The Author to the READER.

Courteous Reader,

I through Gods divine providence, have had at several times, great occasion to make use of Medicines for the health of my own body, as namely in the year 1642, for Cuts and Shots, where then I came acquainted, and into familiarity with Master George Dunne Chyrurgion, Master Leadbeater the Apothecary, Master Guye, Master Hicks, and Master Nicholas Culpepper, by whose familiarity I lost nothing, in the end of September 1663 our house was visited with the Plague, one died before we knew what it was, the family was five in number, I lay in the same bedding the deceased dyed out of, he dyed full of the marks, I had a Boyle in my Groyne that never brake, but went away by purging and vomiting, my fellow had one that brake, yet none dyed but the first, I helpt to Coffin about six persons, in one family at that time, yet by Gods providence am yet alive, in the year 1649, I had a long sickness from Midsummer till Chriftnas, of that miserable disease called the griping or plague of the Guts, which caused me to search all publick means for cure, and having spent what means I had upon Doctors like the woman that had the bloody Issue: And all gave me over for dead, I betook me to search for directions in books, and after the reading of many providence guided me to light upon the most excellent and approved Works of that famous Doctor named DON ALEXES, a man well skilled in the Latine Greek, Hebrew Chaldes and Arabick tongues, and of divers other Nations and Countreys, he being naturally inclined and took a singular pleasure in Phylosophy, and in the secrets of nature, he travelled seven and twenty years to gain knowledge, the five books were translated into English by Master William Ward and Master Richard Andrews and Dedicated unto the Right

*honourable Francis Lord Russell Earl of Bedford, but lest I should make my
Porch greater then my building, I do refer those that would be further
satisfied, unto those five books aforesaid, where they shall finde every one
inserted, I gathered them at first for my own perticular private use, but
confidering the scarcity of the books and altogether at an extraordinary
dear rate, I have for the publick benefit of all men exposed them to the care
of the Printer to serve for publick use.*

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.
