FRIENDS AND ENEMIES

By FRITZ LEIBER

Illustrated by ENGLE

*In a world blasted by super-bombs
and run by super-thugs, Art vs.
Science can be a deadly debate!*

**[Transcriber's Note: This etext was produced from
Infinity, April 1957.**

**Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

The sun hadn't quite risen, but now that the five men were out from under the trees it already felt hot. Far ahead, off to the left of the road, the spires of New Angeles gleamed dusky blue against the departing night. The two unarmed men gazed back wistfully at the little town, dark and asleep under its moist leafy umbrellas. The one who was thin and had hair flecked with gray looked all intellect; the other, young and with a curly mop, looked all feeling.

The fat man barring their way back to town mopped his head. The two young men flanking him with shotgun and squirtgun hadn't started to sweat yet.

The fat man stuffed the big handkerchief back in his pocket, wiped his hands on his shirt, rested his wrists lightly on the pistols holstered either side his stomach, looked at the two unarmed men, indicated the hot road with a nod, and said, "There's your way, professors. Get going."

The thin man looked at the hand-smears on the fat man's shirt. "But you haven't even explained to me," he protested softly, "why I'm being turned out of Ozona College."

"Look here, Mr. Ellenby, I've tried to make it easy for you," the fat man said. "I'm doing it before the town wakes up. Would you rather be chased by a mob?"

"But why—?"

"Because we found out you weren't just a math teacher, Mr. Ellenby." The fat man's voice went hard. "You'd been a physicist once. *Nuclear* physicist."

The young man with the shotgun spat. Ellenby watched the spittle curl in the dust like a little brown worm. He shifted his gaze to a dead eucalyptus leaf. "I'd like to talk to the college board of regents," he said tonelessly.

"I'm the board of regents," the fat man told him. "Didn't you even know that?"

At this point the other unarmed man spoke up loudly. "But that doesn't explain my case. I've devoted my whole life to warning people against physicists and other scientists. How they'd smash us with their bombs. How they were destroying our minds with 3D and telefax and handies. How they

were blaspheming against Nature, killing all imagination, crushing all beauty out of life!"

"I'd shut my mouth if I were you, Madson," the fat man said critically, "or at least lower my voice. When I mentioned a mob, I wasn't fooling. I saw them burn Cal Tech. In fact, I got a bit excited and helped."

The young man with the shotgun grinned.

"Cal Tech," Ellenby murmured, his eyes growing distant. "Cal Tech burns and Ozona stands."

"Ozona stands for the decencies of life," the fat man grated, "not alphabet bombs and pituitary gas. Its purpose is to save a town, not help kill a world."

"But why should *I* be driven out?" Madson persisted. "I'm just a poet singing the beauties of the simple life unmarred by science."

"Not simple enough for Ozona!" the fat man snorted. "We happen to know, Mr. Poet Madson, that you've written some stories about free love. We don't want anyone telling Ozona girls it's all right to be careless."

"But those were just ideas, ideas in a story," Madson protested. "I wasn't advocating—"

"No difference," the fat man cut him short. "Talk to a woman about ideas and pretty soon she gets some." His voice became almost kindly. "Look here, if you wanted a woman without getting hitched to her, why didn't you go to shantytown?"

Madson squared his shoulders. "You've missed the whole point. I'd never do such a thing. I never have."

"Then you shouldn't have boasted," the fat man said. "And you shouldn't have fooled around with Councilman Classen's daughter."

At the name, Ellenby came out of his trance and looked sharply at Madson, who said indignantly, "I wasn't fooling around with Vera-Ellen, whatever her crazy father says. She came to my office because she has poetic ability and I wanted to encourage it."

"Yeah, so she'd encourage you," the fat man finished. "That girl's wild enough already, which I suppose is what you mean by poetic ability. And in

this town, her father's word counts." He hitched up his belt. "And now, professors, it's time you started."

Madson and Ellenby looked at each other doubtfully. The young man with the squirtgun raised its acid-etched muzzle. The fat man looked hard at Madson and Ellenby. "I think I hear alarm clocks going off," he said quietly.

They watched the two men trudge a hundred yards, watched Ellenby shift the rolled-up towel under his elbow to the other side, watched Madson pause to thumb tobacco into a pipe and glance carelessly back, then shove the pipe in his pocket and go on hurriedly.

"Couple of pretty harmless coots, if you ask me," the young man with the shotgun observed.

"Sure," the fat man agreed, "but we got to remember peoples' feelings and keep Ozona straight. We don't like mobs or fear or girls gone wild."

The young man with the shotgun grinned. "That Vera-Ellen," he murmured, shaking his head.

"You better keep *your* mind off her too," the fat man said sourly. "She's wild enough without anybody to encourage her poetic ability or anything else. It's a good thing we gave those two their walking papers."

"They'll probably walk right into the arms of the Harvey gang," the young man with the squirtgun remarked, "especially if they try to short-cut."

"Pretty small pickings for Harvey, those two," the young man with the shotgun countered. "Which won't please him at all."

The fat man shrugged. "Their own fault. If only they'd had sense enough to keep their mouths shut. Early in life."

"They don't seem to realize it's 1993," said the young man with the shotgun.

The fat man nodded. "Come on," he said, turning back toward the town and the coolness. "We've done our duty."

The young man with the squirtgun took a last look. "There they go, Art and Science," he observed with satisfaction. "Those two subjects always did make my head ache."

On the hot road Madson began to stride briskly. His nostrils flared. "Smell the morning air," he commanded. "It's good, good!"

Ellenby, matching his stride with longer if older legs, looked at him with mild wonder.

"Smell the hot sour grass," Madson continued. "It's things like this man was meant for, not machines and formulas. Look at the dew. Have you seen the dew in years? Look at it on that spiderweb!"

The physicist paused obediently to observe the softly twinkling strands. "Perfect catenaries," he murmured.

"What?"

"A kind of curve," Ellenby explained. "The locus of the focus of a parabola rolling on a straight line."

"Locus-focus hocus-pocus!" Madson snorted. "Reducing the wonders of Nature to chalk marks. It's disgusting."

Suddenly each tiny drop of dew turned blood-red. Ellenby turned his back on the spiderweb, whipped a crooked little brass tube from an inside pocket and squinted through it.

"What's that?" Madson asked.

"Spectroscope," Ellenby explained. "Early morning spectra of the sun are fascinating."

Madson huffed. "There you go. Analyzing. Tearing beauty apart. It's a disease." He paused. "Say, won't you hurt your eyes?"

Turning back, Ellenby shook his head. "I keep a smoked glass on it," he said. "I'm always hoping that some day I'll get a glimpse of an atomic bomb explosion."

"You mean to say you've missed all the dozens they dropped on this country? That's too bad."

"The ball of fire's quite fleeting. The opportunities haven't been as good as you think."

"But you're a physicist, aren't you? Don't you people have all sorts of lovely photographs to gloat over in your laboratories?"

"Atomic bomb spectra were never declassified," Ellenby told him wistfully. "At least not in my part of the project. I've never seen one."

"Well, you'll probably get your chance," Madson told him harshly. "If you've been reading your dirty telefax, you'll know the Hot Truce is coming to a boil. And the Angeles area will be a prime target." Ellenby nodded mutely.

They trudged on. The sun began to beat on their backs like an open fire. Ellenby turned up his collar. He watched his companion thoughtfully. Finally he said, "So you're the Madson who wrote those *Enemies of Science* stories about a world ruled by poets. It never occurred to me back at Ozona. And that non-fiction book about us—what was it called?"

"*Murderers of Imagination*," Madson growled. "And it would have been a good thing if you'd listened to my warnings instead of going on building machines and dissecting Nature and destroying all the lovely myths that make life worthwhile."

"Are you sure that Nature is so lovely and kind?" Ellenby ventured. Madson did not deign to answer.

They passed a crossroad leading, the battered sign said, one way to Palmdale, the other to San Bernardino. They were perhaps a hundred yards beyond it when Ellenby let go a little chuckle. "I have a confession to make. When I was very young I wrote an article about how children shouldn't be taught the Santa Claus myth or any similar fictions."

Madson laughed sardonically. "A perfect member of your dry-souled tribe! Worrying about Santa Claus, when all the while something very different was about to come flying down from over the North Pole and land on our housetops."

"We did try to warn people about the intercontinental missiles," Ellenby reminded him.

"Yes, without any success. The last two reindeer—Donner and Blitzen!"

Ellenby nodded glumly, but he couldn't keep a smile off his face for long. "I wrote another article too—it was never published—about how poetry is completely pointless, how rhymes inevitably distort meanings, and so on."

Madson whirled on him with a peal of laughter. "So you even thought you were big enough to wreck poetry!" He jerked a limp, thinnish volume from

his coat pocket. "You thought you could destroy this!"

Ellenby's expression changed. He reached for the book, but Madson held it away from him. Ellenby said, "That's Keats, isn't it?"

"How would you know?"

Ellenby hesitated. "Oh, I got to like some of his poetry, quite a while after I wrote the article." He paused again and looked squarely at Madson. "Also, Vera-Allen was reading me some pieces out of that volume. I guess you'd loaned it to her."

"Vera-Allen?" Madson's jaw dropped.

Ellenby nodded. "She had trouble with her geometry. Some conferences were necessary." He smiled. "We physicists aren't such a dry-souled tribe, you know."

Madson looked outraged. "Why, you're old enough to be her father!"

"Or her husband," Ellenby replied coolly. "Young women are often attracted to father images. But all that can't make any difference to us now."

"You're right," Madson said shortly. He shoved the poetry volume back in his pocket, flung the sweat out of his eyes, and looked around with impatience. "Say, you're going to New Angeles, aren't you?" he asked, and when Ellenby nodded uncertainly, said, "Then let's cut across the fields. This road is taking us out of our way." And without waiting for a reply he jumped across the little ditch to the left of the road and into the yellowing wheat field. Ellenby watched him for a moment, then hitched his rolled towel further up under his arm and followed.

It was stifling in the field. The wheat seemed to paralyze any stray breezes. Their boots hissed against the dry stems. Far off they heard a lazy drumming. After a while they came to a wide, brimful irrigation ditch. They could see that some hundreds of feet ahead it was crossed by a little bridge. They followed the ditch.

Ellenby felt strangely giddy, as if he were looking at everything through a microscope. That may have been due to the tremendous size of the wheat, its

spikes almost as big as corncobs, the spikelets bigger than kernels—rich orange stuff taut with flour. But then they came to a section marred by larger and larger splotches of a powdery purple blight.

The lazy drumming became louder. Ellenby was the first to see the low-swinging helicopter with its thick, trailing plume of greenish mist. He knocked Madson on the shoulder and both men started to run. Purple dust puffed. Once Ellenby stumbled and Madson stopped to jerk him to his feet. Still they would have escaped except that the copter swerved toward them. A moment later they were enveloped in sweet oily fumes.

Madson heard jeering laughter, glimpsed a grotesquely long-nosed face peering down from above. Then, through the cloud, Ellenby squeaked, "Don't breathe!" and Madson felt himself dragged roughly into the ditch. The water closed over him with a splash.

Puffing and blowing, he came to his feet—the water hardly reached his waist—to find himself being dragged by Ellenby toward the bridge. It was all he could do to keep his footing on the muddy bottom. By the time he got breath enough to voice his indignation, Ellenby was saying, "That's far enough. The stuff's settling away from us. Now strip and scrub yourself."

Ellenby unrolled the towel he'd held tightly clutched to his side all the while, and produced a bar of soap. In response to Madson's question he explained, "That fungicide was probably TTTR or some other relative of the nerve-gas family. They are absorbed through the skin."

Seconds later Madson was scouring his head and chest. He hesitated at his trousers, muttering, "They'll probably have me for indecent exposure. Claim I was trying to start a nudist colony as well as a free-love cult." But Ellenby's warning had been a chilly one.

Ellenby soaped Madson's back and he in turn soaped the older man's ridgy one.

"I suppose that's why he had an elephant's nose," Madson mused.

"What?"

"Man in the copter," Madson explained. "Wearing a respirator."

Ellenby nodded and made them move nearer the bridge for a change of water.

They started to scrub their clothes, rinse and wring them, and lay them on the bank to dry. They watched the copter buzzing along in the distance, but it didn't seem inclined to come near again. Madson felt impelled to say, "You know, it's your chemist friends who have introduced that viciousness into the common man's spirit, giving him horrible poisons to use against Nature. Otherwise he wouldn't have tried to douse us with that stuff."

"He just acted like an ordinary farmer to me," Ellenby replied, scrubbing vigorously.

"Think we're safe?" Madson asked.

Ellenby shrugged. "We'll discover," he said briefly.

Madson shivered, but the rhythmic job was soothing. After a bit he began to feel almost playful. Lathering his shirt, he got some fine large bubbles, held them so he could see their colors flow in the sunlight.

"Tiny perfect worlds of every hue," he murmured. "Violet, blue, green, yellow, orange, red."

"And dead black," Ellenby added.

"You would say something like that!" Madson grunted. "What did you think I was talking about?"

"Bubbles."

"Maybe some of your friends' poisons have black bubbles," Madson said biting. "But I was talking about these."

"So was I. Give me your pipe."

The authority in Ellenby's voice made Madson look around startled. "Give me your pipe," Ellenby repeated firmly, holding out his hand.

Madson fished it out of the pocket of the trousers he was about to wash and handed it over. Ellenby knocked out the soggy tobacco, swished it in the water a few times, and began to soap the inside of the bowl.

Madson started to object, but, "You'd be washing it anyway," Ellenby assured him. "Now look here, Madson, I'm going to blow a bubble and I

want you to watch, I want you to observe Nature for all you're worth. If poets and physicists have one thing in common it's that they're both supposed to be able to observe. Accurately."

He took a breath. "Now see, I'm going to hold the pipe mouth down and let the bubble hang from it, but with one side of the bowl tipped up a bit, so that the strain on the bubble's skin will be greatest on that side."

He blew a big bubble, held the pipe with one hand and pointed with a finger of the other. "There's the place to watch now. There!" The bubble burst.

"What was that?" Madson asked in a new voice. "It really was black for an instant, dull like soot."

"A bubble bursts because its skin gets thinner and thinner," Ellenby said. "When it gets thin enough it shows colors, as interference eliminates different wavelengths. With yellow eliminated it shows violet, and so on. But finally, just for a moment at the place where it's going to break, the skin becomes only one molecule thick. Such a mono-molecular layer absorbs all light, hence shows as dead black."

"Everything's got a black lining, eh?"

"Black can be beautiful. Here, I'll do it again."

Madson put his hand on Ellenby's shoulder to steady himself. They were standing hip-deep in water, their bodies still flecked with suds. Their heads were inches from the new bubble. As it burst a voice floated down to them.

"Is this the Ozona Faculty Kindergarten?"

They whirled around, simultaneously crouching in the water.

"Vera-Ellen, what are you doing here?" Madson demanded.

"Watching the kiddies play," the girl on the bridge replied, running a hand through her tousled violet hair. She looked down at her slacks and jacket. "Wish I'd brought my swim suit, though I gather it wouldn't be expected."

"Vera-Ellen!" Madson said apprehensively.

"It doesn't look very inviting down there, though," she mused. "Guess I'll wait for Aqua Heaven at New Angeles."

"You're going to New Angeles?" Ellenby put in. It is not easy to be conversationally brilliant while squatting chest deep in muddy water, acutely conscious of the absence of clothes.

Vera-Ellen nodded lazily, leaning on the railing. "Going to get me a city job. With its reduced faculty Ozona holds no more intellectual interest for me. Did you know math's going to be made part of the Home Eck department, Mr. Ellenby?"

"But how did you know that we—"

"Daughter of the man who got you run out of town ought to know what the old bully's up to. And if you're worrying that they'll come after me and find us together, I'll just head along by myself."

Madson and Ellenby both protested, though it is even harder to protest effectively than to be conversationally brilliant while squatting naked in coffee-colored water.

Vera-Ellen said, "All right, so quit playing and let's get on. You have to tell me all about New Angeles and the kind of jobs we'll get."

"But—?"

"Modest, eh? I'm afraid Pa wouldn't count it in your favor. But all right." She turned her back and sauntered to the other side of the bridge.

Madson and Ellenby cautiously climbed out of the ditch, brushed the water from their skins, and wormed into their soggy clothes.

"We've got to persuade her to go back," Madson whispered.

"Vera-Ellen?" Ellenby replied and raised his eyebrows.

Madson groaned softly.

"Cheer up," Ellenby said. And he seemed in a cheerful humor himself when they climbed to the bridge. "Vera-Ellen," he said, "we've been having an argument as to whether man ruined Nature or Nature ruined man to start with."

"Is this a class, Mr. Ellenby?"

"Of sorts," he told her. Behind him Madson snorted, flipping his Keats to dry the pages. They started off together.

"Well," said Vera-Ellen, "I like Nature and I like ... human beings. And I don't feel ruined at all. Where's the argument?"

"What about the bombs?" Madson demanded automatically. "By man our physicist here means Technology. Whereas I mean—"

"Oh, the bombs," she said with a shrug. "What sort of job do you think I should get in New Angeles?"

"Well ..." Madson began.

"Say, I'm getting hungry," she raced on, turning to Ellenby.

"So am I," he agreed.

They looked at the road ahead. A jagged hill now hid all but the tips of the spires of New Angeles. On the top of the hill was a tremendous house with sagging roofs of cracked tiles, stucco walls dark with rain stains and green with moss yet also showing cracks, and windows of age-blued glass, some splintered, flashing in the sun, which tempted Ellenby to whip out his spectroscope.

Curving down from the house came a weedy and balding expanse that had obviously once been a well-tended lawn. A few stalwart patches of thick grass held out tenaciously.

Pale-trunked eucalyptus trees towered behind the house and to either side of the road where it curved over the hill.

In a hollow at the foot of the one-time lawn, just where it met the road, something gleamed. As Madson, Ellenby and Vera-Ellen tramped forward, they saw it was an old automobile, one of the jet antiques that were the rage around 1970—in fact, a Lunar '69. Coming closer Ellenby realized that it had custom-built features, such as jet brakes and collision springs.

A man with an odd cap was poking a probe into the air intake, while in the back seat a woman was sitting, shadowed by a hat four feet across. At the sound of their footsteps the man whirled to his feet, quickly enough though unsteadily. He stared at them, wagging the probe. Just at that moment something that looked like an animated orange furpiece leaped from the tonneau.

"George!" the woman cried. "Widgie's got away."

The small flattish creature came on in undulating bounds. It was past the man in the cap before he could turn. It headed for Ellenby, then changed direction. Madson made an impulsive dive for it, but it widened itself still more and sailed over him straight into Vera-Allen's arms.

They walked toward the car. Widgie wriggled, Vera-Allen stroked his ears. He seemed to be a flying fox of some sort. The man eyed them hostilely, raising the probe. Madson stared puzzledly at the cap. Out of his older knowledge Ellenby whispered an explanation: "Chauffeur."

The woman stood in the back seat, swaying slightly. She was wearing a white swim suit and dark teleglasses under her hat. At first she seemed a somewhat ravaged thirty. Then they began to see the rest of the wrinkles.

She received Widgie from Vera-Allen, shook him out and tucked him under her arm, where he hung limply, moving his tiny red eyes.

"Come in with me, my dear," she told Vera-Allen. "George, put down that crazy pole. Pay no attention to George—he can't recognize gentlefolk when he sees them, especially when he's drunk. Gentlemen," she continued, waving graciously to Madson and Ellenby, "you have the thanks of Rickie Vickson." As she pronounced the name she surveyed them sharply. Her gaze settled on Ellenby. "You know me, don't you?"

"Certainly," he answered instantly. "You were my first—my favorite straight 3D star."

"Are you in 3D?" Vera-Allen asked, a sudden gleam in her eyes.

"Was, my dear," Rickie said grandly. She ogled Ellenby through the fish-eye glasses. "Ah, straight 3D," she sighed. "Simple video-audio in depth—there was a great art-form." She began to sway again and they caught the reek of alcohol. "You know, gentlemen, it was handies that ruined my career. I had the looks and the voice, but I lacked the touch. Something in me shrank from the whole idea—be still, Widgie—and the girls with itchy fingers took over. But I'm talking too much about myself. It's hot and you wonderful gentlemen must be thirsty. Here, have a—"

The chauffeur glared at her as she reached fumblingly down into the tonneau. She caught the look and quailed slightly.

"—sandwich," she finished, coming up with a shiny can.

Madson accepted it from her, clicking the catch. The top popped four feet in the air, followed lazily by the uppermost sandwich which he caught deftly. He handed the can to Ellenby, who served himself and handed it up to Vera-Allen. Soon all three of them were munching.

"Miss Vickson," Vera-Allen asked between mouthfuls, "do you think I could get a job in broadcast entertainment?"

Rickie looked at her sideways, leaning away to focus. "Not with that ghastly atomglow hair," she said. "Violet is old hat this year—it's either black, blonde or bald. But give me your hand, my dear."

"Going to tell my fortune?"

"After a fashion." She held up Vera-Allen's hand, squeezing and prodding it thoughtfully, as if she were testing the carcass of an alleged spring chicken. Then she nodded. "You'll do. Good strong hand, that's all that's needed, so you can really crunch the knuckles of the bohunks. They love it rough. Of course the technicians could step up the power when they broadcast your hand-squeeze, but the addicts don't feel it's the same thing." She looked sourly at her own delicate claws. "Yes, my dear, you'll have a chance in handies if you don't mind cuddling with two million dirty-minded bohunks every night and if Rickie Vickson's still got any entree at the studios." She made a face and dipped again into the tonneau, apparently to gulp something, for the chauffeur's glare was intensified.

"You're from New Angeles?" Madson asked politely when Rickie came up beaming.

"Old Angeles," she corrected. "My home's in a contaminated area. After 3D lighting I've never been afraid of hard radiations. But this time my psychic counselor told me—Widgie, I'm going to put you away in a nice little urn—that the bombs are going to miss New Angeles and fall on Old. That's why George is jetting me to the mountains. Others drink to still their fears. I do something about it—too."

"You mean you're going *away* from the studio?" Vera-Allen demanded incredulously while Ellenby mumbled "Bombs?" through a mouthful of

sandwich.

"Of course," Rickie nodded. "Don't you know? Russia's touched a match to the Hot Truce. You charming gentlemen should keep up with these things."

"You see, I told you!" Madson said to Ellenby. "One more victory for science!"

"Miss Vickson, we better be getting on," the chauffeur interrupted, speaking for the first time. His voice was drunkenly thick. "We aren't out of the fusion fringe by a long shot and I don't like the looks of this place."

Rickie ignored him. Ellenby asked, "Was the news about Russia telefaxed?"

"Of course not." Rickie's smile was scornful. "They never tell the real truth these days. But they said to get out of our houses, and what else could that mean?"

"Miss Vickson, we better—" George began again.

"Quiet, George," Rickie ordered.

George groaned faintly, shrugged his shoulders, and reached out an arm to her without looking. Rickie handed him a red, limp plastic bottle. Just as he was putting it to his lips, he jerked as if stung, vaulted into the car, and began to stamp and punch at the controls.

With a mighty *pouf* the jet took hold. Ellenby skittered away from the hot blast. The Lunar '69 jumped forward.

Things hissed and snicked through the air. From nowhere, men began to appear. With a great lurch the car gained the road, roared toward the bridge. Vera-Ellen jumped up as if to get out, then was thrown back into the tonneau. Rickie lunged forward across the seat to save the red bottle. Her four-foot hat leaped upward, hesitated, and then spun off like a flying saucer.

A man rose from the wheat near the bridge. As the car jounced across it, he leveled a rapid-fire weapon. But just as he got it trained on the car, Rickie's hat landed on him. He went over backwards, firing at the sky.

Madson and Ellenby looked around in bewilderment. There must have been a dozen men. As they stared, another bunch came hurrying down the ruined lawn from the house on the hill.

The man by the bridge got up, went over to Rickie's hat and stamped on it.

Madson and Ellenby jumped as the sky-climbing missiles from his gun pattered down around them. When they looked around again, the men from the house on the hill were closing in.

Their leader was about five feet tall, but thick. His head had been formed in a bullet mold, his features looked drop-forged.

"I'm Harvey," he told them blankly. "What you got?"

Harvey's people wore everything from evening dress to shorts. There were even two women (who drifted toward Harvey) one in a gold kimono, the other in an off-the-bosom frock of filthy white lace. Everybody was armed.

"What you got?" Harvey repeated sharply. "I know you're loaded, I saw you talking with that rich-witch in the jet." He looked them over and grabbed at Madson's side pocket. "Books, huh?" he said like a hangman, dangling the Keats by a stray page. Then he turned to Ellenby. "Come on, Skinny," he said, "shell out."

When Ellenby hesitated, two of Harvey's men grabbed him, dumped him, and passed the contents of his pockets to their chief. When the spectroscope turned up, Harvey grinned. The eyes of his people twinkled in anticipation.

"Science gadget, huh?" he said. "Folks, there's been too much science in the world and too many words. Any minute now, more bombs are gonna fall. I do my humble bit to help 'em. I'm a great little junkman." He let the brass tube fall to the ground and lifted his foot. "Blow it a good-bye kiss, Skinny."

"Wait," Madson said abruptly, taking a step toward Harvey. "Don't do it." Then the poet's eyes grew wide and alarmed, as if he hadn't known he was going to say it.

Breaths sucked in around them. Harvey's turret head slowly turned toward Madson, its expression seemingly vacuous. "Why not?" Harvey whispered.

"Don't pay any attention to my friend," Ellenby interjected rapidly. "He just said that on account of me. Actually he hates science as much as you do. Don't—"

"Shaddup!" Harvey roared. Then his voice instantly went low again. "Ain't nobody hates science more'n me, but ain't nobody tells me so. Shoulda kept your mouth shut, Skinny. Now there's gonna be more'n gadgets stomped, more'n books tore."

Silence came except for the faint sucks of breath, the faint scuffle of shoes on grit as Harvey's people slowly moved in. Ellenby stood helplessly, yet at

the same time he felt a widening and intensification of his sensory powers. He was aware of the delicately lace-edged tree shadows cast from the hill ahead by the westering sun. At the other limit of his vision the copter no longer trailed its green caterpillar; for some reason it was buzzing closer along the road. At the same time he was conscious with a feverish clarity of the page by which Harvey dangled the Keats, and without reading the words he saw the lines:

*Beauty is truth, truth beauty—that is all
Ye know on earth, and all ye need to know.*

Suddenly the slowly advancing faces seemed to freeze and Ellenby was aware of something spectral and ominous about the yellowing sunlight and the whole acid-etched scene around him. It was something more than the physical threat to him and Madson—it was something that seemed to well up menacingly from the ground under his feet.

There was a sudden faint thunder and even as something inside Ellenby said, "That isn't it, that isn't what the sky's waiting for," he saw the chrome muzzle of the Lunar '69 bulleting toward them across the bridge with Vera-Ellen's violet mop above the wheel.

But even as the braking blasts gouted out redly from under the hood and the car crunched toward a stop in their midst, even as Harvey's people broke to either side and pistols popped with queerly toylike reports, the thunder multiplied until it was impossible that the Lunar '69 was causing it, until it was like the thunder of a thousand invisible jets crushing the air around them. The sky shifted, rocked. The road shook. There came a shock that numbed Ellenby's feet and sent everyone around him reeling, and a pounding, smashing sound that made any remembered noise seem puny.

The Lunar '69, which had stopped a dozen feet from Ellenby, was pitching and tossing like a silver ship in a storm. Vera-Ellen was gripping the steering wheel with one hand and motioning to him frantically with the other. In the seat beyond her Rickie Vickson was jouncing as if in a merry-go-round chariot.

Ellenby lurched as a hand clutched his shoulder and a staggering Madson howled in his ear through the tumult, "Now you've got your rotten bombs!" Between him and the car Harvey's bullet head reared up and as suddenly

dropped away. Looking down, Ellenby saw that a chasm four feet wide had split the road between him and the car. Its walls were raw, smoking earth and rock. Down it Ellenby saw vanishing, in one frozen moment, Harvey and the Keats and the little brass spectroscope.

Then Ellenby realized he had grabbed Madson by the shoulder and thrown the two of them forward and shouted "Jump!" For a moment the chasm gaped beneath them and a white little face stared upward. Then the chasm closed with a giant crunch and Ellenby's hand caught the side of the heaving car and he pitched into the back seat.

Through the diminishing thunder and shaking there came the toy roar of the car's jet and a new movement tipped him backward and he was looking toward the hill and it was getting bigger. He tried to put his feet down and felt something bulk under them. For a moment he thought it was Madson, but Madson was beside him on the seat, and then he saw it was George. He looked up and Rickie Vickson was watching him from where she was crouched in the front seat, her eyes without the teleglasses looking as foxy as Widgie's, whom she was holding close to her wrinkle-etched cheek.

"Vera-Allen had to conk him," she explained, her gaze dipping to George. "The bum tried to betray us."

The pitching of the car had given way to a steady forward lunge. Ellenby nodded dully at Rickie and hitched himself around and looked back.

Harvey's people were scattering like ants through a dust cloud rising from the road.

The house on the hill still stood, though there were more and larger cracks in it and a nimbus of whiter dust around it.

By the bridge the copter had crashed and was flaming brightly. A tiny figure was running away from it.

Ellenby's face slowly lightened with understanding.

"We were on the San Andreas Rift," he said softly. "Madson, that wasn't the bombs at all. That wasn't Technology or Man." A smile trembled on his lips.

"That was Nature. An earthquake."

Madson was the first to comment. "All right," he said, "it was Nature—Nature showing her disgust for Man."

"An idea like that is the sheerest animism," Ellenby reacted automatically. "Now if you try analyzing—"

"Analyzing!" Madson snorted with a touch of the old fire. "You scientists are always—"

"Whoa, boys," Rickie Vickson interrupted. "If it hadn't been for that little quake to confuse things, Vera-Ellen couldn't have snatched you out no matter how pretty she tried. And I'm in no mood for arguments now. I'm not the arty type and all the science I know is what my psychic counselor tells me. Widgie, quit pounding your heart; it's all over now."

Ellenby touched her arm. "Do I understand," he asked, "that Vera-Ellen made you turn back just to save us?"

"Of course not," Rickie assured him. "Her father and his pals tried to stop us a couple of miles back. They'd been radioed by a farmer in a copter and had the road blocked. George wanted to hand you all over to Vera-Ellen's father, but we conked George—he's such a weakling—and got away. Picking you up was an afterthought."

Vera-Ellen flashed a wicked smile over her shoulder.

Ellenby realized he was feeling vastly contented. He started to lift his feet off George, then settled them more comfortably. He looked at the violet-topped new chauffeur handling the Lunar as if she'd never done anything else, and she picked that moment to flash him another half friendly, half insulting grin. He nudged Madson and said, "We'll continue our argument later—*all* our argument." Madson looked at him sharply and almost grinned too. Ellenby wondered idly what jobs they had for poets and physicists in 3D and handie studios.

Rickie Vickson's eyes widened. "Say," she said, "if they were just warning us about that little old earthquake, then Old Angeles isn't radioactive—I mean any *more* radioactive than it's ever been."

"Oh boy," Vera-Ellen crowed as the car topped the hill and the blue spires came back in sight, "New Angeles, here we come."

*** END OF THE PROJECT GUTENBERG EBOOK FRIENDS AND
ENEMIES ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
