*** START OF THE PROJECT GUTENBERG EBOOK CRISIS! ***

CRISIS!

By CECIL CORWIN

**When the Diplomacy Bureau at home is composed
of hopeless incompetents, the Venusians are
rattling the sabre, and it looks as if an utterly
senseless war is going to result, a little
screwball stuff can be forgiven—if it works!**

**[Transcriber's Note: This etext was produced from

If the Karfiness hadn't cut herself badly while she was trimming her chelae one morning the whole mess might never have happened. But fashion decreed that the ropy circle of tentacles about the neck of the female Martian would be worn short that year, and everybody in the Matriarchy, from Girl Guide to the Serene Karfiness herself, obeyed without question.

That was why her temper was short that morning, and why she snapped at the Venusian Plenipotentiary who had come to chat with her concerning the space-mining rights for the following year. The worthy lady glowered at the gentleman from Venus and whistled: "By the Almighty, if you fish-faced

baboons so much as try to lay a flipper on a single free electron between here and Venus I'll blow your water-logged planet out of space!" And, unfortunately for the Venusians, she had the navy to do it with.

The principles of compensation operated almost immediately; the Plenipotentiary ethered back to Venus, and Venus severed diplomatic relations with Earth. Should you fail to grasp the train of events, stop worrying. Those are the facts; the Karfiness cut herself and Venus made warlike noises at Earth.

Earth was in a very peculiar situation. Only a century ago it had begun really intensive spacing, with freight-exchanges and mining. Venus and Mars and, in a smaller way, the Jovians, had been a space-culture for millennia. Earth did not have the elaborate machineries of Foreign Offices and Consulates, Embassies and Delegates and Envoys that the other planets maintained. Terra had gone into the complicated mess of astropolitics with her eyes serenely closed and the naive conviction that right would prevail.

To the cloistered Bureau of Protocol in Alaska came a message under diplomatic seal from the Ambassador to Venus, right into the office of Code Clerk Weems.

Carefully he scanned the tape and lead that closed the pouch. "At it again," he said finally. "I sometimes wonder if the whole thing wouldn't go smash if we read our own mail before every other Great Power in space."

Dr. Helen Carewe, his highly privileged assistant, opened the pouch with a paper knife and a shrug. "Take it easy, career man," she advised. "Your daddy had the same trouble before they promoted him to Washington State. We get all the dirty work here in Nome—have to explain how and when and why the inviolable mail-sacks arrive opened and read." She scanned the messages heavily typed on official paper. "What," she asked, "does 'Aristotle' mean?"

"Inexcusable outrages on the dignity of a representative of Terra," said Weems after consulting the code book. "Sounds bad."

"It is. Oh, but it *is*! They took Ambassador Malcolm and painted him bright blue, then drove him naked through the streets of Venusport."

"Whew!" whistled Weems. "That's an 'Aristotle' if I ever heard one! What do we do now?" He was already reaching for the phone.

"Cut that out!" snapped Dr. Carewe. She could speak to him like that—or even more firmly—because she was more than old enough to be his mother. The number of career men she had coached through the Alaska Receiving Station would fill half the consulates in space—and with damned good men. Brow wrinkled, she brooded aloud, "While this isn't definitely spy stuff we ought to know whether they have a line on our phones. Don't get Washington; try Intelligence in Wyoming."

Meekly Weems rang the Central Intelligence Division. After a hasty conversation he turned to Dr. Carewe: "They say that we're being tapped—probably by Martians. What do I do?"

"Thank the man nicely and hang up." Weems obliged.

"Now," said Dr. Carewe, "the sooner Washington hears of this, the better. And if the Martians hear of this later, *much* better. What we have to avoid is the Martians being able to let the Venusians know with any degree of credibility that Earth is very, very angry about the Aristotle. Because that will get Venus very angry and virtuous. Which will get Earth very dignified and offensive; snotty, I might even say."

"I notice," commented Weems, "that Mars is practically out of the picture. Except as a silent purveyor of fighting ships to both sides, is it?"

"It is. You learn quickly and cleanly. We'll have to go to Washington ourselves with the pouch."

"And report," said Weems, "to—oh, my God!—Osgood!"

"Exactly," said she. "Oh,-my-God Osgood."

And there was good and sufficient reason for the alarm in her voice.

In the chaste marble structure that housed the diminutive Foreign Office that Terra thought it sufficient to maintain there were to be found persons who would be kicked out of any other department of the government in two seconds flat. But because astropolitics was something new to Earth and because there had to be some place made for the half-witted offspring of the great legislative families this chaste marble structure housed a gallery of sub-normals that made Bellevue look like the Princeton Institute for Advanced Research on a sunny day. Or so the junior members thought. Not the least of these half-witted great ones was Jowett Osgood, the direct superior of Weems, to whom he would naturally report.

Weems and Carewe were announced with a strange pomp and circumstance; they entered the big office to find Osgood rudely buried in what was supposed to look like work. Weems stood dumbly as Dr. Carewe coughed sharply.

"Ah!" grunted Osgood, looking up. "What is it?" He was a gross man.

"A pouch from Venus. We decoded it and we think it deserves your immediate attention. We didn't phone the contents because of tappers on the wires." Weems handed over the decodings, marked very prominently in red: CONFIDENTIAL—MAKE NO COPIES.

Osgood scanned them and heaved himself to his feet. "Gad!" he grunted. "We must brook no delay—arm to the teeth!" He turned on his dictaphone. "Henry!" he snorted. "Listen to this! To Bureau of Protocol—" Dr. Carewe snapped off the dictaphone and shoved him back into his well-padded chair.

"This," she said between her teeth, "is entirely up to you. Take it from us, immediate action is demanded to smooth over this incident. You won't be able to pass the buck onto some other department; this is right in your lap. And you won't be able to delay the affair until you've forgotten it; even you can see that. Now *what are you going to do?*"

Osgood considered the matter with great dignity for two full minutes. Finally he announced: "I don't know."

"My suggestion is that you appoint Mr. Weems here a sort of goodwill ambassador for special, but very vague, work. And give him an unlimited expense account. This thing mustn't get any further. Keep it between us three that the message arrived officially on Earth. The fiction will be that it

was lost in space and that nobody has received official confirmation of the Aristotle. Any unofficial reports will be considered as sensational tales concocted by newscasters. That's the only way to keep Earth off the spot. And what a spot it is!"

"I see," said Osgood. "Be advised that I shall follow your suggestions—as closely as is compatible with the dignity of this Office."

Outside she informed Weems: "That last was face-saving and nothing else. From here we go to Venus—spreading sweetness and light. Always remember, young man, that our interceptor rockets are pretty good, but that the Venus bombers are pretty *damned* good."

"War," mused Weems. "Nobody wins, really—it wouldn't be nice to see New York blown to pieces, even though we could do exactly the same to Venusport. Sweetness and light it is."

Venus politics are no joke. The fish-faced little people have at least two parties per acre and the dizziest system of alliances and super-alliances that ever bewildered a struggling young diplomat. Typically there were absolutely no points of agreement among any of the parties as to foreign policy, and yet the Venusian Embassies spoke with authority that was backed up by a united planet. Their military forces were likewise held in common by all the countries, but there were "state militias" engaged in intramural activities and constant border-fighting.

Weems knew the language, and that was one very great advantage; also he spent the long rocket trip to the foggy planet in learning what he could of the political set-up. He arrived with a fanfare of trumpets; at the pier he was greeted by a score of minor officials. It was a deliberate insult from the Venusian army, for not a single high-ranking officer was present. He glossed it over for the sake of a splendid ovation from the populace of Venusport, who were thoroughly hopped up with esteem for him. He was the shining young man who would assure peace and prosperity for the two inner planets, and the populace was all for him.

But, he knew very well, if one nasty word came from Earth, officially recognizing the Aristotle, their mood would change suddenly and savagely. And that was what he had to be ready for. He didn't trust the fat-headed Osgood.

From city to city he made a grand tour, speaking with very little accent before huge audiences of the little people and meeting few really high-up officials. Everywhere he went he met with disapproval from the public officers.

"How," he complained to Dr. Carewe, "they get together on a complicated issue like disliking me, I don't understand."

With a grim look about the hotel room she explained: "It's the army. They must be partly in the pay of Mars. You're the finest thing that's happened in the way of friendly relations between Earth and Venus. If you take root long enough to get your message over they won't be able to pounce on Earth, to the benefit of nobody except the red planet. So they're trying to cool things off." Again the nervous glance around the room.

"What's that for?"

"Dictaphones. But I don't think there are any. So at the risk of getting mushy I'm going to tell you just what I think of your job. I think you're working like a madman, with some of the finest, single-hearted devotion to the cause of peace that I've ever seen. If you keep this up and handle the rest of your life the way you're handling this part you won't be immortal—not the way Osgood is going to be—with a bust in the rotunda of the Capitol and a chapter in the history books.

"No, you're going to be something different. There are going to be Venusians—and Martians and Earthmen—who'll talk about you many, many years from now. About how their fathers and grandfathers stood in the rain to hear you talk." She looked over her spectacles. "Which reminds me—get out on that balcony and don't make any slips."

He pressed the very old, very great lady's hand silently, then, mopping his brow, stepped out to the ledge beyond his window. It was in the twilight zone of perpetual rain, and the crowd of white pates and faces before him was hardly visible through the wisps of steam. He looked about uneasily as he turned on the fog-piercing lights that flooded him with a golden glow, so

that the Venusians could see their superman. As he began to speak into the mike at his lips there was a hoot of reproof from the crowd. And then there were others. Something was going the rounds; he could feel it.

Very distinctly there was a shrill cry from the sea of faces: "*Liar!*" And others echoed it, again and again. He tried to speak, but was howled down. A firm hand snapped off the lights and closed the window; Dr. Carewe dropped him into a chair, limp and shocked. She handed him a slip of paper that had just been delivered.

With her lips tightly compressed she said: "They knew before we did. Osgood spilled it—all."

They shot to Mars before assassins could take any tries at them. Weems was completely washed up and discredited on Venus; knew it and felt like it. What had his fine words been in the face of a stern, righteous declaration from the Foreign Office on Earth to the Foreign Office on Venus—gleefully published far and wide by the Mars-bribed officers in the latter—hurling the most frightful accusations of violating diplomatic immunity?

God only knew, brooded Weems, why Osgood had chosen precisely that moment to sound off. He had said fighting words, too—"back up our determination to shield the weak with deeds as well as—" Ugh! What was the matter with Osgood? The Martians couldn't touch Earth's Foreign Office; they bred them dumb but honest there. Why had Osgood—? Did he want to be an Iron Man? Did he think he could get further faster in time of war? Or did he actually, honestly believe that by this half-witted note insulting a friendly planet on account of a mere violation of etiquette he was striking a blow for justice and equality?

It probably was just that, Weems decided. And Dr. Carewe agreed.

When they landed on the red planet Weems felt very low, and was scarcely given a new lease on life by the warm reception he received from Martian notables. He was welcomed Earth fashion, with a band and speeches from a platform to twenty thousand cheering Martians. They could afford to treat

him kindly; he'd failed utterly and miserably from blocking a new, magnificent source of income to Mars—the on-rushing Earth-Venus war.

Mars wouldn't get into it. Oh, no! Mars didn't need colonies or prestige. When you have a navy like the Martian Matriarchal Fleet you don't need colonies or prestige. You just sit tight and sell the scrappers your second-rate equipment at premium prices.

At his first official reception he stood nervously among the ladies of the court. He had just received news from the Earth diplomatic colony that Venus had replied to Earth with a note just as stiff, charging that Earth was impeaching the authority of the Venusian Foreign Office with respect to its planetary jurisdiction. In plain language that meant: "Our army is bigger and better than yours. Knock this chip off—if you dare!"

One of the elegant ladies of the Matriarchal court sidled up to him. "We were presented to each other when you landed," she said in French.

"Of course," he said delightedly. "I remember you perfectly!" But all Martians still looked alike to him.

"I was wondering, Mr. Weems, whether you would care to attend a party I'm giving tomorrow evening. I feel there would be features extremely entertaining to you."

"Delighted, Madame!" He beckoned over Dr. Carewe.

"Your social secretary?" asked the Martian lady. "I'll give her the details."

Then the Karfiness entered regally and all the ladies of the court twiddled their curtailed chelae with deep veneration as she folded up in a basket-like affair.

"Mr. Weems," she said graciously. He advanced and bowed, Earth fashion, for all of his encumbering furs. "Mr. Weems, we are delighted to see you here. Such a refreshing change from those slimy little Venusians!" Her English was perfect, though lispy.

"And I, Madame, am delighted to attend. If there is any message I can take back to Earth from you—any word of friendship, you have only to say it."

She regarded him amiably. "The people of Earth know well that the people of Mars are wholly committed to a policy of amicable industrial

cooperation. Nothing will please me more than to reassure my friends of the third planet that there is no end of this policy in sight."

What did that mean? wondered Weems. Was she playing with him?

"I trust," he said, "that you are wholeheartedly working in the interests of peace among the planets?"

"So I have said," she replied simply. "So I shall always say."

Incredible! Did she take him for an imbecile? Or—or—?

"Thank you for this kind assurance," he said, bowing again and retiring.

When he had cornered Dr. Carewe he said agitatedly: "I don't get it at all. I simply don't understand. Is she lying into my teeth? The least she could have done would have been to turn aside the questions. I never dreamed I'd get an answer at a time like this!"

"Neither did I," she said slowly. "Something is rotten in the Matriarchy, and it isn't the customary scent of senile decay peculiar to dictatorships. The biology of the Martians demands a dictatorship, what with their weird reproductive methods. Unless there were a strong and centralized authority they'd slump back into barbarism after a few thousand years of unrestricted matings. Here's one dictator who's loved by the dictatees."

She was silent a moment, then said: "To change the subject, I have the place and time for tomorrow's party. The lady is—I knew you couldn't tell one from another—director of a munitions and fabrication syndicate."

"Thanks," he said vaguely, taking the memo. "That's the perfect spot of irony to top off the evening—in fact this whole damned mission that failed."

He went to the party with Dr. Carewe, both thoroughly wrapped up in fur and wool against the Martian ten-below temperature. And they carried thermos flasks full of hot coffee for an occasional warming nip in a dark corner. Anything but that would be unmannerly.

His hostess presented Weems to her husband-brother-nephew, an example of the ungodly family relationships into which their anatomy naturally led. The creature was very much smaller than the female, and spoke only Martian, which the Earthman could not handle except sparingly. He got the idea that they were talking about auriferous sand, but how they got onto the subject he did not understand. He excused himself as quickly as he could and retreated for some of the steaming coffee.

"Earthman, of course!" said a hearty voice.

He turned to see a curious, stubby person, quite human in his appearance, but with a somehow distorted look—as though he had been squeezed in a hydraulic press. And the person wore elaborately ornamental trappings of a blackish-silver metal.

"You must be a Jovian," he said, corking the thermos. "I've never seen one of your people before. You're more—ah—human than these others."

"So they say. And you're the first Earthman I've ever seen. You're very—ah—*long*." They both laughed; then the Jovian introduced himself as a pilot on the regular Io-Mars freighters. He waved off Weems' introduction. "Don't bother, Weems," he said. "I know of you."

"Indeed?" There was a pause. With the diplomatic instinct to avoid embarrassment whenever possible, the Earthman asked: "Why don't your people appear more often on Earth? You could chuck some of that osmium you have to wear here on Mars."

"This?" The Jovian gestured at his trappings. "A mere drop in the bucket. I have a hundredweight in each shoe. But the reason is that Earth is relatively undeveloped in its space-culture—though, of course, much better developed than Jupiter. There are so few of us ... fifty millions on the whole planet." He shrugged whimsically. "We're growing, of course. There was a polygamy decree a few years ago—did you hear of it?"

"No—I'm sorry to say I know nothing at all about your planet. I'm in the diplomatic service. Studying Venus, mostly."

"So? Perhaps you are the wrong man to come to, then. We know nothing about these matters. Is there a person more appropriate to whom I ought to broach the idea of a rapprochement between our two worlds?"

Weems was rocked back on his heels. Unheard of! Diplomacy as casual as this was tantamount to an interplanetary incident. The Jovian continued casually as before: "You see, we've no navy and don't need space-rights. It's strictly commercial, so we haven't got any Foreign Office. We hardly trade at all with Venus and Earth, and our Mars relations are settled by treaty once every four of the Mars years."

"Excuse me," said Weems abruptly. He had just caught a high-sign from Dr. Carewe, who was holding a flimsy like a dead rat. He sidled over to her inconspicuously.

"Well—what turned up?"

"The chip," she said breathlessly, "has been knocked off. I just got this from our Embassy—messenger. It's a copy of the note the Earth F. O. just sent to Venus. The Earth F. O. assures Venus that not only does Earth impeach the Venus F. O. but that she is prepared to put its jurisdiction to trial." She handed him the flimsy.

He scanned it almost unbelievably. "The so-and-so's," he commented inaudibly. "That about fixes our little red wagon, doc. Though we have an ally. Jupiter wants its place in the sun."

As the woman stared with amazement he introduced the Jovian to her and explained the situation. The squat man listened with increasing anxiety as he dilated on the relations that would exist between the two worlds.

"Will we really," he asked at length, "need all those men—actually twenty-five on our end!—to handle a little thing like a military alliance?"

"Lord, yes!" breathed Weems. "Code clerks, secretaries, sub-secretaries, second-sub-secretaries—lots more."

"May I ask," said the woman, "why this sudden interest in protocol and procedure has come up on Jupiter?"

The Jovian looked a little embarrassed. "It's a matter of pride," he explained. "The three other planets have their own secret codes and messages. We're the only planet that hasn't got sealed diplomatic pouches

absolutely inviolable in any jurisdiction! And so our Executive Committee decided that if it's good enough for them it's good enough for us."

"I see," said Weems thoughtfully. "But how is it that you, the A pilot on a freighter, are their Plenipotentiary without even identification?"

"As a matter of fact," confessed the Jovian with some hesitation, "I was given a note, but it seems to be lost. Do things like that really matter?"

"They do," said Weems solemnly. "But you were saying—?"

"Yes. They chose a freight pilot to avoid taking a man off real work. It's our principle of the Economization of Kinesis. Without its operation we'd have all sorts of superfluous men who did only half a man's work. And do not forget that to a people of only fifty millions that is no small matter. We need every man all the time."

"As to the treaty necessary," said the woman, "would you prefer it to be secret or published?"

"Secret," promptly replied the Jovian. "It'll be more fun that way."

Up dashed a very young sub-attache from the Earth Embassy. "Excuse me," he shrilled, his voice breaking. "But you have to come at once. It's important as—as the very devil, sir, if you will excuse—" He found himself addressing empty air and an amused Jovian. The two Earthpeople had flown to their sand car. They had been waiting for the summons.

The Ambassador was waiting for them, grim and white. He was no fool, this Ambassador; his punishment for that was the dusty job on Mars instead of an office on Terra. He had just removed the ear-phone clamps, they saw; the diplomatic receiver set was on his desk.

Without waiting for a question from them he said: "The good word is—*ultimatum*."

"God!" said Dr. Carewe, her old face quite white.

"When?" snapped Weems, taking out pencil and paper.

"Note delivered to Venus F. O.—that's the note from Earth—and ten minutes or so later lynching of Venusians on the staff of the Earth Embassy by an outraged populace. Foolish defense by Earthmen attached to the Embassy. Several of them killed. Stronger note from Earth. Why didn't Venus F. O. notify immediately and offer indemnities? *Very* strong reply from Venus F. O.—chip on the shoulder. Earth knocks off chip. That's the last you saw at your party. Then ultimatum from Venus giving Earth twelve *dicenes* to apologize profoundly and offer an indemnity in good faith."

"And when is the time up?"

"The twelve *dicenes* will come to an end—" the Ambassador consulted his watch "—about forty-eight hours from now."

There was a long pause, broken at last by a muffled groan from the Ambassador. "Damn it—oh, damn it!" he wailed. "Why do the idiots have to fight? There's trade enough for everybody, isn't there?"

"And, of course," said Weems, "Earth will never back down. Not in a million years. They're built like that. And if they did back down Venus would be sure of herself and force a war."

"Well," said the woman quietly. "Are you just going to *sit* here?"

"Suggestions are in order," said the young man unhappily.

"You'll have to work like hell to stave this off," warned the woman.

"Ready and willing, doctor. Tell me what to do."

Considering that the art of diplomacy is, ultimately reduced, the system found most practical in actual use when stalling for time to rush ahead with military expansion, it is not very remarkable that the two roving delegates did what they did with such neatness. The machinery was there for them to use.

Use it they did, to the fullest extent. They shot ethers through to most of the crowned heads of the inner planet; radioed Earth confidentially meanwhile

to stand by for the answers from Venus; contacted the Martian Protocol Division regarding an alliance for trade purposes alone.

They were so thoroughly efficient in their functioning that after ten hours of this the bureau chiefs back on earth fell to their knees and prayed for a let-up of this lunatic barrage of red-tape that came, unasked and unanswerable, from a minor Embassy on Mars.

Venus was bally well baffled. At first they made some pretense of replying stiffly to the muted threats from the Embassy on Mars, then gave up and hung onto the ropes, trying to decode the weird messages. It *must* be code, they decided. How could a message like: "Advise your F. O. investigate frog-ponds for specious abnormalities" be anything but an uncrackable cipher? They set their experts to work. The experts decided that the message meant: "All Earthmen on Venus are advised to sabotage production machinery and destroy records." But they were wrong as they could be, for the message meant just what it said. Its value was on its face.

The consulate and the staff were drafted by the Embassy to aid in the good work of confusion; the Ambassador himself sat for ten hours writing out messages to be sent officially which bore absolutely no relation to each other or the world at large. And if you think that sounds easy—try it!

Meanwhile the inseparables, Mr. Weems and Dr. Carewe, had been separated. The woman was gathering data from the Martian libraries and Weems was paying social calls at the Palace, interviewing secretaries without number. Meanwhile, authentic, distressing news-releases kept rushing to him, causing him great pain. First thing after the ultimatum he heard was that Earth had called in all spacers except those related to navigation—fueling stations, etc. Venus retaliated in like, and furthermore towed out the gigantic battle-islands, used to fuel fighting ships. Earth retaliated in like, and furthermore began skirmishing war games around mid-way between Terra and Luna.

By the time the ten hours of lunatic messages were elapsed the two great fleets of Earth and Venus were face to face mid-way between the planets, waiting for orders from the home-planets to fire when ready.

"For the love of Heaven," he pleaded with a secretary to the Karfiness, "they won't even wait for the ultimatum to elapse. There's going to be a

space-war in two hours if I don't get to see her Serene Tentaculosity!" The title he bestowed on her was sheer whimsy; he wasn't half as upset as he was supposed to be. It was all for effect. He rushed away, distraught by the information that he couldn't possibly see the Karfiness and aware that the munitions interests of Mars would by now be rubbing their chelae with glee.

He reached a phone and rang up the Ambassador. "Okay," he informed him. "Stop short!" The Ambassador, badly overworked and upset, stopped short with the messages. Venus and Earth were baffled again, this time because there was nothing to be baffled by. The strange silence that had fallen on the F. O.'s was alarming in its implications. The diplomatic mind had already adjusted itself to the abnormal condition; restoration of normality created almost unbearable strain. Messages rushed to the Embassy; the Ambassador left them severely alone and went to bed. From that moment anybody who touched a transmitter would be held for treason, he informed his staff. It was as though the Mars Embassy had been blown out of the ground.

"They are now," brooded Weems, "ready for anything. Let us hope that Venus hasn't lost her common sense along with her temper."

With that he set himself to the hardest job of all—waiting. He got a couple of hours of sleep, on the edge of a volcano, not knowing whether the lined-up Venus fleet would fire on the opposite Earth fleet before he woke. If he did it would be all over before he really got started.

Even Weems hadn't imagined how well his plan was taking root. Back on Earth the whole F. O. had gone yellow, trembling at the gills lest they should actually have to fight. And it was perfectly obvious that they would, for when planetary integrity directs no mere individual might stand in the way.

There was a great dearth of news; there had been for the past few hours of the crisis. Since that God-awful business from the Mars Embassy stopped and the entire staff there had—presumably—been shot in the backs while hard at work fabricating incredible dispatches there was a mighty and sullen silence over the air, ether and sub-etheric channels of communication.

On Venus things were pretty bad too. A lot of Earthmen had been interned and the whole planet was sitting on edge waiting for something to happen. It did happen, with superb precision after exactly seven hours of silence and inactivity.

There was a frantic call from—Jupiter! *Jupiter claimed that the whole business was a feint and that the major part of the Earth fleet was even now descending on the Jovians to pillage and slay.*

The official broadcast—not a beam-dispatch—from Jupiter stated this. Earth promptly denied everything, in a stiff-necked communique.

Venus grinned out of the corner of its mouth. In an answering communique she stated that since Venus was invariably to be found on the side of the underdog the Venus Grand Fleet would depart immediately for Jupiter to engage the enemy of her good friends, the Jovians.

Earth, to demonstrate her good faith, withdrew her own fleet from anywhere near the neighborhood of Jupiter, going clear around to the other side of the Sun for maneuvers.

Lovers of peace drew great, relieved sighs. The face-to-face had been broken up. The ultimatum had been forgotten in Earth's righteous stand that she had *not* invaded Jupiter or intended to. This made Venus look and feel silly. This made the crisis collapse as though it had never been there at all.

And just after the Venus fleet had reported to its home F. O.—this was three hours after the ultimatum had elapsed without being noticed by anybody—there were several people in the Earth Embassy on Mars acting hilariously. There was a Jovian who gurgled over and over:

"I didn't know it would be this much fun! We would have got into the game years ago if we'd known."

"And I," said the Ambassador, "have the satisfaction of knowing that I've given a pretty headache to the best code experts in the system. And all by the simple expedient of sending a code message that means just what it says."

"And I," said Weems, upending a glass, "have aided the cause of peace between the planets. If I can get to the Karfiness and let her know that she's being played for a sucker by the munitions people—"

"Let it come later," said Dr. Carewe. "I wish I could live another eighty years to read in the history books. But it really doesn't matter, because they'll say something like this:

""Toward the end of this year there arose a crisis between Earth and Venus, seemingly over matters of trade. It actually reached a point of ultimatums and reprisals. Fortunately the brilliant, calm and efficient work of the Hon. Secretary of Recession, Jowett Osgood, saved the day. He contracted a defensive alliance with Jupiter, the combined might of the Earth-Jovian fleet crushing any idea of victory that may have been the goal of the Venusians.""

Dr. Carewe laughed loud and raucously as she refilled her glass.

*** END OF THE PROJECT GUTENBERG EBOOK CRISIS! ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
