The image shows the front cover of a book. The cover is primarily a deep red color with a fine, pebbled texture. A vertical strip of marbled paper runs down the center, and a diagonal section of marbled paper extends from the top right corner towards the center. The marbling features a complex, organic pattern of swirling, cell-like shapes in shades of brown, tan, and cream. The text is printed in a yellow, cursive-style font.

- *Population*, laws of, cannot be comprised in a brief formula, [400](#).
  - Vindication of Malthus, and of the general doctrine of his Essay on Population, [397](#), [400](#).
  - If, as wealth increases, the number among whom it is to be divided increases more rapidly, absolute wealth may be greater, but individual wealth will be less, [401](#).
  - Malthus has reduced the principle to the formula that population tends to keep on a level with the means of subsistence, [402](#).
  - This principle not new; every writer on such subjects since Aristotle has proclaimed it, *ib*.
  - Enunciated by Sir James Steuart thirty years before the appearance of the Essay on Population, *ib.*, *note*.
  - Nature has taken greater care of species than of individuals, in order to insure the perpetuity of races, [402](#).
  - Instances of this in the vegetable kingdom, *ib.*;

- and in animals whose life is of a type more akin to vegetables, [402](#), [403](#).
- Advancing in scale of social life, means of reproduction bestowed with greater parsimony, *ib*.
- In the human species, reproductive faculty less powerful than in any other, *ib*.
- But, physically, man does not escape the law of a tendency to multiplication beyond the limits of space and nourishment, *ib*.
- Difference between the physiological power of multiplying and actual multiplication, *ib*.
- Malthus inquired in what period of time mankind would double, if space and food were unlimited, [404](#).
- But as this hypothesis is never realized, theoretical must be shorter than actual period, *ib*.
- Different rates of increase in different countries according to estimate of M. Moreau de Jonnès, [403](#).
- Such differences not the result of physiological causes, but of external obstacles, [404](#).
- New sources of local wealth lead invariably to increase of population, *ib*.
- Objections made to the theory of Malthus very illogical, *ib*.
- Nor are the arguments against his geometrical progression more conclusive, *ib*.
- Fixed on twenty-five years as the minimum period in which population may double itself, because this actually takes place in America, [405](#).
- Malthus merely asserts that it has a *tendency* to increase in a geometrical progression, *ib*.
- That this virtual power of multiplication will be restrained is just what Malthus contends for, *ib*.
- Restrained by preventive and repressive checks, [406](#).
- He was wrong in adopting the limit of twenty-five years, although it holds good in America, [406](#), [407](#).
- This mixing up of the virtual and the real has exposed him to be misunderstood and misrepresented, [406](#).
- Calculation by Euler of period of doubling, [407](#).

- Applying Euler's calculation to the facts stated by Moses, Hebrews who entered Egypt must have doubled in 14 years, *ib.*
- Absolute power of multiplication limited by obstacles, [408](#).
- Vegetable life limited by want of space and territorial fertility-animals destitute of foresight, by want of food, [409](#).
- Opinions of M. de Lamennais on this subject combated, *ib.*
- Law of limitation as regards man manifests itself by the double action of foresight and destruction, [410](#).
- The term moral restraint, used by Malthus, does not give us a just idea of the domain of foresight, *ib.*
- Other obstacles besides fear of poverty aid the action of the law of limitation in its preventive shape, [410](#), [411](#).
- Marriages on an average are probably later than they otherwise would be by eight years in consequence of these preventive obstacles, [411](#).
- Supposed advice of an old clergyman regarding too early marriages, [411](#), [412](#).
- Man's perfectibility an important element in resolving the problem of population, [413](#).
- Malthus, by neglecting this, has attributed less force to the preventive than to the repressive check, *ib.*
- For the expression, "means of subsistence," Say has substituted one more exact, namely, "means of existence," *ib.*
- Man's constant effort to better his condition exercises control over increase of numbers, [414](#).
- Better circumstances induce greater foresight, *ib.*
- In countries like China or Ireland, when rice and potatoes fail, there is nothing to fall back on, and repressive check comes into operation, [416](#).
- The true formula of Malthus is, not that population tends to keep on a level with, but to go beyond, the means of subsistence, *ib.*
- Foresight prevents this in the human race, *ib.*
- Recapitulation, [416](#), [417](#).
- Population tends to redundancy most among unskilled labourers, [420](#).
- Marriages are less improvident among the higher classes, [421](#).

  - Producers and consumers should be left free to take care of their own interests, [327](#).
  - The effect of inventions and discoveries on the interest of producers and consumers illustrated by diagrams, [331](#), [332](#).
  - Advantages, from inventions, or from local situation, climate, etc., slip rapidly from the hands of producers, and go to enlarge enjoyments of consumers, [333](#), [334](#).
  - Same thing holds of disadvantages, [334](#).
  - Producer has nothing to do with the utility of what is produced, only with its value, [336](#).
  - The utility concerns the demander, *ib*.
  - It is in the intention of the consumer that moral or immoral enjoyment is to be discovered, [338](#).
- *Production* is to modify and combine substances, not to create, them, [100](#).
  - Production and consumption not the best terms to designate services rendered and received, [323](#).

  - Value consists in comparative appreciation of, [73](#).
  - Service is effort in one man, while the want and satisfaction are in another, [74](#).
  - Exchange of, forms the subject of Political Economy, [133](#).
  - Effort saved to the person who receives a service imparts value to the service rendered, [140-142](#).
  - *Service* a better term than *Labour*, [158](#).
  - Every product which has value implies a service, but every service does not imply a product; value, therefore, is in service, [174](#).

- When value passes from service to product, it undergoes, in product, all the risks and chances to which the service itself is subject, [176](#).

  - Solidarity, like responsibility, is a progressive force, and resolves itself into repercussive or reflected responsibility, *ib*.
  - To enable those who suffer from another's acts to react against them, connexion between cause and effect should be known, [492](#).

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

## **Section 2. Information about the Mission of Project Gutenberg**

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at [www.gutenberg.org](http://www.gutenberg.org).

### **Section 3. Information about the Project Gutenberg Literary Archive Foundation**

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at [www.gutenberg.org/contact](http://www.gutenberg.org/contact)

### **Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation**

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit [www.gutenberg.org/donate](http://www.gutenberg.org/donate).

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: [www.gutenberg.org/donate](http://www.gutenberg.org/donate).

## **Section 5. General Information About Project Gutenberg electronic works**

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: [www.gutenberg.org](http://www.gutenberg.org).

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
