Kenya, the regional hub for trade and finance in East Africa, is hampered by corruption and reliance upon several primary goods whose prices remain low. Following strong economic growth in 1995 and 1996, Kenya's economy has stagnated, with GDP growth failing to keep up with the rate of population growth. In 1997, the IMF suspended Kenya's Enhanced Structural Adjustment Program due to the government's failure to maintain reforms and curb corruption. A severe drought from 1999 to 2000 compounded Kenya's problems, causing water and energy rationing and reducing agricultural output. As a result, GDP contracted by 0.3% in 2000. The IMF, which had resumed loans in 2000 to help Kenya through the drought, again halted lending in 2001 when the government failed to institute several anticorruption measures. Despite the return of strong rains in 2001, weak commodity prices, endemic corruption, and low investment limited Kenya's economic growth to 1%. Growth fell below 1% in 2002 because of erratic rains, low investor confidence, meager donor support, and political infighting up to the elections. In the key December 27, 2002 elections, Daniel Arap Moi's 24-year-old reign ended, and a new opposition government took on the formidable economic problems facing the nation. Substantial donor support and rooting out corruption are essential to making Kenya realize its substantial economic potential.

Kingman Reef

no economic activity

Kiribati

A remote country of 33 scattered coral atolls, Kiribati has few natural resources. Commercially viable phosphate deposits were exhausted at the time of independence from the UK in 1979. Copra and fish now represent the bulk of production and exports. The economy has fluctuated widely in recent years. Economic development is constrained by a shortage of skilled workers, weak infrastructure, and remoteness from international markets. Tourism provides more than one-fifth of GDP. The financial sector is at an early stage of development as is the expansion of private sector initiatives. Foreign financial aid from UK, Japan, Australia, New Zealand, and China is a critical supplement to GDP, equal to 25%-50% of GDP in recent years. Remittances from workers abroad account for more than \$5 million each year.

Korea, North

North Korea, one of the world's most centrally planned and isolated economies, faces desperate economic conditions. Industrial capital stock is nearly beyond repair as a result of years of underinvestment and spare parts shortages. Industrial and power output have declined in parallel. The nation has suffered its tenth year of food shortages because of a lack of arable land; collective farming; weather-related problems, including major drought in 2000; and chronic shortages of fertilizer and fuel. Massive international food aid deliveries have allowed the regime to escape mass starvation since 1995-96, but the population remains the victim of prolonged malnutrition and deteriorating living conditions. Large-scale military spending eats up resources needed for investment and civilian consumption. Recently, the regime has placed emphasis on earning hard currency, developing information technology, addressing power shortages, and attracting foreign aid,

but in no way at the expense of relinquishing central control over key national assets or undergoing widespread market-oriented reforms. In 2003, heightened political tensions with key donor countries and general donor fatigue have held down the flow of desperately needed food aid and have threatened fuel aid as well.

Korea, South

As one of the Four Tigers of East Asia, South Korea has achieved an incredible record of growth and integration into the high-tech modern world economy. Three decades ago GDP per capita was comparable with levels in the poorer countries of Africa and Asia. Today its GDP per capita is 18 times North Korea's and equal to the lesser economies of the European Union. This success through the late 1980s was achieved by a system of close government/business ties, including directed credit, import restrictions, sponsorship of specific industries, and a strong labor effort. The government promoted the import of raw materials and technology at the expense of consumer goods and encouraged savings and investment over consumption. The Asian financial crisis of 1997-99 exposed longstanding weaknesses in South Korea's development model, including high debt/equity ratios, massive foreign borrowing, and an undisciplined financial sector. Growth plunged to a negative 6.6% in 1998, then strongly recovered to 10.8% in 1999 and 9.2% in 2000. Growth fell back to 3.3% in 2001 because of the slowing global economy, falling exports, and the perception that much-needed corporate and financial reforms had stalled. Led by consumer spending and exports, growth in 2002 was an impressive 6.2%, despite anemic global growth, followed by moderate 2.8% growth in 2003. In 2003 the six-day work week was reduced to five days.

Kuwait

Kuwait is a small, rich, relatively open economy with proved crude oil reserves of about 98 billion barrels - 10% of world reserves. Petroleum accounts for nearly half of GDP, 95% of export revenues, and 80% of government income. Kuwait's climate limits agricultural development. Consequently, with the exception of fish, it depends almost wholly on food imports. About 75% of potable water must be distilled or imported. Kuwait continues its discussions with foreign oil companies to develop fields in the northern part of the country. Oil production declined by an estimated 8% in 2002 but is expected to return to the 2001 level in 2003.

Kyrgyzstan

Kyrgyzstan is a small, poor, mountainous country with a predominantly agricultural economy. Cotton, tobacco, wool, and meat are the main agricultural products, although only tobacco and cotton are exported in any quantity. Industrial exports include gold, mercury, uranium, and natural gas and electricity. Kyrgyzstan has been fairly progressive in carrying out market reforms, such as an improved regulatory system and land reform. Kyrgyzstan was the first CIS country to be accepted into the World Trade Organization. With fits and starts, inflation has been lowered to an estimated 7% in 2001, 2.1% in 2002, and 4.0% in 2003. Much of the government's stock in enterprises has been sold. Drops in production had been severe after the breakup of the Soviet Union in December 1991, but by mid-1995 production began to recover and exports began to increase. Growth was held down to 2.1% in 1998 largely because of the spillover from Russia's economic difficulties, but moved ahead to 3.6% in 1999, 5% in 2000, and 5% again in 2001. The drop in output at the Kumtor gold mine sparked a 0.5% decline in GDP in 2002 and again in 2003. On the positive side, the government and the

international financial institutions have been engaged in a comprehensive medium-term poverty reduction and economic growth strategy. Further restructuring of domestic industry and success in attracting foreign investment are keys to future growth.

Laos

The government of Laos - one of the few remaining official Communist states - began decentralizing control and encouraging private enterprise in 1986. The results, starting from an extremely low base, were striking - growth averaged 7% in 1988-2001 except during the short-lived drop caused by the Asian financial crisis beginning in 1997. Despite this high growth rate, Laos remains a country with a primitive infrastructure; it has no railroads, a rudimentary road system, and limited external and internal telecommunications. Electricity is available in only a few urban areas. Subsistence agriculture accounts for half of GDP and provides 80% of total employment. The economy will continue to benefit from aid from the IMF and other international sources and from new foreign investment in food processing and mining.

Latvia

Latvia's transitional economy recovered from the 1998 Russian financial crisis, largely due to the SKELE government's budget stringency and a gradual reorientation of exports toward EU countries, lessening Latvia's trade dependency on Russia. The majority of companies, banks, and real estate have been privatized, although the state still holds sizable stakes in a few large enterprises. Latvia officially joined the World Trade Organization in February 1999. Preparing for EU membership continues as a top foreign policy goal. The current account and internal government deficits remain major concerns, but the government's efforts to

increase efficiency in revenue collection may lessen the budget deficit.

Lebanon

The 1975-91 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and all but ended Lebanon's position as a Middle Eastern entrepot and banking hub. Peace enabled the central government to restore control in Beirut, begin collecting taxes, and regain access to key port and government facilities. Economic recovery was helped by a financially sound banking system and resilient small- and medium-scale manufacturers. Family remittances, banking services, manufactured and farm exports, and international aid provided the main sources of foreign exchange. Lebanon's economy made impressive gains since the launch in 1993 of "Horizon 2000," the government's \$20 billion reconstruction program. Real GDP grew 8% in 1994, 7% in 1995, 4% in 1996 and in 1997, but slowed to 1.2% in 1998, -1.6% in 1999, -0.6% in 2000, 0.8% in 2001, and 1.5% in 2002. During the 1990s annual inflation fell to almost 0% from more than 100%. Lebanon has rebuilt much of its war-torn physical and financial infrastructure. The government nonetheless faces serious challenges in the economic arena. It has funded reconstruction by borrowing heavily - mostly from domestic banks. In order to reduce the ballooning national debt, the re-installed HARIRI government began an economic austerity program to rein in government expenditures, increase revenue collection, and privatize state enterprises. The HARIRI government met with international donors at the Paris II conference in November 2002 to seek bilateral assistance restructuring its domestic debt at lower rates of interest. While privatization of state-owned enterprises had not occurred by the end of 2002, the government had successfully avoided a currency devaluation and debt default in 2002.

Lesotho

Small, landlocked, and mountainous, Lesotho relies on remittances from miners employed in South Africa and customs duties from the Southern Africa Customs Union for the majority of government revenue, but the government has strengthened its tax system to reduce dependency on customs duties. Completion of a major hydropower facility in January 1998 now permits the sale of water to South Africa, also generating royalties for Lesotho. As the number of mineworkers has declined steadily over the past several years, a small manufacturing base has developed based on farm products that support the milling, canning, leather, and jute industries and a rapidly growing apparel-assembly sector. The economy is still primarily based on subsistence agriculture, especially livestock, although drought has decreased agricultural activity. The extreme inequality in the distribution of income remains a major drawback. Lesotho has signed an Interim Poverty Reduction and Growth Facility with the IMF.

Liberia

Civil war and misgovernment have destroyed much of Liberia's economy, especially the infrastructure in and around Monrovia. Many businessmen have fled the country, taking capital and expertise with them. Some have returned; many will not. Richly endowed with water, mineral resources, forests, and a climate favorable to agriculture, Liberia had been a producer and exporter of basic products - primarily raw timber and rubber. Local manufacturing, mainly foreign owned, had been small in scope. The restoration of the infrastructure and the raising of incomes in this ravaged economy depend on the settlement of civil warfare, the implementation of sound macro- and micro-economic policies, including the

encouragement of foreign investment, and generous support from donor countries.

Libya

The socialist-oriented economy depends primarily upon revenues from the oil sector, which contribute practically all export earnings and about one-quarter of GDP. These oil revenues and a small population give Libya one of the highest per capita GDPs in Africa, but little of this income flows down to the lower orders of society. Import restrictions and inefficient resource allocations have led to periodic shortages of basic goods and foodstuffs. The nonoil manufacturing and construction sectors, which account for about 20% of GDP, have expanded from processing mostly agricultural products to include the production of petrochemicals, iron, steel, and aluminum. Climatic conditions and poor soils severely limit agricultural output, and Libya imports about 75% of its food. Higher oil prices in the last three years led to an increase in export revenues, which has improved macroeconomic balances but has done little to stimulate broad-based economic growth. Libya is making slow progress toward economic liberalization and the upgrading of economic infrastructure, but truly market-based reforms will be slow in coming.

Liechtenstein

Despite its small size and limited natural resources, Liechtenstein has developed into a prosperous, highly industrialized, free-enterprise economy with a vital financial service sector and living standards on a par with its large European neighbors. The Liechtenstein economy is widely diversified with a large number of small businesses. Low business taxes - the maximum tax rate is 20% - and easy incorporation rules have induced many

holding or so-called letter box companies to establish nominal offices in Liechtenstein, providing 30% of state revenues. The country participates in a customs union with Switzerland and uses the Swiss franc as its national currency. It imports more than 90% of its energy requirements. Liechtenstein has been a member of the European Economic Area (an organization serving as a bridge between the European Free Trade Association (EFTA) and the EU) since May 1995. The government is working to harmonize its economic policies with those of an integrated Europe.

Lithuania

Lithuania, the Baltic state that has conducted the most trade with Russia, has slowly rebounded from the 1998 Russian financial crisis. Unemployment remains high, still 10.7% in 2003, but is improving. Growing domestic consumption and increased investment have furthered recovery. Trade has been increasingly oriented toward the West. Lithuania has gained membership in the World Trade Organization and has moved ahead with plans to join the EU. Privatization of the large, state-owned utilities, particularly in the energy sector, is nearing completion. Overall, more than 80% of enterprises have been privatized. Foreign government and business support have helped in the transition from the old command economy to a market economy.

Luxembourg

This stable, high-income economy features solid growth, low inflation, and low unemployment. The industrial sector, initially dominated by steel, has become increasingly diversified to include chemicals, rubber, and other products. Growth in the financial sector, which now accounts for about 22% of GDP, has more than compensated for the decline in steel. Most banks are

foreign-owned and have extensive foreign dealings. Agriculture is based on small family-owned farms. The economy depends on foreign and trans-border workers for more than 30% of its labor force. Although Luxembourg, like all EU members, has suffered from the global economic slump, the country has maintained a fairly strong growth rate and enjoys an extraordinarily high standard of living.

Macau

Macau's economy four years after reversion to China remains one of the most open in the world. The territory's net exports of goods and services account for 39% of GDP with tourism and apparel exports as the mainstays. Although the territory was hit hard by the 1998 Asian financial crisis and the global downturn in 2001, its economy grew an estimated 9.5% in 2002. A rapid rise in the number of mainland visitors because of China's easing of restrictions on travel drove the recovery. The budget also returned to surplus in 2002 because of the surge in visitors from China and a hike in taxes on gambling profits, which generated about 63% of government revenue. The liberalization of Macao's gambling monopoly may contribute to GDP growth, as the three companies awarded gambling licenses have pledged to invest \$2.2 billion - roughly 33% of GDP - in the territory. Much of Macau's textile industry may move to the mainland as the Multi-Fiber Agreement is phased out. The territory may have to rely more on gambling and trade-related services to generate growth. Growth fell to 4% in 2003, according to early government forecasts, with the drop in large measure due to concerns over the Severe Acute Respiratory Syndrome (SARS).

Macedonia, The Former Yugoslav Republic of
At independence in
November 1991, Macedonia was the least developed of the Yugoslav

republics, producing a mere 5% of the total federal output of goods and services. The collapse of Yugoslavia ended transfer payments from the center and eliminated advantages from inclusion in a de facto free trade area. An absence of infrastructure, UN sanctions on Yugoslavia, one of its largest markets, and a Greek economic embargo over a dispute about the country's constitutional name and flag hindered economic growth until 1996. GDP subsequently rose each year through 2000. However, the leadership's commitment to economic reform, free trade, and regional integration was undermined by the ethnic Albanian insurgency of 2001. The economy shrank 4.5% because of decreased trade, intermittent border closures, increased deficit spending on security needs, and investor uncertainty. Growth barely recovered in 2002 to 0.3%, then rose to 2.8% in 2003. Unemployment at one-third of the workforce remains the most critical economic problem. But even this issue is overshadowed by the fragile political situation.

Madagascar

Having discarded past socialist economic policies, Madagascar has since the mid 1990s followed a World Bank and IMF led policy of privatization and liberalization, which has placed the country on a slow and steady growth path. Agriculture, including fishing and forestry, is a mainstay of the economy, accounting for one-fourth of GDP and employing four-fifths of the population. Export earnings primarily are earned in the small industrial sector, which features textile manufacturing and agriculture processing. Deforestation and erosion, aggravated by the use of firewood as the primary source of fuel are serious concerns. The separatist political crisis of 2002 undermined macroeconomic stability, with the estimated drop in output being subject to a wide margin of

error. Poverty reduction will be the centerpiece of economic policy for the next few years.

Malawi

Landlocked Malawi ranks among the world's least developed countries. The economy is predominately agricultural, with about 90% of the population living in rural areas. Agriculture accounted for nearly 40% of GDP and 88% of export revenues in 2001. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. In late 2000, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program. In November 2002 the World Bank approved a \$50 million drought recovery package, which is to be used for famine relief. The government faces strong challenges, e.g., to fully develop a market economy, to improve educational facilities, to face up to environmental problems, to deal with the rapidly growing problem of HIV/AIDS, and to satisfy foreign donors that fiscal discipline is being tightened. The performance of the tobacco sector is key to short-term growth as tobacco accounts for over 50% of exports.

Malaysia

Malaysia, a middle-income country, transformed itself from 1971 through the late 1990s from a producer of raw materials into an emerging multi-sector economy. Growth was almost exclusively driven by exports - particularly of electronics - and, as a result Malaysia was hard hit by the global economic downturn and the slump in the Information Technology (IT) sector in 2001. GDP in 2001 grew only 0.5% due to an estimated 11% contraction in exports, but a substantial fiscal stimulus package mitigated the worst of the recession and the economy rebounded in 2002. Healthy foreign

exchange reserves and relatively small external debt make it unlikely that Malaysia will experience a crisis similar to the one in 1997, but the economy remains vulnerable to a more protracted slowdown in Japan and the US, top export destinations and key sources of foreign investment.

Maldives

Tourism, Maldives largest industry, accounts for 20% of GDP and more than 60% of the Maldives' foreign exchange receipts. Over 90% of government tax revenue comes from import duties and tourism-related taxes. Almost 400,000 tourists visited the islands in 1998. Fishing is a second leading sector. The Maldivian Government began an economic reform program in 1989 initially by lifting import quotas and opening some exports to the private sector. Subsequently, it has liberalized regulations to allow more foreign investment. Agriculture and manufacturing continue to play a lesser role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Most staple foods must be imported. Industry, which consists mainly of garment production, boat building, and handicrafts, accounts for about 18% of GDP. Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is one meter or less above sea level.

Mali

Mali is among the poorest countries in the world, with 65% of its land area desert or semidesert and with a highly unequal distribution of income. Economic activity is largely confined to the riverine area irrigated by the Niger. About 10% of the population is nomadic and some 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm

commodities. Mali is heavily dependent on foreign aid and vulnerable to fluctuations in world prices for cotton, its main export, along with gold. The government has continued its successful implementation of an IMF-recommended structural adjustment program that is helping the economy grow, diversify, and attract foreign investment. Mali's adherence to economic reform and the 50% devaluation of the African franc in January 1994 have pushed up economic growth to a sturdy 5% average in 1996-2002. Worker remittances and external trade routes have been jeopardized by continued unrest in neighboring Cote d'Ivoire.

Malta

Major resources are limestone, a favorable geographic location, and a productive labor force. Malta produces only about 20% of its food needs, has limited fresh water supplies, and has no domestic energy sources. The economy is dependent on foreign trade, manufacturing (especially electronics and textiles), and tourism. Malta is privatizing state-controlled firms and liberalizing markets in order to prepare for membership in the European Union. The island remains divided politically, however, over the question of joining the EU. Continued sluggishness in the global economy is holding back exports, tourism, and overall growth.

Man, Isle of

Offshore banking, manufacturing, and tourism are key sectors of the economy. The government's policy of offering incentives to high-technology companies and financial institutions to locate on the island has paid off in expanding employment opportunities in high-income industries. As a result, agriculture and fishing, once the mainstays of the economy, have declined in

their shares of GDP. Trade is mostly with the UK. The Isle of Man enjoys free access to EU markets.

Marshall Islands

US Government assistance is the mainstay of this tiny island economy. Agricultural production is primarily subsistence and is concentrated on small farms; the most important commercial crops are coconuts and breadfruit. Small-scale industry is limited to handicrafts, tuna processing, and copra. The tourist industry, now a small source of foreign exchange employing less than 10% of the labor force, remains the best hope for future added income. The islands have few natural resources, and imports far exceed exports. Under the terms of the Compact of Free Association, the US has provided more than \$1 billion in aid since 1986. Negotiations have continued for an extended agreement. Government downsizing, drought, a drop in construction, the decline in tourism and foreign investment due to the Asian financial difficulties, and less income from the renewal of fishing vessel licenses have held GDP growth to an average of 1% over the past decade.

Martinique

The economy is based on sugarcane, bananas, tourism, and light industry. Agriculture accounts for about 6% of GDP and the small industrial sector for 11%. Sugar production has declined, with most of the sugarcane now used for the production of rum. Banana exports are increasing, going mostly to France. The bulk of meat, vegetable, and grain requirements must be imported, contributing to a chronic trade deficit that requires large annual transfers of aid from France. Tourism, which employs more than 11,000 people, has become more important than agricultural exports as a source of foreign exchange.

Mauritania

Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania has extensive deposits of iron ore, which account for nearly 40% of total exports. The decline in world demand for this ore, however, has led to cutbacks in production. The nation's coastal waters are among the richest fishing areas in the world, but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. In the past, drought and economic mismanagement resulted in a buildup of foreign debt. In February 2000, Mauritania qualified for debt relief under the Heavily Indebted Poor Countries (HIPC) initiative and in December 2001 received strong support from donor and lending countries at a triennial Consultative Group review. In 2001, exploratory oil wells in tracts 80 km offshore indicated potential extraction at current world oil prices. A new investment code approved in December 2001 improved the opportunities for direct foreign investment. Ongoing negotiations with the IMF involve problems of economic reforms and fiscal discipline. Substantial oil production and exports probably will not begin until 2005.

Mauritius

Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. For most of the period, annual growth has been in the order of 5% to 6%. This remarkable achievement has been reflected in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure. Sugarcane is

grown on about 90% of the cultivated land area and accounts for 25% of export earnings. The government's development strategy centers on foreign investment. Mauritius has attracted more than 9,000 offshore entities, many aimed at commerce in India and South Africa, and investment in the banking sector alone has reached over \$1 billion. Mauritius, with its strong textile sector and responsible fiscal management, has been well poised to take advantage of the Africa Growth and Opportunity Act (AGOA). The government is encouraging foreign investment in the information technology field.

Mayotte

Economic activity is based primarily on the agricultural sector, including fishing and livestock raising. Mayotte is not self-sufficient and must import a large portion of its food requirements, mainly from France. The economy and future development of the island are heavily dependent on French financial assistance, an important supplement to GDP. Mayotte's remote location is an obstacle to the development of tourism.

Mexico

Mexico has a free market economy with a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. Recent administrations have expanded competition in seaports, railroads, telecommunications, electricity, natural gas distribution, and airports. Income distribution remains highly unequal. Trade with the US and Canada has tripled since the implementation of NAFTA in 1994. Following 6.9% growth in 2000, real GDP fell 0.3% in 2001, recovering to only a plus 1% in 2002, with the US slowdown the principal cause. Mexico implemented free trade agreements with Guatemala, Honduras, El Salvador, and the European Free Trade Area in 2001, putting more than 90% of trade under free

trade agreements. Foreign direct investment reached \$25 billion in 2001, of which \$12.5 billion came from the purchase of Mexico's second-largest bank, Banamex, by Citigroup.

Micronesia, Federated States of
Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The potential for a tourist industry exists, but the remote location, a lack of adequate facilities, and limited air connections hinder development. In November 2002, the country experienced a further reduction in future revenues from the Compact of Free Association - the agreement with the US in which Micronesia received \$1.3 billion in financial and technical assistance over a 15-year period until 2001. The country's medium-term economic outlook appears fragile due not only to the reduction in US assistance but also to the slow growth of the private sector. Geographical isolation and a poorly developed infrastructure remain major impediments to long-term growth.

Midway Islands
The economy is based on providing support services for the national wildlife refuge activities located on the islands. All food and manufactured goods must be imported.

Moldova
Moldova remains a very poor country despite recent progress from its small economic base. It enjoys a favorable climate and good farmland but has no major mineral deposits. As a result, the economy depends heavily on agriculture, featuring fruits, vegetables, wine, and tobacco. Moldova must import all of its supplies of oil, coal,

and natural gas, largely from Russia. Energy shortages contributed to sharp production declines after the breakup of the Soviet Union in 1991. As part of an ambitious reform effort, Moldova introduced a convertible currency, freed all prices, stopped issuing preferential credits to state enterprises, backed steady land privatization, removed export controls, and freed interest rates. The government entered into agreements with the World Bank and the IMF to promote growth and reduce poverty. The economy returned to positive growth, of 2.1% in 2000, 6.1% in 2001, 7.2% in 2002, and 5.3% in 2003. Further reforms will come slowly because of strong political forces backing government controls. The economy remains vulnerable to higher fuel prices, poor agricultural weather, and the skepticism of foreign investors.

Monaco

Monaco, situated on the French Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. In 2001, a major new construction project will extend the pier used by cruise ships in the main harbor. The principality has successfully sought to diversify into services and small, high-value-added, nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas. Monaco does not publish national income figures; the estimates below are extremely rough.

Mongolia

Economic activity traditionally has been based on agriculture and breeding of livestock. Mongolia also has extensive mineral deposits; copper, coal, molybdenum, tin, tungsten, and gold account for a large part of industrial production. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990-1991 at the time of the dismantlement of the USSR. Mongolia was driven into deep recession, prolonged by the Mongolian People's Revolutionary Party's (MPRP) reluctance to undertake serious economic reform. The Democratic Coalition (DC) government embraced free-market economics, eased price controls, liberalized domestic and international trade, and attempted to restructure the banking system and the energy sector. Major domestic privatization programs were undertaken, as well as the fostering of foreign investment through international tender of the oil distribution company, a leading cashmere company, and banks. Reform was held back by the ex-Communist MPRP opposition and by the political instability brought about through four successive governments under the DC. Economic growth picked up in 1997-1999 after stalling in 1996 due to a series of natural disasters and declines in world prices of copper and cashmere. In August and September 1999, the economy suffered from a temporary Russian ban on exports of oil and oil products, and Mongolia remains vulnerable in this sector. Mongolia joined the World Trade Organization (WTO) in 1997. The international donor community pledged over \$300 million per year at the Consultative Group Meeting, held in Ulaanbaatar in June 1999. The MPRP government, elected in July 2000, is anxious to improve the investment climate; it must also deal with a heavy burden of external debt. Falling prices for Mongolia's mainly primary sector exports, widespread opposition to privatization, and adverse effects

of weather on agriculture in early 2000 and 2001 restrained real GDP growth in 2000-2001. Despite drought problems in 2002, GDP rose 4.0%, followed by a solid 5.0% increase in 2003. The first applications under the land privatization law have been marked by a number of disputes over particular sites. Russia claims Mongolia owes it \$11 billion from the old Soviet period; any settlement could substantially increase Mongolia's foreign debt burden.

Montserrat

Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airports and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998, but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcano and on public sector construction activity. The UK has launched a three-year \$122.8 million aid program to help reconstruct the economy. Half of the island is expected to remain uninhabitable for another decade.

Morocco

Morocco faces the problems typical of developing countries - restraining government spending, reducing constraints on private activity and foreign trade, and achieving sustainable economic growth. Following structural adjustment programs supported by the IMF, World Bank, and the Paris Club, the dirham is now fully convertible for current account transactions, and reforms of the financial sector have been implemented. Droughts depressed activity in the key agricultural sector and contributed to a stagnant economy

in 1999 and 2000. During that time, however, Morocco reported large foreign exchange inflows from the sale of a mobile telephone license and partial privatization of the state-owned telecommunications company. Favorable rainfall in 2001 led to a growth of 6.5%. Good harvest conditions continued to support GDP growth in 2002. Formidable long-term challenges include: servicing the external debt; modernizing the industrial sector; preparing the economy for freer trade with the EU and US; and improving education and attracting foreign investment to boost living standards and job prospects for Morocco's youth.

Mozambique

At independence in 1975, Mozambique was one of the world's poorest countries. Socialist mismanagement and a brutal civil war from 1977-92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, have led to dramatic improvements in the country's growth rate. Inflation was brought to single digits during the late 1990s although it returned to double digits in 2000-02. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remains dependent upon foreign assistance for much of its annual budget, and the majority of the population remains below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's workforce. A substantial trade imbalance persists although the opening of the MOZAL aluminum smelter, the country's largest foreign investment project to date has increased export earnings. Additional investment projects in titanium extraction and processing

and garment manufacturing should further close the import/export gap. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level.

Namibia

The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 20% of GDP. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Namibia is the fourth-largest exporter of nonfuel minerals in Africa, the world's fifth-largest producer of uranium, and the producer of large quantities of lead, zinc, tin, silver, and tungsten. The mining sector employs only about 3% of the population while about half of the population depends on subsistence agriculture for its livelihood. Namibia normally imports about 50% of its cereal requirements; in drought years food shortages are a major problem in rural areas. A high per capita GDP, relative to the region, hides the great inequality of income distribution; nearly one-third of Namibians had annual incomes of less than \$1400 in constant 1994 dollars, according to a 1993 study. The Namibian economy is closely linked to South Africa with the Namibian dollar pegged to the South African rand. Privatization of several enterprises in coming years may stimulate long-run foreign investment.

Nauru

Revenues of this tiny island have come from exports of phosphates, but reserves are expected to be exhausted within a few years. Phosphate production has declined since 1989, as demand has fallen in traditional markets and as the marginal cost of extracting

the remaining phosphate increases, making it less internationally competitive. While phosphates have given Nauruans one of the highest per capita incomes in the Third World, few other resources exist with most necessities being imported, including fresh water from Australia. The rehabilitation of mined land and the replacement of income from phosphates are serious long-term problems. In anticipation of the exhaustion of Nauru's phosphate deposits, substantial amounts of phosphate income have been invested in trust funds to help cushion the transition and provide for Nauru's economic future. The government has been borrowing heavily from the trusts to finance fiscal deficits. To cut costs the government has called for a freeze on wages, a reduction of over-staffed public service departments, privatization of numerous government agencies, and closure of some overseas consulates. In recent years Nauru has encouraged the registration of offshore banks and corporations. Tens of billions of dollars have been channeled through their accounts. Few comprehensive statistics on the Nauru economy exist, with estimates of Nauru's GDP varying widely.

Nepal

Nepal is among the poorest and least developed countries in the world with 42% of its population living below the poverty line. Agriculture is the mainstay of the economy, providing a livelihood for over 80% of the population and accounting for 40% of GDP. Industrial activity mainly involves the processing of agricultural produce including jute, sugarcane, tobacco, and grain. Textile and carpet production, accounting for about 80% of foreign exchange earnings in recent years, contracted in 2001-02 due to the overall

slowdown in the world economy and pressures by Maoist insurgents on factory owners and workers. Security concerns in the wake of the Maoist conflict and the September 11, 2001 terrorist attacks in the US have led to a decrease in tourism, another key source of foreign exchange. Since 1991, the government has been moving forward with economic reforms, e.g., by reducing business licenses and registration requirements to simplify investment procedures, reducing subsidies, privatizing state industries, and laying off civil servants. Nepal has considerable scope for exploiting its potential in hydropower and tourism, areas of recent foreign investment interest. Prospects for foreign trade or investment in other sectors will remain poor, however, because of the small size of the economy, its technological backwardness, its remoteness, its landlocked geographic location, and its susceptibility to natural disaster. The international community's role of funding more than 60% of Nepal's development budget and more than 28% of total budgetary expenditures will likely continue as a major ingredient of growth.

Netherlands

The Netherlands is a prosperous and open economy depending heavily on foreign trade. The economy is noted for stable industrial relations, moderate unemployment and inflation, a sizable current account surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs no more than 4% of the labor force but provides large surpluses for the food-processing industry and for exports. The Netherlands, along with 11 of its EU partners, began circulating the euro currency on 1 January 2002. The country continues to be one of the leading European nations for

attracting foreign direct investment. Economic growth slowed considerably in 2001-03, as part of the global economic slowdown, but for the four years before that, annual growth averaged nearly 4%, well above the EU average. The government is wrestling with a deteriorating budget position, and is moving toward the EU 3% limit.

Netherlands Antilles

Tourism, petroleum refining, and offshore finance are the mainstays of this small economy, which is closely tied to the outside world. Although GDP has declined or remained even in each of the past six years, the islands enjoy a high per capita income and a well-developed infrastructure compared with other countries in the region. Almost all consumer and capital goods are imported, the US and Mexico being the major suppliers. Poor soils and inadequate water supplies hamper the development of agriculture.

New Caledonia

New Caledonia has about 25% of the world's known nickel resources. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France - equal to more than one-fourth of GDP - and tourism are keys to the health of the economy. Substantial new investment in the nickel industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.

New Zealand

Since 1984 the government has accomplished major economic restructuring, transforming New Zealand from an agrarian economy dependent on concessionary British market access to a more

industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes (but left behind many at the bottom of the ladder), broadened and deepened the technological capabilities of the industrial sector, and contained inflationary pressures. While per capita incomes have been rising, however, they remain below the level of the four largest EU economies, and there is some government concern that New Zealand is not closing the gap. New Zealand is heavily dependent on trade - particularly in agricultural products - to drive growth, and it has been affected by the global economic slowdown and the slump in commodity prices. Thus far the New Zealand economy has been relatively resilient, although growth may slow to 2.5% in 2003.

Nicaragua

Nicaragua, one of the hemisphere's poorest countries, faces low per capita income, flagging socio-economic indicators, and huge external debt. Distribution of income is one of the most unequal on the globe. While the country has made progress toward macroeconomic stability over the past few years, a banking crisis and scandal has shaken the economy. Nicaragua will continue to be dependent on international aid and debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. Donors have made aid conditional on the openness of government financial operation, poverty alleviation, and human rights. Nicaragua met the conditions for additional debt service relief in December 2000. Growth should move up moderately in 2003 because of increased private investment and exports.

Niger

Niger is a poor, landlocked Sub-Saharan nation, whose economy centers on subsistence agriculture, animal husbandry, and reexport

trade, and increasingly less on uranium, because of declining world demand. The 50% devaluation of the West African franc in January 1994 boosted exports of livestock, cowpeas, onions, and the products of Niger's small cotton industry. The government relies on bilateral and multilateral aid - which was suspended following the April 1999 coup d'etat - for operating expenses and public investment. In 2000-01, the World Bank approved a structural adjustment loan of \$105 million to help support fiscal reforms. However, reforms could prove difficult given the government's bleak financial situation. The IMF approved a \$73 million poverty reduction and growth facility for Niger in 2000 and announced \$115 million in debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. Further disbursements of aid occurred in 2002. Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources.

Nigeria

The oil-rich Nigerian economy, long hobbled by political instability, corruption, and poor macroeconomic management, is undergoing substantial reform under the new civilian administration. Nigeria's former military rulers failed to diversify the economy away from overdependence on the capital-intensive oil sector, which provides 20% of GDP, 95% of foreign exchange earnings, and about 65% of budgetary revenues. The largely subsistence agricultural sector has failed to keep up with rapid population growth, and Nigeria, once a large net exporter of food, now must import food. Following the signing of an IMF stand-by agreement in August 2000, Nigeria received a debt-restructuring deal from the Paris Club and a \$1 billion credit from the IMF, both contingent on economic reforms. The agreement was allowed to expire by the IMF in November 2001, however, and Nigeria apparently received much less multilateral

assistance than expected in 2002. Nonetheless, increases in foreign oil investment and oil production kept growth at 3% in 2002. The government lacks the strength to implement the market-oriented reforms urged by the IMF, such as modernization of the banking system; to curb inflation by blocking excessive wage demands; and to resolve regional disputes over the distribution of earnings from the oil industry. When the uncertainties in the global economy are added in, estimates of Nigeria's prospects for 2003 must have a wide margin of error.

Niue

The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of migration of Niueans to New Zealand. Efforts to increase GDP include the promotion of tourism and a financial services industry, although

Premier LAKATANI announced in February 2002 that Niue will shut down

the offshore banking industry. Economic aid from New Zealand in 2002 was about \$2.6 million.

Norfolk Island

Tourism, the primary economic activity, has steadily increased over the years and has brought a level of prosperity unusual among inhabitants of the Pacific islands. The agricultural sector has become self-sufficient in the production of beef, poultry, and eggs.

Northern Mariana Islands

The economy benefits substantially from financial assistance from the US. The rate of funding has declined as locally generated government revenues have grown. The key tourist industry employs about 50% of the work force and accounts for roughly one-fourth of GDP. Japanese tourists predominate. Annual tourist entries have exceeded one-half million in recent years, but financial difficulties in Japan have caused a temporary slowdown. The agricultural sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Garment production is by far the most important industry with employment of 17,500 mostly Chinese workers and sizable shipments to the US under duty and quota exemptions.

Norway

The Norwegian economy is a prosperous bastion of welfare capitalism, featuring a combination of free market activity and government intervention. The government controls key areas, such as the vital petroleum sector (through large-scale state enterprises). The country is richly endowed with natural resources - petroleum, hydropower, fish, forests, and minerals - and is highly dependent on its oil production and international oil prices; in 1999, oil and gas accounted for 35% of exports. Only Saudi Arabia and Russia export more oil than Norway. Norway opted to stay out of the EU

during a referendum in November 1994. The government has moved ahead

with privatization. With arguably the highest quality of life worldwide, Norwegians still worry about that time in the next two decades when the oil and gas begin to run out. Accordingly, Norway has been saving its oil-boasted budget surpluses in a Government Petroleum Fund, which is invested abroad and now is valued at more than \$43 billion. GDP growth was a lackluster 1% in 2002 and 2003 against the background of a faltering European economy.

Oman

Oman's economic performance improved significantly in 2000 due largely to the upturn in oil prices. The government is moving ahead with privatization of its utilities, the development of a body of commercial law to facilitate foreign investment, and increased budgetary outlays. Oman continues to liberalize its markets and joined the World Trade Organization (WTrO) in November 2000. GDP growth improved in 2001 despite the global slowdown and then fell back to 2.2% in 2002. In order to reduce unemployment, the government is trying to replace expatriate workers with local workers. Another government objective is the development of the nation's gas resources.

Pacific Ocean

The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role

in the energy supplies of US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has slowed but not stopped new drillings.

Pakistan

Pakistan, an impoverished and underdeveloped country, suffers from internal political disputes, low levels of foreign investment, and a costly, ongoing confrontation with neighboring India. Pakistan's economic prospects, although still marred by poor human development indicators, continued to improve in 2002 following unprecedented inflows of foreign assistance beginning in 2001. Foreign exchange reserves have grown to record levels, supported largely by fast growth in recorded worker remittances. Trade levels rebounded after a sharp decline in late 2001. The government has made significant inroads in macroeconomic reform since 2000, but progress is beginning to slow. Although it is in the second year of its \$1.3 billion IMF Poverty Reduction and Growth Facility, Islamabad continues to require waivers for politically difficult reforms. Long-term prospects remain uncertain as development spending remains low, regional tensions remain high, and political tensions weaken Pakistan's commitment to lender-recommended economic reforms. GDP growth will continue to hinge on crop performance; dependence on foreign oil leaves the import bill vulnerable to fluctuating oil prices; and efforts to open and modernize the economy remain uneven.

Palau

The economy consists primarily of tourism, subsistence agriculture and fishing. The government is the major employer of the work force, relying heavily on financial assistance from the US.

Business and tourist arrivals numbered 50,000 in FY00/01. The population enjoys a per capita income twice that of the Philippines and much of Micronesia. Long-run prospects for the key tourist sector have been greatly bolstered by the expansion of air travel in the Pacific, the rising prosperity of leading East Asian countries, and the willingness of foreigners to finance infrastructure development.

Palmyra Atoll

no economic activity

Panama

Panama's economy is based primarily on a well-developed services sector that accounts for three-fourths of GDP. Services include operating the Panama Canal, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. A slump in Colon Free Zone and agricultural exports, the global slowdown, and the withdrawal of US military forces held back economic growth in 2000-02. The government has been backing public works programs, tax reforms, new regional trade agreements, and development of tourism in order to stimulate growth.

Papua New Guinea

Papua New Guinea is richly endowed with natural resources, but exploitation has been hampered by rugged terrain and the high cost of developing infrastructure. Agriculture provides a subsistence livelihood for 85% of the population. Mineral deposits, including oil, copper, and gold, account for 72% of export earnings. The economy has faltered over the past three years but will probably improve slightly in 2003. Former Prime Minister Mekere MORAUTA had tried to restore integrity to state institutions, stabilize the

kina, restore stability to the national budget, privatize public enterprises where appropriate, and ensure ongoing peace on Bougainville. The government has had considerable success in attracting international support, specifically gaining the backing of the IMF and the World Bank in securing development assistance loans. Significant challenges face Prime Minister Michael SOMARE, including gaining further investor confidence, continuing efforts to privatize government assets, and maintaining the support of members of Parliament.

Paracel Islands

China announced plans in 1997 to open the islands for tourism.

Paraguay

Paraguay has a market economy marked by a large informal sector. The informal sector features both reexport of imported consumer goods to neighboring countries as well as the activities of thousands of microenterprises and urban street vendors. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. A large percentage of the population derives their living from agricultural activity, often on a subsistence basis. The formal economy grew by an average of about 3% annually in 1995-97; but GDP declined slightly in 1998, 1999, and 2000, rose slightly in 2001, only to fall again in 2002. On a per capita basis, real income has stagnated at 1980 levels. Most observers attribute Paraguay's poor economic performance to political uncertainty, corruption, lack of progress on structural reform, substantial internal and external debt, and deficient infrastructure.

Peru

Thanks to foreign investment and the cooperation between the government and the IMF and World Bank, growth was strong in 1994-97 and inflation was brought under control. In 1998, El Nino's impact on agriculture, the financial crisis in Asia, and instability in Brazilian markets undercut growth. The following year was again lean year for Peru, with the aftermath of El Nino and the Asian financial crisis working its way through the economy. Political instability resulting from the presidential election and FUJIMORI's subsequent departure from office limited growth in 2000. The downturn in the global economy further curtailed growth in 2001. President TOLEDO, who assumed the presidency in July 2001, has been working to reinvigorate the economy and reduce unemployment. Economic growth in 2002 is estimated at 4.8%, led by construction in the retail and gas sectors.

Philippines

In 1998, the Philippine economy - a mixture of agriculture, light industry, and supporting services - deteriorated as a result of spillover from the Asian financial crisis and poor weather conditions. Growth fell to 0.6% in 1998 from 5% in 1997, but recovered to about 3.3% in 1999, 4.5% in 2000, and 4.5% in 2001. In 2002, the Philippines recorded GDP growth of 4.4% but also incurred a record budget deficit. As a result, the Philippines is burdened with a public sector debt equal to more than 100% of GDP. Growth eased to 3.8% in 2003. The government has promised economic reforms including going forward with privatization, reforming the tax system, and promoting additional trade integration within its region. Considerable drive is required to update the educational system and the road network.

Pitcairn Islands

The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships.

Poland

Poland has steadfastly pursued a policy of economic liberalization throughout the 1990s and today stands out as a success story among transition economies. Even so, much remains to be done. The privatization of small and medium state-owned companies and a liberal law on establishing new firms has encouraged the development of the private business sector, but legal and bureaucratic obstacles alongside persistent corruption are hampering its further development. Poland's agricultural sector remains handicapped by structural problems, surplus labor, inefficient small farms, and lack of investment. Restructuring and privatization of "sensitive sectors" (e.g., coal, steel, railroads, and energy), while recently initiated, have stalled due to a lack of political will on the part of the government. Structural reforms in health care, education, the pension system, and state administration have resulted in larger than expected fiscal pressures. Further progress in public finance depends mainly on privatization of Poland's remaining state sector, the reduction of state employment, and an overhaul of the tax code to incorporate the growing gray economy and farmers most of whom pay no tax. The government's determination to enter the EU has shaped most aspects of its economic policy and new legislation; in June 2003, 77% of the voters approved membership,

now scheduled for May 2004. Improving Poland's export competitiveness and containing the internal budget deficit are top priorities. Due to political uncertainty, the zloty has recently depreciated in relation to the euro and the dollar while currencies of the other euro-zone aspirants have been appreciating. GDP per capita equals that of the 3 Baltic states.

Portugal

Portugal has become a diversified and increasingly service-based economy since joining the European Community in 1986. Over the past decade, successive governments have privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country qualified for the European Monetary Union (EMU) in 1998 and began circulating the euro on 1 January 2002 along with 11 other EU member economies. Economic growth has been above the EU average for much of the past decade, but fell back in 2001-03. GDP per capita stands at 70% of that of the leading EU economies. A poor educational system, in particular, has been an obstacle to greater productivity and growth. Portugal has been increasingly overshadowed by lower-cost producers in Central Europe and Asia as a target for foreign direct investment. The coalition government faces tough choices in its attempts to boost Portugal's economic competitiveness and to keep the budget deficit within the 3% EU ceiling.

Puerto Rico

Puerto Rico has one of the most dynamic economies in the Caribbean region. A diverse industrial sector has far surpassed agriculture as the primary locus of economic activity and income. Encouraged by duty-free access to the US and by tax incentives, US firms have invested heavily in Puerto Rico since the 1950s. US

minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income, with estimated arrivals of nearly 5 million tourists in 1999. Growth fell off in 2001-02, largely due to the slowdown in the US economy.

Qatar

Oil and gas account for more than 55% of GDP, roughly 85% of export earnings, and 70% of government revenues. Oil and gas have given Qatar a per capita GDP comparable to that of the leading West European industrial countries. Proved oil reserves of 14.5 billion barrels should ensure continued output at current levels for 23 years. Production and export of natural gas are becoming increasingly important to the economy. Qatar's proved reserves of natural gas exceed 17.9 trillion cubic meters, more than 5% of the world total and third largest in the world. Long-term goals feature the development of offshore natural gas reserves. Since 2000, Qatar has consistently posted trade surpluses largely because of high oil prices and increased natural gas exports, and Qatar's economy is expected to receive an added boost as it begins to increase liquid natural gas exports.

Reunion

The economy has traditionally been based on agriculture, but services now dominate. Sugarcane has been the primary crop for more than a century, and in some years it accounts for 85% of exports. The government has been pushing the development of a tourist industry to relieve high unemployment, which amounts to one-third of the labor force. The gap in Reunion between the well-off and the poor is extraordinary and accounts for the persistent social

tensions. The white and Indian communities are substantially better off than other segments of the population, often approaching European standards, whereas minority groups suffer the poverty and unemployment typical of the poorer nations of the African continent. The outbreak of severe rioting in February 1991 illustrates the seriousness of socioeconomic tensions. The economic well-being of Reunion depends heavily on continued financial assistance from France.

Romania

Romania began the transition from Communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. The country emerged in 2000 from a punishing three-year recession thanks to strong demand in EU export markets. Despite the global slowdown in 2001-02, strong domestic activity in construction, agriculture, and consumption have kept growth above 4%. An IMF Standby Agreement, signed in 2001, has been accompanied by slow but palpable gains in privatization, deficit reduction, and the curbing of inflation. Nonetheless, recent macroeconomic gains have done little to address Romania's widespread poverty, while corruption and red tape hinder foreign investment.

Russia

A decade after the implosion of the Soviet Union in December 1991, Russia is still struggling to establish a modern market economy and achieve strong economic growth. In contrast to its trading partners in Central Europe - which were able within 3 to 5 years to overcome the initial production declines that accompanied the launch of market reforms - Russia saw its economy contract for five years, as the executive and legislature dithered over the implementation of many of the basic foundations of a market economy.

Russia achieved a slight recovery in 1997, but the government's stubborn budget deficits and the country's poor business climate made it vulnerable when the global financial crisis swept through in 1998. The crisis culminated in the August depreciation of the ruble, a debt default by the government, and a sharp deterioration in living standards for most of the population. The economy subsequently has rebounded, growing by an average of more than 6% annually in 1999-2002 on the back of higher oil prices and the 60% depreciation of the ruble in 1998. These GDP numbers, along with a renewed government effort to advance lagging structural reforms, have raised business and investor confidence over Russia's prospects in its second decade of transition. Yet serious problems persist. Oil, natural gas, metals, and timber account for more than 80% of exports, leaving the country vulnerable to swings in world prices. Russia's industrial base is increasingly dilapidated and must be replaced or modernized if the country is to maintain vigorous economic growth. Other problems include a weak banking system, a poor business climate that discourages both domestic and foreign investors, corruption, local and regional government intervention in the courts, and widespread lack of trust in institutions. In 2003 President PUTIN further tightened his control over the "oligarchs," especially in the realm of political expression.

Rwanda

Rwanda is a poor rural country with about 90% of the population engaged in (mainly subsistence) agriculture. It is the most densely populated country in Africa; landlocked with few natural resources and minimal industry. Primary foreign exchange earners are coffee and tea. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and eroded the country's ability to attract

private and external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels, although poverty levels are higher now. GDP has rebounded, and inflation has been curbed. Export earnings, however, have been hindered by low beverage prices, depriving the country of much needed hard currency. Attempts to diversify into non-traditional agriculture exports such as flowers and vegetables have been stymied by a lack of adequate transportation infrastructure. Despite Rwanda's fertile ecosystem, food production often does not keep pace with population growth, requiring food to be imported. Rwanda continues to receive substantial amounts of aid money and was approved for IMF-World Bank Heavily Indebted Poor Country (HIPC) initiative debt relief in late 2000. But Kigali's high defense expenditures cause tension between the government and international donors and lending agencies.

Saint Helena

The economy depends largely on financial assistance from the UK, which amounted to about \$5 million in 1997 or almost one-half of annual budgetary revenues. The local population earns income from fishing, the raising of livestock, and sales of handicrafts. Because there are few jobs, 25% of the work force has left to seek employment on Ascension Island, on the Falklands, and in the UK.

Saint Kitts and Nevis

Sugar was the traditional mainstay of the Saint Kitts economy until the 1970s. Although the crop still dominates the agricultural sector, activities such as tourism, export-oriented manufacturing, and offshore banking have assumed larger roles in the economy. As tourism revenues are now the chief

source of the islands' foreign exchange, a decline in stopover tourist arrivals following the September 11, 2001 terrorist attacks has eroded government finances. The opening of a 1,000+ bed Marriott hotel in February 2003 is expected to bring in much-needed revenue.

Saint Lucia

The recent changes in the EU import preference regime and the increased competition from Latin American bananas have made economic diversification increasingly important in Saint Lucia. The island nation has been able to attract foreign business and investment, especially in its offshore banking and tourism industries. The manufacturing sector is the most diverse in the Eastern Caribbean area, and the government is trying to revitalize the banana industry. Economic fundamentals remain solid.

Saint Pierre and Miquelon

The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. The islands are heavily subsidized by France to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects. Recent test drilling for oil may pave the way for development of the energy sector.

Saint Vincent and the Grenadines Bananas and other agricultural products remain the staple of this lower-middle income country's economy. Although tourism and other services have been growing moderately in recent years, the government has been ineffective at introducing new industries. Unemployment remains high, and economic growth hinges upon seasonal variations in the agricultural and tourism sectors. Tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002, and tourism in the Eastern Caribbean has suffered low arrivals following 11 September 2001. Saint Vincent is home to a small offshore banking sector, but its restrictive secrecy laws have come under international review. As of June 2001, it remained on the Financial Action Task Force's list of noncooperative jurisdictions. Saint Vincent is also the largest producer of marijuana in the Eastern Caribbean and is increasingly being used as a transshipment point for illegal narcotics from South America.

Samoa

The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, and agriculture and fishing. The country is vulnerable to devastating storms. Agriculture employs two-thirds of the labor force, and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. The decline of fish stocks in the area is a continuing problem. Tourism is an expanding sector, accounting for 25% of GDP; about 88,000 tourists visited the islands in 2001. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline, meantime protecting the environment. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

San Marino

The tourist sector contributes over 50% of GDP. In 2000 more than 3 million tourists visited San Marino. The key industries are banking, wearing apparel, electronics, and ceramics. Main agricultural products are wine and cheeses. The per capita level of output and standard of living are comparable to those of the most prosperous regions of Italy, which supplies much of its food.

Sao Tome and Principe

This small poor island economy has become increasingly dependent on cocoa since independence 28 years ago. Cocoa production has substantially declined in recent years because of drought and mismanagement, but strengthening prices brighten prospects for 2003. Sao Tome has to import all fuels, most manufactured goods, consumer goods, and a substantial amount of food. Over the years, it has been unable to service its external debt and has had to depend on concessional aid and debt rescheduling. Sao Tome benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program. Sao Tome's success in implementing structural reforms has been rewarded by international donors, who pledged increased assistance in 2001. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies. Sao Tome is optimistic that substantial petroleum discoveries are forthcoming in its territorial waters in the oil-rich waters of the Gulf of Guinea; production could begin as early as 2004.

Saudi Arabia

This is an oil-based economy with strong government

controls over major economic activities. Saudi Arabia has the largest reserves of petroleum in the world (26% of the proved reserves), ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 75% of budget revenues, 45% of GDP, and 90% of export earnings. About 25% of GDP comes from the private sector. Roughly 4 million foreign workers play an important role in the Saudi economy, for example, in the oil and service sectors. The government in 1999 announced plans to begin privatizing the electricity companies, which follows the ongoing privatization of the telecommunications company. The government is supporting private sector growth to lessen the kingdom's dependence on oil and increase employment opportunities for the swelling Saudi population. Priorities for government spending in the short term include additional funds for the water and sewage systems and for education. Water shortages and rapid population growth constrain the government's efforts to increase self-sufficiency in agricultural products.

Senegal

In January 1994, Senegal undertook a bold and ambitious economic reform program with the support of the international donor community. This reform began with a 50% devaluation of Senegal's currency, the CFA franc, which was linked at a fixed rate to the French franc. Government price controls and subsidies have been steadily dismantled. After seeing its economy contract by 2.1% in 1993, Senegal made an important turnaround, thanks to the reform program, with real growth in GDP averaging 5% annually during 1995-2002. Annual inflation had been pushed down to less than 1%, but rose to an estimated 3.3% in 2001 and 3.0% in 2002. Investment rose steadily from 13.8% of GDP in 1993 to 16.5% in 1997. As a member of the West African Economic and Monetary Union (WAEMU),

Senegal is working toward greater regional integration with a unified external tariff. Senegal also realized full Internet connectivity in 1996, creating a miniboom in information technology-based services. Private activity now accounts for 82% of GDP. In 2003, GDP will probably again grow at about 5%. On the negative side, Senegal faces deep-seated urban problems of chronic unemployment, trade union militancy, juvenile delinquency, and drug addiction.

Serbia and Montenegro

MILOSEVIC-era mismanagement of the economy, an extended period of economic sanctions, and the damage to Yugoslavia's infrastructure and industry during the war in Kosovo have left the economy only half the size it was in 1990. Since the ousting of former Federal Yugoslav President MILOSEVIC in October 2000, the Democratic Opposition of Serbia (DOS) coalition government has implemented stabilization measures and embarked on an aggressive market reform program. After renewing its membership in the IMF in December 2000, Yugoslavia continued to reintegrate into the international community by rejoining the World Bank (IBRD) and the European Bank for Reconstruction and Development (EBRD). A World Bank-European Commission sponsored Donors' Conference held in June 2001 raised \$1.3 billion for economic restructuring. An agreement rescheduling the country's \$4.5 billion Paris Club government debts was concluded in November 2001; it will write off 66% of the debt; a similar debt relief agreement on its \$2.8 billion London Club commercial debt is still pending. The smaller republic of Montenegro severed its economy from federal control and from Serbia during the MILOSEVIC era and continues to maintain its own central bank, uses the euro instead of the Yugoslav dinar as official currency, collects customs tariffs, and manages its own budget. Kosovo, while

technically still part of the Federal Republic of Yugoslavia (now Serbia and Montenegro) according to United Nations Security Council Resolution 1244, is moving toward local autonomy under United Nations Interim Administration Mission in Kosovo (UNMIK) and is dependent on the international community for financial and technical assistance. The euro and the Yugoslav dinar are official currencies, and UNMIK collects taxes and manages the budget. The complexity of Serbia and Montenegro political relationships, slow progress in privatization, and stagnation in the European economy are holding back the economy. Arrangements with the IMF, especially requirements for fiscal discipline, are an important element in policy formation. Severe unemployment remains a key political economic problem.

Seychelles

Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the old near-subsistence level. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years the government has encouraged foreign investment in order to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. A sharp drop illustrated the vulnerability of the tourist sector in 1991-92 due largely to the Gulf war, and once again following the 11 September 2001 terrorist attacks on the US. Other issues facing the government are the curbing of the budget deficit, including the containment of social welfare costs, and further privatization of public enterprises. Growth slowed in 1998-2002, due to sluggish tourist and tuna sectors. Also, tight controls on exchange rates and the scarcity of foreign exchange have impaired short-term economic

prospects. The black market value of the Seychelles rupee is half the official exchange rate; without a devaluation of the currency the tourist sector should remain sluggish as vacationers seek cheaper destinations such as Comoros, Mauritius, and Madagascar.

Sierra Leone

Sierra Leone is an extremely poor African nation with tremendous inequality in income distribution. It does have substantial mineral, agricultural, and fishery resources. However, the economic and social infrastructure is not well developed, and serious social disorders continue to hamper economic development, following a 11-year civil war. About two-thirds of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Plans continue to reopen bauxite and rutile mines shut down during the conflict. The major source of hard currency consists of the mining of diamonds. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad, which is essential to offset the severe trade imbalance and to supplement government revenues.

Singapore

Singapore, a highly developed and successful free market economy, enjoys a remarkably open and corruption-free environment, stable prices, and one of the highest per capita GDPs in the world. The economy depends heavily on exports, particularly in electronics and manufacturing. It was hard hit in 2001-2002 by the global recession and the slump in the technology sector. The government hopes to establish a new growth path that will be less vulnerable to the external business cycle than the current export-led model but is

unlikely to abandon efforts to establish Singapore as Southeast Asia's financial and high-tech hub.

Slovakia

Slovakia has mastered much of the difficult transition from a centrally planned economy to a modern market economy. The DZURINDA

government has made excellent progress in 2001-03 in macroeconomic stabilization and structural reform. Major privatizations are nearly complete, the banking sector is almost completely in foreign hands, and foreign investment has picked up. Slovakia's economy exceeded expectations in 2001-03, despite the general European slowdown. Unemployment, at an unacceptable 15% in 2003, remains the economy's Achilles heel. The government faces other strong challenges in 2004, especially the cutting of budget and current account deficits, the containment of inflation, and the strengthening of the health care system.

Slovenia

Slovenia, with its historical ties to Western Europe, enjoys a GDP per capita substantially higher than that of the other transitioning economies of Central Europe. Privatization of the economy proceeded at an accelerated pace in 2002-3, and the budget deficit dropped from 3.0% of GDP in 2002 to 1.9% in 2003. Despite the economic slowdown in Europe in 2001-03, Slovenia maintained 3% growth. Structural reforms to improve the business environment allow for greater foreign participation in Slovenia's economy and help to lower unemployment. Further measures to curb inflation are also needed. Corruption and the high degree of coordination between government, business, and central bank policy are issues of concern

in the run-up to Slovenia's scheduled 1 May 2004 accession to the European Union.

Solomon Islands

The bulk of the population depends on agriculture, fishing, and forestry for at least part of their livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. However, severe ethnic violence, the closing of key business enterprises, and an empty government treasury have led to serious economic disarray, indeed near collapse. Tanker deliveries of crucial fuel supplies (including those for electrical generation) have become sporadic due to the government's inability to pay and attacks against ships. Telecommunications are threatened by the nonpayment of bills and by the lack of technical and maintenance staff many of whom have left the country.

Somalia

Somalia's economic fortunes are being driven by its deep political divisions. The northern area has declared its independence as "Somaliland"; the central area, Puntland, is a self-declared autonomous state; and the remaining southern portion is riddled with the struggles of rival factions. Economic life continues, in part because much activity is local and relatively easily protected. Agriculture is the most important sector, with livestock normally accounting for about 40% of GDP and about 65% of export earnings, but Saudi Arabia's recent ban on Somali livestock, because of Rift Valley Fever concerns, has severely hampered the sector. Nomads and semi-nomads, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar,

sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and sold as scrap metal. Despite the seeming anarchy, Somalia's service sector has managed to survive and grow. Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money exchange services have sprouted throughout the country, handling between \$200 million and \$500 million in remittances annually. Mogadishu's main market offers a variety of goods from food to the newest electronic gadgets. Hotels continue to operate, and security is provided by militias. The ongoing civil disturbances and clan rivalries, however, have interfered with any broad-based economic development and international aid arrangements. In 2002 Somalia's overdue financial obligations to the IMF continued to grow.

South Africa

South Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors; a stock exchange that ranks among the 10 largest in the world; and a modern infrastructure supporting an efficient distribution of goods to major urban centers throughout the region. However, growth has not been strong enough to lower South Africa's high unemployment rate; and daunting economic problems remain from the apartheid era, especially poverty and lack of economic empowerment among the disadvantaged groups. High crime and HIV/AIDS infection rates also deter investment. South African economic policy is fiscally conservative, but pragmatic, focusing on targeting inflation and

liberalizing trade as means to increase job growth and household income.

South Georgia and the South Sandwich Islands

Some fishing takes

place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from postage stamps produced in the UK, sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

Southern Ocean

Fisheries in 2000-01 (1 July to 30 June) landed 112,934 metric tons, of which 87% was krill and 11% Patagonian toothfish. International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and antarctic toothfish. In the 2000-01 antarctic summer 12,248 tourists, most of them seaborne, visited the Southern Ocean and Antarctica, compared to 14,762 the previous year.

Spain

Spain's mixed capitalist economy supports a GDP that on a per capita basis is 80% that of the four leading West European economies. Its center-right government successfully worked to gain admission to the first group of countries launching the European single currency (the euro) on 1 January 1999. The AZNAR administration has continued to advocate liberalization, privatization, and deregulation of the economy and has introduced some tax reforms to that end. Unemployment has been steadily falling under the AZNAR administration but remains high at 11.7%. The

government intends to make further progress in changing labor laws and reforming pension schemes, which are key to the sustainability of both Spain's internal economic advances and its competitiveness in a single currency area. A general strike in mid-2002 reduced cooperation between labor and government. Growth of 2.4% in 2003 was satisfactory given the background of a faltering European economy. Adjusting to the monetary and other economic policies of an integrated Europe - and reducing unemployment - will pose challenges to Spain over the next few years.

Spratly Islands

Economic activity is limited to commercial fishing.

The proximity to nearby oil- and gas-producing sedimentary basins suggests the potential for oil and gas deposits, but the region is largely unexplored, and there are no reliable estimates of potential reserves; commercial exploitation has yet to be developed.

Sri Lanka

In 1977, Colombo abandoned statist economic policies and its import substitution trade policy for market-oriented policies and export-oriented trade. Sri Lanka's most dynamic sectors now are food processing, textiles and apparel, food and beverages, telecommunications, and insurance and banking. By 1996 plantation crops made up only 20% of exports (compared with 93% in 1970), while textiles and garments accounted for 63%. GDP grew at an average annual rate of 5.5% in the early 1990s until a drought and a deteriorating security situation lowered growth to 3.8% in 1996. The economy rebounded in 1997-2000 with average growth of 5.3%, but 2001 saw the first contraction in the country's history, -1.4%, due to a combination of power shortages, severe budgetary problems, the global slowdown, and continuing civil strife. Growth recovered to

3.2% in 2002. About 800,000 Sri Lankans work abroad, 90% in the Middle East. They send home about \$1 billion a year.

Sudan

Sudan has turned around a struggling economy with sound economic policies and infrastructure investments, but it still faces formidable economic problems, notably the low level of per capita output. From 1997 to date, Sudan has been implementing IMF macroeconomic reforms. In 1999 Sudan began exporting crude oil and in the last quarter of 1999 recorded its first trade surplus, which, along with monetary policy, has stabilized the exchange rate. Increased oil production, revived light industry, and expanded export processing zones helped maintain GDP growth at 5.1% in 2002. Agriculture production remains Sudan's most important sector, employing 80% of the work force and contributing 43% of GDP, but most farms remain rain-fed and susceptible to drought. Chronic domestic instability, lagging reforms, adverse weather, and weak world agricultural prices - but, above all, the low starting point - ensure that much of the population will remain at or below the poverty line for years.

Suriname

The economy is dominated by the bauxite industry, which accounts for more than 15% of GDP and 70% of export earnings. Suriname's economic prospects for the medium term will depend on renewed commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition. The government of Ronald VENETIAAN has begun an austerity program, raised taxes, and attempted to control spending. However, in 2002, President VENETIAAN agreed to a large pay raise

for civil servants, which threatens his earlier gains in stabilizing the economy. The Dutch Government has agreed to restart the aid flow, which will allow Suriname to access international development financing. The short-term economic outlook depends on the government's ability to control inflation and on the development of projects in the bauxite and gold mining sectors.

Svalbard

Coal mining is the major economic activity on Svalbard. The treaty of 9 February 1920 gives the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still mining are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some trapping of seal, polar bear, fox, and walrus.

Swaziland

In this small, landlocked economy, subsistence agriculture occupies more than 80% of the population. The manufacturing sector has diversified since the mid-1980s. Sugar and wood pulp remain important foreign exchange earners. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Surrounded by South Africa, except for a short border with Mozambique, Swaziland is heavily dependent on South Africa from which it receives nine-tenths of its imports and to which it sends more than two-thirds of its exports. Customs duties from the Southern African Customs Union and worker remittances from South Africa substantially supplement domestically earned income.

The government is trying to improve the atmosphere for foreign investment. Overgrazing, soil depletion, drought, and sometimes floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2002 because of drought, and more than one-third of the adult population was infected by HIV/AIDS.

Sweden

Aided by peace and neutrality for the whole 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for only 2% of GDP and 2% of the jobs. The government's commitment to fiscal discipline resulted in a substantial budgetary surplus in 2001, which was cut by more than half in 2002, due to the global economic slowdown, revenue declines, and spending increases. The Swedish central bank (the Riksbank) is focusing on price stability with its inflation target of 2%. Growth remained sluggish in 2003. On September 14, 2003, Swedish voters turned down entry into the euro system, concerned about the impact on democracy and sovereignty.

Switzerland

Switzerland is a prosperous and stable modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP larger than that of the big western European economies. The Swiss in recent years have brought their economic

practices largely into conformity with the EU's to enhance their international competitiveness. Switzerland remains a safe haven for investors, because it has maintained a degree of bank secrecy and has kept up the franc's long-term external value. Reflecting the anemic economic conditions of Europe, GDP growth dropped in 2001 to about 0.8%, to 0.2% in 2002, and to -0.3% in 2003.

Syria

Syria's predominantly statist economy has been growing, on average, more slowly than its 2.4% annual population growth rate, causing a persistent decline in per capita GDP. Recent legislation allows private banks to operate in Syria, although a private banking sector will take years and further government cooperation to develop. External factors such as the international war on terrorism, the Israeli-Palestinian conflict, and the war between the US-led coalition and Iraq probably will drive real annual GDP growth levels back below their 3.5% spike in 2002. A long-run economic constraint is the pressure on water supplies caused by rapid population growth, industrial expansion, and increased water pollution.

Taiwan

Taiwan has a dynamic capitalist economy with gradually decreasing guidance of investment and foreign trade by government authorities. In keeping with this trend, some large government-owned banks and industrial firms are being privatized. Exports have provided the primary impetus for industrialization. The trade surplus is substantial, and foreign reserves are the world's third largest. Agriculture contributes 2% to GDP, down from 32% in 1952. While Taiwan is a major investor throughout Southeast Asia, China has become the largest destination for investment and has overtaken

the US to become Taiwan's largest export market. Because of its conservative financial approach and its entrepreneurial strengths, Taiwan suffered little compared with many of its neighbors from the Asian financial crisis in 1998. The global economic downturn, combined with problems in policy coordination by the administration and bad debts in the banking system, pushed Taiwan into recession in 2001, the first year of negative growth ever recorded. Unemployment also reached record levels. Output recovered moderately in 2002 in the face of continued global slowdown, fragile consumer confidence, and bad bank loans. Growing economic ties with China are a dominant long-term factor. Exports to China - mainly parts and equipment for the assembly of goods for export to developed countries - drove Taiwan's economic recovery in 2002.

Tajikistan

Tajikistan has the lowest per capita GDP among the 15 former Soviet republics. Only 8% to 10% of the land area is arable. Cotton is the most important crop. Mineral resources, varied but limited in amount, include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992-97) severely damaged the already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Even though 60% of its people continue to live in abject poverty, Tajikistan has experienced steady economic growth since 1997. Continued privatization of medium and large state-owned enterprises will further increase productivity. Tajikistan's economic situation, however, remains fragile due to uneven implementation of structural reforms, weak governance, widespread unemployment, and the external debt burden. A debt restructuring agreement was reached with Russia

in December 2002, including an interest rate of 4%, a 3-year grace period, and a US \$49.8 million credit to the Central Bank of Tajikistan.

Tanzania

Tanzania is one of the poorest countries in the world. The economy depends heavily on agriculture, which accounts for half of GDP, provides 85% of exports, and employs 80% of the work force. Topography and climatic conditions, however, limit cultivated crops to only 4% of the land area. Industry traditionally featured the processing of agricultural products and light consumer goods. The World Bank, the International Monetary Fund, and bilateral donors have provided funds to rehabilitate Tanzania's out-of-date economic infrastructure and to alleviate poverty. Growth in 1991-2002 featured a pickup in industrial production and a substantial increase in output of minerals, led by gold. Oil and gas exploration and development played an important role in this growth. Recent banking reforms have helped increase private sector growth and investment. Continued donor support and solid macroeconomic policies should support continued real GDP growth of 5% in 2003.

Thailand

Thailand has a free enterprise economy and welcomes foreign investment. Exports feature computers and electrical appliances. After enjoying the world's highest growth rate from 1985 to 1995 - averaging almost 9% annually - increased speculative pressure on Thailand's currency in 1997 led to a crisis that uncovered financial sector weaknesses and forced the government to float the baht. Long pegged at 25 to the dollar, the baht reached its lowest point of 56 to the dollar in January 1998, and the economy contracted by 10.2% that same year. Thailand then entered a recovery stage, expanding by

4.2% in 1999 and 4.4% in 2000, largely due to strong exports. An ailing financial sector and the slow pace of corporate debt restructuring, combined with a softening of global demand, slowed growth to 1.4% in 2001. Increased consumption and investment spending pushed GDP growth up to 5.2% in 2002 despite a sluggish global economy.

Togo

This small sub-Saharan economy is heavily dependent on both commercial and subsistence agriculture, which provides employment for 65% of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings, with cotton being the most important cash crop. Togo is the world's fourth-largest producer of phosphate, but production fell an estimated 22% in 2002 due to power shortages and the cost of developing new deposits. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on following through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors.

Tokelau

Tokelau's small size (three villages), isolation, and lack of resources greatly restrain economic development and confine agriculture to the subsistence level. The people rely heavily on aid from New Zealand - about \$4 million annually - to maintain public services, with annual aid being substantially greater than GDP. The principal sources of revenue come from sales of copra, postage

stamps, souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand.

Tonga

Tonga has a small, open economy with a narrow export base in agricultural goods. Squash, coconuts, bananas, and vanilla beans are the main crops, and agricultural exports make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. Tourism is the second-largest source of hard currency earnings following remittances. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well-developed social services.

Trinidad and Tobago

Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses. A leading performer the past four years has been the booming natural gas sector. Tourism is a growing sector, although not proportionately as important as in many other Caribbean islands. The economy benefits from low inflation and a trade surplus. The year 2002 was marked by solid growth in the oil sector, offset in part by domestic political uncertainty.

Tromelin Island

no economic activity

Tunisia

Tunisia has a diverse economy, with important agricultural,

mining, energy, tourism, and manufacturing sectors. Governmental control of economic affairs while still heavy has gradually lessened over the past decade with increasing privatization, simplification of the tax structure, and a prudent approach to debt. Real growth averaged 5.4% in 1997-2001 but slowed to 1.9% in 2002 because of agricultural drought, slow investment, and lackluster tourism. Increased rainfall portends higher growth levels for 2003, but continued regional tension from the war in Iraq will most likely continue to suppress tourism earnings. Tunisia has agreed to gradually remove barriers to trade with the European Union over the next decade. Broader privatization, further liberalization of the investment code to increase foreign investment, improvements in government efficiency, and reduction of the trade deficit are among the challenges for the future.

Turkey

Turkey's dynamic economy is a complex mix of modern industry and commerce along with a traditional agriculture sector that in 2001 still accounted for 40% of employment. It has a strong and rapidly growing private sector, yet the state still plays a major role in basic industry, banking, transport, and communication. The most important industry - and largest exporter - is textiles and clothing, which is almost entirely in private hands. In recent years the economic situation has been marked by erratic economic growth and serious imbalances. Real GNP growth has exceeded 6% in many years, but this strong expansion has been interrupted by sharp declines in output in 1994, 1999, and 2001. Meanwhile, the public sector fiscal deficit has regularly exceeded 10% of GDP - due in large part to the huge burden of interest payments, which account for more than 50% of central government spending. Inflation, in recent years in the high double-digit range, fell to 26% in 2003.

Perhaps because of these problems, foreign direct investment in Turkey remains low - less than \$1 billion annually. In late 2000 and early 2001 a growing trade deficit and serious weaknesses in the banking sector plunged the economy into crisis - forcing Turkey to float the lira and pushing the country into recession. Results in 2002-03 were much better, because of strong financial support from the IMF and tighter fiscal policy. Continued slow global growth and serious political tensions in the Middle East could result in negative growth in 2004.

Turkmenistan

Turkmenistan is largely desert country with intensive agriculture in irrigated oases and large gas and oil resources. One-half of its irrigated land is planted in cotton, making it the world's tenth-largest producer. With an authoritarian ex-Communist regime in power and a tribally based social structure, Turkmenistan has taken a cautious approach to economic reform, hoping to use gas and cotton sales to sustain its inefficient economy. Privatization goals remain limited. In 1998-2003, Turkmenistan suffered from the continued lack of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose by 38% in 2003, largely because of higher international oil and gas prices. Overall prospects in the near future are discouraging because of widespread internal poverty, the burden of foreign debt, and the unwillingness of the government to adopt market-oriented reforms. However, Turkmenistan's cooperation with the international community in transporting humanitarian aid to Afghanistan may foreshadow a change in the atmosphere for foreign investment, aid, and technological support. Turkmenistan's economic statistics are state secrets, and GDP and other figures are subject to wide margins of error. In any event,

GDP increased substantially in 2003 because of a strong recovery in agriculture and rapid industrial growth.

Turks and Caicos Islands

The Turks and Caicos economy is based on tourism, fishing, and offshore financial services. Most capital goods and food for domestic consumption are imported. The US is the leading source of tourists, accounting for more than half of the 93,000 visitors in 1998. Major sources of government revenue include fees from offshore financial activities and customs receipts. Tourism fell by 6% in 2002 but appeared to be picking up at yearend.

Tuvalu

Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. The country has no known mineral resources and few exports. Subsistence farming and fishing are the primary economic activities. Fewer than 1,000 tourists, on average, visit Tuvalu annually. Government revenues largely come from the sale of stamps and coins and worker remittances. About 1,000 Tuvaluans work in Nauru in the phosphate mining industry. Nauru has begun repatriating Tuvaluans, however, as phosphate resources decline. Substantial income is received annually from an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this Fund has grown from an initial \$17 million to over \$35 million in 1999. The US government is also a major revenue source for Tuvalu, because of payments from a 1988 treaty on fisheries. In an effort to reduce its dependence on foreign aid, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts of up to 7%. In 1998, Tuvalu began deriving revenue

from use of its area code for "900" lines and in 2000, from the lease of its ".tv" Internet domain name. Royalties from these new technology sources could increase substantially over the next decade. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and investment income from overseas assets.

Uganda

Uganda has substantial natural resources, including fertile soils, regular rainfall, and sizable mineral deposits of copper and cobalt. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for the bulk of export revenues. Since 1986, the government - with the support of foreign countries and international agencies - has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. During 1990-2001, the economy turned in a solid performance based on continued investment in the rehabilitation of infrastructure, improved incentives for production and exports, reduced inflation, gradually improved domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Ongoing Ugandan involvement in the war in the Democratic Republic of the Congo, corruption within the government, and slippage in the government's determination to press reforms raise doubts about the continuation of strong growth. In 2000, Uganda qualified for enhanced Highly Indebted Poor Countries (HIPC) debt relief worth \$1.3 billion and Paris Club debt relief worth \$145 million. These amounts combined with the original HIPC debt relief added up to

about \$2 billion. Growth for 2001-02 was solid despite continued decline in the price of coffee, Uganda's principal export. Prospects for 2003 are mixed, with probable strengthening of coffee prices yet with halting growth in the economies of major export customers.

Ukraine

After Russia, the Ukrainian republic was far and away the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Ukraine depends on imports of energy, especially natural gas, to meet some 85% of its annual energy requirements. Shortly after independence in December 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Loose monetary policies pushed inflation to hyperinflationary levels in late 1993. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Now in his second term, President KUCHMA has pledged to reduce the number of government agencies, streamline the regulatory process, create a legal environment to encourage entrepreneurs, and enact a comprehensive tax overhaul. Reforms in the more politically sensitive areas of structural reform and land privatization are

still lagging. Outside institutions - particularly the IMF - have encouraged Ukraine to quicken the pace and scope of reforms. GDP in 2000 showed strong export-based growth of 6% - the first growth since independence - and industrial production grew 12.9%. The economy continued to expand in 2001 as real GDP rose 9% and industrial output grew by over 14%. Growth of 4.1% in 2002 was more moderate, in part a reflection of faltering growth in the developed world. In general, growth has been undergirded by strong domestic demand, low inflation, and solid consumer and investor confidence. Growth was a sturdy 6% in 2003 despite a loss of momentum in needed economic reforms.

United Arab Emirates

The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Its wealth is based on oil and gas output (about 33% of GDP), and the fortunes of the economy fluctuate with the prices of those commodities. Since 1973, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. At present levels of production, oil and gas reserves should last for more than 100 years. The government has increased spending on job creation and infrastructure expansion and is opening up its utilities to greater private sector involvement.

United Kingdom

The UK, a leading trading power and financial center, is one of the quartet of trillion dollar economies of Western Europe. Over the past two decades the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient

by European standards, producing about 60% of food needs with only 1% of the labor force. The UK has large coal, natural gas, and oil reserves; primary energy production accounts for 10% of GDP, one of the highest shares of any industrial nation. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. GDP growth slipped in 2001-03 as the global downturn, the high value of the pound, and the bursting of the "new economy" bubble hurt manufacturing and exports. Still, the economy is one of the strongest in Europe; inflation, interest rates, and unemployment remain low. The relatively good economic performance has complicated the BLAIR government's efforts to make a case for Britain to join the European Economic and Monetary Union (EMU). Critics point out, however, that the economy is doing well outside of EMU, and they point to public opinion polls that continue to show a majority of Britons opposed to the single currency. Meantime, the government has been speeding up the improvement of education, transport, and health services, at a cost in higher taxes. The war in March-April 2003 between a US-led coalition and Iraq, together with the subsequent problems of restoring the economy and the polity, involve a heavy commitment of British military forces.

United States

The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$37,600. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy considerably greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, lay off surplus workers, and

develop new products. At the same time, they face higher barriers to entry in their rivals' home markets than the barriers to entry of foreign firms in US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment, although their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. The years 1994-2000 witnessed solid increases in real output, low inflation rates, and a drop in unemployment to below 5%. The year 2001 saw the end of boom psychology and performance, with output increasing only 0.3% and unemployment and business failures rising substantially. The response to the terrorist attacks of 11 September 2001 showed the remarkable resilience of the economy. Moderate recovery took place in 2002, with the GDP growth rate rising to 2.45%. A major short-term problem in first half 2002 was a sharp decline in the stock market, fueled in part by the exposure of dubious accounting practices in some major corporations. The war in March/April 2003 between a US-led coalition and Iraq shifted resources to military industries and introduced uncertainties about investment and employment in other sectors of the economy. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical and pension costs of an aging population, sizable trade deficits, and stagnation of family income in the lower economic groups.

Uruguay

Uruguay's economy is characterized by an export-oriented agricultural sector, a well-educated workforce, and high levels of social spending. After averaging growth of 5% annually during 1996-98, in 1999-2002 the economy suffered a major downturn, stemming largely from lower demand in Argentina and Brazil, which together account for nearly half of Uruguay's exports. Total GDP in these four years dropped by nearly 20%, with 2002 the worst year. Unemployment rose to nearly 20% in 2002, inflation surged, and the burden of external debt doubled. Cooperation with the IMF and the US has limited the damage, which is still extensive. Moves to reschedule debt and promote economic recovery may help limit a further decline in output in 2003.

Uzbekistan

Uzbekistan is a dry, landlocked country of which 11% consists of intensely cultivated, irrigated river valleys. More than 60% of its population lives in densely populated rural communities. Uzbekistan is now the world's second-largest cotton exporter, a large producer of gold and oil, and a regionally significant producer of chemicals and machinery. Following independence in December 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. Uzbekistan responded to the negative external conditions generated by the Asian and Russian financial crises by emphasizing import substitute industrialization and by tightening export and currency controls within its already largely closed economy. The government, while aware of the need to improve the investment climate, sponsors measures that often increase, not decrease, the government's control over business decisions. A sharp increase in

the inequality of income distribution has hurt the lower ranks of society since independence.

Vanuatu

The economy is based primarily on subsistence or small-scale agriculture, which provides a living for 65% of the population. Fishing, offshore financial services, and tourism, with about 50,000 visitors in 1997, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. A severe earthquake in November 1999 followed by a tsunami, caused extensive damage to the northern island of Pentecote and left thousands homeless. Another powerful earthquake in January 2002 caused extensive damage in the capital, Port-Vila, and surrounding areas, and also was followed by a tsunami. GDP growth rose less than 3% on average in the 1990s. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. In mid-2002 the government stepped up efforts to boost tourism. Australia and New Zealand are the main suppliers of foreign aid.

Venezuela

Venezuela continues to be highly dependent on the petroleum sector, which accounts for roughly one-third of GDP, around 80% of export earnings, and more than half of government operating revenues. Despite higher oil prices at the end of 2002 and into 2003, domestic political instability, culminating in a two-month national oil strike from December 2002 to February 2003,

temporarily halted economic activity. The economy is likely to remain in a recession in 2003, after sinking an estimated 8.9 percent in 2002.

Vietnam

Vietnam is a poor, densely-populated country that has had to recover from the ravages of war, the loss of financial support from the old Soviet Bloc, and the rigidities of a centrally planned economy. Substantial progress was achieved from 1986 to 1996 in moving forward from an extremely low starting point - growth averaged around 9% per year from 1993 to 1997. The 1997 Asian financial crisis highlighted the problems in the Vietnamese economy but, rather than prompting reform, reaffirmed the government's belief that shifting to a market-oriented economy would lead to disaster. GDP growth of 8.5% in 1997 fell to 6% in 1998 and 5% in 1999. Growth then rose to 6% to 7% in 2000-02 even against the background of global recession. These numbers mask some major difficulties in economic performance. Many domestic industries, including coal, cement, steel, and paper, have reported large stockpiles of inventory and tough competition from more efficient foreign producers. Meanwhile, Vietnamese authorities have moved to implement the structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The US-Vietnam Bilateral Trade Agreement entered into force near the end of 2001 and is expected to significantly increase Vietnam's exports to the US. The US is assisting Vietnam with implementing the legal and structural reforms called for in the agreement.

Virgin Islands

Tourism is the primary economic activity, accounting for more than 70% of GDP and 70% of employment. The islands normally

host 2 million visitors a year. The manufacturing sector consists of petroleum refining, textiles, electronics, pharmaceuticals, and watch assembly. The agricultural sector is small, with most food being imported. International business and financial services are a small but growing component of the economy. One of the world's largest petroleum refineries is at Saint Croix. The islands are subject to substantial damage from storms. The government is working to improve fiscal discipline, support construction projects in the private sector, expand tourist facilities, reduce crime, and protect the environment.

Wake Island

Economic activity is limited to providing services to contractors located on the island. All food and manufactured goods must be imported.

Wallis and Futuna

The economy is limited to traditional subsistence agriculture, with about 80% labor force earnings from agriculture (coconuts and vegetables), livestock (mostly pigs), and fishing. About 4% of the population is employed in government. Revenues come from French Government subsidies, licensing of fishing rights to Japan and South Korea, import taxes, and remittances from expatriate workers in New Caledonia.

West Bank

Real per capita GDP for the West Bank and Gaza Strip (WBGs) declined by about one-third between 1992 and 1996 due to the combined effect of falling aggregate incomes and rapid population growth. The downturn in economic activity was largely the result of Israeli closure policies - the imposition of border closures in

response to security incidents in Israel - which disrupted labor and commodity market relationships between Israel and the WBGS. The most serious social effect of this downturn was rising unemployment; unemployment in the WBGS during the 1980s was generally under 5%; by 1995 it had risen to over 20%. Israel's use of comprehensive closures during the next five years decreased and, in 1998, Israel implemented new policies to reduce the impact of closures and other security procedures on the movement of Palestinian goods and labor. These changes fueled an almost three-year-long economic recovery in the West Bank and Gaza Strip; real GDP grew by 5% in 1998 and 6% in 1999. Recovery was upended in the last quarter of 2000 with the outbreak of violence, which triggered tight Israeli closures of Palestinian self-rule areas and severely disrupted trade and labor movements. In 2001, and even more severely in 2002, Israeli military measures in Palestinian Authority areas have resulted in the destruction of much capital plant and administrative structure, widespread business closures, and a sharp drop in GDP. Another major loss has been the decline in earnings of Palestinian workers in Israel. International aid of \$2 billion in 2001-02 to the West Bank and Gaza Strip have prevented the complete collapse of the economy.

Western Sahara

Western Sahara depends on pastoral nomadism, fishing, and phosphate mining as the principal sources of income for the population. The territory lacks sufficient rainfall for sustainable agricultural production, and most of the food for the urban population must be imported. All trade and other economic activities are controlled by the Moroccan Government. Moroccan energy interests in 2001 signed contracts to explore for oil off the coast of Western Sahara, which has angered the Polisario. Incomes and standards of living in Western Sahara are substantially below the Moroccan level.

World Growth in global output (gross world product, GWP) fell from 4.8% in 2000 to 2.2% in 2001 and 2.7% in 2002. The causes: sluggishness in the US economy (21% of GWP) and in the 15 EU economies (19% of GWP); continued stagnation in the Japanese economy (7.2% of GWP); and spillover effects in the less developed regions of the world. China, the second-largest economy in the world (12% of GWP), proved an exception, continuing its rapid annual growth, officially announced as 8% but estimated by many observers as perhaps two percentage points lower. Russia (2.6% of GWP), with 4% growth, continued to make uneven progress, its GDP per capita still only one-third that of the leading industrial nations. The other 14 successor nations of the USSR and the other old Warsaw Pact nations again experienced widely divergent growth rates; the three Baltic nations continued as strong performers, in the 5% range of growth. The developing nations also varied in their growth results, with many countries facing population increases that erode gains in output. Externally, the nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of people, goods, funds, and technology. Internally, the central government often finds its control over resources slipping as separatist regional movements - typically based on ethnicity - gain momentum, e.g., in many of the successor states of the former Soviet Union, in the former Yugoslavia, in India, in Indonesia, and in Canada. Externally, the central government is losing decision-making powers to international bodies. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of pollution, desertification, underemployment, epidemics, and famine. Because of their own internal problems and priorities, the industrialized countries devote insufficient resources to deal effectively with the poorer areas of the world,

which, at least from the economic point of view, are becoming further marginalized. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, poses economic risks because of varying levels of income and cultural and political differences among the participating nations. The terrorist attacks on the US on 11 September 2001 accentuate a further growing risk to global prosperity, illustrated, for example, by the reallocation of resources away from investment to anti-terrorist programs. The opening of war in March 2003 between a US-led coalition and Iraq added new uncertainties to global economic prospects. (For specific economic developments in each country of the world in 2002, see the individual country entries.)

Yemen

Yemen, one of the poorest countries in the Arab world, reported strong growth in the mid-1990s with the onset of oil production, but has been harmed by periodic declines in oil prices. Yemen has embarked on an IMF-supported structural adjustment program designed to modernize and streamline the economy, which has led to substantial foreign debt relief and restructuring. International donors, meeting in Paris in October 2002, agreed on a further \$2.3 billion economic support package. Yemen has worked to maintain tight control over spending and implement additional components of the IMF program. A high population growth rate and internal political dissension complicate the government's task.

Zambia

Despite progress in privatization and budgetary reform, Zambia's economic growth remains below the 5% to 7% necessary to reduce poverty significantly. Privatization of government-owned copper mines relieved the government from covering mammoth losses

generated by the industry and greatly improved the chances for copper mining to return to profitability and spur economic growth. However, low mineral prices have slowed the benefits of privatizing the mines and have reduced incentives for further private investment in the sector. Cooperation continues with international bodies on programs to reduce poverty.

Zimbabwe

The government of Zimbabwe faces a wide variety of difficult economic problems as it struggles with an unsustainable fiscal deficit, an overvalued exchange rate, soaring inflation, and bare shelves. Its 1998-2002 involvement in the war in the Democratic Republic of the Congo, for example, drained hundreds of millions of dollars from the economy. Badly needed support from the IMF has been suspended because of the country's failure to meet budgetary goals. Inflation rose from an annual rate of 32% in 1998 to 59% in 1999, to 60% in 2000, to over 100% by yearend 2001, to 228% in early 2003. The government's land reform program, characterized by chaos and violence, has nearly destroyed the commercial farming sector, the traditional source of exports and foreign exchange and the provider of 400,000 jobs.

@2124 Telephone system

Afghanistan
general assessment: very limited telephone and telegraph
service
domestic: in 1997, telecommunications links were established between
Mazar-e Sharif, Herat, Kandahar, Jalalabad, and Kabul through

satellite and microwave systems

international: satellite earth stations - 1 Intelsat (Indian Ocean)

linked only to Iran and 1 Intersputnik (Atlantic Ocean region);

commercial satellite telephone center in Ghazni

Albania

general assessment: Albania has the poorest telephone

service in Europe with fewer than two telephones per 100

inhabitants; it is doubtful that every village has telephone service

domestic: obsolete wire system; no longer provides a telephone for

every village; in 1992, following the fall of the Communist

government, peasants cut the wire to about 1,000 villages and used

it to build fences

international: inadequate; international traffic carried by

microwave radio relay from the Tirana exchange to Italy and Greece

Algeria

general assessment: telephone density in Algeria is very

low, not exceeding five telephones per 100 persons; the number of

fixed main lines increased in the last few years to a little more

than 2,000,000, but only about two-thirds of these have subscribers;

much of the infrastructure is outdated and inefficient

domestic: good service in north but sparse in south; domestic

satellite system with 12 earth stations (20 additional domestic

earth stations are planned)

international: 5 submarine cables; microwave radio relay to Italy,

France, Spain, Morocco, and Tunisia; coaxial cable to Morocco and

Tunisia; participant in Medarabtel; satellite earth stations - 2

Intelsat (1 Atlantic Ocean and 1 Indian Ocean), 1 Intersputnik, and

1 Arabsat (1998)

American Samoa

general assessment: NA

domestic: good telex, telegraph, facsimile and cellular telephone services; domestic satellite system with 1 Comsat earth station

international: satellite earth station - 1 Intelsat (Pacific Ocean)

Andorra

general assessment: NA

domestic: modern system with microwave radio relay connections between exchanges

international: landline circuits to France and Spain

Angola

general assessment: telephone service limited mostly to government and business use; HF radiotelephone used extensively for military links

domestic: limited system of wire, microwave radio relay, and tropospheric scatter

international: satellite earth stations - 2 Intelsat (Atlantic Ocean)

Anguilla

general assessment: NA

domestic: modern internal telephone system

international: microwave radio relay to island of Saint Martin (Guadeloupe and Netherlands Antilles)

Antarctica

general assessment: local systems at some research stations

domestic: NA

international: via satellite from some research stations

Antigua and Barbuda

general assessment: NA

domestic: good automatic telephone system

international: 1 coaxial submarine cable; satellite earth station - 1 Intelsat (Atlantic Ocean); tropospheric scatter to Saba (Netherlands Antilles) and Guadeloupe

Argentina

general assessment: by opening the telecommunications market to competition and foreign investment with the "Telecommunications Liberalization Plan of 1998," Argentina encouraged the growth of modern telecommunication technology; fiber-optic cable trunk lines are being installed between all major cities; the major networks are entirely digital and the availability of telephone service is being improved; however, telephone density is presently minimal, and making telephone service universally available will take time

domestic: microwave radio relay, fiber-optic cable, and a domestic satellite system with 40 earth stations serve the trunk network; more than 110,000 pay telephones are installed and mobile telephone use is rapidly expanding

international: satellite earth stations - 8 Intelsat (Atlantic Ocean); Atlantis II and Unisur submarine cables; two international gateways near Buenos Aires (1999)

Armenia

general assessment: system inadequate; now 90% privately owned and undergoing modernization and expansion

domestic: the majority of subscribers and the most modern equipment are in Yerevan (this includes paging and mobile cellular service)

international: Yerevan is connected to the Trans-Asia-Europe

fiber-optic cable through Iran; additional international service is available by microwave radio relay and landline connections to the other countries of the Commonwealth of Independent States and through the Moscow international switch and by satellite to the rest of the world; satellite earth stations - 1 Intelsat (2000)

Aruba

general assessment: NA

domestic: more than adequate

international: 1 submarine cable to Sint Maarten (Netherlands Antilles); extensive interisland microwave radio relay links

Australia

general assessment: excellent domestic and international service

domestic: domestic satellite system; much use of radiotelephone in areas of low population density; rapid growth of mobile cellular telephones

international: submarine cables to New Zealand, Papua New Guinea, and Indonesia; satellite earth stations - 10 Intelsat (4 Indian Ocean and 6 Pacific Ocean), 2 Inmarsat (Indian and Pacific Ocean regions) (1998)

Austria

general assessment: highly developed and efficient

domestic: there are 48 main lines for every 100 persons; the fiber optic net is very extensive; all telephone applications and Internet services are available

international: satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean) and 1 Eutelsat; in addition, there are about 600 VSAT (very small aperture terminals) (2002)

Azerbaijan

general assessment: inadequate; requires considerable expansion and modernization; teledensity of 10 main lines per 100 persons is low (2002)

domestic: the majority of telephones are in Baku and other industrial centers - about 700 villages still without public telephone service; satellite service connects Baku to a modern switch in its exclave of Naxcivan

international: the old Soviet system of cable and microwave is still serviceable; a satellite connection to Turkey enables Baku to reach about 200 additional countries, some of which are directly connected to Baku by satellite providers other than Turkey (1997)

Bahamas, The

general assessment: modern facilities

domestic: totally automatic system; highly developed

international: tropospheric scatter and submarine cable to Florida; 3 coaxial submarine cables; satellite earth station - 1 Intelsat (Atlantic Ocean) (1997)

Bahrain

general assessment: modern system

domestic: modern fiber-optic integrated services; digital network with rapidly growing use of mobile cellular telephones

international: tropospheric scatter to Qatar and UAE; microwave radio relay to Saudi Arabia; submarine cable to Qatar, UAE, and Saudi Arabia; satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean) and 1 Arabsat (1997)

Bangladesh

general assessment: totally inadequate for a modern

country

domestic: modernizing; introducing digital systems; trunk systems include VHF and UHF microwave radio relay links, and some fiber-optic cable in cities

international: satellite earth stations - 2 Intelsat (Indian Ocean); international radiotelephone communications and landline service to neighboring countries (2000)

Barbados

general assessment: NA

domestic: island-wide automatic telephone system

international: satellite earth stations - 4 Intelsat (Atlantic Ocean); tropospheric scatter to Trinidad and Saint Lucia

Belarus

general assessment: the Ministry of Telecommunications controls all telecommunications through its carrier (a joint stock company) Beltelcom which is a monopoly

domestic: local - Minsk has a digital metropolitan network and a cellular NMT-450 network; waiting lists for telephones are long;

local service outside Minsk is neglected and poor; intercity -

Belarus has a partly developed fiber-optic backbone system presently serving at least 13 major cities (1998); Belarus's fiber optics form synchronous digital hierarchy rings through other countries'

systems; an inadequate analog system remains operational

international: Belarus is a member of the Trans-European Line (TEL), Trans-Asia-Europe (TAE) fiber-optic line, and has access to the Trans-Siberia Line (TSL); three fiber-optic segments provide connectivity to Latvia, Poland, Russia, and Ukraine; worldwide service is available to Belarus through this infrastructure;

additional analog lines to Russia; Intelsat, Eutelsat, and Intersputnik earth stations

Belgium

general assessment: highly developed, technologically advanced, and completely automated domestic and international telephone and telegraph facilities

domestic: nationwide cellular telephone system; extensive cable network; limited microwave radio relay network

international: 5 submarine cables; satellite earth stations - 2 Intelsat (Atlantic Ocean) and 1 Eutelsat

Belize

general assessment: above-average system

domestic: trunk network depends primarily on microwave radio relay

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Benin

general assessment: NA

domestic: fair system of open-wire, microwave radio relay, and cellular connections

international: satellite earth station - 1 Intelsat (Atlantic Ocean); submarine cable

Bermuda

general assessment: NA

domestic: modern, fully automatic telephone system

international: 3 submarine cables; satellite earth stations - 3 Intelsat (Atlantic Ocean)

Bhutan

general assessment: NA

domestic: domestic telephone service is very poor with few telephones in use

international: international telephone and telegraph service is by landline through India; a satellite earth station was planned (1990)

Bolivia

general assessment: new subscribers face bureaucratic difficulties; most telephones are concentrated in La Paz and other cities; mobile cellular telephone use expanding rapidly

domestic: primary trunk system, which is being expanded, employs digital microwave radio relay; some areas are served by fiber-optic cable; mobile cellular systems are being expanded

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Bosnia and Herzegovina

general assessment: telephone and telegraph

network needs modernization and expansion; many urban areas are below average as contrasted with services in other former Yugoslav republics

domestic: NA

international: no satellite earth stations

Botswana

general assessment: the system is expanding with the growth of mobile cellular service and participation in regional development

domestic: small system of open-wire lines, microwave radio relay links, and a few radiotelephone communication stations; mobile cellular service is growing fast

international: two international exchanges; digital microwave radio relay links to Namibia, Zambia, Zimbabwe, and South Africa;

satellite earth station - 1 Intelsat (Indian Ocean)

Brazil

general assessment: good working system

domestic: extensive microwave radio relay system and a domestic satellite system with 64 earth stations

international: 3 coaxial submarine cables; satellite earth stations

- 3 Intelsat (Atlantic Ocean), 1 Inmarsat (Atlantic Ocean region east), connected by microwave relay system to Mercosur Brazilsat B3 satellite earth station

British Indian Ocean Territory general assessment: separate facilities for military and public needs are available domestic: all commercial telephone services are available, including connection to the Internet international: international telephone service is carried by satellite (2000)

British Virgin Islands

general assessment: worldwide telephone service

domestic: NA

international: submarine cable to Bermuda

Brunei

general assessment: service throughout the country is excellent; international service is good to East Asia, Europe, and the US

domestic: every service available

international: satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Pacific Ocean); digital submarine cable links to Malaysia, the Philippines, and Singapore (2001)

Bulgaria

general assessment: extensive but antiquated

domestic: more than two-thirds of the lines are residential;

telephone service is available in most villages; a fairly modern digital cable trunk line now connects switching centers in most of the regions, the others are connected by digital microwave radio relay

international: direct dialing to 58 countries; satellite earth stations - 1 Intersputnik (Atlantic Ocean region); 2 Intelsat (Atlantic and Indian Ocean regions)

Burkina Faso

general assessment: all services only fair

domestic: microwave radio relay, open-wire, and radiotelephone communication stations

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Burma

general assessment: meets minimum requirements for local and intercity service for business and government; international service is good

domestic: NA

international: satellite earth station - 1 Intelsat (Indian Ocean)

Burundi

general assessment: primitive system

domestic: sparse system of open-wire, radiotelephone communications, and low-capacity microwave radio relay

international: satellite earth station - 1 Intelsat (Indian Ocean)

Cambodia

general assessment: adequate landline and/or cellular service in Phnom Penh and other provincial cities; rural areas have little telephone service

domestic: NA

international: adequate but expensive landline and cellular service available to all countries from Phnom Penh and major provincial cities; satellite earth station - 1 Intersputnik (Indian Ocean region)

Cameroon

general assessment: available only to business and government

domestic: cable, microwave radio relay, and tropospheric scatter

international: satellite earth stations - 2 Intelsat (Atlantic Ocean)

Canada

general assessment: excellent service provided by modern technology

domestic: domestic satellite system with about 300 earth stations

international: 5 coaxial submarine cables; satellite earth stations - 5 Intelsat (4 Atlantic Ocean and 1 Pacific Ocean) and 2 Intersputnik (Atlantic Ocean region)

Cape Verde

general assessment: effective system, being improved

domestic: interisland microwave radio relay system with both analog and digital exchanges; work is in progress on a submarine fiber-optic cable system which is scheduled for completion in 2003

international: 2 coaxial submarine cables; HF radiotelephone to Senegal and Guinea-Bissau; satellite earth station - 1 Intelsat (Atlantic Ocean)

Cayman Islands

general assessment: NA

domestic: NA

international: 1 submarine coaxial cable; satellite earth station - 1 Intelsat (Atlantic Ocean)

Central African Republic

general assessment: fair system

domestic: network consists principally of microwave radio relay and low-capacity, low-powered radiotelephone communication

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Chad

general assessment: primitive system

domestic: fair system of radiotelephone communication stations

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Chile

general assessment: modern system based on extensive microwave radio relay facilities

domestic: extensive microwave radio relay links; domestic satellite system with 3 earth stations

international: satellite earth stations - 2 Intelsat (Atlantic Ocean)

China

general assessment: domestic and international services are increasingly available for private use; unevenly distributed domestic system serves principal cities, industrial centers, and many towns

domestic: interprovincial fiber-optic trunk lines and cellular telephone systems have been installed; a domestic satellite system with 55 earth stations is in place

international: satellite earth stations - 5 Intelsat (4 Pacific Ocean and 1 Indian Ocean), 1 Intersputnik (Indian Ocean region) and 1 Inmarsat (Pacific and Indian Ocean regions); several international

fiber-optic links to Japan, South Korea, Hong Kong, Russia, and Germany (2000)

Christmas Island

general assessment: service provided by the Australian network

domestic: only analog mobile telephone service is available

international: satellite earth stations - one Intelsat earth station provides telephone and telex service (2000)

Cocos (Keeling) Islands

general assessment: connected within Australia's telecommunication system

domestic: NA

international: telephone, telex, and facsimile communications with Australia and elsewhere via satellite; 1 satellite earth station of NA type (2002)

Colombia

general assessment: modern system in many respects

domestic: nationwide microwave radio relay system; domestic satellite system with 41 earth stations; fiber-optic network linking 50 cities

international: satellite earth stations - 6 Intelsat, 1 Inmarsat; 3 fully digitalized international switching centers; 8 submarine cables

Comoros

general assessment: sparse system of microwave radio relay and HF radiotelephone communication stations

domestic: HF radiotelephone communications and microwave radio relay

international: HF radiotelephone communications to Madagascar and Reunion

Congo, Democratic Republic of the
general assessment: poor
domestic: barely adequate wire and microwave radio relay service in and between urban areas; domestic satellite system with 14 earth stations
international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Congo, Republic of the
general assessment: services barely adequate
for government use; key exchanges are in Brazzaville, Pointe-Noire, and Loubomo; intercity lines frequently out of order
domestic: primary network consists of microwave radio relay and coaxial cable
international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Cook Islands
general assessment: NA
domestic: the individual islands are connected by a combination of satellite earth stations, microwave systems, and VHF and HF radiotelephone; within the islands, service is provided by small exchanges connected to subscribers by open-wire, cable, and fiber-optic cable
international: satellite earth station - 1 Intelsat (Pacific Ocean)

Costa Rica
general assessment: very good domestic telephone service
domestic: point-to-point and point-to-multi-point microwave, fiber-optic, and coaxial cable link rural areas; Internet service is available
international: connected to Central American Microwave System;

satellite earth stations - 2 Intelsat (Atlantic Ocean); two submarine cables (1999)

Cote d'Ivoire

general assessment: well developed by African standards but operating well below capacity
domestic: open-wire lines and microwave radio relay; 90% digitalized
international: satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean); 2 coaxial submarine cables (June 1999)

Croatia

general assessment: NA
domestic: reconstruction plan calls for replacement of all analog circuits with digital and enlarging the network; a backup will be included in the plan for the main trunk
international: digital international service is provided through the main switch in Zagreb; Croatia participates in the Trans-Asia-Europe (TEL) fiber-optic project, which consists of two fiber-optic trunk connections with Slovenia and a fiber-optic trunk line from Rijeka to Split and Dubrovnik; Croatia is also investing in ADRIA 1, a joint fiber-optic project with Germany, Albania, and Greece (2000)

Cuba

general assessment: NA
domestic: principal trunk system, end to end of country, is coaxial cable; fiber-optic distribution in Havana and on Isla de la Juventud; 2 microwave radio relay installations (one is old, US-built; the other newer, built during the period of Soviet support); both analog and digital mobile cellular service established
international: satellite earth station - 1 Intersputnik (Atlantic Ocean region)

Cyprus

general assessment: excellent in both the Greek Cypriot and Turkish Cypriot areas

domestic: open-wire, fiber-optic cable, and microwave radio relay

international: tropospheric scatter; 3 coaxial and 5 fiber-optic

submarine cables; satellite earth stations - 3 Intelsat (1 Atlantic Ocean and 2 Indian Ocean), 2 Eutelsat, 2 Intersputnik, and 1 Arabsat

Czech Republic

general assessment: privatization and modernization

of the Czech telecommunication system got a late start but is advancing steadily; growth in the use of mobile cellular telephones is particularly vigorous

domestic: 86% of exchanges now digital; existing copper subscriber systems now being enhanced with Asymmetric Digital Subscriber Line (ADSL) equipment to accommodate Internet and other digital signals; trunk systems include fiber-optic cable and microwave radio relay

international: satellite earth stations - 2 Intersputnik (Atlantic and Indian Ocean regions), 1 Intelsat, 1 Eutelsat, 1 Inmarsat, 1 Globalstar

Denmark

general assessment: excellent telephone and telegraph services

domestic: buried and submarine cables and microwave radio relay form trunk network, 4 cellular mobile communications systems

international: 18 submarine fiber-optic cables linking Denmark with Norway, Sweden, Russia, Poland, Germany, Netherlands, UK, Faroe Islands, Iceland, and Canada; satellite earth stations - 6 Intelsat, 10 Eutelsat, 1 Orion, 1 Inmarsat (Blaavand-Atlantic-East); note - the Nordic countries (Denmark, Finland, Iceland, Norway, and Sweden)

share the Danish earth station and the Eik, Norway, station for worldwide Inmarsat access (1997)

Djibouti

general assessment: telephone facilities in the city of Djibouti are adequate as are the microwave radio relay connections to outlying areas of the country
domestic: microwave radio relay network
international: submarine cable to Jiddah, Suez, Sicily, Marseilles, Colombo, and Singapore; satellite earth stations - 1 Intelsat (Indian Ocean) and 1 Arabsat; Medarabtel regional microwave radio relay telephone network

Dominica

general assessment: NA
domestic: fully automatic network
international: microwave radio relay and SHF radiotelephone links to Martinique and Guadeloupe; VHF and UHF radiotelephone links to Saint Lucia

Dominican Republic

general assessment: NA
domestic: relatively efficient system based on islandwide microwave radio relay network
international: 1 coaxial submarine cable; satellite earth station - 1 Intelsat (Atlantic Ocean)

East Timor

NA

Ecuador

general assessment: generally elementary but being expanded

domestic: facilities generally inadequate and unreliable
international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Egypt

general assessment: large system; underwent extensive upgrading during 1990s and is reasonably modern; Internet access and cellular service are available

domestic: principal centers at Alexandria, Cairo, Al Mansurah, Ismailia, Suez, and Tanta are connected by coaxial cable and microwave radio relay

international: satellite earth stations - 2 Intelsat (Atlantic Ocean and Indian Ocean), 1 Arabsat, and 1 Inmarsat; 5 coaxial submarine cables; tropospheric scatter to Sudan; microwave radio relay to Israel; a participant in Medarabtel and a signatory to Project Oxygen (a global submarine fiber-optic cable system)

El Salvador

general assessment: NA

domestic: nationwide microwave radio relay system

international: satellite earth station - 1 Intelsat (Atlantic Ocean); connected to Central American Microwave System

Equatorial Guinea

general assessment: poor system with adequate government services

domestic: NA

international: international communications from Bata and Malabo to African and European countries; satellite earth station - 1 Intelsat (Indian Ocean)

Eritrea

general assessment: inadequate

domestic: very inadequate; most telephones are in Asmara; government is seeking international tenders to improve the system (2002)
international: NA; note - international connections exist

Estonia

general assessment: foreign investment in the form of joint business ventures greatly improved telephone service; substantial fiber-optic cable systems carry telephone, TV, and radio traffic in the digital mode; internet services are available throughout most of the country - only about 11,000 subscriber requests were unfilled by September 2000

domestic: a wide range of high quality voice, data, and internet services is available throughout the country

international: fiber-optic cables to Finland, Sweden, Latvia, and Russia provide worldwide packet-switched service; two international switches are located in Tallinn (2001)

Ethiopia

general assessment: open-wire and microwave radio relay system; adequate for government use

domestic: open-wire; microwave radio relay; radio communication in the HF, VHF, and UHF frequencies; two domestic satellites provide the national trunk service

international: open-wire to Sudan and Djibouti; microwave radio relay to Kenya and Djibouti; satellite earth stations - 3 Intelsat (1 Atlantic Ocean and 2 Pacific Ocean)

Falkland Islands (Islas Malvinas) general assessment: NA domestic: government-operated radiotelephone and private VHF/CB radiotelephone networks provide effective service to almost all points on both islands

international: satellite earth station - 1 Intelsat (Atlantic Ocean) with links through London to other countries

Faroe Islands

general assessment: good international communications;

good domestic facilities

domestic: digitalization was completed in 1998; both NMT (analog) and GSM (digital) mobile telephone systems are installed

international: satellite earth stations - 1 Orion; 1 fiber-optic submarine cable to the Shetland Islands, linking the Faroe Islands with Denmark and Iceland; fiber-optic submarine cable connection to Canada-Europe cable

Fiji

general assessment: modern local, interisland, and international (wire/radio integrated) public and special-purpose telephone, telegraph, and teleprinter facilities; regional radio communications center

domestic: NA

international: access to important cable links between US and Canada as well as between NZ and Australia; satellite earth station - 1 Intelsat (Pacific Ocean)

Finland

general assessment: modern system with excellent service

domestic: cable, microwave radio relay, and an extensive cellular net provide domestic needs

international: 1 submarine cable; satellite earth stations - access to Intelsat transmission service via a Swedish satellite earth station, 1 Inmarsat (Atlantic and Indian Ocean regions); note -

Finland shares the Inmarsat earth station with the other Nordic countries (Denmark, Iceland, Norway, and Sweden)

France

general assessment: highly developed

domestic: extensive cable and microwave radio relay; extensive introduction of fiber-optic cable; domestic satellite system

international: satellite earth stations - 2 Intelsat (with total of 5 antennas - 2 for Indian Ocean and 3 for Atlantic Ocean), NA Eutelsat, 1 Inmarsat (Atlantic Ocean region); HF radiotelephone communications with more than 20 countries

French Guiana

general assessment: NA

domestic: fair open-wire and microwave radio relay system

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

French Polynesia

general assessment: NA

domestic: NA

international: satellite earth station - 1 Intelsat (Pacific Ocean)

Gabon

general assessment: adequate service by African standards and improving with the help of the growing mobile cell system

domestic: adequate system of cable, microwave radio relay, tropospheric scatter, radiotelephone communication stations, and a domestic satellite system with 12 earth stations

international: satellite earth stations - 3 Intelsat (Atlantic Ocean); fiber optic submarine cable to be in service in 2002

Gambia, The

general assessment: adequate; a packet switched data network is available

domestic: adequate network of microwave radio relay and open-wire

international: microwave radio relay links to Senegal and

Guinea-Bissau; satellite earth station - 1 Intelsat (Atlantic Ocean)

Gaza Strip

general assessment: NA

domestic: rudimentary telephone services provided by an open-wire system

international: NA

Georgia

general assessment: NA

domestic: local - T'bilisi and K'ut'aisi have cellular telephone

networks; urban telephone density is about 20 per 100 people; rural

telephone density is about 4 per 100 people; intercity facilities

include a fiber-optic line between T'bilisi and K'ut'aisi;

nationwide pager service is available

international: Georgia and Russia are working on a fiber-optic line

between P'ot'i and Sochi (Russia); present international service is

available by microwave, landline, and satellite through the Moscow

switch; international electronic mail and telex service are available

Germany

general assessment: Germany has one of the world's most technologically advanced telecommunications systems; as a result of intensive capital expenditures since reunification, the formerly backward system of the eastern part of the country, dating back to World War II, has been modernized and integrated with that of the

western part

domestic: Germany is served by an extensive system of automatic telephone exchanges connected by modern networks of fiber-optic cable, coaxial cable, microwave radio relay, and a domestic satellite system; cellular telephone service is widely available, expanding rapidly, and includes roaming service to many foreign countries

international: Germany's international service is excellent worldwide, consisting of extensive land and undersea cable facilities as well as earth stations in the INMARSAT, INTELSAT, EUTELSAT, and INTERSPUTNIK satellite systems (2001)

Ghana

general assessment: poor to fair system; Internet accessible; many rural communities not yet connected; expansion of services is underway

domestic: primarily microwave radio relay; wireless local loop has been installed

international: satellite earth stations - 4 Intelsat (Atlantic Ocean); microwave radio relay link to Panaftel system connects Ghana to its neighbors

Gibraltar

general assessment: adequate, automatic domestic system and adequate international facilities

domestic: automatic exchange facilities

international: radiotelephone; microwave radio relay; satellite earth station - 1 Intelsat (Atlantic Ocean)

Greece

general assessment: adequate, modern networks reach all

areas; good mobile telephone and international service
domestic: microwave radio relay trunk system; extensive open-wire
connections; submarine cable to offshore islands
international: tropospheric scatter; 8 submarine cables; satellite
earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean), 1
Eutelsat, and 1 Inmarsat (Indian Ocean region)

Greenland

general assessment: adequate domestic and international
service provided by satellite, cables and microwave radio relay;
totally digitalized in 1995
domestic: microwave radio relay and satellite
international: satellite earth stations - 12 Intelsat, 1 Eutelsat, 2
Americom GE-2 (all Atlantic Ocean)

Grenada

general assessment: automatic, islandwide telephone system
domestic: interisland VHF and UHF radiotelephone links
international: new SHF radiotelephone links to Trinidad and Tobago
and Saint Vincent; VHF and UHF radio links to Trinidad

Guadeloupe

general assessment: domestic facilities inadequate
domestic: NA
international: satellite earth station - 1 Intelsat (Atlantic
Ocean); microwave radio relay to Antigua and Barbuda, Dominica, and
Martinique

Guam

general assessment: modern system, integrated with US
facilities for direct dialing, including free use of 800 numbers
domestic: modern digital system, including cellular mobile service

and local access to the Internet

international: satellite earth stations - 2 Intelsat (Pacific Ocean); submarine cables to US and Japan (Guam is a trans-Pacific communications hub for MCI, Sprint, AT&T, IT&E, and GTE, linking the US and Asia)

Guatemala

general assessment: fairly modern network centered in the city of Guatemala

domestic: NA

international: connected to Central American Microwave System; satellite earth station - 1 Intelsat (Atlantic Ocean)

Guernsey

general assessment: NA

domestic: NA

international: 1 submarine cable

Guinea

general assessment: poor to fair system of open-wire lines, small radiotelephone communication stations, and new microwave radio relay system

domestic: microwave radio relay and radiotelephone communication

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Guinea-Bissau

general assessment: small system

domestic: combination of microwave radio relay, open-wire lines, radiotelephone, and cellular communications

international: NA

Guyana

general assessment: fair system for long-distance calling

domestic: microwave radio relay network for trunk lines

international: tropospheric scatter to Trinidad; satellite earth station - 1 Intelsat (Atlantic Ocean)

Haiti

general assessment: domestic facilities barely adequate;

international facilities slightly better

domestic: coaxial cable and microwave radio relay trunk service

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Holy See (Vatican City)

general assessment: automatic exchange

domestic: tied into Italian system

international: uses Italian system

Honduras

general assessment: inadequate system

domestic: NA

international: satellite earth stations - 2 Intelsat (Atlantic Ocean); connected to Central American Microwave System

Hong Kong

general assessment: modern facilities provide excellent

domestic and international services

domestic: microwave radio relay links and extensive fiber-optic network

international: satellite earth stations - 3 Intelsat (1 Pacific Ocean and 2 Indian Ocean); coaxial cable to Guangzhou, China; access to 5 international submarine cables providing connections to ASEAN

member nations, Japan, Taiwan, Australia, Middle East, and Western Europe

Hungary

general assessment: the telephone system has been modernized and is capable of satisfying all requests for telecommunication service

domestic: the system is digitalized and highly automated; trunk services are carried by fiber-optic cable and digital microwave radio relay; a program for fiber-optic subscriber connections was initiated in 1996; heavy use is made of mobile cellular telephones

international: Hungary has fiber-optic cable connections with all neighboring countries; the international switch is in Budapest;

satellite earth stations - 2 Intelsat (Atlantic Ocean and Indian Ocean regions), 1 Inmarsat, 1 very small aperture terminal (VSAT) system of ground terminals

Iceland

general assessment: extensive domestic service

domestic: the trunk network consists of coaxial and fiber-optic cables and microwave radio relay links

international: satellite earth stations - 2 Intelsat (Atlantic Ocean), 1 Inmarsat (Atlantic and Indian Ocean regions); note - Iceland shares the Inmarsat earth station with the other Nordic countries (Denmark, Finland, Norway, and Sweden)

India

general assessment: mediocre service; local and long distance service provided throughout all regions of the country, with services primarily concentrated in the urban areas; major objective is to continue to expand and modernize long-distance network to keep

pace with rapidly growing number of local subscriber lines; steady improvement is taking place with the recent admission of private and private-public investors, but, with telephone density at about two for each 100 persons and a waiting list of over 2 million, demand for main line telephone service will not be satisfied for a very long time

domestic: local service is provided by microwave radio relay and coaxial cable, with open wire and obsolete electromechanical and manual switchboard systems still in use in rural areas; starting in the 1980s, a substantial amount of digital switch gear has been introduced for local and long-distance service; long-distance traffic is carried mostly by coaxial cable and low-capacity microwave radio relay; since 1985 significant trunk capacity has been added in the form of fiber-optic cable and a domestic satellite system with 254 earth stations; mobile cellular service is provided in four metropolitan cities

international: satellite earth stations - 8 Intelsat (Indian Ocean) and 1 Inmarsat (Indian Ocean region); nine gateway exchanges operating from Mumbai (Bombay), New Delhi, Kolkata (Calcutta), Chennai (Madras), Jalandhar, Kanpur, Gaidhinagar, Hyderabad, and Ernakulam; 4 submarine cables - LOCOM linking Chennai (Madras) to Penang; Indo-UAE-Gulf cable linking Mumbai (Bombay) to Al Fujayrah, UAE; India-SEA-ME-WE-3, SEA-ME-WE-2 with landing sites at Cochin and

Mumbai (Bombay); Fiber-Optic Link Around the Globe (FLAG) with landing site at Mumbai (Bombay) (2000)

Indonesia

general assessment: domestic service fair, international service good

domestic: interisland microwave system and HF radio police net;

domestic satellite communications system

international: satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Pacific Ocean)

Iran

general assessment: inadequate but currently being modernized and expanded with the goal of not only improving the efficiency and increasing the volume of the urban service but also bringing telephone service to several thousand villages, not presently connected

domestic: as a result of heavy investing in the telephone system since 1994, the number of long-distance channels in the microwave radio relay trunk has grown substantially; many villages have been brought into the net; the number of main lines in the urban systems has approximately doubled; and thousands of mobile cellular subscribers are being served; moreover, the technical level of the system has been raised by the installation of thousands of digital switches

international: HF radio and microwave radio relay to Turkey, Azerbaijan, Pakistan, Afghanistan, Turkmenistan, Syria, Kuwait, Tajikistan, and Uzbekistan; submarine fiber-optic cable to UAE with access to Fiber-Optic Link Around the Globe (FLAG); Trans-Asia-Europe (TAE) fiber-optic line runs from Azerbaijan through the northern portion of Iran to Turkmenistan with expansion to Georgia and Azerbaijan; satellite earth stations - 9 Intelsat and 4 Inmarsat

Iraq

general assessment: an unknown number of telecommunication facilities were damaged during the March-April 2003 war

domestic: the network consists of coaxial cables and microwave radio

relay links

international: satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean), 1 Intersputnik (Atlantic Ocean region), and 1 Arabsat (inoperative); coaxial cable and microwave radio relay to Jordan, Kuwait, Syria, and Turkey; Kuwait line is probably nonoperational

Ireland

general assessment: modern digital system using cable and microwave radio relay

domestic: microwave radio relay

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Israel

general assessment: most highly developed system in the Middle East although not the largest

domestic: good system of coaxial cable and microwave radio relay;

all systems are digital

international: 3 submarine cables; satellite earth stations - 3 Intelsat (2 Atlantic Ocean and 1 Indian Ocean)

Italy

general assessment: modern, well developed, fast; fully automated telephone, telex, and data services

domestic: high-capacity cable and microwave radio relay trunks

international: satellite earth stations - 3 Intelsat (with a total of 5 antennas - 3 for Atlantic Ocean and 2 for Indian Ocean), 1 Inmarsat (Atlantic Ocean region), and NA Eutelsat; 21 submarine cables

Jamaica

general assessment: fully automatic domestic telephone

network

domestic: NA

international: satellite earth stations - 2 Intelsat (Atlantic Ocean); 3 coaxial submarine cables

Japan

general assessment: excellent domestic and international service

domestic: high level of modern technology and excellent service of every kind

international: satellite earth stations - 5 Intelsat (4 Pacific Ocean and 1 Indian Ocean), 1 Intersputnik (Indian Ocean region), and 1 Inmarsat (Pacific and Indian Ocean regions); submarine cables to China, Philippines, Russia, and US (via Guam) (1999)

Jersey

general assessment: NA

domestic: NA

international: 3 submarine cables

Johnston Atoll

general assessment: 33 commercial lines, 15 incoming and 18 outgoing; adequate telecommunications

domestic: 60-channel submarine cable (broken in January 2002), 24 DSN circuits by satellite, Automated Digital Network (AUTODIN) with standard remote terminal, digital telephone switch, Military Affiliated Radio System (MARS) station (scheduled for decommissioning March 2003), UHF/VHF air-ground radio, a link to the Pacific Consolidated Telecommunications Network (PCTN) satellite
international: NA (2002)

Jordan

general assessment: service has improved recently with the increased use of digital switching equipment, but better access to the telephone system is needed in the rural areas and easier access to pay telephones is needed by the urban public
domestic: microwave radio relay transmission and coaxial and fiber-optic cable are employed on trunk lines; considerable use of mobile cellular systems; Internet service is available
international: satellite earth stations - 3 Intelsat, 1 Arabsat, and 29 land and maritime Inmarsat terminals; fiber-optic cable to Saudi Arabia and microwave radio relay link with Egypt and Syria; connection to international submarine cable FLAG (Fiber-Optic Link Around the Globe); participant in MEDARABTEL; international links total about 4,000

Kazakhstan

general assessment: service is poor; equipment antiquated
domestic: intercity by landline and microwave radio relay; mobile cellular systems are available in most of Kazakhstan
international: international traffic with other former Soviet republics and China carried by landline and microwave radio relay and with other countries by satellite and by the Trans-Asia-Europe (TAE) fiber-optic cable; satellite earth stations - 2 Intelsat

Kenya

general assessment: unreliable; little attempt to modernize except for service to business
domestic: trunks are primarily microwave radio relay; business data commonly transferred by a very small aperture terminal (VSAT) system
international: satellite earth stations - 4 Intelsat

Kiribati

general assessment: NA

domestic: NA

international: satellite earth station - 1 Intelsat (Pacific Ocean)

note: Kiribati is being linked to the Pacific Ocean Cooperative Telecommunications Network, which should improve telephone service

Korea, North

general assessment: NA

domestic: NA

international: satellite earth stations - 1 Intelsat (Indian Ocean) and 1 Russian (Indian Ocean region); other international connections through Moscow and Beijing

Korea, South

general assessment: excellent domestic and international services

domestic: NA

international: fiber-optic submarine cable to China; the Russia-Korea-Japan submarine cable; satellite earth stations - 3 Intelsat (2 Pacific Ocean and 1 Indian Ocean) and 1 Inmarsat (Pacific Ocean region)

Kuwait

general assessment: the quality of service is excellent

domestic: new telephone exchanges provide a large capacity for new subscribers; trunk traffic is carried by microwave radio relay, coaxial cable, and open-wire and fiber-optic cable; a cellular telephone system operates throughout Kuwait, and the country is well supplied with pay telephones

international: coaxial cable and microwave radio relay to Saudi

Arabia; linked to Bahrain, Qatar, UAE via the Fiber-Optic Gulf (FOG) cable; satellite earth stations - 3 Intelsat (1 Atlantic Ocean, 2 Indian Ocean), 1 Inmarsat (Atlantic Ocean), and 2 Arabsat

Kyrgyzstan

general assessment: poorly developed; about 100,000 unsatisfied applications for household telephones
domestic: principally microwave radio relay; one cellular provider, probably limited to Bishkek region
international: connections with other CIS countries by landline or microwave radio relay and with other countries by leased connections with Moscow international gateway switch and by satellite; satellite earth stations - 1 Intersputnik and 1 Intelsat; connected internationally by the Trans-Asia-Europe (TAE) fiber-optic line

Laos

general assessment: service to general public is poor but improving with over 20,000 telephones currently in service and an additional 48,000 expected by 2001; the government relies on a radiotelephone network to communicate with remote areas
domestic: radiotelephone communications
international: satellite earth station - 1 Intersputnik (Indian Ocean region)

Latvia

general assessment: inadequate, but is being modernized to provide an international capability independent of the Moscow international switch; more facilities are being installed for individual use
domestic: expansion underway in intercity trunk line connections, rural exchanges, and mobile systems; still many unsatisfied

subscriber applications

international: international connections are now available via cable and a satellite earth station at Riga, enabling direct connections for most calls (1998)

Lebanon

general assessment: telecommunications system severely damaged by civil war; rebuilding well underway

domestic: primarily microwave radio relay and cable

international: satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Atlantic Ocean) (erratic operations); coaxial cable to Syria; microwave radio relay to Syria but inoperable beyond Syria to Jordan; 3 submarine coaxial cables

Lesotho

general assessment: rudimentary system

domestic: consists of a few landlines, a small microwave radio relay system, and a minor radiotelephone communication system; a cellular mobile telephone system is growing

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Liberia

general assessment: telephone and telegraph service via microwave radio relay network; main center is Monrovia

domestic: NA

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Libya

general assessment: telecommunications system is being modernized; mobile cellular telephone system became operational in 1996

domestic: microwave radio relay, coaxial cable, cellular,

tropospheric scatter, and a domestic satellite system with 14 earth stations

international: satellite earth stations - 4 Intelsat, NA Arabsat, and NA Intersputnik; submarine cables to France and Italy; microwave radio relay to Tunisia and Egypt; tropospheric scatter to Greece; participant in Medarabtel (1999)

Liechtenstein

general assessment: automatic telephone system

domestic: NA

international: linked to Swiss networks by cable and microwave radio relay

Lithuania

general assessment: inadequate, but is being modernized to provide an improved international capability and better residential access

domestic: a national, fiber-optic cable, interurban, trunk system is nearing completion; rural exchanges are being improved and expanded; mobile cellular systems are being installed; access to the Internet is available; still many unsatisfied telephone subscriber applications

international: landline connections to Latvia and Poland; major international connections to Denmark, Sweden, and Norway by submarine cable for further transmission by satellite

Luxembourg

general assessment: highly developed, completely

automated and efficient system, mainly buried cables

domestic: nationwide cellular telephone system; buried cable

international: 3 channels leased on TAT-6 coaxial submarine cable
(Europe to North America)

Macau

general assessment: fairly modern communication facilities
maintained for domestic and international services

domestic: NA

international: HF radiotelephone communication facility; access to
international communications carriers provided via Hong Kong and
China; satellite earth station - 1 Intelsat (Indian Ocean)

Macedonia, The Former Yugoslav Republic of

general assessment: NA

domestic: NA

international: NA

Madagascar

general assessment: system is above average for the region

domestic: open-wire lines, coaxial cables, microwave radio relay,
and tropospheric scatter links connect regions

international: submarine cable to Bahrain; satellite earth stations
- 1 Intelsat (Indian Ocean) and 1 Intersputnik (Atlantic Ocean
region)

Malawi

general assessment: NA

domestic: system employs open-wire lines, microwave radio relay
links, and radiotelephone communications stations

international: satellite earth stations - 2 Intelsat (1 Indian Ocean
and 1 Atlantic Ocean)

Malaysia

general assessment: modern system; international service excellent

domestic: good intercity service provided on Peninsular Malaysia mainly by microwave radio relay; adequate intercity microwave radio relay network between Sabah and Sarawak via Brunei; domestic satellite system with 2 earth stations

international: submarine cables to India, Hong Kong, and Singapore; satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Pacific Ocean) (2001)

Maldives

general assessment: minimal domestic and international facilities

domestic: interatoll communication through microwave links; all inhabited islands are connected with telephone and fax service

international: satellite earth station - 3 Intelsat (Indian Ocean)

Mali

general assessment: domestic system unreliable but improving; provides only minimal service

domestic: network consists of microwave radio relay, open-wire, and radiotelephone communications stations; expansion of microwave radio relay in progress

international: satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean)

Malta

general assessment: automatic system satisfies normal requirements

domestic: submarine cable and microwave radio relay between islands

international: 2 submarine cables; satellite earth station - 1
Intelsat (Atlantic Ocean)

Man, Isle of

general assessment: NA

domestic: landline, telefax, mobile cellular telephone system

international: fiber-optic cable, microwave radio relay, satellite
earth station, submarine cable

Marshall Islands

general assessment: digital switching equipment;

modern services include telex, cellular, internet, international
calling, caller ID, and leased data circuits

domestic: Majuro Atoll and Ebeye and Kwajalein islands have regular,
seven-digit, direct-dial telephones; other islands interconnected by
shortwave radiotelephone (used mostly for government purposes)

international: satellite earth stations - 2 Intelsat (Pacific
Ocean); US Government satellite communications system on Kwajalein
(2001)

Martinique

general assessment: domestic facilities are adequate

domestic: NA

international: microwave radio relay to Guadeloupe, Dominica, and
Saint Lucia; satellite earth stations - 2 Intelsat (Atlantic Ocean)

Mauritania

general assessment: limited system of cable and open-wire
lines, minor microwave radio relay links, and radiotelephone
communications stations (improvements being made)

domestic: mostly cable and open-wire lines; a recently completed
domestic satellite telecommunications system links Nouakchott with

regional capitals

international: satellite earth stations - 1 Intelsat (Atlantic Ocean) and 2 Arabsat

Mauritius

general assessment: small system with good service

domestic: primarily microwave radio relay trunk system

international: satellite earth station - 1 Intelsat (Indian Ocean);

new microwave link to Reunion; HF radiotelephone links to several countries

Mayotte

general assessment: small system administered by French Department of Posts and Telecommunications

domestic: NA

international: microwave radio relay and HF radiotelephone communications to Comoros (2001)

Mexico

general assessment: low telephone density with about 12 main lines per 100 persons; privatized in December 1990; the opening to competition in January 1997 improved prospects for development

domestic: adequate telephone service for business and government, but the population is poorly served; domestic satellite system with 120 earth stations; extensive microwave radio relay network; considerable use of fiber-optic cable, coaxial cable, and mobile cellular service

international: satellite earth stations - 32 Intelsat, 2 Solidaridad (giving Mexico improved access to South America, Central America, and much of the US as well as enhancing domestic communications), numerous Inmarsat mobile earth stations; linked to Central American

Microwave System of trunk connections; high capacity Columbus-2 fiber-optic submarine cable with access to the US, Virgin Islands, Canary Islands, Morocco, Spain, and Italy (1997)

Micronesia, Federated States of general assessment: adequate system domestic: islands interconnected by shortwave radiotelephone (used mostly for government purposes) international: satellite earth stations - 5 Intelsat (Pacific Ocean) (2002)

Moldova

general assessment: inadequate, outmoded, poor service outside Chisinau; some effort to modernize is under way domestic: new subscribers face long wait for service; mobile cellular telephone service being introduced international: service through Romania and Russia via landline; satellite earth stations - Intelsat, Eutelsat, and Intersputnik

Monaco

general assessment: modern automatic telephone system domestic: NA international: no satellite earth stations; connected by cable into the French communications system

Mongolia

general assessment: very low density: about 3.5 telephones for each thousand persons domestic: NA international: satellite earth station - 1 Intersputnik (Indian Ocean Region)

Montserrat

general assessment: NA

domestic: NA

international: NA

Morocco

general assessment: modern system with all important capabilities; however density is low with only 4.6 main lines available for each 100 persons

domestic: good system composed of open-wire lines, cables, and microwave radio relay links; Internet available but expensive; principal switching centers are Casablanca and Rabat; national network nearly 100% digital using fiber-optic links; improved rural service employs microwave radio relay

international: 7 submarine cables; satellite earth stations - 2

Intelsat (Atlantic Ocean) and 1 Arabsat; microwave radio relay to Gibraltar, Spain, and Western Sahara; coaxial cable and microwave radio relay to Algeria; participant in Medarabtel; fiber-optic cable link from Agadir to Algeria and Tunisia (1998)

Mozambique

general assessment: fair system but not available

generally (telephone density is only 16 telephones for each 1,000 persons)

domestic: the system consists of open-wire lines and trunk connection by microwave radio relay and tropospheric scatter

international: satellite earth stations - 5 Intelsat (2 Atlantic Ocean and 3 Indian Ocean)

Namibia

general assessment: good system; about 6 telephones for each 100 persons

domestic: good urban services; fair rural service; microwave radio

relay links major towns; connections to other populated places are by open wire; 100% digital
international: fiber-optic cable to South Africa, microwave radio relay link to Botswana, direct links to other neighboring countries; connected to Africa ONE and South African Far East (SAFE) submarine cables through South Africa; satellite earth stations - 4 Intelsat (2002)

Nauru

general assessment: adequate local and international radiotelephone communication provided via Australian facilities
domestic: NA
international: satellite earth station - 1 Intelsat (Pacific Ocean)

Nepal

general assessment: poor telephone and telegraph service; fair radiotelephone communication service and mobile cellular telephone network
domestic: NA
international: radiotelephone communications; microwave landline to India; satellite earth station - 1 Intelsat (Indian Ocean)

Netherlands

general assessment: highly developed and well maintained
domestic: the existing system of multi-conductor cables is gradually being replaced by fiber-optic cables; the density of cellular telephone traffic is rapidly increasing and further modernization of the system is expected in 2001, with the introduction of the third generation of the Global System for Mobile Communications (GSM)
international: 5 submarine cables; satellite earth stations - 3

Intelsat (1 Indian Ocean and 2 Atlantic Ocean), 1 Eutelsat, and 1 Inmarsat (Atlantic and Indian Ocean regions) (1996)

Netherlands Antilles

general assessment: generally adequate facilities

domestic: extensive interisland microwave radio relay links

international: submarine cables - 2; satellite earth stations - 2

Intelsat (Atlantic Ocean)

New Caledonia

general assessment: NA

domestic: NA

international: satellite earth station - 1 Intelsat (Pacific Ocean)

New Zealand

general assessment: excellent domestic and international systems

domestic: NA

international: submarine cables to Australia and Fiji; satellite earth stations - 2 Intelsat (Pacific Ocean)

Nicaragua

general assessment: inadequate system being upgraded by foreign investment

domestic: low-capacity microwave radio relay and wire system being expanded; connected to Central American Microwave System

international: satellite earth stations - 1 Intersputnik (Atlantic Ocean region) and 1 Intelsat (Atlantic Ocean)

Niger

general assessment: small system of wire, radio telephone

communications, and microwave radio relay links concentrated in the southwestern area of Niger

domestic: wire, radiotelephone communications, and microwave radio relay; domestic satellite system with 3 earth stations and 1 planned

international: satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean)

Nigeria

general assessment: an inadequate system, further limited by poor maintenance; major expansion is required and a start has been made

domestic: intercity traffic is carried by coaxial cable, microwave radio relay, a domestic communications satellite system with 19 earth stations, and a coastal submarine cable; mobile cellular facilities and the Internet are available

international: satellite earth stations - 3 Intelsat (2 Atlantic Ocean and 1 Indian Ocean); coaxial submarine cable SAFE (South African Far East)

Niue

domestic: single-line telephone system connects all villages on island

international: NA

Norfolk Island

general assessment: adequate

domestic: NA

international: radiotelephone service with Sydney (Australia)

Northern Mariana Islands

general assessment: NA

domestic: NA

international: satellite earth stations - 2 Intelsat (Pacific Ocean)

Norway

general assessment: modern in all respects; one of the most advanced telecommunications networks in Europe

domestic: Norway has a domestic satellite system; moreover, the prevalence of rural areas encourages the wide use of cellular mobile systems instead of fixed-wire systems

international: 2 buried coaxial cable systems; 4 coaxial submarine cables; satellite earth stations - NA Eutelsat, NA Intelsat (Atlantic Ocean), and 1 Inmarsat (Atlantic and Indian Ocean regions); note - Norway shares the Inmarsat earth station with the other Nordic countries (Denmark, Finland, Iceland, and Sweden) (1999)

Oman

general assessment: modern system consisting of open-wire, microwave, and radiotelephone communication stations; limited coaxial cable

domestic: open-wire, microwave, radiotelephone communications, and a domestic satellite system with 8 earth stations

international: satellite earth stations - 2 Intelsat (Indian Ocean) and 1 Arabsat

Pakistan

general assessment: the domestic system is mediocre, but improving; service is adequate for government and business use, in part because major businesses have established their own private systems; since 1988, the government has promoted investment in the national telecommunications system on a priority basis, significantly increasing network capacity; despite major

improvements in trunk and urban systems, telecommunication services are still not readily available to the majority of the rural population

domestic: microwave radio relay, coaxial cable, fiber-optic cable, cellular, and satellite networks

international: satellite earth stations - 3 Intelsat (1 Atlantic Ocean and 2 Indian Ocean); 3 operational international gateway exchanges (1 at Karachi and 2 at Islamabad); microwave radio relay to neighboring countries (1999)

Palau

general assessment: NA

domestic: NA

international: satellite earth station - 1 Intelsat (Pacific Ocean)

Panama

general assessment: domestic and international facilities

well developed

domestic: NA

international: 1 coaxial submarine cable; satellite earth stations - 2 Intelsat (Atlantic Ocean); connected to the Central American Microwave System

Papua New Guinea

general assessment: services are adequate and being improved; facilities provide radiotelephone and telegraph, coastal radio, aeronautical radio, and international radio communication services

domestic: mostly radiotelephone

international: submarine cables to Australia and Guam; satellite

earth station - 1 Intelsat (Pacific Ocean); international radio communication service

Paraguay

general assessment: meager telephone service; principal switching center is Asuncion

domestic: fair microwave radio relay network

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Peru

general assessment: adequate for most requirements

domestic: nationwide microwave radio relay system and a domestic satellite system with 12 earth stations

international: satellite earth stations - 2 Intelsat (Atlantic Ocean); Pan American submarine cable

Philippines

general assessment: good international radiotelephone and submarine cable services; domestic and inter-island service adequate

domestic: domestic satellite system with 11 earth stations

international: 9 international gateways; satellite earth stations - 3 Intelsat (1 Indian Ocean and 2 Pacific Ocean); submarine cables to Hong Kong, Guam, Singapore, Taiwan, and Japan

Pitcairn Islands

general assessment: only party line telephone

service is available for this small, closely related community

domestic: party line service only

international: radiotelephone

Poland

general assessment: underdeveloped and outmoded system in the process of being overhauled; partial privatization of the state-owned telephone monopoly is underway; the long waiting list for main line telephone service has resulted in a boom in mobile cellular telephone use

domestic: cable, open-wire, and microwave radio relay; 3 cellular networks; local exchanges 56.6% digital

international: satellite earth stations - 2 Intelsat, NA Eutelsat, 2 Inmarsat (Atlantic and Indian Ocean regions), and 1 Intersputnik (Atlantic Ocean region)

Portugal

general assessment: undergoing rapid development in recent years, Portugal's telephone system, by the end of 1998, achieved a state-of-the-art network with broadband, high-speed capabilities and a main line telephone density of 53%

domestic: integrated network of coaxial cables, open-wire, microwave radio relay, and domestic satellite earth stations

international: 6 submarine cables; satellite earth stations - 3 Intelsat (2 Atlantic Ocean and 1 Indian Ocean), NA Eutelsat; tropospheric scatter to Azores; note - an earth station for Inmarsat (Atlantic Ocean region) is planned

Puerto Rico

general assessment: modern system, integrated with that of the US by high-capacity submarine cable and Intelsat with high-speed data capability

domestic: digital telephone system; cellular telephone service

international: satellite earth station - 1 Intelsat; submarine cable to US

Qatar

general assessment: modern system centered in Doha

domestic: NA

international: tropospheric scatter to Bahrain; microwave radio relay to Saudi Arabia and UAE; submarine cable to Bahrain and UAE; satellite earth stations - 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean) and 1 Arabsat

Reunion

general assessment: adequate system; principal center is Saint-Denis

domestic: modern open-wire and microwave radio relay network

international: radiotelephone communication to Comoros, France, Madagascar; new microwave route to Mauritius; satellite earth station - 1 Intelsat (Indian Ocean)

Romania

general assessment: poor domestic service, but improving

domestic: 90% of telephone network is automatic; trunk network is mostly microwave radio relay, with some fiber-optic cable; about one-third of exchange capacity is digital; roughly 3,300 villages have no service

international: satellite earth station - 1 Intelsat; new digital, international, direct-dial exchanges operate in Bucharest; note - Romania is an active participant in several international telecommunication network projects (1999)

Russia

general assessment: the telephone system has undergone significant changes in the 1990s; there are more than 1,000 companies licensed to offer communication services; access to

digital lines has improved, particularly in urban centers; Internet and e-mail services are improving; Russia has made progress toward building the telecommunications infrastructure necessary for a market economy; however, a large demand for main line service remains unsatisfied

domestic: cross-country digital trunk lines run from Saint Petersburg to Khabarovsk, and from Moscow to Novorossiysk; the telephone systems in 60 regional capitals have modern digital infrastructures; cellular services, both analog and digital, are available in many areas; in rural areas, the telephone services are still outdated, inadequate, and low density

international: Russia is connected internationally by three undersea fiber-optic cables; digital switches in several cities provide more than 50,000 lines for international calls; satellite earth stations provide access to Intelsat, Intersputnik, Eutelsat, Inmarsat, and Orbita systems

Rwanda

general assessment: telephone system primarily serves business and government

domestic: the capital, Kigali, is connected to the centers of the prefectures by microwave radio relay and, recently, by cellular telephone service; much of the network depends on wire and HF radiotelephone

international: international connections employ microwave radio relay to neighboring countries and satellite communications to more distant countries; satellite earth stations - 1 Intelsat (Indian Ocean) in Kigali (includes telex and telefax service)

Saint Helena

general assessment: can communicate worldwide

domestic: automatic network

international: HF radiotelephone from Saint Helena to Ascensionm, which is a major coaxial submarine cable relay point between South Africa, Portugal, and UK; satellite earth stations - 2 Intelsat (Atlantic Ocean)

Saint Kitts and Nevis

general assessment: good interisland and international connections

domestic: inter island links to Antigua and Barbuda and Saint Martin (Guadeloupe and Netherlands Antilles) are handled by VHF/UHF/SHF radiotelephone

international: international calls are carried by radiotelephone to Antigua and Barbuda and switched there to submarine cable or to Intelsat; or carried to Saint Martin (Guadeloupe and Netherlands Antilles) by radiotelephone and switched to Intelsat

Saint Lucia

general assessment: adequate system

domestic: system is automatically switched

international: direct microwave radio relay link with Martinique and Saint Vincent and the Grenadines; tropospheric scatter to Barbados;

international calls beyond these countries are carried by Intelsat from Martinique

Saint Pierre and Miquelon

general assessment: adequate

domestic: NA

international: radiotelephone communication with most countries in the world; 1 earth station in French domestic satellite system

Saint Vincent and the Grenadines

general assessment: adequate system

domestic: islandwide, fully automatic telephone system; VHF/UHF radiotelephone from Saint Vincent to the other islands of the Grenadines

international: VHF/UHF radiotelephone from Saint Vincent to Barbados; new SHF radiotelephone to Grenada and to Saint Lucia; access to Intelsat earth station in Martinique through Saint Lucia

Samoa

general assessment: adequate

domestic: NA

international: satellite earth station - 1 Intelsat (Pacific Ocean)

San Marino

general assessment: adequate connections

domestic: automatic telephone system completely integrated into Italian system

international: connected to Italian international network

Sao Tome and Principe

general assessment: adequate facilities

domestic: minimal system

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Saudi Arabia

general assessment: modern system

domestic: extensive microwave radio relay, coaxial cable, and fiber-optic cable systems

international: microwave radio relay to Bahrain, Jordan, Kuwait, Qatar, UAE, Yemen, and Sudan; coaxial cable to Kuwait and Jordan; submarine cable to Djibouti, Egypt and Bahrain; satellite earth

stations - 5 Intelsat (3 Atlantic Ocean and 2 Indian Ocean), 1 Arabsat, and 1 Inmarsat (Indian Ocean region)

Senegal

general assessment: good system

domestic: above-average urban system; microwave radio relay, coaxial cable and fiber-optic cable in trunk system

international: 4 submarine cables; satellite earth station - 1 Intelsat (Atlantic Ocean)

Serbia and Montenegro

general assessment: NA

domestic: NA

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Seychelles

general assessment: effective system

domestic: radiotelephone communications between islands in the archipelago

international: direct radiotelephone communications with adjacent island countries and African coastal countries; satellite earth station - 1 Intelsat (Indian Ocean)

Sierra Leone

general assessment: marginal telephone and telegraph service

domestic: the national microwave radio relay trunk system connects Freetown to Bo and Kenema

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Singapore

general assessment: major consideration given to serving

business interests; excellent international service

domestic: excellent domestic facilities

international: submarine cables to Malaysia (Sabah and Peninsular Malaysia), Indonesia, and the Philippines; satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Pacific Ocean), and 1 Inmarsat (Pacific Ocean region)

Slovakia

general assessment: a modernization and privatization

program is increasing accessibility to telephone service, reducing the waiting time for new subscribers, and generally improving service quality

domestic: predominantly an analog system that is now receiving digital equipment and is being enlarged with fiber-optic cable, especially in the larger cities; mobile cellular capability has been added

international: three international exchanges (one in Bratislava and two in Banska Bystrica) are available; Slovakia is participating in several international telecommunications projects that will increase the availability of external services

Slovenia

general assessment: NA

domestic: 100% digital (2000)

international: NA

Solomon Islands

general assessment: NA

domestic: NA

international: satellite earth station - 1 Intelsat (Pacific Ocean)

Somalia

general assessment: the public telecommunications system was almost completely destroyed or dismantled by the civil war factions; private wireless companies offer service in most major cities and charge the lowest international rates on the continent
domestic: local cellular telephone systems have been established in Mogadishu and in several other population centers
international: international connections are available from Mogadishu by satellite

South Africa

general assessment: the system is the best developed and most modern in Africa
domestic: consists of carrier-equipped open-wire lines, coaxial cables, microwave radio relay links, fiber-optic cable, radiotelephone communication stations, and wireless local loops; key centers are Bloemfontein, Cape Town, Durban, Johannesburg, Port Elizabeth, and Pretoria
international: 2 submarine cables; satellite earth stations - 3 Intelsat (1 Indian Ocean and 2 Atlantic Ocean)

South Georgia and the South Sandwich Islands

general assessment: NA
domestic: NA
international: coastal radiotelephone station at Grytviken

Spain

general assessment: generally adequate, modern facilities; teledensity is 44 main lines for each 100 persons
domestic: NA
international: 22 coaxial submarine cables; satellite earth stations

- 2 Intelsat (1 Atlantic Ocean and 1 Indian Ocean), NA Eutelsat;
tropospheric scatter to adjacent countries

Sri Lanka

general assessment: very inadequate domestic service,
particularly in rural areas; likely improvement with privatization
of national telephone company and encouragement to private
investment; good international service (1999)
domestic: national trunk network consists mostly of digital
microwave radio relay; fiber-optic links now in use in Colombo area
and two fixed wireless local loops have been installed; competition
is strong in mobile cellular systems; telephone density remains low
at 2.6 main lines per 100 persons (1999)
international: submarine cables to Indonesia and Djibouti; satellite
earth stations - 2 Intelsat (Indian Ocean) (1999)

Sudan

general assessment: large, well-equipped system by regional
standards and being upgraded; cellular communications started in
1996 and have expanded substantially
domestic: consists of microwave radio relay, cable, radiotelephone
communications, tropospheric scatter, and a domestic satellite
system with 14 earth stations
international: satellite earth stations - 1 Intelsat (Atlantic
Ocean) and 1 Arabsat (2000)

Suriname

general assessment: international facilities are good
domestic: microwave radio relay network
international: satellite earth stations - 2 Intelsat (Atlantic Ocean)

Svalbard

general assessment: probably adequate

domestic: local telephone service

international: satellite earth station - 1 of unknown type (for communication with Norwegian mainland only)

Swaziland

general assessment: a somewhat modern but not an advanced system

domestic: system consists of carrier-equipped, open-wire lines and low-capacity, microwave radio relay

international: satellite earth station - 1 Intelsat (Atlantic Ocean)

Sweden

general assessment: excellent domestic and international facilities; automatic system

domestic: coaxial and multiconductor cables carry most of the voice traffic; parallel microwave radio relay systems carry some additional telephone channels

international: 5 submarine coaxial cables; satellite earth stations - 1 Intelsat (Atlantic Ocean), 1 Eutelsat, and 1 Inmarsat (Atlantic and Indian Ocean regions); note - Sweden shares the Inmarsat earth station with the other Nordic countries (Denmark, Finland, Iceland, and Norway)

Switzerland

general assessment: excellent domestic and international services

domestic: extensive cable and microwave radio relay networks

international: satellite earth stations - 2 Intelsat (Atlantic Ocean and Indian Ocean)

Syria

general assessment: fair system currently undergoing significant improvement and digital upgrades, including fiber-optic technology

domestic: coaxial cable and microwave radio relay network

international: satellite earth stations - 1 Intelsat (Indian Ocean) and 1 Intersputnik (Atlantic Ocean region); 1 submarine cable; coaxial cable and microwave radio relay to Iraq, Jordan, Lebanon, and Turkey; participant in Medarabtel

Taiwan

general assessment: provides telecommunications service for every business and private need

domestic: thoroughly modern; completely digitalized

international: satellite earth stations - 2 Intelsat (1 Pacific Ocean and 1 Indian Ocean); submarine cables to Japan (Okinawa), Philippines, Guam, Singapore, Hong Kong, Indonesia, Australia, Middle East, and Western Europe (1999)

Tajikistan

general assessment: poorly developed and not well

maintained; many towns are not reached by the national network

domestic: cable and microwave radio relay

international: linked by cable and microwave radio relay to other CIS republics and by leased connections to the Moscow international gateway switch; Dushanbe linked by Intelsat to international gateway switch in Ankara (Turkey); satellite earth stations - 1 Orbita and 2 Intelsat

Tanzania

general assessment: fair system operating below capacity

and being modernized for better service; VSAT (very small aperture terminal) system under construction

domestic: trunk service provided by open-wire, microwave radio relay, tropospheric scatter, and fiber-optic cable; some links being made digital

international: satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Atlantic Ocean)

Thailand

general assessment: service to general public adequate, but investment in technological upgrades reduced by recession; bulk of service to government activities provided by multichannel cable and microwave radio relay network

domestic: microwave radio relay and multichannel cable; domestic satellite system being developed

international: satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Pacific Ocean)

Togo

general assessment: fair system based on a network of microwave radio relay routes supplemented by open-wire lines and a mobile cellular system

domestic: microwave radio relay and open-wire lines for conventional system; cellular system has capacity of 10,000 telephones

international: satellite earth stations - 1 Intelsat (Atlantic Ocean) and 1 Symphonie

Tokelau

general assessment: adequate

domestic: radiotelephone service between islands

international: radiotelephone service to Samoa; government-regulated

telephone service (TeleTok), with 3 satellite earth stations, established in 1997

Tonga

general assessment: NA

domestic: NA

international: satellite earth station - 1 Intelsat (Pacific Ocean) (1996)

Trinidad and Tobago

general assessment: excellent international service; good local service

domestic: NA

international: satellite earth station - 1 Intelsat (Atlantic Ocean); tropospheric scatter to Barbados and Guyana

Tunisia

general assessment: above the African average and continuing to be upgraded; key centers are Sfax, Sousse, Bizerte, and Tunis; Internet access available

domestic: trunk facilities consist of open-wire lines, coaxial cable, and microwave radio relay

international: 5 submarine cables; satellite earth stations - 1 Intelsat (Atlantic Ocean) and 1 Arabsat; coaxial cable and microwave radio relay to Algeria and Libya; participant in Medarabtel; two international gateway digital switches

Turkey

general assessment: undergoing rapid modernization and expansion, especially with cellular telephones

domestic: additional digital exchanges are permitting a rapid increase in subscribers; the construction of a network of

technologically advanced intercity trunk lines, using both fiber-optic cable and digital microwave radio relay is facilitating communication between urban centers; remote areas are reached by a domestic satellite system; the number of subscribers to mobile cellular telephone service is growing rapidly
international: international service is provided by three submarine fiber-optic cables in the Mediterranean and Black Seas, linking Turkey with Italy, Greece, Israel, Bulgaria, Romania, and Russia; also by 12 Intelsat earth stations, and by 328 mobile satellite terminals in the Inmarsat and Eutelsat systems (2002)

Turkmenistan

general assessment: poorly developed

domestic: NA

international: linked by cable and microwave radio relay to other CIS republics and to other countries by leased connections to the Moscow international gateway switch; a new telephone link from Ashgabat to Iran has been established; a new exchange in Ashgabat switches international traffic through Turkey via Intelsat;
satellite earth stations - 1 Orbita and 1 Intelsat

Turks and Caicos Islands

general assessment: fair cable and radiotelephone services

domestic: NA

international: 2 submarine cables; satellite earth station - 1 Intelsat (Atlantic Ocean)

Tuvalu

general assessment: serves particular needs for internal communications

domestic: radiotelephone communications between islands

international: NA

Uganda

general assessment: seriously inadequate; two cellular systems have been introduced, but a sharp increase in the number of main lines is essential; e-mail and Internet services are available

domestic: intercity traffic by wire, microwave radio relay, and radiotelephone communication stations, fixed and mobile cellular systems for short-range traffic

international: satellite earth stations - 1 Intelsat (Atlantic Ocean) and 1 Inmarsat; analog links to Kenya and Tanzania

Ukraine

general assessment: Ukraine's telecommunication development plan, running through 2005, emphasizes improving domestic trunk lines, international connections, and the mobile cellular system

domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is now rising slowly and the domestic trunk system is being improved; the mobile cellular telephone system is expanding at a high rate

international: two new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and three Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project which connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems

United Arab Emirates

general assessment: modern system of microwave

radio relay and coaxial cable; key centers are Abu Dhabi and Dubai

domestic: microwave radio relay and coaxial cable

international: satellite earth stations - 3 Intelsat (1 Atlantic

Ocean and 2 Indian Ocean) and 1 Arabsat; submarine cables to Qatar,

Bahrain, India, and Pakistan; tropospheric scatter to Bahrain;

microwave radio relay to Saudi Arabia

United Kingdom

general assessment: technologically advanced domestic

and international system

domestic: equal mix of buried cables, microwave radio relay, and

fiber-optic systems

international: 40 coaxial submarine cables; satellite earth stations

- 10 Intelsat (7 Atlantic Ocean and 3 Indian Ocean), 1 Inmarsat

(Atlantic Ocean region), and 1 Eutelsat; at least 8 large

international switching centers

United States

general assessment: a very large, technologically

advanced, multipurpose communications system

domestic: a large system of fiber-optic cable, microwave radio

relay, coaxial cable, and domestic satellites carries every form of

telephone traffic; a rapidly growing cellular system carries mobile

telephone traffic throughout the country

international: 24 ocean cable systems in use; satellite earth

stations - 61 Intelsat (45 Atlantic Ocean and 16 Pacific Ocean), 5

Intersputnik (Atlantic Ocean region), and 4 Inmarsat (Pacific and

Atlantic Ocean regions) (2000)

Uruguay

general assessment: fully digitalized

domestic: most modern facilities concentrated in Montevideo; new

nationwide microwave radio relay network

international: satellite earth stations - 2 Intelsat (Atlantic Ocean) (2002)

Uzbekistan

general assessment: antiquated and inadequate; in serious need of modernization

domestic: the domestic telephone system is being expanded and technologically improved, particularly in Tashkent (Toshkent) and Samarqand, under contracts with prominent companies in industrialized countries; moreover, by 1998, six cellular networks had been placed in operation - four of the GSM type (Global System for Mobile Communication), one D-AMPS type (Digital Advanced Mobile Phone System), and one AMPS type (Advanced Mobile Phone System)

international: linked by landline or microwave radio relay with CIS member states and to other countries by leased connection via the Moscow international gateway switch; after the completion of the Uzbek link to the Trans-Asia-Europe (TAE) fiber-optic cable, Uzbekistan will be independent of Russian facilities for international communications; Inmarsat also provides an international connection, albeit an expensive one; satellite earth stations - NA (1998)

Vanuatu

general assessment: NA

domestic: NA

international: satellite earth station - 1 Intelsat (Pacific Ocean)

Venezuela

general assessment: modern and expanding

domestic: domestic satellite system with 3 earth stations; recent substantial improvement in telephone service in rural areas; substantial increase in digitalization of exchanges and trunk lines; installation of a national interurban fiber-optic network capable of digital multimedia services

international: 3 submarine coaxial cables; satellite earth stations - 1 Intelsat (Atlantic Ocean) and 1 PanAmSat; participating with Colombia, Ecuador, Peru, and Bolivia in the construction of an international fiber-optic network

Vietnam

general assessment: Vietnam is putting considerable effort into modernization and expansion of its telecommunication system, but its performance continues to lag behind that of its more modern neighbors

domestic: all provincial exchanges are digitalized and connected to Hanoi, Da Nang, and Ho Chi Minh City by fiber-optic cable or microwave radio relay networks; since 1991, main lines in use have been substantially increased and the use of mobile telephones is growing rapidly

international: satellite earth stations - 2 Intersputnik (Indian Ocean region)

Virgin Islands

general assessment: NA

domestic: modern, uses fiber-optic cable and microwave radio relay

international: submarine cable and satellite communications;

satellite earth stations - NA

Wake Island

general assessment: satellite communications; 1 DSN

circuit off the Overseas Telephone System (OTS)

domestic: NA

international: NA

Wallis and Futuna

general assessment: NA

domestic: NA

international: NA

West Bank

general assessment: NA

domestic: NA

international: NA

note: Israeli company BEZEK and the Palestinian company PALTEL are responsible for communication services in the West Bank

Western Sahara

general assessment: sparse and limited system

domestic: NA

international: tied into Morocco's system by microwave radio relay,

tropospheric scatter, and satellite; satellite earth stations - 2

Intelsat (Atlantic Ocean) linked to Rabat, Morocco

World

general assessment: NA

domestic: NA

international: NA

Yemen

general assessment: since unification in 1990, efforts have

been made to create a national telecommunications network
domestic: the national network consists of microwave radio relay, cable, tropospheric scatter, and GSM cellular mobile telephone systems

international: satellite earth stations - 3 Intelsat (2 Indian Ocean and 1 Atlantic Ocean), 1 Intersputnik (Atlantic Ocean region), and 2 Arabsat; microwave radio relay to Saudi Arabia and Djibouti

Zambia

general assessment: facilities are aging but still among the best in Sub-Saharan Africa

domestic: high-capacity microwave radio relay connects most larger towns and cities; several cellular telephone services in operation; Internet service is widely available; very small aperture terminal (VSAT) networks are operated by private firms

international: satellite earth stations - 2 Intelsat (1 Indian Ocean and 1 Atlantic Ocean)

Zimbabwe

general assessment: system was once one of the best in Africa, but now suffers from poor maintenance; more than 100,000 outstanding requests for connection despite an equally large number of installed but unused main lines

domestic: consists of microwave radio relay links, open-wire lines, radiotelephone communication stations, fixed wireless local loop installations, and a substantial mobile cellular network; Internet connection is available in Harare and planned for all major towns and for some of the smaller ones

international: satellite earth stations - 2 Intelsat; two international digital gateway exchanges (in Harare and Gweru)

=====

@2125 Terrain

Afghanistan

mostly rugged mountains; plains in north and southwest

Albania

mostly mountains and hills; small plains along coast

Algeria

mostly high plateau and desert; some mountains; narrow, discontinuous coastal plain

American Samoa

five volcanic islands with rugged peaks and limited coastal plains, two coral atolls (Rose Island, Swains Island)

Andorra

rugged mountains dissected by narrow valleys

Angola

narrow coastal plain rises abruptly to vast interior plateau

Anguilla

flat and low-lying island of coral and limestone

Antarctica

about 98% thick continental ice sheet and 2% barren rock, with average elevations between 2,000 and 4,000 meters; mountain ranges up to nearly 5,000 meters; ice-free coastal areas include parts of southern Victoria Land, Wilkes Land, the Antarctic Peninsula area, and parts of Ross Island on McMurdo Sound; glaciers form ice shelves along about half of the coastline, and floating ice shelves constitute 11% of the area of the continent

Antigua and Barbuda

mostly low-lying limestone and coral islands, with some higher volcanic areas

Arctic Ocean

central surface covered by a perennial drifting polar icepack that averages about 3 meters in thickness, although pressure ridges may be three times that size; clockwise drift pattern in the Beaufort Gyral Stream, but nearly straight-line movement from the New Siberian Islands (Russia) to Denmark Strait (between Greenland and Iceland); the icepack is surrounded by open seas during the summer, but more than doubles in size during the winter and extends to the encircling landmasses; the ocean floor is about 50% continental shelf (highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonosov Ridge)

Argentina

rich plains of the Pampas in northern half, flat to rolling plateau of Patagonia in south, rugged Andes along western border

Armenia

Armenian Highland with mountains; little forest land; fast flowing rivers; good soil in Aras River valley

Aruba

flat with a few hills; scant vegetation

Ashmore and Cartier Islands

low with sand and coral

Atlantic Ocean

surface usually covered with sea ice in Labrador Sea, Denmark Strait, and coastal portions of the Baltic Sea from October to June; clockwise warm-water gyre (broad, circular system of currents) in the northern Atlantic, counterclockwise warm-water gyre in the southern Atlantic; the ocean floor is dominated by the Mid-Atlantic Ridge, a rugged north-south centerline for the entire Atlantic basin

Australia

mostly low plateau with deserts; fertile plain in southeast

Austria

in the west and south mostly mountains (Alps); along the eastern and northern margins mostly flat or gently sloping

Azerbaijan

large, flat Kur-Araz Ovaligi (Kura-Araks Lowland) (much of it below sea level) with Great Caucasus Mountains to the north, Qarabag Yaylasi (Karabakh Upland) in west; Baku lies on Abseron Yasaqligi (Apsheron Peninsula) that juts into Caspian Sea

Bahamas, The

long, flat coral formations with some low rounded hills

Bahrain

mostly low desert plain rising gently to low central escarpment

Baker Island

low, nearly level coral island surrounded by a narrow fringing reef

Bangladesh

mostly flat alluvial plain; hilly in southeast

Barbados

relatively flat; rises gently to central highland region

Bassas da India

volcanic rock

Belarus

generally flat and contains much marshland

Belgium

flat coastal plains in northwest, central rolling hills, rugged mountains of Ardennes Forest in southeast

Belize

flat, swampy coastal plain; low mountains in south

Benin

mostly flat to undulating plain; some hills and low mountains

Bermuda

low hills separated by fertile depressions

Bhutan

mostly mountainous with some fertile valleys and savanna

Bolivia

rugged Andes Mountains with a highland plateau (Altiplano), hills, lowland plains of the Amazon Basin

Bosnia and Herzegovina

mountains and valleys

Botswana

predominantly flat to gently rolling tableland; Kalahari Desert in southwest

Bouvet Island

volcanic; coast is mostly inaccessible

Brazil

mostly flat to rolling lowlands in north; some plains, hills, mountains, and narrow coastal belt

British Indian Ocean Territory

flat and low (most areas do not exceed four meters in elevation)

British Virgin Islands

coral islands relatively flat; volcanic islands steep, hilly

Brunei

flat coastal plain rises to mountains in east; hilly lowland in west

Bulgaria

mostly mountains with lowlands in north and southeast

Burkina Faso

mostly flat to dissected, undulating plains; hills in west and southeast

Burma

central lowlands ringed by steep, rugged highlands

Burundi

hilly and mountainous, dropping to a plateau in east, some plains

Cambodia

mostly low, flat plains; mountains in southwest and north

Cameroon

diverse, with coastal plain in southwest, dissected plateau in center, mountains in west, plains in north

Canada

mostly plains with mountains in west and lowlands in southeast

Cape Verde

steep, rugged, rocky, volcanic

Cayman Islands

low-lying limestone base surrounded by coral reefs

Central African Republic

vast, flat to rolling, monotonous plateau;
scattered hills in northeast and southwest

Chad

broad, arid plains in center, desert in north, mountains in
northwest, lowlands in south

Chile

low coastal mountains; fertile central valley; rugged Andes in
east

China

mostly mountains, high plateaus, deserts in west; plains,
deltas, and hills in east

Christmas Island

steep cliffs along coast rise abruptly to central
plateau

Clipperton Island

coral atoll

Cocos (Keeling) Islands

flat, low-lying coral atolls

Colombia

flat coastal lowlands, central highlands, high Andes
Mountains, eastern lowland plains

Comoros

volcanic islands, interiors vary from steep mountains to low
hills

Congo, Democratic Republic of the
vast central basin is a low-lying
plateau; mountains in east

Congo, Republic of the
coastal plain, southern basin, central
plateau, northern basin

Cook Islands
low coral atolls in north; volcanic, hilly islands in
south

Coral Sea Islands
sand and coral reefs and islands (or cays)

Costa Rica
coastal plains separated by rugged mountains including
over 100 volcanic cones, of which several are major volcanoes

Cote d'Ivoire
mostly flat to undulating plains; mountains in
northwest

Croatia
geographically diverse; flat plains along Hungarian border,
low mountains and highlands near Adriatic coastline and islands

Cuba
mostly flat to rolling plains, with rugged hills and mountains
in the southeast

Cyprus
central plain with mountains to north and south; scattered

but significant plains along southern coast

Czech Republic

Bohemia in the west consists of rolling plains, hills, and plateaus surrounded by low mountains; Moravia in the east consists of very hilly country

Denmark

low and flat to gently rolling plains

Djibouti

coastal plain and plateau separated by central mountains

Dominica

rugged mountains of volcanic origin

Dominican Republic rugged highlands and mountains with fertile valleys interspersed

East Timor

mountainous

Ecuador

coastal plain (costa), inter-Andean central highlands (sierra), and flat to rolling eastern jungle (oriente)

Egypt

vast desert plateau interrupted by Nile valley and delta

El Salvador

mostly mountains with narrow coastal belt and central plateau

Equatorial Guinea

coastal plains rise to interior hills; islands are volcanic

Eritrea

dominated by extension of Ethiopian north-south trending highlands, descending on the east to a coastal desert plain, on the northwest to hilly terrain and on the southwest to flat-to-rolling plains

Estonia

marshy, lowlands; flat in the north, hilly in the south

Ethiopia

high plateau with central mountain range divided by Great Rift Valley

Europa Island

low and flat

Falkland Islands (Islas Malvinas)

rocky, hilly, mountainous with some boggy, undulating plains

Faroe Islands

rugged, rocky, some low peaks; cliffs along most of coast

Fiji

mostly mountains of volcanic origin

Finland

mostly low, flat to rolling plains interspersed with lakes

and low hills

France

mostly flat plains or gently rolling hills in north and west;
remainder is mountainous, especially Pyrenees in south, Alps in east

French Guiana

low-lying coastal plains rising to hills and small
mountains

French Polynesia

mixture of rugged high islands and low islands with
reefs

French Southern and Antarctic Lands

volcanic

Gabon

narrow coastal plain; hilly interior; savanna in east and south

Gambia, The

flood plain of the Gambia River flanked by some low hills

Gaza Strip

flat to rolling, sand- and dune-covered coastal plain

Georgia

largely mountainous with Great Caucasus Mountains in the
north and Lesser Caucasus Mountains in the south; Kolkhet's Dablobi
(Kolkhida Lowland) opens to the Black Sea in the west; Mtkvari River
Basin in the east; good soils in river valley flood plains,
foothills of Kolkhida Lowland

Germany

lowlands in north, uplands in center, Bavarian Alps in south

Ghana

mostly low plains with dissected plateau in south-central area

Gibraltar

a narrow coastal lowland borders the Rock of Gibraltar

Glorioso Islands

low and flat

Greece

mostly mountains with ranges extending into the sea as peninsulas or chains of islands

Greenland

flat to gradually sloping icecap covers all but a narrow, mountainous, barren, rocky coast

Grenada

volcanic in origin with central mountains

Guadeloupe

Basse-Terre is volcanic in origin with interior mountains; Grande-Terre is low limestone formation; most of the seven other islands are volcanic in origin

Guam

volcanic origin, surrounded by coral reefs; relatively flat coralline limestone plateau (source of most fresh water), with steep coastal cliffs and narrow coastal plains in north, low hills in center, mountains in south

Guatemala

mostly mountains with narrow coastal plains and rolling limestone plateau (Peten)

Guernsey

mostly level with low hills in southwest

Guinea

generally flat coastal plain, hilly to mountainous interior

Guinea-Bissau

mostly low coastal plain rising to savanna in east

Guyana

mostly rolling highlands; low coastal plain; savanna in south

Haiti

mostly rough and mountainous

Heard Island and McDonald Islands Heard Island - 80% ice-covered, bleak and mountainous, dominated by a large massif (Big Ben) and an active volcano (Mawson Peak); McDonald Islands - small and rocky

Holy See (Vatican City)

low hill

Honduras

mostly mountains in interior, narrow coastal plains

Hong Kong

hilly to mountainous with steep slopes; lowlands in north

Howland Island

low-lying, nearly level, sandy, coral island
surrounded by a narrow fringing reef; depressed central area

Hungary

mostly flat to rolling plains; hills and low mountains on
the Slovakian border

Iceland

mostly plateau interspersed with mountain peaks, icefields;
coast deeply indented by bays and fiords

India

upland plain (Deccan Plateau) in south, flat to rolling plain
along the Ganges, deserts in west, Himalayas in north

Indian Ocean

surface dominated by counterclockwise gyre (broad,
circular system of currents) in the southern Indian Ocean; unique
reversal of surface currents in the northern Indian Ocean; low
atmospheric pressure over southwest Asia from hot, rising, summer
air results in the southwest monsoon and southwest-to-northeast
winds and currents, while high pressure over northern Asia from
cold, falling, winter air results in the northeast monsoon and
northeast-to-southwest winds and currents; ocean floor is dominated
by the Mid-Indian Ocean Ridge and subdivided by the Southeast Indian
Ocean Ridge, Southwest Indian Ocean Ridge, and Ninetyeast Ridge

Indonesia

mostly coastal lowlands; larger islands have interior
mountains

Iran

rugged, mountainous rim; high, central basin with deserts, mountains; small, discontinuous plains along both coasts

Iraq

mostly broad plains; reedy marshes along Iranian border in south with large flooded areas; mountains along borders with Iran and Turkey

Ireland

mostly level to rolling interior plain surrounded by rugged hills and low mountains; sea cliffs on west coast

Israel

Negev desert in the south; low coastal plain; central mountains; Jordan Rift Valley

Italy

mostly rugged and mountainous; some plains, coastal lowlands

Jamaica

mostly mountains, with narrow, discontinuous coastal plain

Jan Mayen

volcanic island, partly covered by glaciers

Japan

mostly rugged and mountainous

Jarvis Island

sandy, coral island surrounded by a narrow fringing reef

Jersey

gently rolling plain with low, rugged hills along north coast

Johnston Atoll

mostly flat

Jordan

mostly desert plateau in east, highland area in west; Great Rift Valley separates East and West Banks of the Jordan River

Juan de Nova Island

low and flat

Kazakhstan

extends from the Volga to the Altai Mountains and from the plains in western Siberia to oases and desert in Central Asia

Kenya

low plains rise to central highlands bisected by Great Rift Valley; fertile plateau in west

Kingman Reef

low and nearly level

Kiribati

mostly low-lying coral atolls surrounded by extensive reefs

Korea, North

mostly hills and mountains separated by deep, narrow valleys; coastal plains wide in west, discontinuous in east

Korea, South

mostly hills and mountains; wide coastal plains in west

and south

Kuwait

flat to slightly undulating desert plain

Kyrgyzstan

peaks of Tien Shan and associated valleys and basins
encompass entire nation

Laos

mostly rugged mountains; some plains and plateaus

Latvia

low plain

Lebanon

narrow coastal plain; El Beqaa (Bekaa Valley) separates
Lebanon and Anti-Lebanon Mountains

Lesotho

mostly highland with plateaus, hills, and mountains

Liberia

mostly flat to rolling coastal plains rising to rolling
plateau and low mountains in northeast

Libya

mostly barren, flat to undulating plains, plateaus, depressions

Liechtenstein

mostly mountainous (Alps) with Rhine Valley in western
third

Lithuania

lowland, many scattered small lakes, fertile soil

Luxembourg

mostly gently rolling uplands with broad, shallow valleys; uplands to slightly mountainous in the north; steep slope down to Moselle flood plain in the southeast

Macau

generally flat

Macedonia, The Former Yugoslav Republic of mountainous territory covered with deep basins and valleys; three large lakes, each divided by a frontier line; country bisected by the Vardar River

Madagascar

narrow coastal plain, high plateau and mountains in center

Malawi

narrow elongated plateau with rolling plains, rounded hills, some mountains

Malaysia

coastal plains rising to hills and mountains

Maldives

flat, with white sandy beaches

Mali

mostly flat to rolling northern plains covered by sand; savanna in south, rugged hills in northeast

Malta

mostly low, rocky, flat to dissected plains; many coastal cliffs

Man, Isle of

hills in north and south bisected by central valley

Marshall Islands

low coral limestone and sand islands

Martinique

mountainous with indented coastline; dormant volcano

Mauritania

mostly barren, flat plains of the Sahara; some central hills

Mauritius

small coastal plain rising to discontinuous mountains encircling central plateau

Mayotte

generally undulating, with deep ravines and ancient volcanic peaks

Mexico

high, rugged mountains; low coastal plains; high plateaus; desert

Micronesia, Federated States of islands vary geologically from high mountainous islands to low, coral atolls; volcanic outcroppings on Pohnpei, Kosrae, and Chuuk

Midway Islands

low, nearly level

Moldova

rolling steppe, gradual slope south to Black Sea

Monaco

hilly, rugged, rocky

Mongolia

vast semidesert and desert plains, grassy steppe, mountains in west and southwest; Gobi Desert in south-central

Montserrat

volcanic island, mostly mountainous, with small coastal lowland

Morocco

northern coast and interior are mountainous with large areas of bordering plateaus, intermontane valleys, and rich coastal plains

Mozambique

mostly coastal lowlands, uplands in center, high plateaus in northwest, mountains in west

Namibia

mostly high plateau; Namib Desert along coast; Kalahari Desert in east

Nauru

sandy beach rises to fertile ring around raised coral reefs with phosphate plateau in center

Navassa Island

raised coral and limestone plateau, flat to undulating; ringed by vertical white cliffs (9 to 15 m high)

Nepal

Terai or flat river plain of the Ganges in south, central hill region, rugged Himalayas in north

Netherlands

mostly coastal lowland and reclaimed land (polders); some hills in southeast

Netherlands Antilles

generally hilly, volcanic interiors

New Caledonia

coastal plains with interior mountains

New Zealand

predominately mountainous with some large coastal plains

Nicaragua

extensive Atlantic coastal plains rising to central interior mountains; narrow Pacific coastal plain interrupted by volcanoes

Niger

predominately desert plains and sand dunes; flat to rolling plains in south; hills in north

Nigeria

southern lowlands merge into central hills and plateaus; mountains in southeast, plains in north

Niue

steep limestone cliffs along coast, central plateau

Norfolk Island

volcanic formation with mostly rolling plains

Northern Mariana Islands

southern islands are limestone with level terraces and fringing coral reefs; northern islands are volcanic

Norway

glaciated; mostly high plateaus and rugged mountains broken by fertile valleys; small, scattered plains; coastline deeply indented by fjords; arctic tundra in north

Oman

central desert plain, rugged mountains in north and south

Pacific Ocean

surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Pakistan

flat Indus plain in east; mountains in north and northwest; Balochistan plateau in west

Palau

varying geologically from the high, mountainous main island of Babelthuap to low, coral islands usually fringed by large barrier reefs

Palmyra Atoll

very low

Panama

interior mostly steep, rugged mountains and dissected, upland plains; coastal areas largely plains and rolling hills

Papua New Guinea

mostly mountains with coastal lowlands and rolling foothills

Paracel Islands

mostly low and flat

Paraguay

grassy plains and wooded hills east of Rio Paraguay; Gran Chaco region west of Rio Paraguay mostly low, marshy plain near the river, and dry forest and thorny scrub elsewhere

Peru

western coastal plain (costa), high and rugged Andes in center (sierra), eastern lowland jungle of Amazon Basin (selva)

Philippines

mostly mountains with narrow to extensive coastal lowlands

Pitcairn Islands

rugged volcanic formation; rocky coastline with cliffs

Poland

mostly flat plain; mountains along southern border

Portugal

mountainous north of the Tagus River, rolling plains in south

Puerto Rico

mostly mountains, with coastal plain belt in north; mountains precipitous to sea on west coast; sandy beaches along most coastal areas

Qatar

mostly flat and barren desert covered with loose sand and gravel

Reunion

mostly rugged and mountainous; fertile lowlands along coast

Romania

central Transylvanian Basin is separated from the Plain of Moldavia on the east by the Carpathian Mountains and separated from the Walachian Plain on the south by the Transylvanian Alps

Russia

broad plain with low hills west of Urals; vast coniferous forest and tundra in Siberia; uplands and mountains along southern border regions

Rwanda

mostly grassy uplands and hills; relief is mountainous with altitude declining from west to east

Saint Helena

Saint Helena - rugged, volcanic; small scattered plateaus and plains

note: the other islands of the group have a volcanic origin

Saint Kitts and Nevis

volcanic with mountainous interiors

Saint Lucia

volcanic and mountainous with some broad, fertile valleys

Saint Pierre and Miquelon

mostly barren rock

Saint Vincent and the Grenadines

volcanic, mountainous

Samoa

narrow coastal plain with volcanic, rocky, rugged mountains in interior

San Marino

rugged mountains

Sao Tome and Principe

volcanic, mountainous

Saudi Arabia

mostly uninhabited, sandy desert

Senegal

generally low, rolling, plains rising to foothills in southeast

Serbia and Montenegro

extremely varied; to the north, rich fertile plains; to the east, limestone ranges and basins; to the southeast, ancient mountains and hills; to the southwest, extremely high shoreline with no islands off the coast

Seychelles

Mahe Group is granitic, narrow coastal strip, rocky, hilly; others are coral, flat, elevated reefs

Sierra Leone

coastal belt of mangrove swamps, wooded hill country, upland plateau, mountains in east

Singapore

lowland; gently undulating central plateau contains water catchment area and nature preserve

Slovakia

rugged mountains in the central and northern part and lowlands in the south

Slovenia

a short coastal strip on the Adriatic, an alpine mountain region adjacent to Italy and Austria, mixed mountains and valleys with numerous rivers to the east

Solomon Islands

mostly rugged mountains with some low coral atolls

Somalia

mostly flat to undulating plateau rising to hills in north

South Africa

vast interior plateau rimmed by rugged hills and narrow coastal plain

South Georgia and the South Sandwich Islands

most of the islands,

rising steeply from the sea, are rugged and mountainous; South Georgia is largely barren and has steep, glacier-covered mountains; the South Sandwich Islands are of volcanic origin with some active volcanoes

Southern Ocean

the Southern Ocean is deep, 4,000 to 5,000 meters over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 meters (the global mean is 133 meters); the Antarctic icepack grows from an average minimum of 2.6 million square kilometers in March to about 18.8 million square kilometers in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second - 100 times the flow of all the world's rivers

Spain

large, flat to dissected plateau surrounded by rugged hills;

Pyrenees in north

Spratly Islands
flat

Sri Lanka
mostly low, flat to rolling plain; mountains in
south-central interior

Sudan
generally flat, featureless plain; mountains in far south,
northeast and west; desert dominates the north

Suriname
mostly rolling hills; narrow coastal plain with swamps

Svalbard
wild, rugged mountains; much of high land ice covered; west
coast clear of ice about one-half of the year; fjords along west and
north coasts

Swaziland
mostly mountains and hills; some moderately sloping plains

Sweden
mostly flat or gently rolling lowlands; mountains in west

Switzerland
mostly mountains (Alps in south, Jura in northwest) with
a central plateau of rolling hills, plains, and large lakes

Syria
primarily semiarid and desert plateau; narrow coastal plain;

mountains in west

Taiwan

eastern two-thirds mostly rugged mountains; flat to gently rolling plains in west

Tajikistan

Pamir and Alay Mountains dominate landscape; western Fergana Valley in north, Kofarnihon and Vakhsh Valleys in southwest

Tanzania

plains along coast; central plateau; highlands in north, south

Thailand

central plain; Khorat Plateau in the east; mountains elsewhere

Togo

gently rolling savanna in north; central hills; southern plateau; low coastal plain with extensive lagoons and marshes

Tokelau

low-lying coral atolls enclosing large lagoons

Tonga

most islands have limestone base formed from uplifted coral formation; others have limestone overlying volcanic base

Trinidad and Tobago

mostly plains with some hills and low mountains

Tromelin Island

low, flat, and sandy; likely volcanic

Tunisia

mountains in north; hot, dry central plain; semiarid south merges into the Sahara

Turkey

high central plateau (Anatolia); narrow coastal plain; several mountain ranges

Turkmenistan

flat-to-rolling sandy desert with dunes rising to mountains in the south; low mountains along border with Iran; borders Caspian Sea in west

Turks and Caicos Islands low, flat limestone; extensive marshes and mangrove swamps

Tuvalu

very low-lying and narrow coral atolls

Uganda

mostly plateau with rim of mountains

Ukraine

most of Ukraine consists of fertile plains (steppes) and plateaus, mountains being found only in the west (the Carpathians), and in the Crimean Peninsula in the extreme south

mostly rugged hills and low mountains; level to rolling plains in east and southeast

United States

vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Uruguay

mostly rolling plains and low hills; fertile coastal lowland

Uzbekistan

mostly flat-to-rolling sandy desert with dunes; broad, flat intensely irrigated river valleys along course of Amu Darya, Syr Darya (Sirdaryo), and Zarafshon; Fergana Valley in east surrounded by mountainous Tajikistan and Kyrgyzstan; shrinking Aral Sea in west

Vanuatu

mostly mountains of volcanic origin; narrow coastal plains

Venezuela

Andes Mountains and Maracaibo Lowlands in northwest; central plains (llanos); Guiana Highlands in southeast

Vietnam

low, flat delta in south and north; central highlands; hilly, mountainous in far north and northwest

Virgin Islands

mostly hilly to rugged and mountainous with little

level land

Wake Island

atoll of three coral islands built up on an underwater volcano; central lagoon is former crater, islands are part of the rim

Wallis and Futuna

volcanic origin; low hills

West Bank

mostly rugged dissected upland, some vegetation in west, but barren in east

Western Sahara

mostly low, flat desert with large areas of rocky or sandy surfaces rising to small mountains in south and northeast

World

the greatest ocean depth is the Mariana Trench at 10,924 m in the Pacific Ocean

Yemen

narrow coastal plain backed by flat-topped hills and rugged mountains; dissected upland desert plains in center slope into the desert interior of the Arabian Peninsula

Zambia

mostly high plateau with some hills and mountains

Zimbabwe

mostly high plateau with higher central plateau (high veld); mountains in east

Antarctica Antarctic Treaty Summary - the Antarctic Treaty, signed on 1 December 1959 and entered into force on 23 June 1961, establishes the legal framework for the management of Antarctica. The 24th Antarctic Treaty Consultative Meeting was held in Russia in July 2001. At the end of 2001, there were 45 treaty member nations: 27 consultative and 18 non-consultative. Consultative (voting) members include the seven nations that claim portions of Antarctica as national territory (some claims overlap) and 20 nonclaimant nations. The US and Russia have reserved the right to make claims. The US does not recognize the claims of others. Antarctica is administered through meetings of the consultative member nations. Decisions from these meetings are carried out by these member nations (within their areas) in accordance with their own national laws. The year in parentheses indicates when an acceding nation was voted to full consultative (voting) status, while no date indicates the country was an original 1959 treaty signatory. Claimant nations are - Argentina, Australia, Chile, France, New Zealand, Norway, and the UK. Nonclaimant consultative nations are - Belgium, Brazil (1983), Bulgaria (1998) China (1985), Ecuador (1990), Finland (1989), Germany (1981), India (1983),

Italy (1987), Japan, South Korea (1989), Netherlands (1990), Peru (1989), Poland (1977), Russia, South Africa, Spain (1988), Sweden (1988), Uruguay (1985), and the US. Non-consultative (nonvoting) members, with year of accession in parentheses, are - Austria (1987), Canada (1988), Colombia (1989), Cuba (1984), Czech Republic (1993), Denmark (1965), Estonia (2001), Greece (1987), Guatemala (1991), Hungary (1984), North Korea (1987), Papua New Guinea (1981), Romania (1971), Slovakia (1993), Switzerland (1990), Turkey (1995), Ukraine (1992), and Venezuela (1999). Article 1 - area to be used for peaceful purposes only; military activity, such as weapons testing, is prohibited, but military personnel and equipment may be used for scientific research or any other peaceful purpose; Article 2 - freedom of scientific investigation and cooperation shall continue; Article 3 - free exchange of information and personnel, cooperation with the UN and other international agencies; Article 4 - does not recognize, dispute, or establish territorial claims and no new claims shall be asserted while the treaty is in force; Article 5 - prohibits nuclear explosions or disposal of radioactive wastes; Article 6 - includes under the treaty all land and ice shelves south of 60 degrees 00 minutes south and reserves high seas rights; Article 7 - treaty-state observers have free access, including aerial observation, to any area and may inspect all stations, installations, and equipment; advance notice of all expeditions and of the introduction of military personnel must be given; Article 8 - allows for jurisdiction over observers and scientists by their own states; Article 9 - frequent consultative meetings take place among member nations; Article 10 - treaty states will discourage activities by any country in Antarctica that are contrary to the treaty; Article 11 - disputes to be settled peacefully by the parties concerned or, ultimately, by the ICJ; Articles 12, 13, 14 - deal with upholding, interpreting, and amending the treaty among involved nations. Other agreements - some 200 recommendations adopted at treaty consultative meetings and ratified by governments include - Agreed

Measures for Fauna and Flora (1964) which were later incorporated into the Environmental Protocol; Convention for the Conservation of Antarctic Seals (1972); Convention on the Conservation of Antarctic Marine Living Resources (1980); a mineral resources agreement was signed in 1988 but remains unratified; the Protocol on Environmental Protection to the Antarctic Treaty was signed 4 October 1991 and entered into force 14 January 1998; this agreement provides for the protection of the Antarctic environment through five specific annexes: 1) marine pollution, 2) fauna and flora, 3) environmental impact assessments, 4) waste management, and 5) protected area management; it prohibits all activities relating to mineral resources except scientific research.

(SADR), led by President Mohamed ABDELAZIZ; territory partitioned
between Morocco and Mauritania in April 1976, with Morocco acquiring
northern two-thirds; Mauritania, under pressure from Polisario
guerrillas, abandoned all claims to its portion in August 1979;

Morocco moved to occupy that sector shortly thereafter and has since asserted administrative control; the Polisario's government-in-exile was seated as an OAU member in 1984; guerrilla activities continued sporadically, until a UN-monitored cease-fire was implemented 6 September 1991

@2140 Government - note

Bosnia and Herzegovina

The Dayton Agreement, signed in Paris on 14 December 1995, retained Bosnia and Herzegovina's exterior border and created a joint multi-ethnic and democratic government. This national government - based on proportional representation similar to that which existed in the former socialist regime - is charged

with conducting foreign, economic, and fiscal policy. The Dayton Agreement also recognized a second tier of government, comprised of two entities - a joint Bosniak/Croat Federation of Bosnia and Herzegovina and the Bosnian Serb Republika Srpska (RS) - each presiding over roughly one-half the territory. The Federation and RS governments are charged with overseeing internal functions. The Bosniak/Croat Federation is further divided into 10 cantons. The Dayton Agreement established the Office of the High Representative (OHR) to oversee the implementation of the civilian aspects of the agreement.

Malawi

Air Pollution-Volatile Organic Compounds

see Protocol to the 1979 Convention on Long-Range Transboundary Air Pollution Concerning the Control of Emissions of Volatile Organic Compounds or Their Transboundary Fluxes

Antarctic-Environmental Protocol

see Protocol on Environmental Protection to the Antarctic Treaty

Antarctic Treaty

opened for signature - 1 December 1959

entered into force - 23 June 1961

objective - to ensure that Antarctica is used for peaceful purposes only (such as international cooperation in scientific research); to defer the question of territorial claims asserted by some nations and not recognized by others; to provide an international forum for management of the region; applies to land and ice shelves south of 60 degrees South latitude

parties - (45) Argentina, Australia, Austria, Belgium, Brazil, Bulgaria, Canada, Chile, China, Colombia, Cuba, Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Germany, Greece, Guatemala, Hungary, India, Italy, Japan, North Korea, South Korea, Netherlands,

NZ, Norway, Papua New Guinea, Peru, Poland, Romania, Russia, Slovakia, South Africa, Spain, Sweden, Switzerland, Turkey, Ukraine, UK, US, Uruguay, Venezuela

Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal

note - abbreviated as Hazardous Wastes

opened for signature - 22 March 1989

entered into force - 5 May 1992

objective - to reduce transboundary movements of wastes subject to the Convention to a minimum consistent with the environmentally sound and efficient management of such wastes; to minimize the amount and toxicity of wastes generated and ensure their environmentally sound management as closely as possible to the source of generation; and to assist LDCs in environmentally sound management of the hazardous and other wastes they generate

Appendix D - Cross-Reference List of Country Data Codes

FIPS 10-4: Countries, Dependencies, Areas of Special Sovereignty, and Their Principal Administrative Divisions (FIPS PUB 10-4) is maintained by the Office of the Geographer and Global Issues (Department of State) and published by the National Institute of Standards and Technology (Department of Commerce). FIPS 10-4 codes are intended for general use throughout the US Government, especially in activities associated with the mission of the Department of State and national defense programs.

ISO 3166:Codes for the Representation of Names of Countries (ISO 3166) is prepared by the International Organization for Standardization. ISO 3166 includes two- and three-character alphabetic codes and three-digit numeric codes that may be needed for activities involving exchange of data with international organizations that have adopted that standard. Except for the numeric codes, ISO 3166 codes have been adopted in the US as FIPS 104-1: American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange.

Internet: The Internet country code is the two-letter digraph maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

The US Government has not yet adopted a standard for hydrographic codes similar to the Federal Information Processing Standards (FIPS) 10-4 country codes. The names and limits of the following oceans and seas are not always directly comparable because of differences in the customers, needs, and requirements of the individual organizations. Even the number of principal water bodies varies from organization to organization. Factbook users, for example, find the Atlantic Ocean and Pacific Ocean entries useful, but none of the following standards include those oceans in their entirety. Nor is there any provision for combining codes or overcodes to aggregate water bodies. The recently delimited Southern Ocean is not included.

*** END OF THE PROJECT GUTENBERG EBOOK THE 2003 CIA
WORLD FACTBOOK ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, “Information about donations to the Project Gutenberg Literary Archive Foundation.”
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project

Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund.

If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you ‘AS-IS’, WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
