Transnational Issues Lithuania

Disputes - international:

in May 2003, the Russian Parliament ratified a 1997 land and maritime boundary treaty with Lithuania, which had ratified the treaty in 1999, legalizing limits of former Soviet republic borders; the Latvian Parliament has not ratified its 1998 maritime boundary treaty with Lithuania, primarily due to concerns over oil exploration rights; discussions are still ongoing among Russia, Lithuania, and the EU concerning a simplified transit document for

residents of the Kaliningrad coastal exclave to transit through Lithuania to Russia

Illicit drugs:

transshipment point for opiates and other illicit drugs from Southwest Asia, Latin America, and Western Europe to Western Europe and Scandinavia; limited production of methamphetamine and ecstasy; susceptible to money laundering despite changes to banking legislation

Introduction Luxembourg

Background:

Founded in 963, Luxembourg became a grand duchy in 1815 and an independent state under the Netherlands. It lost more than half of its territory to Belgium in 1839, but gained a larger measure of autonomy. Full independence was attained in 1867. Overrun by Germany in both World Wars, it ended its neutrality in 1948 when it entered into the Benelux Customs Union and when it joined NATO the following

year. In 1957, Luxembourg became one of the six founding countries of the European Economic Community (later the European Union) and in 1999 it joined the euro currency area.

Economy Luxembourg

Economy - overview:

This stable, high-income economy features solid growth, low inflation, and low unemployment. The industrial sector, initially dominated by steel, has become increasingly diversified to include chemicals, rubber, and other products. Growth in the financial sector, which now accounts for about 22% of GDP, has more than compensated for the decline in steel. Most banks are foreign-owned and have extensive foreign dealings. Agriculture is based on small family-owned farms. The economy depends on foreign and trans-border workers for more than 30% of its labor force. Although Luxembourg, like all EU members, has suffered from the global economic slump, the country has maintained a fairly strong growth rate and enjoys an extraordinarily high standard of living.

Introduction Macau

Background:

Colonized by the Portuguese in the 16th century, Macau was the first European settlement in the Far East. Pursuant to an agreement signed by China and Portugal on 13 April 1987, Macau became the Macau Special Administrative Region (SAR) of China on 20 December 1999. China has promised that, under its "one country, two systems" formula, China's socialist economic system will not be practiced in Macau and that Macau will enjoy a high degree of autonomy in all matters except foreign and defense affairs for the next 50 years.

Economy Macau

Economy - overview:

Macau's economy four years after reversion to China remains one of the most open in the world. The territory's net exports of goods and services account for 39% of GDP with tourism and apparel exports as the mainstays. Although the territory was hit hard by the 1998 Asian financial crisis and the global downturn in 2001, its economy grew an estimated 9.5% in 2002. A rapid rise in the number of mainland

visitors because of China's easing of restrictions on travel drove the recovery. The budget also returned to surplus in 2002 because of the surge in visitors from China and a hike in taxes on gambling profits, which generated about 63% of government revenue. The liberalization of Macao's gambling monopoly may contribute to GDP growth, as the three companies awarded gambling licenses have pledged to invest \$2.2 billion - roughly 33% of GDP - in the territory. Much of Macau's textile industry may move to the mainland as the Multi-Fiber Agreement is phased out. The territory may have to rely more on gambling and trade-related services to generate growth. Growth fell to 4% in 2003, according to early government forecasts, with the drop in large measure due to concerns over the Severe Acute Respiratory Syndrome (SARS).

@Macedonia, The Former Yugoslav Republic

Introduction Macedonia, The Former Yugoslav Republic of

Background:

International recognition of The Former Yugoslav Republic of Macedonia's (F.Y.R.O.M.) independence from Yugoslavia in 1991 was delayed by Greece's objection to the new state's use of what it considered a Hellenic name and symbols. Greece finally lifted its trade blockade in 1995, and the two countries agreed to normalize relations, despite continued disagreement over F.Y.R.O.M.'s use of "Macedonia." F.Y.R.O.M.'s large Albanian minority, an ethnic

Albanian armed insurgency in F.Y.R.O.M. in 2001, and the status of neighboring Kosovo continue to be sources of ethnic tension.

Economy Macedonia, The Former Yugoslav Republic of

Economy - overview:

At independence in November 1991, Macedonia was the least developed of the Yugoslav republics, producing a mere 5% of the total federal output of goods and services. The collapse of Yugoslavia ended transfer payments from the center and eliminated advantages from inclusion in a de facto free trade area. An absence of infrastructure, UN sanctions on Yugoslavia, one of its largest markets, and a Greek economic embargo over a dispute about the country's constitutional name and flag hindered economic growth until 1996. GDP subsequently rose each year through 2000. However, the leadership's commitment to economic reform, free trade, and regional integration was undermined by the ethnic Albanian insurgency of 2001. The economy shrank 4.5% because of decreased trade, intermittent border closures, increased deficit spending on security needs, and investor uncertainty. Growth barely recovered in 2002 to 0.3%, then rose to 2.8% in 2003. Unemployment at one-third of the workforce remains the most critical economic problem. But even this issue is overshadowed by the fragile political situation.

ethnic Albanians in F.Y.R.O.M. while continuing to seek regional cooperation; ethnic Albanians in Kosovo continue to protest 2000 F.Y.R.O.M.-Serbia and Montenegro boundary treaty, which transfers small tracts of land to F.Y.R.O.M.; dispute with Greece over country's name persists

Illicit drugs:

major transshipment point for Southwest Asian heroin and hashish; minor transit point for South American cocaine destined for Europe; while money laundering is a problem on a local level due to organized crime activities, the lack of a well-developed financial infrastructure limits the country's utility as a money-laundering center

Introduction Madagascar

Background:

Formerly an independent kingdom, Madagascar became a French colony in 1886, but regained its independence in 1960. During 1992-93, free

presidential and National Assembly elections were held, ending 17 years of single-party rule. In 1997, in the second presidential race, Didier RATSIRAKA, the leader during the 1970s and 1980s, was returned to the presidency. The 2001 presidential election was contested between the followers of Didier RATSIRAKA and Marc RAVALOMANANA, nearly causing secession of half of the country. In April 2002, the High Constitutional Court announced RAVALOMANANA the winner.

Economy Madagascar

Economy - overview:

Having discarded past socialist economic policies, Madagascar has since the mid 1990s followed a World Bank and IMF led policy of privatization and liberalization, which has placed the country on a slow and steady growth path. Agriculture, including fishing and forestry, is a mainstay of the economy, accounting for one-fourth of GDP and employing four-fifths of the population. Export earnings primarily are earned in the small industrial sector, which features textile manufacturing and agriculture processing. Deforestation and erosion, aggravated by the use of firewood as the primary source of fuel are serious concerns. The separatist political crisis of 2002 undermined macroeconomic stability, with the estimated drop in output being subject to a wide margin of error. Poverty reduction will be the centerpiece of economic policy for the next few years.

Introduction Malawi

Background:

Established in 1891, the British protectorate of Nyasaland became the independent nation of Malawi in 1964. After three decades of one-party rule, the country held multiparty elections in 1994 under a provisional constitution, which took full effect the following year. National multiparty elections were held again in 1999.

Economy Malawi

Economy - overview:

Landlocked Malawi ranks among the world's least developed countries. The economy is predominately agricultural, with about 90% of the population living in rural areas. Agriculture accounted for nearly 40% of GDP and 88% of export revenues in 2001. The economy depends on substantial inflows of economic assistance from the IMF, the World Bank, and individual donor nations. In late 2000, Malawi was approved for relief under the Heavily Indebted Poor Countries (HIPC) program. In November 2002 the World Bank approved a \$50 million drought recovery package, which is to be used for famine relief. The government faces strong challenges, e.g., to fully develop a market economy, to improve educational facilities, to face up to environmental problems, to deal with the rapidly growing problem of HIV/AIDS, and to satisfy foreign donors that fiscal discipline is being tightened. The performance of the tobacco sector is key to short-term growth as tobacco accounts for over 50% of exports.

Economy Malaysia

Economy - overview:

Malaysia, a middle-income country, transformed itself from 1971 through the late 1990s from a producer of raw materials into an emerging multi-sector economy. Growth was almost exclusively driven by exports - particularly of electronics - and, as a result Malaysia was hard hit by the global economic downturn and the slump in the Information Technology (IT) sector in 2001. GDP in 2001 grew only 0.5% due to an estimated 11% contraction in exports, but a substantial fiscal stimulus package mitigated the worst of the recession and the economy rebounded in 2002. Healthy foreign exchange reserves and relatively small external debt make it unlikely that Malaysia will experience a crisis similar to the one in 1997, but the economy remains vulnerable to a more protracted slowdown in Japan and the US, top export destinations and key sources of foreign investment.

Economy Maldives

Economy - overview:

Tourism, Maldives largest industry, accounts for 20% of GDP and more than 60% of the Maldives' foreign exchange receipts. Over 90% of government tax revenue comes from import duties and tourism-related taxes. Almost 400,000 tourists visited the islands in 1998. Fishing is a second leading sector. The Maldivian

Government began an economic reform program in 1989 initially by lifting import quotas and opening some exports to the private sector. Subsequently, it has liberalized regulations to allow more foreign investment. Agriculture and manufacturing continue to play a lesser role in the economy, constrained by the limited availability of cultivable land and the shortage of domestic labor. Most staple foods must be imported. Industry, which consists mainly of garment production, boat building, and handicrafts, accounts for about 18% of GDP. Maldivian authorities worry about the impact of erosion and possible global warming on their low-lying country; 80% of the area is one meter or less above sea level.

Introduction Mali

Background:

The Sudanese Republic and Senegal became independent of France in 1960 as the Mali Federation. When Senegal withdrew after only a few months, what formerly made up the Sudanese Republic was renamed

Mali. Rule by dictatorship was brought to a close in 1991 with a transitional government and in 1992 when Mali's first democratic presidential election was held. After his reelection in 1997, President Alpha KONARE continued to push through political and economic reforms and to fight corruption. In keeping with Mali's two-term constitutional limit, he stepped down in 2002 and was succeeded by Amadou TOURE.

Economy Mali

Economy - overview:

Mali is among the poorest countries in the world, with 65% of its land area desert or semidesert and with a highly unequal distribution of income. Economic activity is largely confined to the riverine area irrigated by the Niger. About 10% of the population is nomadic and some 80% of the labor force is engaged in farming and fishing. Industrial activity is concentrated on processing farm commodities. Mali is heavily dependent on foreign aid and vulnerable to fluctuations in world prices for cotton, its main export, along with gold. The government has continued its successful implementation of an IMF-recommended structural adjustment program that is helping the economy grow, diversify, and attract foreign investment. Mali's adherence to economic reform and the 50% devaluation of the African franc in January 1994 have pushed up economic growth to a sturdy 5% average in 1996-2002. Worker

remittances and external trade routes have been jeopardized by continued unrest in neighboring Cote d'Ivoire.

Introduction Malta

Background:

Great Britain formally acquired possession of Malta in 1814. The island staunchly supported the UK through both World Wars and remained in the Commonwealth when it became independent in 1964. A decade later Malta became a republic. Since about the mid-1980s, the island has become a freight transshipment point, financial center,

and tourist destination. It is an official candidate for EU membership.

Economy Malta

Economy - overview:
Major resources are limestone, a favorable geographic location, and a productive labor force. Malta produces only about 20% of its food needs, has limited fresh water supplies, and has no domestic energy sources. The economy is dependent on foreign trade, manufacturing (especially electronics and textiles), and tourism. Malta is privatizing state-controlled firms and liberalizing markets in order to prepare for membership in the European Union. The island remains divided politically, however, over the question of joining the EU. Continued sluggishness in the global economy is holding back exports, tourism, and overall growth.

@Marshall Islands

Introduction Marshall Islands

Background:

After almost four decades under US administration as the easternmost part of the UN Trust Territory of the Pacific Islands, the Marshall Islands attained independence in 1986 under a Compact of Free Association. Compensation claims continue as a result of US nuclear testing on some of the atolls between 1947 and 1962. The Marshall Islands have been home to the US Army Base Kwajalein (USAKA) since 1964.

Economy Marshall Islands

Economy - overview:

US Government assistance is the mainstay of this tiny island economy. Agricultural production is primarily subsistence and is concentrated on small farms; the most important commercial crops are coconuts and breadfruit. Small-scale industry is limited to handicrafts, tuna processing, and copra. The tourist industry, now a small source of foreign exchange employing less than 10% of the labor force, remains the best hope for future added income. The islands have few natural resources, and imports far exceed exports. Under the terms of the Compact of Free Association, the US has provided more than \$1 billion in aid since 1986. Negotiations have continued for an extended agreement. Government downsizing, drought, a drop in construction, the decline in tourism and foreign investment due to the Asian financial difficulties, and less income from the renewal of fishing vessel licenses have held GDP growth to an average of 1% over the past decade.

Economy Martinique

Economy - overview:

The economy is based on sugarcane, bananas, tourism, and light industry. Agriculture accounts for about 6% of GDP and the small industrial sector for 11%. Sugar production has declined, with most of the sugarcane now used for the production of rum. Banana exports are increasing, going mostly to France. The bulk of meat, vegetable, and grain requirements must be imported, contributing to a chronic

trade deficit that requires large annual transfers of aid from France. Tourism, which employs more than 11,000 people, has become more important than agricultural exports as a source of foreign exchange.

Introduction Mauritania

Background:

Independent from France in 1960, Mauritania annexed the southern third of the former Spanish Sahara (now Western Sahara) in 1976, but relinquished it after three years of raids by the Polisario guerrilla front seeking independence for the territory. Opposition parties were legalized and a new constitution approved in 1991. Two multiparty presidential elections since then were widely seen as flawed, but October 2001 legislative and municipal elections were generally free and open. Mauritania remains, in reality, a one-party state. The country continues to experience ethnic tensions between its black minority population and the dominant Maur (Arab-Berber) populace.

Economy Mauritania

Economy - overview:
Half the population still depends on agriculture and livestock for a livelihood, even though many of the nomads and subsistence farmers were forced into the cities by recurrent droughts in the 1970s and 1980s. Mauritania has extensive deposits of iron ore, which account for nearly 40% of total exports. The decline in world demand for this ore, however, has led to cutbacks in production. The nation's coastal waters are among the richest fishing areas in the world, but overexploitation by foreigners threatens this key source of revenue. The country's first deepwater port opened near Nouakchott in 1986. In the past, drought and economic mismanagement resulted in a buildup of foreign debt. In February 2000, Mauritania qualified for debt relief under the Heavily Indebted Poor Countries (HIPC)

initiative and in December 2001 received strong support from donor and lending countries at a triennial Consultative Group review. In 2001, exploratory oil wells in tracts 80 km offshore indicated potential extraction at current world oil prices. A new investment code approved in December 2001 improved the opportunities for direct foreign investment. Ongoing negotiations with the IMF involve problems of economic reforms and fiscal discipline. Substantial oil production and exports probably will not begin until 2005.

Introduction Mauritius

Background:

Discovered by the Portuguese in 1505, Mauritius was subsequently held by the Dutch, French, and British before independence was attained in 1968. A stable democracy with regular free elections and a positive human rights record, the country has attracted considerable foreign investment and has earned one of Africa's

highest per capita incomes. Recent poor weather and declining sugar prices have slowed economic growth, leading to some protests over standards of living in the Creole community.

Economy Mauritius

Economy - overview:
Since independence in 1968, Mauritius has developed from a low-income, agriculturally based economy to a middle-income diversified economy with growing industrial, financial, and tourist sectors. For most of the period, annual growth has been in the order of 5% to 6%. This remarkable achievement has been reflected in more equitable income distribution, increased life expectancy, lowered infant mortality, and a much-improved infrastructure. Sugarcane is grown on about 90% of the cultivated land area and accounts for 25% of export earnings. The government's development strategy centers on foreign investment. Mauritius has attracted more than 9,000 offshore entities, many aimed at commerce in India and South Africa, and investment in the banking sector alone has reached over \$1 billion. Mauritius, with its strong textile sector and responsible fiscal management, has been well poised to take advantage of the Africa Growth and Opportunity Act (AGOA). The government is encouraging foreign investment in the information technology field.

@Mexico

Introduction Mexico

Background:

The site of advanced Amerindian civilizations, Mexico came under Spanish rule for three centuries before achieving independence early in the 19th century. A devaluation of the peso in late 1994 threw Mexico into economic turmoil, triggering the worst recession in over half a century. The nation continues to make an impressive recovery. Ongoing economic and social concerns include low real wages, underemployment for a large segment of the population, inequitable income distribution, and few advancement opportunities for the largely Amerindian population in the impoverished southern states. Elections held in July 2000 marked the first time since the 1910 Mexican Revolution that the opposition defeated the party in

government, the Institutional Revolutionary Party (PRI). Vicente FOX of the National Action Party (PAN) was sworn in on 1 December 2000 as the first chief executive elected in free and fair elections.

Economy Mexico

Economy - overview:

Mexico has a free market economy with a mixture of modern and outmoded industry and agriculture, increasingly dominated by the private sector. Recent administrations have expanded competition in seaports, railroads, telecommunications, electricity, natural gas distribution, and airports. Income distribution remains highly unequal. Trade with the US and Canada has tripled since the implementation of NAFTA in 1994. Following 6.9% growth in 2000, real GDP fell 0.3% in 2001, recovering to only a plus 1% in 2002, with the US slowdown the principal cause. Mexico implemented free trade agreements with Guatemala, Honduras, El Salvador, and the European

Free Trade Area in 2001, putting more than 90% of trade under free trade agreements. Foreign direct investment reached \$25 billion in 2001, of which \$12.5 billion came from the purchase of Mexico's second-largest bank, Banamex, by Citigroup.

Economy Micronesia, Federated States of

Economy - overview:

Economic activity consists primarily of subsistence farming and fishing. The islands have few mineral deposits worth exploiting, except for high-grade phosphate. The potential for a tourist industry exists, but the remote location, a lack of adequate facilities, and limited air connections hinder development. In November 2002, the country experienced a further reduction in future revenues from the Compact of Free Association - the agreement with the US in which Micronesia received \$1.3 billion in financial and technical assistance over a 15-year period until 2001. The country's medium-term economic outlook appears fragile due not only to the reduction in US assistance but also to the slow growth of the private sector. Geographical isolation and a poorly developed infrastructure remain major impediments to long-term growth.

@Midway Islands

Introduction Midway Islands

Background:

The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for trans-Pacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a national wildlife refuge. From 1996 to 2001 the refuge was open to the public. It is now temporarily closed.

Introduction Moldova

Background:

Formerly ruled by Romania, Moldova became part of the Soviet Union at the close of World War II. Although independent from the USSR since 1991, Russian forces have remained on Moldovan territory east of the Dniester River supporting the Slavic majority population, mostly Ukrainians and Russians, who have proclaimed a "Transnistria" republic. Economy Moldova

Economy - overview:

Moldova remains a very poor country despite recent progress from its small economic base. It enjoys a favorable climate and good farmland but has no major mineral deposits. As a result, the economy depends heavily on agriculture, featuring fruits, vegetables, wine, and tobacco. Moldova must import all of its supplies of oil, coal, and natural gas, largely from Russia. Energy shortages contributed to sharp production declines after the breakup of the Soviet Union in 1991. As part of an ambitious reform effort, Moldova introduced a convertible currency, freed all prices, stopped issuing preferential credits to state enterprises, backed steady land privatization, removed export controls, and freed interest rates. The government entered into agreements with the World Bank and the IMF to promote growth and reduce poverty. The economy returned to positive growth, of 2.1% in 2000, 6.1% in 2001, 7.2% in 2002, and 5.3% in 2003.

Further reforms will come slowly because of strong political forces backing government controls. The economy remains vulnerable to higher fuel prices, poor agricultural weather, and the skepticism of foreign investors.

Economy Monaco

Economy - overview:
Monaco, situated on the French Mediterranean coast, is a popular resort, attracting tourists to its casino and pleasant climate. In 2001, a major new construction project will extend the pier used by cruise ships in the main harbor. The principality has successfully sought to diversify into services and small, high-value-added,

nonpolluting industries. The state has no income tax and low business taxes and thrives as a tax haven both for individuals who have established residence and for foreign companies that have set up businesses and offices. The state retains monopolies in a number of sectors, including tobacco, the telephone network, and the postal service. Living standards are high, roughly comparable to those in prosperous French metropolitan areas. Monaco does not publish national income figures; the estimates below are extremely rough.

Introduction Mongolia

Background:

The Mongols gained fame in the 13th century when under Genghis KHAN they conquered a huge Eurasian empire. After his death the empire was divided into several powerful Mongol states, but these broke apart in the 14th century. The Mongols eventually retired to their original steppe homelands and came under Chinese rule. Mongolia won its independence in 1921 with Soviet backing. A Communist regime was installed in 1924. During the early 1990s, the ex-Communist Mongolian People's Revolutionary Party (MPRP) gradually yielded its monopoly on power to the Democratic Union Coalition (DUC), which defeated the MPRP in a national election in 1996. Over the next four years, the DUC put forward a number of key reforms to modernize the economy and to democratize the political system. The former Communists were a strong opposition that stalled additional restructuring and made implementation difficult. In 2000, the MPRP won an overwhelming victory in the legislature - with 72 of the 76 seats - and completely reshuffled the government. While it continues many of the reform policies, the MPRP has focused on social welfare and public order priorities.

Economy Mongolia

Economy - overview:

Economic activity traditionally has been based on agriculture and breeding of livestock. Mongolia also has extensive mineral deposits; copper, coal, molybdenum, tin, tungsten, and gold account for a large part of industrial production. Soviet assistance, at its height one-third of GDP, disappeared almost overnight in 1990-1991 at the time of the dismantlement of the USSR. Mongolia was driven into deep recession, prolonged by the Mongolian People's Revolutionary Party's (MPRP) reluctance to undertake serious economic reform. The Democratic Coalition (DC) government embraced free-market economics, eased price controls, liberalized domestic and international trade, and attempted to restructure the banking system and the energy sector. Major domestic privatization programs were undertaken, as well as the fostering of foreign investment through international tender of the oil distribution company, a leading cashmere company, and banks. Reform was held back by the ex-Communist MPRP opposition and by the political instability

brought about through four successive governments under the DC. Economic growth picked up in 1997-1999 after stalling in 1996 due to a series of natural disasters and declines in world prices of copper and cashmere. In August and September 1999, the economy suffered from a temporary Russian ban on exports of oil and oil products, and Mongolia remains vulnerable in this sector. Mongolia joined the World Trade Organization (WTrO) in 1997. The international donor community pledged over \$300 million per year at the Consultative Group Meeting, held in Ulaanbaatar in June 1999. The MPRP government, elected in July 2000, is anxious to improve the investment climate; it must also deal with a heavy burden of external debt. Falling prices for Mongolia's mainly primary sector exports, widespread opposition to privatization, and adverse effects of weather on agriculture in early 2000 and 2001 restrained real GDP growth in 2000-2001. Despite drought problems in 2002, GDP rose 4.0%, followed by a solid 5.0% increase in 2003. The first applications under the land privatization law have been marked by a number of disputes over particular sites. Russia claims Mongolia owes it \$11 billion from the old Soviet period; any settlement could substantially increase Mongolia's foreign debt burden.

Economy Montserrat

Economy - overview:

Severe volcanic activity, which began in July 1995, has put a damper on this small, open economy. A catastrophic eruption in June 1997 closed the airports and seaports, causing further economic and social dislocation. Two-thirds of the 12,000 inhabitants fled the island. Some began to return in 1998, but lack of housing limited the number. The agriculture sector continued to be affected by the lack of suitable land for farming and the destruction of crops. Prospects for the economy depend largely on developments in relation to the volcano and on public sector construction activity. The UK has launched a three-year \$122.8 million aid program to help reconstruct the economy. Half of the island is expected to remain uninhabitable for another decade.

Introduction Morocco

Background:
Morocco's long struggle for independence from France ended in 1956.
The internationalized city of Tangier was turned over to the new
country that same year. Morocco virtually annexed Western Sahara
during the late 1970s, but final resolution on the status of the

territory remains unresolved. Gradual political reforms in the 1990s resulted in the establishment of a bicameral legislature in 1997.

Economy Morocco

Economy - overview:
Morocco faces the problems typical of developing countries - restraining government spending, reducing constraints on private activity and foreign trade, and achieving sustainable economic growth. Following structural adjustment programs supported by the IMF, World Bank, and the Paris Club, the dirham is now fully convertible for current account transactions, and reforms of the financial sector have been implemented. Droughts depressed activity in the key agricultural sector and contributed to a stagnant economy in 1999 and 2000. During that time, however, Morocco reported large foreign exchange inflows from the sale of a mobile telephone license and partial privatization of the state-owned telecommunications

company. Favorable rainfall in 2001 led to a growth of 6.5%. Good harvest conditions continued to support GDP growth in 2002. Formidable long-term challenges include: servicing the external debt; modernizing the industrial sector; preparing the economy for freer trade with the EU and US; and improving education and attracting foreign investment to boost living standards and job prospects for Morocco's youth.

Spain's unilateral designation of a median line from the Canary Islands in 2002 to set limits to undersea resource exploration and refugee interdiction; Morocco allowed Spanish fishermen to fish temporarily off the coast of Western Sahara after an oil spill soiled Spanish fishing grounds

Illicit drugs:
illicit producer of hashish; trafficking increasing for both domestic and international drug markets; shipments of hashish mostly directed to Western Europe; transit point for cocaine from South America destined for Western Europe

Introduction Mozambique

Background:
Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration by whites, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development. The ruling party formally

abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement with rebel forces ended the fighting in 1992. Heavy flooding in both 1999 and 2000 severely hurt the economy. Political stability and sound economic policies have encouraged recent foreign investment.

severe droughts; devastating cyclones and floods occur in central and southern provinces

Environment - current issues: a long civil war and recurrent drought in the hinterlands have resulted in increased migration of the population to urban and coastal areas with adverse environmental consequences;

desertification; pollution of surface and coastal waters; elephant poaching for ivory is a problem

Environment - international agreements: party to: Biodiversity, Climate Change, Desertification, Endangered Species, Hazardous Wastes, Law of the Sea, Ozone Layer Protection signed, but not ratified: none of the selected agreements

Geography - note:
the Zambezi flows through the north-central and most fertile part of the country

Economy Mozambique

Economy - overview:
At independence in 1975, Mozambique was one of the world's poorest countries. Socialist mismanagement and a brutal civil war from 1977-92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with

political stability since the multi-party elections in 1994, have led to dramatic improvements in the country's growth rate. Inflation was brought to single digits during the late 1990s although it returned to double digits in 2000-02. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remains dependent upon foreign assistance for much of its annual budget, and the majority of the population remains below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's workforce. A substantial trade imbalance persists although the opening of the MOZAL aluminum smelter, the country's largest foreign investment project to date has increased export earnings. Additional investment projects in titanium extraction and processing and garment manufacturing should further close the import/export gap. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level.

Introduction Namibia

Background:

South Africa occupied the German colony of South-West Africa during World War I and administered it as a mandate until after World War II, when it annexed the territory. In 1966 the Marxist South-West Africa People's Organization (SWAPO) guerrilla group launched a war of independence for the area that was soon named Namibia, but it was not until 1988 that South Africa agreed to end its administration in accordance with a UN peace plan for the entire region. Independence came in 1990 following multi-party elections and the establishment of a constitution. President NUJOMA is currently serving his third term as president.

Economy Namibia

Economy - overview:

The economy is heavily dependent on the extraction and processing of minerals for export. Mining accounts for 20% of GDP. Rich alluvial diamond deposits make Namibia a primary source for gem-quality diamonds. Namibia is the fourth-largest exporter of nonfuel minerals in Africa, the world's fifth-largest producer of uranium, and the producer of large quantities of lead, zinc, tin, silver, and tungsten. The mining sector employs only about 3% of the population while about half of the population depends on subsistence agriculture for its livelihood. Namibia normally imports about 50% of its cereal requirements; in drought years food shortages are a major problem in rural areas. A high per capita GDP, relative to the region, hides the great inequality of income distribution; nearly one-third of Namibians had annual incomes of less than \$1400 in constant 1994 dollars, according to a 1993 study. The Namibian economy is closely linked to South Africa with the Namibian dollar pegged to the South African rand. Privatization of several enterprises in coming years may stimulate long-run foreign investment.

@Nauru

Introduction Nauru

Background:

Nauru's phosphate deposits began to be mined early in the 20th century by a German-British consortium; the island was occupied by Australian forces in World War I. Nauru achieved independence in 1968 and joined the UN in 1999. Nauru is the world's smallest independent republic.

limited natural fresh water resources, roof storage tanks collect
rainwater, but mostly dependent on a single, aging desalination
plant; intensive phosphate mining during the past 90 years - mainly

by a UK, Australia, and NZ consortium - has left the central 90% of Nauru a wasteland and threatens limited remaining land resources

Environment - international agreements:

party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection

Economy Nauru

Economy - overview:
Revenues of this tiny island have come from exports of phosphates,
but reserves are expected to be exhausted within a few years.
Phosphate production has declined since 1989, as demand has fallen
in traditional markets and as the marginal cost of extracting the
remaining phosphate increases, making it less internationally
competitive. While phosphates have given Nauruans one of the highest
per capita incomes in the Third World, few other resources exist
with most necessities being imported, including fresh water from
Australia. The rehabilitation of mined land and the replacement of
income from phosphates are serious long-term problems. In
anticipation of the exhaustion of Nauru's phosphate deposits,
substantial amounts of phosphate income have been invested in trust
funds to help cushion the transition and provide for Nauru's

economic future. The government has been borrowing heavily from the trusts to finance fiscal deficits. To cut costs the government has called for a freeze on wages, a reduction of over-staffed public service departments, privatization of numerous government agencies, and closure of some overseas consulates. In recent years Nauru has encouraged the registration of offshore banks and corporations. Tens of billions of dollars have been channeled through their accounts. Few comprehensive statistics on the Nauru economy exist, with estimates of Nauru's GDP varying widely.

@Navassa Island

Introduction Navassa Island

Background:

This uninhabited island was claimed by the US in 1857 for its guano, and mining took place between 1865 and 1898. The lighthouse, built in 1917, was shut down in 1996 and administration of Navassa Island transferred from the Coast Guard to the Department of the

Interior. A 1998 scientific expedition to the island described it as a unique preserve of Caribbean biodiversity; the following year it became a National Wildlife Refuge.

Introduction Nepal

Background:
In 1951, the Nepalese monarch ended the century-old system of rule

by hereditary premiers and instituted a cabinet system of government. Reforms in 1990 established a multiparty democracy within the framework of a constitutional monarchy. A Maoist insurgency, launched in 1996, has gained traction and is threatening to bring down the regime. In 2001, the Crown Prince massacred ten members of the royal family, including the king and queen, and then took his own life. In October 2002, the new king dismissed the prime minister and his cabinet for "incompetence" after they dissolved the parliament and were subsequently unable to hold elections because of the ongoing insurgency. The country is now governed by the king and his appointed cabinet, which has negotiated a cease-fire with the Maoist insurgents, until elections can be held at some unspecified future date.

Economy Nepal

Economy - overview:

Nepal is among the poorest and least developed countries in the world with 42% of its population living below the poverty line. Agriculture is the mainstay of the economy, providing a livelihood for over 80% of the population and accounting for 40% of GDP. Industrial activity mainly involves the processing of agricultural produce including jute, sugarcane, tobacco, and grain. Textile and carpet production, accounting for about 80% of foreign exchange earnings in recent years, contracted in 2001-02 due to the overall slowdown in the world economy and pressures by Maoist insurgents on factory owners and workers. Security concerns in the wake of the Maoist conflict and the September 11, 2001 terrorist attacks in the US have led to a decrease in tourism, another key source of foreign exchange. Since 1991, the government has been moving forward with economic reforms, e.g., by reducing business licenses and registration requirements to simplify investment procedures, reducing subsidies, privatizing state industries, and laying off civil servants. Nepal has considerable scope for exploiting its potential in hydropower and tourism, areas of recent foreign investment interest. Prospects for foreign trade or investment in other sectors will remain poor, however, because of the small size of the economy, its technological backwardness, its remoteness, its landlocked geographic location, and its susceptibility to natural disaster. The international community's role of funding more than 60% of Nepal's development budget and more than 28% of total budgetary expenditures will likely continue as a major ingredient of growth.

Introduction Netherlands

Background:
The Kingdom of the Netherlands was formed in 1815. In 1830 Belgium

seceded and formed a separate kingdom. The Netherlands remained neutral in World War I, but suffered invasion and occupation by Germany in World War II. A modern, industrialized nation, the Netherlands is also a large exporter of agricultural products. The country was a founding member of NATO and the EC (now the EU), and participated in the introduction of the Economic and Monetary Union (EMU) in 1999.

Economy Netherlands

Economy - overview:

The Netherlands is a prosperous and open economy depending heavily on foreign trade. The economy is noted for stable industrial relations, moderate unemployment and inflation, a sizable current account surplus, and an important role as a European transportation hub. Industrial activity is predominantly in food processing, chemicals, petroleum refining, and electrical machinery. A highly mechanized agricultural sector employs no more than 4% of the labor force but provides large surpluses for the food-processing industry and for exports. The Netherlands, along with 11 of its EU partners, began circulating the euro currency on 1 January 2002. The country continues to be one of the leading European nations for attracting foreign direct investment. Economic growth slowed considerably in 2001-03, as part of the global economic slowdown, but for the four years before that, annual growth averaged nearly 4%, well above the EU average. The government is wrestling with a deteriorating budget position, and is moving toward the EU 3% limit.

@Netherlands Antilles

Introduction Netherlands Antilles

Background:

Once the center of the Caribbean slave trade, the island of Curacao was hard hit by the abolition of slavery in 1863. Its prosperity (and that of neighboring Aruba) was restored in the early 20th century with the construction of oil refineries to service the newly discovered Venezuelan oil fields. The island of Saint Martin is shared with France; its northern portion is named Saint-Martin and is part of Guadeloupe, and its southern portion is named Sint Maarten and is part of the Netherlands Antilles.

Economy Netherlands Antilles

Economy - overview:

Tourism, petroleum refining, and offshore finance are the mainstays of this small economy, which is closely tied to the outside world.

Although GDP has declined or remained even in each of the past six years, the islands enjoy a high per capita income and a

well-developed infrastructure compared with other countries in the region. Almost all consumer and capital goods are imported, the US and Mexico being the major suppliers. Poor soils and inadequate water supplies hamper the development of agriculture.

Economy New Caledonia

Economy - overview:

New Caledonia has about 25% of the world's known nickel resources. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France - equal to more than one-fourth of GDP - and tourism are keys to the health of the economy. Substantial new investment in the nickel industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.

Introduction New Zealand

Background:

The Polynesian Maori reached New Zealand in about A.D. 800. In 1840, their chieftains entered into a compact with Britain, the Treaty of Waitangi, in which they ceded sovereignty to Queen Victoria while retaining territorial rights. In that same year, the British began the first organized colonial settlement. A series of land wars between 1843 and 1872 ended with the defeat of the native peoples. The British colony of New Zealand became an independent dominion in 1907 and supported the UK militarily in both World Wars. New Zealand's full participation in a number of defense alliances lapsed by the 1980s. In recent years, the government has sought to address longstanding Maori grievances.

Economy New Zealand

Economy - overview:

Since 1984 the government has accomplished major economic restructuring, transforming New Zealand from an agrarian economy dependent on concessionary British market access to a more industrialized, free market economy that can compete globally. This dynamic growth has boosted real incomes (but left behind many at the bottom of the ladder), broadened and deepened the technological capabilities of the industrial sector, and contained inflationary pressures. While per capita incomes have been rising, however, they remain below the level of the four largest EU economies, and there is some government concern that New Zealand is not closing the gap. New Zealand is heavily dependent on trade - particularly in agricultural products - to drive growth, and it has been affected by the global economic slowdown and the slump in commodity prices. Thus far the New Zealand economy has been relatively resilient, although growth may slow to 2.5% in 2003.

Introduction Nicaragua

Background:

The Pacific Coast of Nicaragua was settled as a Spanish colony from Panama in the early 16th century. Independence from Spain was declared in 1821 and the country became an independent republic in 1838. Britain occupied the Caribbean Coast in the first half of the 19th century, but gradually ceded control of the region in subsequent decades. Violent opposition to governmental manipulation and corruption spread to all classes by 1978 and resulted in a short-lived civil war that brought the Marxist Sandinista guerrillas to power in 1979. Nicaraguan aid to leftist rebels in El Salvador caused the US to sponsor anti-Sandinista contra guerrillas through much of the 1980s. Free elections in 1990, 1996, and again in 2001 saw the Sandinistas defeated. The country has slowly rebuilt its economy during the 1990s, but was hard hit by Hurricane Mitch in 1998.

Economy Nicaragua

Economy - overview:

Nicaragua, one of the hemisphere's poorest countries, faces low per

capita income, flagging socio-economic indicators, and huge external debt. Distribution of income is one of the most unequal on the globe. While the country has made progress toward macroeconomic stability over the past few years, a banking crisis and scandal has shaken the economy. Nicaragua will continue to be dependent on international aid and debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. Donors have made aid conditional on the openness of government financial operation, poverty alleviation, and human rights. Nicaragua met the conditions for additional debt service relief in December 2000. Growth should move up moderately in 2003 because of increased private investment and exports.

Introduction Niger

Background:

Not until 1993, 33 years after independence from France, did Niger hold it's first free and open elections. A 1995 peace accord ended a five-year Tuareg insurgency in the north. Coups in 1996 and 1999 were followed by the creation of a National Reconciliation Council that effected a transition to civilian rule by December 1999.

Economy Niger

Economy - overview:

Niger is a poor, landlocked Sub-Saharan nation, whose economy centers on subsistence agriculture, animal husbandry, and reexport trade, and increasingly less on uranium, because of declining world demand. The 50% devaluation of the West African franc in January 1994 boosted exports of livestock, cowpeas, onions, and the products of Niger's small cotton industry. The government relies on bilateral and multilateral aid - which was suspended following the April 1999 coup d'etat - for operating expenses and public investment. In 2000-01, the World Bank approved a structural adjustment loan of \$105 million to help support fiscal reforms. However, reforms could prove difficult given the government's bleak financial situation. The IMF approved a \$73 million poverty reduction and growth facility for Niger in 2000 and announced \$115 million in debt relief under the Heavily Indebted Poor Countries (HIPC) initiative. Further disbursements of aid occurred in 2002. Future growth may be sustained by exploitation of oil, gold, coal, and other mineral resources.

Introduction Nigeria

Background:

Following nearly 16 years of military rule, a new constitution was adopted in 1999, and a peaceful transition to civilian government was completed. The president faces the daunting task of rebuilding a petroleum-based economy, whose revenues have been squandered through corruption and mismanagement, and institutionalizing democracy. In addition, the OBASANJO administration must defuse longstanding ethnic and religious tensions, if it is to build a sound foundation for economic growth and political stability. Despite some irregularities the April 2003 elections marked the first civilian transfer of power in Nigeria's history.

Economy Nigeria

Economy - overview:

The oil-rich Nigerian economy, long hobbled by political instability, corruption, and poor macroeconomic management, is undergoing substantial reform under the new civilian administration. Nigeria's former military rulers failed to diversify the economy away from overdependence on the capital-intensive oil sector, which provides 20% of GDP, 95% of foreign exchange earnings, and about 65% of budgetary revenues. The largely subsistence agricultural sector has failed to keep up with rapid population growth, and Nigeria, once a large net exporter of food, now must import food. Following the signing of an IMF stand-by agreement in August 2000, Nigeria received a debt-restructuring deal from the Paris Club and a \$1 billion credit from the IMF, both contingent on economic reforms. The agreement was allowed to expire by the IMF in November 2001, however, and Nigeria apparently received much less multilateral assistance than expected in 2002. Nonetheless, increases in foreign oil investment and oil production kept growth at 3% in 2002. The government lacks the strength to implement the market-oriented reforms urged by the IMF, such as modernization of the banking system; to curb inflation by blocking excessive wage demands; and to resolve regional disputes over the distribution of earnings from the oil industry. When the uncertainties in the global economy are added in, estimates of Nigeria's prospects for 2003 must have a wide margin of error.

Illicit drugs:
a transit point for heroin and cocaine intended for European, East Asian, and North American markets; safehaven for Nigerian narcotraffickers operating worldwide; major money-laundering center; massive corruption and criminal activity, along with unwillingness of the government to address the deficiencies in its anti-money-laundering regime make money laundering a major problem

@Niue

Introduction Niue

Background:

Niue's remoteness, as well as cultural and linguistic differences between its Polynesian inhabitants and those of the rest of the Cook Islands, have caused it to be separately administered. The population of the island continues to drop (from a peak of 5,200 in 1966 to about 2,100 in 2002), with substantial emigration to New Zealand, 2,400 km to the southwest.

Economy Niue

Economy - overview:

The economy suffers from the typical Pacific island problems of geographic isolation, few resources, and a small population. Government expenditures regularly exceed revenues, and the shortfall is made up by critically needed grants from New Zealand that are used to pay wages to public employees. Niue has cut government expenditures by reducing the public service by almost half. The agricultural sector consists mainly of subsistence gardening, although some cash crops are grown for export. Industry consists primarily of small factories to process passion fruit, lime oil, honey, and coconut cream. The sale of postage stamps to foreign collectors is an important source of revenue. The island in recent years has suffered a serious loss of population because of migration of Niueans to New Zealand. Efforts to increase GDP include the promotion of tourism and a financial services industry, although

Premier LAKATANI announced in February 2002 that Niue will shut down

the offshore banking industry. Economic aid from New Zealand in 2002 was about \$2.6 million.

@Norfolk Island

Introduction Norfolk Island

Background:

Two British attempts at establishing the island as a penal colony (1788-1814 and 1825-55) were ultimately abandoned. In 1856, the island was resettled by Pitcairn Islanders, descendants of the Bounty mutineers and their Tahitian companions.

@Northern Mariana Islands

Introduction Northern Mariana Islands

Background:

Under US administration as part of the UN Trust Territory of the Pacific, the people of the Northern Mariana Islands decided in the 1970s not to seek independence but instead to forge closer links with the US. Negotiations for territorial status began in 1972. A covenant to establish a commonwealth in political union with the US was approved in 1975. A new government and constitution went into effect in 1978.

Economy Northern Mariana Islands

Economy - overview:

The economy benefits substantially from financial assistance from the US. The rate of funding has declined as locally generated government revenues have grown. The key tourist industry employs about 50% of the work force and accounts for roughly one-fourth of GDP. Japanese tourists predominate. Annual tourist entries have exceeded one-half million in recent years, but financial difficulties in Japan have caused a temporary slowdown. The agricultural sector is made up of cattle ranches and small farms producing coconuts, breadfruit, tomatoes, and melons. Garment production is by far the most important industry with employment of 17,500 mostly Chinese workers and sizable shipments to the US under duty and quota exemptions.

@Norway

Introduction Norway

Background:

Two centuries of Viking raids into Europe tapered off following the adoption of Christianity by King Olav TRYGGVASON in 994.

Conversion

of the Norwegian kingdom occurred over the next several decades. In 1397, Norway was absorbed into a union with Denmark that was to last for more than four centuries. In 1814, Norwegians resisted the cession of their country to Sweden and adopted a new constitution. Sweden then invaded Norway but agreed to let Norway keep its constitution in return for accepting the union under a Swedish king. Rising nationalism throughout the 19th century led to a 1905 referendum granting Norway independence. Norway remained neutral in

World War I and proclaimed its neutrality at the outset of World War II. Nevertheless, it was not able to avoid a five-year occupation by Nazi Germany (1940-1945). In 1949, neutrality was abandoned and Norway became a member of NATO. Discovery of oil and gas in adjacent waters in the late 1960s boosted Norway's economic fortunes. The current focus is on containing spending on the extensive welfare system and planning for the time when petroleum reserves are depleted. In referenda held in 1972 and 1994, Norway rejected joining the EU.

Economy Norway

Economy - overview:

The Norwegian economy is a prosperous bastion of welfare capitalism, featuring a combination of free market activity and government intervention. The government controls key areas, such as the vital petroleum sector (through large-scale state enterprises). The country is richly endowed with natural resources - petroleum, hydropower, fish, forests, and minerals - and is highly dependent on its oil production and international oil prices; in 1999, oil and gas accounted for 35% of exports. Only Saudi Arabia and Russia export more oil than Norway. Norway opted to stay out of the EU during a referendum in November 1994. The government has moved ahead with privatization. With arguably the highest quality of life worldwide, Norwegians still worry about that time in the next two decades when the oil and gas begin to run out. Accordingly, Norway has been saving its oil-boasted budget surpluses in a Government Petroleum Fund, which is invested abroad and now is valued at more than \$43 billion. GDP growth was a lackluster 1% in 2002 and 2003 against the background of a faltering European economy.

Introduction Oman

Background:

In 1970, QABOOS bin Said Al Said ousted his father and has ruled as sultan ever since. His extensive modernization program has opened the country to the outside world and has preserved a long-standing political and military relationship with the UK. Oman's moderate, independent foreign policy has sought to maintain good relations with all Middle Eastern countries.

Geography Oman

Economy Oman

Economy - overview:

Oman's economic performance improved significantly in 2000 due largely to the upturn in oil prices. The government is moving ahead with privatization of its utilities, the development of a body of commercial law to facilitate foreign investment, and increased budgetary outlays. Oman continues to liberalize its markets and joined the World Trade Organization (WTrO) in November 2000. GDP growth improved in 2001 despite the global slowdown and then fell back to 2.2% in 2002. In order to reduce unemployment, the government is trying to replace expatriate workers with local

workers. Another government objective is the development of the nation's gas resources.

@Pacific Ocean

Introduction Pacific Ocean

Background:

The Pacific Ocean is the largest of the world's five oceans (followed by the Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean). Strategically important access waterways include the La Perouse, Tsugaru, Tsushima, Taiwan, Singapore, and Torres Straits.

Geography Pacific Ocean

Location:

body of water between the Southern Ocean, Asia, Australia, and the Western Hemisphere

Geographic coordinates:

0 00 N, 160 00 W

Map references:

Political Map of the World

Area:

total: 155.557 million sq km

note: includes Bali Sea, Bering Sea, Bering Strait, Coral Sea, East China Sea, Gulf of Alaska, Gulf of Tonkin, Philippine Sea, Sea of Japan, Sea of Okhotsk, South China Sea, Tasman Sea, and other tributary water bodies

Area - comparative:

about 15 times the size of the US; covers about 28% of the global surface; larger than the total land area of the world

Coastline:

135,663 km

Climate:

planetary air pressure systems and resultant wind patterns exhibit remarkable uniformity in the south and east; trade winds and westerly winds are well-developed patterns, modified by seasonal fluctuations; tropical cyclones (hurricanes) may form south of Mexico from June to October and affect Mexico and Central America; continental influences cause climatic uniformity to be much less pronounced in the eastern and western regions at the same latitude

in the North Pacific Ocean; the western Pacific is monsoonal - a rainy season occurs during the summer months, when moisture-laden winds blow from the ocean over the land, and a dry season during the winter months, when dry winds blow from the Asian landmass back to the ocean; tropical cyclones (typhoons) may strike southeast and east Asia from May to December

Terrain:

surface currents in the northern Pacific are dominated by a clockwise, warm-water gyre (broad circular system of currents) and in the southern Pacific by a counterclockwise, cool-water gyre; in the northern Pacific, sea ice forms in the Bering Sea and Sea of Okhotsk in winter; in the southern Pacific, sea ice from Antarctica reaches its northernmost extent in October; the ocean floor in the eastern Pacific is dominated by the East Pacific Rise, while the western Pacific is dissected by deep trenches, including the Mariana Trench, which is the world's deepest

Elevation extremes:

lowest point: Challenger Deep in the Mariana Trench -10,924 m

highest point: sea level 0 m

Natural resources:

oil and gas fields, polymetallic nodules, sand and gravel aggregates, placer deposits, fish

Natural hazards:

surrounded by a zone of violent volcanic and earthquake activity sometimes referred to as the "Pacific Ring of Fire"; subject to tropical cyclones (typhoons) in southeast and east Asia from May to December (most frequent from July to October); tropical cyclones (hurricanes) may form south of Mexico and strike Central America and

Mexico from June to October (most common in August and September); cyclical El Nino/La Nina phenomenon occurs in the equatorial Pacific, influencing weather in the Western Hemisphere and the western Pacific; ships subject to superstructure icing in extreme north from October to May; persistent fog in the northern Pacific can be a maritime hazard from June to December

Environment - current issues:

endangered marine species include the dugong, sea lion, sea otter, seals, turtles, and whales; oil pollution in Philippine Sea and South China Sea

Geography - note:

the major chokepoints are the Bering Strait, Panama Canal, Luzon Strait, and the Singapore Strait; the Equator divides the Pacific Ocean into the North Pacific Ocean and the South Pacific Ocean; dotted with low coral islands and rugged volcanic islands in the southwestern Pacific Ocean

Economy Pacific Ocean

Economy - overview:

The Pacific Ocean is a major contributor to the world economy and particularly to those nations its waters directly touch. It provides low-cost sea transportation between East and West, extensive fishing grounds, offshore oil and gas fields, minerals, and sand and gravel for the construction industry. In 1996, over 60% of the world's fish catch came from the Pacific Ocean. Exploitation of offshore oil and gas reserves is playing an ever-increasing role in the energy

supplies of US, Australia, NZ, China, and Peru. The high cost of recovering offshore oil and gas, combined with the wide swings in world prices for oil since 1985, has slowed but not stopped new drillings.

Transportation Pacific Ocean

Ports and harbors:

Bangkok (Thailand), Hong Kong, Kao-hsiung (Taiwan), Los Angeles (US), Manila (Philippines), Pusan (South Korea), San Francisco (US), Seattle (US), Shanghai (China), Singapore, Sydney (Australia), Vladivostok (Russia), Wellington (NZ), Yokohama (Japan)

Transportation - note:

Inside Passage offers protected waters from southeast Alaska to Puget Sound (Washington state)

Transnational Issues Pacific Ocean

Disputes - international: some maritime disputes (see littoral states)

Introduction Pakistan

Background:

The separation in 1947 of British India into the Muslim state of Pakistan (with two sections West and East) and largely Hindu India was never satisfactorily resolved. A third war between these countries in 1971 resulted in East Pakistan seceding and becoming the separate nation of Bangladesh. A dispute over the state of Kashmir is ongoing. In response to Indian nuclear weapons testing, Pakistan conducted its own tests in 1998.

Economy Pakistan

Economy - overview:

Pakistan, an impoverished and underdeveloped country, suffers from internal political disputes, low levels of foreign investment, and a costly, ongoing confrontation with neighboring India. Pakistan's economic prospects, although still marred by poor human development indicators, continued to improve in 2002 following unprecedented inflows of foreign assistance beginning in 2001. Foreign exchange

reserves have grown to record levels, supported largely by fast growth in recorded worker remittances. Trade levels rebounded after a sharp decline in late 2001. The government has made significant inroads in macroeconomic reform since 2000, but progress is beginning to slow. Although it is in the second year of its \$1.3 billion IMF Poverty Reduction and Growth Facility, Islamabad continues to require waivers for politically difficult reforms. Long-term prospects remain uncertain as development spending remains low, regional tensions remain high, and political tensions weaken Pakistan's commitment to lender-recommended economic reforms. GDP growth will continue to hinge on crop performance; dependence on foreign oil leaves the import bill vulnerable to fluctuating oil prices; and efforts to open and modernize the economy remain uneven.

Transnational Issues Pakistan

Disputes - international:

thousands of Afghan refugees still reside in Pakistan; isolating terrain and close ties among Pashtuns in Pakistan make cross-border activities difficult to control; armed stand-off with India over the status and sovereignty of Kashmir continues - India objects to Pakistan ceding lands to China in 1965 boundary agreement that India believes are part of disputed Kashmir; disputes with India over

Indus River water sharing and the terminus of the Rann of Kutch, which prevents maritime boundary delimitation

Illicit drugs:

opium poppy cultivation practically eliminated; key transit point for Southwest Asian heroin bound for Western markets; Afghan narcotics continue to transit Federally Administered Tribal Areas, Balochistan Province, and Karachi; financial crimes related to drug trafficking, terrorism, corruption, and smuggling remain problems

Economy Palau

Economy - overview:

The economy consists primarily of tourism, subsistence agriculture and fishing. The government is the major employer of the work force, relying heavily on financial assistance from the US. Business and tourist arrivals numbered 50,000 in FY00/01. The population enjoys a per capita income twice that of the Philippines and much of Micronesia. Long-run prospects for the key tourist sector have been greatly bolstered by the expansion of air travel in the Pacific, the rising prosperity of leading East Asian countries, and the willingness of foreigners to finance infrastructure development.

@Palmyra Atoll

Introduction Palmyra Atoll

Background:

The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now privately owned by the Nature Conservancy. This organization is managing the atoll as a nature preserve. The lagoons and surrounding waters within the 12 nautical mile US territorial seas were transferred to the US Fish and Wildlife Service and were designated a National Wildlife Refuge in January 2001.

@Panama

Introduction Panama

Background:

With US backing, Panama seceded from Colombia in 1903 and promptly signed a treaty with the US allowing for the construction of a canal and US sovereignty over a strip of land on either side of the structure (the Panama Canal Zone). The Panama Canal was built by the US Army Corps of Engineers between 1904 and 1914. On 7 September 1977, an agreement was signed for the complete transfer of the Canal from the US to Panama by the end of 1999. Certain portions of the Zone and increasing responsibility over the Canal were turned over in the intervening years. With US help, dictator Manuel NORIEGA was deposed in 1989. The entire Panama Canal, the area supporting the Canal, and remaining US military bases were turned over to Panama by or on 31 December 1999.

Economy Panama

Economy - overview:

Panama's economy is based primarily on a well-developed services sector that accounts for three-fourths of GDP. Services include operating the Panama Canal, banking, the Colon Free Zone, insurance, container ports, flagship registry, and tourism. A slump in Colon Free Zone and agricultural exports, the global slowdown, and the withdrawal of US military forces held back economic growth in 2000-02. The government has been backing public works programs, tax reforms, new regional trade agreements, and development of tourism in order to stimulate growth.

@Papua New Guinea

Introduction Papua New Guinea

Background:

The eastern half of the island of New Guinea - second largest in the world - was divided between Germany (north) and the UK (south) in 1885. The latter area was transferred to Australia in 1902, which occupied the northern portion during World War I and continued to administer the combined areas until independence in 1975. A nine-year secessionist revolt on the island of Bougainville ended in 1997, after claiming some 20,000 lives.

Economy Papua New Guinea

Economy - overview:

Papua New Guinea is richly endowed with natural resources, but exploitation has been hampered by rugged terrain and the high cost of developing infrastructure. Agriculture provides a subsistence livelihood for 85% of the population. Mineral deposits, including oil, copper, and gold, account for 72% of export earnings. The economy has faltered over the past three years but will probably improve slightly in 2003. Former Prime Minister Mekere MORAUTA had tried to restore integrity to state institutions, stabilize the kina, restore stability to the national budget, privatize public enterprises where appropriate, and ensure ongoing peace on Bougainville. The government has had considerable success in attracting international support, specifically gaining the backing of the IMF and the World Bank in securing development assistance loans. Significant challenges face Prime Minister Michael SOMARE, including gaining further investor confidence, continuing efforts to privatize government assets, and maintaining the support of members of Parliament.

@Paracel Islands

Introduction Paracel Islands

Background:

The Paracel Islands are surrounded by productive fishing grounds and by potential oil and gas reserves. In 1932, French Indochina

annexed the islands and set up a weather station on Pattle Island; maintenance was continued by its successor, Vietnam. China has occupied the Paracel Islands since 1974, when its troops seized a South Vietnamese garrison occupying the western islands. The islands are claimed by Taiwan and Vietnam.

@Paraguay

Introduction Paraguay

Background:

In the disastrous War of the Triple Alliance (1865-70), Paraguay lost two-thirds of all adult males and much of its territory. It stagnated economically for the next half century. In the Chaco War of 1932-35, large, economically important areas were won from Bolivia. The 35-year military dictatorship of Alfredo STROESSNER was overthrown in 1989, and, despite a marked increase in political infighting in recent years, relatively free and regular presidential elections have been held since then.

Economy Paraguay

Economy - overview:

Paraguay has a market economy marked by a large informal sector. The informal sector features both reexport of imported consumer goods to neighboring countries as well as the activities of thousands of microenterprises and urban street vendors. Because of the importance of the informal sector, accurate economic measures are difficult to obtain. A large percentage of the population derives their living from agricultural activity, often on a subsistence basis. The formal economy grew by an average of about 3% annually in 1995-97; but GDP declined slightly in 1998, 1999, and 2000, rose slightly in 2001, only to fall again in 2002. On a per capita basis, real income has stagnated at 1980 levels. Most observers attribute Paraguay's poor economic performance to political uncertainty, corruption, lack of progress on structural reform, substantial internal and external debt, and deficient infrastructure.

Introduction Peru

Background:

Ancient Peru was the seat of several prominent Andean
civilizations, most notably that of the Incas whose empire was
captured by the Spanish conquistadores in 1533. Peruvian
independence was declared in 1821, and remaining Spanish forces

defeated in 1824. After a dozen years of military rule, Peru returned to democratic leadership in 1980, but experienced economic problems and the growth of a violent insurgency. President Alberto FUJIMORI's election in 1990 ushered in a decade that saw a dramatic turnaround in the economy and significant progress in curtailing guerrilla activity. Nevertheless, the president's increasing reliance on authoritarian measures and an economic slump in the late 1990s generated mounting dissatisfaction with his regime. FUJIMORI won reelection to a third term in the spring of 2000, but international pressure and corruption scandals led to his ouster by Congress in November of that year. A caretaker government oversaw new elections in the spring of 2001, which ushered in Alejandro TOLEDO as the new head of government.

Economy Peru

Economy - overview:

Thanks to foreign investment and the cooperation between the
government and the IMF and World Bank, growth was strong in 1994-97
and inflation was brought under control. In 1998, El Nino's impact
on agriculture, the financial crisis in Asia, and instability in
Brazilian markets undercut growth. The following year was again lean
year for Peru, with the aftermath of El Nino and the Asian financial
crisis working its way through the economy. Political instability
resulting from the presidential election and FUJIMORI's subsequent
departure from office limited growth in 2000. The downturn in the
global economy further curtailed growth in 2001. President TOLEDO,
who assumed the presidency in July 2001, has been working to
reinvigorate the economy and reduce unemployment. Economic growth in
2002 is estimated at 4.8%, led by construction in the retail and gas
sectors.

Introduction Philippines

Background:

The Philippines were ceded by Spain to the US in 1898 following the Spanish-American War. They attained independence in 1946 after Japanese occupation in World War II. The 21-year rule of Ferdinand MARCOS ended in 1986, when a widespread popular rebellion forced him into exile. In 1992, the US closed its last military bases on the islands. The Philippines has had two electoral presidential transitions since the removal of MARCOS. In January 2001, the Supreme Court declared Joseph ESTRADA unable to rule in view of mass resignations from his government and administered the oath of office to Vice President Gloria MACAPAGAL-ARROYO as his constitutional successor. The government continues to struggle with Muslim insurgencies in the south.

Economy Philippines

Economy - overview:

In 1998, the Philippine economy - a mixture of agriculture, light industry, and supporting services - deteriorated as a result of spillover from the Asian financial crisis and poor weather conditions. Growth fell to 0.6% in 1998 from 5% in 1997, but recovered to about 3.3% in 1999, 4.5% in 2000, and 4.5% in 2001. In 2002, the Philippines recorded GDP growth of 4.4% but also incurred a record budget deficit. As a result, the Philippines is burdened with a public sector debt equal to more than 100% of GDP. Growth eased to 3.8% in 2003. The government has promised economic reforms including going forward with privatization, reforming the tax system, and promoting additional trade integration within its region. Considerable drive is required to update the educational system and the road network.

@Pitcairn Islands

Introduction Pitcairn Islands

Background:

Pitcairn Island was discovered in 1767 by the British and settled in 1790 by the Bounty mutineers and their Tahitian companions. Pitcairn was the first Pacific island to become a British colony (in 1838) and today remains the last vestige of that empire in the South Pacific. Outmigration, primarily to New Zealand, has thinned the population from a peak of 233 in 1937 to less than 50 today.

Economy Pitcairn Islands

Economy - overview:
The inhabitants of this tiny isolated economy exist on fishing, subsistence farming, handicrafts, and postage stamps. The fertile soil of the valleys produces a wide variety of fruits and vegetables, including citrus, sugarcane, watermelons, bananas, yams, and beans. Bartering is an important part of the economy. The major sources of revenue are the sale of postage stamps to collectors and the sale of handicrafts to passing ships.

Introduction Poland

Background:

Poland is an ancient nation that was conceived around the middle of the 10th century. Its golden age occurred in the 16th century.

During the following century, the strengthening of the gentry and internal disorders weakened the nation, until an agreement in 1772

between Russia, Prussia, and Austria partitioned Poland. Poland regained its independence in 1918 only to be overrun by Germany and the Soviet Union in World War II. It became a Soviet satellite state following the war, but its government was comparatively tolerant and progressive. Labor turmoil in 1980 led to the formation of the independent trade union "Solidarity" that over time became a political force and by 1990 had swept parliamentary elections and the presidency. A "shock therapy" program during the early 1990s enabled the country to transform its economy into one of the most robust in Central Europe, but Poland currently suffers low GDP growth and high unemployment. Solidarity suffered a major defeat in the 2001 parliamentary elections when it failed to elect a single deputy to the lower house of Parliament, and the new leaders of the Solidarity Trade Union subsequently pledged to reduce the Trade Union's political role. Poland joined NATO in 1999 and is scheduled to accede to the European Union along with nine other states on 1 May 2004.

Environment - current issues:
situation has improved since 1989 due to decline in heavy industry and increased environmental concern by post-Communist governments; air pollution nonetheless remains serious because of sulfur dioxide emissions from coal-fired power plants, and the resulting acid rain has caused forest damage; water pollution from industrial and municipal sources is also a problem, as is disposal of hazardous wastes; pollution levels should continue to decrease as industrial establishments bring their facilities up to European Union code, but at substantial cost to business and the government

Economy Poland

Economy - overview:

Poland has steadfastly pursued a policy of economic liberalization throughout the 1990s and today stands out as a success story among transition economies. Even so, much remains to be done. The privatization of small and medium state-owned companies and a liberal law on establishing new firms has encouraged the development of the private business sector, but legal and bureaucratic obstacles alongside persistent corruption are hampering its further development. Poland's agricultural sector remains handicapped by structural problems, surplus labor, inefficient small farms, and lack of investment. Restructuring and privatization of "sensitive sectors" (e.g., coal, steel, railroads, and energy), while recently initiated, have stalled due to a lack of political will on the part of the government. Structural reforms in health care, education, the pension system, and state administration have resulted in larger than expected fiscal pressures. Further progress in public finance depends mainly on privatization of Poland's remaining state sector, the reduction of state employment, and an overhaul of the tax code to incorporate the growing gray economy and farmers most of whom pay no tax. The government's determination to enter the EU has shaped most aspects of its economic policy and new legislation; in June 2003, 77% of the voters approved membership, now scheduled for May 2004. Improving Poland's export competitiveness and containing the internal budget deficit are top priorities. Due to political uncertainty, the zloty has recently depreciated in relation to the euro and the dollar while currencies of the other euro-zone aspirants have been appreciating. GDP per capita equals that of the 3 Baltic states.

Introduction Portugal

Background:
Following its heyday as a world power during the 15th and 16th
centuries, Portugal lost much of its wealth and status with the
destruction of Lisbon in a 1755 earthquake, occupation during the

Napoleonic Wars, and the independence in 1822 of Brazil as a colony. A 1910 revolution deposed the monarchy; for most of the next six decades, repressive governments ran the country. In 1974, a left-wing military coup installed broad democratic reforms. The following year, Portugal granted independence to all of its African colonies. Portugal entered the EC (now the EU) in 1986.

Economy Portugal

Economy - overview:

Portugal has become a diversified and increasingly service-based economy since joining the European Community in 1986. Over the past decade, successive governments have privatized many state-controlled firms and liberalized key areas of the economy, including the financial and telecommunications sectors. The country qualified for the European Monetary Union (EMU) in 1998 and began circulating the euro on 1 January 2002 along with 11 other EU member economies. Economic growth has been above the EU average for much of the past decade, but fell back in 2001-03. GDP per capita stands at 70% of that of the leading EU economies. A poor educational system, in particular, has been an obstacle to greater productivity and growth. Portugal has been increasingly overshadowed by lower-cost producers

in Central Europe and Asia as a target for foreign direct investment. The coalition government faces tough choices in its attempts to boost Portugal's economic competitiveness and to keep the budget deficit within the 3% EU ceiling.

@Puerto Rico

Introduction Puerto Rico

Background:

Populated for centuries by aboriginal peoples, the island was claimed by the Spanish Crown in 1493 following Columbus' second voyage to the Americas. In 1898, after 400 years of colonial rule that saw the indigenous population nearly exterminated and African slave labor introduced, Puerto Rico was ceded to the US as a result of the Spanish-American War. Puerto Ricans were granted US citizenship in 1917 and popularly elected governors have served since 1948. In 1952, a constitution was enacted providing for internal self-government. In plebiscites held in 1967, 1993, and 1998 voters chose to retain commonwealth status.

Economy Puerto Rico

Economy - overview:

Puerto Rico has one of the most dynamic economies in the Caribbean region. A diverse industrial sector has far surpassed agriculture as the primary locus of economic activity and income. Encouraged by duty-free access to the US and by tax incentives, US firms have invested heavily in Puerto Rico since the 1950s. US minimum wage laws apply. Sugar production has lost out to dairy production and other livestock products as the main source of income in the agricultural sector. Tourism has traditionally been an important source of income, with estimated arrivals of nearly 5 million tourists in 1999. Growth fell off in 2001-02, largely due to the slowdown in the US economy.

@Qatar

Introduction Qatar

Background:

Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the amir, who had ruled the country since 1972. He was overthrown by his son, the current Amir HAMAD bin Khalifa Al Thani, in a bloodless coup in 1995. In 2001, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. Oil and natural gas revenues enable Qatar to have a per capita income not far below the leading industrial countries of Western Europe.

Economy Qatar

Economy - overview:

Oil and gas account for more than 55% of GDP, roughly 85% of export earnings, and 70% of government revenues. Oil and gas have given Qatar a per capita GDP comparable to that of the leading West European industrial countries. Proved oil reserves of 14.5 billion barrels should ensure continued output at current levels for 23 years. Production and export of natural gas are becoming increasingly important to the economy. Qatar's proved reserves of natural gas exceed 17.9 trillion cubic meters, more than 5% of the world total and third largest in the world. Long-term goals feature the development of offshore natural gas reserves. Since 2000, Qatar has consistently posted trade surpluses largely because of high oil prices and increased natural gas exports, and Qatar's economy is expected to receive an added boost as it begins to increase liquid natural gas exports.

Introduction Reunion

Background:

The Portuguese discovered the uninhabited island in 1513. From the 17th to the 19th centuries, French immigration, supplemented by influxes of Africans, Chinese, Malays, and Malabar Indians, gave the island its ethnic mix. The opening of the Suez Canal in 1869 cost the island its importance as a stopover on the East Indies trade route.

Economy Reunion

Economy - overview:

The economy has traditionally been based on agriculture, but services now dominate. Sugarcane has been the primary crop for more than a century, and in some years it accounts for 85% of exports.

The government has been pushing the development of a tourist industry to relieve high unemployment, which amounts to one-third of the labor force. The gap in Reunion between the well-off and the poor is extraordinary and accounts for the persistent social tensions. The white and Indian communities are substantially better off than other segments of the population, often approaching European standards, whereas minority groups suffer the poverty and unemployment typical of the poorer nations of the African continent. The outbreak of severe rioting in February 1991 illustrates the seriousness of socioeconomic tensions. The economic well-being of

Reunion depends heavily on continued financial assistance from France.

Introduction Romania

Background:

Soviet occupation following World War II led to the formation of a Communist "peoples republic" in 1947 and the abdication of the king. The decades-long rule of dictator Nicolae CEAUSESCU, who took power in 1965, and his Securitate police state became increasingly oppressive and draconian through the 1980s. CEAUSESCU was overthrown and executed in late 1989. Former Communists dominated the government until 1996, when they were swept from power by a

fractious coalition of centrist parties. Currently, the Social Democratic Party forms a nominally minority government, which governs with the support of the opposition Democratic Union of Hungarians in Romania. Bucharest must address rampant corruption, while invigorating lagging economic and democratic reforms, before Romania can achieve its hope of joining the European Union.

Economy Romania

Economy - overview:

Romania began the transition from Communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. The country emerged in 2000 from a punishing three-year recession thanks to strong demand in EU export markets. Despite the global slowdown in 2001-02, strong domestic activity in construction, agriculture, and consumption have kept growth above 4%. An IMF Standby Agreement, signed in 2001, has been accompanied

by slow but palpable gains in privatization, deficit reduction, and the curbing of inflation. Nonetheless, recent macroeconomic gains have done little to address Romania's widespread poverty, while corruption and red tape hinder foreign investment.

Introduction Russia

Background:

Repeated devastating defeats of the Russian army in World War I led to widespread rioting in the major cities of the Russian Empire and to the overthrow in 1917 of the 300-year old Romanov Dynasty. The Communists under Vladimir LENIN seized power soon after and formed the USSR. The brutal rule of Josef STALIN (1928-53) strengthened Russian dominance of the Soviet Union at a cost of tens of millions of lives. The Soviet economy and society stagnated in the following decades until General Secretary Mikhail GORBACHEV (1985-91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize Communism, but his initiatives inadvertently released forces that by December 1991 splintered the USSR into 15 independent republics. Since then, Russia has struggled in its

efforts to build a democratic political system and market economy to replace the strict social, political, and economic controls of the Communist period. A determined guerrilla conflict still plagues Russia in Chechnya.

Economy Russia

Economy - overview:

A decade after the implosion of the Soviet Union in December 1991, Russia is still struggling to establish a modern market economy and achieve strong economic growth. In contrast to its trading partners in Central Europe - which were able within 3 to 5 years to overcome the initial production declines that accompanied the launch of market reforms - Russia saw its economy contract for five years, as the executive and legislature dithered over the implementation of many of the basic foundations of a market economy. Russia achieved a slight recovery in 1997, but the government's stubborn budget deficits and the country's poor business climate made it vulnerable when the global financial crisis swept through in 1998. The crisis culminated in the August depreciation of the ruble, a debt default by the government, and a sharp deterioration in living standards for most of the population. The economy subsequently has rebounded, growing by an average of more than 6% annually in 1999-2002 on the back of higher oil prices and the 60% depreciation of the ruble in 1998. These GDP numbers, along with a renewed government effort to advance lagging structural reforms, have raised business and investor confidence over Russia's prospects in its second decade of transition. Yet serious problems persist. Oil, natural gas, metals, and timber account for more than 80% of exports, leaving the country

vulnerable to swings in world prices. Russia's industrial base is increasingly dilapidated and must be replaced or modernized if the country is to maintain vigorous economic growth. Other problems include a weak banking system, a poor business climate that discourages both domestic and foreign investors, corruption, local and regional government intervention in the courts, and widespread lack of trust in institutions. In 2003 President PUTIN further tightened his control over the "oligarchs," especially in the realm of political expression.

Introduction Rwanda

Background:

In 1959, three years before independence from Belgium, the majority ethnic group, the Hutus, overthrew the ruling Tutsi king. Over the next several years, thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front, and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions, culminating in April 1994 in the genocide of roughly 800,000 Tutsis and moderate Hutus. The Tutsi rebels defeated the Hutu regime and ended the killing in July 1994, but approximately 2 million Hutu refugees - many fearing Tutsi retribution - fled to neighboring Burundi, Tanzania, Uganda, and Zaire. Since then, most of the refugees have returned to Rwanda. Despite substantial international assistance and political reforms - including Rwanda's first local elections in March 1999 - the country continues to struggle to boost investment and agricultural output and to foster reconciliation. A series of massive population displacements, a nagging Hutu extremist insurgency, and Rwandan involvement in two wars over the past four years in the neighboring DROC continue to hinder Rwanda's efforts.

Economy Rwanda

Economy - overview:

Rwanda is a poor rural country with about 90% of the population engaged in (mainly subsistence) agriculture. It is the most densely populated country in Africa; landlocked with few natural resources and minimal industry. Primary foreign exchange earners are coffee and tea. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and eroded the country's ability to attract private and external investment.

However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels, although poverty levels are higher now. GDP has rebounded, and inflation has been curbed. Export earnings, however, have been hindered by low beverage prices, depriving the country of much needed hard currency. Attempts to diversify into non-traditional agriculture exports such as flowers and vegetables have been stymied by a lack of adequate transportation infrastructure. Despite Rwanda's fertile ecosystem, food production often does not keep pace with population growth, requiring food to be imported. Rwanda continues to receive substantial amounts of aid money and was approved for IMF-World Bank Heavily Indebted Poor Country (HIPC) initiative debt relief in late 2000. But Kigali's high defense expenditures cause tension between the government and international donors and lending agencies.

@Saint Helena

Introduction Saint Helena

Background:

Uninhabited when first discovered by the Portuguese in 1502, Saint Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile, from 1815 until his death in 1821, but its importance as a port of call

declined after the opening of the Suez Canal in 1869. Ascension Island is the site of a US Air Force auxiliary airfield; Gough Island has a meteorological station.

@Saint Kitts and Nevis

Introduction Saint Kitts and Nevis

Background:

First settled by the British in 1623, the islands became an associated state with full internal autonomy in 1967. The island of Anguilla rebelled and was allowed to secede in 1971. Saint Kitts and Nevis achieved independence in 1983. In 1998, a vote in Nevis on a referendum to separate from Saint Kitts fell short of the two-thirds majority needed.

Economy Saint Kitts and Nevis

Economy - overview:

Sugar was the traditional mainstay of the Saint Kitts economy until the 1970s. Although the crop still dominates the agricultural sector, activities such as tourism, export-oriented manufacturing, and offshore banking have assumed larger roles in the economy. As tourism revenues are now the chief source of the islands' foreign exchange, a decline in stopover tourist arrivals following the September 11, 2001 terrorist attacks has eroded government finances. The opening of a 1,000+ bed Marriott hotel in February 2003 is expected to bring in much-needed revenue.

Economy Saint Pierre and Miquelon

Economy - overview:

The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. The islands are heavily subsidized by France to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects. Recent test drilling for oil may pave the way for development of the energy sector.

Economy Saint Vincent and the Grenadines

Economy - overview:

Bananas and other agricultural products remain the staple of this lower-middle income country's economy. Although tourism and other services have been growing moderately in recent years, the government has been ineffective at introducing new industries. Unemployment remains high, and economic growth hinges upon seasonal variations in the agricultural and tourism sectors. Tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002, and tourism in the Eastern Caribbean has suffered low arrivals following 11 September 2001. Saint Vincent is home to a small offshore banking sector, but its restrictive secrecy laws have come under international review. As of June 2001, it remained on the Financial Action Task Force's list of noncooperative jurisdictions. Saint Vincent is also the largest producer of marijuana in the Eastern Caribbean and is increasingly being used as a transshipment point for illegal narcotics from South America.

@Samoa

Introduction Samoa

Background:

New Zealand occupied the German protectorate of Western Samoa at the outbreak of World War I in 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the "Western" from its name in 1997.

Economy Samoa

Economy - overview:

The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, and agriculture and fishing. The country is vulnerable to devastating storms. Agriculture employs two-thirds of the labor force, and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. The decline of fish stocks in the area is a continuing problem. Tourism is an expanding sector, accounting for 25% of GDP; about 88,000 tourists visited the islands in 2001. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline, meantime protecting the environment. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

Introduction San Marino

Background:

The third smallest state in Europe (after the Holy See and Monaco) also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named Marinus in 301 A.D. San Marino's foreign policy is aligned with that of Italy. Social and political trends in the republic also track closely with those of its larger neighbor.

@Sao Tome and Principe

Introduction Sao Tome and Principe

Background:

Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century - all grown with plantation slave labor, a form of which lingered into the 20th century. Although independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. Though the first free elections were held in 1991, the political environment has been one of continued instability with frequent changes in leadership and coup attempts in 1995 and 2003. The recent discovery of oil in the Gulf of Guinea is likely to have a significant impact on the country's economy.

Economy Sao Tome and Principe

Economy - overview:

This small poor island economy has become increasingly dependent on cocoa since independence 28 years ago. Cocoa production has substantially declined in recent years because of drought and mismanagement, but strengthening prices brighten prospects for 2003. Sao Tome has to import all fuels, most manufactured goods, consumer goods, and a substantial amount of food. Over the years, it has been unable to service its external debt and has had to depend on concessional aid and debt rescheduling. Sao Tome benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program. Sao Tome's success in implementing structural reforms has been rewarded by international donors, who pledged increased assistance in 2001. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies. Sao Tome is optimistic that substantial petroleum discoveries are forthcoming in its territorial waters in the oil-rich waters of the Gulf of Guinea; production could begin as early as 2004.

@Saudi Arabia

Introduction Saudi Arabia

Background:

In 1902, ABD AL-AZIZ bin Abd al-Rahman Al Saud captured Riyadh and set out on a 30-year campaign to unify the Arabian Peninsula. In the 1930s, the discovery of oil transformed the country. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. A burgeoning population, aquifer depletion, and an economy largely dependent on petroleum output and prices are all major governmental concerns.

Economy Saudi Arabia

Economy - overview:

This is an oil-based economy with strong government controls over major economic activities. Saudi Arabia has the largest reserves of petroleum in the world (26% of the proved reserves), ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 75% of budget revenues, 45% of GDP, and 90% of export earnings. About 25% of GDP comes from the private sector. Roughly 4 million foreign workers play an important role in the Saudi economy, for example, in the oil and service sectors. The government in 1999 announced plans to begin privatizing the electricity companies, which follows the ongoing privatization of the telecommunications company. The government is supporting private sector growth to lessen the kingdom's dependence on oil and increase employment opportunities for the swelling Saudi population. Priorities for government spending in the short term include additional funds for the water and sewage systems and for education. Water shortages and rapid population growth constrain the government's efforts to increase self-sufficiency in agricultural products.

Introduction Senegal

Background:

Independent from France in 1960, Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. However, the envisaged integration of the two countries was never carried out, and the union was dissolved in 1989. Despite peace talks, a southern separatist group sporadically has clashed with government forces since 1982. Senegal has a long history of participating in international peacekeeping.

Economy Senegal

Economy - overview:

In January 1994, Senegal undertook a bold and ambitious economic reform program with the support of the international donor community. This reform began with a 50% devaluation of Senegal's currency, the CFA franc, which was linked at a fixed rate to the French franc. Government price controls and subsidies have been steadily dismantled. After seeing its economy contract by 2.1% in 1993, Senegal made an important turnaround, thanks to the reform program, with real growth in GDP averaging 5% annually during 1995-2002. Annual inflation had been pushed down to less than 1%, but rose to an estimated 3.3% in 2001 and 3.0% in 2002. Investment rose steadily from 13.8% of GDP in 1993 to 16.5% in 1997. As a member of the West African Economic and Monetary Union (WAEMU), Senegal is working toward greater regional integration with a unified external tariff. Senegal also realized full Internet connectivity in 1996, creating a miniboom in information technology-based services. Private activity now accounts for 82% of GDP. In 2003, GDP will probably again grow at about 5%. On the negative side, Senegal faces deep-seated urban problems of chronic unemployment, trade union militancy, juvenile delinquency, and drug addiction.

Introduction Serbia and Montenegro

Background:

The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Occupation by Nazi Germany in 1941 was resisted by various paramilitary bands that fought themselves as well as the invaders. The group headed by Marshal TITO took full control upon German expulsion in 1945. Although Communist, his new government successfully steered its own path between the Warsaw Pact nations and the West for the next four and a half decades. In the early 1990s, post-TITO Yugoslavia began to unravel along ethnic lines: Slovenia, Croatia, and The Former Yugoslav Republic of Macedonia all declared their independence in 1991; Bosnia and Herzegovina in 1992. The remaining republics of Serbia and Montenegro declared a new "Federal Republic of Yugoslavia" (FRY) in 1992 and, under President Slobodan MILOSEVIC, Serbia led various military intervention efforts to unite Serbs in neighboring republics into a "Greater Serbia." All of these efforts were ultimately unsuccessful. In 1999, massive expulsions by FRY forces

and Serb paramilitaries of ethnic Albanians living in Kosovo provoked an international response, including the NATO bombing of Serbia and the stationing of NATO, Russian, and other peacekeepers in Kosovo. Federal elections in the fall of 2000, brought about the ouster of MILOSEVIC and installed Vojislav KOSTUNICA as president. The arrest of MILOSEVIC in 2001 allowed for his subsequent transfer to the International Criminal Tribunal for the Former Yugoslavia in The Hague to be tried for crimes against humanity. In 2001, the country's suspension was lifted, and it was once more accepted into UN organizations under the name of Yugoslavia. Kosovo has been governed by the UN Interim Administration Mission in Kosovo (UNMIK) since June 1999, under the authority of UN Security Council Resolution 1244. In 2002, the Serbian and Montenegrin components of Yugoslavia began negotiations to forge a looser relationship. These talks became a reality in February 2003 when lawmakers restructured the country into a loose federation of two republics called Serbia and Montenegro. An agreement was also reached to hold a referendum in each republic in three years on full independence.

Economy Serbia and Montenegro

Economy - overview:
MILOSEVIC-era mismanagement of the economy, an extended period of economic sanctions, and the damage to Yugoslavia's infrastructure and industry during the war in Kosovo have left the economy only half the size it was in 1990. Since the ousting of former Federal Yugoslav President MILOSEVIC in October 2000, the Democratic Opposition of Serbia (DOS) coalition government has implemented stabilization measures and embarked on an aggressive market reform program. After renewing its membership in the IMF in December 2000, Yugoslavia continued to reintegrate into the international community by rejoining the World Bank (IBRD) and the European Bank for Reconstruction and Development (EBRD). A World Bank-European Commission sponsored Donors' Conference held in June 2001 raised \$1.3 billion for economic restructuring. An agreement rescheduling the country's \$4.5 billion Paris Club government debts was concluded in November 2001; it will write off 66% of the debt; a similar debt relief agreement on its \$2.8 billion London Club commercial debt is still pending. The smaller republic of Montenegro severed its economy from federal control and from Serbia during the MILOSEVIC

era and continues to maintain its own central bank, uses the euro instead of the Yugoslav dinar as official currency, collects customs tariffs, and manages its own budget. Kosovo, while technically still part of the Federal Republic of Yugoslavia (now Serbia and Montenegro) according to United Nations Security Council Resolution 1244, is moving toward local autonomy under United Nations Interim Administration Mission in Kosovo (UNMIK) and is dependent on the international community for financial and technical assistance. The euro and the Yugoslav dinar are official currencies, and UNMIK collects taxes and manages the budget. The complexity of Serbia and Montenegro political relationships, slow progress in privatization, and stagnation in the European economy are holding back the economy. Arrangements with the IMF, especially requirements for fiscal discipline, are an important element in policy formation. Severe unemployment remains a key political economic problem.

Economy Seychelles

Economy - overview:
Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the old near-subsistence level. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years the government has encouraged foreign investment in order to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. A sharp drop illustrated the vulnerability of the tourist sector in 1991-92 due largely to the Gulf war, and once again following the 11 September 2001 terrorist attacks on the US. Other issues facing the government are the curbing of the budget deficit, including the containment of social welfare costs, and further privatization of public enterprises. Growth slowed in 1998-2002, due to sluggish tourist and tuna sectors. Also, tight controls on exchange rates and the scarcity of foreign exchange have impaired short-term economic prospects. The black market value of the Seychelles rupee is half the official exchange rate; without a devaluation of the currency

the tourist sector should remain sluggish as vacationers seek cheaper destinations such as Comoros, Mauritius, and Madagascar.

@Sierra Leone

Introduction Sierra Leone

Background:

Since 1991, civil war between the government and the Revolutionary United Front (RUF) has resulted in tens of thousands of deaths and

the displacement of more than 2 million people (well over one-third of the population), many of whom are now refugees in neighboring countries. After several setbacks, the end to the 11-year conflict in Sierra Leone may finally be near at hand. With the support of the UN peacekeeping force and contributions from the World Bank and international community, demobilization and disarmament of the RUF and Civil Defense Forces (CDF) combatants has been completed. National elections were held in May 2002 and the government continues to slowly reestablish its authority.

Economy Sierra Leone

Economy - overview:

Sierra Leone is an extremely poor African nation with tremendous

inequality in income distribution. It does have substantial mineral, agricultural, and fishery resources. However, the economic and social infrastructure is not well developed, and serious social disorders continue to hamper economic development, following a 11-year civil war. About two-thirds of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Plans continue to reopen bauxite and rutile mines shut down during the conflict. The major source of hard currency consists of the mining of diamonds. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad, which is essential to offset the severe trade imbalance and to supplement government revenues.

Economy Singapore

Economy - overview:

Singapore, a highly developed and successful free market economy, enjoys a remarkably open and corruption-free environment, stable prices, and one of the highest per capita GDPs in the world. The economy depends heavily on exports, particularly in electronics and manufacturing. It was hard hit in 2001-2002 by the global recession and the slump in the technology sector. The government hopes to establish a new growth path that will be less vulnerable to the external business cycle than the current export-led model but is unlikely to abandon efforts to establish Singapore as Southeast Asia's financial and high-tech hub.

Introduction Slovakia

Background:

In 1918 the Slovaks joined the closely related Czechs to form Czechoslovakia. Following the chaos of World War II, Czechoslovakia became a Communist nation within Soviet-ruled Eastern Europe. Soviet influence collapsed in 1989 and Czechoslovakia once more became free. The Slovaks and the Czechs agreed to separate peacefully on 1 January 1993. Slovakia was invited to join NATO and the EU in 2002.

Economy Slovakia

Economy - overview:

Slovakia has mastered much of the difficult transition from a centrally planned economy to a modern market economy. The DZURINDA

government has made excellent progress in 2001-03 in macroeconomic stabilization and structural reform. Major privatizations are nearly complete, the banking sector is almost completely in foreign hands, and foreign investment has picked up. Slovakia's economy exceeded expectations in 2001-03, despite the general European slowdown.

Unemployment, at an unacceptable 15% in 2003, remains the economy's Achilles heel. The government faces other strong challenges in 2004, especially the cutting of budget and current account deficits, the containment of inflation, and the strengthening of the health care system.

general assessment: a modernization and privatization program is increasing accessibility to telephone service, reducing the waiting time for new subscribers, and generally improving service quality
domestic: predominantly an analog system that is now receiving digital equipment and is being enlarged with fiber-optic cable, especially in the larger cities; mobile cellular capability has been added
international: three international exchanges (one in Bratislava and two in Banska Bystrica) are available; Slovakia is participating in several international telecommunications projects that will increase the availability of external services

Introduction Slovenia

Background:

The Slovene lands were part of the Holy Roman Empire and Austria until 1918 when the Slovenes joined the Serbs and Croats in forming a new nation, renamed Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though Communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power of the majority Serbs, the Slovenes succeeded in establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy have assisted in Slovenia's transformation to a modern state. In December 2002, Slovenia received an invitation to join NATO, and it is scheduled to accede to the EU along with nine other states on 1 May 2004. In a March 2003 referendum on NATO and EU membership, Slovenes voted 90% in favor of joining the EU and 66% in favor of joining NATO.

Economy Slovenia

Economy - overview:

Slovenia, with its historical ties to Western Europe, enjoys a GDP per capita substantially higher than that of the other transitioning economies of Central Europe. Privatization of the economy proceeded at an accelerated pace in 2002-3, and the budget deficit dropped from 3.0% of GDP in 2002 to 1.9% in 2003. Despite the economic slowdown in Europe in 2001-03, Slovenia maintained 3% growth. Structural reforms to improve the business environment allow for greater foreign participation in Slovenia's economy and help to lower unemployment. Further measures to curb inflation are also needed. Corruption and the high degree of coordination between government, business, and central bank policy are issues of concern

in the run-up to Slovenia's scheduled 1 May 2004 accession to the European Union.

@Solomon Islands

Introduction Solomon Islands

Background:

The UK established a protectorate over the Solomon Islands in the 1890s. Some of the bitterest fighting of World War II occurred on these islands. Self-government was achieved in 1976 and independence two years later. Ethnic violence, government malfeasance, and endemic crime have undermined stability and civil society.

Economy Solomon Islands

Economy - overview:

The bulk of the population depends on agriculture, fishing, and forestry for at least part of their livelihood. Most manufactured goods and petroleum products must be imported. The islands are rich in undeveloped mineral resources such as lead, zinc, nickel, and gold. However, severe ethnic violence, the closing of key business enterprises, and an empty government treasury have led to serious economic disarray, indeed near collapse. Tanker deliveries of crucial fuel supplies (including those for electrical generation) have become sporadic due to the government's inability to pay and attacks against ships. Telecommunications are threatened by the nonpayment of bills and by the lack of technical and maintenance staff many of whom have left the country.

Introduction Somalia

Background:

The SIAD BARRE regime was ousted in January 1991; turmoil, factional fighting, and anarchy have followed for twelve years. In

May of 1991, northern clans declared an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence, aided by the overwhelming dominance of a ruling clan and economic infrastructure left behind by British, Russian, and American military assistance programs. The regions of Bari and Nugaal and northern Mudug comprise a neighboring self-declared autonomous state of Puntland, which has been self-governing since 1998, but does not aim at independence; it has also made strides towards reconstructing a legitimate, representative government, but has suffered civil strife in 2002. Puntland disputes its border with Somaliland as it also claims portions of eastern Sool and Sanaag. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. The mandate of the Transitional National Government (TNG), created in August 2000 in Arta, Djibouti, expires in August 2003 and a new interim government was being created at peace talks held in Kenya. Numerous warlords and factions are still fighting for control of Mogadishu and the other southern regions. Suspicion of Somali links with global terrorism further complicates the picture.

Economy Somalia

Economy - overview:

Somalia's economic fortunes are being driven by its deep political divisions. The northern area has declared its independence as "Somaliland"; the central area, Puntland, is a self-declared autonomous state; and the remaining southern portion is riddled with the struggles of rival factions. Economic life continues, in part because much activity is local and relatively easily protected. Agriculture is the most important sector, with livestock normally accounting for about 40% of GDP and about 65% of export earnings, but Saudi Arabia's recent ban on Somali livestock, because of Rift

Valley Fever concerns, has severely hampered the sector. Nomads and semi-nomads, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar, sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and sold as scrap metal. Despite the seeming anarchy, Somalia's service sector has managed to survive and grow. Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money exchange services have sprouted throughout the country, handling between \$200 million and \$500 million in remittances annually. Mogadishu's main market offers a variety of goods from food to the newest electronic gadgets. Hotels continue to operate, and security is provided by militias. The ongoing civil disturbances and clan rivalries, however, have interfered with any broad-based economic development and international aid arrangements. In 2002 Somalia's overdue financial obligations to the IMF continued to grow.

@South Africa

Introduction South Africa

Background:

After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Boers resisted British encroachments, but were defeated in the Boer War (1899-1902). The resulting Union of South Africa operated under a policy of apartheid - the separate development of the races. The 1990s brought an end to apartheid politically and ushered in black majority rule.

Government South Africa

Country name:

conventional long form: Republic of South Africa

conventional short form: South Africa

former: Union of South Africa

abbreviation: RSA

Government type:

republic

Capital:

Pretoria; note - Cape Town is the legislative center and Bloemfontein the judicial center

Administrative divisions:

9 provinces; Eastern Cape, Free State, Gauteng, KwaZulu-Natal,

Limpopo, Mpumalanga, North-West, Northern Cape, Western Cape

Independence:

31 May 1910 (from UK); note - South Africa became a republic in 1961 following an October 1960 referendum

National holiday:

Freedom Day, 27 April (1994)

Constitution:

10 December 1996; this new constitution was certified by the Constitutional Court on 4 December 1996, was signed by then President MANDELA on 10 December 1996, and entered into effect on 3 February 1997; it is being implemented in phases

Legal system:

based on Roman-Dutch law and English common law; accepts compulsory ICJ jurisdiction, with reservations

Suffrage:

18 years of age; universal

Executive branch:

chief of state: President Thabo MBEKI (since 16 June 1999);
Executive Deputy President Jacob ZUMA (since 17 June 1999); note - the president is both the chief of state and head of government
elections: president elected by the National Assembly for a five-year term; election last held 2 June 1999 (next scheduled for sometime between May and July 2004)
head of government: President Thabo MBEKI (since 16 June 1999);
Executive Deputy President Jacob ZUMA (since 17 June 1999); note - the president is both the chief of state and head of government

cabinet: Cabinet appointed by the president

election results: Thabo MBEKI elected president; percent of National Assembly vote - 100% (by acclamation)

note: ANC-IFP is the governing coalition

Legislative branch:

bicameral Parliament consisting of the National Assembly (400 seats; members are elected by popular vote under a system of proportional representation to serve five-year terms) and the National Council of Provinces (90 seats, 10 members elected by each of the nine provincial legislatures for five-year terms; has special powers to protect regional interests, including the safeguarding of cultural and linguistic traditions among ethnic minorities); note - following the implementation of the new constitution on 3 February 1997 the former Senate was disbanded and replaced by the National Council of Provinces with essentially no change in membership and party affiliations, although the new institution's responsibilities have been changed somewhat by the new constitution

elections: National Assembly and National Council of Provinces - last held 2 June 1999 (next to be held by 2 August 2004)

Economy South Africa

Economy - overview:

South Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors; a stock exchange that ranks among the 10 largest in the world; and a modern infrastructure supporting an efficient distribution of goods to major urban centers throughout the region. However, growth has not been strong enough to lower South Africa's high unemployment rate; and daunting economic problems remain from the apartheid era, especially poverty and lack

of economic empowerment among the disadvantaged groups. High crime and HIV/AIDS infection rates also deter investment. South African economic policy is fiscally conservative, but pragmatic, focusing on targeting inflation and liberalizing trade as means to increase job growth and household income.

@Southern Ocean

Introduction Southern Ocean

Background:

A decision by the International Hydrographic Organization in the spring of 2000 delimited a fifth world ocean - the Southern Ocean - from the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude, which coincides with the Antarctic Treaty Limit. The Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean).

Geography Southern Ocean

Location:

body of water between 60 degrees south latitude and Antarctica

Geographic coordinates:

65 00 S, 0 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references:

Antarctic Region

Area:

total: 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area - comparative:

slightly more than twice the size of the US

Coastline:

17,968 km

Climate:

sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south

latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain:

the Southern Ocean is deep, 4,000 to 5,000 meters over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 meters (the global mean is 133 meters); the Antarctic icepack grows from an average minimum of 2.6 million square kilometers in March to about 18.8 million square kilometers in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second - 100 times the flow of all the world's rivers

Elevation extremes:

lowest point: -7,235 m at the southern end of the South Sandwich Trench

highest point: sea level 0 m

Natural resources:

probable large and possible giant oil and gas fields on the continental margin, manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals - none exploited; krill, fishes

Natural hazards:

huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 meter

thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Environment - current issues:

increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton) by as much as 15% and damaging the DNA of some fish; illegal, unreported, and unregulated fishing in recent years, especially the landing of an estimated five to six times more Patagonian toothfish than the regulated fishery, which is likely to affect the sustainability of the stock; large amount of incidental mortality of seabirds resulting from long-line fishing for toothfish
note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment - international agreements:

the Southern Ocean is subject to all international agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)
note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence) which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the very

cold polar surface waters to the south and the warmer waters to the north

Geography - note:

the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the very cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

Economy Southern Ocean

Economy - overview:

Fisheries in 2000-01 (1 July to 30 June) landed 112,934 metric tons, of which 87% was krill and 11% Patagonian toothfish. International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and antarctic toothfish. In the 2000-01 antarctic summer 12,248 tourists, most of them seaborne, visited the Southern Ocean and Antarctica, compared to 14,762 the previous year.

Transportation Southern Ocean

Ports and harbors:

McMurdo, Palmer, and offshore anchorages in Antarctica
note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most of them to short periods in midsummer; even then some cannot be entered without icebreaker escort; most antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels; vessels in any port south of 60 degrees south are subject to inspection by Antarctic Treaty observers (see Article 7)

Transportation - note:

Drake Passage offers alternative to transit through the Panama Canal

Transnational Issues Southern Ocean

Disputes - international:

Antarctic Treaty defers claims (see Antarctica entry), but Argentina, Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the United Nations Convention on the Law of the Sea (LOS) to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims have been made in the sector between 90 degrees west and 150 degrees west

@South Georgia and the South Sandwich

Introduction South Georgia and the South Sandwich Islands

Background:

The islands lie approximately 1,000 km east of the Falkland Islands and have been under British administration since 1908, except for a brief period in 1982 when Argentina occupied them. Grytviken, on South Georgia, was a 19th and early 20th century whaling station. Famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses scientists from the British Antarctic Survey. The islands have large bird and seal populations, and, recognizing the importance of preserving the marine stocks in adjacent waters, the UK, in 1993, extended the exclusive fishing zone from 12 NM to 200 NM around each island.

Geography South Georgia and the South Sandwich Islands

Location:

Southern South America, islands in the South Atlantic Ocean, east of the tip of South America

Geographic coordinates:

Maritime claims:

exclusive fishing zone: 200 NM

territorial sea: 12 NM

Climate:

variable, with mostly westerly winds throughout the year

interspersed with periods of calm; nearly all precipitation falls as snow

Terrain:

most of the islands, rising steeply from the sea, are rugged and mountainous; South Georgia is largely barren and has steep, glacier-covered mountains; the South Sandwich Islands are of volcanic origin with some active volcanoes

Elevation extremes: lowest point: Atlantic Ocean 0 m highest point: Mount Paget (South Georgia) 2,934 m

Natural resources:

fish

Land use:

arable land: 0%

permanent crops: 0%

other: 100% (largely covered by permanent ice and snow with some sparse vegetation consisting of grass, moss, and lichen) (1998 est.)

Irrigated land:

Natural hazards:

the South Sandwich Islands have prevailing weather conditions that generally make them difficult to approach by ship; they are also subject to active volcanism

Environment - current issues:

NA

Geography - note:

the north coast of South Georgia has several large bays, which

provide good anchorage; reindeer, introduced early in the 21st century, live on South Georgia

People South Georgia and the South Sandwich Islands

Population:

no indigenous inhabitants

note: the small military garrison on South Georgia withdrew in March 2001, to be replaced by a permanent group of scientists of the British Antarctic Survey, which also has a biological station on Bird Island; the South Sandwich Islands are uninhabited (July 2003 est.)

Government South Georgia and the South Sandwich Islands

Country name:

Dependency status:

overseas territory of the UK, also claimed by Argentina; administered from the Falkland Islands by a commissioner, who is concurrently governor of the Falkland Islands, representing Queen ELIZABETH II; Grytviken, formerly a whaling station on South Georgia, is a scientific base

National holiday:

Liberation Day, 14 June (1982)

Constitution:

adopted 3 October 1985

Legal system:

the laws of the UK, where applicable, apply; the senior magistrate from the Falkland Islands presides over the Magistrates Court

Diplomatic representation in the US:

Diplomatic representation from the US:

none (overseas territory of the UK, also claimed by Argentina)

Flag description:

blue, with the flag of the UK in the upper hoist-side quadrant and the South Georgia and the South Sandwich Islands coat of arms centered on the outer half of the flag; the coat of arms features a shield with a golden lion centered; the shield is supported by a fur seal on the left and a penguin on the right; a reindeer appears above the shield, and below it on a scroll is the motto LEO TERRAM PROPRIAM PROTEGAT (Let the Lion Protect its Own Land)

Economy South Georgia and the South Sandwich Islands

Economy - overview:

Some fishing takes place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from postage stamps produced in the UK, sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

@Spain

Introduction Spain

Background:

Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World Wars I and II, but suffered through a devastating civil war (1936-39). In the second half of the 20th century, Spain has played a catch-up role in the western international community; it joined the EU in 1986. Continuing concerns are Basque Fatherland and Liberty (ETA) terrorism and further reductions in unemployment.

Economy Spain

Economy - overview:

Spain's mixed capitalist economy supports a GDP that on a per capita basis is 80% that of the four leading West European economies. Its center-right government successfully worked to gain admission to the first group of countries launching the European single currency (the euro) on 1 January 1999. The AZNAR administration has continued to advocate liberalization, privatization, and deregulation of the economy and has introduced some tax reforms to that end. Unemployment has been steadily falling under the AZNAR administration but remains high at 11.7%. The government intends to make further progress in changing labor laws and reforming pension schemes, which are key to the sustainability of both Spain's internal economic advances and its competitiveness in a single currency area. A general strike in mid-2002 reduced cooperation between labor and government. Growth of 2.4% in 2003 was satisfactory given the background of a faltering European economy. Adjusting to the monetary and other economic policies of an integrated Europe - and reducing unemployment - will pose challenges to Spain over the next few years.

@Spratly Islands

Introduction Spratly Islands

Background:

The Spratly Islands consist of more than 100 small islands or reefs. They are surrounded by rich fishing grounds and potentially by gas and oil deposits. They are claimed in their entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. About 50 islands are occupied by China (about 450 soldiers), Malaysia (70-90), the Philippines (about 100), and Vietnam (about 1,500). Brunei is a claimant but has no outposts.

Geography Spratly Islands

Location:

Southeastern Asia, group of reefs and islands in the South China

Sea, about two-thirds of the way from southern Vietnam to the southern Philippines

Economy Spratly Islands

Economy - overview:

Economic activity is limited to commercial fishing. The proximity to nearby oil- and gas-producing sedimentary basins suggests the potential for oil and gas deposits, but the region is largely unexplored, and there are no reliable estimates of potential reserves; commercial exploitation has yet to be developed.

Transnational Issues Spratly Islands

Disputes - international:

all of the Spratly Islands are claimed by China, Taiwan, and Vietnam; parts of them are claimed by Malaysia and the Philippines; in 1984, Brunei established an exclusive fishing zone that encompasses Louisa Reef in the southern Spratly Islands but has not publicly claimed the island; claimants in November 2002 signed the "Declaration on the Conduct of Parties in the South China Sea", a mechanism to ease tension but which fell short of a legally binding "code of conduct"

@Sri Lanka

Introduction Sri Lanka

Background:

The Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced beginning in about the mid-third century B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa 1000 A.D.) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty seized power in the north and established a Tamil kingdom. Occupied by the Portuguese in the 16th century and by the Dutch in the 17th century, the island was ceded to the British in 1796, became a crown colony in 1802, and was united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted in violence in the mid-1980s. Tens of thousands have died in an ethnic war that continues to fester. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam began a ceasefire in December 2001, with Norway brokering peace negotiations.

Economy Sri Lanka

Economy - overview:
In 1977, Colombo abandoned statist economic policies and its import
substitution trade policy for market-oriented policies and
export-oriented trade. Sri Lanka's most dynamic sectors now are food

processing, textiles and apparel, food and beverages, telecommunications, and insurance and banking. By 1996 plantation crops made up only 20% of exports (compared with 93% in 1970), while textiles and garments accounted for 63%. GDP grew at an average annual rate of 5.5% in the early 1990s until a drought and a deteriorating security situation lowered growth to 3.8% in 1996. The economy rebounded in 1997-2000 with average growth of 5.3%, but 2001 saw the first contraction in the country's history, -1.4%, due to a combination of power shortages, severe budgetary problems, the global slowdown, and continuing civil strife. Growth recovered to 3.2% in 2002. About 800,000 Sri Lankans work abroad, 90% in the Middle East. They send home about \$1 billion a year.

Introduction Sudan

Background:

Military regimes favoring Islamic-oriented governments have dominated national politics since independence from the UK in 1956. Sudan has been embroiled in a civil war for all but 10 years of this period (1972-82). The wars are rooted in northern economic, political, and social domination of non-Muslim, non-Arab southern Sudanese. Since 1983, the war and war- and famine-related effects have led to more than 2 million deaths and over 4 million people displaced. The ruling regime is a mixture of military elite and an Islamist party that came to power in a 1989 coup. Some northern opposition parties have made common cause with the southern rebels and entered the war as a part of an anti-government alliance. Peace talks gained momentum in 2002-03 with the signing of several accords, including a cease-fire agreement.

Economy Sudan

Economy - overview:

Sudan has turned around a struggling economy with sound economic policies and infrastructure investments, but it still faces formidable economic problems, notably the low level of per capita output. From 1997 to date, Sudan has been implementing IMF macroeconomic reforms. In 1999 Sudan began exporting crude oil and in the last quarter of 1999 recorded its first trade surplus, which, along with monetary policy, has stabilized the exchange rate. Increased oil production, revived light industry, and expanded export processing zones helped maintain GDP growth at 5.1% in 2002. Agriculture production remains Sudan's most important sector, employing 80% of the work force and contributing 43% of GDP, but most farms remain rain-fed and susceptible to drought. Chronic domestic instability, lagging reforms, adverse weather, and weak world agricultural prices - but, above all, the low starting point - ensure that much of the population will remain at or below the poverty line for years.

Transnational Issues Sudan

Disputes - international:

the north-south civil war has drawn Sudan's neighbors into the fighting, sheltering refugees, and infiltration by rebel groups - Kenya and Uganda have acted as mediators; Sudan accuses Eritrea of supporting Sudanese rebel groups; efforts to demarcate the porous boundary with Ethiopia have been delayed by fighting in Sudan; Kenya's administrative boundary still extends into the Sudan, creating the "Ilemi triangle"; Egypt and Sudan retain claims to administer the triangular areas that extend north and south of the

1899 Treaty boundary along the 22nd Parallel, but have withdrawn their military presence; Egypt is economically developing the "Hala'ib triangle"

Introduction Suriname

Background:

Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by a military regime that soon declared a socialist republic. It continued to rule through a succession of nominally civilian administrations until 1987, when international pressure finally forced a democratic election. In 1989, the military overthrew the civilian government, but a democratically-elected government returned to power in 1991.

Economy Suriname

Economy - overview:

The economy is dominated by the bauxite industry, which accounts for more than 15% of GDP and 70% of export earnings. Suriname's economic prospects for the medium term will depend on renewed commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition. The government of Ronald VENETIAAN has begun an austerity program, raised taxes, and attempted to control spending. However, in 2002, President VENETIAAN agreed to a large pay raise for civil servants, which threatens his earlier gains in stabilizing the economy. The Dutch Government has agreed to restart the aid flow, which will allow Suriname to access international development financing. The short-term economic outlook depends on the government's ability to control inflation and on the development of projects in the bauxite and gold mining sectors.

Economy - overview:
Coal mining is the major economic activity on Svalbard. The treaty of 9 February 1920 gives the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still mining are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some trapping of seal, polar bear, fox, and walrus.

Introduction Swaziland

Background:

Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted 1968. Student and labor unrest during the 1990s have pressured the monarchy (one of the oldest on the continent) to grudgingly allow political reform and greater democracy.

Economy Swaziland

Economy - overview:

In this small, landlocked economy, subsistence agriculture occupies more than 80% of the population. The manufacturing sector has diversified since the mid-1980s. Sugar and wood pulp remain important foreign exchange earners. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Surrounded by South Africa, except for a short border with Mozambique, Swaziland is heavily dependent on South Africa from which it receives nine-tenths of its imports and to which it sends more than two-thirds of its exports. Customs duties from the Southern African Customs Union and worker remittances from South Africa substantially supplement domestically earned income. The government is trying to improve the atmosphere for foreign investment. Overgrazing, soil depletion, drought, and sometimes floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2002 because of drought, and more than one-third of the adult population was infected by HIV/AIDS.

Introduction Sweden

Background:

A military power during the 17th century, Sweden has not participated in any war in almost two centuries. An armed neutrality was preserved in both World Wars. Sweden's long-successful economic formula of a capitalist system interlarded with substantial welfare elements was challenged in the 1990s by high unemployment, rising maintenance costs, and a declining position in world markets.

Indecision over the country's role in the political and economic integration of Europe delayed Sweden's entry into the EU until 1995, and waived the introduction of the euro in 1999.

Economy Sweden

Economy - overview:

Aided by peace and neutrality for the whole 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for only 2% of GDP and 2% of the jobs. The government's commitment to fiscal discipline resulted in a substantial budgetary surplus in 2001, which was cut by more than half in 2002, due to the global economic slowdown, revenue declines, and spending increases. The Swedish central bank (the Riksbank) is focusing on price stability with its inflation target of 2%. Growth remained sluggish in 2003. On September 14, 2003, Swedish voters turned down entry into the euro system, concerned about the impact on democracy and sovereignty.

Introduction Switzerland

Background:

Switzerland's independence and neutrality have long been honored by the major European powers, and Switzerland was not involved in either of the two World Wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active

in many UN and international organizations, but retains a strong commitment to neutrality.

Economy Switzerland

Economy - overview:

Switzerland is a prosperous and stable modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP larger than that of the big western European economies. The Swiss in recent years have brought their economic practices largely into conformity with the EU's to enhance their international competitiveness. Switzerland remains a safe haven for investors, because it has maintained a degree of bank secrecy and has kept up the franc's long-term external value. Reflecting the anemic economic conditions of Europe, GDP growth dropped in 2001 to about 0.8%, to 0.2% in 2002, and to -0.3% in 2003.

Introduction Syria

Background:

Following the breakup of the Ottoman Empire during World War I, Syria was administered by the French until independence in 1946. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. Since 1976, Syrian troops have been stationed in Lebanon, ostensibly in a peacekeeping capacity. In recent years, Syria and Israel have held occasional peace talks over the return of the Golan Heights.

Economy Syria

Economy - overview:

Syria's predominantly statist economy has been growing, on average, more slowly than its 2.4% annual population growth rate, causing a persistent decline in per capita GDP. Recent legislation allows private banks to operate in Syria, although a private banking sector will take years and further government cooperation to develop. External factors such as the international war on terrorism, the Israeli-Palestinian conflict, and the war between the US-led coalition and Iraq probably will drive real annual GDP growth levels back below their 3.5% spike in 2002. A long-run economic constraint is the pressure on water supplies caused by rapid population growth, industrial expansion, and increased water pollution.

@Taiwan

Introduction Taiwan

Background:

In 1895, military defeat forced China to cede Taiwan to Japan. It reverted to Chinese control after World War II. Following the Communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the 1947 constitution drawn up for all of China. Over the next five decades, the ruling authorities gradually democratized and incorporated the native population within the governing structure. In 2000, Taiwan underwent its first peaceful transfer of power from the Nationalist to the Democratic Progressive Party. Throughout this period, the island prospered and became one of East Asia's economic "Tigers." The dominant political issues continue to be the relationship between Taiwan and China - specifically the question of eventual unification - as well as domestic political and economic reform.

Economy Taiwan

Economy - overview:

Taiwan has a dynamic capitalist economy with gradually decreasing guidance of investment and foreign trade by government authorities. In keeping with this trend, some large government-owned banks and industrial firms are being privatized. Exports have provided the primary impetus for industrialization. The trade surplus is substantial, and foreign reserves are the world's third largest. Agriculture contributes 2% to GDP, down from 32% in 1952. While Taiwan is a major investor throughout Southeast Asia, China has

become the largest destination for investment and has overtaken the US to become Taiwan's largest export market. Because of its conservative financial approach and its entrepreneurial strengths, Taiwan suffered little compared with many of its neighbors from the Asian financial crisis in 1998. The global economic downturn, combined with problems in policy coordination by the administration and bad debts in the banking system, pushed Taiwan into recession in 2001, the first year of negative growth ever recorded. Unemployment also reached record levels. Output recovered moderately in 2002 in the face of continued global slowdown, fragile consumer confidence, and bad bank loans. Growing economic ties with China are a dominant long-term factor. Exports to China - mainly parts and equipment for the assembly of goods for export to developed countries - drove Taiwan's economic recovery in 2002.

Introduction Tajikistan

Background:

Tajikistan has experienced three changes in government and a five-year civil war since it gained independence in 1991 from the USSR. A peace agreement among rival factions was signed in 1997, and implemented in 2000. The central government's less than total control over some areas of the country has forced it to compromise and forge alliances among factions. Attention by the international community in the wake of the war in Afghanistan has brought increased economic development assistance, which could create jobs and increase stability in the long term. Tajikistan is in the early stages of seeking World Trade Organization membership and has joined NATO's Partnership for Peace.

Economy Tajikistan

Economy - overview:

Tajikistan has the lowest per capita GDP among the 15 former Soviet republics. Only 8% to 10% of the land area is arable. Cotton is the most important crop. Mineral resources, varied but limited in amount, include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992-97) severely damaged the already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Even though 60% of its people continue to live in abject poverty, Tajikistan has experienced steady economic growth since 1997. Continued privatization of medium and large state-owned enterprises will further increase productivity. Tajikistan's economic situation, however, remains fragile due to uneven implementation of structural reforms, weak governance, widespread unemployment, and the external debt burden. A debt restructuring agreement was reached with Russia in December 2002, including an interest rate of 4%, a 3-year grace period, and a US \$49.8 million credit to the Central Bank of Tajikistan.

Illicit drugs:
major transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of opium poppy for domestic consumption; Tajikistan

seizes roughly 80 percent of all drugs captured in Central Asia and stands third world-wide in seizures of opiates (heroin and raw opium)

Introduction Tanzania

Background:

Shortly after independence, Tanganyika and Zanzibar merged to form the nation of Tanzania in 1964. One-party rule came to an end in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition have led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities.

Economy Tanzania

Economy - overview:

Tanzania is one of the poorest countries in the world. The economy depends heavily on agriculture, which accounts for half of GDP, provides 85% of exports, and employs 80% of the work force. Topography and climatic conditions, however, limit cultivated crops to only 4% of the land area. Industry traditionally featured the processing of agricultural products and light consumer goods. The World Bank, the International Monetary Fund, and bilateral donors have provided funds to rehabilitate Tanzania's out-of-date economic infrastructure and to alleviate poverty. Growth in 1991-2002 featured a pickup in industrial production and a substantial increase in output of minerals, led by gold. Oil and gas exploration and development played an important role in this growth. Recent banking reforms have helped increase private sector growth and investment. Continued donor support and solid macroeconomic policies should support continued real GDP growth of 5% in 2003.

Introduction Thailand

Background:

A unified Thai kingdom was established in the mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US ally following the conflict.

Economy Thailand

Economy - overview:

Thailand has a free enterprise economy and welcomes foreign investment. Exports feature computers and electrical appliances. After enjoying the world's highest growth rate from 1985 to 1995 - averaging almost 9% annually - increased speculative pressure on Thailand's currency in 1997 led to a crisis that uncovered financial sector weaknesses and forced the government to float the baht. Long pegged at 25 to the dollar, the baht reached its lowest point of 56 to the dollar in January 1998, and the economy contracted by 10.2% that same year. Thailand then entered a recovery stage, expanding by 4.2% in 1999 and 4.4% in 2000, largely due to strong exports. An ailing financial sector and the slow pace of corporate debt restructuring, combined with a softening of global demand, slowed growth to 1.4% in 2001. Increased consumption and investment spending pushed GDP growth up to 5.2% in 2002 despite a sluggish global economy.

Introduction Togo

Background:

French Togoland became Togo in 1960. Gen. Gnassingbe EYADEMA, installed as military ruler in 1967, is Africa's longest-serving head of state. Despite the facade of multiparty elections instituted in the early 1990s, the government continues to be dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party has maintained power almost continually since 1967. In addition, Togo has come under fire from international organizations for human rights abuses and is plagued by political unrest. Most bilateral and multilateral aid to Togo remains frozen.

Economy Togo

Economy - overview:

This small sub-Saharan economy is heavily dependent on both commercial and subsistence agriculture, which provides employment for 65% of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings, with cotton being the most important cash crop. Togo is the world's fourth-largest producer of phosphate, but production fell an estimated 22% in 2002 due to power shortages and the cost of developing new deposits. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on following through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors.

Introduction Tonga

Background:

The archipelago of "The Friendly Islands" was united into a Polynesian kingdom in 1845. It became a constitutional monarchy in 1875 and a British protectorate in 1900. Tonga acquired its independence in 1970 and became a member of the Commonwealth of Nations. It remains the only monarchy in the Pacific.

Economy Tonga

Economy - overview:
Tonga has a small, open economy with a narrow export base in

agricultural goods. Squash, coconuts, bananas, and vanilla beans are the main crops, and agricultural exports make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. Tourism is the second-largest source of hard currency earnings following remittances. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well-developed social services.

Economy Trinidad and Tobago

Economy - overview:

Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses. A leading performer the past four years has been the booming natural gas sector. Tourism is a growing sector, although not proportionately as important as in many other Caribbean islands. The economy benefits from low inflation and a trade surplus. The year 2002 was marked by solid growth in the oil sector, offset in part by domestic political uncertainty.

@Tunisia

Introduction Tunisia

Background:

Following independence from France in 1956, President Habib BOURGUIBA established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In recent years, Tunisia has taken a moderate, non-aligned stance in its foreign relations. Domestically, it has sought to defuse rising pressure for a more open political society.

Economy Tunisia

Economy - overview:

Tunisia has a diverse economy, with important agricultural, mining, energy, tourism, and manufacturing sectors. Governmental control of economic affairs while still heavy has gradually lessened over the past decade with increasing privatization, simplification of the tax structure, and a prudent approach to debt. Real growth averaged 5.4% in 1997-2001 but slowed to 1.9% in 2002 because of agricultural drought, slow investment, and lackluster tourism. Increased rainfall portends higher growth levels for 2003, but continued regional tension from the war in Iraq will most likely continue to suppress tourism earnings. Tunisia has agreed to gradually remove barriers to trade with the European Union over the next decade. Broader privatization, further liberalization of the investment code to

increase foreign investment, improvements in government efficiency, and reduction of the trade deficit are among the challenges for the future.

@Turkey

Introduction Turkey

Background:

Present-day Turkey was created in 1923 from the Turkish remnants of the Ottoman Empire. Soon thereafter, the country instituted secular laws to replace traditional religious fiats. In 1945 Turkey joined the UN, and in 1952 it became a member of NATO. Turkey intervened militarily on Cyprus in 1974 to protect Turkish Cypriots and prevent a Greek takeover of the island; the northern 37 percent of the island remains under Turkish Cypriot control. Relations between the two countries remain strained, but have begun to improve over the

past few years. In 1984, the Kurdistan Workers' Party (PKK), a Marxist-Leninist, separatist group, initiated an insurgency in southeast Turkey, often using terrorist tactics to try to attain its goal of an independent Kurdistan. The group - whose leader, Abdullah OCALAN, was captured in Kenya in February 1999 - has observed a unilateral cease-fire since September 1999, although there have been occasional clashes between Turkish military units and some of the 4,000-5,000 armed PKK militants, most of whom currently are encamped in northern Iraq. The PKK changed its name to the Kurdistan Freedom and Democracy Congress (KADEK) in April 2002.

Economy Turkey

Economy - overview:

Turkey's dynamic economy is a complex mix of modern industry and commerce along with a traditional agriculture sector that in 2001 still accounted for 40% of employment. It has a strong and rapidly growing private sector, yet the state still plays a major role in basic industry, banking, transport, and communication. The most important industry - and largest exporter - is textiles and clothing, which is almost entirely in private hands. In recent years the economic situation has been marked by erratic economic growth and serious imbalances. Real GNP growth has exceeded 6% in many years, but this strong expansion has been interrupted by sharp declines in output in 1994, 1999, and 2001. Meanwhile, the public

sector fiscal deficit has regularly exceeded 10% of GDP - due in large part to the huge burden of interest payments, which account for more than 50% of central government spending. Inflation, in recent years in the high double-digit range, fell to 26% in 2003. Perhaps because of these problems, foreign direct investment in Turkey remains low - less than \$1 billion annually. In late 2000 and early 2001 a growing trade deficit and serious weaknesses in the banking sector plunged the economy into crisis - forcing Turkey to float the lira and pushing the country into recession. Results in 2002-03 were much better, because of strong financial support from the IMF and tighter fiscal policy. Continued slow global growth and serious political tensions in the Middle East could result in negative growth in 2004.

Introduction Turkmenistan

Background:

Annexed by Russia between 1865 and 1885, Turkmenistan became a Soviet republic in 1925. It achieved its independence upon the dissolution of the USSR in 1991. President NIYAZOV retains absolute control over the country and opposition is not tolerated. Extensive hydrocarbon/natural gas reserves could prove a boon to this underdeveloped country if extraction and delivery projects can be worked out.

Geography Turkmenistan

Location:

Central Asia, bordering the Caspian Sea, between Iran and Kazakhstan

Geographic coordinates:

Economy Turkmenistan

Economy - overview:

Turkmenistan is largely desert country with intensive agriculture in irrigated oases and large gas and oil resources. One-half of its irrigated land is planted in cotton, making it the world's tenth-largest producer. With an authoritarian ex-Communist regime in power and a tribally based social structure, Turkmenistan has taken a cautious approach to economic reform, hoping to use gas and cotton sales to sustain its inefficient economy. Privatization goals remain limited. In 1998-2003, Turkmenistan suffered from the continued lack

of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose by 38% in 2003, largely because of higher international oil and gas prices. Overall prospects in the near future are discouraging because of widespread internal poverty, the burden of foreign debt, and the unwillingness of the government to adopt market-oriented reforms. However, Turkmenistan's cooperation with the international community in transporting humanitarian aid to Afghanistan may foreshadow a change in the atmosphere for foreign investment, aid, and technological support. Turkmenistan's economic statistics are state secrets, and GDP and other figures are subject to wide margins of error. In any event, GDP increased substantially in 2003 because of a strong recovery in agriculture and rapid industrial growth.

@Turks and Caicos Islands

Introduction Turks and Caicos Islands

Background:

The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands are presently a British overseas territory.

@Tuvalu

Introduction Tuvalu

Background:

In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain name ".tv" for \$50 million in royalties over the next dozen years.

Geography Tuvalu

Location:

Oceania, island group consisting of nine coral atolls in the South Pacific Ocean, about one-half of the way from Hawaii to Australia

Geographic coordinates:

Maritime claims:

Natural resources: fish

Land use: arable land: 0% permanent crops: 0% other: 100% (1998 est.)

Irrigated land:

NA sq km

Natural hazards:

severe tropical storms are usually rare, but, in 1997, there were three cyclones; low level of islands make them very sensitive to changes in sea level

Environment - current issues:

since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities (the Japanese Government has built one desalination plant and plans to build one other); beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from the spread of the Crown of Thorns starfish; Tuvalu is very concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which threaten the country's underground water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary

Environment - international agreements:

party to: Climate Change, Climate Change-Kyoto Protocol,
Desertification, Ozone Layer Protection, Ship Pollution
signed, but not ratified: Biodiversity, Law of the Sea

Geography - note:

one of the smallest and most remote countries on Earth; six of the
coral atolls - Nanumea, Nui, Vaitupu, Nukufetau, Funafuti, and
Nukulaelae - have lagoons open to the ocean; Nanumaya and Niutao
have landlocked lagoons; Niulakita does not have a lagoon

Economy Tuvalu

Economy - overview:

Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. The country has no known mineral resources and few exports. Subsistence farming and fishing are the primary economic activities. Fewer than 1,000 tourists, on average, visit Tuvalu annually. Government revenues largely come from the sale of stamps and coins and worker remittances. About 1,000 Tuvaluans work in Nauru in the phosphate mining industry. Nauru has begun repatriating Tuvaluans, however, as phosphate resources decline. Substantial income is received annually from an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this Fund has grown from an initial \$17 million to over \$35 million in 1999. The US government is also a major revenue source for Tuvalu, because of payments from a 1988 treaty on fisheries. In an effort to reduce its dependence on foreign aid, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts of up to 7%. In 1998, Tuvalu began deriving revenue from use of its area code for "900" lines and in 2000, from the lease of its ".tv" Internet domain name. Royalties from these new technology sources could increase substantially over the next

decade. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and investment income from overseas assets.

@Uganda

Introduction Uganda

Background:

Uganda achieved independence from the UK in 1962. The dictatorial regime of Idi AMIN (1971-79) was responsible for the deaths of some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980-85) claimed at least another 100,000 lives. During the 1990s, the government promulgated non-party presidential and legislative elections.

Economy Uganda

Economy - overview:

Uganda has substantial natural resources, including fertile soils, regular rainfall, and sizable mineral deposits of copper and cobalt. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for the bulk of export revenues. Since 1986, the government - with the support of foreign countries and international agencies - has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising

producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. During 1990-2001, the economy turned in a solid performance based on continued investment in the rehabilitation of infrastructure, improved incentives for production and exports, reduced inflation, gradually improved domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Ongoing Ugandan involvement in the war in the Democratic Republic of the Congo, corruption within the government, and slippage in the government's determination to press reforms raise doubts about the continuation of strong growth. In 2000, Uganda qualified for enhanced Highly Indebted Poor Countries (HIPC) debt relief worth \$1.3 billion and Paris Club debt relief worth \$145 million. These amounts combined with the original HIPC debt relief added up to about \$2 billion. Growth for 2001-02 was solid despite continued decline in the price of coffee, Uganda's principal export. Prospects for 2003 are mixed, with probable strengthening of coffee prices yet with halting growth in the economies of major export customers.

Introduction Ukraine

Background:

Ukraine was the center of the first Slavic state, Kievan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by internecine quarrels and Mongol invasions, Kievan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kievan Rus laid the foundation for Ukrainian nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by

the Russian Empire. Following the collapse of czarist Russia in 1917, Ukraine was able to bring about a short-lived period of independence (1917-1920), but was reconquered and forced to endure a brutal Soviet rule that engineered two artificial famines (1921-22 and 1932-33) in which over 8 million died. In World War II, German and Soviet armies were responsible for some 7 to 8 million more deaths. Although independence was achieved in 1991 with the dissolution of the USSR, true freedom remains elusive, as many of the former Soviet elite remain entrenched, stalling efforts at economic reform, privatization, and civil liberties.

Economy Ukraine

Economy - overview:

After Russia, the Ukrainian republic was far and away the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Ukraine depends on imports of energy, especially natural gas, to meet some 85% of its annual energy requirements. Shortly after independence in December 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Loose monetary policies pushed inflation to hyperinflationary levels in late 1993. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Now in his second term, President KUCHMA has pledged to reduce the number of government agencies, streamline the regulatory process, create a legal environment to encourage entrepreneurs, and enact a comprehensive tax overhaul. Reforms in the more politically sensitive areas of structural reform and land privatization are

still lagging. Outside institutions - particularly the IMF - have encouraged Ukraine to quicken the pace and scope of reforms. GDP in 2000 showed strong export-based growth of 6% - the first growth since independence - and industrial production grew 12.9%. The economy continued to expand in 2001 as real GDP rose 9% and industrial output grew by over 14%. Growth of 4.1% in 2002 was more moderate, in part a reflection of faltering growth in the developed world. In general, growth has been undergirded by strong domestic demand, low inflation, and solid consumer and investor confidence. Growth was a sturdy 6% in 2003 despite a loss of momentum in needed economic reforms.

Telephone system:
general assessment: Ukraine's telecommunication development plan, running through 2005, emphasizes improving domestic trunk lines, international connections, and the mobile cellular system
domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is now rising slowly and the domestic trunk system is being improved; the mobile cellular telephone system is expanding at a high rate
international: two new domestic trunk lines are a part of the

fiber-optic Trans-Asia-Europe (TAE) system and three Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project which connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems

Illicit drugs:

limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; drug-related money laundering a minor, but growing, problem; lax anti-money-laundering regime

Introduction United Arab Emirates

Background:

The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states - Abu Zaby, 'Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn - merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra's al Khaymah. The UAE's per capita GDP is not far below those of leading West European nations. Its generosity with oil revenues and its moderate foreign policy stance have allowed the UAE to play a vital role in the affairs of the region.

Economy United Arab Emirates

Economy - overview:

The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Its wealth is based on oil and gas output (about 33% of GDP), and the fortunes of the economy fluctuate with the prices of those commodities. Since 1973, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. At present levels of production, oil and gas reserves should last for more than 100 years. The government has increased spending on job creation and infrastructure expansion and is opening up its utilities to greater private sector involvement.

Transnational Issues United Arab Emirates

Disputes - international:
because the treaties have not been made public, the exact alignment of the boundary with Saudi Arabia is still unknown and labeled approximate; boundary agreement signed and ratified with Oman in 2003 for entire border, including Oman's Musandam Peninsula and Al Madhah enclaves; UAE engage direct talks and Arab League support to resolve disputes over Iran's occupation of Lesser and Greater Tunb islands and Abu Musa island

Illicit drugs:
the UAE is a drug transshipment point for traffickers given its proximity to southwest Asian drug producing countries; the UAE's position as a major financial center makes it vulnerable to money laundering; anti-money-laundering legislation was signed into law by the president on 25 January 2002

Introduction United Kingdom

Background:

Great Britain, the dominant industrial and maritime power of the 19th century, played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two World Wars. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council, a founding member of NATO, and of the Commonwealth, the UK pursues a global approach to foreign policy; it currently is weighing the degree of its integration with continental Europe. A member of the EU, it chose to remain outside the European Monetary Union for the time being. Constitutional reform is also a significant issue in the UK. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1999.

Geography United Kingdom

Location:

Western Europe, islands including the northern one-sixth of the island of Ireland between the North Atlantic Ocean and the North Sea, northwest of France

Independence:

England has existed as a unified entity since the 10th century; the union between England and Wales, begun in 1284 with the Statute of Rhuddlan, was not formalized until 1536 with an Act of Union; in another Act of Union in 1707, England and Scotland agreed to

permanently join as Great Britain; the legislative union of Great Britain and Ireland was implemented in 1801, with the adoption of the name the United Kingdom of Great Britain and Ireland; the Anglo-Irish treaty of 1921 formalized a partition of Ireland; six northern Irish counties remained part of the United Kingdom as Northern Ireland and the current name of the country, the United Kingdom of Great Britain and Northern Ireland, was adopted in 1927

National holiday:

Official Birthday of Queen ELIZABETH II, celebrated on the second Saturday in June (1926)

Constitution:

unwritten; partly statutes, partly common law and practice

Legal system:

common law tradition with early Roman and modern continental influences; has judicial review of Acts of Parliament under the Human Rights Act of 1998; accepts compulsory ICJ jurisdiction, with reservations

18 years of age; universal

Executive branch:

chief of state: Queen ELIZABETH II (since 6 February 1952); Heir

Apparent Prince CHARLES (son of the queen, born 14 November 1948)

head of government: Prime Minister Anthony (Tony) BLAIR (since 2 May 1997)

cabinet: Cabinet of Ministers appointed by the prime minister

elections: none; the monarchy is hereditary; following legislative

elections, the leader of the majority party or the leader of the majority coalition is usually the prime minister

Legislative branch:

bicameral Parliament comprised of House of Lords (consists of approximately 500 life peers, 92 hereditary peers and 26 clergy) and House of Commons (659 seats; members are elected by popular vote to serve five-year terms unless the House is dissolved earlier)

elections: House of Lords - no elections (note - in 1999, as provided by the House of Lords Act, elections were held in the House of Lords to determine the 92 hereditary peers who would remain there; pending further reforms, elections are held only as vacancies in the hereditary peerage arise); House of Commons - last held 7 June 2001 (next to be held by NA May 2006)

election results: House of Commons - percent of vote by party - Labor 42.1%, Conservative and Unionist 32.7%, Liberal Democrats 18.8%, other 6.4%; seats by party - Labor 412, Conservative and Unionist 166, Liberal Democrat 52, other 29; note - seating as of 15 February 2002: Labor 410, Conservative 164, Liberal Democrats 53, other 32

note: in 1998 elections were held for a Northern Ireland Parliament (because of unresolved disputes among existing parties, the transfer of power from London to Northern Ireland came only at the end of 1999 and has been rescinded three times the latest occurring in October 2002; since October 2002 the Northern Ireland Parliament has been suspended); in 1999 there were elections for a new Scottish Parliament and a new Welsh Assembly

Economy United Kingdom

Economy - overview:

The UK, a leading trading power and financial center, is one of the

quartet of trillion dollar economies of Western Europe. Over the past two decades the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with only 1% of the labor force. The UK has large coal, natural gas, and oil reserves; primary energy production accounts for 10% of GDP, one of the highest shares of any industrial nation. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. GDP growth slipped in 2001-03 as the global downturn, the high value of the pound, and the bursting of the "new economy" bubble hurt manufacturing and exports. Still, the economy is one of the strongest in Europe; inflation, interest rates, and unemployment remain low. The relatively good economic performance has complicated the BLAIR government's efforts to make a case for Britain to join the European Economic and Monetary Union (EMU). Critics point out, however, that the economy is doing well outside of EMU, and they point to public opinion polls that continue to show a majority of Britons opposed to the single currency. Meantime, the government has been speeding up the improvement of education, transport, and health services, at a cost in higher taxes. The war in March-April 2003 between a US-led coalition and Iraq, together with the subsequent problems of restoring the economy and the polity, involve a heavy commitment of British military forces.

Introduction United States

Background:

Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65) and the Great Depression of the 1930s. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation-state. The economy is marked by steady growth, low unemployment and inflation, and rapid advances in technology.

note: includes only the 50 states and District of Columbia

Area - comparative:

about half the size of Russia; about three-tenths the size of Africa; about half the size of South America (or slightly larger than Brazil); slightly larger than China; about two and a half times the size of Western Europe

Land boundaries:

total: 12,034 km

border countries: Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,141 km

note: US Naval Base at Guantanamo Bay, Cuba is leased by the US and thus remains part of Cuba; the base boundary is 29 km

Coastline:

19,924 km

Maritime claims: contiguous zone: 24 NM continental shelf: not specified exclusive economic zone: 200 NM territorial sea: 12 NM

Climate:

mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter

temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain:

vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes:

lowest point: Death Valley -86 m

highest point: Mount McKinley 6,194 m

Natural resources:

coal, copper, lead, molybdenum, phosphates, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

Economy United States

Economy - overview:

The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$37,600. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy considerably greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, lay off surplus workers, and develop new products. At the same time, they face higher barriers to entry in their rivals' home markets than the barriers to entry of foreign firms in US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment,

although their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. The years 1994-2000 witnessed solid increases in real output, low inflation rates, and a drop in unemployment to below 5%. The year 2001 saw the end of boom psychology and performance, with output increasing only 0.3% and unemployment and business failures rising substantially. The response to the terrorist attacks of 11 September 2001 showed the remarkable resilience of the economy. Moderate recovery took place in 2002, with the GDP growth rate rising to 2.45%. A major short-term problem in first half 2002 was a sharp decline in the stock market, fueled in part by the exposure of dubious accounting practices in some major corporations. The war in March/April 2003 between a US-led coalition and Iraq shifted resources to military industries and introduced uncertainties about investment and employment in other sectors of the economy. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical and pension costs of an aging population, sizable trade deficits, and stagnation of family income in the lower economic groups.

Introduction Uruguay

Background:

A violent Marxist urban guerrilla movement, the Tupamaros, launched
in the late 1960s, led Uruguay's president to agree to military
control of his administration in 1973. By yearend, the rebels had
been crushed, but the military continued to expand its hold
throughout the government. Civilian rule was not restored until

1985. Uruguay's political and labor conditions are among the freest on the continent.

Geography Uruguay

Location:

Southern South America, bordering the South Atlantic Ocean, between Argentina and Brazil

Geographic coordinates:

Economy Uruguay

Economy - overview:

Uruguay's economy is characterized by an export-oriented agricultural sector, a well-educated workforce, and high levels of social spending. After averaging growth of 5% annually during 1996-98, in 1999-2002 the economy suffered a major downturn, stemming largely from lower demand in Argentina and Brazil, which together account for nearly half of Uruguay's exports. Total GDP in these four years dropped by nearly 20%, with 2002 the worst year. Unemployment rose to nearly 20% in 2002, inflation surged, and the burden of external debt doubled. Cooperation with the IMF and the US has limited the damage, which is still extensive. Moves to reschedule debt and promote economic recovery may help limit a further decline in output in 2003.

Introduction Uzbekistan

Background:

Russia conquered Uzbekistan in the late 19th century. Stiff resistance to the Red Army after World War I was eventually suppressed and a socialist republic set up in 1924. During the Soviet era, intensive production of "white gold" (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land poisoned and the Aral Sea and certain rivers half dry. Independent since 1991, the country seeks to gradually lessen its dependence on agriculture while developing its mineral and petroleum reserves. Current concerns include terrorism by Islamic militants, a nonconvertible currency, and the curtailment of human rights and democratization.

Geography Uzbekistan

Location:

Central Asia, north of Afghanistan

Geographic coordinates:

Area:

total: 447,400 sq km

water: 22,000 sq km

land: 425,400 sq km

Area - comparative:

slightly larger than California

Land boundaries:

total: 6,221 km

border countries: Afghanistan 137 km, Kazakhstan 2,203 km,
Kyrgyzstan 1,099 km, Tajikistan 1,161 km, Turkmenistan 1,621 km

Coastline:

0 km (doubly landlocked); note - Uzbekistan includes the southern
portion of the Aral Sea with a 420 km shoreline

Maritime claims:

none (doubly landlocked)

Climate:

mostly midlatitude desert, long, hot summers, mild winters;
semiarid grassland in east

Terrain:

mostly flat-to-rolling sandy desert with dunes; broad, flat
intensely irrigated river valleys along course of Amu Darya, Syr
Darya (Sirdaryo), and Zarafshon; Fergana Valley in east surrounded
by mountainous Tajikistan and Kyrgyzstan; shrinking Aral Sea in west

Elevation extremes:

lowest point: Saryqarnish Kuli -12 m

highest point: Adelunga Toghi 4,301 m

Natural resources:

natural gas, petroleum, coal, gold, uranium, silver, copper, lead
and zinc, tungsten, molybdenum

Land use: arable land: 10.8% permanent crops: 0.91% other: 88.29%
(1998 est.)

Irrigated land:
42,810 sq km (1998 est.)

Natural hazards:
NA

Environment - current issues:
shrinkage of the Aral Sea is resulting in growing concentrations of chemical pesticides and natural salts; these substances are then blown from the increasingly exposed lake bed and contribute to desertification; water pollution from industrial wastes and the heavy use of fertilizers and pesticides is the cause of many human health disorders; increasing soil salination; soil contamination from buried nuclear processing and agricultural chemicals, including DDT

Environment - international agreements:
party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Ozone Layer Protection, Wetlands
signed, but not ratified: none of the selected agreements

Geography - note:
along with Liechtenstein, one of the only two doubly landlocked countries in the world

Economy Uzbekistan

Economy - overview:

Uzbekistan is a dry, landlocked country of which 11% consists of intensely cultivated, irrigated river valleys. More than 60% of its population lives in densely populated rural communities. Uzbekistan is now the world's second-largest cotton exporter, a large producer of gold and oil, and a regionally significant producer of chemicals and machinery. Following independence in December 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. Uzbekistan responded to the negative external conditions generated by the Asian and Russian financial crises by emphasizing import substitute industrialization and by tightening export and currency controls within its already largely closed economy. The government, while aware of the need to improve the investment climate, sponsors measures that often increase, not decrease, the government's control over business decisions. A sharp increase in the inequality of income distribution has hurt the lower ranks of society since independence.

Economy Vanuatu

Economy - overview:

The economy is based primarily on subsistence or small-scale agriculture, which provides a living for 65% of the population. Fishing, offshore financial services, and tourism, with about 50,000 visitors in 1997, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. A severe earthquake in November 1999 followed by a tsunami, caused extensive damage to the northern island of Pentecote and left thousands homeless. Another powerful earthquake in January 2002 caused extensive damage in the capital, Port-Vila, and surrounding areas, and also was followed by a tsunami. GDP growth rose less than 3% on average in the 1990s. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. In mid-2002 the government stepped up efforts to boost tourism. Australia and New Zealand are the main suppliers of foreign aid.

Introduction Venezuela

Background:

Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Colombia and Ecuador). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Current concerns include: an embattled president who is losing his once solid support among Venezuelans, a divided military, drug-related conflicts along the Colombian border, increasing internal drug consumption, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

Economy Venezuela

Economy - overview:

Venezuela continues to be highly dependent on the petroleum sector, which accounts for roughly one-third of GDP, around 80% of export earnings, and more than half of government operating revenues.

Despite higher oil prices at the end of 2002 and into 2003, domestic political instability, culminating in a two-month national oil strike from December 2002 to February 2003, temporarily halted

economic activity. The economy is likely to remain in a recession in 2003, after sinking an estimated 8.9 percent in 2002.

Introduction Vietnam

Background:

France occupied all of Vietnam by 1884. Independence was declared after World War II, but the French continued to rule until 1954 when they were defeated by Communist forces under Ho Chi MINH, who took control of the North. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South. Economic reconstruction of the reunited country has proven difficult as aging Communist Party leaders have only grudgingly initiated reforms necessary for a free market.

Economy Vietnam

Economy - overview:

Vietnam is a poor, densely-populated country that has had to recover from the ravages of war, the loss of financial support from the old Soviet Bloc, and the rigidities of a centrally planned

economy. Substantial progress was achieved from 1986 to 1996 in moving forward from an extremely low starting point - growth averaged around 9% per year from 1993 to 1997. The 1997 Asian financial crisis highlighted the problems in the Vietnamese economy but, rather than prompting reform, reaffirmed the government's belief that shifting to a market-oriented economy would lead to disaster. GDP growth of 8.5% in 1997 fell to 6% in 1998 and 5% in 1999. Growth then rose to 6% to 7% in 2000-02 even against the background of global recession. These numbers mask some major difficulties in economic performance. Many domestic industries, including coal, cement, steel, and paper, have reported large stockpiles of inventory and tough competition from more efficient foreign producers. Meanwhile, Vietnamese authorities have moved to implement the structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The US-Vietnam Bilateral Trade Agreement entered into force near the end of 2001 and is expected to significantly increase Vietnam's exports to the US. The US is assisting Vietnam with implementing the legal and structural reforms called for in the agreement.

@Virgin Islands

Introduction Virgin Islands

Background: During the 17th century, the archipelago was divided into two territorial units, one English and the other Danish. Sugarcane, produced by slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish portion, which had been in economic decline since the abolition of slavery in 1848.

Economy Virgin Islands

Economy - overview:
Tourism is the primary economic activity, accounting for more than 70% of GDP and 70% of employment. The islands normally host 2 million visitors a year. The manufacturing sector consists of petroleum refining, textiles, electronics, pharmaceuticals, and watch assembly. The agricultural sector is small, with most food being imported. International business and financial services are a small but growing component of the economy. One of the world's largest petroleum refineries is at Saint Croix. The islands are subject to substantial damage from storms. The government is working to improve fiscal discipline, support construction projects in the private sector, expand tourist facilities, reduce crime, and protect the environment.

@Wake Island

Introduction Wake Island

Background:

The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940-41. In December

1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake was developed as a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military and some commercial cargo planes, as well as for emergency landings. There are over 700 landings a year on the island.

@Wallis and Futuna

Introduction Wallis and Futuna

Background:

Although discovered by the Dutch and the British in the 17th and 18th centuries, it was the French who declared a protectorate over the islands in 1842. In 1959, the inhabitants of the islands voted to become a French overseas territory.

@West Bank

Introduction West Bank

Background:

The Israel-PLO Declaration of Principles on Interim Self-Government Arrangements (the DOP), signed in Washington on 13 September 1993, provided for a transitional period not exceeding five years of Palestinian interim self-government in the Gaza Strip and the West Bank. Under the DOP, Israel agreed to transfer certain powers and responsibilities to the Palestinian Authority, which includes the Palestinian Legislative Council elected in January 1996, as part of the interim self-governing arrangements in the West Bank and Gaza Strip. A transfer of powers and responsibilities for the Gaza Strip and Jericho took place pursuant to the Israel-PLO 4 May 1994 Cairo Agreement on the Gaza Strip and the Jericho Area and in additional areas of the West Bank pursuant to the Israel-PLO 28 September 1995 Interim Agreement, the Israel-PLO 15 January 1997 Protocol

Concerning Redeployment in Hebron, the Israel-PLO 23 October 1998 Wye River Memorandum, and the 4 September 1999 Sharm el-Sheikh Agreement. The DOP provides that Israel will retain responsibility during the transitional period for external security and for internal security and public order of settlements and Israeli citizens. Direct negotiations to determine the permanent status of Gaza and West Bank had begun in September 1999 after a three-year hiatus, but have been derailed by a second intifadah that broke out in September 2000. The resulting widespread violence in the West Bank and Gaza Strip, Israel's military response, and instability within the Palestinian Authority continue to undermine progress toward a permanent agreement.

Economy West Bank

Economy - overview:

Real per capita GDP for the West Bank and Gaza Strip (WBGS) declined by about one-third between 1992 and 1996 due to the combined effect of falling aggregate incomes and rapid population growth. The downturn in economic activity was largely the result of Israeli closure policies - the imposition of border closures in response to security incidents in Israel - which disrupted labor and commodity market relationships between Israel and the WBGS. The most serious social effect of this downturn was rising unemployment; unemployment in the WBGS during the 1980s was generally under 5%; by 1995 it had risen to over 20%. Israel's use of comprehensive closures during the next five years decreased and, in 1998, Israel implemented new policies to reduce the impact of closures and other security procedures on the movement of Palestinian goods and labor. These changes fueled an almost three-year-long economic recovery in the West Bank and Gaza Strip; real GDP grew by 5% in 1998 and 6% in 1999. Recovery was upended in the last quarter of 2000 with the outbreak of violence, which triggered tight Israeli closures of Palestinian self-rule areas and severely disrupted trade and labor movements. In 2001, and even more severely in 2002, Israeli military measures in Palestinian Authority areas have resulted in the destruction of much capital plant and administrative structure, widespread business closures, and a sharp drop in GDP. Another major loss has been the decline in earnings of Palestinian workers in Israel. International aid of \$2 billion in 2001-02 to the West Bank and Gaza Strip have prevented the complete collapse of the economy.

@Western Sahara

Introduction Western Sahara

Background:

Morocco virtually annexed the northern two-thirds of Western Sahara (formerly Spanish Sahara) in 1976, and the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Rabat's sovereignty ended in a 1991 UN-brokered cease-fire; a UN-organized referendum on final status has been repeatedly postponed.

Economy Western Sahara

Economy - overview:

Western Sahara depends on pastoral nomadism, fishing, and phosphate mining as the principal sources of income for the population. The territory lacks sufficient rainfall for sustainable agricultural production, and most of the food for the urban population must be imported. All trade and other economic activities are controlled by the Moroccan Government. Moroccan energy interests in 2001 signed contracts to explore for oil off the coast of Western Sahara, which

has angered the Polisario. Incomes and standards of living in Western Sahara are substantially below the Moroccan level.

Introduction World

Background:

Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about the environment, including loss of forests, shortages of energy and water, the decline in biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820, to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1988, and 6 billion in 2000. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances

in medicine) and fears (e.g., development of even more lethal weapons of war).

Geography World

Land boundaries:

the land boundaries in the world total 250,472 km (not counting shared boundaries twice)

Coastline:

356,000 km

Maritime claims:

a variety of situations exist, but in general, most countries make the following claims: contiguous zone - 24 NM; continental shelf - 200-m depth or to the depth of exploitation, or 200 NM or to the edge of the continental margin; exclusive fishing zone - 200 NM; exclusive economic zone - 200 NM; territorial sea - 12 NM; boundary situations with neighboring states prevent many countries from

extending their fishing or economic zones to a full 200 NM; 43 nations and other areas that are landlocked include Afghanistan, Andorra, Armenia, Austria, Azerbaijan, Belarus, Bhutan, Bolivia, Botswana, Burkina Faso, Burundi, Central African Republic, Chad, Czech Republic, Ethiopia, Holy See (Vatican City), Hungary, Kazakhstan, Kyrgyzstan, Laos, Lesotho, Liechtenstein, Luxembourg, Malawi, Mali, Moldova, Mongolia, Nepal, Niger, Paraguay, Rwanda, San Marino, Slovakia, Swaziland, Switzerland, Tajikistan, The Former Yugoslav Republic of Macedonia, Turkmenistan, Uganda, Uzbekistan, West Bank, Zambia, Zimbabwe; two of these, Liechtenstein and Uzbekistan, are doubly landlocked

Climate:

two large areas of polar climates separated by two rather narrow temperate zones form a wide equatorial band of tropical to subtropical climates

Terrain:

the greatest ocean depth is the Mariana Trench at 10,924 m in the Pacific Ocean

note: in the oceanic realm, Challenger Deep in the Mariana Trench is the lowest point, lying -10,924 m below the surface of the Pacific Ocean

highest point: Mount Everest 8,850 m (1999 est.)

Natural resources:

the rapid depletion of nonrenewable mineral resources, the depletion of forest areas and wetlands, the extinction of animal and plant species, and the deterioration in air and water quality

(especially in Eastern Europe, the former USSR, and China) pose serious long-term problems that governments and peoples are only beginning to address

Economy World

Economy - overview: Growth in global output (gross world product, GWP) fell from 4.8% in 2000 to 2.2% in 2001 and 2.7% in 2002. The causes: sluggishness in the US economy (21% of GWP) and in the 15 EU economies (19% of GWP); continued stagnation in the Japanese economy (7.2% of GWP); and spillover effects in the less developed regions of the world. China, the second-largest economy in the world (12% of GWP), proved an exception, continuing its rapid annual growth, officially announced as 8% but estimated by many observers as perhaps two percentage points lower. Russia (2.6% of GWP), with 4% growth, continued to make uneven progress, its GDP per capita still only one-third that of the leading industrial nations. The other 14 successor nations of the USSR and the other old Warsaw Pact nations again experienced widely divergent growth rates; the three Baltic nations continued as strong performers, in the 5% range of growth. The developing nations also varied in their growth results, with many countries facing population increases that erode gains in output. Externally, the nation-state, as a bedrock economic-political institution, is steadily losing control over international flows of people, goods, funds, and technology. Internally, the central government often finds its control over resources slipping as separatist regional movements - typically based on ethnicity - gain momentum, e.g., in many of the successor states of the former Soviet Union, in the former

Yugoslavia, in India, in Indonesia, and in Canada. Externally, the central government is losing decision-making powers to international bodies. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of pollution, desertification, underemployment, epidemics, and famine. Because of their own internal problems and priorities, the industrialized countries devote insufficient resources to deal effectively with the poorer areas of the world, which, at least from the economic point of view, are becoming further marginalized. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, poses economic risks because of varying levels of income and cultural and political differences among the participating nations. The terrorist attacks on the US on 11 September 2001 accentuate a further growing risk to global prosperity, illustrated, for example, by the reallocation of resources away from investment to anti-terrorist programs. The opening of war in March 2003 between a US-led coalition and Iraq added new uncertainties to global economic prospects. (For specific economic developments in each country of the world in 2002, see the individual country entries.)

Transnational Issues World

Disputes - international:

Globally, there are over 250,000 km of international land boundaries that separate the world's 192 independent states, along with 70 dependencies, areas of special sovereignty, and other miscellaneous entities. Maritime states have claimed limits and have so far established over 130 maritime boundaries and joint development zones to allocate ocean resources and to provide for their national security at sea. On land, ethnicity, culture, race, religion, and language have divided states into separate political entities as much as history, physical terrain, political fiat, or conquest, resulting in sometimes arbitrary and imposed boundaries. All of these factors have contributed to a wide array of boundary, borderland, and territorial disagreements that vary in intensity from unresolved or dormant to outright war. Territorial disputes may evolve from historical and/or cultural animosities, or they may be brought on by resource competition. Ethnic clashes continue to be responsible for territorial fragmentation around the world. Undemarcated, indefinite, porous, and unmanaged boundaries encourage illegal cross-border activities, uncontrolled migration, and political confrontation over boundary allocations. Other sources of contention include the use of water and mineral (especially petroleum) resources, fisheries, dams, and nuclear power plants. Many islands or island groups are also disputed, including those at sea and in streams. Nonetheless, many nations are actively cooperating to clarify, delineate, and demarcate their international borders. The tragic aspect of international discord is the impact on the sustenance and welfare of populations caught in the conflict. It is frequently left to members of the world community to cope with

enormous refugee situations, and the resultant hunger, disease, and impoverishment that they create.

Illicit drugs:

cocaine: worldwide, coca is grown on an estimated 205,450 hectares - almost exclusively in South America with 70% in Colombia; potential cocaine production during 2002 is estimated at 938 metric tons (or 1,200 metric tons of export quality cocaine at an average of 78% purity); coca eradication programs continue in Bolivia, Colombia, and Peru, and 292 metric tons of export quality cocaine are documented to have been seized in 2002; consumption of export quality cocaine is estimated to have been 875 metric tons

opiates: cultivation of opium poppy occurred on an estimated 141,213 hectares in 2002 and potentially produced 2,183 metric tons of opium - which conceivably could be converted to the equivalent of 238 metric tons of pure heroin; opium eradication programs have been undertaken in Afghanistan, Burma, Colombia, Mexico, Pakistan, Thailand, and Vietnam, and the annual average for opiates seized worldwide over the past five years (1998-2002) has been 45 metric tons of pure heroin equivalent; estimates for average annual consumption over this time period are 315 metric tons pure heroin equivalent

Introduction Yemen

Background:

North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border.

Economy Yemen

Economy - overview:

Yemen, one of the poorest countries in the Arab world, reported strong growth in the mid-1990s with the onset of oil production, but has been harmed by periodic declines in oil prices. Yemen has embarked on an IMF-supported structural adjustment program designed to modernize and streamline the economy, which has led to substantial foreign debt relief and restructuring. International donors, meeting in Paris in October 2002, agreed on a further \$2.3 billion economic support package. Yemen has worked to maintain tight control over spending and implement additional components of the IMF program. A high population growth rate and internal political dissension complicate the government's task.

Introduction Zambia

Background:

The territory of Northern Rhodesia was administered by the South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule, but the subsequent vote in 1996 saw blatant harassment of opposition parties. The election in 2001 was marked by administrative problems with three parties filing a legal petition challenging the election of ruling party candidate Levy MWANAWASA. The new president launched a far-reaching anti-corruption campaign in 2002, which resulted in the 2003 arrest of the previous president Frederick CHILUBA and many of his supporters. Opposition parties currently hold a majority of seats in the National Assembly.

Economy Zambia

Economy - overview:

Despite progress in privatization and budgetary reform, Zambia's economic growth remains below the 5% to 7% necessary to reduce poverty significantly. Privatization of government-owned copper mines relieved the government from covering mammoth losses generated by the industry and greatly improved the chances for copper mining to return to profitability and spur economic growth. However, low mineral prices have slowed the benefits of privatizing the mines and have reduced incentives for further private investment in the sector. Cooperation continues with international bodies on programs to reduce poverty.

Introduction Zimbabwe

Background:
The UK annexed Southern Rhodesia from the South Africa Company in
1923. A 1961 constitution was formulated that favored whites in
power. In 1965 the government unilaterally declared its
independence, but the UK did not recognize the act and demanded more
complete voting rights for the black African majority in the country

(then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign begun in 2000 caused an exodus of white farmers, crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection. Opposition and labor groups launched general strikes in 2003 to pressure MUGABE to retire early; security forces continued their brutal repression of regime opponents.

Economy Zimbabwe

Economy - overview:

The government of Zimbabwe faces a wide variety of difficult economic problems as it struggles with an unsustainable fiscal deficit, an overvalued exchange rate, soaring inflation, and bare shelves. Its 1998-2002 involvement in the war in the Democratic

Republic of the Congo, for example, drained hundreds of millions of dollars from the economy. Badly needed support from the IMF has been suspended because of the country's failure to meet budgetary goals. Inflation rose from an annual rate of 32% in 1998 to 59% in 1999, to 60% in 2000, to over 100% by yearend 2001, to 228% in early 2003. The government's land reform program, characterized by chaos and violence, has nearly destroyed the commercial farming sector, the traditional source of exports and foreign exchange and the provider of 400,000 jobs.

@2021 Natural hazards

Afghanistan

damaging earthquakes occur in Hindu Kush mountains;

flooding; droughts

Albania

destructive earthquakes; tsunamis occur along southwestern

coast; floods; drought

Algeria

mountainous areas subject to severe earthquakes; mudslides and floods in rainy season

American Samoa

typhoons common from December to March

Andorra

avalanches

Angola

locally heavy rainfall causes periodic flooding on the plateau

Anguilla

frequent hurricanes and other tropical storms (July to October)

Antarctica

katabatic (gravity-driven) winds blow coastward from the high interior; frequent blizzards form near the foot of the plateau; cyclonic storms form over the ocean and move clockwise along the coast; volcanism on Deception Island and isolated areas of West Antarctica; other seismic activity rare and weak; large icebergs may calve from ice shelf

Antigua and Barbuda

hurricanes and tropical storms (July to October); periodic droughts

Arctic Ocean

ice islands occasionally break away from northern Ellesmere Island; icebergs calved from glaciers in western Greenland

and extreme northeastern Canada; permafrost in islands; virtually ice locked from October to June; ships subject to superstructure icing from October to May

Argentina

San Miguel de Tucuman and Mendoza areas in the Andes subject to earthquakes; pamperos are violent windstorms that can strike the Pampas and northeast; heavy flooding

Armenia

occasionally severe earthquakes; droughts

Aruba

lies outside the Caribbean hurricane belt

Ashmore and Cartier Islands

surrounded by shoals and reefs that can pose maritime hazards

Atlantic Ocean

icebergs common in Davis Strait, Denmark Strait, and the northwestern Atlantic Ocean from February to August and have been spotted as far south as Bermuda and the Madeira Islands; ships subject to superstructure icing in extreme northern Atlantic from October to May; persistent fog can be a maritime hazard from May to September; hurricanes (May to December)

Australia

cyclones along the coast; severe droughts; forest fires

Austria

landslides; avalanches; earthquakes

Azerbaijan
droughts

Bahamas, The
hurricanes and other tropical storms cause extensive
flood and wind damage

Bahrain
periodic droughts; dust storms

Baker Island
the narrow fringing reef surrounding the island can be
a maritime hazard

Bangladesh
droughts, cyclones; much of the country routinely
inundated during the summer monsoon season

Barbados
infrequent hurricanes; periodic landslides

Bassas da India
maritime hazard since it is usually under water
during high tide and surrounded by reefs; subject to periodic
cyclones

Belarus
NA

Belgium
flooding is a threat in areas of reclaimed coastal land,
protected from the sea by concrete dikes

Belize

frequent, devastating hurricanes (June to November) and coastal flooding (especially in south)

Benin

hot, dry, dusty harmattan wind may affect north from December to March

Bermuda

hurricanes (June to November)

Bhutan

violent storms from the Himalayas are the source of the country's name which translates as Land of the Thunder Dragon; frequent landslides during the rainy season

Bolivia

flooding in the northeast (March-April)

Bosnia and Herzegovina

destructive earthquakes

Botswana

periodic droughts; seasonal August winds blow from the west, carrying sand and dust across the country, which can obscure visibility

Bouvet Island

NA

Brazil

recurring droughts in northeast; floods and occasional frost in south

British Indian Ocean Territory
NA

British Virgin Islands
hurricanes and tropical storms (July to
October)

Brunei
typhoons, earthquakes, and severe flooding are rare

Bulgaria
earthquakes, landslides

Burkina Faso
recurring droughts

Burma
destructive earthquakes and cyclones; flooding and landslides
common during rainy season (June to September); periodic droughts

Burundi
flooding, landslides, drought

Cambodia
monsoonal rains (June to November); flooding; occasional
droughts

Cameroon
volcanic activity with periodic releases of poisonous gases
from Lake Nyos and Lake Monoun volcanoes

Canada
continuous permafrost in north is a serious obstacle to

development; cyclonic storms form east of the Rocky Mountains, a result of the mixing of air masses from the Arctic, Pacific, and North American interior, and produce most of the country's rain and snow east of the mountains

Cape Verde

prolonged droughts; seasonal harmattan wind produces obscuring dust; volcanically and seismically active

Cayman Islands

hurricanes (July to November)

Central African Republic

hot, dry, dusty harmattan winds affect northern areas; floods are common

Chad

hot, dry, dusty harmattan winds occur in north; periodic droughts; locust plagues

Chile

severe earthquakes; active volcanism; tsunamis

China

frequent typhoons (about five per year along southern and eastern coasts); damaging floods; tsunamis; earthquakes; droughts; land subsidence

Christmas Island

the narrow fringing reef surrounding the island can be a maritime hazard

Clipperton Island
NA

Cocos (Keeling) Islands
cyclone season is October to April

Colombia
highlands subject to volcanic eruptions; occasional earthquakes; periodic droughts

Comoros
cyclones possible during rainy season (December to April);
Le Kartala on Grand Comore is an active volcano

Congo, Democratic Republic of the periodic droughts in south; Congo River floods (seasonal); in the east, in the Great Rift Valley, there are active volcanoes

Congo, Republic of the
seasonal flooding

Cook Islands
typhoons (November to March)

Coral Sea Islands
occasional tropical cyclones

Costa Rica
occasional earthquakes, hurricanes along Atlantic coast;
frequent flooding of lowlands at onset of rainy season and landslides; active volcanoes

Cote d'Ivoire

coast has heavy surf and no natural harbors; during the rainy season torrential flooding is possible

Croatia

destructive earthquakes

Cuba

the east coast is subject to hurricanes from August to October (in general, the country averages about one hurricane every other year); droughts are common

Cyprus

moderate earthquake activity; droughts

Czech Republic

flooding

Denmark

flooding is a threat in some areas of the country (e.g., parts of Jutland, along the southern coast of the island of Lolland) that are protected from the sea by a system of dikes

Djibouti

earthquakes; droughts; occasional cyclonic disturbances from the Indian Ocean bring heavy rains and flash floods

Dominica

flash floods are a constant threat; destructive hurricanes can be expected during the late summer months

Dominican Republic

lies in the middle of the hurricane belt and

subject to severe storms from June to October; occasional flooding;
periodic droughts

East Timor

floods and landslides are common; earthquakes, tsunamis,
tropical cyclones

Ecuador

frequent earthquakes, landslides, volcanic activity; floods;
periodic droughts

Egypt

periodic droughts; frequent earthquakes, flash floods,
landslides; hot, driving windstorm called khamsin occurs in spring;
dust storms, sandstorms

El Salvador

known as the Land of Volcanoes; frequent and sometimes
very destructive earthquakes and volcanic activity; extremely
susceptible to hurricanes

Equatorial Guinea

violent windstorms, flash floods

Eritrea

frequent droughts; locust swarms

Estonia

sometimes flooding occurs in the spring

Ethiopia

geologically active Great Rift Valley susceptible to
earthquakes, volcanic eruptions; frequent droughts

Europa Island

NA

Falkland Islands (Islas Malvinas)

strong winds persist throughout
the year

Faroe Islands

NA

Fiji

cyclonic storms can occur from November to January

Finland

NA

France

flooding; avalanches; midwinter windstorms; drought; forest
fires in south near the Mediterranean

French Guiana

high frequency of heavy showers and severe
thunderstorms; flooding

French Polynesia

occasional cyclonic storms in January

French Southern and Antarctic Lands

Ile Amsterdam and Ile Saint-Paul
are extinct volcanoes

Gabon

NA

Gambia, The
drought (rainfall has dropped by 30% in the last 30
years)

Gaza Strip
droughts

Georgia
earthquakes

Germany
flooding

Ghana
dry, dusty, northeastern harmattan winds occur from January to
March; droughts

Gibraltar
NA

Glorioso Islands
periodic cyclones

Greece
severe earthquakes

Greenland
continuous permafrost over northern two-thirds of the
island

Grenada
lies on edge of hurricane belt; hurricane season lasts from
June to November

Guadeloupe

hurricanes (June to October); Soufriere de Guadeloupe is an active volcano

Guam

frequent squalls during rainy season; relatively rare, but potentially very destructive typhoons (June - December)

Guatemala

numerous volcanoes in mountains, with occasional violent earthquakes; Caribbean coast extremely susceptible to hurricanes and other tropical storms

Guernsey

NA

Guinea

hot, dry, dusty harmattan haze may reduce visibility during dry season

Guinea-Bissau

hot, dry, dusty harmattan haze may reduce visibility during dry season; brush fires

Guyana

flash floods are a constant threat during rainy seasons

Haiti

lies in the middle of the hurricane belt and subject to severe storms from June to October; occasional flooding and earthquakes; periodic droughts

Heard Island and McDonald Islands
Mawson Peak, an active volcano, is
on Heard Island

Holy See (Vatican City)
NA

Honduras
frequent, but generally mild, earthquakes; extremely
susceptible to damaging hurricanes and floods along the Caribbean
coast

Hong Kong
occasional typhoons

Howland Island
the narrow fringing reef surrounding the island can
be a maritime hazard

Iceland
earthquakes and volcanic activity

India
droughts; flash floods, as well as widespread and destructive
flooding from monsoonal rains; severe thunderstorms; earthquakes

Indian Ocean
occasional icebergs pose navigational hazard in
southern reaches

Indonesia
occasional floods, severe droughts, tsunamis, earthquakes,
volcanoes, forest fires

Iran

periodic droughts, floods; dust storms, sandstorms; earthquakes along western border and in the northeast

Iraq

dust storms, sandstorms, floods

Ireland

NA

Israel

sandstorms may occur during spring and summer; droughts; periodic earthquakes

Italy

regional risks include landslides, mudflows, avalanches, earthquakes, volcanic eruptions, flooding; land subsidence in Venice

Jamaica

hurricanes (especially July to November)

Jan Mayen

dominated by the volcano Haakon VII Toppen/Beerenberg; volcanic activity resumed in 1970

Japan

many dormant and some active volcanoes; about 1,500 seismic occurrences (mostly tremors) every year; tsunamis; typhoons

Jarvis Island

the narrow fringing reef surrounding the island poses a maritime hazard

Jersey
NA

Johnston Atoll
NA

Jordan
droughts; periodic earthquakes

Juan de Nova Island
periodic cyclones

Kazakhstan
earthquakes in the south, mudslides around Almaty

Kenya
recurring drought; flooding during rainy seasons

Kingman Reef
wet or awash most of the time, maximum elevation of
about 1 meter makes Kingman Reef a maritime hazard

Kiribati
typhoons can occur any time, but usually November to March;
occasional tornadoes; low level of some of the islands make them
very sensitive to changes in sea level

Korea, North
late spring droughts often followed by severe flooding;
occasional typhoons during the early fall

Korea, South
occasional typhoons bring high winds and floods;

low-level seismic activity common in southwest

Kuwait

sudden cloudbursts are common from October to April and bring heavy rain, which can damage roads and houses; sandstorms and dust storms occur throughout the year, but are most common between March and August

Kyrgyzstan

NA

Laos

floods, droughts

Latvia

NA

Lebanon

dust storms, sandstorms

Lesotho

periodic droughts

Liberia

dust-laden harmattan winds blow from the Sahara (December to March)

Libya

hot, dry, dust-laden ghibli is a southern wind lasting one to four days in spring and fall; dust storms, sandstorms

Liechtenstein

NA

Lithuania

NA

Luxembourg

NA

Macau

typhoons

Macedonia, The Former Yugoslav Republic of
high seismic risks

Madagascar

periodic cyclones

Malawi

NA

Malaysia

flooding, landslides, forest fires

Maldives

low level of islands makes them very sensitive to sea level
rise

Mali

hot, dust-laden harmattan haze common during dry seasons;
recurring droughts; occasional Niger River flooding

Malta

NA

Man, Isle of
NA

Marshall Islands
infrequent typhoons

Martinique
hurricanes, flooding, and volcanic activity (an average
of one major natural disaster every five years)

Mauritania
hot, dry, dust/sand-laden sirocco wind blows primarily in
March and April; periodic droughts

Mauritius
cyclones (November to April); almost completely surrounded
by reefs that may pose maritime hazards

Mayotte
cyclones during rainy season

Mexico
tsunamis along the Pacific coast, volcanoes and destructive
earthquakes in the center and south, and hurricanes on the Pacific,
Gulf of Mexico, and Caribbean coasts

Micronesia, Federated States of
typhoons (June to December)

Midway Islands
NA

Moldova

landslides (57 cases in 1998)

Monaco

NA

Mongolia

dust storms, grassland and forest fires, drought, and "zud", which is harsh winter conditions

Montserrat

severe hurricanes (June to November); volcanic eruptions (Soufriere Hills volcano has erupted continuously since 1996)

Morocco

northern mountains geologically unstable and subject to earthquakes; periodic droughts

Mozambique

severe droughts; devastating cyclones and floods occur in central and southern provinces

Namibia

prolonged periods of drought

Nauru

periodic droughts

Navassa Island

NA

Nepal

severe thunderstorms, flooding, landslides, drought, and

famine depending on the timing, intensity, and duration of the summer monsoons

Netherlands
flooding

Netherlands Antilles
Curacao and Bonaire are south of Caribbean hurricane belt and are rarely threatened; Sint Maarten, Saba, and Sint Eustatius are subject to hurricanes from July to October

New Caledonia
cyclones, most frequent from November to March

New Zealand
earthquakes are common, though usually not severe;
volcanic activity

Nicaragua
destructive earthquakes, volcanoes, landslides; extremely susceptible to hurricanes

Niger
recurring droughts

Nigeria
periodic droughts; flooding

Niue
typhoons

Norfolk Island
typhoons (especially May to July)

Northern Mariana Islands active volcanoes on Pagan and Agrihan;
typhoons (especially August to November)

Norway
rockslides, avalanches

Oman
summer winds often raise large sandstorms and dust storms in
interior; periodic droughts

Pacific Ocean
surrounded by a zone of violent volcanic and
earthquake activity sometimes referred to as the "Pacific Ring of
Fire"; subject to tropical cyclones (typhoons) in southeast and east
Asia from May to December (most frequent from July to October);
tropical cyclones (hurricanes) may form south of Mexico and strike
Central America and Mexico from June to October (most common in
August and September); cyclical El Nino/La Nina phenomenon occurs in
the equatorial Pacific, influencing weather in the Western
Hemisphere and the western Pacific; ships subject to superstructure
icing in extreme north from October to May; persistent fog in the
northern Pacific can be a maritime hazard from June to December

Pakistan
frequent earthquakes, occasionally severe especially in
north and west; flooding along the Indus after heavy rains (July and
August)

Palau
typhoons (June to December)

Palmyra Atoll

NA

Panama

occasional severe storms and forest fires in the Darien area

Papua New Guinea

active volcanism; situated along the Pacific "Ring of Fire"; the country is subject to frequent and sometimes severe earthquakes; mud slides; tsunamis

Paracel Islands

typhoons

Paraguay

local flooding in southeast (early September to June);
poorly drained plains may become boggy (early October to June)

Peru

earthquakes, tsunamis, flooding, landslides, mild volcanic activity

Philippines

astride typhoon belt, usually affected by 15 and struck by five to six cyclonic storms per year; landslides; active volcanoes; destructive earthquakes; tsunamis

Pitcairn Islands

typhoons (especially November to March)

Poland

flooding

Portugal

Azores subject to severe earthquakes

Puerto Rico

periodic droughts; hurricanes

Qatar

haze, dust storms, sandstorms common

Reunion

periodic, devastating cyclones (December to April); Piton de la Fournaise on the southeastern coast is an active volcano

Romania

earthquakes, most severe in south and southwest; geologic structure and climate promote landslides

Russia

permafrost over much of Siberia is a major impediment to development; volcanic activity in the Kuril Islands; volcanoes and earthquakes on the Kamchatka Peninsula; spring floods and summer/autumn forest fires throughout Siberia and parts of European Russia

Rwanda

periodic droughts; the volcanic Virunga mountains are in the northwest along the border with Democratic Republic of the Congo

Saint Helena

active volcanism on Tristan da Cunha

Saint Kitts and Nevis

hurricanes (July to October)

Saint Lucia

hurricanes and volcanic activity

Saint Pierre and Miquelon

persistent fog throughout the year can be
a maritime hazard

Saint Vincent and the Grenadines

hurricanes; Soufriere volcano on
the island of Saint Vincent is a constant threat

Samoa

occasional typhoons; active volcanism

San Marino

NA

Sao Tome and Principe

NA

Saudi Arabia

frequent sand and dust storms

Senegal

lowlands seasonally flooded; periodic droughts

Serbia and Montenegro

destructive earthquakes

Seychelles

lies outside the cyclone belt, so severe storms are rare;
short droughts possible

Sierra Leone

dry, sand-laden harmattan winds blow from the Sahara
(December to February); sandstorms, dust storms

Singapore

NA

Slovakia

NA

Slovenia

flooding and earthquakes

Solomon Islands

typhoons, but rarely destructive; geologically
active region with frequent earth tremors; volcanic activity

Somalia

recurring droughts; frequent dust storms over eastern plains
in summer; floods during rainy season

South Africa

prolonged droughts

South Georgia and the South Sandwich Islands

the South Sandwich

Islands have prevailing weather conditions that generally make them
difficult to approach by ship; they are also subject to active
volcanism

Southern Ocean

huge icebergs with drafts up to several hundred
meters; smaller bergs and iceberg fragments; sea ice (generally 0.5

to 1 meter thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Spain

periodic droughts

Spratly Islands

typhoons; serious maritime hazard because of numerous reefs and shoals

Sri Lanka

occasional cyclones and tornadoes

Sudan

dust storms and periodic persistent droughts

Suriname

NA

Svalbard

ice floes often block the entrance to Bellsund (a transit point for coal export) on the west coast and occasionally make parts of the northeastern coast inaccessible to maritime traffic

Swaziland

drought

Sweden

ice floes in the surrounding waters, especially in the Gulf

of Bothnia, can interfere with maritime traffic

Switzerland

avalanches, landslides, flash floods

Syria

dust storms, sandstorms

Taiwan

earthquakes and typhoons

Tajikistan

earthquakes and floods

Tanzania

flooding on the central plateau during the rainy season;
drought

Thailand

land subsidence in Bangkok area resulting from the
depletion of the water table; droughts

Togo

hot, dry harmattan wind can reduce visibility in north during
winter; periodic droughts

Tokelau

lies in Pacific typhoon belt

Tonga

cyclones (October to April); earthquakes and volcanic activity
on Fonuafo'ou

Trinidad and Tobago
outside usual path of hurricanes and other
tropical storms

Tromelin Island
NA

Tunisia
NA

Turkey
very severe earthquakes, especially in northern Turkey, along
an arc extending from the Sea of Marmara to Lake Van

Turkmenistan
NA

Turks and Caicos Islands
frequent hurricanes

Tuvalu
severe tropical storms are usually rare, but, in 1997, there
were three cyclones; low level of islands make them very sensitive
to changes in sea level

Uganda
NA

Ukraine
NA

United Arab Emirates
frequent sand and dust storms

United Kingdom

winter windstorms; floods

United States

tsunamis, volcanoes, and earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the midwest and southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

Uruguay

seasonally high winds (the pampero is a chilly and occasional violent wind which blows north from the Argentine pampas), droughts, floods; because of the absence of mountains, which act as weather barriers, all locations are particularly vulnerable to rapid changes from weather fronts

Uzbekistan

NA

Vanuatu

tropical cyclones or typhoons (January to April); volcanism causes minor earthquakes; tsunamis

Venezuela

subject to floods, rockslides, mudslides; periodic droughts

Vietnam

occasional typhoons (May to January) with extensive flooding, especially in the Mekong River delta

Virgin Islands

several hurricanes in recent years; frequent and severe droughts and floods; occasional earthquakes

Wake Island

occasional typhoons

Wallis and Futuna

NA

West Bank

droughts

Western Sahara

hot, dry, dust/sand-laden sirocco wind can occur during winter and spring; widespread harmattan haze exists 60% of time, often severely restricting visibility

World

large areas subject to severe weather (tropical cyclones), natural disasters (earthquakes, landslides, tsunamis, volcanic eruptions)

Yemen

sandstorms and dust storms in summer

Zambia

periodic drought, tropical storms (November to April)

Zimbabwe

recurring droughts; floods and severe storms are rare

=====

@2022 People - note

Afghanistan

large numbers of Afghan refugees create burdens on neighboring states

Ashmore and Cartier Islands

the landing of illegal immigrants from Indonesia's Rote Island has become an ongoing problem

Cuba

illicit migration is a continuing problem; Cubans attempt to depart the island and enter the US using homemade rafts, alien smugglers, direct flights, or falsified visas; some 2,500 Cubans took to the Straits of Florida in 2002; the US Coast Guard interdicted about 60% of these migrants; Cubans also use non-maritime routes to enter the US; some 1,500 Cubans arrived overland via the southwest border and direct flights to Miami in 2002

Ghana

there are 9,500 Liberians, 2,000 Sierra Leoneans, and 1,000 Togolese refugees residing in Ghana (2002)

Rwanda

Rwanda is the most densely populated country in Africa

Turks and Caicos Islands
destination and transit point for illegal
Haitian immigrants bound for the Turks and Caicos Islands, Bahamas,
and US

United States
data for the US are based on projections that do not

@2028 Background

Afghanistan

Afghanistan's recent history is characterized by war and civil unrest. The Soviet Union invaded in 1979, but was forced to withdraw 10 years later by anti-Communist mujahidin forces supplied and trained by the US, Saudi Arabia, Pakistan, and others. Fighting subsequently continued among the various mujahidin factions, giving rise to a state of warlordism that eventually spawned the Taliban. Backed by foreign sponsors, the Taliban developed as a political force and eventually seized power. The Taliban were able to capture most of the country, aside from Northern Alliance strongholds primarily in the northeast, until US and allied military action in support of the opposition following the 11 September 2001 terrorist attacks forced the group's downfall. In late 2001, major leaders from the Afghan opposition groups and diaspora met in Bonn, Germany, and agreed on a plan for the formulation of a new government structure that resulted in the inauguration of Hamid KARZAI as Chairman of the Afghan Interim Authority (AIA) on 22 December 2001. The AIA held a nationwide Loya Jirga (Grand Assembly) in June 2002, and KARZAI was elected President by secret ballot of the Transitional Islamic State of Afghanistan (TISA). The Transitional Authority has an 18-month mandate to hold a nationwide Loya Jirga to adopt a constitution and a 24-month mandate to hold nationwide elections. In December 2002, the TISA marked the one-year

anniversary of the fall of the Taliban. In addition to occasionally violent political jockeying and ongoing military action to root out remaining terrorists and Taliban elements, the country suffers from enormous poverty, a crumbling infrastructure, and widespread land mines.

Albania

Between 1990 and 1992 Albania ended 46 years of xenophobic Communist rule and established a multiparty democracy. The transition has proven difficult as corrupt governments have tried to deal with high unemployment, a dilapidated infrastructure, widespread gangsterism, and disruptive political opponents. International observers judged legislative elections in 2001 to be acceptable and a step toward democratic development, but identified serious deficiencies that should be addressed through reforms in the Albanian electoral code.

Algeria

After a century of rule by France, Algeria became independent in 1962. The surprising first round success of the fundamentalist FIS (Islamic Salvation Front) party in the December 1991 balloting caused the army to intervene, crack down on the FIS, and postpone the subsequent elections. The fundamentalist response has resulted in a continuous low-grade civil conflict with the secular state apparatus, which nonetheless has allowed elections featuring pro-government and moderate religious-based parties. The FIS's armed wing, the Islamic Salvation Army, disbanded in January 2000 and many armed militants of other groups surrendered under an amnesty program designed to promote national reconciliation. Nevertheless, small numbers of armed militants persist in confronting government forces and carrying out isolated attacks on

villages and other types of terrorist attacks. Other concerns include Berber unrest, large-scale unemployment, a shortage of housing, and the need to diversify the petroleum-based economy.

American Samoa

Settled as early as 1000 B.C., Samoa was "discovered" by European explorers in the 18th century. International rivalries in the latter half of the 19th century were settled by an 1899 treaty in which Germany and the US divided the Samoan archipelago. The US formally occupied its portion - a smaller group of eastern islands with the excellent harbor of Pago Pago - the following year.

Andorra

For 715 years, from 1278 to 1993, Andorrans lived under a unique co-principality, ruled by the French chief of state and the Spanish bishop of Urgel. In 1993, this feudal system was modified with the titular heads of state retained, but the government transformed into a parliamentary democracy. Long isolated and impoverished, mountainous Andorra achieved considerable prosperity since World War II through its tourist industry. Many immigrants (legal and illegal) are attracted to the thriving economy with its lack of income taxes.

Angola

Civil war has been the norm in Angola since independence from Portugal in 1975. A 1994 peace accord between the government and the National Union for the Total Independence of Angola (UNITA) provided for the integration of former UNITA insurgents into the government and armed forces. A national unity government was installed in April of 1997, but serious fighting resumed in late 1998, rendering hundreds of thousands of people homeless. Up to 1.5 million lives

may have been lost in fighting over the past quarter century. The death of insurgent leader Jonas SAVIMBI in 2002 and a subsequent cease-fire with UNITA may bode well for the country.

Anguilla

Colonized by English settlers from Saint Kitts in 1650, Anguilla was administered by Great Britain until the early 19th century, when the island - against the wishes of the inhabitants - was incorporated into a single British dependency, along with Saint Kitts and Nevis. Several attempts at separation failed. In 1971, two years after a revolt, Anguilla was finally allowed to secede; this arrangement was formally recognized in 1980, with Anguilla becoming a separate British dependency.

Antarctica

Speculation over the existence of a "southern land" was not confirmed until the early 1820s when British and American commercial operators and British and Russian national expeditions began exploring the Antarctic Peninsula region and other areas south of the Antarctic Circle. Not until 1840 was it established that Antarctica was indeed a continent and not just a group of islands. Several exploration "firsts" were achieved in the early 20th century. Following World War II, there was an upsurge in scientific research on the continent. A number of countries have set up year-round research stations on Antarctica. Seven have made territorial claims, but no other country recognizes these claims. In order to form a legal framework for the activities of nations on the continent, an Antarctic Treaty was negotiated that neither denies nor gives recognition to existing territorial claims; signed in 1959, it entered into force in 1961.

Antigua and Barbuda

The Siboney were the first to inhabit the islands of Antigua and Barbuda in 2400 B.C., but Arawak and Carib Indians populated the islands when Columbus landed on his second voyage in 1493. Early settlements by the Spanish and French were succeeded by the English who formed a colony in 1667. Slavery, established to run the sugar plantations on Antigua, was abolished in 1834. The islands became an independent state within the British Commonwealth of Nations in 1981.

Arctic Ocean

The Arctic Ocean is the smallest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, Indian Ocean, and the recently delimited Southern Ocean). The Northwest Passage (US and Canada) and Northern Sea Route (Norway and Russia) are two important seasonal waterways. A sparse network of air, ocean, river, and land routes circumscribes the Arctic Ocean.

Argentina

Following independence from Spain in 1816, Argentina experienced periods of internal political conflict between conservatives and liberals and between civilian and military factions. After World War II, a long period of Peronist authoritarian rule and interference in subsequent governments was followed by a military junta that took power in 1976. Democracy returned in 1983, and numerous elections since then have underscored Argentina's progress in democratic consolidation.

Armenia

Armenia prides itself on being the first nation to formally adopt Christianity (early 4th century). Despite periods of autonomy,

over the centuries Armenia came under the sway of various empires including the Roman, Byzantine, Arab, Persian, and Ottoman. It was incorporated into Russia in 1828 and the USSR in 1920. Armenian leaders remain preoccupied by the long conflict with Muslim Azerbaijan over Nagorno-Karabakh, a primarily Armenian-populated region, assigned to Soviet Azerbaijan in the 1920s by Moscow. Armenia and Azerbaijan began fighting over the area in 1988; the struggle escalated after both countries attained independence from the Soviet Union in 1991. By May 1994, when a cease-fire took hold, Armenian forces held not only Nagorno-Karabakh but also a significant portion of Azerbaijan proper. The economies of both sides have been hurt by their inability to make substantial progress toward a peaceful resolution.

Aruba

Discovered and claimed for Spain in 1499, Aruba was acquired by the Dutch in 1636. The island's economy has been dominated by three main industries. A 19th century gold rush was followed by prosperity brought on by the opening in 1924 of an oil refinery. The last decades of the 20th century saw a boom in the tourism industry. Aruba seceded from the Netherlands Antilles in 1986 and became a separate, autonomous member of the Kingdom of the Netherlands. Movement toward full independence was halted at Aruba's request in 1990.

Ashmore and Cartier Islands

These uninhabited islands came under Australian authority in 1931; formal administration began two years later. Ashmore Reef supports a rich and diverse avian and marine habitat; in 1983, it became a National Nature Reserve. Cartier Island, a former bombing range, is now a marine reserve.

Atlantic Ocean

The Atlantic Ocean is the second largest of the world's five oceans (after the Pacific Ocean, but larger than the Indian Ocean, Southern Ocean, and Arctic Ocean). The Kiel Canal (Germany), Oresund (Denmark-Sweden), Bosphorus (Turkey), Strait of Gibraltar (Morocco-Spain), and the Saint Lawrence Seaway (Canada-US) are important strategic access waterways. The decision by the International Hydrographic Organization in the spring of 2000 to delimit a fifth world ocean, the Southern Ocean, removed the portion of the Atlantic Ocean south of 60 degrees south.

Australia

Australia became a commonwealth of the British Empire in 1901. It was able to take advantage of its natural resources to rapidly develop its agricultural and manufacturing industries and to make a major contribution to the British effort in World Wars I and II. Long-term concerns include pollution, particularly depletion of the ozone layer, and management and conservation of coastal areas, especially the Great Barrier Reef. A referendum to change Australia's status, from a commonwealth headed by the British monarch to a republic, was defeated in 1999.

Austria

Once the center of power for the large Austro-Hungarian Empire, Austria was reduced to a small republic after its defeat in World War I. Following annexation by Nazi Germany in 1938 and subsequent occupation by the victorious Allies in 1945, Austria's status remained unclear for a decade. A State Treaty signed in 1955 ended the occupation, recognized Austria's independence, and forbade unification with Germany. A constitutional law that same year declared the country's "perpetual neutrality" as a condition for

Soviet military withdrawal. This neutrality, once ingrained as part of the Austrian cultural identity, has been called into question since the Soviet collapse of 1991 and Austria's entry into the European Union in 1995. A prosperous country, Austria entered the European Monetary Union in 1999.

Azerbaijan

Azerbaijan - a nation with a Turkic and majority-Muslim population - regained its independence after the collapse of the Soviet Union in 1991. Despite a 1994 cease-fire, Azerbaijan has yet to resolve its conflict with Armenia over the Azerbaijani Nagorno-Karabakh enclave (largely Armenian populated). Azerbaijan has lost 16% of its territory and must support some 800,000 refugees and internally displaced persons as a result of the conflict. Corruption is ubiquitous and the promise of widespread wealth from Azerbaijan's undeveloped petroleum resources remains largely unfulfilled.

Bahamas, The

Arawak Indians inhabited the islands when Christopher Columbus first set foot in the New World on San Salvador in 1492. British settlement of the islands began in 1647; the islands became a colony in 1783. Since attaining independence from the UK in 1973, The Bahamas have prospered through tourism and international banking and investment management. Because of its geography, the country is a major transshipment point for illegal drugs, particularly shipments to the US, and its territory is used for smuggling illegal migrants into the US.

Bahrain

Bahrain's small size and central location among Persian Gulf

countries require it to play a delicate balancing act in foreign affairs among its larger neighbors. Facing declining oil reserves, Bahrain has turned to petroleum processing and refining and has transformed itself into an international banking center. The new amir, installed in 1999, has pushed economic and political reforms and has worked to improve relations with the Shi'a community. In February 2001, Bahraini voters approved a referendum on the National Action Charter - the centerpiece of the amir's political liberalization program. In February 2002, Amir HAMAD bin Isa Al Khalifa proclaimed himself king. In October 2002, Bahrainis elected members of the lower house of Bahrain's reconstituted bicameral legislature, the National Assembly.

Baker Island

The US took possession of the island in 1857, and its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization was begun on this island - as well as on nearby Howland Island - but was disrupted by World War II and thereafter abandoned. Presently the island is a National Wildlife Refuge run by the US Department of the Interior; a day beacon is situated near the middle of the west coast.

Bangladesh

Bangladesh came into existence in 1971 when Bengali East Pakistan seceded from its union with West Pakistan. About a third of this extremely poor country floods annually during the monsoon rainy season, hampering economic development.

Barbados

The island was uninhabited when first settled by the

British in 1627. Slaves worked the sugar plantations established on the island until 1834 when slavery was abolished. The economy remained heavily dependent on sugar, rum, and molasses production through most of the 20th century. The gradual introduction of social and political reforms in the 1940s and 1950s led to complete independence from the UK in 1966. In the 1990s, tourism and manufacturing surpassed the sugar industry in economic importance.

Bassas da India

This atoll is a volcanic rock surrounded by reefs and is awash at high tide. A French possession since 1897, it was placed under the administration of a commissioner residing in Reunion in 1968.

Belarus

After seven decades as a constituent republic of the USSR, Belarus attained its independence in 1991. It has retained closer political and economic ties to Russia than any of the other former Soviet republics. Belarus and Russia signed a treaty on a two-state union on 8 December 1999 envisioning greater political and economic integration. Although Belarus agreed to a framework to carry out the accord, serious implementation has yet to take place.

Belgium

Belgium became independent from the Netherlands in 1830 and was occupied by Germany during World Wars I and II. It has prospered in the past half century as a modern, technologically advanced European state and member of NATO and the EU. Tensions between the Dutch-speaking Flemings of the north and the French-speaking Walloons of the south have led in recent years to constitutional amendments granting these regions formal recognition and autonomy.

Belize

Territorial disputes between the UK and Guatemala delayed the independence of Belize (formerly British Honduras) until 1981. Guatemala refused to recognize the new nation until 1992. Tourism has become the mainstay of the economy. The country remains plagued by high unemployment, growing involvement in the South American drug trade, and increased urban crime.

Benin

Present day Benin was the site of Dahomey, a prominent West African kingdom that rose in the 15th century. The territory became a French Colony in 1872 and achieved independence on 1 August 1960, as the Republic of Benin. A succession of military governments ended in 1972 with the rise to power of Mathieu KEREKOU and the establishment of a government based on Marxist-Leninist principles. A move to representative government began in 1989. Two years later, free elections ushered in former Prime Minister Nicephore SOGLO as president, marking the first successful transfer of power in Africa from a dictatorship to a democracy. KEREKOU was returned to power by elections held in 1996 and 2001, though some irregularities were alleged.

Bermuda

Bermuda was first settled in 1609 by shipwrecked English colonists headed for Virginia. Tourism to the island to escape North American winters first developed in Victorian times. Tourism continues to be important to the island's economy, although international business has overtaken it in recent years. Bermuda has developed into a highly successful offshore financial center. A referendum on independence was soundly defeated in 1995.

Bhutan

In 1865, Britain and Bhutan signed the Treaty of Sinchulu, under which Bhutan would receive an annual subsidy in exchange for ceding some border land. Under British influence, a monarchy was set up in 1907; three years later, a treaty was signed whereby the British agreed not to interfere in Bhutanese internal affairs and Bhutan allowed Britain to direct its foreign affairs. This role was assumed by independent India after 1947. Two years later, a formal Indo-Bhutanese accord returned the areas of Bhutan annexed by the British, formalized the annual subsidies the country received, and defined India's responsibilities in defense and foreign relations. A refugee issue of some 100,000 Bhutanese in Nepal remains unresolved; 90% of the refugees are housed in seven United Nations Office of the High Commissioner for Refugees (UNHCR) camps. Maoist Assamese separatists from India, who have established themselves in the southeast portion of Bhutan, have drawn Indian cross-border incursions.

Bolivia

Bolivia, named after independence fighter Simon BOLIVAR, broke away from Spanish rule in 1825; much of its subsequent history has consisted of a series of nearly 200 coups and counter-coups. Comparatively democratic civilian rule was established in the 1980s, but leaders have faced difficult problems of deep-seated poverty, social unrest, and drug production. Current goals include attracting foreign investment, strengthening the educational system, resolving disputes with coca growers over Bolivia's counterdrug efforts, continuing the privatization program, and waging an anticorruption campaign.

Bosnia and Herzegovina

Bosnia and Herzegovina's declaration of sovereignty in October 1991, was followed by a declaration of independence from the former Yugoslavia on 3 March 1992 after a referendum boycotted by ethnic Serbs. The Bosnian Serbs - supported by neighboring Serbia and Montenegro - responded with armed resistance aimed at partitioning the republic along ethnic lines and joining Serb-held areas to form a "greater Serbia." In March 1994, Bosniaks and Croats reduced the number of warring factions from three to two by signing an agreement creating a joint Bosniak/Croat Federation of Bosnia and Herzegovina. On 21 November 1995, in Dayton, Ohio, the warring parties initialed a peace agreement that brought to a halt three years of interethnic civil strife (the final agreement was signed in Paris on 14 December 1995). The Dayton Agreement retained Bosnia and Herzegovina's international boundaries and created a joint multi-ethnic and democratic government. This national government was charged with conducting foreign, economic, and fiscal policy. Also recognized was a second tier of government comprised of two entities roughly equal in size: the Bosniak/Croat Federation of Bosnia and Herzegovina and the Bosnian Serb-led Republika Srpska (RS). The Federation and RS governments were charged with overseeing internal functions. In 1995-96, a NATO-led international peacekeeping force (IFOR) of 60,000 troops served in Bosnia to implement and monitor the military aspects of the agreement. IFOR was succeeded by a smaller, NATO-led Stabilization Force (SFOR) whose mission is to deter renewed hostilities. SFOR remains in place although troop levels were reduced to approximately 12,000 by the close of 2002.

Botswana

Formerly the British protectorate of Bechuanaland, Botswana adopted its new name upon independence in 1966. Four decades of uninterrupted civilian leadership, progressive social policies, and significant capital investment have created one of the most dynamic economies in Africa. Mineral extraction, principally diamond mining, dominates economic activity, though tourism is a growing sector due to the country's conservation practices and extensive nature preserves. Botswana has the world's highest known rate of HIV/AIDS infection, but also one of Africa's most progressive and comprehensive programs for dealing with the disease.

Bouvet Island

This uninhabited volcanic island is almost entirely covered by glaciers and is difficult to approach. It was discovered in 1739 by a French naval officer after whom the island was named. No claim was made until 1825, when the British flag was raised. In 1928, the UK waived its claim in favor of Norway, which had occupied the island the previous year. In 1971, Bouvet Island and the adjacent territorial waters were designated a nature reserve. Since 1977, Norway has run an automated meteorological station on the island.

Brazil

Following three centuries under the rule of Portugal, Brazil became an independent nation in 1822. By far the largest and most populous country in South America, Brazil has overcome more than half a century of military intervention in the governance of the country to pursue industrial and agricultural growth and development of the interior. Exploiting vast natural resources and a large labor

pool, Brazil is today South America's leading economic power and a regional leader. Highly unequal income distribution remains a pressing problem.

British Indian Ocean Territory

Established as a territory of the UK

in 1965, a number of the British Indian Ocean Territory (BIOT) islands were transferred to the Seychelles when it attained independence in 1976. Subsequently, BIOT has consisted only of the six main island groups comprising the Chagos Archipelago. The largest and most southerly of the islands, Diego Garcia, contains a joint UK-US naval support facility. All of the remaining islands are uninhabited. Former agricultural workers, earlier residents in the islands, were relocated primarily to Mauritius but also to the Seychelles, between 1967 and 1973. In 2000, a British High Court ruling invalidated the local immigration order that had excluded them from the archipelago, but upheld the special military status of Diego Garcia.

British Virgin Islands

First settled by the Dutch in 1648, the islands were annexed in 1672 by the English. The economy is closely tied to the larger and more populous US Virgin Islands to the west; the US dollar is the legal currency.

Brunei

The Sultanate of Brunei's influence peaked between the 15th and 17th centuries when its control extended over coastal areas of northwest Borneo and the southern Philippines. Brunei subsequently entered a period of decline brought on by internal strife over royal succession, colonial expansion of European powers, and piracy. In

1888, Brunei became a British protectorate; independence was achieved in 1984. The same family has ruled Brunei for over six centuries. Brunei benefits from extensive petroleum and natural gas fields, the source of one of the highest per capita GDPs in the developing world.

Bulgaria

The Bulgars, a Central Asian Turkic tribe, merged with the local Slavic inhabitants in the late 7th century to form the first Bulgarian state. In succeeding centuries, Bulgaria struggled with the Byzantine Empire to assert its place in the Balkans, but by the end of the 14th century the country was overrun by the Ottoman Turks. Bulgaria regained its independence in 1878, but having fought on the losing side in both World Wars, it fell within the Soviet sphere of influence and became a People's Republic in 1946. Communist domination ended in 1990, when Bulgaria held its first multiparty election since World War II and began the contentious process of moving toward political democracy and a market economy while combating inflation, unemployment, corruption, and crime. Today, reforms and democratization keep Bulgaria on a path toward eventual integration into NATO and the EU - with which it began accession negotiations in 2000.

Burkina Faso

Independence from France came to Burkina Faso (formerly Upper Volta) in 1960. Repeated military coups during the 1970s and 1980s were followed by multiparty elections in the early 1990s. Burkina Faso's high population density and limited natural resources result in poor economic prospects for the majority of its citizens. Every year, several hundred thousand seasonal farm workers seek

employment in Cote d'Ivoire and Ghana and are adversely affected by instability in those regions.

Burma

Britain conquered Burma over a period of 62 years (1824-1886) and incorporated it into its Indian Empire. Burma was administered as a province of India until 1937 when it became a separate, self-governing colony; independence outside of the Commonwealth was attained in 1948. Gen. NE WIN dominated the government from 1962 to 1988, first as military ruler, then as president, and later as political kingmaker. Despite multiparty elections in 1990 that resulted in the main opposition party winning a decisive victory, the ruling military junta refused to hand over power. Key opposition leader and Nobel Peace Prize recipient AUNG SAN SUU KYI, under house arrest from 1989 to 1995, was again placed under house detention from September 2000 to May 2002 and again in May 2003; her supporters are routinely harassed or jailed.

Burundi

Burundi's first democratically elected president was assassinated in October 1993 after only four months in office. Since then, some 200,000 Burundians have perished in widespread, often intense ethnic violence between Hutu and Tutsi factions. Hundreds of thousands have been internally displaced or have become refugees in neighboring countries. Burundi troops, seeking to secure their borders, intervened in the conflict in the Democratic Republic of the Congo in 1998. More recently, many of these troops have been redeployed back to Burundi to deal with periodic upsurges in rebel activity. A new transitional government, inaugurated on 1 November 2001, was to be the first step toward holding national elections in

three years. While the Government of Burundi signed a cease-fire agreement in December 2002 with three of Burundi's four Hutu rebel groups, implementation of the agreement has been problematic and one rebel group refuses to sign on, clouding prospects for a sustainable peace.

Cambodia

Following a five-year struggle, Communist Khmer Rouge forces captured Phnom Penh in 1975 and ordered the evacuation of all cities and towns; over 1 million displaced people died from execution or enforced hardships. A 1978 Vietnamese invasion drove the Khmer Rouge into the countryside and touched off almost 20 years of fighting. UN-sponsored elections in 1993 helped restore some semblance of normalcy as did the rapid diminishment of the Khmer Rouge in the mid-1990s. A coalition government, formed after national elections in 1998, brought renewed political stability and the surrender of remaining Khmer Rouge forces in 1998.

Cameroon

The former French Cameroon and part of British Cameroon merged in 1961 to form the present country. Cameroon has generally enjoyed stability, which has permitted the development of agriculture, roads, and railways, as well as a petroleum industry. Despite movement toward democratic reform, political power remains firmly in the hands of an ethnic oligarchy.

Canada

A land of vast distances and rich natural resources, Canada became a self-governing dominion in 1867 while retaining ties to the British crown. Economically and technologically the nation has developed in parallel with the US, its neighbor to the south across

an unfortified border. Its paramount political problem continues to be the relationship of the province of Quebec, with its French-speaking residents and unique culture, to the remainder of the country.

Cape Verde

The uninhabited islands were discovered and colonized by the Portuguese in the 15th century; they subsequently became a trading center for African slaves and later an important coaling and resupply stop for whaling and transatlantic shipping. Following independence in 1975, and a tentative interest in unification with Guinea-Bissau, a one-party system was established and maintained until multi-party elections were held in 1990. Cape Verde continues to exhibit one of Africa's most stable democratic governments. Repeated droughts during the second half of the 20th century caused significant hardship and prompted heavy emigration. As a result, Cape Verde's expatriate population is greater than its domestic one. Most Cape Verdeans have both African and Portuguese antecedents.

Cayman Islands

The Cayman Islands were colonized from Jamaica by the British during the 18th and 19th centuries. Administered by Jamaica since 1863, they remained a British dependency after 1962 when the former became independent.

Central African Republic

The former French colony of Ubangi-Shari became the Central African Republic upon independence in 1960. After three tumultuous decades of misrule - mostly by military governments - civilian rule was established in 1993 and lasted for one decade. In March 2003 a military coup deposed the civilian government of

President Ange-Felix PATASSE and has since established a new government.

Chad

Chad, part of France's African holdings until 1960, endured three decades of ethnic warfare as well as invasions by Libya before a semblance of peace was finally restored in 1990. The government eventually suppressed or came to terms with most political-military groups, settled a territorial dispute with Libya on terms favorable to Chad, drafted a democratic constitution, and held multiparty presidential and National Assembly elections in 1996 and 1997, respectively. In 1998, a new rebellion broke out in northern Chad, which continued to escalate throughout 2000. A peace agreement, signed in January 2002 between the government and the rebels, provides for the demobilization of the rebels and their reintegration into the political system. Despite movement toward democratic reform, power remains in the hands of a northern ethnic oligarchy.

Chile

A three-year-old Marxist government was overthrown in 1973 by a dictatorial military regime led by Augusto PINOCHET, who ruled until a freely elected president was installed in 1990. Sound economic policies, first implemented by the PINOCHET dictatorship, led to unprecedented growth in 1991-97 and have helped secure the country's commitment to democratic and representative government.

China

For centuries China stood as a leading civilization, outpacing the rest of the world in the arts and sciences. But in the 19th and early 20th centuries, China was beset by civil unrest, major

famines, military defeats, and foreign occupation. After World War II, the Communists under MAO Zedong established a dictatorship that, while ensuring China's sovereignty, imposed strict controls over everyday life and cost the lives of tens of millions of people. After 1978, his successor DENG Xiaoping gradually introduced market-oriented reforms and decentralized economic decision-making. Output quadrupled by 2000. Political controls remain tight while economic controls continue to be relaxed.

Christmas Island

Named in 1643 for the day of its discovery, the island was annexed and settlement was begun by the UK in 1888. Phosphate mining began in the 1890s. The UK transferred sovereignty to Australia in 1958. Almost two-thirds of the island has been declared a national park.

Clipperton Island

This isolated island was named for John CLIPPERTON, a pirate who made it his hideout early in the 18th century. Annexed by France in 1855, it was seized by Mexico in 1897. Arbitration eventually awarded the island to France, which took possession in 1935.

Cocos (Keeling) Islands

There are 27 coral islands in the group. Captain William Keeling discovered the islands in 1609, but they remained uninhabited until the 19th century. Annexed by the UK in 1857, they were transferred to the Australian Government in 1955. The population on the two inhabited islands generally is split between the ethnic Europeans on West Island and the ethnic Malays on Home Island.

Colombia

Colombia was one of the three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and Venezuela). A 40-year insurgent campaign to overthrow the Colombian Government escalated during the 1990s, undergirded in part by funds from the drug trade. Although the violence is deadly and large swaths of the countryside are under guerrilla influence, the movement lacks the military strength or popular support necessary to overthrow the government. An anti-insurgent army of paramilitaries has grown to be several thousand strong in recent years, challenging the insurgents for control of territory and illicit industries such as the drug trade and the government's ability to exert its dominion over rural areas. While Bogota steps up efforts to reassert government control throughout the country, neighboring countries worry about the violence spilling over their borders.

Comoros

Unstable Comoros has endured 19 coups or attempted coups since gaining independence from France in 1975. In 1997, the islands of Anjouan and Moheli declared their independence from Comoros. In 1999, military chief Col. AZALI seized power. He pledged to resolve the secessionist crisis through a confederal arrangement named the 2000 Fomboni Accord. In December 2001, voters approved a new constitution and presidential elections took place in the spring of 2002. Each island in the archipelago elected its own president and a new union president was sworn in on May 26, 2002.

Congo, Democratic Republic of the

Since 1997, the Democratic Republic of the Congo (DROC; formerly called Zaire) has been rent by ethnic strife and civil war, touched off by a massive inflow in 1994

of refugees from the fighting in Rwanda and Burundi. The government of former president MOBUTU Sese Seko was toppled by a rebellion led by Laurent KABILA in May 1997; his regime was subsequently challenged by a Rwanda- and Uganda-backed rebellion in August 1998. Troops from Zimbabwe, Angola, Namibia, Chad, and Sudan intervened to support the Kinshasa regime. A cease-fire was signed on 10 July 1999 by the DROC, Zimbabwe, Angola, Uganda, Namibia, Rwanda, and Congolese armed rebel groups, but sporadic fighting continued.

KABILA was assassinated on 16 January 2001 and his son Joseph KABILA

was named head of state ten days later. In October 2002, the new president was successful in getting occupying Rwandan forces to withdraw from eastern Congo; two months later, an agreement was signed by all remaining warring parties to end the fighting and set up a government of national unity.

Congo, Republic of the

Upon independence in 1960, the former French region of Middle Congo became the Republic of the Congo. A quarter century of experimentation with Marxism was abandoned in 1990 and a democratically elected government installed in 1992. A brief civil war in 1997 restored former Marxist President SASSOU-NGUESSO, but ushered in a period of ethnically based unrest. Southern-based rebel groups agreed to a final peace accord in March 2003. The Republic of Congo is one of Africa's largest petroleum producers with significant potential for offshore development.

Cook Islands

Named after Captain Cook, who sighted them in 1770, the islands became a British protectorate in 1888. By 1900, administrative control was transferred to New Zealand; in 1965

residents chose self-government in free association with New Zealand. The emigration of skilled workers to New Zealand and government deficits are continuing problems.

Coral Sea Islands

Scattered over some 1 million square kilometers of ocean, the Coral Sea Islands were declared a territory of Australia in 1969. They are uninhabited except for a small meteorological staff on the Willis Islets. Automated weather stations, beacons, and a lighthouse occupy many other islands and reefs.

Costa Rica

Costa Rica is a Central American success story: since the late 19th century, only two brief periods of violence have marred its democratic development. Although still a largely agricultural country, it has expanded its economy to include strong technology and tourism sectors. The standard of living is relatively high. Land ownership is widespread.

Cote d'Ivoire

Close ties to France since independence in 1960, the development of cocoa production for export, and foreign investment made Cote d'Ivoire one of the most prosperous of the tropical African states, but did not protect it from political turmoil. On 25 December 1999, a military coup - the first ever in Cote d'Ivoire's history - overthrew the government led by President Henri Konan BEDIE. Junta leader Robert GUEI held elections in late 2000, but excluded prominent opposition leader Alassane OUATTARA, blatantly rigged the polling results, and declared himself winner. Popular protest forced GUEI to step aside and brought runner-up Laurent GBAGBO into power. GBAGBO spent his first two years in office trying

to consolidate power to strengthen his weak mandate, but he was unable to appease his opponents, who launched a failed coup attempt in September 2002. Rebel forces claimed the northern half of the country and in January 2003 were granted ministerial positions in a unity government. However, the central government has yet to exert control over the northern regions and tension remains high between GBAGBO and rebel leaders. Several thousand French and West African troops remain in Cote d'Ivoire to maintain peace and help implement the peace accords.

Croatia

In 1918, the Croats, Serbs, and Slovenes formed a kingdom known after 1929 as Yugoslavia. Following World War II, Yugoslavia became a federal independent Communist state under the strong hand of Marshal TITO. Although Croatia declared its independence from Yugoslavia in 1991, it took four years of sporadic, but often bitter, fighting before occupying Serb armies were mostly cleared from Croatian lands. Under UN supervision, the last Serb-held enclave in eastern Slavonia was returned to Croatia in 1998.

Cuba

Fidel CASTRO led a rebel army to victory in 1959; his iron rule has held the country together since then. Cuba's Communist revolution, with Soviet support, was exported throughout Latin America and Africa during the 1960s, 1970s, and 1980s. The country is now slowly recovering from a severe economic recession in 1990, following the withdrawal of former Soviet subsidies, worth \$4 billion to \$6 billion annually. Cuba portrays its difficulties as the result of the US embargo in place since 1961. Illicit migration to the US - using homemade rafts, alien smugglers, or falsified visas - is a continuing problem. Some 2,500 Cubans attempted the

crossing of the Straits of Florida in 2002; the US Coast Guard apprehended about 60% of the individuals.

Cyprus

Independence from the UK was approved in 1960, with constitutional guarantees by the Greek Cypriot majority to the Turkish Cypriot minority. In 1974, a Greek-sponsored attempt to seize the government was met by military intervention from Turkey, which soon controlled almost 40% of the island. In 1983, the Turkish-held area declared itself the "Turkish Republic of Northern Cyprus," but it is recognized only by Turkey. UN-led direct talks between the two sides to reach a comprehensive settlement to the division of the island began in January 2002.

Czech Republic

Following the First World War, the closely related Czechs and Slovaks of the former Austro-Hungarian Empire merged to form Czechoslovakia. During the interwar years, the new country's leaders were frequently preoccupied with meeting the demands of other ethnic minorities within the republic, most notably the Sudeten Germans and the Ruthenians (Ukrainians). After World War II, a truncated Czechoslovakia fell within the Soviet sphere of influence. In 1968, an invasion by Warsaw Pact troops ended the efforts of the country's leaders to liberalize Communist party rule and create "socialism with a human face." Anti-Soviet demonstrations the following year ushered in a period of harsh repression. With the collapse of Soviet authority in 1989, Czechoslovakia regained its freedom through a peaceful "Velvet Revolution." On 1 January 1993, the country underwent a "velvet divorce" into its two national components, the Czech Republic and Slovakia. Now a member of NATO, the Czech Republic has moved toward integration in world markets, a

development that poses both opportunities and risks. In December 2002, the Czech Republic was invited to join the European Union (EU). It is expected that the Czech Republic will accede to the EU in 2004.

Denmark

Once the seat of Viking raiders and later a major north European power, Denmark has evolved into a modern, prosperous nation that is participating in the general political and economic integration of Europe. It joined NATO in 1949 and the EEC (now the EU) in 1973. However, the country has opted out of certain elements of the European Union's Maastricht Treaty, including the European Economic and Monetary Union (EMU) and issues concerning certain justice and home affairs.

Djibouti
