HON. MEM. R.A.S.

PRINTED FOR PRIVATE CIRCULATION
1907

FOREWORD

LADY HUGGINS in her original draft of the obituary notice of my sister Agnes, which appeared in the *Astrophysical Journal*, included some words of personal appreciation and of reference to her family which were omitted from the copy sent for publication, as being, possibly, somewhat beyond the scope of a purely scientific journal. At my request Lady Huggins has consented to the full original draft, with a few additions, being published for private circulation. She has also, to my great gratification, and entirely on her own initiative, taken this opportunity of adding an appreciation of my elder sister.

My sisters' acquaintance with Lady Huggins commenced only after they had been some time permanently resident in London; and for the accuracy of the statements relating to their earlier lives I am alone responsible. Their father had died before the period of which Lady Huggins speaks from personal knowledge; and perhaps it is fit that I should supplement what she says as to the influence of family life upon the characters and careers of my sisters by mentioning a few facts connected with my father. Although a classical scholar of Trinity College, Dublin, his interests were for the most part scientific. In our earliest years his recreation was chemistry, the consequential odours of which used to excite the wrath of our Irish servants. Later a "big telescope" (4 inch aperture) was mounted in the garden, and we children were occasionally treated to a glimpse of Saturn's rings, or Jupiter's satellites. In an age before railways and telegraphs had reached the remote parts of Ireland and before clocks were "synchronised with Greenwich," the local time would have gone "all agley" had it not been for my father's observations with his "orthochronograph." These trivial things show that it was in an environment of scientific suggestion that our early lives were passed; and to me, at all events, my father's influence was more than suggestion, for to his painstaking teaching I have to attribute any little successes which I subsequently achieved.

It is difficult for me to express to Lady Huggins my thanks in fitting terms, for to thank implies a service; and her work has been not a service to me,

but a labour of love for those whose simple lives she records. Still I may say that I am deeply gratified by this finished product of her pen, and that I rejoice that she should have conceived the idea of writing this Appreciation, thereby enabling me to place it before the eyes of many friends.

I have to thank Director Frost of the Yerkes Observatory for his permission to reprint that part of the "Appreciation" which has already appeared.

MRS. CLERKE.
From a bust executed in Rome in 1868.

AGNES MARY CLERKE

AGNES MARY CLERKE was born on February 10, 1842, at Skibbereen, a small country town in a remote part of the County Cork. Her father was John William Clerke; and her mother was a sister of the late Lord Justice Deasy.

Constitutionally delicate, Agnes Clerke from her earliest years, as so often is to be noticed in cases of frail health, found her chief delight in literary study and in music. From quiet talks often enjoyed with her in her later life, it was clear that the thoughtfulness of Agnes Clerke, and her liking for probing difficult problems, must have developed early.

This is not the place for enlarging upon the family influences of her home life, but it should be said that these were truly fostering, and that she was a devoted and loving daughter, to whom the parental sympathy, strongly given on both sides, was at once inspiration and joy. Mrs. Clerke was a remarkable woman, with rare powers of insight and of capacity for love. Her conversational powers were of a high order, as was her musical ability. Those privileged to be present at her afternoon gatherings will not easily forget their pleasures; and intimate friends will long remember the charms of her music. Her rendering of old Irish airs on Ireland's national instrument—the harp—was delightful; and so indeed was her piano-playing. She told me one day near the close of her life, when near her eightieth birthday, that she practised on her instruments *every day*. This was interesting; and showed that power of persevering work—even under the natural disabilities of age—which was a marked feature in her daughter Agnes.

The bust, a photograph of which is here reproduced, was executed in Rome when Mrs. Clerke was about fifty years of age.

In considering the fostering influences of Agnes Clerke's home life, that of her only brother, Aubrey St. John Clerke, should be mentioned.

Mr. Clerke won the first gold medal of Trinity College, Dublin, in Mathematics at his Degree examination in 1865, and was awarded a studentship of £100 a year for seven years—the highest honour obtainable

at the Degree examination. He also won the second gold medal conferred by the University for Experimental and Natural Science.

Mr. Clerke has told me—what indeed I always believed—that although not professing to be a mathematician, his sister's perception of mathematical truth was singularly clear; and I feel sure that her brother's mathematical powers and knowledge of Natural Science were a great advantage to her, for the helpfulness of thorough sympathy is very great. In her later life she took lessons in mathematics, and expatiated to me on the pleasure she felt in them. Not that she aimed at making herself a mathematician; she was too wise to so err. Her object was simply to go far enough to enable her to do better her own particular work. No one that I have known—man or woman—better understood that the half may be better than the whole; that the art of doing, consists, greatly, in—*not* doing. She could renounce. And in these days great renunciation is necessary if useful work is to be done.

In 1861 the Clerke family moved to Dublin, and in 1863 to Queenstown. The winters of 1867 and of 1868 were spent at Rome; those of 1871 and 1872 at Naples; and the next four winters at Florence—the summers of 1874-76 being passed at the Bagni di Lucca. Both sisters profited to the full from this sojourn in Italy, as their subsequent writings show; but Agnes at Florence worked specially hard, reading constantly in the Public Library there, and always, I believe, with one great object before her.

It is a question of much interest to examine into the early leanings and aspirations of those who distinguish themselves later, and Agnes Clerke early determined her life work. Before leaving Skibbereen, about the age of fifteen, she had clearly before her the intention of writing a history of Astronomy, and it is thought, had actually written a few chapters. Her first article accepted for the *Edinburgh Review*, is in harmony with the above facts.

Agnes Clerke's first wish to examine into Science generally, was roused by the perusal of *Joyce's Scientific Dialogues*; but as regards Astronomy, Sir John Herschel's *Outlines* was her earliest guide—and I can imagine how much this really great book was to her, from my own early use of it.

Well do I remember reading an article in the *Edinburgh Review* for October 1880, on “The Chemistry of the Stars.” I admired it much: I wondered who had written it, for it seemed to me to be unlike the work of any one then known in the scientific world. Five years later I solved my puzzle, for in 1885 appeared the *History of Astronomy in the Nineteenth Century*; and I had not looked far into it before I exclaimed: “Now I know who wrote that article in the *Edinburgh Review*!”

Shortly after—dining at a house where to dine was always to share in a feast of reason and flow of soul—and sitting between our distinguished and kindly host Sir William Bowman, and Sir Robert Ball, Sir Robert and I exchanged ideas about the new *History of Astronomy*, and about its author, the new “Unknown.” With all his own acuteness, Sir Robert showed that the writer could not be a practical astronomer. But I was delighted to find that my admiration for the *History* was fully shared by him, and that his praise of it was very warm.

Shortly afterwards I entered upon a friendship, and upon a companionship in Astronomy, which have been among my best pleasures.

Agnes Clerke’s literary life may be said to have begun in 1877 with the acceptance of her article “Copernicus in Italy,” by Henry Reeve, then editor of the *Edinburgh Review*, who recognised the value of his new contributor and kept her at work. The number of her contributions to the *Edinburgh* is fifty; and they are all of a high order.

Agnes Clerke, with her family, returned to England in 1877, and settled in London. With the publication of the *History of Astronomy* in 1885 may be said to have begun her astronomical life.

She read systematically, and cultivated personal relations with a wide circle of astronomical workers, in person, or by correspondence. I consider that these relations had much to do with the success of her work. Her sympathies were so keen, her interest so warm, her longing for further truth so intense,—that every one liked to offer her all they could!

In 1890 appeared her second book, *The System of the Stars*.

The *Observatory* for December 1890 contains an article by me on this work. A review, in the strict sense of the term, it was not, because there was much in the book which, for obvious reasons, I could not discuss without becoming controversial. But upon one important question I spoke strongly; and I venture now to recall and re-urge the position I then tried to expound. Briefly it is this. The progress of Science and the growth of its literature during the last quarter of a century has been so enormous, that a new order of worker is imperatively called for; and I hailed in Agnes Clerke an admirable example of such a worker, devoting herself to Astronomy, which is at once the oldest and, in its new developments, the youngest of the Sciences—the science which Poincaré has lately so eloquently declared has given the conception of *law* to all the others.

I ventured to sketch what should be the qualifications and aims of such workers; and the years which have gone by since 1890 have but deepened my conviction that there is a splendid and ever-growing field—even now white unto harvest—ready for these special workers. Their mission is to collect, collate, correlate, and digest the mass of observations and papers—to chronicle, in short, on one hand; and on the other, to discuss and suggest, and to expound: that is, to prepare material for experts, and at the same time to inform and interest the general public. There is urgent need of better educated public opinion in this country.

That such a mission may be a splendid and fruitful one has been shown by Agnes Clerke; what careful preparation it requires, and how much it demands of those who would enter upon it, her career also shows.

The immense increase in astronomical literature is hardly realised except by those engaged in dealing with it. To give but one instance—“The Annual Index of Astronomical Literature for 1905,” published under the auspices of the *Astronomische Gesellschaft*, contains over two thousand references, collated from three hundred separate publications.

The strain of such work as I am indicating is great indeed, involving, as it should, the power of holding loose in the mind, so to speak, an immense mass of facts, and also a power of rapidly associating or dissociating them as work and discovery may suggest.

In one of her latest works, *Modern Cosmogonies*, Agnes Clerke herself dwelt upon this strain. “Year by year,” she says (p. 160), “details

accumulate, and the strain of keeping them under mental command becomes heavier.”

Pathetic words! written—almost in blood! For not long before had been published her last large work, *Problems in Astrophysics*; a work she feared she could not live to complete—a work which at times she was only able to toil at for half-hour periods.

All through her life Agnes Clerke was a student. Lectures and Friday Evening Discourses at the Royal Institution which bore upon her work she was careful to attend. A three months’ visit to Sir David and Lady Gill at the Cape in 1888 gave her some Observatory opportunities which increased her power of clearly realising the records of observatory and laboratory work. Sir George Baden-Powell invited her to accompany his yachting party to Novaya Zemlya for the solar eclipse of August 1896. When I expressed very strongly my regret that she had declined this invitation (chiefly I now know because she feared she might be prevented from keeping literary engagements absolutely to time), she surprised me a week later with an earnest request that she and I should form a little expedition of two, and try what we could see. She had divined an unspoken longing of mine, and I cannot refrain from recording the unselfish love that would fain have gratified me. But it could not be.

She was awarded in 1892 the Actonian Prize of one hundred guineas for her works on Astronomy, by the Royal Institution; and in 1901 was commissioned by the Managers to write the first Essay under the Hodgkins Trust, on Low Temperature Research at the Royal Institution by Professor Sir James Dewar from 1893-1900.

In 1903 she received the distinction of being elected an Hon. Member of the Royal Astronomical Society—an honour and title held previously only by Mrs. Somerville, Caroline Herschel, and Ann Sheepshanks. I may perhaps be permitted to say that my own deep gratification in my share of this great honour conferred on us by the Society was heightened by receiving it with Agnes Clerke.

She was a frequent attendant at the meetings of both the Royal Astronomical Society and the British Astronomical Association, and always an interested one. Occasionally she spoke; but she had no liking for speaking in public, nor indeed was she well suited for it.

A complete list of Agnes Clerke's papers it would be difficult to compile. They were, in truth, innumerable. Her articles on astronomers for the *Dictionary of National Biography*—out of the sixty-six volumes which constitute this great work there are only eleven to which she did not contribute,—articles for the *Encyclopædia Britannica*, and for other encyclopædias were many, and all of them were models of painstaking inquiry and of clear, concise statement. The more important of these, that on Laplace in the *Encyclopædia Britannica*, for instance, are of lasting interest and value.

Her larger works are:—

History of Astronomy in the Nineteenth Century (4 editions).

The System of the Stars.

Familiar Studies in Homer.

The Herschels and Modern Astronomy.

Concise History of Astronomy.

Modern Cosmogonies.

Problems in Astrophysics.

I venture to think that the *History of Astronomy in the Nineteenth Century* is the most important of her works. It is admirable in its completeness of references, its wide inclusiveness, and in its lucidity. It deserves to live, and it assuredly will live—the invaluable continuation of Grant's fine work. *The System of the Stars* and the *Problems in Astrophysics* are works of a different order. Treasuries of knowledge and of suggestion they certainly are.

The *Homeric Studies*, except in one chapter, are not specially astronomical; but they are evidence of width of culture and of wide intellectual interest, and are full of delightful touches of wit and of humour.

The Herschels is excellent and agreeable biographical reading. Three lives are vividly set forth in little more than two hundred octavo pages.

It seems to me a mistake to regard Agnes Clerke's smaller works as of less importance than her larger ones.

I have said that I consider the *History* her greatest work. But, in some respects, I venture to think that her greatest achievement is *Modern Cosmogonies*. I claim for this book that it is not only a history, but a work of philosophical thinking and of imaginative insight of a very high order.

Its small size is an accident. It is a work essentially great. In these superbly brilliant sketches Agnes Clerke's style is at its best. Usually, it suffers from effort; the lucidity may be laboured, and the perpetual antithesis may sometimes be wearying. I have spoken of her laboriousness in study and in work, and can adorn the tale by relating what was surely a very remarkable performance. She had at the time no knowledge of Portuguese, but as part of her preparation for an article in the *Edinburgh Review* "Don Sebastian and his Personators," in six weeks she not only acquired considerable knowledge of the language, but read the whole of the *Lusiad* in the original!

Le Style, c'est l'homme; is it surprising that the physical efforts she made I fear only too often, tended to render her writing laboured at times?

But the writing in *Modern Cosmogonies*, good as it is, is a small matter compared with the masterly grasp of, I may say, all things, and of their inter-relations, which the work reveals. And where else is shown in recent philosophical writing such vision and faculty divine for seizing and pointing out the reasonable spiritual clues, set in what we call Nature,—clues helping to sustainment of soul in the midst of the majestic mysteries surrounding us?

No sketch of Agnes Clerke would be complete without reference to her love of music. To her music was in the highest sense of the term a recreation.

She turned to it for very life. Her piano-playing was truly musicianly, and her repertory was large. Perhaps on the whole, her playing was at its best in rendering Chopin. As an accompanist she excelled. Her teachers were,—in Dublin, Miss Flynn; in Florence, Buonamici.

I record here the complete story of her introduction to Liszt. One moonlight night in the spring of either 1868 or 1869, Mrs. Clerke and her daughters rambling about Rome were fascinated by such piano-playing as they had never before heard, and they stopped outside the open window of the villa and listened spellbound until the unknown Maestro had finished and came to the window to look out upon the night. Then the enthusiasm of the hearers overcame conventionality, and they gave free expression to their admiration; and the fifth act of the little drama was that Liszt invited his listeners to enter, promising to play again on condition that Agnes first played for him, which I believe she did.

Remarkable as were the intellectual powers of Agnes Clerke, her moral endowments were equally so. It was a question we frequently debated—the influence of character on work; and as I write the memory of certain talks is hauntingly present. As is the heart, is the work. The best work is and must be associated with lofty character. It was so with Agnes Clerke. No purer, loftier, and yet sweetly unselfish and human soul has lived. She was so incapable of meanness that she even incurred danger as a historian in crediting too readily all workers with her own high ideals.

As a friend and companion she was faithful and true, and full of charm; and without her the world to those who had her friendship seems darkened and empty.

But her mission, I must believe, was accomplished. For twenty years she had been to modern Astronomy an admirable historian, and had kept before working astronomers clear charts, so to speak, of what was being done, and of what should and might be done. In so doing she rendered splendid service, and inaugurated a kind of work which must be more and more needed—a kind of work which not only advances Astronomy, but promotes a universal brotherhood and co-operation, golden indeed.

Agnes Clerke's death comes as a shock to many. A cold—I fear not sufficiently nursed at first—led to pneumonia and complications, and in spite of all that devoted love and skill could do, she passed gently to the

next life, peaceful and fully conscious almost to the last, on the morning of January 20, 1907.

Note.—The portrait is from a photograph taken by Mendelssohn in 1895.

ELLEN MARY CLERKE.

ELLEN MARY CLERKE

ELLEN MARY CLERKE, the only sister of Agnes Clerke, whose interest in Astronomy was also keen, was born at Skibbereen on September 26, 1840. She shared her sister's life, and her devotion to her contributed not a little to the perfect fulfilment of its mission.

Acutely sensitive to the beautiful, and with a rare capacity for enthusiasms, Ellen Clerke was first of all a poet. But she was much besides. She was an accomplished linguist; and the years she spent in Italy were devoted to such study of Italian literature as enabled her later to do excellent original work in connection with it. An admirable article by her in the *Dublin Review* for October 1879, on "The Age of Dante in the Florentine Chronicles," well deserves remembrance, so full is it of the illumination of wide reading and of careful thinking. Alas! only too many articles by her have passed into magazine oblivion. Some of these were written in foreign tongues—a sure proof of mastery of them. For instance, in 1869 she published a pamphlet in German with the title *Das Judenthum in der Musik*; while, besides many articles and reviews in Italian in the Florentine periodicals, she published in one of these a serial story in Italian, called *Sotto le Sette Stelle*. She had also a knowledge of Arabic by no means inconsiderable.

Her interest in geographical science was not generally known; but she was a valued member of the Manchester Geographical Society, and contributed to its Journal.

As regards Astronomy, she has left useful evidence of her warm interest in the subject in two excellent popular monographs, and in various articles.

A list of Ellen Clerke's works is given at the end of this sketch, but special mention must be made of her work as a journalist. Her friends might regret—as I did for one—that so much of her time was thus spent; but, after all, journalism is what the journalist makes it; and it cannot be denied that it is a great and increasing power in our midst.

Assuredly Ellen Clerke always used her opportunities as a journalist for noble ends. For the last twenty years of her life she wrote a weekly leader

for the *Tablet*,—usually on subjects connected with the Church abroad; and on several occasions during the temporary absence of the Editor she filled his place at his request.

Many of her literary articles contributed to various periodicals were critical, and that she was a generous and encouraging as well as a capable critic the following facts pleasingly illustrate.

In the *Westminster Review* for October 1878 she had an article on “The later Novels of Berthold Auerbach.” It met the eye of the novelist, and he directed to be sent to her a copy of his *Landolin von Reutershöfen*, inscribed: “To the Author of the article in the *Westminster Review*, October 1878, with kind regards of Berthold Auerbach. Berlin, Nov. 14, 1878.”

It is singular that the poems of Ellen Clerke, published in 1881, should not have attracted more attention. The volume is now, I believe, almost, if not entirely, out of print; and partly on this account, partly because of its subject and of its beauty, I give here one of the poems.

NIGHT’S SOLILOQUY

Who calls me dark? for do I not display
Wonders that else man's eye would never see?
Waste in the blank and blinding glare of Day,
The heavens bud forth their glories but to me.

Is it not mine to pile their crystal cup,
Drain'd by the thirsty sun and void by day,
Brimful of living gems, profuse heap'd up,
The bounteous largesse of my royal way?

Mine to call o'er at dusk the roll of heav'n,
Array its glittering files in order due?
To beckon forth the lurking star of Even,
And bid the constellations start to view?

The wandering planets to their paths recall,
And summon to the muster tenant spheres,
Till thronging to my standard one and all,
They crowd the zenith in unfathom'd tiers?

Do *I* not lure stray sunbeams from the day,
To hurl them broadcast as wing'd meteors forth?
Strew sheaves of fiery arrows on my way,
And blazon my dark spaces in the north?

Is not a crown of lightnings mine to wear,
When polar flames suffuse my skies with splendour?
And mine the homage with the sun to share,
His vagrant vassals rush through space to render?

Who calls me secret? are not hidden things,
Reveal'd to science when with piercing sight
She looks beneath the shadow of my wings,
To fathom space and sound the infinite?

In plasmic light do I not bid her trace
Germs from creation's dawn maturing slow?
And in each filmy chaos drown'd in space

And in each tiny chaos grown a space
See suns and systems yet in embryo?

Miss Clerke specially enjoyed romantic subjects; and the sea and shipping appealed to her strongly. Her ballad on *The Flying Dutchman* legend is one of the finest treatments of the subject I have met with, and it is to be regretted that it is not better known, for it would lend itself well both to the reciter and to the musician.

The volume of poems gave evidence of a special gift which in later years the author cultivated with great success,—that of verse translation. Her delightful and valuable book, *Fable and Song in Italy*, is illustrated throughout with her own versions; and although I do not pretend to have compared each version with its original, I venture to say that the translations are, as a whole, wonderfully faithful, and that when the number of them, and the variety of subjects and of measures, are considered, the verse part alone of the work is a notable achievement. The prose part is more than a mere setting; it is full of touches of illuminating thought, and many little-known facts are brought together suggestively, while many of the descriptive passages are wonderfully vivid. In Dr. Garnett's *History of Italian Literature* the English versions selected by him from Boiardo and some other poets were by Ellen Clerke.

Ellen Clerke's literary style was lighter and more spontaneous than her sister's.

Like her sister she was highly musical, and her instrument was the guitar. A pupil of Madame Pratten, she had through the practice of many years acquired a mastery of the instrument unusual in an amateur, managing it with great skill, and arranging for it many an accompaniment. To the last almost, her singing to the guitar was full of charm; and in earlier years when the sisters sang together to her guitar accompaniment the performance was delightful.

A devoted and exemplary Catholic, Ellen Clerke was untiring in her zeal for all good works. Unselfish and loving, she was a devoted daughter, sister, and friend. Fonder of society than her sister, it was perhaps natural that she did not pursue literary work in the same persistent way. And it fell in with her sociability that she pulled a good oar and enjoyed riding.

These sisters were lovely and pleasant in their lives, and in death they were but little divided. Ellen Clerke died after a short illness on March 2, 1906.

A LIST OF THE WORKS OF ELLEN CLERKE

Poems: *The Flying Dutchman and Other Poems*. (1881.)

Versified translations of Italian poetry in Dr. Garnett's *History of Italian Literature*. (1898.)

Fable and Song in Italy. (1899.)

Flowers of Fire: a novel which gives an admirable account of the phenomena of an eruption of Vesuvius. (1902.)

An immense number of magazine articles, including a weekly leader contributed for twenty years to the *Tablet*.

Monograph on *Jupiter and his System*. (1892.)

Monograph on *Venus*. (1893.)

An article in the *Observatory*, vol. xv. p. 271.

The monographs on Jupiter and on Venus, although unpretentious, are based upon careful reading of the best authorities, and are written in a way which places them above the ordinary popularisers.

The article above referred to in the *Observatory* was the outcome of her Arabic reading, and showed that there can be little doubt that the variability of Algol had been noticed by the Arabian astronomers.

Note.—The portrait is from a photograph taken not long before death.

Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the

collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with

this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official

version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, “Information about donations to the Project Gutenberg Literary Archive Foundation.”
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.

- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES

EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a)

distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact

links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
