apparently, *c* did not change: **auca* (**avica* *avis*) *auca*, *pauca* *pauca*, *rauca* *rauca*, **traucare* (? **trabucare*) *traucar*. Cf. § 65, P, 3.

2. In purely learned words, *c* remained unchanged: *vocal*. *Alucar* *aluchar*, *aluc* seem to be learned formations patterned after *antelucanus* and Low Latin *lucanus*.

C', when it became contiguous to a consonant, through the fall of the unaccented vowel of the penult, was reduced to *i*: *cöcëre* *cquire*, *dīcëre* *diire* *dire*, *dīcītis* *ditz*, *facëre* *faire*, *facīmu(s)* *faim*, *facītis* *faitz*, *fēcëram* *fëira*, *fēcërunť* *fëiron*, *gracīlem* *graile*. When it remained intervocalic, it was assibilated during the transition period (§ 55, *C*); in most of the Provençal territory it became *dz*, which during the literary period was simplified to *z*; but in some dialects of the south and the northwest it resulted in *idz* (later *iz*), an *i*-glide having developed before the consonant while it was still palatal: *aucëllum* *auzël*, *jacëre* *iazër*, *līcëre* *lezër*, *lūcëre* *lüzër* *lüzir* *lüisir*, *placëre* *plazër* *plaizër*; *crūcem* *croz* *croiz* *crois* (see §§ 63, 64), *dīcere* *dizer*, *dīcit* *ditz* *dis*, *dūcit* *dütz* *düs*, *facit* *fatz* *fas*, *jacet* *iatz* *ias* *iays*, *pacem* *patz* *pas* *pais*, *placet* *platz* *plas* *plais*, *verācem?* *verais*, *vōcem* *vōtz* *vōiz*.

1. *Aucel*, beside *auzel*, perhaps belongs to a dialect in which *c'* was not voiced after *au*: cf. C, 1. See § 80, Bc'.

2. *Iasser*, beside *iazzer*, seems to be due to *ias jacet* and *iassa jaceat*.

3. For *desma deima*, see S, 1.

4. In purely learned words, *c'* ts: *acīdum aci*.

D, in a part of the west, remained unchanged; elsewhere, during the Vulgar Latin period, it opened into *ǫ*, which fell in the 11th century and earlier in parts of the north and east, and in the rest of the Provençal territory became *z* as early as the first part of the 12th century: *audīre* *auzir* *auir* *audir*,^[44] *audit* *au*,^[45] *cadit* *ca*, *crudēlem* *cružel* *cruēl* *crudēl*, *fīdat* *fia*, **gaudo* *gau*, *hōrrīda* *qreza*, *hōrrīdum* *qre*, *laudo* *lau*, *alauda* *lauzeta* *laudeta*, *rīdat* *ria*, *tradēre* *trazir* *trair* *tradir*, *vidēre* *vezer* *ver* *veder*, *vīdet* *ve*. When *ǫ* became contiguous to a following consonant (except final *s*), it changed to *i*: *divīdēre* *divire*,^[46] *traditōrem* *traidor* (which, influenced by *trair*, was pronounced *traīdor*).

^[47]

1. *Crey*, beside *cre crēdo*, follows *dei dēbeo*, *vei vīdeo*. *Mercey*, beside *merce mercēdem*, shows the influence of *grey grēgem*, *lei lēgem*, and perhaps French *fei fīdem*. Cf. β, (3).

2. *Grau* = *gra gradum*, *niu* = *ni nīdum* belong to the Catalan dialect, in which *ǫ* fell before the 8th century: *gradum građu* *gra-u grau*, the *u* being preserved through combining into a diphthong with the *a*.

3. In purely learned words, *d* remained: *odi ōdium*.

F is very rare (cf. § 59). The few examples appear to show that *f* (presumably in the 6th century or earlier) became β, and then developed like any other β (see β): *Stēphānum* *Estēve*, *co(n)fortāre?* **coβortar* **coortar* *conortar* (through the common use of the double forms, *con-*, *co-*), *gryphum* *griu*, *raphānum* *rave rafe*, **refusāre* *rehusar* *refusar*, **prefūndum* (= *pro-*) *preon*. Nevertheless, *cofin cōphīnum*, *defors*

de fōris, grifō, profieḡ *profēctum*, rafe, would seem to indicate that in some words, possibly less popular at the outset, f was retained.

1. In purely learned words, f was kept: *antifona*, *Caifas*, *philozophia*.

G, representing original c and g, had a varied development.^[48] For the fall of g in some words in Vulgar Latin, see § 55, G.

(1) Before a, g remained in the greater part of the territory, but in the north and east it early became y; and this y was generally retained in the eastern dialects (often fusing with a preceding i), while in most of the northern it developed into dž (cf. Y): *amīca* amiga amiia amia, *dīcam* digā dia, *mīca* miga miia mia,^[49] *pacāre* pagar paiar, *precāre* pregar preiar; *castigāre* castigar castiar, *legālem* leial leyal lial, *ligāmen* liam, *līgātum* legat liat, *plaga* plaga plaia, *regālem* reial, *rūga* rūa.
^[50]

(2) Before o and u (ü), g was preserved, except in a few words which (doubtless in Vulgar Latin times) lost it either in all or in many dialects: *acūtum* agüt, *secūndum* seḡon, *secūrus* seḡürs; **a(u)gūrium* agür aür, *a(u)gūstum* aḡost^[51] aḡošt, proclitic *ēgo* ęu, **fagōttum* fagōt, *figūra* figūra, *Hugōnem* Uḡo. For a g that becomes final or contiguous to final s, see § 63, (6): *amīcus* amics amis, *Auriācum* Auriac, *cōcum* (= *cōquum*) cōc, *jōcus* iōcs, *Ludovīcum* Lozoic Lozoi, *prēco* pręc; *castīgo* chastic chasti.

(3) Between the last two vowels of a proparoxytone, g, early in the Provençal period, became y, which developed into dž before the literary epoch; cf. § 49, (4): *clērīcum* clērge, **coratīcum* coratge, *domīnīcum* diḡenge, *manīca* mania, *mēdīcum* meḡe, *mōnāchum* monge, **paratīcum* paratge, *viatīcum* viatie. In some dialects, however, the

vowel of the penult, after liquids and nasals, fell too early for the *g* to become *y*: *clērgue*,^[52] *esta(t)ga*, *mętgue*, *mongue*.

1. *Amiu*, *chastiu* belong to the dialect of Forez; so perhaps *fau* *fagum*, *preu* *pręco*. These forms indicate a very early fall of the *g* in the dialect to which they belong. Cf. § 51, 3.

2. In purely learned words, Latin *g* remains unchanged: *paganōrum* *paganor*.

G' became *y* during the Vulgar Latin period (§ 55, *G*). See *Y*.

1. In purely learned words the letter *g* was retained, but it was doubtless pronounced *dž*: *astrologia*.

L remained: *colōrem* *colōr*, *male* *mal*, **volēre* (= *velle*) *volęr*. Before final *s*, *l* became *u* in most dialects, in some as early as the 10th century: *malos* *maus*, *talis* *taus*; *l* was written, however, long after *l* had been vocalized. Under the influence of forms in which *-ls* *-us*, final *l* became *u* in the southwest and in some other regions: *Aprīlem* *abriu*. Cf. § 74, (2). *Au* *-al* is common in William of Poitiers.

1. For Gascon *l* *r*, see § 10.

2. *Orifan*, beside *olifan* *elephantem*, is probably French.

L' will be considered, as *ly*, under Groups, § 73, *Ly*.

M remained: *amāre* *amar*, *hōmo* *om*, *timōrem* *temōr*.

1. Occasionally *-am* rhymes with *-an* (*afan*: *fam*, *portam*: *avan*); this seems to show an indistinct pronunciation of the final nasal in some dialects. Cf. *aven* = *avem* *habēmu(s)* in the *Nobla Leyczon*. Cf. § 167, 2.

N remained: *bōnas* *bonas*, *donāre* *donar*, *lūna* *lūna*. For *n* final or contiguous to final *s*, see § 63, (5): *fīnis* *fis fins*, *panem* *pa pan*.

1. In *canorgue*, *dimergue*, *morgue*, etc., beside *canonge*, *dimenge*, *monge*, etc., the *r* may be explained partly by dissimilation, partly by the analogy of *clergue* and of words with double forms (§ 87).

2. *Menhs meins*, beside regular *mens minus*, show the influence of the alternative forms *genhs geins* and *gens* from *ingĕnium* (see § 73, Ny).

3. *Iassey* (= *iasse*, the latter part of which may be from *exín = exĭnde*), *tey* (= *te tĕnet*), used by Marcabru, are doubtless due either to a mistaken imitation of conventional borderland forms (see § 25, 3) or to the analogy of *crei = cre crĕdo* (*crei* itself being due to the analogy of *dei dĕbeo, vei vĭdeo*).

N´ will be considered, as ny, under Groups, § 73, Ny.

P, from the 4th to the 6th century, was voiced to b: *capĭllum cabĕl, rĭpa riba, *sapĕre (= sapĕre) sabĕr, trepalium trebalh; capit cap* (§ 63), *sapis saps*.

1. In some borderland dialects p v, as in French: *saver. Evescat, evesque*, beside *bisbat, bisbe*, are French.

2. *Apud*, used as a proclitic, became for some reason in Vulgar Latin **apu*, which developed regularly into **abu* and, after the fall of intertonic vowels, *ab*. This *ab* assimilated its b more or less to a following consonant, becoming *ap* before voiceless consonants, *am* before nasals; *am*, used before dentals, became *an*: hence we have four forms, *ab, ap, am, an*. *Amb* perhaps developed first from *am* before l, as in *am l'autre*; when used before a consonant with which mb did not readily combine, it expanded into *ambe*. See Elise Richter, Zs., XXVI, 532; J. Huber, Zs., XXX, 583.

3. In some dialects, apparently, p was not voiced after au: *sapuĕrunt *sapwĕrunt *saupĕrunt saubron saupron*. Cf. § 65, C, 1.

4. In purely learned words, p remains: *epifania*.

R remained: *amāra amara, durāre dūrar, ĕrat ęra*. Final rs was reduced to s, in most dialects, during and after the literary period: *priōres priors prios (Girart)*; the reduction apparently began in Limousin as early as the 12th century (Bertran de Born rhymes iōs and flōrs).

1. Final r began to fall in many dialects in the 14th century. At present it has disappeared all through the south and west: *amōrem amou, flōrem flou*.

2. In some dialects (especially those of Gard and Hérault) intervocalic r and z were confused, probably during the literary period: *gyrāre girar gisar*; conversely *audĭre auzir aurir*. Cf. *Revue des langues romanes*, XL, 49, 121.

S was voiced to z, probably from the 4th to the 6th century: *pausa* *pausa*, *presēntem* *presen*; *rīsum* *ris* (§ 63).

1. An s that became contiguous to n was changed, in a few dialects, to r: *almosna* *almorna*, *disnar* *dirnar*. In modern Limousin and some of the dialects of Dauphiné, Languedoc, and Gascony, s has disappeared before nasals: *asne* *ane*, *caresma* *carema*, *disnar* *dinar* (so *blasmar* *blamar*, *desma* *dema*); the fall began during the literary period. S before a consonant in many of the modern dialects, and final s in some, has become i: *asne* *aine*, *caresma* *careima* (so perhaps *desma* *deima*, *pruesme* *prueime*); some traces of this change occur in texts of the literary period. Cf. Zs., XXIII, 413. *Isla*, in Limousin, became *ilha* (perhaps through *iyła*); cf. Zs., XXIII, 414. Cf. § 78.

2. In some southeastern dialects intervocalic z after au has changed to v: *causa* *cauva* (so *auzir* *auvir*); possibly the *auvent* of the *Boeci*, v. 23, is to be connected with this.

T, from the 4th to the 6th century, was voiced to d: *amāta* *amada*, *natālis* *nadals*, *servitōrem* *servidōr*; *habētis* *avētz* *avēs* *avēt* (§§ 63, 64), *latus* *latz* *las*, *natum* *nat*. For a t which became contiguous to r (*amātor* *amaire*), see § 52, (1), and § 70, Tr.

1. In some dialects of the south and southeast, final t fell shortly after the literary period: *amātum* *amat* *ama*.—*Appoestat* is French.

2. *Tōtus*, in Gaul, became *tōttus* as early as the 4th century: hence Pr. *tota* *totas*. For *meteis* *met-īpse* see § 131, (2).

3. *Espaza* (beside *espada*) *spatha*, was perhaps influenced in its pronunciation by the spelling of the Latin word.^[53] *Ez*, coming from *et* before a vowel, shows the influence of *az* (*ad* + vowel) and *quez* (*quīd* + vowel). *Grazal*, ‘grail’, is perhaps a cross between **cratella* *crater* and *gradale*, ‘service-book’; so *grazale*. *Grazir* *grazire* (cf. *agradar*) is perhaps altered from an earlier **grazar* **gratiare*. *Mezeis* *met-īpse*, *mezesmes*, *meesmes* (beside *medesmes*) **met-īpsīmus* have been subjected to the analogy of *ez* and *quez* *quīd* or of *īd* *īpsūm*: § 131, (2).

4. In some dialects *tī* became a sound written *h*: *peccatī* *peccah*. See § 51, 1.

5. In purely learned words, t remains: *eternal*.

W will be considered, as gw, under Groups, § 72, βw.

X is a symbol for ks: see Groups, § 79, Ks.

Y, representing Latin dy, g', gy, j, and z (cf. § 55, G, Y; § 57, Z) had a varied development.

(1) When it became contiguous to a following consonant (§§ 45, 49) it changed to i: *adjutāre* *ayudāre* ay'dar aidar, *medietātem* meitat; *cōgitāre* cūidar, *frīgēre* frire, *lęgēre* lęyre, *propagīnem* probaina, *rīgīda* rēida, **tragēre* traire; *bajūlus* bailes.

(2) When it remained intervocalic, it became dž in most of the territory, but in the northeast and parts of the north it was not changed:^[54] *audiam* auia, *in-ōdiare* enoiar, *invīdia* enveĩa, *invīdiōsus* enveiōs enveyōs, **gladia* glaya, *mediānum* meian, **pōdiāre* poiar, *radiāre* raiar, *sordīdior* sordeier, *vīdeat* veĩa; *fragīlem* fragel; **exagiāre* assatiar essaier essayar, *corrīgīa* correĩa correĩa, *fagea* faia faya, *regiōnem* reiō; *dīe Jōvīs* diiqus, *major* maier, *pějor* pięier, *pejōrem* peiōr, *trōja* trqia; *baptizāre* bateiar. For a dž or a y that became final or contiguous to final s, see § 63, (1), (2): *audio* auch, *in ōdio* enueğ (plural enuețz enueğ) enqi, *gaudium* gauch, *gladium* glai, *mēdium* meğ meĩ, *hōdie* qi, *pōdium* puę pqi, *radium* rai; *fūgit* fūg fūi, *grēgem* greȳ, *lēgem* lę (pl. lęitz) lei, *lēgit* lię, *magis* mais,^[55] *rēgem* rēi, *exagium* essai; *pėjus* pięis.

(3) Before accented e or i, y disappeared (doubtless in Vulgar Latin: § 55, G), except in some western dialects, where it became dž: *vagīna* guaĩna, **legīre* (= *lēgēre*) legir,^[56] *magīster* maęstre maięstre magestre, **pagē(n)sis* paęs paęę, *regīna* reĩna, *sagītta* saęta saięta saęta.

1. *Detz ditz* *dīgītus* are irregular and unexplained. The word is irregular in some other Romance languages, notably in Italian. Cf. Gröber's *Grundriss*, I, p. 507.

2. *Glavi*, beside *glai* (and learned *glazi*) *gladium*, is supposed by some to show the influence of Celtic *cládibo*. Cf. Körting; also H. Schuchardt, *Zs.*, XXV, 345.

3. *Messér* seems to be a contraction (due to proclitic use) of **messeyer* = *mes*, ‘my’, + **seyer*? **sēyor* = *sēnior* (cf. A. Lindström, *L’analogie dans la déclinaison des substantifs latins en Gaule*, 1897-8, pp. 292-3).

4. In purely learned words, *di*, *g*, *gi*, *z* are retained, the *g* being pronounced presumably as dž, the *z* as z: *odi*, *fragil*, *regio*, *canonizar*.

MEDIAL GROUPS.

66. Medial groups may be conveniently classified as follows:—A. *Double Consonants* (1); B. *Groups of Dissimilar Consonants*: groups ending in *l* (2), groups ending in *r* (3), groups ending in *w* (4), groups ending in *y* (5), groups beginning with *l*, *m*, *n*, *r*, or *s* and not ending in *l*, *r*, *w*, or *y* (6), all other groups (7). This order will be followed.^[57]

1. It should be noted that the prefixes *ad-*, *sub-* regularly assimilate their *d* or *b* to the following consonant: **ad-rīpāre* *arribar*, *sub-venīre* *sovenir*. *Sosrire*, *sosterrar*, *sostraire* show a substitution of prefix, due, no doubt, to the analogy of *sospirar*, *sostener*.

1. DOUBLE CONSONANTS.

67. In general, the double consonants became single, in the 9th or 10th century (perhaps earlier before the accent), but underwent no other change save those described in §§ 63, 64: *abbātem* *abat*, *sīccum* *seç*, *rēddo* *reț*, *affībulāre* *afiblar*, *aggregāre* *agregar*, *flamma* *flama*, *pīnna* *peņa*, *cappa* *capa*, *passum* *pas*,^[58] *mūtum* *mot*, *advenīre* **avvenīre* *avenir*.

(1) *Cc* before *a*, in the east and northeast, became *tš*; elsewhere, *c*: *būcca* *boca* *bocha*, *vacca* *vaca* *vacha*.

(2) *Ll*, in some southern dialects, became *l’*; elsewhere, *l*: *capīllum* *cabeł* *cabełh*, *grīllum* *gril* *grilh*, *mantēllum* *mantel* *mantel̃h*, *villānus* *vilas* *vilhas*. It is possible, however, that *-llī* regularly became *l’* in

Limousin, while *ll* before other vowels was not palatalized: *caballum* caval, *caballī* cavalh; *illi* ilh, *illōs* ɛls; this would account in part for the frequent occurrence of *lh* in the poems. So in some dialects -*nnī* n': *annī* anh. Cf. § 51, 1. For final *ls* and *l*, see § 65, L: *illos* ɛls ɛus, *vallem* val vau. For Gascon *l* r, see § 10: *appēllat* apɛla apɛra.

(3) *Rr*, when intervocalic, seems generally to have been distinguished from *r* during the literary period and later: *cūrrēre* cɔrre, **corrūptiāre* corrossar, *errāre* errar, *tērra* tɛrra. Occasionally, however, *rr* is found in rhyme with *r*.

2. GROUPS ENDING IN L.

68. The groups of two consonants will be treated in alphabetical order. It will be seen that *bl*, *rl*, *sl* remained unchanged; *ml* developed a glide consonant between its two members; *pl*, *tl*, *βl* and *yl* respectively voiced, assimilated, and vocalized their first element; while *cl*, *gl* were fused into *l'*. For an explanation of this last phenomenon, see § 79.

Bl *bl*: *nēbŭla* nɛbla, **oblītāre* oblidar, *sabulōnem* sablɔn.^[59]

βl *ul*: *fabŭla* **faβla* faula, *sibilāre* **siβlāre* siular, *tabŭla* **taβla* taula.

Cl *l'*: *genŭcŭlum* genɔlh, *ōcŭlum* ɔlh, *sītŭla* **sīcla*^[60] sɛlha, *větŭla* *vēcŭla*^[60] vɛlha. In learned words we find *gl*, *cl*: **e(c)clēsia* glɛiza, *joculārem* iɔglar, *sæcŭlum* sɛgle sɛcle.

C'l *il*: *gracīlem* graile.

Dl *dl*, which during the literary period became *ll* and then *l*: *mōdŭlum* **mɔdle* mɔlle.

Gl l': *rēgŭla* reŭha, **strīgŭla* estreŭha, *vīg(ī)lat* veŭha. *Lēula* *lēgŭla*, *teŭla* *tēgŭla* are irregular: cf. *Archivio glottologico italiano*, XIII, 439, 459.

Ml mbl: *sīmīlāre* semblar, *trēmŭlat* trembla. In *sembrar* we find an r l due perhaps to the analogy of *membrar* *memorāre*. In *semel* gives ensemble essem̃s.

Pl bl: *cōpŭla* cōbla, *dŭplum* dōble. Learned words have pl: *duplicar*.

Rl rl: *Carōlus* Carles, *hōrolōgium* orlqi, **paraulare* parlar.

Sl sl: *ī(n)sŭla* isla. For *ilha*, see § 65, S, 1.

Tl tl, which during the literary period became ll and then l: *rōtŭlum* rōtle rōlle, *spathŭla* espatla espalla espala. In really popular words tl had become cl in Vulgar Latin.^[61]

Yl il: *bajŭlus* bailes. Cf. § 65, Y, (1).

69. A group of three consonants remained unchanged, except that double consonants became single: *ambulāre* amblar, *implēre* emplir, *avŭncŭlus* avōncles, *cīrcŭlus* cērcles, *masculus* mascles, **afflammāre* aflamar, *inflāre* enflar, *ŭngŭla* ōngla, *emplastrum* emplastre.

1. *Selcle*, beside *cercle*, seems to show an assimilation of the r to the l of the next syllable. *Empastre*, beside *emplastre*, has been influenced by *pasta*. *Emblar* is probably from V. L. **imbolare* = *involare*.

3. GROUPS ENDING IN R.

70. The groups of two consonants will be treated in alphabetical order. It will be seen that br, gr, lr, nr generally remained unchanged; mr, sr, zr (and

sometimes lr, nr) developed a glide consonant; cr, pr voiced, and βr, c´r, dr, tr, yr vocalized their first element.

Br br, also ur, occasionally ir (through ür): *fabrum* fabre faure^[62], *fěbrem* fěbre feure, *lībra* liura; *Octōbrem* ochøyre. For brg, see § 80.

βr ur, occasionally ir: *bīběre* bẹure, *débēr’ hábeo* deβr’áyo deurái, **rōbōrem* rọure rọire; **mōvēre* (= *mōvēre*) mquire, *plōvēre* plquire.

Cr gr: *acrem* agre, *lacřma* lagrema, *lŭcrum* lọgre, *macrum* magre, *sacrāre* sagrar, *sōcrum* sọgre.^[63] In late learned words we find cr: *secret*.

C´r ir: *cōcěre* cọire, *dīcěre* dire, *dŭcere* düire, *facěre* faire. Cf. § 49, (1).

Dr ōr ir: *divīděre* devire, *quadrum* caire, *vidēr’ hábeo* veđ’r-áyo veirái. After au, apparently, ō simply disappeared: *clauděre* claure. Late learned words have dr: *quadrupedi*.

Gr, in popular words, was reduced to r in Vulgar Latin in parts of the Empire *fra(g)rāre* *frarar *flarar flazar, *intě(g)rum* entęr entięr, *nŭ(g)rum* nęr nięr,^[64] *pere(g)rīnum* peleri, *pŭ(g)rĭtia* pereza; these forms occur in Gascony, Rouergue, and Limousin, but forms with gr are found in the same region. Elsewhere, in these same words, and everywhere, in more bookish words, gr remained in Vulgar Latin; this gr was kept in most of the Provençal territory, but was changed to ir in Dauphiné, Auvergne, and Languedoc: *fragrāre* flairar, *integrāre* enteirar, *intěgrum* entęgre entęir,^[65] *nŭgrēscěre* negrezir, *nŭgrum* nęgre nęir,^[65] *peregrīnum* pelegri, *pŭgrĭtia* pigreza. Purely learned words have gr everywhere: *agricultura*.

G'r: see Yr.

Lr usually remained unaltered, but in some dialects became ldr^[66]: *vālēr'* *hábēo* valrai valdrai, **vólēr'* *hábēo* volrai voldrai.

Mr mbr: *camēra* cambra, *memorāre* membrar, *nūměrum* nōmbre.

Nr usually remained unaltered, but in some dialects became ndr^[66] *cīnērem* cēnre cēndre, *dīe Vēnēris* divenres divendres, *in-gēnerāre* engenrar, *Henrīcum* Enric, *expōnēre* esponre espondre, **gēnērem* (= *gēnus*) genre, *gēnērum* genre gendre, *honorāre* onrar ondrar, *tenēr'* *habeo* tenrai tendrai, *venīr'* *habeo* venrai vendrai.

Pr br: *capra* cabra, *cūperāre* cobrar, *erīpēre* erebre, *ōpēra* qbra, *pauper* paubre, **pīperāta* pebrada, *recīpēre* recebre, *sūperāre* sobrar, *sūper* sōbre. Purely learned words have pr: *caprin*. It is uncertain whether *paupre* (beside the usual *paubre*) is a Latinism or represents some dialect in which au prevented voicing.

Sr str: **ēssēre* (= *ēsse*) ęstre. For ęsser, see § 49, (2).

Tr dr ōr ir: *amātor* amaire, *fratrem* fraire, *latro* laire, *mater* maire, *ūtērem* ōire, *pētra* peira, *Pētrus* Peires, *petrōnem* peirō, *petrōsus* peirōs, *pre(s)bŷtērum* (Einf., § 140) preveire, *servītor* servire, *vītrum* veire. Learned words have dr and tr: **poenītēre* *penedre* (*penedir*), *impetrāre* *impetrar*.

Yr ir: *frīgēre* frire, *lēgēre* leyre.

Zr zdr: *mīsērunt* + **mīssērunt* **mežron* mešdron.

1. *Redebre* (beside *rezemér*) *redīmere* has apparently been influenced by *recebre*. The Burgundian *sor* for *sobre* comes from the prefix *sūr-* (*sūr-rīdēre*, etc.). *Perri* **pētrīnum* is probably French.

71. A group of three consonants nearly always remained unchanged, except that double consonants became single: *ŭmbra* ombra, *arbōrem* arbre, *sepŭlcrum* sepulcre, **canc(e)rōsus* cancroș, **addīrēctum* adreșit, *fŭndēre* fōndre, *ardēre* ardre, **offerīre* offrīr, **Hungarīa* Ongria, *rŭmpēre* rōmpre, *apprēssum* aprēș, *asprum* aspre, *ŭltra* ȕltra, *intrāre* entrar, *mo(n)strāre* mostrar, *mīttēre* mētre. Lβr and rg´r, however, regularly became ldr and rdr, and llr became ldr to the same extent as lr (q. v.): *absōlvēre* absōldre (*absolvre* is probably a Latinism), *pŭlvērem* pōldre; **dē-ēr' gēre* dēdre; *tollēre* tȕltre tȕldre. Rmr became rbr in *marmor* marbre (also marme). Prendre often became penre (perhaps to distinguish it from pendre *pēndēre*) through the analogy of genre gendre, etc.; the first r having been lost by dissimilation.

1. The four-consonant group sbtr is reduced to str in *prestre* prēșbȕter. *Prever* is perhaps a proclitic syncopation of a V. L. **preβiter*. Cf. § 78, 1.

4. GROUPS ENDING IN W.

72. This class includes not only Latin gu, qu, but all combinations of consonant + u, cf. § 40, (2). A w thus evolved seems to have developed like Germanic w (cf. § 56, W): it became gw (assimilating the preceding consonant, unless that consonant was a liquid or a nasal), and then was reduced, before the literary period, to g, cf. § 62, (2). Pw, however, had a quite different history, owing, on the one hand, to the affinity of its two labial elements, and, on the other, to the stability of the voiceless stop, which prevented the assimilation that we find in βw ww.

1. G. Körting (Zs., XXII, 258) would explain through the analogy of the perfects in -cui all other perfect forms which in Provençal have g and c corresponding to Latin -ui etc.

βw ww gw g: *habuīssem* aguș, *dēbuit* dēç (§ 63); **co(g)nōvuit* (cf. Meyer-Lübke, *Gram.*, II, p. 357) conȕç, **crevuīstī*

creguist, ***movuisset** mogues, ***plövuist** plqc. We seem to have the same combination in Germanic *treuwa* tręgua tręga (*treva* is probably French).

1. The diphthong of *aic* = *habuī* is probably not a phonetic development. The first and third persons of the preterit, *aic* and *ac* (*habuit*), have been differentiated after the pattern of the present—*ai* and *a*.

Dw gw g: ***sěduit** sęc.

1. *Vezoa* *vīdua* must be an early learned word: *veuva* is perhaps from *veua* *veuđa* *veđua*.

Kw gw g: *antīqua* antiga, *ěqua* ęga, *æquālem* egal (*engal* has received through a mistake in etymology the prefix *en-* or *e-* *in-*), *nōcuit* nqc, *placuistī* plaguist, ***sěquēre** (= *sěqui*) sęgre, ***sequire** *seguir*, *tacuiſsem* taguęs.

1. Several words show a different development: cf. *Ltblt.*, XXIV, 335; *Zs.*, XXVIII, 381. In *aqua* (or *acqua*) and *aquīla* (or ***acquīla**) the first consonant became, for some reason, a spirant, which later changed to i: *aḡwa* *aiwa* *aigua* *aiga*, *áḡwila* *áiwila* *áigwila* *aigla*. So *aiglentina*. These same words show irregularities in other languages. Perhaps the dialect form *eigal* (Auvergne, Arles) for *egal* is to be explained in the same way; but the *ei* here may be analogical.

2. In several words *kw* was reduced to *c* (or *c'*) in Vulgar Latin: *coquēre* (+ *coccus*) *cōcēre* *cqzer*, *tōrquēre* ***tōrquēre** (+ ***tōrco** ***tōrcunt**) ***tōrcēre** *tqrser*. Cf. § 55, W.

Lw lgw lg: *caluit* calc, ***toluistī** tolguist, *valuisssem* valguęs, *vōluěrunt* (§ 16, 2) vqlgron.

Nw, ngw, nkw ngw ng: *těnuist* tęc, ***venuisset** venguęs; *sanguem* sanc; *cīnque* (= *quinque*) cinc.

1. *Tęuns* *těnuis* is probably a learned word; the transposition of *u* and *n* may have been due originally to a misreading of the letters. *Ianuer*, *manual*, etc. are learned. *Maneira* is apparently from a Vulgar Latin ***man(u)aria** from *manuarius*. For *enquerre* *inquærēre*, see § 59.

2. *Exstinguere* (+ **exstingo* **exstingunt*) **estingere* estenher.

Pw upw up ub: *sapuisset* saubeș, *recipuit* recepuș.

1. *Saupes* apparently belongs to a dialect in which au prevented voicing. Cf. § 65, P, 3.

Rw rgw rg: *mēruit* mērc.

Sw seems to have been reduced early to s in *consuetudinem* **costūmen* costūm (costūma). *Cōnsūo* apparently became **cōsio*, whence an infinitive **cōsēre* or **cosīre* (Pr. cōzer, cosir).

Tw dw gw g: *pōtuit* pōc.

1. *Ba(t)tuo*, *qua(t)tuor* were reduced to *batto*, **quattor* in Vulgar Latin: Pr. *bat*, *quatre*.

5. GROUPS ENDING IN Y.

73. This class contains: 1st, combinations of consonant + y ē or i, cf. § 40, (2); 2d, consonant + g' y (§ 55, G), the g' having been in some cases always contiguous to the preceding consonant, in others originally separated from it by a vowel; 3d, consonant + g y, the g representing an original c or g between the last two vowels of a proparoxytone, cf. § 65, G, (3). It does not include dy and gy, which early became y: see § 65, Y. See § 63, (1). The groups will be considered in alphabetical order:—

Bry bry in *ebriācum* ebriac (*iure* is probably French).

βy was early reduced to y in *habeo habeam* etc. and *dēbeo dēbeam* etc., partly, no doubt, through the proclitic use of these words, partly under the influence of *audio* **auyo audiam* **auya* and *video* **veyo vīdeam* **veya*; this y, like any other medial y (§ 65, Y), became džy or remained y: ai (for some reason there seems to have been no form **ach*), aia; deī dech, deia. Aside from these words, βy udž and uy apparently in the north; elsewhere uy, by, vy—uy prevailing in the west, by and vy in the

south and east. When the y became final, it changed to i, which, after a consonant, was syllabic. Ex.: *abbrēviat* abreṽuia, **aggrēviat* agreṽuia, *allēviat* alēuia, *aviōlum* aviql aiql, *cavēa* gabia cauia, *labia* lavias, **leviarius* leugięrs, **rabiā* (= *rabiem*) rabia rauia,^[67] **rabiāre* rabiār, *rabiōsus* rabiōs rauioṣ, *rūbeum* roḡ roṽi,^[68] **sabium* savi sabi, *atavia* tavia, *vidūvium* vezoiḡ bedoi.^[68] In purely learned words, Latin *bi*, *vi*, etc., are kept: *abiurament*, *fluvial*. *Brēvio* bręy: cf. § 65, β, 3.

Cc'y: see C'y.

Cly l': *coclearium* cuilhięr.

Cty is: *factiōnem* faissō, *lectiōnem* leissō, *suspectiōnem* sospeissō. In purely learned words we find the spellings *cti*, *cci*, which doubtless indicate *ktsy* or *ksy*: *electio*, *accio*. Cf. Ssy.

C'y, cc'y, kwy ts; this ts, when it remained medial, was reduced, before and during the literary period, to s: *bracchia* brassa, *bracchium* bratz bras (§ 64), *faciam* faza fassa, *faciem* fatz fas, *glaciem* glatz glas^[69], *laqueāre* lassar, *laqueum* latz las, **pēcīa* pęssa, *placeam* plassa. Learned words have *zi* and *ci*, doubtless pronounced at first *dzi*, *tsi*, later *zi*, *si* (cf. A. Horning, *Zs.*, XXIV, 545; XXV, 736): *iuzizi iudici*, *edifici*, *Grecia*. Cf. Pty.

D-g dž: *jūdīco* iūtge, *mědīcum* męge, **sědīcum* sęie^[70].

Dy: see § 55, Y and § 65, Y.

Gdy: see § 80, Gd.

Gy: see § 55, Y and § 65, Y.

Kwy: see Cy.

Lc'y lts uts us: *calceāre* caussar. Cf. Lty. See § 74, (2).

Lg' apparently became ldz udz uz in **fūlgërem* (= *fūlgur*) fōuzer.

Ll-g' l' in *cōlligit* cuēlh. Cf. Ly.

Lly: see Ly.

Lny n': *balneum* banh.

Lty lts > uts us: **altiāre* auçar aussar. Cf. Lc'y. See § 74, (2).

Lvy lby uby in *salvia* saubia (Gascon).

Ly, lly l': *consilium* cosselh, *filium* filh, *filia* filha, *nūllī* + vowel nūlh. Learned words have *li*: *familiarmens*. *Lili liri lire līlium* are doubtless learned; *lis* is French.

Mby mby, mdž, and ndž; mdž being the usual form in the literary language: *cambiāre* camiar caniar cambiar.

Mmy my, mdž, and ndž: *commeātus* comiatz coniatz.

Mny n' in Limousin and in the extreme east and southwest, elsewhere ndž: *somniāre* sonhar soniar. *Somni*, beside *suenh songe*, is learned.

Mply mply in *ampliāre* ampliar, probably learned.

My my and n': *sīmia* simia, *vindēmia* vendemia vendanha.

Nc'y nts ns: **Francia* Fransa. Cf. Nty.

Nd-g ndž: **pěndīcat* penia, *vīndīco* vënie. Similarly *mandūcāre* **mandugare manduyare mandyare* maniar^[71].

Ndy n': **Burgūndia* Borgonha, *verecūndia* vergonha.

N-g ndž: **excommīnīco* (= *excommūnīco*) escomenie^[71], *mōnāchum* monie.

Ng' n' and ndž: *jǔngěre* iŋher iŋger, *ǔngěre* ɔnher ɔnger, *plangěre* planher planger, *pǔngěre* pɔnher pɔnger. *Angel* is probably learned.

Ng'y ndž: *spǒngia* esponia.

Nny n': *stanneum* estanh.

Nty nts us: *cantiōnem* cansɔ, *comĩn(i)tiāre* comensar, *sperantia* esperansa. Purely learned words have *nti: essentia*. Cf. Nc'y.

Ny n': *extraneum* estranh, *těneo* tenh, *věniat* venha. Before or during the literary period final n' or n's lost its palatal quality in many dialects: *ingěnum* genh gen. If *estraniar* comes from *extraneāre* (and not from **extranicāre*), it must be a word of later adoption; so *estrangier*. In *sotran* *subterraneum* there is probably a change of suffix.

Pry probably became regularly bry: *capreolum* **cabriql* cabirql (cabrql seems to be a new formation from *cabra*). *Coyre* ? *cǔpreum* is unexplained.

Pty ts, which, when it remained medial, was reduced, before and during the literary period, to s: **captiāre* cassar, **corrūptiāre* corrossar, *něptia* nɛssa, **nǒptias* (§ 38, 2) nɔssas. Cf. C'y.

Py remained py in the west and a part of the south, and elsewhere became ptš, later tš: *apium* ache api, **apprōpiat* (*prōpe*) aprɔpcha aprɔcha aprɔpia, *sapiam* sapcha sacha sapia, *sapiěntem* sachent sapient, *sēpia* sɛpia. *Asabentar* is from sabɛn. *Piion* *pipiōnem* is French. Learned words have *pi: copia*; but *mancĭpium* *mancip* massip.

Rc'y rts (rs?): *urceolum* (Zs., XXVI, 668) orzql.

Rdy rdz: **dis-tardiat* destarza. Ordi = *hördeum* is perhaps from the genitive *hördeī*, as in *tres modii hordei*, etc.

R-g rdž: *clěrīcus* cleries.

Rg' rdž and rdz (rz): *argēntum* argen, **burgē(n)sis* borğes borzēs (also *borgues*, under the influence of *borc*), **dē-ērigit* dērs, **dē-ē(i)gěre* dērzer (also *derdre*: § 71), *sürgěre* sörger sörzer, *sürgit* sörtz.

Rny rn': **Arvērnium* Alvērnhe.

Rr-g rdž: **carrīcat* caria.

Rry ir: *porrum* **porreum* poyre; but **horrearium*? orgiēr (cf. Körting).

Rt-g rdž and rts (rs): **excōrtīcat* escōria escōrsa.

Rty rts rs **fortiāre* forsar, *tērtium* tērz tērs. *Convercio* is learned.

Rvy rvy rby: **cěrvia* cervia cerbia.

Ry r', which developed into ir when it remained medial, but became r at the end of a word^[72]: **exclariāre* esclairar, **donatōria* donadoira, **fěria* feira fieira, *fěriat* feira, *matěria* madeira, **mōriat* mōira, *primaria* premeira premeira (§ 23, 1), **punitōria* punidoira, *varia* vaira, *variāre* vairar; **a(u)gūrium* aūr, *cōrium* cuēr, **donatōrium* donadoř, *impěrium* empiēr, *mīnistěrium* mestieř, **mōrio* mōr muēr, *monastěrium* mostieř (§ 45, 3), *primarius* premeiřs, **punitōrius* punidořs. If the ry is preceded by au, it apparently remains unchanged: *Auriācum* Auriac (Zs., XXVII, 559). Learned words have *ri*: *bori ebōreum*, *contrari*.

1. Adjectives in *-er* (*-ier*) and *-or*, coming from *-arium* and *-orium*, regularly have feminines in *-eira* (*-ieira*) and *-oira*. By the analogy of the masculine, there is a feminine in *-era* in parts of the west; by the analogy of the feminine, there is a masculine in *-eir* in Auvergne. The *i* of *vair* probably comes from the feminine *vaira* and from the verb *vairar*. The noun *feira* sometimes becomes *fiera* like a feminine adjective.

Sc'y: see Ssy.

Ssy, sc'y, sty s', which in most of the territory became *is*, but in the west and the extreme east developed into *i(t)š* and *(t)š*: **bassiāre* baissar baichar bachar, **angŭstia* engoissa, **ingrössiat* engrueissa, *fascia* faissa, **grassiāre* graissar, *pōstea* pueissas pueih püch, *ūstium* üis.

Sty: see Ssy.

Sy z', which in most of the territory became *iz*, but in parts of the northeast, north, and west developed into *i(d)ž* and *(d)ž*, and in some scattered dialects gave *y* and *z*: *basium* bais bai (§ 63), *basiare* baisar baiiar baiar bayar basar, *quasi* + vowel cais quaish, *camisia* (cf. *Archiv für lateinische Lexikographie*, XII, 265) camiza, *cerēsea* (Einf., § 103) cirēiza cirieia cerieya cerieza, *ma(n)siōnem* maison maiion maiion mayo, *occasiōnem* ochaizo, *pre(hen)siōnem* preisø (cf. *enpreyona*, 'imprisons'), *quid se* + vowel queis, Ger. *sazjan* saisir, *to(n)siōnem* toisø.

T-g dž: **coraticum* corage, **paraticum* parage, *viaticum* viatie. For *messatque*, etc., see § 65, (3).

Try apparently became *ir*: *atrium?* aire, *arbitrium* albire.

Tty ts s: **plattēa* plassa.

Ty apparently t' d' generally d'z',^[73] which in most of the west and north became *dz*, but in the south and east developed into *idz*; *dz* and *idz*, when they remained medial, were reduced, before and during the

literary period, to z and iz: **altītia* alteza, **bellītia* beleza, *malītia* maleza, *pigrītia* pereza, **prētiat* preza, **rikītia* riqueza; *palatium* palatz palaitz palais (§ 64), *pūteum* pōtz pūis, *prētium* prētz prēs, *solatium* solatz solas; *potiōnem* pozōn poizōn, **pretiāre* prezar, *ratiōnem* razō raizōn, *s(t)atiōnem* sazō saizōn. The forms without i prevail in the literary language, and in words in which the dz comes after the accent (especially in the ending -eza) they seem to have encroached largely upon the ground of the others.^[74] According to some philologists, the development of ty differed according to its position before or after the accent: for a brief bibliography of the discussion, see Zs., XXVII, 689. In learned words we find zi, ci, çī, ti: *estimatio*, *iustizia* -icia -ecia -eçia, *natio* *nacio*, *negoci*, *servizi* -ici (cf. A. Horning, Zs., XXIV, 545, XXV, 736, XXXI, 200).

1. *Palai* (beside *palatz* -aitz -ais) may have been made from *palais* (used by Bertran de Born and in *Flamenca*) by dropping the s which was regarded as an inflectional ending. It was perhaps influenced by such words as *bais* *bai*: cf. Sy. A clerical Latin **palasium*, however, would account, not only for *palai* *palais*, but also for French *palais* and for Italian *palagio*.

2. Modern *poijon* (Alps) and *rajo* (Limousin) have perhaps followed the analogy of such words as *maison* *maijon* *majon*: cf. Sy.

3. *Escoisson* *excūtiunt* seems to follow **escois* *excūtio*. It was perhaps influenced by *conoisson* *co(g)nōscunt*.

4. Some of the modern western dialects have d in *radon*, *sadon*, etc. = *razo*, *sazo*, etc.

6. GROUPS BEGINNING WITH L, M, N, R, OR S.

74. (1) Of the groups beginning with l (and not ending in l, r, w, or y), the following remained unchanged (except that c before a became tš in the north and northwest).— lb, lc (and llc), lg (llg), lm, lp, lv: *alba* alba; *calcāre* calcar, *collocāre* **colcāre* colcar (-char); *collocare*

***collogare** ***colgare** colgar; *hēlm* ĕlm, *ŭlmum* ɔlm; *cōlāphum* ***cōlpum** cɔlp (κόλπος golve is unexplained); *calvum* calv (= calf?), *salvāre* salvar. Ld, ls (lls), lt (llt) were regularly unchanged except for the vocalization of the l: see below. Lc' (llc') became lts, and then the l was vocalized: see below. Lc'p became lp in *calce pīsāre* calpisar. Lg', llg', have been treated in § 73. Lvs, lvt became ls, lt, and then the l was vocalized: see below.

(2) L became u before the dental consonants d, s, t in most of the dialects. The vocalization seems to have begun in the 8th century and to have progressed through the literary period and later. It is difficult to trace it, as *l* long continued to be written for u. In modern Provençal, ls remains in Languedoc, lt in Rouergue. *Auça* occurs in the *Boeci*. The l was probably first retracted, to differentiate it from the following dental; and then this velar l was opened into u. Ex.: *cal(ĩ)daria* caudiera, *cal(ĩ)dum* caut, *sōl(ĩ)dum* sqlt squt; *falsum* fals faus, *malos* mals maus, *valles* vals vaus; ***fallīta** fauta, *mŭltum* mɔlt mɔt, ***tōllītum** tɔlt tɔt; *dŭlcem* dɔlz dɔutz dɔus, *pōllīcem* pɔutz, *salīcem* sautz; *calvus* ***cals** caus, ***vōlvīta** vɔlta vɔta. So ***altiat** auça aussa, ***calceare** cauçar caussar: cf. § 73, Lc'y, Lty. In dɔs (= dɔus) and mɔt (= mɔt) the ɔ seems to have absorbed the u. Cf. § 65, L.

1. The final t of *molt* seems to have been lost sometimes before a consonant: hence *mul*, which, influenced by *man*, 'many', became *mon*.

2. *Altretal* (also *autretal*) became *atretal* by dissimilation; hence we have also *atressi* for *altressi* (*autressi*). *Aital*, *aitan* seem to be made up of *tal*, *tan* with the first syllable of *aissi* (*ac sīc*), regarded as a prefix meaning 'just'.

3. *Pallīdus* *palles* (through the feminine ***páleza**).

4. *Fouzer* is from *fŭlger* or ***fŭlgerem** = *fŭlgur*.

75. Of the groups beginning with m (and not ending in l, r, w, or y), the following usually remained unchanged—mb, md, mf, mp, ms, mt: *gamba* gamba (if *bobansa* is from βόμβος, it is irregular); **semitarium* **semidarium* semdię; *triumphāre* triomfar; *lampas* **lampa* lampa; **camisīle?* camsil (dialectically cansil; so Samson, Sanso); *cōmītem* comte (dialectically conte). For mbd in *ambo dŭos* see § [111](#), 2. Mn in the literary language generally remained unchanged (often spelled *mpn*), but in some dialects it was assimilated into nn, which was locally simplified into n: *dōmīna dōmna* dompna domna donna dona, *damnāre* dampnar damnar dannar danar, *fēmīna* **fēmna* fēmna fenna (*feme* is from *fēmena* *fēmīna*),^[75] *hōmīnem* **hōmnem* omne (*ome* is from **ómene* *hōmīnem*).^[75] When final, it regularly became n, occasionally m: *damnum* dan, *somnum* son som.^[76] Mnc' ndz nz in **domnicīlla* donzela. Mpt mt mt, dialectically nt: *computāre* comtar contar, *temptāre* temptar tentar; *domitāre* domptar.^[77]

76. (1) Of the groups beginning with n (and not ending in l, r, w, or y), the following generally remained unchanged (except that c, g before a became tš, dž in the north and northeast)—nc, nd, ng, nm, nt: *hanka* anca, *blank-* blanc (-ca -cha), *franko* franc (-ca -cha); *mandāre* mandar, *ŭnda* onda; *lōngum* lonc (-ga -ia), *plango* planc, *rīng* reŋc; *anīma* anma (also, by dissimilation, arma); *sentīre* sentir. For *final* nd, nt, see (2) below. Nc' nts ns: **francē(n)sis* françeș, *mancīpium* mansip (also massip: cf. ns below), *vīncere* vencer venșer. Nct became in different dialects n' int nt ntš: *jūnctum* iŋnh ioint iŋnt iŋnch, *ŭnctūra* onchūra, **pīnctūra* peintūra penchūra, *planctum* planh planch, *sanctum* sanh saint sant. Ndc' became, in different dialects, ndz (later nz), nts, ndž: *quīndēcim* quinze quintze quinge. Ndt nd nt:

***rendīta** renda renta. Nf remained in some dialects, while in others it became ff, then f: *confūdit* confon cofon, *infātem* enfant effant efant, *infērum* enfern efern. Ng ng: *mōnāchum* ***mon'gu** mongue (*manīcum* margue by dissimilation). Ns, in learned words and new formations (see § 55, N), remained in most dialects, while in others (especially those of the centre) it became ss, then s; *consīlium* conselh cossehl, *in sīml* enseṁ esseṁ, ***insignāre** ensenhar essenhar, *pensāre* pensar pessar, *sensus* sens; for *final* ns, see § 63, (5). Ntc' nts ns in *pantīcem* pansa. Nv remained in some dialects, while in others it became vv, then v: *convenīre* convenir covenir. Ndc, ndg, n-g, ng' have been treated under § 73.

(2) Final nd remained as nt in the eastern and central part of the territory, became n in the west and a part of Limousin, and disappeared altogether in a part of Languedoc and Gascony: *amando* aman, *descēdit* deissen, *grandem* grant gran gra, *mūndum* mōnt mōn, *vēndit* vēnt beṇ, *profūndum* preṇ, *quando* quant quan. Final nt remained in most of the territory, but in a part of Languedoc and Gascony became n or disappeared: *fōntem* font fon fo, *mōntem* mont mon, *quantum* quant quan, *vēntum* vent bent be.

For *efanh*, *parenh*, *monh* *mūndi*, etc., see § 51, 1.

77. Of the groups beginning with r (and not ending in l, r, w, or y), the following remained unchanged (except that c, g before a became tš, dž in the north and northeast)—rb, rc, rd, rf, rg, rm, rn, rp, rs, rt, rv: *barba* barba, *cōrbum* corp; *barca* barca, *cīrcāre* cercar, *clēricum* ***clērcum** clerc, *fūrca* fōrca fōrcha, *mercātum* mercat; *ardēntem* arden, ***perdūtum** perdūt, *vīr(ī)dem* vērt; *ōrphānum* ōrfe; ***carricāre** ***carrigāre** ***cargāre** cargar cariar, *largum* larc (-ga -ia), *sērīca*

***sēr'ga** sęrga; **ĕrēmum** ęrm, **fōrma** fōrma; **hibĕrnum** ivęrn, **tabĕrna** tawęrna, **tornāre** tornar; **wĕrpan** guerpīr; **arsum** ars, **cūrsum** cōrs (for **vĕrsus** vęs, see § 55, R); **artem** art, **fōrtem** fōrt; **servīre** servir. For *final* rn, rs, see § 63, (5); § 65, R. Rc' > rts rs: **parcĕre** parcer, **parcit** partz, ***tōrcĕre** tōrser. Rdc' became, in different dialects, rdz (later rz), rts, rdž: **quatuōrdĕcim** ***quattōrdĕcim** quatorze quatortze quatorge. Rdg before a rg, rdž: **vīridicantem** ***vīrdigantem** verguan verian. Rdt rd: **perdīta** pęrda. Rps rs: ***escarpsus** (= *excerptus*) escars. Rtm rtm or rm: **fōrti mĕnte** fortmen formen. For rg' see § 73.

78. Of the groups beginning with s (and not ending in l, r, w, or y), the following usually remained unchanged through the literary period (except that c before a became tš in the north and northeast)—sc, sm (ssm), sn, sp, st: ***bŭscum** (? = *bŭxum*)? bōsc, ***lŭscum** lōsc, **pascha** pasca pascha, **pĕrsīca pĕssīca** ***pĕsca** pęsca, **piscātor** pescaire, **piscarium** pesquier peschier, **prĕscan** ***trescāre** trescar; **ex-mīttĕre** ***esmīttĕre** (§ 55, X) esmĕtre, **pĕssīmus** pęsmes; **eleemōsŷna** almōsna, **asīnum** asne; **expōnĕre** ***espōnĕre** esponre, **gaspildjan?** guespilhar; **præpōsītum** prebōst, **trīstem** trist. For *final* scs, sts, see 2 below. Sc' became, in most of the territory, is; in parts of the north and northeast, s; in the west and the extreme east, i(t)š and (t)š (cf. § 73, Ssy): **co(g)nōscĕre** conqisser, **crĕscĕre** creisser, **ex-cĕrnĕre** ***escĕrnĕre** eissernir, ***ex-cerebellāre** ***es-** esservelar, **fascem** fais, **nascĕre** naisser nasser naicher nacher, **pīscem** pęis pęich pęch. Scb became sb in **epīscōpus** ***ebīscobus** bisbes (also bispes and ebesques). Spm became sm in **blasphemāre** blasmar. Spt st: **hōspītem** qste (also qsde). Stg became sg and sdž in **domesticāre** ***-gāre** domesgar domesiar. Stm became sm in

asthma asma. For the later history of the s in all these groups, see § 65, S, 1.

1. *Prěsbŷter* became regularly *pręstre*: § 71, 1. But beside *prěsbŷter* there existed in Vulgar Latin *prebŷter* (*Einf.*, § 140), the syllable *pres-* being replaced by the Latin prefix *præ-* or *pre-*, through the analogy of such words as *præbŷtor*, *præpositus*. From the accusative *prebŷtĕrum* we have regularly *preveire*. *Preire* is a cross between *pręstre* and *preveire*.

2. Final sts, in nearly all the territory, was reduced to ts: *finĭstis* finitz, *hŏstis* qz (accusative qst), *trĭstes* tritz (sg. trist); but sts was kept in *ęstz* ĭstos and in its derivative *aquęstz*. Similarly final scs was generally reduced to cs: **bŭscus*? (bqcs) bqcs (accusative bqsc), *quĭsquis* quęcs.

3. *Conois* etc. *co(g)nŏsco* etc. (beside *conosc* etc.) are doubtless due to the second and third persons (*conoisses conois* etc.). Some of the modern eastern dialects have *-isso* corresponding to *-sca* (*freisso* etc.): this seems to indicate an old metathesis of sc in that region.

7. MISCELLANEOUS GROUPS.

79. Of the groups not yet discussed, the most important are ct, gd, gn, ks, which show palatalization. It is now generally assumed that the Celts, who had turned their native ct into χt, pronounced Latin ct in the same way when they learned Latin (Meyer-Lübke, *Einf.*, § 186), and likewise substituted χs for ks (Meyer-Lübke, *Gram.*, I, § 650), and probably χd, χn for gd, gn. The χ was attracted into a palatal spirant by the following dental, and the dental itself was then palatalized. Most philologists explain the development of cl, gl into l' (cf. § 68) in a similar way. Inasmuch as Indo-European pt had also been changed to χt in Celtic, it is not unlikely that the Celts substituted χt, χs for Latin pt, ps in a few words; the χ replacing p may sometimes have been rounded.

1. To account for palatalization in the non-Celtic parts of southern Gaul, we may assume either that the spirant pronunciation spread from the Celtic to the other regions, or that in

the latter the palatalization came about simply through the mutual attraction of the guttural and the dental.

80. The groups will now be discussed in alphabetical order:—

Bc (*pc), ptš (before a): *repröb(ĩ)cat repröpcha.

Brg rg or urg in *fabrīca* *fabrīga farga faurga. Cf. § 70, Br.

Bs bs in the learned words *absens*, *absensa*.

Bsc sc: *obscūrus* escürs.

Bst st: *sūbstat* sōsta.

Bt bt, t: *subtīlem* sobtil sotil. See also βt below.

Bts ts: *sūbtus* sōtz.

βc uc: *avīca *aβca auca.

βc' udz or uts, later uz, us: *avicēllum* *aβcēllu auzēl aučēl. Cf. § 65, C', 1.

βd ud, in the west bd: *dēbītum* *dēβīdu *deβdu dēude, *mal'habītum* *malaβīdu *malaβdu malaude; *cīvitātem* *cīβidāde *ciβdad cibdat. Cf. βt below.

βt ut, in the west pt: *dēbītum* *dēβtu dēute dēpte, *dūbīto* *dūβto dōute dōpte, *mal'habītum* *malaβtu malaute malapte; *cīvitātem* *cīβtate ciutat (later cieutat: § 44, 2) ciptat, *mōvīta *mōβta mōquta, *remōvītum? remōute (*Girart*). *Depte*, *malapte* are not confined to the west (modern Limousin *dete*, Dauphiné *malate*); they come also from Latin *dēb'tum*, *mal'hab'tum*: cf. § 47, (3).

Cc' its is; in the west and the extreme east itš or tš: *ecc'hīc* eici eissi eichi achi.

Cm cm, m: ***Jácomus** Iacmes Iames (also, perhaps borrowed, Iaimes, Iaumes).

C´m im or sm: *děčimum* dẹime dẹsme, *facimu(s)* failm. Cf. § 52, (4).

Ct tš in most of the territory; but in the north and northeast, and in the southwest, it became, as in French, it: *coctāre* cochar coitar, *dīctum* dig dit, *factum* fag fait, *lacte* lag lait, *lěctum* lięg lẹit, *lūcta* lūcha, *nōctem* nuęg nuęit, *pactum-a* pacha, *pěctus* pięg pẹitz, *ōcto* uęich^[78] uęit. The ct of (*e-*)*jectāre* getar does not show popular treatment; the word is similarly irregular in most of the other languages.

C´t seems to give the same results as ct, namely tš and it: *dīcītis* ditz, ***explicitāre** esplechar espleitar, *facītis* faitz, *placītum* plach plait, (hence *plaieiamen*, *plaideiar*), ***vōcītum** (= *vacuum*) vuęch vọig^[79] vọh (hence *voiar*; *voidar* would appear to presuppose a form ***vqit**).

DC, dg: see § 73, D-g.

DC´, in the greater part of the territory, became dz, later z; but in Auvergne and some western dialects it became ts, and in parts of the southeast and southwest it gave dž: *duōděcim* ***dōděcim** dọze dọtze dọge, *jūdīcem* iütge, *radicīna* razina, *sēděcim* sẹze sẹtze sẹtge. *Iütge* may have been influenced by *iütiar*.

Dn developed peculiarly in *consuetūdīnem* ***costūmen** costüm, *incūdīnem* ***inclūd-**? enclütge.

Gd dž and id, corresponding to the tš and it from ct: ***frīgđum** (= *frīgđum*) fręg frẹit (fem. frẹia frẹida).^[80] The irregularity in *amýgdāla* *amandola* goes back to Vulgar Latin. *Frezir* *freizir* is perhaps from ***fre(i)zar** (cf. Italian *frizzare*) ***frigdiare**.

G'd: see Yd.

Gm m: *pigmĕntum* pimen. *Fragment* is learned. Greek γμ became um: *phlēgma* fleuma, *sagma* sauma.

Gn n': *agnĕllum* anheĭ, *pŭgnum* pōnh. According to the rhymes, final n' would seem to have become n in many dialects. *Stagnum* estanc, *rĕgnum* rēnc (also *reing*) show an early metathesis. When *gnōsco* lost its *g*, *cognōsco* became **conōsco* in popular Latin.

Gnd n'd, later, in different dialects, ind, n'd, nd, ndž: *cōgnĭtum* **cōn ĭdu* **cōnhede* **cōnhde*, then *cōinde*, *cuēnde*, *cōnge*. Cf. Gnt below. See § 47, 1.

Gnt n't, later, in different dialects, int, n't, nt: *cōgnĭtum* **cōn ĭtu* **cōnhete* (the t being due to clerical influence) *cōinte cōnte*; *dĭgnitātem* **dĭn'tāte* denhtat. Cf. Gnd above.

Ks is, in most of the territory; in Auvergne and in the extreme east it became itš or tš: *ac sĭc* aissi, *exāmen* eissam eicham echam, *exĭlium* eissilh, *exĭre* eissir eichir ichir, **exorbāre* eissorbar, *laxat* laissa, *uxōrem* oissor, *tōxĭcum* tueissec. In *essaiar*, *essemble*, *essilh*, the prefix became es- through the analogy of ex- before consonants: cf. § 55, X.

Ksc sc; before a, in the north and northeast, stš: **laxicāre* laschar, *toxicāre* toscar.

Ksm s'm, later sm: *prōxĭmum* prōsme prueśme. For the later history of the s (prueime), see § 65, S, 1.

Kss is: **exsanguinātum* eissancnat, **exsūcāre* eissügar (*essugar* presupposes a Vulgar Latin es-: see § 55, X).

Pf f: *sapphĭrum* safir.

Ppc (*pc), ptš (before a): **cloppicāre* clopchar.

Ps, in some dialects, remained unaltered; but in most of the territory it changed (through χs: § 79) to is, iș, ș, s, and us; iș and ș belonging especially to the west, us to the east: *capsa* capsă caissa caisha casha, *ipse* eps eis, *ipsa mēnte* epsament eissamen ichamens, *met-ipse* medeis mezeish medes mezeus, *ne-ipse* neeps neis neus. The ps forms seem to have been crowded out by the others, especially by those with is.

Pt pt, later t (except in parts of Languedoc and Gascony); in a few words, ut, it: **accaptāre* (or **accapitāre*?) acaptar achatar, *aptum* apte, *adaptāre* azautar (hence *azaut*) through **ađaxtāre* (§ 79), *baptizāre* baptegar (*g* = dž) bateiar, *capitāle* capital catal chatal, *captivum* captiu catiu and more commonly caitiu chaitiu (through **caxtīβu*: § 79), *rūpta* rōta, *septimāna* septmana setmana, *sēptem* sēt. *Escrich escrit* (= *scrīptum*) are based on *dich dit*.

Td t (through V. L. tt): *nītīdum* net, *pūtīdum* püt. Cf. § 47, (1).

Tm: *marītīma* marēdma.

Tn: if *renha*, ‘rein’, is connected with *rētīne* (see Körting), it must have been influenced by *renhar* *regnāre*.

Ts: *et sīc*, under the influence of *ac sīc*, became **ec sīc* eissi eichi ichi.

Yd dž and id: *cōgīto* **cōyīdo* cüg cüit, *cōgitāre* **cōyidare* cüiar cüidar, *rīgīdum* **rīyīdu* reide (§ 50, 1). *Rede* and the feminine *reza* are peculiar. Cf. § 49, (1).

FINAL CONSONANTS.

81. The only single consonants that occur in Latin at the end of a word are b, c, d, l, m, n, r, s, t. The only groups (in words preserved) are ks, nt, st.

SINGLE FINAL CONSONANTS.

82. D, n, r, t at the end of proclitics (*ad, in, per, et*) are really medial consonants and must be distinguished from final n, r, t in independent words (*nōmen, frater, amat*); final d occurs only in proclitics. The consonants will be treated in alphabetical order:—

B appears as b in *Iacqb*, p in *Iqp*, both learned.

C apparently fell after all vowels in some dialects; in others it fell only after back vowels, and became i after a and front vowels: *eccu'hōc* (§ 55, W) *acq* (§ 43, 2), *ecce hōc* *aissq* *çq sq*, *hōc* *q* meaning 'it' (while *qc*, 'yes' probably comes from **hocque*: cf. A. Thomas in *Rom.*, XXXVII, 322); *fac* *fai*, *illác* (§ 16, 4) *lai la*, *ecce hac* *sai sa*; *dīc* *di*, *ecce hīc* *eici*, *sīc* *si*. *Düi* *dūc* may perhaps be explained as due to the analogy of *düire* and of *fai*. Cf. § 63, (6).

D in *apud* fell early: see § 65, P, 2. In the proclitics *ad, quīd*, the d disappeared before a consonant, and before a vowel became in most dialects *đ* *z* (cf. § 65, D): *a, que;* *ađ az, queđ quez*.

L fell in *in sīmul* *essem*. It remained in the learned *Abel, tribunal*. It is believed by some that *sivals*, 'at least', comes from *sī vel*.

M fell in Vulgar Latin at the end of a word of more than one syllable (§ 55, M): *crēdam crēda* *creza*, *dōnum dōnu* *dōn*, *fōrtem fōrte* *fōrt*; *Adam* is learned. At the end of an independent monosyllable, it fell in some dialects and in others became n (cf. § 65, N): *jam* *ia*, *rēm* *rē rēn* (Marcabru uses *rēy* for the rhyme), *sūm* (verb) *sō sōn*. At the end of

proclitics, m was probably kept at first before vowels and labials, while it became n before dentals, ŋ before gutturals, and disappeared before spirants; but the n forms (helped by the analogy of *en*, *non*) and those without a final consonant replaced m before vowels and partly before labials, and probably took the place of ŋ before gutturals; we find, then, sometimes m before labials, but either no consonant or n before all other sounds: *quēm* que, *sūm* (verb) sọ sọn, *sūm* (= *sūum*) sọ sọn sọm, **tūm* (= *tūum*) tọ tọn tọm.

N fell in Vulgar Latin at the end of a word of more than one syllable (§ 55, M): *nōmen nōme* nọm. At the end of proclitics we generally find n before a vowel, a form without n before spirants, both forms before other consonants, but often m before a labial: *īn* en (*en amar*, *en cant*), e (*e Fransa*, *e ls*), em (*em breu*); *nōn* non (*non es*, *non ges*), no (*no falh*, *no tol*), nom (*nom plagues*).

R remained: *amātor* amaire, *cōr* cọr, *marmor* marbre (*marme* shows dissimilation), *sōror* sọrre (*sor* through proclitic use). So in proclitics: *per* per, *sūper* sọbre.

1. A Provençal final r began to fall in the west and south in the 14th century: cf. § 65, R, 1.

S remained: *amīcus* amics, *cōrpus* cọrs, *facias* fassas, *fōrtēs* fọrtz, *ōpēras* qbras, *sūbtus* sọtz. Between a palatal, or an n that did not fall, and an s, a t developed in some dialects: *annos* anz, *fīlios* filz; cf. § 63, (1), (8).

1. Final s began to fall or to become i in many dialects as early as the 14th century: cf. § 65, S, 1. In *mai*, beside *mais*, the fall was earlier.
2. Final ts t, in the second person plural of verbs, in parts of Limousin and Dauphiné: *habētis* avẹt. Cf. § 64. In all first person plural forms (except *esmes*) final s fell very early: *amāmus amāmu'* amám. Cf. § 167.

3. Through the influence of such common adverbs as *entz* *ĩntus*, *fors* *fõris*, *ios* *deõrsum*, *mais* *magis*, *mens* *mĩnus*, *nemps* *nĩmis*, *plus* *plũs*, *sotz* *sũbtus*, *sus* *sũrsum*, *s*, coming to be regarded as an adverbial ending, was often added to the suffix *-men* (*belamens*), to many other adverbs, as *ensem-s*, *era-s*, *onca-s*, *poissa-s*, and to some prepositions, as *sen-s* (cf. *tras*, *vers*, etc.). By the analogy of such double forms, we have *for*, *men* beside *fors*, *mens*.

4. *Magis*, used as a proclitic, probably became in Vulgar Latin **mais* and **mas*, whence Provençal *mais* and *mas*. For *mai*, see 1 above.

T, in independent words, fell very early, except in the preterit of verbs; there it was retained in most dialects in weak preterits of the first and third conjugations, in many dialects in weak preterits of the fourth, but disappeared in strong preterits: *amat* *ama*, *cantābat* *cantava*, *dar'* **hat* *darā*, *dōnet* *dõn*, *stat* *estā*, *partībat* *partia*, *placet* *platz*, *tenēr'* + *-ē(b)at* *tenria*, *vēnit* *ven*; *donāvit* *donet* *done*, *vēndīdit* **vendēdit* *vendet* *vende*, *partīvit* *partīt* *partī* *partīt*, *placuit* *plac*, *vīdit* *vi*. In the proclitics *et* and **ot* (= *aut*), the *t* fell before consonants; before vowels it became *d*, which, under the influence of *ad* and *quĩd*, developed like an original *d*: *et* *e*, *eđ* *ez*; **ot* *o*, *ođ* *oz*; later, *e* and *o* came to be used often before vowels also.

FINAL GROUPS.

83. *Ks* remained in Vulgar Latin at the end of monosyllables only (§ 55, X); there it became, in Provençal, *is*: *rēx* *reĩs*, *sēx* *seĩs*. *Grecx*, *nicx* are Latinisms.

Nt was generally reduced to *n*; but in the extreme north and some parts of the south the *t* was retained in *-ant*: *amant* *aman*, *habē(b)ant* *avian* *avian*; *cantent* *canten*; *vēndunt* *vendon*. In some dialects the *n* fell after *o*, *u* (*vendo*, *au*); *-on* and *-o* were used concurrently by the poets.

St *s* in *ěst* *es*. Cf. § 28, 5.

SPORADIC CHANGE.

84. For certain consonant changes no laws have been established.^[81] Some of them doubtless originate in the language of children, which is governed by principles different from those which regulate the speech of adults. Others are due to vague associations of sound or sense. Borrowed and learned words are especially exposed to such whimsical alteration.

INSERTION.

85. The insertion (or addition) of a consonant, in such cases as those mentioned below, is probably always due to some false association or wrong etymology, but the specific cause often cannot be ascertained; the added consonant seems to be generally a liquid or a nasal:—

alhondre -s *aliünde*: V. L. **aliünder*?

consi = *cossi* *eccu' sīc*: analogy of the prefix *co-* *con-*. Cf. § 76, (1), nf, ns.

enclutge *incūdīnem*: cf. French *enclume*.

engal = *egal* *æquālem*: analogy of the prefix *e-* *en-*. Cf. § 76, (1), nf, ns.

invern = *ivern* *hibērnum*: *hi-* mistaken for the prefix *in-*; cf. Italian *inverno*, etc.

parven (hence *parvensa*) *parēntem* (*parēre*): analogy of *ferven*, *serven*, or of *espaven*, *espavensa*, or influence of *parui*, etc.?

penchenar *pectināre*: analogy of *pencheire*, *penchura*?

perdris = *perditz* *perdīcem*: progressive assimilation? Cf. French *perdrix*.

pquzer = *pouze* *pōllīcem*: confusion with *polgar* *pollicāre*.

refreitor = *refeitor* *refectōrium*: association with *refreidar* (*freit*).

renlinquir = *relinquir* *relīnquēre*: analogy of *e-* *en-*; cf. *reforsar* and French *renforcer*.

METATHESIS.

86. Metathesis is not very common in Provençal, although a few texts offer many examples; it is apparently restricted to liquids and nasals:—

cabirql = *cabriol capreǫlum.

cocodrilla crocodilum: cf. Italian coccodrillo.

craba = cabra capra.

enfrondar = *enfondrar French effondrer ?*infünduläre.

escremir skirmôn: cf. French escrimer.

estanc stagnum: cf. French étang.

esturmen = estrument instrumētum: cf. Italian stormento.

formir = fromir frumjan: cf. French formir, etc.

freir = ferir ferīre.

grada = garda *warda.

grepir = guerpir wërpan.

lhun = nulh nūllum: analogy of negun. Cf. Fr. nune part (Balzac).

presseguier (also pess-) *préssega përsīca.

reñc (also regne) rēgnum.

trida τίρυιδα.

tronar tonitruāre + thrōnus.

truqill tōrculum.

trobar ?tūrbāre: see Körting.

1. In *ginhol* = *genolh* *genūcūlum* the palatalization is shifted from the liquid to the nasal. In *lunh* = *nulh* *nullum*, on the other hand, the palatalization remains at the end of the word, but the liquid and the nasal change places.

DISSIMILATION.

87. Dissimilation, like the other irregular phenomena, affects mainly liquids and nasals, particularly r; it is not, however, entirely confined to these classes. The two nasals, m and n, are similar enough to undergo

dissimilation. Some of the cases go back to Vulgar Latin, while others are peculiar to Provençal or to Provençal and French. In the table below, a dash indicates the total disappearance of the consonant in question.

$\beta + \beta$ $\beta + \text{—}$ (v + —): *habēbam* **aβēa* avia, **vivāciārium*
viacier, *vivācius* viatz. *Vianda*, whatever its ultimate origin may be, was probably borrowed from French.

$kw + kw$ $k + kw$: *quīnque* *cīnque* cinc.

$l + l$ $r + l$, — + l, $d + l$: *calamēllum* calameļ carameļ, **umbilīcūlum*
emborígol, *flēbīlem* fleble frēble feble, *ūlulāre* ulular udolar.
Perhaps *pūs* = *plūs* *plūs* is to be explained by dissimilation, occurring in such phrases as *plus larc*, *plus lonc*.

$m + m$ $n + m$: *memorāre* membrar nembrar (renembransa).

$m + n$ $m + r$: **comīnicāre* comenegar comergar, **indomīnicātum*
endomeniat endomergat, *mancīpium* mansip massip marsip, *manīcum*
margue, *mōnāchum* mongue morgue.

$n + m$ $r + m$: *anīma* anma arma, **mīnimāre* mermar.

$n + n$ $n + r$, $r + n$; ? $d + n$: *canōnīcum* canónegue canorgue, *venēnum*
verin; *nec ūnum* negün degün? (cf. Andalusian and Asturian *dengun*, Catalan *dingu*, apparently from *nec ūnum* + *nīngūlum*).

$r + r$ $r + \text{—}$, — + r, $l + r$: **Bernhardum* Bernart Bernat, *marmor*
marbre marme, *prōprium* prōpri prōpi; *dīe Mērcūrī* (influenced by *dīe Vēnēris*)
dimērcres dimērcres, *grandem rem* granre ganre, *pr(ēh)ēndēre*
prenre penre, *prēsbyter* prēstre peſtre; *arbītrium* albire, **Arvērnium*
Alvērnhe, *peregrīnus* pele(g)rīnus peleris, *pūrpūra* pōlpra.

s + s — + s: ***spasmāre** (espasme) pasmar (cf. French *pâmer*), perhaps through confusion of the initial es- with the prefix ex-.

t + t? — + t: *statiōnem?* sazō (cf. French *saison*, Spanish *sazon*).

y + y y + —: ***disjejūnāre** ***disjeunāre** ***disy'nāre** dis'nar
disnar.

III. MORPHOLOGY.

88. The most important morphological developments are common to all, or nearly all, the Romance languages. They may therefore be ascribed, in their early stages, to Vulgar Latin, although direct evidence of their beginnings is scanty.

1. DECLENSION.

NOUNS.

89. (1) During the late Vulgar Latin and early Romance period neuter nouns gradually became masculine; this change was doubtless due in part to phonetic developments which obliterated distinctive endings: *dōnum* *dōn*, m.; *nōmen* *nōm*, m. *Mare*, however, became almost always feminine in Gaul: *la mar*. Some neuter plurals in *-a*, used mainly in a collective sense, were preserved and eventually became feminine singulars: *fōlium fōlia* *fōlha*, f. sg.; *lignum ligna* *lənha*, f. sg.; so *luq̄ua*, *poma*, *prada*, beside *lōc*, *pom*, *prat* (and, by analogy, *grasa*, beside *gras* *gradus*); similarly *labia* *lavias*, f. pl.

(2) Masculine and feminine nouns usually kept their original gender. Abstract nouns in *-or*, however, regularly became feminine in Gaul, other abstract nouns being mostly feminine in Latin: *honōrem* *onor*, f.; *sapōrem* *sabor*, f. With the exception of *manus*, which generally retained its gender, feminine nouns of the second and fourth declensions, unless they passed into the first declension (*pīrus* *pēra*), became masculine, to conform to the usual *-us* type: *fraxīnus* *fraisnes*, m.; *pīnus* *pins*, m.

Attracted by such words as these, *arbor* became masculine. There were some other less important shifts.

1. *Juventus*, passing into the second declension, became masculine (*ioven*); but we find also *ioventut*, f. *Laus* became masculine in Provençal; *fin*, on the other hand, is always feminine. *Měrŭla* merle, m. *Correitz*, *linh*, both m., occur beside *correia* *corrĭgia*, *linha* *lĭnea*. Other similar changes might be noted. Pr. *dia* (also *dī*), like Latin *dĭēs*, is usually masculine.

90. Some nouns passed from the fourth to the second declension in the classic Latin period (*dŏmus*, *fĭcus*); the rest doubtless followed in Vulgar Latin (*frŭctus*,^[82] *gradus*, *manus*). Fifth declension nouns in *-ies* went over, for the most part, to the first declension:^[83] *dĭēs* dia, *facies* fassa, *glacies* glassa, *rabies* rabia; but we find also *di*, *fatz*, *glatz* (ratge is probably French), following the third declension type. Fifth declension nouns which did not shift to the first came to be declined after the model of the third (*fides*, *res*, *spes*). The five declensions were therefore reduced to three, presumably in Vulgar Latin times. Among these there were some exchanges: *polvera*, *vergena*; cf. § 89, (1), (2), 1.

91. The use of cases became more and more restricted in Vulgar Latin, prepositional constructions taking the place of pure case distinction. At the beginning of the Romance period, nouns probably had, in unstudied speech, only two cases in constant use: a nominative and an accusative or accusative-ablative. These two cases were generally retained in Provençal, for the second and third declensions, until the literary period: we may call them *nominative* and *objective*.

(1) The locative, which had almost vanished in classic Latin, lingered in Vulgar Latin only in names of places. It has left no sure traces in Provençal.

(2) The vocative, in classic Latin, was like the nominative for most words; in Vulgar Latin it probably disappeared, except in Church phrases,

such as *mī dōmīne*. In Provençal we find the nominative regularly used in address (chanzōs, companh, emperaire, ioglars, Papiols), although the objective occasionally occurs in its stead (barōns pl., ioglar malastrüc, trachōr).

(3) The genitive, in the popular language, was little by little replaced by other constructions—commonly by the ablative with *de* or by the dative; the beginnings of this substitution may be observed as early as Plautus. Among Provençal nouns—aside from such learned forms as ancianōr, christianōr, companhōr, paianōr, parentōr—we find remnants of the genitive only in a few compound words, as diiqus *dīe Jōvis*, and in the standing phrase *ēs mestiēr est ministērii*.

(4) The dative, which in most words had the same ending as the ablative, came to be replaced, in the greater part of the Empire, by the accusative with *ad*; this construction, too, goes back as far as Plautus. Provençal nouns retain no traces of the dative.

(5) The ablative, after the fall of final *m* (§ 55, M) and the loss of quantitative distinctions in unstressed syllables (§ 21), differed little or not at all from the accusative in the singular of nearly all nouns: *causām causā*, *dōnūm dōnō*, *patrēm patrē*, *frūctūm frūctū*, *dīēm dīē*. Furthermore, some prepositions (especially *in*) were used both with the accusative and with the ablative. It was inevitable, then, that the two cases should be confounded in the singular, and we have evidence of such confusion as early as the first century of our era; this led gradually to a substitution of the accusative for the ablative in the plural, the accusative plural being somewhat commoner and frequently simpler than the ablative. We may, therefore, take the accusative as the basis of the Provençal objective, remembering, however, that this accusative has been more or less blended with the ablative.

(6) The two-case declension remained theoretically in use in Provençal literature through the 14th century; but in texts later than the 12th, cases are often confused. From the spoken language the declension disappeared, in the west (as in Catalan), before the literary period; in the centre and east, probably in the 12th century; in the north, in the 13th. The case preserved was usually the objective, but sometimes the nominative. Some nouns in *-aire -ad̄or* kept both forms, with a differentiation of meaning.

92. In the discussion of declensions some phonetic peculiarities must not be overlooked:—

(1) In the nom. pl. of the 2d declension, a stressed *ę*, followed in the next syllable by final *-i*, would regularly give *ï* (cf. § 27, 1); but the *ę* is preserved by the analogy of the nom. and obj. sg. and the obj. pl.: *capĩllĩ* cabel, *mĩssĩ* męs, *quętĩ* quęt, *sęrĩ* sęr. We do, however, find *cabil*, and (perhaps by analogy) *auzil* *aucęllĩ*.

(2) In the nom. pl. of the 2d declension, a *c* or *g* before the final *-i* would regularly be palatalized (cf. § 55, C, G); but it is preserved from palatalization by the analogy of the other three forms: *amĩcĩ* amic, *lõngĩ* lonc.

(3) For the development of a *t* between a palatal or an *n* and a final *s*, see § 82, S: *annos* anz, *fĩlios* filz.

(4) For the simplification of final *scs*, *sts* to *cs*, *ts*, see § 78, 2: **bũscus?* bęcs, *trĩstes* tritz.

(5) For the history of *-arius* and *-tōrius*, see § 23, 1 and § 73, Ry, 1.

93. (1) Nouns whose objective singular ended in *s* were invariable in the earlier part of the literary period; *bracchium* bratz, *cōrpus* cęrs, *imperatrĩcem* emperairitz, *fascem* fais, *latus* latz, *lũcem* lůtz,

mīssum mēs, *nasum* nas, *ōpus* qps, *ūrsum* qrs, *pīscem* peīs, *pēctus* peitz, *prētium* pretz, *tēmpus* tems, *vērsum* vęrs, *vīsum* vis, *vōcem* vōtz. Later, however, a plural (originally obj. pl.) was made for such words by adding -es, generally at a time when final ts had been reduced to s (§ 64): *brasses*, *cōrses*, *mēsses*, *peīsses*, *vęrses*; examples occur as early as the end of the 12th century.

(2) Other invariable nouns are *midons*, *sidons*, and often *laus* and *reş*; the last two sometimes have an objective *lau*, *re*. *Midons* comes from the Church Latin *mī dōmīne*, which was popularized by the substitution of the Provençal *don* for *dōmīne* and the addition of the nom. -s; the term was transferred from religious to feudal, and thence to amatory use, and came to mean ‘my lady.’ *Mi domina* was common in Church Latin. *Sidons* is formed on the model of *midons*.

(3) For nouns in tş, see § 63, (1): **disdūctum* desdüg, *frūctum* frūch, *gaudium* gaug, *nōctem* nuech. Such words were very often written in the plural with -gz, which was pronounced either ts or tş. The pronunciation ts is attested by such rhymes as *malfagz: alumenatz*.

94. Infinitives used substantively conformed to the 2d declension type: *lauzars* *lauzar* (like *fōcs* *fōc*), *rire-s* *rire* (like *fabre-s* *fabre*): see § 96. The same thing is true of masculine post-verbal nouns: (*getar*) *gețz* *geț*, (*guidar*) *guitz* *guit*, (*lansar*) *lans* (invariable).

FIRST DECLENSION.

95. This declension came to include a part of the fifth and also some neuter plurals of the second and third. With the exception of *dia* (nearly always masculine) and of a few learned words, it contained only feminine nouns. As the nominative, accusative, and ablative singular early became

identical, leaving only one form in the singular, the plural forms were reduced to one, the accusative crowding out the nominative; this substitution, which must have been begun before the Provençal period, was doubtless helped by the identity of nominative and accusative plural in feminine nouns of the third declension. *Causa* will serve as a model:—

<i>causa</i>	<i>causa</i>
<i>causam</i>	<i>causa</i>
<i>causæ</i> * <i>causas</i>	<i>causas</i>
<i>causas</i>	<i>causas</i>

1. *Dia* sometimes has a nom. sg. *dias*, following the example of other masculine nouns.

2. Many feminine proper names, in Gaul and elsewhere, developed a Low Latin declension -a -āne(m) or -a -ēne(m), as *Anna Annāne*. Provençal has few traces of this inflection. The word *putana* ?*pūtīda* + *ānem* + *a* may be a remnant of it. Cf. Meyer-Lübke, *Gram.*, II, p. 27; E. Philipon, *Les accusatifs en -on et en -ain, Rom.*, XXXI, 201.

SECOND DECLENSION.

96. This declension came to include the fourth. With the exception of *mas*, ‘hand’ (generally feminine), it contained only masculine nouns. The different types may be illustrated by *fōcus*, *dōnum*, *faber*:—

<i>fōcus</i>		<i>dōnum</i>		<i>faber</i>	faure fabre
fqcs		* <i>dōnus</i>	dons		fabres
<i>fōcum</i>	fqc	<i>dōnum</i>	dון	<i>fabrum</i>	fabre
<i>fōcī</i>	fqc	<i>dōna</i> * <i>dōnī</i>	dון	<i>fabrī</i>	fabre
<i>fōcos</i>		<i>dōna</i>		<i>fabros</i>	fabres
	fqcs	* <i>dōnos</i>	dons		

For the c of *fōcī*, see § 92, (2). For **dōnus*, etc., see § 89 (1). Nom. *fabre* is due to the analogy of the other three cases; the s of *fabres* is borrowed

from the prevailing *fōcs* type.

1. Neuters which long preserved their gender often have no -s in the nom. sg.: *segle* or *segles*. Nouns in -age from -aticum commonly have no -s: *corage*, *damage*, *message*, *senhorage*; but forms with -s occur also. Learned nouns in -i from -ium regularly have no -s: *breviari*, *emperi*, *iuzizi*, *testimoni*. Post-verbal nouns, on the other hand, usually take the nom. -s: *albi*res, *blasme*-s, *consi*res, *desi*res (cf. § 94). By the analogy of the *fabre*-s, *segle*-s, *blasme*-s types, many masculines in -e sometimes drop the -s: *clergue*-s, *diable*-s, *morgue*-s, *oncle*-s, *poble*-s. *Maestre*, *prestre* regularly have no -s.

2. Most proper names are declined like common nouns: *Arnautz Arnaut*, *Boecis Boeci*, *Enrics Enric*, *Lozoics Lozoic*, *Peire-s Peire*. Many proper names, however, developed in Gaul and elsewhere, from the 9th century on, a Low Latin declension -us -ōne(m), as *Petrus Petrōnis* (cf. § 95, 2): hence *Carle-s Carló*, *Peire-s Peiró*, etc.; so *Bergonhs Bergonhó*, etc.

3. *Mas*, being usually feminine, has a nom. pl. *mas*.

4. For *pagadi*, *salvi*, *sol*i, etc., and *beill*, *peccah*, *efanh*, etc., see § 51, 1.

THIRD DECLENSION.

97. This declension absorbed a part of the fifth: cf. § 90.

98. Nouns whose stem was different in the nominative and the accusative singular, reconstructed the nominative to correspond to the accusative, the new form being similar to the original genitive: *papīlio papiliōnem papiliōnis papiliōnem*, *pēs pēdem pēdis pēdem*. The change began in the Vulgar Latin period. Exceptions to the rule are names of persons, unless they ended in -ans or -ens: *nēpos nepōtem nep̄s nebōt*; but *amans amantem *amantis amantem amāns amán*.

1. *Carnis* for *caro* is used by classic writers. *Grūis* for *grūs* occurs in the *Appendix Probi* III, belonging perhaps to the 3d century. *Papiliōnis*, *pēdis*, *travis* = *trabs*, and some others are found in the 8th century *Glossary of Reichenau*.

99. Masculine nouns of the third declension, early in the Provençal period, made their nominative plural conform to the second declension

type, thus distinguishing it from the objective plural: *pater patrem patres patres* *paire paire paire paires* (cf. Old French and Italian). Feminines, on the other hand, kept the nominative plural in -s: *mater matrem matres matres* *maire maire maires maires*.

100. A few neuter nouns, becoming masculine in Vulgar Latin, developed distinctively masculine forms in the singular: *gĕnus gĕnus* **gĕneris* **gĕnĕrem* *genres genre*; so *fŭlgur* (*fŭlger*) **fŭlgĕrem* *fouzer*. Most neuters, however, kept in the singular their original stem: *sĕmen sĕm*, *tĕmpus* *tems*. But those in -*men* regularly, and those in -*r* sometimes, took an -s in the nominative singular: *flŭmen flŭmen* *flŭms flŭm*, *marmor marmor* *marme-s marme*; cŏr, in the literary language, usually has no nominative -s. In the plural most neuters brought their forms into harmony with the masculine type, but those in -*us* kept the -s throughout: (*caput* >) *capus* **capum capĭta capĭta* *caps cap cap caps*, *cŏr cŏr cŏrda cŏrda* *cŏr cŏr cŏr cŏrs*, *nŏmen nŏmen nŏmĭna nŏmĭna* *nŏms nŏm nŏm nŏms*; but *cŏrpus cŏrpus cŏrpŏra cŏrpŏra* *cŏrs cŏrs cŏrs cŏrs*. *Mare*, becoming feminine, was declined thus: *mars mar mars mars*.

1. *Gĕnus* also became *ges*, which was used as an adverb.

101. The third declension comprises three principal types: (1) nouns which in Latin had no difference of stem or of accent between the nominative and the accusative singular; (2) those which had a difference of stem but not of accent; (3) those which had a difference of accent.

(1) Nouns with no difference of stem or of accent:—

MASCULINE

<i>canis</i>	<i>cas</i>	<i>pater</i>	<i>paire-s</i>	<i>sŏl</i>	<i>sŏ-s</i>
--------------	------------	--------------	----------------	------------	-------------

<i>canem</i>	ca	<i>patrem</i>	paire	<i>sōlem</i>	sọ
<i>canes</i>	ca	<i>patres</i>	paire	<i>sōles</i>	sọl
<i>canes</i>	cas	<i>patres</i>	paires	<i>sōles</i>	sọls

FEMININE

<i>fīnis</i> ^[84]	fis	<i>mater</i>	maire	<i>fīdes</i>	fẹs
<i>fīnem</i>	fi	<i>matrem</i>	maire	<i>fīdem</i>	fẹ
<i>fīnes</i>	fis	<i>matres</i>	maires	<i>fīdes</i>	fẹs
<i>fīnes</i>	fis	<i>matres</i>	maires	<i>fīdes</i>	fẹs

1. Masculine nouns of this type which etymologically had no -s in the nom. sg., often took one, even in the earliest times.

2. *Laus* and *res* were often invariable, but were sometimes declined like *sols* and *fes*.

(2) Nouns with a difference of stem but not of accent:—

MASCULINE		FEMININE		NEUTER	
<i>pōns *pōntis</i>	ponz	<i>pars *partis</i>	partz	<i>lūmen</i>	lūm-s
<i>pōntem</i>	pon	<i>partem</i>	part	<i>lūmen</i>	lūm
<i>pōntes</i>	pon	<i>partes</i>	partz	<i>lūmīna</i>	lūm
<i>pōntes</i>	ponz	<i>partes</i>	partz	<i>lūmīna</i>	lūms

NAMES OF PERSONS

<i>cōmes</i>	coms	<i>hōmo</i>	om
<i>cōmītem</i>	comte	<i>hōmīnem</i>	ome omne ^[85]
<i>cōmītes</i>	comte	<i>hōmīnes</i>	ome omne
<i>cōmītes</i>	comtes	<i>hōmīnes</i>	omes omnes

1. For other neuter types, see § 100.

2. *Om* later developed an inflection *oms om om oms*.

3. *Lex, rex* became *leis lei leis leis, reis rei rei reis*.

(3) Nouns with a difference of accent:—

MASCULINE		FEMININE	
<i>sěrmō *sērmōnis</i>	sermōs	<i>ratio *ratiōnis</i>	razōs
<i>sērmōnem</i>	sermō	<i>ratiōnem</i>	razō
<i>sērmōnes</i>	sermō	<i>ratiōnes</i>	razōs
<i>sērmōnes</i>	sermōs	<i>ratiōnes</i>	razōs

NAMES OF PERSONS IN -ANS, -ENS

<i>amans</i> * <i>amantis</i>	amáns	<i>parens</i> * <i>parēntis</i>	paréns
<i>amantem</i>	amán	<i>parēntem</i>	parén
<i>amantes</i>	amán (f. amáns)	<i>parēntes</i>	parén (f. paréns)
<i>amantes</i>	amáns	<i>parēntes</i>	paréns

NAMES OF PERSONS NOT IN -ANS, -ENS

<i>amātor</i>	amaire	<i>sēnior</i>	sēnher	<i>mūlier</i>	mōler
<i>amatōrem</i>	amadōr	<i>seniōrem</i>	senhōr	<i>muliērem</i> ^[86]	molher
<i>amatōres</i>	amadōr	<i>seniōres</i>	senhōr	<i>muliēres</i>	molheres
<i>amatōres</i>	amadōrs	<i>seniōres</i>	senhōrs	<i>muliēres</i>	molheres
<i>servītor</i>	servire	<i>baro</i>	bar	<i>sōror</i>	sōrre sōr ^[87]
<i>servitōrem</i>	servidōr	<i>barōnem</i>	barō	<i>sorōrem</i>	soror
<i>servitōres</i>	servidōr	<i>barōnes</i>	barō	<i>sorōres</i>	sorores
<i>servitōres</i>	servidōrs	<i>barōnes</i>	barōs	<i>sorōres</i>	sorores

1. After the same pattern as *senher*, we have *pastor pastōrem pastre pastór*, etc.; after the *bar* pattern, **companiono* (Einf., § 43) **companionem companh companhó*, **fillo* (Körting) **fillōnem? fel feló*, *glūtto* (= *glūto*) *gluttōnem glot glotó*, *latro latrōnem laire lairó*, *lěo* (treated like the name of a person) *leōnem leu leó*, etc. On the model of *amaire*, *servire*, we find *trobair trobadór*, etc., *iauzire iauzidór*, etc.; and, for the second and third conjugations, *teneire tenedór*, etc., *beveire bevedór*, etc. The inflection of such words became much confused, and some of them eventually developed double declensions: *bars bar bar bars*, *barós baró baró barós*; *emperaires emperaire emperaire emperaires*, *emperadōrs emperadór emperadór emperadōrs*. Some proper names follow the *bar* model: *Bret Bretó*, *Folc-s (Folques) Folcó* (later *Folcós Folcó*), *Gasc Gascó*, *Uc Ugó*, (later *Ucs Uc*); cf. § 96, 2.

ADJECTIVES.

102. What has been said concerning the inflection of nouns applies also to adjectives: see §§ 91-101. For pronominal adjectives see §§ 114 ff.

1. The operation of phonetic laws sometimes results in a difference in stem between the m. and the f.: *bos bona*, *larcs larga*, *nutz nuda*, *preon preonda*; *mut muda*, *prezat prezada*. For *pauc pauca*, *rauc rauca*, see § 65, C, 1. For *-arius -aria*, *-tōrius -tōria*, see § 23, 1; § 73, Ry, 1.

2. Adjectives in -s or -š are undeclinable in the m. sg.: *glorios*, *perfieg*. Those in -s originally had no inflectional ending in the m. pl., but later they sometimes added -es: *divers* *diverses*, *frances* *franceses*. For the pl. of those in š, see § 93, (3).

103. We must recognize two classes of adjectives: (1) those which in Latin distinguish the feminine from the masculine; (2) those which do not.

1. Adjectives like *acer*, which, though inflected after the 3d declension type, could distinguish the m. from the f. in the nom. sg., fell into one or the other—usually the first—of the following classes (*agre agra*, *alegre alegra*; *terrestre terrestre*).

(1) Masculine and feminine different:—

MASCULINE		FEMININE	
<i>bēllus</i>	bēls	<i>bēlla</i>	bēlla
<i>bēllum</i>	bēl	<i>bēllam</i>	bēla
<i>bēlli</i>	bēl	<i>bēllæ *beēllas</i>	bēlas
<i>bēllos</i>	bēls	<i>bēllas</i>	bēlas
<i>pauper</i>	paubre-s	<i>paupēra</i>	paubra
<i>paupērum</i>	paubre	<i>paupēram</i>	paubra
<i>paupēi</i>	paubre	<i>paupēræas</i>	paubras
<i>paupēros</i>	paubres	<i>paupēras</i>	paubras

(2) Masculine and feminine alike:—

MASCULINE		FEMININE	
<i>gentīlis</i>	gentils	<i>gentīlis</i>	gentils
<i>gentīlem</i>	gentil	<i>gentīlem</i>	gentil
<i>gentīles</i>	gentil	<i>gentīles</i>	gentils
<i>gentīles</i>	gentils	<i>gentīles</i>	gentils

1. Some adjectives of the second class were attracted into the first either in Vulgar Latin or in Provençal; this happened to all adjectives in -és, -able, -ible, and also to *comun*, *dous*, *fol*, *freble*, *graile*, *len*, *mol*, *noble*, *paubre* (early), *rude*, *trist*: *cortes* *cortesa*, *durable* *durabla*; *comuna*, *doussa*, etc. Some kept both inflections: *dolens*, *dolens* or *dolenta*; *grans*, *grans* or *granda*, etc.

104. In impersonal constructions we frequently find a nominative singular without -s, which is apparently a survival of the Latin neuter: *m'es bel (greu, parven, semblan, etc.) que...* But the form with -s sometimes occurs in the same constructions: *m'es greus que...*

1. For *es mestier*, see § 91, (3).

105. Most adverbs of manner were formed by adding -men (-ment, -mens, or -menz) to the feminine singular of the adjective: *belamen*. These adverbs were originally ablative phrases: *serēna mēnte*, etc. In Provençal the specific meaning of the -men was forgotten, but the two parts might still be separated by an intervening word: *ępsa... ment*. When two adverbs in -men were used together, the ending was generally affixed to only one, oftener the first. *Bona* and *mala* could be used as adverbs without the suffix.

1. For the adverbial ending -s, see § 82, S, 3.

COMPARISON.

106. Adjectives and adverbs regularly formed their comparative by prefixing *plüs* to the positive, and their superlative by prefixing the definite article to the comparative: *cara, plüs cara, la plüs cara*. This method of comparison goes back to Vulgar Latin times.

1. 'Than' is expressed by *que* and *de*.

107. Some adjectives preserved their old comparative in -ior. These comparatives had an inflection similar to that of *señher*: cf. § 101, (3) and § 101, (3), 1.

POSITIVE

COMPARATIVE

<i>altus</i> :	aut	——	aussor
* <i>bellātus</i> = <i>bēllus</i> :	——	bellaire bellázer-s	bellazor
<i>gēñitus</i> :	gen	génser-s	gensor
* <i>grēvis</i> = <i>gravis</i> :	gręu	gręuger	——
<i>grössus</i> :	grqs	grueýsser	——
<i>laið</i> :	lai	láiger	——
<i>largus</i> :	larc	——	largor
<i>lěvis</i> :	lęu	lęuger	——
<i>lōngus</i> :	lonc	——	lonhōr
(<i>grandis</i>):	(gran)	máier	maiōr
(<i>bōnus</i>):	(bon)	męlher	melhōr
(<i>paucus</i>):	(pauc)	męnre-s	menōr

<i>nūgālis</i> :	——	——	nūalhōr
(<i>malus</i>):	(mal)	peier	peiōr
(<i>mūltus</i>):	(mōlt)	——	plūsōr ^[88]
<i>sōrdīdus</i> :	sorde	sordeier	sordeiōr

108. The following neuter comparatives were used as adverbs: *genseis genses gensetz* (*génsēr* influenced by *longeis, sordeis*); *longeis longēitz* ?**longītius* (*longīter* + *lōngius*); *mais magis*; *mēlhs mēlius*; *mēns mīnus*; *peitz pėjus*; *sordeis sordīdus*; *viatz vivacius*. *Mais, mēlhs, mēns, peitz* were used also as neuter pronouns. *Viatz* lost its comparative sense.

109. A few adjectives, most or all of them learned, preserved the old superlative form with an intensive sense: *altisme, carisme, peşme, prqşme, santisme*.

NUMERALS.

110. The cardinal numerals are:—

ün
 dōs
 trēs
 quatre
 cinc
 şeis
 şet
 ueğ
 nqu
 dētz
 ोंने
 dōtze
 trētze
 quatōrze
 quinze
 şetze, şēdze
 dētz e şet

dẹṭz e uę̃g
 dẹṭz e n̄qu
 vint, vin
 vint e ün
 vint e d̄os
 tr̄enta
 quaranta
 cinquanta
 sessanta
 setanta
 quatre vint
 nonanta
 cent, cen
 dozent
 tresent
 quatre cen
 cinc cens (de)
 mil
 d̄os milia
 tr̄es melia
 quatre mila
 cinc millię̃rs (de)
 cent miria

111. The first two numbers were inflected as follows:—

ü(n)s üna	düi d̄oi	d̄oas d̄os
ü(n) üna	d̄os (düi)	d̄oas d̄os

Düi d̄oi are from Vulgar Latin *dūī* = *dūo*; d̄os is from *dūos*, d̄oas from *dūas*. Tr̄es has a form tr̄ei (originally nom. m.), patterned after düi, and a form tr̄eis, which seems to be a cross between tr̄es and tr̄ei. For the dialect forms of ọn̄ze—s̄et̄ze, see § [76](#), (1), Ndc´, and § [80](#), Dc´. Cen, multiplied by another number, took a plural form when used substantively;

when used adjectively, it generally did not, but we find *dozentas* with a feminine noun. *Mil* had four plurals, *milia miria melia mila*; *milliërs* is a noun.

1. As an example of a longer compound numeral, we have *cen e quatre vint e ueg*.

2. From *ambo* we have the obj. forms, m. and f., *ams*, *ambas*. *Ambo* combined with *dũĩ* (*dũos dũas*), and perhaps influenced by Pr. *ab* (§ 65, P, 2), had this inflection:

<i>amdui</i>	<i>andui</i>	<i>abdui</i>	<i>ambedui</i>	<i>amdoas</i>
<i>amos</i>	<i>andos</i>	<i>abdos</i>	<i>ambedos</i>	<i>amdoas</i>

112. The ordinal numerals had separate forms for the two genders; the masculine forms followed the second declension type, the feminine forms, the first declension. After 5th, they were made by adding to the cardinal numeral the originally distributive ending *-ēnus* *-ēna*.

primiër, *primiëra*

segõn(t), *segõnda*

tërz, *tërza*

quart, *quarta*

quint, *quinta*

seize(n), *seizëna*

setë(n), *setëna*

ochë(n), *ochëna*

novë(n), *novëna*

deze(n), *dezeņa*

onze(n), *onzeņa*

doze(n), *dozeņa*

vintë(n), *vintëna*

centë(n), *centëna*

milë(n), *milëna*

113. Beside *primiër* we find *premiër prümier promiër* (§ 44, 1, 3), and also *prim* and *primeiran*; for the developments of the ending *-iër*, see § 23, 1 and § 73, Ry, 1. *Tërz*, *tërza* regularly became *tërs*, *tërsa* (§ 73, Rty). Such forms as *segõnda*, *tërcia*, *sëxta*, *octava*, *nõna*, *deçima* are learned.

1. As an example of a compound ordinal numeral, we have *vintëna tersa*.

PRONOUNS.

114. Under this head will be treated not only pronouns and pronominal adjectives, but also articles.

115. In popular Latin the personal, possessive, and demonstrative pronouns and adjectives had two sets of forms, according as they were accented or unaccented (§ 19). *Ille*, when stressed and used pronominally, became a disjunctive personal pronoun of the third person; when unstressed and used pronominally, it furnished the conjunctive forms of the third person; when unstressed and used adjectively, it developed into a definite article. *Ipse* had similar uses. These differentiations must have begun in Vulgar Latin times.

116. The declension of *ille* was considerably altered in Vulgar Latin. The neuter *illud* disappeared, being replaced by *ilium*. Through the influence of *quī cūjus cūī*, **illī illūjus*^[89] *illūī*^[89] came to be used beside *ille illūs illī*. The feminine had, beside *illūs illī*, a genitive and dative *illæ*; through the analogy of *illūjus illūī*, *illæ* was expanded into *illæjus*^[89] *illæi*.^[89] *Illūs* then went out of use. In the plural, *illōrum* (which in some regions, by the analogy of *illūjus illūī*, had a form **illūrum*) crowded out *illārum*; this *illōrum* came to be used also as a dative.

Ipse and *iste* followed in the main the same course as *ille*.

ARTICLES.

117. The indefinite article comes from *ūnus*, which seems to have been occasionally so used even in classic Latin:—

ū(n)s	ūna
ū(n)	ūna

118. (1) The definite article comes from unaccented *ille*, which, being used as a proclitic, regularly lost its first syllable (§ 19). *Ille* (**illī*), *illum*, *illī*, *illos*, *illa*, *illas* became respectively *le* (*li*), *lo*, *li* or *lhi*,^[90] *los*, *la*, *las*. *Le*, *lo*, *li*, *lhi*, *la* frequently elided their vowel before another vowel (*l'an*, *l'arma*), becoming *l* or *lh*. Furthermore, *le*, *lo*, *li*, *lhi*, *los*, in the intertonic position after a vowel (*vé lo páire*), regularly lost their vowel (*vəl páire*)^[91]; and, by analogy, *la* and *las* were sometimes reduced to *l* and *ls*. We have, then, beside the full

forms, the proclitics *l*, *lh*, and the enclitics *l*, *lh*, *ls*. Inasmuch as *l* might be vocalized before a dental,^[92] the enclitics *l* and *ls* sometimes became *u* and *us* (*āu* portę, *ēuz* dias antix).

(2) The particles *e* and *que*, with the enclitic *l*, formed combinations *ęl* and *quęl*. *Quęl*, being understood as *qu'el*, gave rise to a form *ęl*.

(3) In the f. nom. sg. there is a form *li* or *lhi*, which is hard to explain. The most likely theory is that when the masculine *quī* took the place of the feminine *quæ* (see § 133), the masculine **īllī* came to be used beside *īlla*,^[93] for the feminine. The Provençal feminine *li* (*lhi*) which resulted was strongly supported by the analogy of a feminine possessive *mi*, beside *ma* (see § 127).^[94]

(4) The regular forms are, therefore, the following:—

		MASCULINE				FEMININE			
Sg.	{nom.:	le	li	l	ęl	la	li	lhi	l lh
	{obj.:	lọ	l	u	ęl	la	l		
Pl.	{nom.:	li	lhi	l	lh	las			
	{obj.:	lọs	ls	us		las	ls		

In many texts the objective forms *lo*, *los*, *ls* are used in the nominative.

1. The m. obj. sg. *le*, obj. pl. *les*, which occur in a few texts, are doubtless French. So is the enclitic form *s* for *ls* or *us*: *de s*, *entre s*, *e s*.

2. The enclitic forms combine as follows with the prepositions *a*, *con*, *de*, *en*, *entre*, *iosta*, *per*, *sus*, and with the conjunctions *e*, *ni*, *o*, *que*, *si*: *al au als aus*, *col*, *del deu dels deus* (*des*), *enl el els eus*, *entrels*, *iostal*, *pel pels*, *sul suls*; *eil* (= *e lhi*) *el* (= *e lo*), *nils*, *oill* (= *o lhi*), *quel*, *sil*. They combine freely with other words: *eral* (= *era le*), *fals* (= *fa los*), etc.

119. In some southwestern and some southeastern dialects we find forms *sọ*, *sọs*, *sa*, *sas*, coming from *īpse*.

PERSONAL PRONOUNS.^[95]

120. In Vulgar Latin *ēgo* lost its *g* (§ 55, G). The dative, *mīhi*, was preserved only in its contracted form, *mī*. After the pattern of *mī*, **tī* and **sī* were created for the other persons.

121. Provençal has no nominative forms that are regularly unaccented. In the conjunctive forms of the third person (not reflexive), the direct object is distinguished from the indirect;

elsewhere there is no such distinction.

CONJUNCTIVE FORMS.

122. Latin *mē* mē, *mī* mī, *nōs* nōs; *tē* tē, **tī* ti, *vōs* vōs; *sē* sē, **sī* si. Me mi, te ti, se si, used as proclitics before a vowel, or as enclitics after a vowel, were reduced to m, t, s: m'ama, t'apela, s'es; *om̄*, *bēt*, *cosīs*. Nōs and vōs, used as enclitics after a vowel, became respectively ns and us; *quēns*, *nōūs*; *sī* vōs sius, later sieus (§ 32). The forms (all objective) for the first and second persons and for the third person reflexive are, then:—

	FIRST PERSON	SECOND PERSON	THIRD PERSON (REFLEXIVE)
<i>Sg.:</i>	mē mi m	tē ti t	sē si s
<i>Pl.:</i>	nōs ns	vōs us	sē si s

The pronouns of the first and second persons could, of course, be used reflexively.

123. The conjunctive forms of the third person (not reflexive) come in the main from the proclitic *ille*: *illī*, *illum*, *illōrum* (**illūrum*), *illos*, *illa*, *illas* became respectively li or lhi, lo, lōr (lūr), lōs, la, las. When used proclitically or enclitically, under the conditions described in § 118, (1), li (lhi), lo, los were reduced to l (lh), l, ls; and l was sometimes vocalized. O *hōc* was employed also, meaning 'it.' The adverb *inde* became ęnt ęn n (and, through the analogy of me m, te t, se s, also ne), which was often used as a pronoun with the sense 'of it', 'of them', sometimes 'of him', 'of her'; nōs ęn nōn, vōs ęn vōn. The adverb *hīc* became i, meaning 'here' or 'there,' which served also as a dative pronoun, 'to it,' 'to them'; it was then always an enclitic, forming a diphthong with a preceding vowel; it regularly took the place of li in the constructions lōi = lo li, lai = la li. The forms are:—

	MASCULINE	FEMININE	NEUTER
<i>Sg. { gen.:</i>	ęnt ęn n nē	ęnt ęn n nē	ęnt ęn n nē
<i>{ dat.:</i>	li lhi l lh i	li lhi l lh i	i
<i>{ acc.:</i>	lō l u	la	lō l q
<i>Pl. { gen.:</i>	ęnt ęn n nē	ęnt ęn n nē	

{ <i>dat.</i> :	lɔr	lür		lɔr	lür
{ <i>acc.</i> :	lɔs	ls		las	

1. *Les* for *los* is doubtless French. *Los*, *ls* were occasionally used for m. *lor*; *lors*, which occurs rarely for *lor*, looks like a cross between *lor* and *los*.

2. The following combinations illustrate the use of the enclitic forms: *aura i*, *be i*, *e l*, *laissa n*, *no i*, *qui ll*, *si ls*.

DISJUNCTIVE FORMS.

124. Vulgar Latin **ěo* or **ěu* ɛu iɛu (§ 30), which before an enclitic became ɛ iɛ (ɛɪ̯ iɛɪ̯). The other forms explain themselves. The nominative *tü*, from the beginning of the 13th century, was sometimes used for *tɛ* after prepositions; this use may have been suggested by the existence of *lū* = ‘him’; § 125, (1). *Nɔs* + ɛn nɔn, *vɔs* + ɛn vɔn.

	FIRST PERSON	SECOND PERSON	THIRD PERSON (REFLEXIVE)
Sg.	{ <i>nom.</i> : ɛu iɛu ɛ- iɛ-	tü	
	{ <i>obj.</i> : mɛ mi	tɛ (ti?) tü	sɛ si
Pl.	{ <i>nom.</i> : nɔs	vɔs	
	{ <i>obj.</i> : nɔs	vɔs	sɛ si

1. We find, besides, the French or borderland forms *ie iou iu yo* for *eu* (*gi* and *iey* have been noted also), *mei tei sei* for *me te se*.

125. The disjunctive pronouns of the third person (not reflexive) come from accented *ille*, with the exception of *q* from *hóc*. *Illūi*, *illōrum*, *illæjus*, *illæi* lost their first syllable, perhaps through elision after a vowel; *illūjus* disappeared. *Ille*, **illī* gave ɛl ɛlh, il ilh; ɛl sometimes vocalized its l. *Illūī* became *lūi*, in some dialects reduced to *lū*. *Illum* became ɛl ɛlh. *Illōrum* (**illūrum*) gave *lɔr* (lür). *Illos* became ɛls (often ɛus) ɛlhs. *Illa*, *īllam* both gave ɛla ɛlha. *Illæjus* became *lɛis liɛis* (in some dialects reduced to *liɛs*).^[96] *Illæi* gave *lɛi* (dialectically *lɛ*) *liɛi*. *Illas* became ɛlas ɛlhas.

(2) In the feminine singular nominative there is, beside ɛla ɛlha, a form *ilh il*. This is probably to be explained, like the feminine article *lhi li*, as coming from the masculine

nominative *īllī introduced into the feminine, and supported by the feminine possessive mi: see § 118, (3).

(3) Some dialects preserve the final -i of ẹli (m. pl. nom.) and ilhi ili (f. sg. nom.): see § 51, 1.

(4) Occasionally the conjunctive li (f. sg. obj.) and lo (neuter sg. nom.) were used as disjunctive forms. And sometimes the masculine lüi lü was used for the feminine.

(5) The forms are, therefore, the following:—

	MASCULINE	FEMININE	NEUTER
Sg.	{ <i>nom.</i> : ẹl ẹu ẹlh il ilh { <i>obj.</i> : lüi lü ẹl ẹlh	ẹla ẹlha ilh il ilhi ili lẹis lẹis lẹis lẹi lẹi lẹ ẹla li lüi lü	ẹl lọ q
Pl.	{ <i>nom.</i> : il ilh ẹl ẹlh ẹli { <i>obj.</i> : lọr lür ẹs ẹus ẹlhs	ẹlas ẹlhas lọr lür ẹlas ẹlhas	

In many texts the objective forms ẹs ẹlhs, lẹis lẹi are used in the nominative. We then find occasionally a new objective, ẹlses.

POSSESSIVES.

126. Beside *měus mėja, tūs tũa, sũas sũa*, there existed in popular Latin the shorter forms *mės? *ma, *tūs *ta, sũs sa. Of the two forms *věster* and *vőster*, only the latter was used. To supply the lack of a third person possessive denoting a plural possessor, *illōrum* came to be employed as a possessive.

SINGULAR POSSESSIVE.

127. (1) The primarily atonic possessives come from the shorter Latin forms. The original masculine singular forms of the first person were displaced by mọs mọ, made on the analogy of tọs tọ, sọs sọ, which come regularly from *tūs *tũm, sũs, sũm; so in the objective plural we find mọs, corresponding to tọs *tōs, sọs sōs. *Měĩ, tũĩ, sũĩ* gave meĩ, toi tũi, soi sũi (§ 34), which, however, were often replaced by the objective forms. *Ma *mam *mas, *ta *tam *tas, sa sam sas became ma mas, ta tas, sa sas; ma, ta, sa often elided their a before a vowel. The formation of *midons* has been explained in § 91, (2);

§ 93, (2); § 118, (3): from it came a feminine singular possessive *mi*, and, by analogy, *ti* and *si*.

(2) The forms are:—

	FIRST PERSON	SECOND PERSON	THIRD PERSON
Sg.	{ <i>nom.</i> : mọs ma mi tọs	ta ti sọs	sa si
	{ <i>obj.</i> : mọ mọn ma mi tọ tọn	ta ti sọ sọn	sa si
Pl.	{ <i>nom.</i> : meị mọs mas	tọi tũi tọs tas	sọi sũi sọs sas
	{ <i>obj.</i> : mọs mas	tọs tas	sọs sas

They are generally used only adjectively, and without the definite article. In some early texts, however, *tọs* and *sọs*, preceded by the article, are used substantively.

128. (1) The primarily tonic possessives come from the longer Latin forms. *Měus měum měi měos* mẹus mệu mệi mệus, which regularly became *miẹus* etc. (§ 30); an analogical form *miẹu* is found beside *miẹi*. In the feminine of the first person we have, instead of **mẹa*, *miẹua* and *mia*: the first of these two forms is evidently made up from the masculine; the second may be due partly to the analogy of *mi*, partly to a proclitic use of the word (§ 44, 4).^[97] In the second and third persons the masculine forms are mainly, and the feminine forms partially, replaced by analogical formations based on the possessive of the first person; *tũi*, *sũi*, *tũa*, *sũa*, however, give regularly *tọi tũi*, *sọi sũi*, *tọa tua*, *sọa sua* (§ 8).

(2) The forms follow, those of the third person (which correspond exactly to those of the second) being omitted:—

	FIRST PERSON	SECOND PERSON
Sg.	{ mẹus miẹus mia miẹua	tẹus tiẹus tọa tua tiẹua tia
	{ <i>nom.</i> : mệu miẹu mia miẹua	tẹu tiẹu tọa tua tiẹua tia
	{ mệi miẹi mias	tọi tũi tẹi tiẹi tọas tuas tiẹuas
Pl.	{ <i>nom.</i> : miẹu miẹuas	tiẹu tias
	{ <i>obj.</i> : mẹus miẹus mias	tẹus tiẹus tọas tuas tiẹuas
		miẹuas tias

They may be used adjectively or substantively, with or without the definite article.

1. We occasionally find a neuter sg. nom. form without final -s: *lo mieu*.

PLURAL POSSESSOR.

129. *Nöster*, *vöster* developed regularly after the *pauper* model: § 103, (1). The masculine singular nominative often took an -s: cf. § 96; § 101, (1). Some southeastern dialects preserved the -i of *nqstri*: cf. § 51, 1. Beside *vqstra* we occasionally meet *vqstri*, due to the analogy of feminine *mi*, *ti*, *si*.

	FIRST PERSON	SECOND PERSON	THIRD PERSON
Sg.	{ <i>nom.</i> : <i>nqstre-s</i> <i>nqstra</i>	<i>vqstre-s</i> <i>vqstra vqstri</i>	<i>lor lür</i> <i>lor lür</i>
	{ <i>obj.</i> : <i>nqstre</i> <i>nqstra</i>	<i>vqstre</i> <i>vqstra vqstri</i>	<i>lor lür</i> <i>lor lür</i>
Pl.	{ <i>nom.</i> : <i>nqstre nqstri</i> <i>nqstras</i>	<i>vqstre</i> <i>vqstras</i>	<i>lor lür</i> <i>lor lür</i>
	{ <i>obj.</i> : <i>nqstres</i> <i>nqstras</i>	<i>vqstres</i> <i>vqstras</i>	<i>lor lür</i> <i>lor lür</i>

These forms are used adjectively or substantively, with or without the definite article.

1. In later times *lor* came to be inflected like a one-gender adjective: § 103, (2).

DEMONSTRATIVES.

130. Latin *īdem* went out of use. Latin *īs* was preserved only in the phrase *īd īpsūm* (*ad īd īpsūm* *adēs*), and in the combination *ēccūm*, in which it ceased to be recognized, so that *ēccū* was regarded as a synonym of *ēcce*.

131. (1) The demonstrative particles *ēcce* and *ēccū* were often prefixed to pronouns in Vulgar Latin. Being thus proclitically used, they frequently lost their first syllable (§ 19); sometimes, however, under the influence of *ac* (as in *ac sīc* *aissi*), they preserved it, assuming the vowel of *ac*: *ecce īlla* *aicēla*, *eccū'īsta* *aqēsta*; cf. § 43, (2).

(2) The suffix *-met* was used in Vulgar Latin as an intensive prefix. Its change of place was probably due to such phrases as *sēmet īpsūm*, understood as *sē metīpsūm*. The -t, before a vowel, regularly gives -d- (*met-īpsūm* *mēdes*); but we find, besides, -z- (Lat. *d*), introduced perhaps through the analogy of *īd* in *īd īpsūm* (**medīpsūm* *mezeis*); and also -t- (Lat. *tt*), which may be the result of a combination of *met-* and *īd-* (*met-īd-īpsūm* **metdīpsū* *metēis*).

132. The pronouns preserved, either in their simple form or combined with a prefix, are the following:—

(1) Of *hīc* only the neuter, *hōc*, was kept *Hōc* q; *ecce hōc* aiçq aissq, and çq so; *eccu'* *hōc* aquō acō. All of these are invariable.

(2) *Iipse* appears as *ēps ēpsa*, *ēus ēussa*, *ēis ēissa* (with a m. pl. *ēisses* and a neuter *ēis*); the last forms are the commonest; for the development of the *ps*, see § 79 and § 80, Ps. *Met-īpse* gives (medips) *medēs*, (meteish) *meteīs*, and, more commonly, *mezeīs* (f. *mezeīssa*, neuter *mezeīs*); see § 131, (2). **Met-īpsīmus* becomes *medēsme-s*, *mesēsme-s*, *meēsme-s* (§ 65, D), with feminine forms in -a. Unaccented *īpsum* is probably one source of the neuter *sq*: cf. § 132, (1). For the article (so, sa), see § 119.

(3) *Ille*, uncombined, developed into an article (§ 118) and a personal pronoun (§§ 123, 125), but went out of use as a demonstrative. Combined with *ecce* and *eccu'* it gave: *aicēl* *aissēl*, *çēl*, *sēl*; *aquēl*. *Echēl* (pronounced *ekēl*?) seems to come from *eccu' ille* with its original initial vowel preserved. *Iipse ille* perhaps gave rise also to a *sēl*, which ultimately coincided with the form coming from *ecce ille*. There is a neuter *aicelo*, perhaps *aicēl* + q. *Çēl* will illustrate the inflection of all these words; the forms are to be explained like those of the disjunctive personal pronoun (§ 125):—

		MASCULINE		FEMININE
Sg.	{nom.:	<i>çēl</i> <i>çeu</i> <i>çēlh</i> <i>çēls</i> ^[98] <i>cellüi</i>		<i>çēla</i> <i>celha</i> <i>cil</i> <i>cilh</i> <i>cilha</i> ^[99]
	{obj.:	<i>çēl</i> <i>çeu</i> <i>çēlh</i> <i>cellüi</i>		<i>çēla</i> <i>çēlha</i> <i>celēi</i> <i>celēis</i> <i>celiēis</i> <i>cilh</i>
Pl.	{nom.:	<i>cil</i> <i>cilh</i> <i>çēlh</i> <i>çēls</i> ^[100]		<i>çēlas</i> <i>çēlhas</i>
	{obj.:	<i>çēls</i> <i>çēlhs</i> ^[101]		<i>çēlas</i> <i>çēlhas</i>

(4) *Iste* gave *ēst*, *ēstz*, *ēsta*, *ēstas*. *Ecce iste* became *aicēst* (not common) and *çēst* *sēst*; *eccu' iste* became *aquēst* *echēst*, and *chēst*. *Aquēst* will illustrate the inflection; the forms are to be explained like those of *çēl*:—

		MASCULINE		FEMININE
Sg.	{nom.:	<i>aquēst</i>		<i>aquēsta</i> <i>aquist</i> <i>aquisti</i>
	{obj.:	<i>aquēst</i>		<i>aquēsta</i>

Pl.	{ <i>nom.</i> :	aquist	aquisti	aquęstas
	{ <i>obj.</i> :	aquęstz	aquętz	aquęstas

INTERROGATIVES AND RELATIVES.

133. The interrogative and relative pronouns were confused and combined in Vulgar Latin, *quī* taking the place of *quīs*, and *quīd* gradually encroaching on *quōd*. Furthermore, the masculine forms were used instead of the feminine, which disappeared. We have in Provençal no evidence of the survival of any other cases than the nominative, dative, and accusative singular and the nominative plural:—

MASCULINE AND FEMININE					NEUTER
	<i>{nom.:</i>	<i>quī</i>	qui	<i>quīd</i>	que, (<i>before vowel</i>) quez
Sg.	<i>{dat.:</i>	<i>cūī</i>	cüi	<i>cūī</i>	cüi
	<i>{acc.:</i>	<i>quēm</i>	que	<i>quīd</i>	que, (<i>before vowel</i>) quez
Pl.	<i>nom.:</i>	<i>quī</i>	qui	<i>quæ</i>	que

The distinction between que *quēm*, que quez *quīd*, and que *quæ* could not be maintained; we have, then, simply three forms: a nom. sg. or pl. qui, a nom.-acc. sg. or pl. quę (quęz), a dat. sg. or pl. cüi (sometimes written *qui*).

134. We have also *qualis*, which came to be inflected like *fezels*: see § [103](#), (2); the feminine singular, however, often dropped its -s, and sometimes took the ending -a (*cal*, *cala*). *Quīnam* apparently became *quina*, which, understood as a feminine form, developed a masculine, *quin*. There seems to have been also a **quīniam* (cf. *quōniam*?), which gave *quinh*, *quina*. Cf. D. Behrens in the *Zeitschrift für französische Sprache*, XVII, ii, 67-8, footnote. The phrase *de ūnde* became *dont*, *dōn*, which was often used with the meaning ‘of which’, ‘of whom’.

135. (1) In Provençal the interrogative pronouns are: qui, ‘who’ or ‘whom’; que quez, ‘what’; cüi, ‘to whom’ or ‘whom’, ‘to what’ or ‘what’ (*obj.*); *cals* (either alone or preceded by the definite article, inflected as in § [134](#)), ‘which’; *quin quinh*, *quina quinha*, ‘which’. *Cals* is used also as an adjective.

(2) The relative pronouns are: *qui*, ‘one who’, indefinite (used also, in early texts and in southwestern Languedoc, as the regular relative pronoun for persons); *que* *quez*, ‘who’ or ‘whom’, ‘which’; *cüi*, ‘whom’, ‘which’ (generally used as indirect object of a verb, or after a preposition); *lo cals* (inflected as in § 134), ‘who’ (‘whom’), ‘which’; *don dont*, ‘of which’, ‘of whom’.

INDEFINITE PRONOUNS AND ADJECTIVES.

136. The following words call for special mention:—

(1) *Alcüs* **alīqu*’ *ūnus* = *alīquī ūnus*, ‘someone’. Inflection: *alcüs*, *alcü(n)*; *alcüna*.

(2) *Alquant* *aliquantum*, *aliquanti*, ‘somewhat’, ‘some’; diminutive, *alquantet*.

(3) *Alques* *alque* *alīquid*, used as an invariable neuter pronoun or adverb, ‘something’, ‘somewhat’. The -s form, which originally developed before a vowel, was preferred because of the analogy of other neuter pronouns and adverbs. The preservation of the *e* is due to association with *quez que*. *Alque* was sometimes used as an adjective.

(4) *Als* *al au*, used as an invariable neuter pronoun, ‘something else’. *Al* (*au*) may have been detached from *alques*, understood as *al ques*. Meyer-Lübke, however, takes it, as well as Old French *el*, from **alum* = *aliud*: *Gram.*, II, p. 649. *Als* owes its -s to the analogy of other neuter pronouns, such as *alques*, *ëis*, *mais*, *mêlhs*, *mêns*, *pëis*, etc.

(5) *Altre* *autre* *alter*, ‘other’, pronoun and adjective. A dative **altrūi*, following *illūi*, goes back to Vulgar Latin. The Provençal forms *autrüs*, *autrü* show the influence of *alcüs* and *negüs*; *autri* belongs to the southeastern dialects (cf. *aqueli*, *eli*, *nqstri*, *tüti*, etc.). Inflection:—

		MASCULINE			FEMININE
Sg.	{ <i>nom.</i> :	<i>autre</i>	<i>autres</i>	<i>autrüs</i>	<i>autra</i>
	{ <i>obj.</i> :	<i>autre</i>	<i>autrüi</i>	<i>autrü</i>	<i>autra</i>
Pl.	{ <i>nom.</i> :	<i>autre</i>	<i>autri</i>		<i>autras</i>
	{ <i>obj.</i> :	<i>autres</i>			<i>autras</i>

(6) *Altretals* *autretals* *alter talis*; by dissimilation, *atretals*: by substitution of *ai-* (first syllable of *aissi* *ac sīc*) for *atre-*, *aitals*; by fusion of *aitals* and *atretals*, *aitretals*; through

analogy of atressi, atrestals. Cf. § 74, 2. Inflection like that of cals (§ 134).

(7) Altretan atretan aitan atrestan etc. *alter + tantum*: see altretals.

(8) Cada un κατά + *ūnum*, ‘every one’. The Greek preposition κατά was introduced into the Latin territory, probably by Greek merchants, in stating prices: καθ’ ἕνα = *cata ūnum*, κατά τρεῖς = *cata trēs*; hence cada ün, cada treï. Inflection: cada üs, cada ü(n); cada üna.

(9) Calacom qualacom qualaquom, ‘something’, ‘a little’, seems to be a Provençal compound of cal and acq (§ 132), the last syllable of which was perhaps understood as com cō *quōmō(do)*. Cf. quezacom below. There is a diminutive calacomet, which helped to maintain the m of calacom.

(10) Cals que quals que, cal que qual que, ‘whoever’, is a Provençal compound.

(11) Cant quant can quan *quantum quanti*, ‘how much’, ‘how many’. Cant, inflected like bēl (§ 103), is used also as an adjective and as a masculine and feminine pronoun.

(12) Cascüs chascüs, ‘everyone’, ‘every’, appears to be a fusion of cada üs and *cescüs *cisqu’ *ūnus = quīsq̄ue ūnus = ūnus quīsq̄ue*. Inflection: cascüs, cascü(n); cascüna.

(13) Ent en n ne *inde*, ‘some’: cf. § 123.

(14) Maint mant man manh Celtic **mantî*, ‘many’, ‘many a’, ‘many a one’. Obj. pl. in -s, f. sg. in -a, f. pl. in -as.

(15) Molt mout mot mul mon *mūltum*, ‘much’. For mōt, mul, mōn, see § 74, (2) and § 74, 1. Mōlt, inflected like bēl (§ 103), is used also as an adjective and as a masculine and feminine pronoun.

(16) Negüs *nēc ūnus*, ‘no one’. Inflection: negüs, negü(n); negüna. Beside negün we find degün, apparently through dissimilation.

(17) Nüls *nūllus*, ‘no’, ‘none’. Inflection: nüls, nül, nül, nülh, nüls; nüla, nülas. From nülh *nūllī* comes a set of forms with lh: see § 67, (2). Hence, by metathesis suggested by the analogy of negün, lhün. A fusion of nülh and lhün results in lünh, whence a set of forms with nh.

(18) Om *hōmo*, ‘one’.

(19) Pauc *paucum, pauci*, ‘little’, ‘few’. There is also a regular adjective, paucs, ‘small’.

(20) Que que, ‘whatever’, is a Provençal compound.

(21) Quecs *quīsqvis* (§ 78, 2), ‘everyone’. From quecs were formed an objective quec and a feminine quega (cf. amics amic amiga).

(22) Quesacom (diminutive quesacomet), ‘something’, ‘a little’, is formed like calacom above, the first element in this case being either quec *quīd* or que s = que es.

(23) Qui que, ‘whoever’, is a Provençal compound.

(24) Res re, ‘anything’, ‘something’.

(25) Tals *talis*, ‘such’, inflected like cals (§ 134).

(26) Tamanh *tam magnum*, ‘so great’; f. tamanha.

(27) Tant tan ta *tantum, tanti*, ‘so much’, ‘so many’. Tant, inflected like bēl (§ 103), is used also as an adjective and as a masculine and feminine pronoun.

(28) Totz *tōttus = tōtus* (*Gram.*, I, § 547), ‘all’, had a regular inflection: tōtz, tōt, tōt, tōtz; tōta, tōtas. In the masculine nominative plural, however, we find oftener the forms tüch tüich tüit tüt tüti, which point to a Latin **tūctī* (cf. Italian *tutti*); for this no satisfactory explanation has been discovered (see Nigra, *Rom.*, XXXI, 525). Hence we occasionally have in the singular tütz, tüt, and in the objective plural tūgz tütz; the last form occurs also as a nominative plural. Tōt is frequently used as a neuter pronoun and as an adverb.

(29) Üs, ‘some’; from *ūnus*, used as an indefinite adjective or pronoun, we have the plural forms; ü(n), ü(n)s; ünäs.

2. CONJUGATION.

THE FOUR CONJUGATIONS.

137. (1) In Vulgar Latin there were some shifts, the verbs of the second and third conjugations being particularly unstable: *cadēre*, *capēre*, *sapēre*, for instance, often passed into the second, while *mōvēre*, *rīdēre* frequently followed the third, and *mōri*, *sēqui* usually went into the fourth. *Pōsse*, *vēlle*, with the new infinitives **potēre*, **volēre*, were made to conform with more or less regularity to the second conjugation type. Beside *do*, *dant*, *sto*, *stant*, there came into use the forms **dao*, **daunt*, **stao*, **staunt*. Beside *facēre* there doubtless existed a verb **fare*,^[102] strongly influenced by *dare* and *stare*; the first suggestion of shortening probably came from the monosyllabic imperative singular *fac* (or *fa*^[103]), which must have led to a plural **fate* beside *facite*. *Habēre* and *vadēre*^[103] also came

under the influence of *dare* and *stare*; the former adopted, beside *habeo*, *habes*, *habet*, *habent*, the forms **ho*, **has*, **hat*, **hant* or **haunt*. *Vadēre* generally lost its past tenses, which were replaced by *īre* and, in southern Gaul, by *annare*.^[104]

(2) In Provençal the first conjugation was well preserved, and the fourth lost but little. The second and the third lost many verbs (especially learned words) to the fourth: *delir*, *emplir*, *envazir*, *espandir*, *fugir*, *iauzir*, *merir*, *regir*, *relinquir*, *reluzir*, *vertir*;^[105] *cōzer* *cozir* *consuēre*,^[106] *devire* *devezir* *divīdēre*, *dire* *dir* *dīcēre*, *lēire* *legir* (also *lire* *lir*) *lēgēre*, *querre* *querir* *quærēre*, *sēgre* *seguir* *sēqui*, *tenēr* *tenir*^[107] *tenēre*. Moreover, the second and third conjugations, which in Provençal differed practically only in the infinitive, were much confused: *caber*, *cazer*, *mōdre*, *rire*, *saber*; *cōre* *accorrer*, *mentaver* *mentaure* *mente habēre*, *mover* *mōure*, *querre* *querer*, *redēbre* *rezemer* *redīmēre*. Uc Faiddit, a 13th century grammarian, enumerates about 500 verbs in -ar, about 100 in -er and -re, and a little over 100 in -ir.

138. The inchoative ending -*scēre* lost its original sense. The -*isc-* type, for verbs of the fourth conjugation, was very widely extended, the -*isc-* becoming a part of the regular present stem of the fourth conjugation, and disappearing from the infinitive: *finīre*, **finīscō* *finir*, *finisc*. An obscure substitute for the Latin -*ēsc-* type produced an ending -*eissir* -*ezir* -*zir* (*dis-pigrēscēre* = *despereissir*, *evanēscēre* = *envanezir*^[108]), which was used in forming some new verbs: *enfolezir*^[109] *fōl*, *envelhezir* *vēlh*, *envelzir* *vil*, *esclarzir* *clar*, *escürzir* *escür* *oscür*, *espaorzir* *paōr*.^[110] The -*āsc-* and -*ōsc-* types appear in old verbs: *irāscēre* *irāisser*, *co(g)nōscēre* *conqisser*.^[111]

139. New verbs were formed, in late Vulgar Latin and in Provençal, only in the first and fourth conjugations. The commonest suffixes were -*āre*, -*iāre*, -*icāre*, -*idiāre* (-*ίζειν*: § 57, Z), -*īre*: **oblītāre* *oblidar*, **altiāre* *aussar*, **carricāre* *cargar*, **werridiāre* *guerrear*, **abbellīre* *abelir*. Germanic verbs generally went into the first conjugation, except those in -*jan*, most of which entered the fourth: *roubōn* *raubar* (also *raubir*), *wītan* *guidar*; *furbjan* *forbir*.

FUNDAMENTAL CHANGES IN INFLECTION.

140. The Latin perfect passive took the sense of a present; *amātus est*, for instance, under the influence of such phrases as *carus est*, came to mean 'he is loved'. This led to the establishment of an entire passive inflection made up of the perfect participle and the parts

of the verb *ēsse*; and the old passive forms were gradually abandoned, leaving no trace (save the perfect participle and possibly the gerundive) in the Romance languages. So the passive is constructed in Provençal as in French: *es amatz, era amatz, fò amatz, será amatz*, etc.; the participle regularly agrees with the subject in gender and number. Latin deponent verbs became active: *mōri* morir, *sēqui* seguir.

141. (1) Such phrases as *īd habeo factum* shifted their meaning from ‘I have it done’, etc., to ‘I have done it’, etc. The Latin perfect came to be restricted to its aorist sense, and the perfect was expressed by compounds of *habēre* with the perfect participle. In the Romance languages all compound tenses were eventually formed in this way: *ai cantat, avia cantat, aurai cantat*, etc. In Provençal the auxiliary is sometimes *ēsser*, instead of *avēre*, if the main verb is reflexive, passive, or neuter; *ēsser* is particularly common with neuter verbs of motion: *soi vengūtz*.^[112] A participle used with *avēre* may agree in gender and number with the direct object, if there is one: *ai cantat or cantada la canso*.

(2) The Latin perfect indicative continued to be used as an aorist, and is the source of the preterit in Provençal, as in the other Romance languages: *vīdī* vi, ‘I saw’. The pluperfect indicative survived in some regions; in Provençal it is used with the sense of a conditional: *fūerat* fōra, ‘he would be’. The future perfect indicative and the perfect subjunctive did not remain in Provençal: *amavēro* = *aurai amat*, *amavērim* = *aia amat*. The pluperfect subjunctive assumed the functions of the imperfect, which disappeared from nearly every part of the Romance territory: *audīssem* (for *audīrem*) auzis. The perfect infinitive left no trace: *audīsse* = *avēre auzit*.

142. The Latin future, which was not uniform in the four conjugations, and, in the third and fourth, was liable to confusion with the present subjunctive, was gradually replaced by various periphrastic constructions: instead of *faciam* people said *factūrus sum, dēbeo facēre, vōlo facēre, habeo (ad) facēre*, etc. The construction that prevailed in the greater part of the Empire was *facēre habeo*, a combination of the infinitive with the present indicative of *habēre*. The verb *ēsse* was the only one that ultimately retained the old future beside the new: Pr. *ēr, ērs, ēr*, beside *serāi serās serā*; in the plural, only *serēm, serētz, serán*. The new composite future was occasionally used by Tertullian, St. Jerome, and St. Augustine, and became common in Italy by the 6th century.^[113]

(2) As an imperfect of the future, there was evolved a combination of the infinitive and the imperfect or perfect indicative. To correspond to *dīcit quod venīre habet*, was constructed *dīxit quōd venīre habēbat* (or *habuit*); to match *sī pōssum, venīre habeo*, was

made *sī potuīsem, venīre habēbam* (or *habuī*). In Gaul, as in most of the Empire, only the imperfect of *habēre* was used for this purpose. Traces of such a construction are found as early as the 3d century. This form is generally called the *conditional*, and it existed in Provençal side by side with the conditional described in § 141, (2): *sería, serías, sería*, etc., beside *fõra, fõras, fõra*, etc. The Romance languages developed also a perfect conditional: *auría agüt* = ‘I should have had’.

143. (1) The present participle remained in use as an adjective: *fīlias placentes* filhas plazens; cf. § 101, (3). In its verbal function it was replaced by the ablative of the gerund: *vēnit accūrens vēnit accūrendo* ven acorřen. In most Provençal dialects, however, the present participle and the gerund coincided in form (*amantem* and *amando* both *amán*), the gerund being distinguished from the participle only by its lack of inflection: see § 76, (2).

(2) The gerund retained only the ablative case, the use of which was considerably extended: see above. In its other cases it was replaced by the infinitive: *artem dīcendī artem dīcēre* art de dire. The supine, too, was replaced by the infinitive: *vīsum vēnit nōs vēnit nōs vīdēre* ven nõs (a) vezēr.

INFINITIVE, PRESENT PARTICIPLE, AND GERUND.

144. The infinitive endings *-āre, -ēre, -īre* regularly became *-ar, -er, -ir*; *-ēre* became *-re* or *-er*: see § 48, (1) and § 52, (1). Ex.: *amāre* amár, *vīdēre* vezēr, *audīre* auzir; *tōllēre* tǒltre, *nascēre* náisser, *dīcere* dire dízer. For shifts of conjugation, see § 137.

1. The fourth conjugation verbs *enantiŕ, gauzir, grazir, murir, servir* sometimes took a final *e* by the analogy of *devire* (*divīdēre*), *dire, rire*. On the other hand, *dire* occasionally lost its *-e* by the analogy of the fourth conjugation. *Lire* for *leire* (*lēgēre*) is probably French, and *lir* is to be explained like *dir*.

2. *Far* beside *faire* doubtless comes from **fare* = *facēre*: see § 137, (1). *Trar* beside *traire* (**tragēre*) follows *far*.

3. *Escriure* (*scribēre*) sometimes became *escrire* through the analogy of *dire*.

4. Some verbs that passed from the second to the third conjugation preserved the old infinitive as a noun: *debēre* *deure devér*, *placēre* *plaire plazér*.

145. The endings *-antem -ando, -entem -endo* regularly became *-an* or *-ant, -en* or *-ent*: § 76, (2). See § 143, (1). The endings *-iēntem -iēndo* lost their *i* in Vulgar Latin (§ 40, 1), and were thus reduced to *-entem -endo*. Ex.: *amantem amando* amán (or amánt), *vidēntem vidēndo* vezén (or vezént), *credēntem credēndo* crezén (or crezént); *sapiēntem sapiēndo* **sapēntem *sapēndo* sabén (or sabént), *partiēntem partiēndo*

***partentem *partendo** partén (or partént). Fourth conjugation verbs which adopted the inchoative -sc- (§ 138), generally introduced it into the present participle and the gerund: florir, florissén. Cf. § 155. For the declension of the present participle, see § 101, (3).

PAST PARTICIPLE.

146. The Provençal past participle comes from the Latin perfect participle. It is to be noted that verbs which originally had no perfect participle were obliged to create one in order to form their compound tenses: see § 141, (1). Past participles in Provençal, when inflected, were declined like *bèl*: §§ 102; 102, 1; 103, (1). See § 141, (1).

147. In the first and fourth conjugations the endings were *-ātum* and *-ītum*, which regularly became -at and -it: *cantātum* cantát, *finītum* fenít. The first conjugation verbs which had a form in *-ītum* discarded it for *-ātum*: *crepāre crepītum* = crebár crebát. On the other hand, *aperīre* and *operīre* preserved their participle in *-ērtum*: cubrir (*cooperīre*), cubért (also cubrít); ubrír (*aperīre* + *cooperīre*), ubért. By the analogy of these, *sufrire* (*suffēre*) and *ufrir* (*offēre*) have sufért (also sufrít), ufért. *Tenēre* tenir keeps its Provençal second conjugation ending, *tengūt* (see § 148); and *venir*, following the analogy of *tenir*, has *vengūt*.

148. (1) Most Latin verbs of the second and third conjugations had no accented ending, but a few had an ending *-ūtum*, which corresponded very well to the *-ātum* and *-ītum* of the first and fourth: *arguēre, argūtum*; *consuēre, consūtum*; *sēqui, secūtum*; *solvēre, solūtum*; *volvēre, volūtum*. This ending was considerably extended in Vulgar Latin, especially to verbs having a perfect in *-ūi*: *habēre, habūi, habītum *habūtum*. In Provençal it spread still further: *cazēre, cazēc, cazegūt*. Inasmuch as it was closely associated with the perfect, it came to be attached, more and more frequently, to the stem of that tense.

(2) Of the Provençal verbs of the second and third conjugations, about half adopted the ending -ūt. In some the -ūt is added to the stem of the infinitive: *crezūt, defendūt, escondūt, molūt, perdūt, resemūt, respondūt, rompūt, vendūt, vezūt veūt*. Most of the verbs, however, attach the -ūt to the stem of the preterit: *nasc, nascūt*; *pasc, pascūt*; *tems, temsūt*; *tesc, tescūt*; *venc, vencūt* (from *vēnsen*); *visc, viscūt*. A few have both forms: *agūt avūt*; *cazegūt cazūt*; *vengūt venūt*. It is to be noted, in the case of verbs that add -ūt to the preterit, that if the third person singular of the preterit ends in a voiceless consonant preceded by a vowel or l or n, that consonant is voiced in the participle: *ac, agūt*; *bēc, begūt*; *cazēc, cazegūt*; *conēc, conogūt*; *crēc, cregūt*; *deēc, degūt*; *elēc, elegūt*; *mēc, mogūt*; *nēc, nogūt*; *plac, plagūt, plēc,*

plogüt; pQC, pogüt; remas, remazüt; saup, saubüt; sęc, següt; tęc, tengüt; tQlc, tolgüt; valc, valgüt; vęc, vengüt (from venir); vQlc, volgüt. Exceptions are ceupüt, saupüt (beside saubüt), and vencüt (from vęnser): for ceupüt, saupüt, cf. § 65, P, 3; in vencüt the c was perhaps kept to distinguish the word from vengüt (venir).

(3) The other half of the second and third conjugation verbs generally preserved the old participle with no accented ending: ars, cęing, claus, dich, düit, estreit, fach, iQinch, męs, Qnh, pQst, pęc, trach, etc. Some of these have also forms in -üt: defęs defendüt, elig esleüt elegüt, escQs escondüt, mQut molüt, nat nascüt, remas remazüt, rQt rompüt, vis vezüt. A few verbs made up new forms without a stressed ending: conquęre, conquęs conquis; redemer rezemer, redems (rezemüt); sQrger, sQrs; tQlre, tQlt tQut; vezęr, vist (vis vezüt veüt); vQlvre, vQut. *Mıttęre* probably had beside *mıssum* a form **mısum* (cf. *mısi*); hence mętre, męs mis. By the analogy of this, prendre has beside pęc a form pris. ęstre borrowed estat from *estar stare*. Escript, from escriure, is probably influenced by the infinitive; escrich follows dich. So, probably, does elig = esleüt, from elegir eslire eslir.

1. For sQ agütZ (= ai estat), which is found not only in some Provençal dialects, but also in southeastern France, French Switzerland, and parts of northern Italy, see § 141, (1), footnote 1.

FUTURE AND NEW CONDITIONAL.

149. For the formation of these parts, see § 142, (1), (2). Ex.: amarái, creisserái, florirái. Verbs of the second conjugation regularly, and verbs of the fourth very often, syncopate the e or i of the infinitive: remanrái, volrás; partrái, venría. Third conjugation infinitives with final e drop this e before the ending; those in -er keep the e: vęndre, vendrái; náisser, naisserái. First conjugation infinitives regularly keep the a (§ 45), but in a few texts (especially the *Girart* and the *Rasos de trobar*) the a is changed to e: cantarái, sonaría, trobarem; blasmerán, comterá.

1. *Esser* keeps the old future forms *er, ers, er*, beside *serái, serás, será* (*serém, serétz, serán*).

150. For the phonetic changes exemplified in aurái, deurái, mourá; plairía; cairá, veirái; valdrái; remandrém, tendría; poiría, see § 70, βr, C´r, Dr, Lr, Nr, Tr. Anar (*annāre*) has beside anarái a form irái from ir (*īre*). ęsser drops its first syllable (serái), perhaps through elision (tu ´sserás, etc.), perhaps in accordance with the general principle stated in § 19. Faire far always makes its future and conditional from the latter form (farái). Sabęr has beside sabrái a form saubrái, due no doubt to the combined influence of aurái and the

preterit saup *sapuit*. Vezer, following the analogy of beurái, deurái, viurái, has veurái beside the regular veirái.

151. The composite nature of the future and conditional was still sufficiently felt, in the literary period, to admit of the separation of the component parts: amar vos ái, dar n'etz, donar lo t'ái, tornar nos ẽm, tornar s'en ía.

FUTURE ENDINGS.

152. For the 1st pers. sg., the Provençal verb used the form **ayo* ai (§ 73, βy); for the 2d and 3d pers. sg. and the 3d pers. pl., the forms **has* as, **hat* a (§ 82, T), **hant* **haunt* an aun (§ 83, Nt): see § 137, (1). In the 1st and 2d pers. pl., *habēmu'* (§ 82, S, 2), *habētis* naturally gave avẽm, avetz (§ 64); but inasmuch as the other four terminations were monosyllabic, the av- was dropped when avẽm, avetz came to be understood merely as future endings. The future is, therefore, inflected as follows:—

cantar-ái	cantar-ẽm
cantar-ás	cantar-etz, -es, -et
cantar-á	cantar-án, -ánt, -áun, -áu

1. In Gascony and Languedoc we find -ei for -ai: see §§ 23, 2; 162, (4). In Gascon and in the modern dialects of some other regions -am is used for ẽm. In some dialects of Béarn, Languedoc, Provence, and Dauphiné, -ẽm becomes -ẽn: cf. § 65, M, 1; also § 167, 2.

CONDITIONAL ENDINGS.

153. *Habēbam* aβẽβa (probably through dissimilation: § 87, β) aβẽa avía (§ 26); so avías, avía, aviám, aviátz, avían. But inasmuch as the conditional was formed in imitation of the future, and none of the future forms retained the av-, the conditional endings were reduced to -ía, -ías, -ía, -iám, -iátz, -ían. Some dialects, which substituted -on for -an, introduced -íon into the conditional: § 169. The conditional is, therefore, inflected as follows:—

cantar-ía	cantar-iám
cantar-ías	cantar-iátz, -iás, -iát
cantar-ía	cantar-ían, -íon, -ío

1. In verse these endings are sometimes counted as monosyllabic: poiríā. Guiraut Riquier uses -iátz for -iát. In some dialects of Béarn, Languedoc, Provence, and Dauphiné, -iám becomes -ián: cf. § 65, M, 1; also § 167,

PRESENT.

154. The personal endings will be discussed separately in §§ [164-169](#).

155. The Provençal present indicative and subjunctive come, in the main, directly from the corresponding parts of the Latin verb:—

<i>amo</i>	am	<i>amāmu'</i>	amám	<i>faciam</i>	fassa	<i>faciāmu'</i>	fassám
<i>amas</i>	amas	<i>amaātis</i>	amátz	<i>facias</i>	fassas	<i>faciātis</i>	fassátz
<i>amat</i>	ama	<i>amant</i>	áman	<i>faciat</i>	fassa	<i>faciant</i>	fássan

In the 4th conjugation, however, most verbs have adopted the originally inchoative -sc- (§ [138](#)) and incorporated it into the inflection of the present, except in the 1st and 2d pers. pl. of the indicative:—

<i>florīscō</i>	florísc	<i>florēmu'</i>	florēm ^[114]
<i>florīscis</i>	florís florísses	<i>florētis</i>	florēt ^[114]
<i>florīscit</i>	florís	<i>florīscunt</i>	floríscon
<i>florīscam</i>	florísca	<i>floriscāmu'</i>	floriscám
<i>florīscas</i>	floríscas	<i>floriscātis</i>	floriscátz
<i>florīscat</i>	florísca	<i>florīscant</i>	floríscon

We occasionally find such forms as *florissēm*, *florissētz*, and *florám*, *florátz*.

1. The s coming from sc' was of course originally palatal; it is sometimes written *sh*. The sc of the 1st pers. sg., the 3d pers. pl., and the whole pres. subjunctive was replaced, in some dialects, by s or sh: *floris* *florish*, *florisson* *florishon*, *florissa* *florisha*.

156. Of the Latin imperative forms, only the present active, 2d pers. sg. and pl., remained in use. The Provençal verb kept the sg., but substituted for the pl. the 2d pers. pl. of the present indicative:—

<i>ama</i>	ama	<i>tēne</i>	ten	<i>crēde</i>	cre
<i>amāte</i>		<i>tenēte</i>		<i>crēdite</i>	
<i>amātis</i>	amátz	<i>tenētis</i>	tenēt ^[115]	<i>*crēdītis</i> ^[115]	crezēt ^[115]
<i>partī</i>		part	<i>fīnīsce</i>	finís	

partīte partītis

partētz^[115]

finīte finītis

finētz^[115]

In negative commands the present subjunctive is generally used instead of the plural imperative, and sometimes the infinitive is employed instead of sg. or pl. The verbs *auzir*, *avēr*, *dire*, *ēsser*, *saber*, *vezēr*, *volēr* regularly took their imperative forms from the present subjunctive: *áuias*, *digátz*, *veiátz*, etc.

1. *Fait* *facīte* (beside *faitz*) seems to come directly from the Latin form.

2. Before *vos* the pl. drops final *-tz* (or *-t?*): *departe vos*, *vene vos*. *Ve vos* becomes *veus*; a fusion of *ve vos* and *ec* *eccum* results in *vecvos*.

DOUBLE STEMS.

157. Differences in accentuation and in the environment of vowels or consonants regularly developed different stems in different parts of some verbs. For instance, *ádjūtāre* *aidar* (§ 45), while *adjūtāt* *aiüda*.

158. Sometimes, as above, an intertonic vowel disappeared: *mándūcāre* *maniar*, *mandūco* **mandüc* *manüc*; **parabolāre* **páraulāre* *parlar*, **parabōlat* **paraulat* *paraula*. In such cases the shortened stem usually prevailed: *mania*, *parla*. But in *adjutare* the longer one was preferred: *aiüdar*.

159. (1) A vowel which breaks in one part of a verb may be unstressed, and therefore remain unbroken, in another part: *probāre* *proar*, *prōbat* *prueva*,^[116] **sequīre* *sęuir*, **sęquit* *sięc*.^[117] In such cases the phonetic development is generally undisturbed.

(2) A vowel which breaks in one part of a verb may, with different environment, remain unbroken even in another part in which it is stressed: **volēre* *volēr*, **vōleo* *vuelh*, **vōlet* *vql*. If the breaking occurs in the 1st pers. sg., the phonetic development is regularly undisturbed; if it occurs in the 2d and 3d pers. sg., it is generally carried into the other forms in which the vowel is stressed: *cōlligit* *cuęlh*, hence *cuęlh* = *colligo*; *ęxit* *ięis*, hence *ięsc*, *ięscon*, *ięsca*.

160. A consonant may be followed by *e* or *i*, and so palatalized, in one part of the verb, and not in another: **cadeo* *chai*, **cadēmu'* *chazęm*; *dēbeo* *dęch dęi* (§ 73, *ęy*), *dębet* *dęu*; *faciat* *fassa*, *facēre* *faire*; *fūgio* *füi*, *fugēre* *fugir*; *jaceam* *iassa*, *jacēre* *iazęr*^[118]; *placeāmu'* *plassám*, *placēmu'* *plazęm*; *sapiam* *sapcha*, *sapit* *sap*; *tēneo* *tenh*, *tēnet* *ten*; *valeo* *valh*, *vales* *vals*; *vēniat* *venha*, *venīre* *venir*;

vīdeam veia, *vidētis* vezetz; **vōleo* vuēlh, **vōlet* vql. Verbs in -eo generally keep this distinction; but we find *mōva*, *somóna*, *tēma* = *mōveam*, *submōneam*, *tīmeam*. Most verbs in -io, on the other hand, dropped the *i* in Vulgar Latin: *partio* **parto* part, *partiunt* **partunt* parton, *partiam* **partam* parta; sen, senton, senta; siērf, siērvon, siērva; etc. A few verbs show forms both with and without the *e* or *i*: *audio* auch (*audiam* auia), **audio* au; *crēdo* crē, **crēdeo* crēi^[119]; *vīdeo* vēi^[119], **vīdo* vē.

161. Verbs in -ng- naturally developed a palatal consonant before e or i (§ 73, Ng'), but not before other vowels: *cīngēre* cēnher, *cīngo* cēnc, *cīngit* cēnh, *cīngam* cēnga; so *fēnher*, *ōnher*, *plānher*, *pōnher*, etc. The palatal was carried by analogy into the parts that were originally without it: hence the double forms *cēnc cēnh*, *cēngon cēnhon*, *cēnga cēnha*, etc. These double forms led *tēnher*, *venir* to adopt *tēnc*, *vēnc*, *tēnga*, *vēnga*, beside the regular *tēnh*, *vēnh*, *tēnha*, *vēnha*. Such forms as these, supported by *dērc de-ērigo*, *dic dīco*, *prēc prēcō*, *sēc *sequo*, *trac *trago*, etc., afforded a starting-point for an ending -c, adopted by some other verbs in the 1st pers. sg. of the present indicative: *pěrdo* pērt pērc, *pr(eh)ēndo* pren prenc, *remaneo* remanh remanc, etc.

PECULIAR FORMS.

162. The following verbs have individual peculiarities that call for special mention:—

(1) *Anar* (*annāre*), 'to go', takes most of its present from *vadēre*: indicative, *vau vauc* (analogy of *estau estauc*), *vas*, *va vai* (analogy of *fai*), *anám*, *anátz*, *van vaun* (analogy of *estan estaun*); subjunctive, *an* or *vaza* (*vadam*) *vaia* (analogy of *vai* and of *traia*), *vaga* (analogy of *traga*), etc.; imperative, *vai* (analogy of *fai*), *anátz*.

(2) *Aucire* (*occīdēre*: § 43) has in the pres. indicative 3d sg. *auci* (*occīdit*) and *aucis* (analogy of *aucizém*, *aucizétz*). Cf. *auzir*, *caire*, *rire*, *traire*, *vezér*. These forms were doubtless helped by the analogy of *ditz* (*dīcit*), *dütz*, *fatz*, *iatz*, *letz* (*līcet*), *platz*, *tatz*.

(3) *Auzir* (*audīre*) has in the pres. indicative 3d sg. *au* (*audit*) and *aus* (analogy of *auzém*, *auzétz*). Cf. *aucire*, *caire*, *rire*, *traire*, *vezér*. See also § 160.

(4) *Aver* (*habēre*) has in the pres. indicative: *ai* (*habeo*: § 73, βy), *as*, *a*, *avém*, *avétz* (see §§ 167, 168), *an aun*; see § 137, (1). There is no trace of **ho*. Instead of *ai*, the dialects of Aude, Tarn, Tarn et Garonne, and Haute-Garonne have *ei* (cf. *Gram.*, II, p. 304), which probably developed first in the future (§ 152, 1) through the analogy of the preterit ending -ei which took the place of -ai: *amāvi *amai* **amai amei* (§ 175), then *amarai* *amarei*, then *ai* *ei*. The pres. subjunctive is *aia* (*habeam*: § 73, βy). For the imperative, see § 156.

(5) *Caire cazér* (*cadēre* **cadēre*) has in the pres. indicative 3d sg. *ca* (*cadit*) *cai* (analogy of *brai* **bragit*, *fai*, *traí* **tragit*, *vai*) *cas* (analogy of *cazém*, *cazétz*: cf. *aucire*, *auzir*, *rire*, *traire*, *vezér*).

(6) *Conóisser* (*cognōscēre*) has in the pres. indicative 1st sg. *conosc* (*cognōsco*) and *conóis* (analogy of 2d and 3d sg., *conóisses*, *conóis*).

(7) Creire (*crēdēre*): pres. subjunctive *creza* (*crēdam*) and *crega* (analogy of *diga, sega, traga*). See also § 160.

(8) Créisser (*crēscēre*): pres. subjunctive *cresca* (*crēscam*) and *crega* (analogy of *diga, sega, traga*, and of the imperfect subjunctive *cregués*).

(9) Dar (*dare*): *dau* (**dao*), *daun* (**daunt*); see § 137, (1).

(10) Destruire (**destrūgēre* = *destruēre*): analogy of *agēre, tēgēre*, etc. Cf. *traire. *Destrūgit destrūi*.

(11) Dever (*debēre*) has in the pres. indicative 1st sg., beside *dech dei* (§ 160), *dec* (analogy of *dic, prec, sec, trac*, and perhaps of the preterit *dec*).

(12) Dire (*dīcēre*): *dic* (*dīco*) *diu* (cf. § 51, 3; § 65, G, 1); *ditz* (*dīcit*) *di* (analogy of *fai, trai*, and of imperative *di dīc*); *dizon* (analogy of *ditz, dizém, dizéztz*); *diga dia* (both *dīcam*: § 65, G). For the imperative, see § 156.

(13) Dūire (*dūcēre*): *dūtz* (*dūcit*) *dūi* (analogy of *destrūi, trai*).

(14) Eissir (*exīre*): *iesc, iescon, iesca*, analogy of *conosc, florisc*, etc.; for vowel, see § 159, (2).

(15) Ésser estre (**ēssēre* = *ēsse*). Pres. indicative: *sūm sōn sō* (§ 82, M), then, by the analogy of *ai* and *fūi, sōi sūi*; *ēs* became *ēst iēst*, perhaps through *ēs tu ēs-t-u ēst-tū*, supported by the analogy of the preterit ending of the 2d sg. (*vōs vendētz, tū vendēst* or *vendiēst*, so, to match *vōs ētz*, a form *tū ēst* or *iēst*); *ēst* became *ēs*, probably through such combinations as *quē's* (understood as *qu'ēs*); *sīmu'*, which existed in Latin beside *sūmus* (Rom., XXI, 347), gave *sēm*, while from *ēstis* there was constructed an **ēsmus ēsmes* (rare), and from *ētz* a form *ēm* (very common); *ēstis ēstz ētz* (§ 78, 2); *sūnt sōn sō* (§ 83, Nt). Pres. subjunctive: *sīm, sīs*, etc., were replaced in V. L. by **sīam, *sīas*, etc. (on the analogy of *fiam, faciam*, etc.), which gave *sía sías sía siám siátz, sían sión*; we find also *seia*, etc., formed apparently on *deia, veia*. Imperative borrowed from subjunctive.

(16) Estar (*stare*). Pres. indicative: *estáu* (**stao*) *estáuc* (§ 161); *estás* (*stas*); *está* (*stat*) *estái* (analogy of *fai, trai*); *estám* (*stamu'*); *estátz* (*statis*) *estáitz* (after *faitz*); *están* (*stant*) *estáun* (**staunt*); see § 137 (1). Pres. subjunctive: *estía*, etc., *estéia*, etc., patterned on *sia, seia*; also *estéi*, perhaps a cross between *esteia* and **esté stem*. Imperative: *está, estáitz*.

(17) Faire far (*facēre *fare*): § 137, (1). Pres. indicative: *fatz* (*facio*) *fau* (analogy of *dau, estau*) *fac fauc* (§ 161); *fas* (**fas*); *fatz* (*facit*) *fa* (**fat*) *fai* (influence of *faire, faim, faitz*, and of *trai*); *faim* (*facīmu'*: § 167, 1) *fam* (**famu'*) *fazém* (see *fazéztz*); *faitz* (*facītis*) *fatz* (**fatis*) *fazéztz* (analogy of regular verbs, *crezétz*, etc.); *fan* (**fant*) *faun* (analogy of *daun, estaun*). Pres. subjunctive: *faça fassa*, etc. (*faciam*, etc.). Imperative: *fai* (*fac*); *fatz faitz* (borrowed from indicative) *fait* (*facīte*).

(18) Iazér (*jacēre*), also *iassér* (influence of *ias iatz jacet*, and of *iassa?*): *iatz* (*jacet*) *iai* (analogy of *fai, trai*); *iassa* (*jaceam*) *iaia* (analogy of *traia, vaia*).

(19) Movér móure (*movēre *mōvēre*): *mova* (**mōvam* = *mōveam*) *moga* (analogy of *traga*).

(20) Partir (*partīre*): *part* (**parto* = *partio*) *parc* (§ 161); so *parta parga*.

(21) Perdre (*pēdēre*): *pert perc, perda perga*; see § 161.

(22) Plazér plaire (*placēre *placēre*): *platz* (*placet*) *plai* (analogy of *fai, trai*); *plassa* (*placeam*) *plaia* (analogy of *traia, vaia*).

(23) Podér (**potēre* = *pōsse*): see § 137, (1). Pres. indicative: *posc* (*pōssum* influenced by *cognōsco*) *puosc puesc* (analogy of *puoc puec pōtūi*), *puecs* (? **pots *pōtsum* + *puesc*), *pois* (**pōsseo*); *potz* (*pōtes*); *pot* (*pōtet* = *pōtest*); *podém* (**potēmu'*); *podéztz* (**potētīs*); *póden* (**potent*) *pódon, pon*

(analogy of *potz*, *pot*, and *son* – *sünt*). Pres. subjunctive: *posca puosca puesca* (like *posc puosc puesc*), etc.; *poissa* (**pösseam*), etc.

(24) *Prendre* (*prëndëre* = *prehëndëre*) *penre* (see § 71, end): *pren* (*prëndo*) *preh* (analogy of *tenh*, *venh*) *prenc* (§ 161); so *prenda prenh prenga*.

(25) *Rire* (**rīdëre*): *ri* (*rīdet*) *ritz* (analogy of *rizém*, *rizétz*: cf. *aucire*, *auzir*, *caire*, *traire*, *vezér*); *ria* (*rīdeam*?).

(26) *Sabér* (**sapëre*): see § 137, 1. Pres. indicative: *sai sei* (analogy of *ai ei* from *avér*); *saps*; *sap*; *sabém* (**sapëmu*’); *sabétz* (**sapëtis*); *sáben* (**sapent*) *sábon*. Pres. subjunctive: *sapcha* (*sapiam*). Imperative from subjunctive.

(27) *Tazér taire* (*tacëre *tacëre*): *tatz* (*tacet*) *tai* (analogy of *taire* and of *fai*, *trai*).

(28) *Tenér* (*tenëre*): *tenh* (*tëneo*) *tenc* (§ 161); so *tenha tenga*.

(29) *Traire* (**tragëre*, perhaps also **tracëre*, = *trahëre*): *trac* (**trago* or **traco*) *trai* (§ 63, 6)(120); *trai* (**tragit*) *tra* (analogy of *da*, *esta*, *fa*, *va*) *tratz* (**tracit*?: cf. *aucire*, *auzir*, *caire*, *rire*, *vezér*); *trázon* (analogy of *tratz*); *traga traia* (both **tragam*).

(30) *Vezer* (*vidëre*): *vei* (*vīdeo*) *vec* (§ 161); *ve* (*vīdet*) *ves* (analogy of *vezém*, *vezétz*: cf. *aucire*, *auzir*, *caire*, *rire*, *traire*). Imperative from subjunctive.

(31) *Volér* (**volëre* = *vëlle*): see § 137, (1). Pres. indicative: *vuelh* (**völeo*); *vols* (**völes*); *vol* (**völet*); *volém* (**volëmu*’)(121); *volétz* (**volëtis*); *vólon* (**völent*). Pres. subjunctive: *vuelha* (**völeam*), *vuelhas*, *vuelha*, *vulhám*, *vulhátz*, *vuelhan*. Imperative from subjunctive.

163. In verse the present subjunctive ending *-ia* sometimes counts as one syllable: *siätz*. Cf. § 153, 1.

PERSONAL ENDINGS(122).

164. (1) In the first person singular final *-o* and *-em* regularly disappeared: *amo* – *am*, *amem* – *am*. When, however, the *-o* or *-em* was preceded by a consonant group requiring a supporting vowel (§ 52), the ending was regularly retained as *-e*: *dūbīto* – *dōpte*, *sūffëro* – *suffre*, *trēmūlem* – *tremble*.

Through the analogy of *ai*, *crei*, *dei*, *soi*, *vei*, and the 1st pers. sg. of the preterit, this *-e* was in the indicative generally changed at an early date to *-i*: **cōpëro* – *cōbre cōbri*, **opëro* – *qbre qbri*; so *impleo* **implō* – *ompli*. This *-i* (occasionally *-e*) was then taken as a distinctive ending of the 1st pers. sg., and was added to many verbs that needed no supporting vowel: *auzir*, *au auze*; *azorar*, *azor azōri*; *cantar*, *can canti*; *cōre*, *cōr cōri*; *mētre*, *mēt mēti*; *prezar*, *prētz prēzi*; *remirar*, *remir remire remiri*; *respondre*, *respon respondi*; *sentir*, *sen senti*; *vēndre*, *vēn vēndi*.

In the subjunctive, when a final vowel was required, *-e* was usually kept; it was also extended to some verbs that did not need it: *acabe*, *dōne*, *mire*, *plōre*. Very rarely an

unnecessary -i was added instead of -e: *laiszar*, *lais laissi*.

(2) The ending *-am* regularly gave *-a*: *audiam* *auia*.

165. In the second person singular final *-as* regularly remained, and *-ēs* and *-īš* became *-s* (or, when a supporting vowel was required, *-es*): *amas* *amas*; *valēs* *vals*, *sapīs* *saps*, *partīs* *partz*; *dūbītēs* *doptes*. Cf. § 82, S. Sometimes, especially in late texts, *-s* is expanded into *-es*: *canz cantes*, *partz partes*, *saps sabes*, *vals vales*; so *floris florisses*, etc.

Final *-a* remained, and *-ē* and *-ī* fell: *ama* *ama*, *tēne* *ten*, *crēde* *cre*, *partī* *part*.

166. In the third person singular final *-at* became *-a*, *-ēt* and *-īt* fell (but remained as *-e* when a supporting vowel was needed): *amat* *ama*, *amet* *am*, *tēnet* *ten te*, *vēnit* *ven ve*; *trēmūlet* *tremble*. Cf. § 82, T.

167. In the first person plural the final *-s* disappeared early, *s* being perhaps regarded as a distinctively second person ending^[123]. The rare form *esmes* = *sūmus* is the only one that retains the *s*: cf. § 162, (15).

Then *-āmu'*, *-ēmu'* gave regularly *-am*, *-em*: *cantāmus* *cantám*, *habēmus* *avem*. Likewise *-īmu'*, through the analogy of *-āmu'*, *-ēmu'*, came to take the accent on its penult, and then regularly developed into *-em*: *crēdīmus* **credīmu'* *crezem*. This *-em* of the second and third conjugations passed into the fourth, and entirely displaced the *-im* that would have been the regular representative of *-īmu'*: *partīmus* **partīm partem*.

1. In *faim* *facīmu'* the old accentuation apparently survives: cf. § 52, (4), 1.

2. In some dialects of Béarn, Languedoc, Provence, and Dauphiné, *-m* apparently becomes *-n*: *devén*, *havén*, *volén*; so *aurián*, *trobarén*, *segrián* (cf. § 152, 1; § 153, 1). Cf. § 65, M, 1.

168. In the second person plural *-ātis* regularly gave *-atz*: *amātis* *amatz*, *audiātis* *auiatz*. The regular form from *-ētis* is *-etz*, which we find kept in the future (*veiretz*) and in the present subjunctive (*cantetz*); in the present indicative it was replaced by *-etz*, probably through the analogy of *etz* *ēstis*: *habētis* *avetz avetz*, **potētis* *podetz podetz*, so *sezetz*, *valetz*, etc.; the rare *avetz* and *podetz* are the only forms that preserve *ē*. The ending *-ītis*, taking the accent on its penult (cf. § 167), became **-etz*, then *-etz*: *crēdītis* *crezetz*. This *-etz* also displaced the *-itz* that would have been regular in the fourth conjugation: *partītis* *partetz*.

The final *-tz* was reduced, in some of the principal dialects, to *-s* (§ 64): *cantás*, *sezēs*, *partēs*. In other dialects it was replaced very early by *-t* (§ 64): *auiat*, *avet*, *passát*, *podet*; so *partiret*, etc.

1. In *faitz* *facītis* the old accentuation apparently survives.

169. In the third person plural *-ant*, *-ent*, *-unt* gave respectively *-an* *-ant*, *-en*, *-on* *-o* (§ 83, Nt): *amant* áman ámant, *audiant* áuian áuiant; *valent* válen, *ament* ámen; *vēndunt* vendon vendo. In Languedoc *-an* was replaced by *-on* or *-o* in the 13th century; in other regions, later: ámon, chanto ls, coménso l. The *Boeci* has *-en* for *-an*: amen, monten. In Gascony and some of the Limousin territory *-en* partially displaced *-on* (floríssen, pártén, venden), elsewhere *-on* or *-o* displaced *-en* (válon).

IMPERFECT INDICATIVE.

170. In the first conjugation *-abam* regularly gave *-ava*. In the second, through the analogy of *aβéa* *habēbam* (§ 153), *-ēbam* came to be replaced, in southern Gaul, by *-éa*, which regularly changed to *-ía* (§ 26). In the third, *-iēbam* regularly became *-ēbam* (§ 40, 1); and this and original *-ēbam* were replaced by the *-éa* *-ía* of the second conjugation. In the fourth, *-ībam*, which had in the accented syllable the characteristic vowel of the conjugation, crowded out *-iēbam*; *-ībam* then lost its β through the analogy of the second and third conjugations. We have, then, in Provençal, only two sets of endings: *-áva*, etc., in the first conjugation; *-ía*, etc., in the second, third, and fourth.

amáva	vezía	fazía	partía
amávas	vezías	fazías	partías
amáva	vezía	fazía	partía
amavám	veziám	faziám	partiám
amavátz	veziátz	faziátz	partiátz
amávan	vezían	fazían	partían

1. In poetry *ía* is sometimes counted as one syllable: *aviān*, *deviān*.
2. For some subsequent developments of western dialects, see Meyer-Lübke, *Gram.*, II, p. 326.
3. For the personal endings, see §§ 164-169.
4. *Esser* has: *ęra*, *ęras*, *ęra*, *erám*, *erátz* *erás*, *ęran* *ęron* *ęro*.

PRETERIT, OLD CONDITIONAL, AND IMPERFECT SUBJUNCTIVE.

171. These parts are all formed from the same stem, that of the Latin perfect: cf. § 141, (2). Ex.: *cantei*, *cantera*, *cantęs*; *vendei*, *vendera*, *vendęs*; *partí*, *partíra*, *partís*; *vi*, *vira*, *vis*; *dęc*, *dęgra*, *degųęs*.

172. Preterits which stress the ending throughout are called *weak*; those which do not stress the ending throughout are called *strong*: *partí*, *partíst*, *partí*, *partím*, *partítz*, *partíron* is weak; *saup*, *saubíst*, *saup*, *saubém*, *saubétz*, *sáubron* is strong. Verbs of the first and fourth conjugations regularly have weak preterits (*amei*, *finí*). Verbs of the second and third, with very few exceptions, originally had strong preterits (*placuī* *plac*, *fēcī* *fis*): many of them, however, developed weak preterits either in Vulgar Latin or in Provençal (*irasquei*, *nasquei*, *tesseï* *tesqueï*, *visqueï*); some assumed a weak form in -í in the 1st pers. sg. (*dissí*, *pris prenguí*, *remas remanguí*, *trais traguí*: cf. §§ [173](#), [177](#)); *querre*, on the other hand, substituted a strong preterit (*quis*, etc.) for a weak one.

173. (1) Final -ī, in the first pers. sg., doubtless remained through the earlier stages of Provençal (*habuī* *águi*, *dīxī* *díssi*): cf. § [51](#), (2). Before it fell, it changed an accented *ē* in the preceding syllable to *i* (*vēnī* **vēnuī* **vengui* *vinc*): cf. § [27](#); occasionally, however, the *ē* was kept, through the analogy of the other persons (*pris preš*). Sometimes, instead of falling, the -i took the accent (following the analogy of the fourth conjugation) and remained: *águi* *ac* or *aguí*, *díssi* *dis* or *dissí* (cf. § [177](#)).

When the -i was immediately preceded by an accented vowel, it regularly formed a diphthong with that vowel, and did not fall (*fuī* *fūi*): cf. § [51](#), (3); but -īi was simplified to -i (*partīvī* *partī* *partí*).

Before enclitic *l*, -ei -iei were often reduced to -e -ie: *cantiel*.

(2) In the 2d pers. sg., -stī became -st, a preceding *ē* being changed to *i* (§ [27](#)): *partistī* *partíst*, *debuistī* *deguíst*; sometimes, through the analogy of the 2d pers. pl., *ē* remains (*venguest*: cf. § [27](#), 2). Occasionally the final -t disappears: *anięst* *anięs*, *fezíst* *fezís*.

(3) The -t of the 3d pers. sg. was lost in strong preterits: *placuit* *plac*, *vīdit* *vi*. In weak preterits, it was retained by most dialects after *é*, and by many after *í*: *donęt* *done*, *vendęt* *vende*; *partí* *partít*. Cf. § [82](#), T.

(4) In the 1st pers. pl., -mus -mu' (see § [167](#)) was reduced to -m: *vīdīmu'* *vīm*.

(5) The -stis of the 2d pers. pl. regularly became -tz (§ [78](#), 2), later in many dialects -s (§ [64](#)): *debuistis* *deguętz* *deguęs*.

(6) The -runt of the 3d pers. pl. regularly gave -ron or -ro (§ [83](#), Nt): *partīrunt* *partíron* *partíro*, *vīđerunt* *viron* *viro*. In some dialects -en is substituted for -on: *fűęrunt* *fõron*.

fōren (cf. § 169).

The *e* before *-runt*, which in classic Latin was usually long, was always short in Vulgar Latin when it was preserved at all: *amavĕrunt amārunt, fēcĕrunt*.

WEAK PRETERITS.

174. (1) In the first and fourth conjugations we find in Latin the following endings:—

-āvī -āī	-āvīmus	-īvī -īī	-īvīmus
-āvīstī -āstī	-āvīstis -āstis	-īvīstī -īstī	-īvīstis -īstis
-āvit -aut	-āvĕre -āvĕrunt -ārunt	-īvit -īit -īt	-īvĕre -īvĕrunt -īrunt

The popular speech preferred in every case the shortened form, and generally reduced -āvīmus, -īvīmus to -āmus, -īmus (in southern Gaul -āmu', -īmu': § 167), on the analogy of the 2d pers. sg. and pl.

(2) In the second conjugation a few verbs (*delĕre, flĕre, nĕre, -olĕre, -plĕre, viĕre*) had similar endings (*delĕvī*, etc.), which were doubtless contracted in like fashion in so far as these words were in common use. Most verbs of this conjugation, however, had strong preterits (*tacĕre, tacuī; vidĕre, vīdī*; etc.).

(3) The third conjugation had in classic Latin no weak endings corresponding to those of the first, second, and fourth; but the vulgar speech developed a set in the following manner. Compounds of *dare* formed their perfect in -*dīdī* (*perdīdī*); this -*dīdī*, in accordance with the principle set forth in § 16, 3, came to be pronounced -*dĕdī* (*condĕdī*); and -*dĕdī*, probably through dissimilation^[124], was shortened to -*dĕi* (**credĕi*). With this form as a starting-point, a weak preterit was created on the analogy of those of the other conjugations, the endings being something like -*ĕi, -ĕstī, -ĕt, -ĕmus -ĕmu', -ĕstis, -ĕrunt*. This inflection was probably extended to some verbs outside the -*dĕre* class (**battĕi*, etc.?).

175. (1) In Provençal the weak inflection disappeared from the second conjugation, *delĕre* and -*plĕre* passing into the fourth, and the other weak verbs going out of use.

(2) Verbs of the fourth conjugation (except *venir*) all took the weak endings -*í, -íst, -í, -ím, -ítz, -íron*: *partí, partíst, partí, partím, partítz, partíron*. Irregular verbs either disappeared or became regular (*sensī = sentí*), with the exception of *venīre venir* (vinc).

^[125]

(3) The new weak endings of the third conjugation developed into -*ei*, -*est*, -*et*, -*ém*, -*etz*, -*eron*: *vendei*, *vendest*, *vendet*, *vendém*, *vendetz*, *venderon*. In the 1st pers. sg. the *e* often broke (*vendiēi*), and the diphthong was sometimes carried into the 2d pers. sg. (*vendiēst*). These endings were considerably extended in Provençal (*cazēt*, etc.), and were occasionally attached to a strong preterit stem (*nasquet*, *tesquet*, *venquet*, *visquet*). Most verbs, however, kept their strong preterit (*mis*, *conoc*). The -*ivī* perfect disappeared from the third conjugation: *quæsivī* **quæsit* *ques*.

(4) The first conjugation discarded its own weak endings, and substituted those of the third: *cantēi cantiei*, *cantēst cantiest*, *cantēt*, *cantém*, *cantetz*, *cantēron*. This strange phenomenon seems to have originated as follows: *dare*, *dēdī* *dar*, *dēi*; from *dar* the ending -*ei* was readily extended to *estar* (*estēi*); and from these two very common verbs it spread to the whole first conjugation.

Irregular verbs (except *dare*, *stare*) either disappeared or became regular.

1. According to Meyer-Lübke, *Gram.*, II, p. 304, Latin -*ai* became by phonetic process -*ei* in Vulgar Latin, and -*ei* or -*iei* in Provençal. There seems to be no evidence to support this theory. Cf. § 23, 2.

2. In the dialects of Béarn and Catalonia the original *a* remains in some parts of the preterit.

176. A final -*c*, which developed in the strong -*ui* preterits (§ 184), often became attached to the 3d pers. sg. of weak preterits of the fourth conjugation: *floric*, *fugíc*, *iauzíc*, *partíc*.^[126] It was sometimes extended to other weak preterits: *chantēc*, *entendēc*, *nasquec*,^[127] *paręc*.^[128] We find also a 3d pers. pl. *cazegron*, etc., and even a 1st pers. sg. *ameguí*, etc. In some western dialects the final -*c* was adopted by the whole first conjugation: *donec*, *portęc*, etc.

177. Some strong preterits occasionally assumed weak endings:—

(1) In the 1st pers. sg. several verbs in -*s* sometimes either added an -*í* or shifted the stress to an originally unaccented final -*i* (cf. §§ 172, 173): *dis dissí*, *pris presí*, *quis quesí*, *respos respozí*. A few verbs in -*c* did the same: *aic aiguí*, *bēc beguí*, *conoc conoguí*, *saup saubí*, *vinc venguí*, *vqlc volguí*. An ending -*guí* being thus established, this syllable was sometimes added to preterits not of the -*c* class: *costrenguí*, *destrenguí*, *prenguí*, *remanguí*, *restrenguí*, *traguí*.

(2) In the 3d pers. sg. weak endings are rare: *ac aguēt*, *venc venguēt*.

(3) In the 3d pers. pl. the weak ending is not uncommon in -*s* preterits: *diron dissēron*, *düistrent düissēron*, *męsdren mezēron*, *pręson presēron*, *remastrent remazēron*, *traissēron*. We probably have to deal here, as in (1), with a shift of accent—*dīxērunt* **dísseron*

disseron, etc.: see § 49, (2). The same thing may be true of such a form as *aguëron*, beside *ágron*, from **áβwerunt* = *habuërun*t; such a form as *visquëron*, on the other hand, is doubtless imitative.

STRONG PRETERITS.

178. (1) The reduplicative perfects were discarded in Vulgar Latin, with the exception of *dēdi* (and its compounds) and *stēti*, whose reduplicative character was no longer apparent. *Cecīdī* became **cadui* or **cadéi*; the rest either disappeared or passed into the *-sī* class: *cucūrrī* **cūrsī*, *momōrdī* **mōrsī*, *pepēndī* **pē(n)sī*, *pupūgī* **punxī*, *tetēndī* **tē(n)sī*, *tetēgī* **taxī* **tanxī*.

(2) The *-i* perfects were greatly reduced in number in Vulgar Latin. Some disappeared (*ēgī*), some became weak (*fūgī* **fugū* *fūgī*); others passed into the *-sī* or the *-uī* class: *prehēndī* **prē(n)sī* *pris*; *bībit* **bībuit* *bēc*, *vēnit* **vēnuit* *vēnc*. In Provençal only three *-ī* verbs remained: *fēcī* *fis*, *fuī* *fūi*, *vīdī* *vi*.

(3) Of the *-sī* class (including *-ssī* and *-xī*) over twenty verbs were preserved in Vulgar Latin (*dīxī*, *excūssī*, *mīsī*, *traxī*, etc.), and about the same number passed into this class from others (*absco(n)sī*, **fraxī* **sūrsī*, etc.): cf. (1) and (2) above. In Provençal nearly half the verbs of the second and third conjugations have *-sī* preterits: *rema(n)sī* *remas*, **respō(n)sī* *respōs*^[129].

(4) The *-uī* class held its own very well in Vulgar Latin (*placuī*, etc.) and received some additions (*natus sum* **nacuī*, *sustūlī* **tōluī*, *vēnī* **vēnuī*, *vīcī* **vīncuī*, *vīxī* **vīscuī*, etc.)^[130]. To this class belonged, in Vulgar Latin (and, according to Meyer-Lübke^[131], in classic Latin also), all perfects in *-vī*, this ending being pronounced *-wūī*, later *-wwī* or *-βwī*: *cognōvī* **conōvuī* *conōc*, *crēvit* **crēvuit* *crēc*, *mōvī* **mōvuī* *mōc*. Cf. § 148. In Provençal not far from half the verbs of the second and third conjugations have *-uī* preterits. For a combination of a *-c* *-uī* stem with a weak ending, see § 175, (3). For the extension of *-c* *-uī* to other conjugations, see § 176.

179. In the 1st pers. pl. the accent was shifted to the ending, to make this form correspond to the 2d pers. sg. and pl.: *fēcīmus* **fēcīmu'* *fezēm* (cf. *fēcistī* *fezist*, *fēcistis* *fezētz*), **prē(n)sīmus* **presīmu'* *prezēm*, *debūīmus* *deβwīmu'* *deguēm*. Exceptions are *fūīmus* *fōm*, *vīdīmus* *vim*; in these verbs the 2d pers. forms also are monosyllabic (*füst*, *fōtz*; *vist*, *vitz*).

180. We find in some verbs an irregular 3d pers. pl. without -r-, made by adding -on or -en to the 3d pers. sg., the final consonant of which is voiced in all verbs in which it is voiced in the other persons of the plural: (aucire) aucis, aucíson; (plánher) plais, pláisson; (prenre) prēs, prēson; (remanre) remas, remáson; (venir) vęc, vęnguen; (volę) vqlc, vqlgon.

1. *Prenre* has *preiron* (beside *preson preseron*), probably through the analogy of *feiron fēcĕrunt*. *Mairon*, from *maner*, is perhaps to be explained in the same way.

181. (1) Through the change of -e- to -i- by the influence of a final -ī, as described in § 173, (1), a distinction was established between the first and the third person singular of some preterits: *crēvī* cric, *crēvit* creç; *fēcī* fis, *fēcīt* feş; **prē(n)sī* pris, **prē(n)sit* preş; *tĕnuī* **tĕnuī*^[132] tinc, *tĕnuit* **tĕnuit* tenc; *vēnī* **vĕnuī*^[132] vinc, *vēnit* **vĕnuit* venc. *Metre*, also, has *mis*, *mēs*, which may come from **mĭssī* **mĭssit* (cf. *mĭssum*) = *mīsī*, *mīsīt*; or perhaps *mis* comes from *mīsī* and *mēs* is analogical. Through the analogy of such forms, *querre* has *quis*, *quēs*. In the preterit of *poder*, both *pōtuī* and *pōtuit* would regularly have given *pōc* *puēc* (§ 37), but *pōc* was kept for the 3d person, and *puēc* *puēc* was used for the 1st. The preterit of *voler* differentiates the two persons similarly—*vuēlc*, *vōlc*; here the diphthong (perhaps under the influence of *puēc*) is borrowed from the present, where we have **vōleo* *vuēlh*, **vōlet* *vōl* (§ 37). *Aver*, likewise, borrows a distinction from the present: *aic*, *ac* reproduce the vowels of *ai*, *a*; *aic* + *aguī* *aiguí*.

(2) For -í as a characteristic of the first person, see § 177, (1).

(3) For -c as a distinctive mark of the third person, see § 176.

182. The three -ī perfects developed in Provençal as follows:—

(1) *Facĕre* faire (**fare* far) has:

<i>fēcī</i>	<i>fis</i> , <i>fezí</i>	<i>fĕĩmus</i> <i>*fĕcĩmu'</i>	<i>fezēm</i>
<i>fēcĭstī</i>	<i>fezĭst</i> <i>fezís</i>	<i>fĕcĭstis</i>	<i>fezet̃z</i> <i>fezeş</i>
<i>fēcīt</i>	<i>fetz</i> <i>feş</i>	<i>fēcĕrunt</i>	<i>feiron</i> <i>feiro</i>

1. We do not find, in the 1st pers. sg., as we should expect (§ 65, C'), *fitz* beside *fis*; doubtless the form came early under the influence of *mis*, *pris*, *quis*, etc. For *fezí*, see §

[177](#), (1). There is also a form *fi*, due, perhaps, to the analogy of *vi* – *vīdī*; corresponding to *fi* are 3d pers. sg. *fe*, and pl. *fem*, *fes*, *feron*. A rare *figuī* is evidently made on the model of *aiguī*, etc. In the 3d pers. sg. we find also *fei*, which seems to be patterned after *feiron* or after the present *fai*.

(2) *Esse* (**ěssěre* – *ęsser ęstre*) had originally a long *u* in the perfect. In literary Latin the *u* was shortened, but the popular speech seems to have kept *ū* beside *ŭ*. The Provençal 1st and 2d pers. sg. apparently come from *fūī*, **fūstī* = *fuīstī* (although Pr. *fūi* might be taken from *fūī*), while the other forms presuppose *ŭ*:

<i>fūī</i>	<i>fūi</i>	<i>fūīmus</i> * <i>fūmu</i> '	<i>fōm</i>
<i>fūīstī</i>	<i>fūst fūs</i>	<i>fūīstis</i> * <i>fūstis</i>	<i>fōtz fōs</i>
* <i>fūstī</i>			
<i>fūit</i> * <i>fūt</i>	<i>fō, fōn,</i> <i>fōnc</i>	<i>fūērunt</i> * <i>fūrunt</i>	<i>fōron fōro,</i> <i>fōren</i>

1. A rare *fo* in the 1st pers. sg. seems to be simply borrowed from the 3d. In the 3d pers. sg., *fōn* beside *fō* is due to the analogy of *-on -o* in the 3d pers. pl., and, in general, of such double forms as *bon bo*, *mon mo*, *son so*, *ton to*: cf. § [63](#), (5). *Fōnc* shows the influence of *tenc*, *venc*.

(3) *Vidēre* – *vezer* has:

<i>vīdī</i>	* <i>viōi</i> * <i>viō vi</i> , <i>vic</i>	<i>vīdīmus</i> * <i>vīdīmu</i> '	* <i>viōmu</i> * <i>viim</i> <i>vim</i>
<i>vīdīstī</i>	<i>vist vis</i>	<i>vīdīstis</i>	<i>vitz vis</i>
<i>vīdit</i>	* <i>viō vi</i> , <i>vit</i> , <i>vic</i>	<i>vīdērunt</i>	* <i>viōrun viron</i> <i>viro</i>

1. The 1st pers. sg. *vic* is patterned upon *aic* – *habuī*, *cric* – *crēvi*, etc. The 2d pers. forms are irregular, as we should expect **vezist*, **vezetz*: evidently the 2d pers. followed the analogy of the 1st and 3d. In the 3d pers. sg., *vit* and *vic* follow the model of *partit*, *partic*, etc.: see § [173](#), (3), and § [176](#).

183. In the -sī perfect the 3d pers. pl. presented difficulties. If the -e- of the penult fell, an s or z and an r were brought together. Most dialects apparently preserved the -e-, and shifted the accent to it (aucizeṛon, condüisṣeṛon, disṣeṛon, prezeṛon, remazeṛon, traissṣeṛon), or else borrowed outright the weak ending (respondeṛon): cf. § 49, (2), and § 177, (3). Dialects which lost the -e- too early to follow this method, generally suppressed the sibilant (aucíron, diron, meṛon from meṛtre, remáron), or omitted the -r- and formed the 3d pers. pl. directly from the 3d pers. sg. (aucízon, pláisson, prezon, remázon: § 180), or else imitated a preterit of another class (mairon from manṛ, preiron from prenre, doubtless patterned after feiron *fēcěrunt*); some borderland dialects kept the sibilant and the r, and developed a dental between them (düystrent *dūxěrunt*, meṣdren *mīsěrunt* + **mīssěrunt*: § 70, Sr, Zr).

As examples of the -sī perfect we may take the preterit of dire *dīcěre* and penre prenre *pr(eh)ěnděre*:—

(1)

<i>dīxī</i>	dis, dissí	<i>dīxīmus</i> * <i>dīxīmu'</i>	disṣem
<i>dīxīstī</i>	dissíst	<i>dīxīstis</i>	disṣetz disṣes
<i>dīxit</i>	dis	<i>dīxěrunt</i>	disṣeṛon, diron diro

(2)

* <i>prē(n)sī</i>	pris, preṣ, presí	* <i>prē(n)sīmus</i> * <i>prēsīmu'</i>	preṣem
* <i>prē(n)sīstī</i>	presíst	* <i>prē(n)sīstis</i>	preṣetz preṣes
* <i>prē(n)sit</i>	preṣ	* <i>prē(n)sěrunt</i>	preṣeṛon, preṣon, preiron

(3) *Escriure scribĕre* has, beside *escriis scripsī*, a preterit *escrius* (cf. p. p. *escriut escrit escrich*), in which the *u* is probably due to the influence of the infinitive.

(4) For *dissí, presí, quesí, respozí*, see § 177, (1). For *pris prēs*, etc., see § 173, (1).

184. In the *-uī* perfect the development depends somewhat upon the consonant preceding the *u*. The treatment of the various cons. + *w* groups, which was discussed in § 72, may be illustrated by *habuit ac*^[133], *crēvit* **crēvuit* *crēc*^[134]; *nōcuit* *nōc*^[135]; *sēdit* **sēduit* *sēc, pōtuit* *pōc*; *valuit* *valc*^[136], *tēnuit* **tēnuit* *tēnc*^[137], *mēruit* *mērc*; *sapuit* *saup*^[138]: the noteworthy features are the change of *u* to *-c* (through *w, gw, g*), the absorption of the preceding consonant unless it be a liquid, a nasal, or a *p*, the preservation of the liquid or nasal, and the metathesis of the *p*.

*Aver habĕre, poder *pōtĕre pōsse, volĕre *vōlĕre vĕlle, sabĕre *sapĕre sapĕre* will serve as examples (for the accentuation of the 3d pers. pl., see § 16, 2):—

(1)

<i>habuī</i>	<i>ac, aguí, aic,</i>	<i>habuīmus</i>	<i>aguēm</i>
	<i>aiguí</i>	<i>*aβwīmu'</i>	
<i>habuīstī</i>	<i>aguíst</i>	<i>habuīstis</i>	<i>aguętz aguęs</i>
<i>habuit</i>	<i>ac</i>	<i>habuĕrunt</i>	<i>ágron ágro,</i> <i>aguĕron</i>

1. For *aguí* (*beguí, conoguí*), see § 177, (1). For *aic, aiguí, (cric)*, see § 181, (1). For *aguĕron* (*visquĕron*), see § 177, (3).

(2)

<i>pōtuī</i>	pQC puQC puęc	<i>potuīmus</i> * <i>potwīmu'</i>	poguęm
<i>potuīstī</i>	poguíst	<i>potuīstis</i>	poguętz poguęs
<i>pōtuit</i>	pQC, pQt	<i>potuērunt</i>	pQgron pQgro

1. For *puoc*, see § [181](#), (1). *Pot* is apparently due to the combined influence of weak preterits and the parts of *poder* in which the dental is preserved.

(3)

<i>vōluī</i>	vQlc, vüęlc, volguí	<i>voluīmus</i> * <i>volwīmu'</i>	volguęm
<i>voluīstī</i>	volguíst	<i>voluīstis</i>	volguętz volguęs
<i>vōluit</i>	vQlc	<i>voluērunt</i>	vQlgron vQlgro

1. For *vuelc* (*tinc*, *vinc*), see § [181](#), (1); for *volguí* (*venguí*), § [177](#), (1).

(4)

<i>sapuī</i>	saup, saubí	<i>sapuīmus</i> * <i>sapwīmu'</i>	saubęm
<i>sapuīstī</i>	saubíst	<i>sapuīstis</i>	saubętz saubęs
<i>sapuit</i>	saup	<i>sapuērunt</i>	sáubron sáubro, sáupron

1. For *saubí*, see § [177](#), (1). For *sáupron* (*sáupra*, *saupés*, *saupút*), see § [65](#), P, 3; cf. § [148](#), (2).

185. The old conditional came from the Latin pluperfect indicative, which had been supplanted in its pluperfect sense by a compound form, and was gradually restricted in its use to the functions of a preterit, a perfect conditional, and a simple conditional: see § 141, (2). In Provençal it had only the conditional meaning; and as the new conditional rendered it superfluous, it fell into disuse (with the exception of *ágra* and *fõra*) in the 13th and 14th centuries: see § 142, (2).

186. In the fourth conjugation the old conditional comes from the contracted form of the pluperfect (*audīram* *audīvēram*). Weak verbs of the third conjugation constructed a similar form (**vendēram*). First conjugation verbs started with the contracted pluperfect (*amāram* *amāvēram*), but in Provençal substituted *ẽ* for *á*, as in the preterit: § 175, (4). The Provençal types of the old conditional of weak verbs are, therefore, represented by: *amēra*, *vendēra*, *auzíra*. The inflection is as follows:—

<i>amēra</i>	<i>amerám</i>
<i>amēras</i>	<i>amerátz</i>
<i>amēra</i>	<i>amēran</i>
<i>auzíra</i>	<i>auzirám</i>
<i>auzíras</i>	<i>auzirátz</i>
<i>auzíra</i>	<i>auzíran</i>

187. Strong verbs of the *-ī* and the *-uī* classes regularly took their old conditional directly from the Latin pluperfect: *fēcēram* *fēira*, *fűēram* *fõra*, *vīdēram* *vira*; *habűēram* **áßwēram* (§ 16, 2) *ágra*, *põtűēram* *põgra*, *võlűēram* *võlgra*, *sapűēram* *sáubra* *sáupra* (§ 65, P, 3). Of course the Latin pluperfect, and therefore the Provençal conditional, followed the shift of the perfect if it changed from one class to another: *vēnī*

**vēnuī*, hence **vēnűēram* *vēngra*. The inflection is as follows:—

fõra	forám	ágra	agrám
fõras	forátz forás	ágras	agrátz agrás
fõra	fõran	ágra	ágran

1. *Faire* has *féra* (cf. *feron*) beside *féira*.
2. For *sáupra*, cf. § [148](#), (2), and § [184](#), (4), 1, and § [192](#).
3. *Devér* has beside *dégra* a form *déura*, evidently influenced by the new conditional, *deuría*.
4. *Páisser*, *plazér* have beside *págra*, *plágra* the forms *paisséra*, *plazéra*.

188. Strong verbs of the -*sī* class regularly form their old conditional on the same plan as the 3d pers. pl. of the preterit (§ [183](#)): (*dīxĕram*) *díra*, cf. *díron*; (**prĕsĕram*) *preïra*, cf. *preïron*; (*arsĕram*) *arşera*, cf. *arşeron*.

189. It will be noted that in all verbs, weak and strong, the old conditional may be constructed from the 3d pers. pl. of the preterit by changing -on to -a.

IMPERFECT SUBJUNCTIVE.

190. The Provençal imperfect subjunctive came from the Latin pluperfect subjunctive, which in Vulgar Latin assumed the functions of the imperfect and generally displaced it, its own place having been taken by a compound form: see § [141](#), (2).

191. For weak verbs the basis was the contracted form of the first and fourth conjugations (*amāssem amāvīsssem*, *audīssem audīvīsssem*); weak verbs of third conjugation had a similar analogical form (**vĕndĕsssem*). First conjugation verbs substituted *ę* for *á*, as in the perfect and the old conditional: § [175](#), (4); § [186](#). The Provençal types are: *amęs*, *vendęs*, *auzís*. The inflection is:

ameş	amessēm	auzís	auzissēm
ameşses	amessetz -eş	auzísşes	auzissetz -eş
ameş	ameşsen -on -o	auzís	auzissen -on -o

192. Strong verbs regularly made their imperfect directly from the Vulgar Latin form of the pluperfect: *fecíssem* fezeş, *fűíssem* **fűssem* fõş, *vidíssem* vezeş, *veníssem* **venuíssem* venguę; *dixíssem* disseş, **pre(n)síssem* prezeş; *habuíssem* aguę, *potuíssem* poguę, *voluíssem* volguę, *sapuíssem* saubeş saupeş (§ 65, P, 3). The inflection is:—

fõş	fosseēm	aguę	aguesseēm, acseēm
fõşses	fossetz -eş	aguęşses	aguessetz -eş, acsetz -eş
fõş	fõssen -on -o	aguę	aguęssen -on -o

1. The syncopated forms in the 1st and 2d pers. pl. are common to the *-uī* class: *decsém*, *iacsém*, *pocsém*, *saupsém*.

2. In the 3d pers. pl. *-an* sometimes takes the place of *-en* or *-on*: *mezéssan*, *saubéssan*. This ending is doubtless borrowed from the present subjunctive and the old conditional.

3. *Vezér* has *vis* beside *vezés*. From *faire* we find in the 3d pers. pl. *fésson*.

4. *Metre* has *mezés*, due, no doubt, to the analogy of *mes* and of *prezés*.

193. Some dialects have an ending *-a*, *-as*, *-a*, *-ám*, *-átz*, *an*, borrowed from the present subjunctive and the old conditional, but added to the stem of the imperfect subjunctive: *chantęssa*, *vendęssa*, *floríssa*; *fõssa*.

FOOTNOTES

[1] There should now be added: J. B. Beck, *Die Melodien der Troubadours*, 1908.

[2] See B. Schädel in *Rom.*, XXXVII, 140.

[3] See E. Bourciez, *Les Mots espagnols comparés aux mots gascons*.

[4] See C. Chabaneau, *la Langue et la littérature du Limousin*, in the *Revue des langues romanes*, XXXV, 379.

[5] See G. Paris, *Origines de la poésie lyrique en France au moyen âge*.

[6] This h (coming from f) is peculiar to Gascon; the other dialects have no h.

[7] G, b, d are sounded k, p, t only at the end of a word or before a final s.

[8] G, b, d are sounded k, p, t only at the end of a word or before a final s.

[9] Rr is generally distinguished from r, but there are a few examples of their confusion in rhyme.

[10] Ts is usually written c at the beginning of a word, z or tz at the end.

[11] G has the sound of tš only at the end of a word or combined with final z.

[12] Cf. French.

[13] Cf. Spanish.

[14] For some exceptions see *Rom.*, XXXII, 591; P. Marchot, *Phon.*, p. 9.

[15] Cf. R. Karch, *Die nordfranzösischen Elemente im Altprovenzalischen*, 1901.

[16] See § 175, (4).

[17] There is no diphthong in the preterit ending -ęc: cazęc, etc.

[18] This view is a modification of the theory developed by C. Voretzsch in his admirable treatise, *Zur Geschichte der Diphthongierung im Altprovenzalischen*, Halle, 1900. That ę is not affected by an i in the following syllable is shown by such words as emperı, evangeli, salterı, which must have been adopted fairly early. The same thing is true of q: apostqli, qli, etc.

[19] The diphthong of q occurs, however, in this text, v. 203, in uel ōculi.

[20] *Derrier* (*derer*, *dereer*), beside *dereire*, is manifestly due to the influence of *primier*. To the influence of the same ending *-ier*, as in *carr(i)eira*, is to be ascribed the diphthong in *cad(i)eira* *cathëdra*.

[21] The things just said of *ę* are true of *q*: there is no breaking before *u* *l* (*tqut* = *tqlt*) nor before *ts*, *dz*, *s*, *z* (*nöcet* *nq̃tz*, **nöptias* *nq̃ssas*).

[22] The conditions are not quite the same as for *e*: an *ę* does not break before a labial (*nęps*) nor before *n'* (*vęnha*). Breaking before *g* and *k* seems more general for *q* than for *ę*.

[23] So the second person forms *cuebres*, *uebres*, *uefres*, and the third person forms *cuebre*, *uebre*, *uefre*; cf. *cq̃bron*, *qbri*, etc.

[24] For a discussion of the date, see K. Nyrop, *Grammaire historique de la langue française* (Copenhagen, 1899-1903), I, § 187.

[25] For the accent, see § 16, 1.

[26] Spelled *dric̃tus*: see Schuchardt, *Vokalismus des Vulgärlateins*, II, 422.

[27] The period of the fall of the intertonic vowel covers, in part, the period of the voicing of intervocalic surds (§ 65); sometimes the vowel fell too soon for the surd to be voiced, sometimes it did not. The relation of the fall of unstressed vowels to the development of intervocalic consonants, in French, has been examined by L. Clédât in the *Revue de philologie française*, in a series of articles beginning XVII, 122. Cf. P. Marchot, *Phon.*, pp. 84-90.

[28] Cf. H. Wendel, *Die Entwicklung der Nachtonvokale aus dem Lateinischen ins Provenzalische*, 1906.

[29] *Domnus* may be the older form.

[30] The change of accent, in this verb and others, was due to the analogy of the first and fourth conjugations (*cañteron*, *sentíron*) and to the influence of the second person plural (*dissętz*).

[31] The feminine forms *cobéza*, *tebéza*, etc., show a change of accent.

[32] In most of the modern dialects (but not in Gascony and lower Languedoc) this *a* has become *o*: *rosa* *roso*. But in the Limousin dialects and some others *-as* *-a*: *rosas* *rosa*.

[33] The *tg* in this word is probably due to the influence of *iutiar* *jūdīcāre*.

[34] The forms with *r* may be due to dissimilation or to the influence of *clergue*.

- [35] Alvernia is attested: cf. Zs., XXVI, 123. The usual form is *Arvernium*.
- [36] Compare, in English, the *c* of *coo* and the *k* of *key*.
- [37] Compare the old-fashioned pronunciation of words like *card*, *kind*.
- [38] For final *-ci*, *-gi* in plurals, see § 92, (2).
- [39] Before this, *frīgīdus* had become *frīgdus* in Italy and Gaul.
- [40] It is natural to suppose that the *n*, in falling, nasalized the vowel; but no trace of this nasality remains.
- [41] *Fes*, *nut*, which quite supplanted the regular forms, perhaps show the influence of *res*, *mut*.
- [42] By analogy of such double forms, *n* is sometimes added to a few words ending in a vowel: *fūit* *fo fon*, *prō* *pro pron*.
- [43] Cf. § 63, (4).
- [44] Also *auvir*, probably a northern local development of *auir*; and *aurir*, doubtless from *auzir* in a dialect that confuses *r* and *z*. See R, 2 and S, 2.
- [45] Cf. § 63, (3).
- [46] The *i* from *ǫ* fuses with the preceding *i*.
- [47] *Trachor* has been influenced by *trach*, past participle of *traire*.
- [48] Intervocalic *c* and *g* have been studied by H. Sabersky, *Zur provenzalischen Lautlehre*, 1888, pp. 8-19.
- [49] *Mica* *micha* are from **micca* = *mīca* + *cīccum*.
- [50] Original Latin *g* seems more prone to fall than *g* *c*.
- [51] For the reduction of *au* to *a* see § 41.
- [52] *Clerc* is from **clērcum*, which must have existed contemporaneously with *clēřicum*.
- [53] Possibly it comes from N. Greek σπάδη: cf. *Romanische Forschungen*, XV, 880.
- [54] See Zs., XXXII, 434.
- [55] *Magis* was probably reduced to *mais* in Vulgar Latin.
- [56] *Legir* may have been reconstructed on the basis of *leg* *lēgit*.
- [57] For the groups ending in *y*, cf. L. J. Juroszek, *Ein Beitrag zur Geschichte der jotazierten Konsonanten in Frankreich*, in Zs., XXVII, 550 ff. The groups

ending in y and those containing c or g have been studied by H. Sabersky, *Zur provenzalischen Lautlehre*, 1888.

[58] S is generally written ss between vowels, to distinguish it from s = z.

[59] Most of the words in this category are semi-learned: cf. *fabla* and *faula*. See § 55, B.

[60] See § 47, (2).

[61] See § 47, (2).

[62] Also *faur*: cf. § 52, (1), 1.

[63] *Sozer* *söcërum*: cf. § 49, (1).

[64] For the vowel of *nēr niēr*, see § 25, 1, (e).

[65] *Enteir*, *neir* seem to have lost final e under the influence of numerous adjectives in *-er -ier -ieir -arium*.

[66] In the modern dialects the d is probably commoner than it was in the old literary language; it occurs in Bordeaux, Languedoc, and Provence.

[67] *Ratie* is perhaps French.

[68] After o, the u disappears.

[69] *Glai* is due perhaps to the analogy of *ney* (§ 65, β, 3), perhaps to such double forms as *fatz fai* = *facit*.

[70] *Seti* (pronounced with two syllables) seems to be an improperly constructed post-verbal noun from *assetiar*. For *metque*, etc., see § 65, G, (3).

[71] Apparently *maniar*, *escomeniar* developed in the region where g became y before a: cf. § 65, G, (1).

[72] The r remained palatal long enough to cause breaking: cf. §§ 30, 37.

[73] These sounds lost their palatal quality too early to cause breaking: cf. §§ 30, 37. Cf. *Einf.*, § 133.

[74] *Palaitz*, however, is used by Marcabru, A. Daniel, and P. Vidal. *Poizon* occurs in *Flamenca* and in modern Limousin (beside *pozon*), *raizo* is found in the *Boeci* and other texts.

[75] Cf. § 49, (3).

[76] *Daun*, etc., are Gascon.

[77] Such forms as *amda amīta, comde conde compūtum*, show a late fall of the medial vowel.

[78] The *i* in *ueich* seems to be merely graphic.

[79] The *i* in *voig* seems to be merely graphic.

[80] *Fret, freda* occur also.

[81] The phenomena of dissimilation have been well classified by M. Grammont in *La dissimilation consonantique dans les langues indo-européennes et dans les langues romanes*, 1895. For metathesis, see Zs., XXVIII, 1.

[82] Cato uses *fructi*.

[83] The process began in classic Latin: *materies materia*, etc.

[84] See § 89, 1.

[85] See § 47, (3).

[86] See § 16, 1.

[87] See § 52, (1), 1.

[88] Perhaps from a fusion of *plūs* and *pluriōres* = *plūres*. Cf. Fr.

[89] These forms existed as early as the 1st century of our era. See Zs., XXVI, 600, 619. *Ejus, ei* may have had some influence.

[90] See § 67, (2).

[91] § 45.

[92] § 74, (2).

[93] Cf. Meyer-Lübke, *Gram.*, II, p. 104.

[94] See Suchier in *Grundriss*, I, p. 627.

[95] Cf. A. von Elsner, *Ueber Form und Verwendung des Personalpronomens im Altprovenzalischen*, 1886.

[96] Cf. Thomas in *Rom.*, XII, 334; Meyer-Lübke in *Gram.*, II, page 104. For a different explanation, see Ascoli in *Archivio glottologico italiano*, XV, 314, 396.

[97] For a different explanation of *mia*, see *Gram.*, I, pp. 246-248, also Horning in Zs., XXV, 341. Cf. Fr. *moie*.

[98] *Cels* shows the influence of masculine nouns and adjectives.

[99] *Aquel* has also *aquilli*. *Cilha* is evidently a combination of *cilh* and *celha*.

[100] *Aquel* has also *aqueli*.

[101] *Aquel* has also *aquelz* and *aquelses*.

[102] See G. Rydberg, *Le développement de facere dans les langues romanes*, 1893.

[103] See A. Zimmermann in *Zs.*, XXV, 735.

[104] See C. C. Rice in *Publications of the Modern Language Association of America*, XIX, 217.

[105] Cf. § 138.

[106] Cf. § 72, Sw.

[107] According to Raimon Vidal, a 13th century grammarian, *tenir* is French.

[108] *Esvanuir* seems to come from the perfect, *evanuī*.

[109] *Enfolhetir* shows the influence of *follet*.

[110] For two different explanations of this ending, see A. Thomas, *Essais de philologie française*, 25, 281; E. Herzog, in *Bausteine zur romanischen Philologie*, 481.

[111] See K. Sittl in *Archiv für lateinische Lexikographie und Grammatik*, I, 465.

[112] For *ai estat* we sometimes find *soi agutz*. The confusion arises perhaps from the use of both *es* and *a* in the sense of ‘there is’: hence *es estat* = *a agut*; and by a mixture of the two, *es agut*. Cf. L. Gauchat, *Sone avuto*, in *Scritti vari di filologia* (dedicated to E. Monaci), 1901, p. 61.

[113] Cf. P. Thielmann, *Archiv für lateinische Lexikographie und Grammatik*, II, 48 and 157.

[114] For the accented vowels in these forms, see §§ 167, 168.

[115] See § 168.

[116] See § 37.

[117] See § 30.

[118] Also, by analogy, *iassér*.

[119] Raimon Vidal says that *crei*, *vei* are the proper forms for the 1st pers. sg. of the pres. indicative.

[120] According to Raimon Vidal, *trac* is the only correct form.

[121] *Volemus* occurs repeatedly in 7th century Latin.

[122] Cf. O. Schmidt, *Ueber die Endungen des Præsens im Altprovenzalischen*, 1887.

[123] The loss of -s is not confined to the Provençal territory: it occurs also in western France, Catalonia, and the Engadine.

[124] Cf. the reduction of *habēbam* to *aβea*: § 153.

[125] *Tenér tenir* really belongs to the second conjugation.

[126] According to Raimon Vidal, this is the regular ending of the 3d pers. sg. of the fourth conjugation.

[127] In *nasquec* the *ui* ending occurs twice.

[128] Beside *parēc*, coming perhaps from a V. L. **parēvit* **parēvuit*.

[129] All verbs in -*nděre* took the perfect in -*sī*: *ascos*, *defes*, *pris*, *respos*, etc. *Lěgěre* took **lěxī* *leis* through the analogy of the p. p. *lěctum*. So *řingěre* took **řixī* *feis* through *řictum*; *řrangěre*, *přngěre*, *tangěre* did likewise (*frais*, *peis*, *tais*); and in Provençal *cénher* *cřngěre*, *esténher* *exstřnguěre*, *plánher* *plangěre* followed the example of these (*ceis*, *esteis*, *plais*): hence all verbs in -*nher* have the preterit in -s.

[130] See Zs., XXVIII, 97.

[131] *Gram.*, II, p. 357.

[132] *Těnuī* and *věnī* influenced each other.

[133] So *břibuit* *bec*, *debuit* *dec*.

[134] So *cognōvit* *conoc*, *mōvit* *moc*.

[135] So **cōcuit* *coc*, *jacuit* *iac*, **nascuit* *nasc*, **pa(s)cuit* *pac*, *placuit* *plac*, *tacuit* *tac*, **tescuit* *tesc*, **vřncuit* *venc*, **vřscuit* *visc*.

[136] So *caluit* *calc*, **tōluit* *tolc*, *vōluit* *volc*.

[137] So **vēnuīt* *venc*.

[138] So *erřpuit* *ereup*, *recřpuit* *receup*.

*** END OF THE PROJECT GUTENBERG EBOOK AN OUTLINE OF
THE PHONOLOGY AND MORPHOLOGY OF OLD PROVENÇAL ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in

this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the

defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including

obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
