THE STEPS TO FOLLOW

1. Prepare Fruit: Select fully ripe fruit. Wash, then prepare exactly as recipe directs. If fruit lacks tartness add $\frac{1}{4}$ cup lemon juice when adding sugar. For separating juice for jelly, use 1-yard square of Canton flannel, spread over colander. Place prepared fruit in cloth, bring corners together and twist while pressing down on bag. To make jellies from dripped juice, use twice amount of fruit called for in recipe.

2. Prepare Glasses: Wash, scald, and drain the glasses and tin covers needed, and melt paraffin in a small pot over hot water while making jelly or jam. Use new paraffin; old paraffin often causes spoilage. If tin covers are not available, cut out circles of paper to paste over tops of glasses.

3. Measure Sugar and Fruit: Use the same standard measuring cup, holding $\frac{1}{2}$ pint, level full, for both sugar and fruit. If sugar is weighed, weigh fruit also. To measure fruit for jam, pack solidly into cup until juice and fruit come to top. If there is a slight shortage, fill last cup, or fraction of cup, with water. If not quite enough juice for jelly, mix water with pulp in jelly bag and squeeze again.

4. Cook Rapidly: For quickest jelly making, use an aluminum kettle or saucepan—6 to 8 quart size. The kettle or saucepan should be less than one-half full of sugar and fruit to permit a *full rolling boil*, a boil which cannot be stirred down. Use hottest flame. If fire is slow, keep kettle covered after sugar is dissolved until mixture comes to a boil. Stir while coming to a boil, and while boiling.

5. Add Certo: For *jelly*, add *Certo* as soon as fruit juice and sugar mixture comes to a boil; then bring to a full rolling boil and boil hard for exactly $\frac{1}{2}$ minute, stirring constantly. For *jam*, cook fruit and sugar mixture at full rolling boil for exactly 1 minute, stirring constantly; then *remove from fire and stir in Certo*. Time boil by the clock.

6. Skim, Pour, Paraffin: Skim jelly and pour directly from saucepan into clean, freshly scalded glasses. Skim and stir jam for 5 minutes by turns. This cooling helps prevent floating fruit. Ladle into glasses. Leave $\frac{1}{2}$ -inch space at top of each glass. Cover at once with $\frac{1}{8}$ inch of hot paraffin. When cool, cover glasses with scalded tin covers or tightly pasted paper covers. Be sure to store in cool, dry place.

New Certo Users: Read carefully pages [4](#), [5](#), [17](#), [18](#), [31](#).

TO MAKE JELLY and JAM TOGETHER

The recipes on this page and the next show how to make both jelly and jam from the same batch of fruit. Here is the very latest short-cut in jelly making applied to the two most popular fruits—strawberries and grapes.

STRAWBERRY JELLY AND JAM

SPARKLING STRAWBERRY JELLY

(also see [page 8](#))

4 cups (2 lbs.) berry juice
7½ cups (3¼ lbs.) sugar
1 bottle Certo

To prepare juice, place 5 quarts uncrushed strawberries in kettle. Add ½ cup sugar and mix. This sugar is in addition to 7½ cups specified above. Cover kettle and heat gently until juice starts to flow, then bring just to the simmering point. Place in colander or sieve lined with double layer of cheesecloth. Drain 4 cups juice. (Use remaining fruit for Whole Strawberry Jam below.) Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add Certo, stirring constantly. Then bring to a *full rolling boil* and boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin at once. Makes about 11 glasses (6 fluid ounces each).

WHOLE STRAWBERRY JAM

(also see [page 19](#))

4 cups (2 lbs.) strawberries
7 cups (3 lbs.) sugar
½ bottle Certo

To prepare fruit, use strawberries remaining from Sparkling Jelly above. Measure sugar and strawberries into large kettle, filling up last cup with the excess juice, if necessary. Mix well and bring to a *full rolling boil* over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute.

Remove from fire and stir in Certo. Stir and skim for 5 minutes. Pour quickly. Paraffin at once. Makes about 10 glasses (6 fluid ounces each).

7

Drain 4 cups juice. (Remove cheesecloth and use fruit remaining in sieve for Concord Grape Butter below.) Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire; at once add Certo, stirring constantly. Then bring to a *full rolling boil* and boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin at once. IMPORTANT DO'S AND DON'TS FOR JELLY MAKERS

DON'T—double Certo recipes. Better color and flavor and more certain results are obtained from single batches.

DO—use fully ripe fruit of the best possible color and flavor. Taste fruit, and if it lacks tartness, add the juice of 2 medium lemons ($\frac{1}{4}$ cup) when adding sugar.

DO—prepare fruit exactly as the recipes direct. Do not simmer before crushing or squeezing unless recipes specify cooking. For crushing fruit, a food chopper is convenient.

DO—measure sugar and fruit exactly with the same standard $\frac{1}{2}$ -pint measuring cup, level full; or weigh both. A standard measuring cup holds $\frac{1}{2}$ pint sugar (7 oz. by weight) or $\frac{1}{2}$ pint fruit or juice (8 oz. by weight).

DO—use a large enough kettle so that your mixture has room enough to boil *hard*. A kettle of 6- to 8-quart capacity is recommended. If the 6-quart size is used for jam, add $\frac{1}{4}$ teaspoon butter with sugar to reduce foaming.

DON'T—confuse a gentle simmering boil with the *full rolling boil* specified in Certo recipes. A full rolling boil is a high, tumbling boil that cannot be stirred down.

DO—time the full rolling boil by the clock.

18

DO—stir and skim jams by turns for just 5 minutes before pouring. This slight cooling helps prevent floating fruit.

DON'T—expose jellies and jams to dust or dampness after they are made. Spoilage is caused by the growth of yeast and mold plants, which are usually carried by dust. Use clean glasses, new paraffin, and clean covers. Paraffin hot jelly and jam at once. Fill glasses only to within $\frac{1}{2}$ inch of top. Store in a cool, dry place.

DON'T—judge the texture of your jellies or jams too hastily. Certo recipes are designed to give an ideal set at the time they are most apt to be used. Many grow progressively firmer for a week to a month after they are made.

NEWS ABOUT PECTIN

Do you know that pectin, which helps you make delicious jams and jellies, plays a role in medicine, too?

DOCTORS have long used apple pectin in the treatment of diarrhea—especially with young children. Good results here have led to further discoveries of the effectiveness of pectin in the treatment of many intestinal disorders and also in the dressing of wounds and burns. Pectin made by the makers of Certo is being used in several of these scientific studies.

BECAUSE this is a subject of active scientific interest, it seems to us news in which you might be interested. These facts are given solely as a matter of information. The makers of Certo wish neither to prescribe nor recommend.

PERFECT JAMS AND JELLIES

Have you ever stopped to think why certain jellies and jams walk off with the blue ribbons in jelly-contests and win cheers from all the family ... just what does stand for perfection in a jelly or a jam?

The Bureau of Home Economics "Score Card for Jelly" rates jellies for flavor, texture, and color, and gives 78% of a score of 100 for perfect flavor and texture. Flavor is defined as "free from excessive sweetness, acid, or overcooked flavor"; perfect texture is "jelly that holds its shape when turned onto a plate, but quivers when the plate is moved."

Why Certo Recipes Win

Certo jelly recipes are developed with fully ripe fruit instead of the under-ripe fruit commonly used in old-fashioned jelly making. They take you a long way toward perfect flavor. And Certo jelly recipes are designed to give best texture at the time the jelly is most apt to be used. They take account of the fact that many jellies grow progressively firmer for a week to a month after they are made.

About the ideal texture for jams there is far less agreement than for jellies. Some prefer jams that hold their shapes, others like softer jams. Either texture may be had with Certo jams. If a jam seems stiffer than desired, break it up with a fork before turning out of the glass.

The Short-Boil Method: Scores of state fair champions in jam and jelly making and millions of other jelly makers, too, use Certo and the short-boil method of jelly making. They know they can depend on Certo for sure results, time and money saving, and better, richer-flavored jams and jellies.

You may find that Certo recipes call for more sugar than you usually use. Remember that with Certo no fruit juice boils away in steam and you

usually get half again more glasses. Thus the extra sugar takes care of the extra juice.

HOW TO MAKE JAMS AND JELLIES WITH CERTO ***using 25% to 50% less sugar***

In any Certo recipe, 2 cups (1½ lbs.) of light corn syrup may be substituted for 2 cups (14 oz.) of sugar required. Results will not be satisfactory if more than 2 cups of corn syrup are used.

MRS. A SHOWS MRS. B THAT CERTO PAYS FOR ITSELF

Mrs. A and Mrs. B both wanted to make some raspberry jam. Each had 2 quarts of berries to begin with and after cleaning and crushing them each got the same amount of prepared fruit—4 cups.

Both Mrs. A and Mrs. B started at 9 o'clock.

Mrs. A added $6\frac{1}{2}$ cups of sugar to her fruit. Then Mrs. A simply brought her fruit and sugar to a tumbling boil, boiled for 1 minute, removed it from the stove and added $\frac{1}{2}$ bottle of Certo. The jam was done and it had all of the flavor of fresh, ripe fruit.

Mrs. A was finished at 9:12.

Mrs. B added 4 cups of sugar. Then Mrs. B, following the old-fashioned “cup for cup” recipe, had to boil her fruit and sugar about 30 minutes before the jam thickened. This long boiling evaporated more than a third of the prepared fruit and carried off most of the natural fresh fruit flavor in steam.

Mrs. B was finished at 9:45.

Mrs. A got 10 glasses of jam from her 2 quarts of berries.

Mrs. B took 3 times as long and got only 6 glasses of jam.

Mrs. A had shown Mrs. B exactly what she meant when she said, “Certo really pays for itself!”

Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
