JULY 1913.

NOTE.

The Drawings of Old London, which form the subject of this Catalogue, were made by Mr. Philip Norman, LL.D., F.S.A., in almost every case from the actual buildings, many of which have since been demolished or essentially altered in appearance. They form, consequently, an important record of characteristic examples of Old London architecture, chiefly domestic; and, from this point of view, may be recommended to the attention of students. The collection was purchased for the Museum, in January 1896, on the recommendation of Professor W. Middleton and William Morris.

The thanks of the Board are due to Mr. Norman for his courtesy in providing the whole of the descriptions of the drawings; and also for revising the proofs of the present edition and lending the block of No. 6, "The Old Houses, White Hart Inn."

The drawings can be seen by visitors, in the Students' Room of the Department of Engraving, Illustration and Design (Room 71), at any time when the Museum is open, except on Sundays. The Department also contains other drawings and prints of a similar nature; and a Topographical Index referring thereto.

CECIL SMITH.

CATALOGUE OF DRAWINGS OF OLD LONDON. BY PHILIP NORMAN, LL.D., F.S.A.

The dimensions are in inches, the height being given first.

1. Old Elephant and Castle, Newington Butts (Sepia).

The famous tavern so named is situated about a mile south of London Bridge, at a place where several important roads meet. In the coaching days it was passed by every traveller going south-east from London, and it is now a well-known halting station for omnibuses and tramcars. A writer in a famous publication has asserted that this was the house referred to by Shakespeare, as follows:—

"In the South Suburbs, at the Elephant,
Is best to lodge."—Twelfth Night; Act iii., Sc. 3.

In fact, the Elephant and Castle at Newington Butts did not come into existence until long after Shakespeare's time. The ground on which it stands was not yet built upon in 1658, being then granted as a charitable donation to the poor of Newington parish. The grant was renewed and confirmed in 1673, when the structure here represented may already have come into existence, for we are told that building operations had then lately taken place. The sign may be derived from the crest of the Cutlers' Company. Close to the Elephant and Castle, during the construction of a new sewer in 1823, some piles, posts, and rings for barges were found imbedded in the soil. Hard by, in the early part of this century, that strange fanatic, Joanna Southcott, set up a meeting-house for her followers. Newington Butts was

so named from the exercise of archery at the butts, which was practised here by the parishioners in Tudor times. The inn was rebuilt in 1824. Of late there has been another rebuilding on the same site. The view is founded on an old drawing in the Gardner collection.

A house called the "Oliphant," previously the "Red Hart," is mentioned in the vestry proceedings of St. Saviour's parish, Southwark, in 1598, and an "Elephant Alley" near the Globe theatre comes to light in the St. Saviour's sacramental token book for 1600. Shakespeare may have had in his mind the building thus indicated, when he made the allusion quoted above.

**No. 6. OLD HOUSES. WHITE HART INN.
SOUTHWARK.**

Southwark being on the high road to the coast and to Canterbury, which contained the famous shrine of St. Thomas à Becket, was for centuries occupied by inns in number out of all proportion to ordinary shops and dwellings.

The Borough, according to a State Paper of 1619, "consists chiefly of inn-keepers." John Stow, in his Survey (1598), says, "from thence (the Marshalsea) towards London Bridge on the same side, be many fair inns for

the receipt of travellers; by these signs: the Spurre, Christopher, Bull, Queen's Head, Tabard, George, Hart, King's Head," etc. Of older date (about 1542) is a map of Southwark, to be found among the Duchy of Lancaster Records in the Record Office, which shows almost all the more important Southwark inns. They were grouped together chiefly on the east side of what is now called the Borough High Street, the most distant not being more than a quarter of a mile apart. These inns had a gateway from the street, which was closed at night. Passing through this gateway one entered a yard, round which ran the galleries where the guests were housed. Beyond this again there was a larger yard, which contained the stabling, and where there were often various tenements. This was approached by a passage from the outer yard, and generally there was also access to it from behind.

The White Hart was perhaps the largest Southwark inn, and appears to have dated from the latter part of the 14th century, the sign being the badge of Richard II., derived from his mother, Joan of Kent. In the summer of 1450 it was Jack Cade's headquarters whilst he was striving to gain possession of London. Hall, in his Chronicle, thus speaks of him:—"The capitayn being advertized of the kynge's absence came first into Southwarke, and there lodged at the White Hart, prohibiting to all men Murder, Rape, or Robbery; by which colour he allured to him the hartes of the common people." It must have been by his orders, if not in his presence, that "at the Whyt harte in Southwarke, one Hawaydyne of sent Martyns was beheaded," as we are told in the Chronicle of the Grey Friars. Here, too, Sir John Fastolfe's servant, Payne, was despoiled and threatened with death. Cade's success was of short duration: his followers wavered; he said, or might have said, in the words of Shakespeare (2 Henry VI., act iv., sc. 8), "Hath my sword therefore broke through London gates that you should leave me at the White Hart in Southwark?" The outbreak collapsed, and our inn is not heard of again for many years. In 1529 a message was sent to Thomas Cromwell, the notorious minister of Henry VIII., by some one asking for an interview at the White Hart. In 1669 the back of the inn was

burnt down; and on May 26, 1676, a most destructive fire occurred in Southwark, when according to the best authorities, no fewer than 500 houses were either burnt or blown up. The White Hart was quite destroyed, but was rebuilt shortly afterwards on the old foundations, at a cost of £2,400. In 1720 Strype describes it as "very large and of a considerable trade, being esteemed one of the best inns in Southwark," and it so continued until the early years of the 19th century. Charles Dickens, in the tenth chapter of *Pickwick*, has given us the following graphic description of the house when something of its old prosperity still clung to it:—

"In the Borough especially, there still remain some half dozen old inns, which have preserved their external features unchanged and which have escaped alike the rage for public improvement and the encroachment of private speculation. Great, rambling, queer old places they are, with galleries, and passages, and staircases, wide enough and antiquated enough to furnish material for a hundred ghost stories. It was in the yard of one of these inns—of no less celebrated a one than the White Hart—that a man was busily employed in brushing the dirt off a pair of boots, early on the morning succeeding the events narrated in the last chapter. The yard presented none of that bustle and activity which are the usual characteristics of a large coach inn. Three or four lumbering wagons, each with a pile of goods beneath its ample canopy, about the height of the second floor window of an ordinary house, were stowed away beneath a lofty roof, which extended over one end of the yard; and another, which was probably to commence its journey that morning, was drawn out into the open space. A double tier of bedroom galleries, with old clumsy balustrades, ran round two sides of the straggling area, and a double row of bells to correspond, sheltered from the weather by a little sloping roof, hung over the door leading to the bar and coffee-room. Two or three gigs and chaise-carts were wheeled up under different little sheds and penthouses; and the occasional heavy tread of a cart-horse, or rattling of a chain at the further end of the yard, announced to anybody who cared about the matter, that the stable lay in that direction. When we add that a few boys in smock frocks were lying

asleep on heavy packages, woolpacks, and other articles that were scattered about on heaps of straw, we have described as fully as need be, the general appearance of the yard of the White Hart Inn, High Street, Borough, on the particular morning in question."

In 1865-66 the south side of the building was replaced by a modern tavern, which appears to the right of drawing No. 2. Some years previously the yard had been disfigured by a penthouse or lean-to (also shown in this drawing), which was used for the business of a bacon dryer. The old galleries on the north and east sides were let out in tenements. In the inner yard were some quaint old houses crowded with lodgers (*vide* No. 6). From here, looking back, one often saw the smoke of the bacon curer's furnaces curling out of the windows of the main building (as shown in drawing No. 3). The remains of the old White Hart were pulled down in July 1889, and hop factors' rooms built on the site, the yard being very much curtailed. The modern tavern on the south side was closed some time ago. It is now used for the storage of goods. The only trace of its former associations (October 1912) is a painted board, still to be seen through one of the windows, with the following words painted on it:—THE SAM WELLER (Social) CLUB.

$$(14\frac{1}{8} \times 10\frac{1}{8})$$

D. 10-1896.

7. The Tabard Inn, Southwark, 1810 (Water-colour).

The Tabard is perhaps the most famous of all Southwark inns, owing to the fact that Chaucer has selected it as the starting point for his Canterbury Pilgrims:—

"Byfel that in that sesoun on a day,
In Southwark at the Tabard as I lay."

He even mentions the name of the jovial landlord, Henry Bailly, a real personage, who represented Southwark in the Parliament held at Westminster, A.D. 1376.

It is recorded that in 1304 the Abbot and Convent of Hyde purchased here from William de Lategareshall two houses, held of the Archbishop of Canterbury. On this site the abbot built himself a town dwelling, and at the same time probably a hostelry for the convenience of travellers. In 1307 he obtained licence from the Bishop of Winchester to build a chapel at or by the inn. In a later deed occur the following words: "The Abbott's lodgeinge was wyninge to the backside of the inn called the Tabarde and had a garden attached." Stow, in his Survey, puts the matter clearly when he says, "Within this inn was also the lodging of the Abbot of Hide (by the City of Winchester) a fair house for him and his train, when he came to that city to parliament." A lease of the Tabard dated 1st April, 31 Henry VIII., has been found by Mr. G. Rutter Fletcher, F.S.A., and was printed, with notes by the present writer, in the "Collections" of the Surrey Archæological Society, 1896, Vol. XIII. Its chief interest lies in the enumeration of the rooms and their fixtures, given in the schedule, which may not unlikely represent the house much as it was in Chaucer's time. At the dissolution this inn, with other possessions of Abbot Salcote or Capon, was surrendered, and granted by the king to Thomas and John Master. The sign of the Tabard (or sleeveless coat, like that worn by heralds), sometimes the Syrcote, was used till about the end of the sixteenth century, when it was little by little changed to Talbot, perhaps through fancy or carelessness. Aubrey says, "the ignorant landlord or tenant, instead of the ancient sign of 'The Tabard,' put up 'The Talbot,' a species of dog." Be this as it may, in certain Chancery proceedings of 27th June 1599, both names are used. About this time there were large additions to the building. We are told by Speght in his second edition of Chaucer (1602) that:—"Whereas through time it has been much decaied, it is now by Master J. Preston, with the Abbot's house thereto adjoined, newly repaired, and with convenient rooms much increased for the receipt of many guests." In 1676 occurred the great Southwark fire, when "the Talbot, with its backhouses and stables, &c., was burnt to the ground." It was, however, rebuilt on the old plan, as depicted in drawing No. 7, and continued to be a picturesque and interesting example of seventeenth century architecture until 1875-76, when the whole was swept

away. Hop merchants' offices and a modern "Old Tabard" occupy the site. Here Roman objects were found in 1912. This drawing was copied from one by George Shepherd (1810) which is in private hands. It formerly belonged to the late Mr. R. P. Evans, hop merchant, who occupied rooms in the George Inn Yard.

9. Interior of Taproom, George Inn, 1886 (Black and white).

The George Inn, or what is left of it, stands between the sites of the Tabard and the White Hart. It seems to have come into existence in the early part of the sixteenth century, and is mentioned by the name of "St. George" in 1554;

"St. George that swinged the Dragon,
And sits on horseback at mine hostess' door."

The owner in 1558 was Humfrey Colet or Collet, who had been member of Parliament for Southwark. In 1634 a return was made that the inn had been built of brick and timber (no doubt rebuilt) in 1622. Soon after the middle of that century, in a book called *Musarum Deliciæ* or the Muses' Recreation, compiled by Sir John Mennes (admiral and chief comptroller of the navy), and Dr. James Smith, appeared some lines "upon a surfeit caught by drinking bad sack at the George Tavern in Southwark." Perhaps the landlord mended his ways; in any case the rent was shortly afterwards £150 a year, a large sum for those days. Two seventeenth-century trade tokens of the house exist; an illustration of one is given, which reads thus:—

O.—ANTHONY BLAKE. TAPSTER. Y^E. GEORGE. INN. SOUTHWARKE

R.—(No legend.) Three tobacco-pipes and four pots.

In 1670, Mark Wayland and Mary his wife, held the George at a rent of £150 a year. It was then partly burnt down, and Wayland rebuilt it. In consequence, his rent was reduced to £80, and a sugar-loaf. In the Great Southwark Fire of 1676, the house was totally destroyed, and was again rebuilt by the tenant, a further reduction of the rent and an extension of the lease being granted. The present structure dates from this rebuilding. It was a great coaching and carriers' inn; only a fragment, but a picturesque one, now exists, the rest having been pulled down in 1889-90. The yard is used for the purposes of the Great Northern, the Great Central, and the Great Eastern Railway Companies.

**No. 10. THE NAG'S HEAD INN YARD,
SOUTHWARK.**

10. The Nag's Head Inn Yard, Southwark (Black and white).

In the map of Southwark dating from about 1542, this inn is called the Horse Hede. In 1720 Strype says that "the buildings are old and sorry with inhabitants answerable." The inn standing in 1886, of which only a small part is shown to the right of the drawing, looks as if it were built not much more than a hundred years ago, but it will be seen that the tenements on the same side next the High Street were much older. Here Andrew Ducrow, the

great equestrian performer, is said to have been born, May 12, 1796. His parents had just arrived from Germany. George Colman, the younger, in his "Poor Gentleman," a comedy produced at Covent Garden in 1801, makes a farmer say:—"I be come from Lunnon you see. I warrant I smell of smoke, like the Nag's Head chimney in the Borough." The inn was well spoken of in a little book called the Epicure's Almanac, published in 1815; there were balls here sometimes in the earlier half of the last century. The tavern business is no longer carried on, the yard and premises being in the hands of the Great Western Railway Company. The building over the entrance to this yard remains, but all those on the north side, that is to spectator's right, including the inn, disappeared some years ago.

D. 14-1896.

**No. 12. THE KING'S HEAD INN,
SOUTHWARK.**

12. The last of the Old King's Head (Water-colour).

This inn was originally the Pope's Head, and the name was changed at the time of the Reformation. In 1534 the Abbot of Waverley, whose town house was not far off, writes, apparently on business, that he will be "at the *Pope's Head* in Southwark." This was the very year of the separation of the Church of England from Papal headship. Eight years afterwards the house is marked in the Record Office map as the "Kynge's Hed." That the two

were one and the same is proved by a deed of 1559, that belonged to the late Mr. G. Eliot Hodgkin, F.S.A., whose family at one time possessed the property. This deed is between John Gresham, uncle of Sir Richard and Lord Mayor in 1547, and John White, Lord Mayor in 1563, on the one side, and Thomas Cure, a notable inhabitant of Southwark, on the other; and the inn is here described as having been "formerly known as the Pope's Hed and now as le kynge's hed abutting on the highway called Longe Southwarke." In 1588 the house came into the possession of the Humble family. John Taylor mentions it as frequented by carriers in 1637; ten years afterwards it belonged to Humble, Lord Ward. A seventeenth-century trade token which was issued from here, reads thus:—

O.—AT . THE . KINGS . HEAD . IN = Bust of Henry VIII.

R.—SOUTHWARKE . GROCER = W. P.

The King's Head was one of the inns burnt down in the fire of 1676, but was rebuilt immediately afterwards. The last fragment of the structure then erected was pulled down in January, 1885. The back of it is shown on the right of drawing No. 3, as the building actually touched the White Hart Inn Yard. Mr. John Timbs, in his "Curiosities of London," remarks that within his recollection the sign was a well-painted half-length of Henry VIII.

13. The Queen's Head Inn, Southwark, 1883 (Water-colour).

$$(10\frac{9}{16} \times 7\frac{1}{4})$$

D. 16-1896.

14. Back of the Queen's Head from the Inner Yard, 1884 (Water-colour).

The Queen's Head is on the site of a house called the Crowned or Cross Keys, which belonged to the Poynings family. In 1529 it was used as an armoury, or store place for the King's "harness." In 1558 it still retained its

old sign, for Richard Westray, ale brewer, bequeaths to his wife Joane his messuage on this site, "called the Cross Keyes with the brewhouse garden and stable as it is now newly builded by his son Thomas." In 1634 the house had become the Queen's Head, and the owner was John Harvard, of Emmanuel College, Cambridge, who afterwards migrated to America and gave his name to Harvard University, Massachusetts. About this time it was frequented by carriers, as we learn from John Taylor, "the water-poet." The Queen's Head seems to have escaped the fire of 1676, perhaps owing to the fact that, by way of precaution, a tenement was blown up at the gateway. The main building was pulled down towards the end of 1895. It was then found to be of half timbered construction, dating possibly from the time of Richard Westray. A carved oak mantelpiece in a room on the first floor appeared to be of the early seventeenth century. The galleried portion of the inn, also of considerable age, which had been partly let out in tenements, though much dilapidated, was still standing in June, 1900, but it was all cleared away before the end of the year. A goods yard for the Great Central Railway was then made, but at the time of writing this, though still in use, was to let. The inner yard was then being built over for the purposes of Guy's Hospital.

D. 21-1896.

18. Chimney-piece in Taproom of Sieve, 1885 (Black and white).

The Sieve, close to Holy Trinity Church, Minories, was one of the oldest public-houses in London. Underneath, there were crypt-like cellars, the material used in their construction being of the nature of chalk. It is possible that originally they had some connection with the adjoining convent of nuns of St. Clare, for Mr. J. T. Smith, who in 1797 sketched the remains of the conventual buildings, then laid bare by a fire, and published the results in his "Ancient Topography of London," tells us that their walls were of chalk and Caen stone. The parish of Holy Trinity is all included within the ancient precincts of the convent, and in the early days of the Reformation the gates were still kept up. In the parish records, under date 1596, there is mention of the appointment of a "vitler to the parish." He was also to have the custody of the keys, and was to close the gate "in the sommer at night at tenne of the clocke, and in the winter at nyne, and at noe other hour, except the necessary and urgent occasions of the inhabitants of the said parish doe require the contrarie." Later extracts speak of vestry meetings at the Sieve; for instance, on February 13, 1705-6, "about agreeing to pull down the churchyard wall," when matters were facilitated by the expenditure of six shillings on refreshment. A seventeenth-century trade token issued from this house, of which a drawing is given, reads thus:—

O.—RICHARD . HARRIS . AT . Y^E SEV = a sieve.

R.—IN . TRINITY . MINORIES = HIS HALF PENY. R. R. H.

It is mentioned among public-houses of note in the "Vade Mecum for Malt-worms" (1715?). The sign is a rare one; in 1669, however, there was also a Sieve in Aldermanbury, from which a trade token was issued. In the eighteenth century the Sieve in the Minories appears to have been much curtailed, for in a deed of 1762 it is described as "all that messuage or tenement now divided into three," and an old drawing shows adjoining

shops similar in style, which no doubt originally formed part of it. For many years the house belonged to the Byng family, and at last came into the hands of the Metropolitan Railway Company, by whom it was closed in 1886, but not entirely destroyed until 1890. The parish of Holy Trinity is now annexed to that of St. Botolph, Aldgate. The church, within a few yards of the old Sieve, is a plain little structure, but has various interesting features and associations, which have been described in two publications, by the last vicar, the late Rev. Samuel Kinns. The previous incumbent, the Rev. E. M. Tomlinson, has also written an interesting book about it.

$$(7\frac{1}{8} \times 5\frac{1}{4})$$

D. 22-1896.

19. Old houses in Aldgate, 1886 (Black and white).

On the south side of Aldgate High Street a few seventeenth century houses still survive, chiefly butchers' shops, to remind us that even in Strype's time (1720) they plied their trade here, because, as he tells us, this region lies "conveniently for driving and carrying cattle from Rumford market." One of these shops is shown in the drawing, and to the right of it the Hoop and Grapes tavern, better known as Christopher Hill's. The posts at the door, handsomely carved, seem coeval with the house; and inside there is an archaic board for chalking up the score, with an inlaid frame.

$$(8\frac{13}{16} \times 7\frac{1}{4})$$

D. 23-1896.

20. Remains of the Bull Inn, 25, Aldgate High Street, 1886 (Black and white).

Aldgate and Whitechapel, being on the high road to Essex, had in old days several famous inns; among others the Three Nuns, the Crown, the Blue Boar, and the Black Bull. This last, afterwards known as the Bull, is the house a small part of which appears in the drawing. It was at its zenith shortly before the advent of railways, when Mrs. Anne Nelson, coach proprietor, was the landlady. It has been said that she could make up nearly

200 beds there, and she lodged and boarded about three dozen of her guards and coachmen. Most of her business was to Essex and Suffolk, but she also owned the Exeter coach. She must have been landlady on the memorable occasion when Mr. Pickwick arrived in a cab, after "two mile o' danger at eightpence," and it was through this very archway that he and his companions were driven by the elder Weller when they started on their adventurous journey to Ipswich. The house is now wholly destroyed, and the yard built over.

$$(9\frac{7}{8} \times 5\frac{5}{16})$$

D. 24-1896.

21. 5, 6, and 7, Aldgate High Street, formerly Saracen's Head Inn, 1887
(Black and white).

On the opposite side of the way, some distance west, just within the original limits of the City, an old block of buildings is still (1912) to be seen, which once formed the original front of another well-known coaching inn—the Saracen's Head. The name in 1887 could be dimly observed on the right-hand house, beneath the paint. The carved pilasters to the left must have been the work of an artist. The back of the inn was once galleried, and coaches plied from here to Norwich as long ago as 1681. In the yard, at the time of the drawing, there was still a carriers' booking office, but that came to an end many years ago.

$$(9\frac{3}{4} \times 7\frac{5}{16})$$

D. 25-1896.

22. Almshouses of the Skinners' Company, Mile End Road, 1892
(Sepia).

$$(6\frac{13}{16} \times 10\frac{9}{16})$$

D. 26-1896.

23. Almshouses of the Skinners' Company, Mile End Road, from the Garden, 1892 (Water-colour).

They were immediately west of the famous Trinity Hospital, which was threatened with destruction some years ago. Their narrow frontage to the road did not prepare one for the picturesque view within. Over the gate were the Company's arms and two statuettes of cripples. There were also two inscriptions, one of them setting forth that these almshouses were founded in 1688 during the mastership of Benjamin Alexander; the other ran thus:—

THE GIFT OF MR. LEWIS NEWBURY.

BUILT BY

THOMAS GLOVER ESQ.,
his Executor, committed
to the management of the
COMPANY OF SKINNERS,
LONDON.

The houses, twelve in number, were for poor widows. There was a chapel and a garden at the further end. In 1892 the Skinners' Company invited tenders for the purchase of the property, and about two years afterwards the old buildings here represented were swept away.

24. The Old George Inn, Trinity Square, 1890 (Black and white).

This was a picturesque building, but with no special history. A drawing of it in the Crace collection shows trees in front and a horse-trough. To the gallery, people may have flocked to see executions on Tower Hill, for instance, those of the rebel lords in 1746 and '47. The house was burnt down early in 1894.

$$(8\frac{5}{8} \times 11\frac{3}{8})$$

25. Gateways on the east side of College Hill, 1891 (Black and white).

College Hill is so named because Richard Whittington, the famous Mayor of London, here founded a College of St. Spirit and St. Mary. He

was buried in St. Michael's Church hard by, which was destroyed in the Great Fire and rebuilt by Wren. A view of its tower is given in this drawing, and here in the foreground appear two gateways with sculptured pediments which are quite in the style of the same great architect. It is worthy of remark that on College Hill was the house and courtyard of "Zimri," the second and last Duke of Buckingham of the Villiers family, who, as Strype tells us, lived in this street for some time "upon a particular humour." Hatton in his "New View of London," 1708, says that this is "a spacious building on the east side of College Hill, now or late in the possession of Sir John Lethieullier," and as regards the position of the house he is followed by Peter Cunningham. However, in Ogilby and Morgan's map of 1677, and in the map attached to Strype's edition of Stow, the Duke's dwelling is distinctly shown on the west side of College Hill.

At present the gateways shown in the drawing are incorporated in a frontage which in old leases is always called "the stable"; they form the means of access to two houses joined together; that to the south—No. 21, College Hill, being a capital specimen of a merchant's dwelling of the early part of the eighteenth century, with a handsome staircase, carved overdoors, and a finely panelled room on the first floor. The other has been rebuilt of late years. They stand back some distance from the street, and have no special relation with the gateways, which are older in style. Underneath both houses run, or ran, very large cellars, connected, and within memory there was a small garden at the back of No. 21. In 1746 this house belonged to Charles Lethieullier, and was then tenanted by Sir Samuel Pennant, the previous occupant having been Sir Robert Godschall. The house afterwards passed by marriage to the Hulses; for many years it has been in the hands of the Wilde family, which has produced two eminent judges—Lord Truro and Lord Penzance.

Taking into consideration the fact of the property having belonged to the Lethieullier family, from its ground plan, and from the style of the gateways themselves and of the building to which they belong, it seems not improbable that here were the stables of Buckingham House with a garden

at the back. The house between the gateways and the church was built for the Mercers' School, being opened by the Master and Wardens, June 6th, 1832, and is said to occupy the site of Whittington's dwelling. The school has of late years, in its turn, been removed to Barnard's Inn, of which there are drawings in this collection. The school building on College Hill at the time of writing remains.

26. Staircase of House in Botolph Lane, 1887 (Black and white).

This house stood in a quiet courtyard opening into Botolph Lane with a second entrance in Love Lane, and had been used since 1859 for the Billingsgate and Tower Ward School. The front, plain but well proportioned, was built of remarkably small bricks with stone facings. It had a projecting cornice and flat lead-covered roof. The doorway was approached by a double flight of steps, beneath which an opening had been left, once used as a dog kennel, to judge from the little hollow for water scooped out in front. Entering a hall which extended right through the house and was paved with alternate chequers of black and white marble, one saw in front a handsome staircase, part of which is shown; the date 1670 appeared on the plaster. Upstairs, the structure had been mutilated, the greater part of the landings on the first and second floors being latterly included in the schoolrooms, but a marble chimney-piece, fine cornices and plaster-work, evinced the taste of former possessors. Perhaps the most interesting part of the house was a small room immediately to the left of the main entrance. It was panelled throughout, and painted from ceiling to floor with strange designs, among which one could dimly discern the figures of Indians, a rhinoceros, antelopes, palm trees, and other signs of tropical life as it represented itself to the imagination or memory of the artist. According to some, the history of the tobacco plant was here depicted, but of this there was no sign. Fortunately we know the name of the painter of this curious series of pictures, one of the panels being signed "R. Robinson, 1696." The other decorations of the room were a carved mantelpiece and a panelled

cupboard. The house is charmingly described in the late Mrs. Riddell's novel "Mitre Court," and she made it the home of her heroine. There is, however, no authority for her statement that Sir Christopher Wren was its architect and first inhabitant. This interesting old building was pulled down in 1905-6, although great efforts were made to induce its owners to preserve it.

D. 29-1896.

27. Staircase of No. 9, Great St. Helen's, 1891 (Black and white).

During the early part of the year 1892 a large mansion was destroyed on the south side of Great St. Helen's, Bishopsgate Street. Latterly divided into two, being numbered 8 and 9, it was of brick, having engaged pilasters, which were furnished with stone bases and capitals. They also had bands, on two of which appeared in relief the initials $\begin{smallmatrix} L \\ AI \end{smallmatrix}$ and the date 1646. The projecting sills or cornices and the deep keystones on the first floor windows gave a striking appearance to the house. It was also memorable as an early specimen of brickwork in London, and as dating from a period before the formal conclusion of the Civil War, when building operations were almost at a standstill. No. 9 had, in a room on the first floor, a wooden seventeenth century mantelpiece, behind which, on its removal, were found traces of an older mantelpiece of marble, and evidence of the former existence of a large open fireplace. The beautiful staircase, or portion of a staircase, now in the Victoria and Albert Museum, of which a slight drawing is here given, may from its style be Elizabethan. A blocked-up window with wooden transoms for casements was also discovered; so it seems likely that, some years after the date of the original building, considerable alterations took place. The façade has been attributed to Inigo Jones, but it had not his classic symmetry, and looked like the work of a less instructed native genius. Besides Inigo Jones, a Royalist and Roman Catholic, was taken prisoner in October, 1645, at the storming of Basing House, having been there during the siege, which had lasted since August, 1643. He was

apparently not free to return to his profession until July 2nd, 1646, when, after payment of a heavy fine, his estate, which had been sequestrated, was restored to him, and he received pardon by an ordinance of the House of Commons. It is hard to believe that whilst he was passing through such a crisis, or in the few months succeeding it, he would have been superintending a work in the Puritan City. At the time of his release the great architect was seventy-four years of age, and, as far as we know, he hardly practised his profession afterwards. The division of Nos. 8 and 9, Great St. Helen's, into two, took place in the course of the 18th century; probably about 1750, to judge from the style of the fanlights and projecting hoods to the front doors, and from the staircase of No. 8, the upper portion of which, however, was much more archaic, and might have served as part of the back-staircase to the original building.

The initials on this house have generally been considered to relate to Sir John Lawrence, who was Lord Mayor in the year of the Great Plague, and to Abigail, his wife, but they were really those of his uncle and aunt—Adam and Judith Lawrence, who were of Flemish or Dutch origin. From the former, Sir John inherited this house with other property in the parish. It does not, however, appear that he ever lived there. He kept his mayoralty in a house of totally different appearance, an illustration of which by T. Prattent, published in 1796, forms the frontispiece to Vol. XXIX. of the "European Magazine." As there shown, it had elaborate plaster decorations in front with the City arms and the arms of Lawrence, and last, not least, with the inscription S^r J L—K & A. 1662. That undoubted residence of Sir John Lawrence is marked by name in the map of Bishopsgate Street Ward accompanying Strype's edition of Stow's Survey, where a slight sketch of it is also given. The present Jewish synagogue in Great St. Helen's is rather west of the site.

No. 28. ENTRANCE TO GREAT ST. HELEN'S.

28. Entrance to Great St. Helen's from Bishopsgate Street, 1891 (Black and white).

When this view was taken, the passage from Bishopsgate Street to Great St. Helen's passed under old buildings which had escaped the Great Fire. The structure on spectator's right was Sir Andrew Judd's almshouse, founded by him in 1551, and rebuilt by the Skinners' Company in 1729. Sir Andrew, who was Lord Mayor and belonged to the Skinners' Company, seems, in this benefaction, to have been merely acting as executor to his

cousin Elizabeth, widow of Sir William Hollis. Stow, however, does not mention her name in connection with the charity. Sir Andrew also founded and endowed Tunbridge Grammar School. The almshouse was destroyed about the year 1892, and the old buildings by Bishopsgate Street did not long survive. The building on spectator's left was the modern part of Crosby Hall, swept away in 1907-8.

$$(11\frac{1}{2} \times 8\frac{3}{16})$$

D. 35-1896.

29. No. 10, Great St. Helen's, 1891 (Black and white).

At the corner of Great St. Helen's, opposite the pretty south porch of the church, by some attributed to Inigo Jones, which has on it the date 1633, stood a quaint old house constructed of wood and plaster, with projecting upper stories and massive timbering, which dated from long before the Great Fire, and at the time of this sketch was, perhaps, the oldest domestic building in the City except Crosby Hall; the inside, however, had been modernised. Tradition boldly asserts that Anne Boleyn's father, Sir Thomas, afterwards Viscount Rochford and Earl of Wiltshire, once lived here. It is an undoubted fact that a kinsman of his name, was intimately connected with St. Helen's, for "on the 24th December, 26th Hen. VIII., 1534, the Prioress and Convent appointed Sir James Bolleyne, Knt., to be steward of their lands and tenements in London and elsewhere, the duties to be performed either by himself or a sufficient deputy during the life of the said James, at a stipend of forty shillings a year, payable at Christmas. If in arrear for six weeks the said James might enter and distrain." This was most likely Sir Thomas Boleyn's elder brother. The house, No. 10, had been much shaken by the removal of Nos. 8 and 9 adjoining. It was propped up for some time, and destroyed in the course of 1894.

D. 33-1896.

30. Old Houses, Great St. Helen's, Bishopsgate Street, 1862 (Black and white).

This drawing was made from the passage between Bishopsgate Street and St. Helen's, the view being the reverse of No. 28. The strip of building to the extreme right belonged to the modern part of Crosby Hall, a Gothic mansion unrivalled in its day; but its entrance—No. 1, St. Helen's, is not shown, nor is No. 2—a well-proportioned house with a pretty doorway, dating from the earlier part of the eighteenth century which has also disappeared. The three plastered houses adjoining were pulled down many years ago. The high brick house immediately to their left has so far been spared, and deserves a visit for the sake of its good Georgian staircase. Part of Nos. 8 and 9, already described, is dimly seen through the trees on the left. No. 10 is not visible, being chiefly round the corner, in the lane leading to St. Mary Axe. There was a right of way through here for the public from quite early times; for Dugdale tells us that in the Hundred Roll of 3rd Edward I. several entries occur relating to an attempt which the nuns made to stop up the lane or passage through the court of their priory from Bishopsgate Street to St. Mary Axe. Since 1862 a large piece has been taken from the churchyard, with no apparent advantage to the public.

D. 87-1896.

32. Mantelpiece in Crosby Hall Chambers, Bishopsgate Street, 1891 (Pen and ink).

At No. 25, Bishopsgate Street Within, until 1892-93, a house was standing which had been known for years as Crosby Hall Chambers. The front towards the street had no marks of antiquity except two carved festoons of flowers much blocked up by paint, between the first floor windows. The north side, as seen from a passage which is here depicted, appeared to be externally more or less in its original state. Its base was composed of rustic work, the wall being relieved by pilasters. There was a

room on the first floor looking out on this passage, which was adorned by a very beautiful carved chimney-piece shown in the second drawing, and now in the Board room of the Bank of Scotland, which stands on the site. It bears the date 1633; the lower part is of stone, the overmantel of oak. Students of work of this period should compare it with a somewhat earlier chimney-piece now in the Guildhall Museum, which was removed from an old mansion in Lime Street now many years ago. There was also at Crosby Hall Chambers a fragment of decorative plaster ceiling. This was acquired by the authorities of the Victoria and Albert Museum. They also have a cast of the chimney-piece.

$$(11 \times 9\frac{7}{16})$$

33. Garden of No. 4, Crosby Square, 1891 (Black and white).

Crosby Square, built about the year 1678, is on the site of the offices of Crosby Hall, which had been destroyed by fire. No. 3 was formerly a good specimen of a house of that date. It has been recased with brick, but the handsome doorway is preserved. No. 4 has a fine staircase; its chief distinction, however, was the charming garden at the back, with its fig trees, its thorns, and fountain—a veritable oasis in this wilderness of bricks and mortar. Unfortunately, soon after the removal of Crosby Hall, it was destroyed, and the garden built upon. The south wall of this was mediæval, being composed of good rubble, 3 feet thick, and extending from the present ground level to a depth of 14 feet of made earth. It was part of the original boundary wall of the Crosby precinct. Dr. Nathan Adler, Chief Rabbi, lived here for some years, from 1847 onwards; the garden and basin are marked distinctly in Strype's map of 1720.

D. 32-1896.

34. Sir Paul Pindar's House, No. 169, Bishopsgate Street Without, 1890 (Black and white).

In 1890-91 the Great Eastern Railway Company cleared a great space near the Liverpool Street terminus, which involved the removal of the remains of Sir Paul Pindar's house, a beautiful work of art and a unique relic of a great city residence at the beginning of the seventeenth century. The oak front, with its elaborate carved work, is now to be seen in the Museum (West Hall, R. 48). One is thankful that it exists, but of course it was far more interesting while still in its original position. The decorated plaster ceiling from the first floor is also in the Museum. There is a view of the room which contained this ceiling, drawn by J. T. Smith in 1810, which also shows a fine though somewhat grotesque chimney-piece, having on it the date 1600. With other decorative work, it was removed early in the last century, when the room was made what the possessors called "a little comfortable." Doubtless the original mansion included the adjoining house, or its site, and much more besides. This latter house to the left or south, destroyed about the year 1877, contained a good plaster ceiling of more modern style than that already referred to; it is also now in the Museum. There must have been gardens at the back, and a building, with handsome decoration, called "the Lodge," which formerly stood in Half Moon Street, and is figured in Wilkinson's "Londina Illustrata," was said by tradition to have been occupied by the gardener. Sir Paul Pindar was an eminent merchant and diplomatist, who lent great sums of money to Charles I., and gave at least £10,000 for the rebuilding and embellishment of old St. Paul's Cathedral. A tablet to his memory was formerly on the north side of the chancel of St. Botolph's Church, Bishopsgate Street, but of late years it has been banished to an obscure corner in the north vestibule. The inscription runs as follows:—

Sir Paul Pindar K^t
Her Majesty's ambassador to the Turkish Emperor
Anno DM 1611 and 9 years resident
Faithful in negotiations foreign and domestick
Eminent for piety charity loyalty and prudence
An inhabitant 26 years and a bountiful benefactor
To this Parish

He dyed the 22^d August 1650
Aged 84 years.

From 1787 or earlier the main portion of Pindar's house, here depicted, was used as a tavern.

D. 36-1896.

35. The One Swan Inn, Bishopsgate Street Without, 1890 (Black and white).

Another house destroyed by the Great Eastern Railway Company, about the same time as that last described, was the One Swan Inn, Bishopsgate Street Without. It had no special history, but was an old place of call for carriers and waggons, and survived its companions, the Two Swans hard by, and the better-known Four Swans, Bishopsgate Street Within, the site of which is now marked by a modern tavern. The yard of the One Swan Inn was of considerable size. A picturesque wool warehouse had stood on the vacant space shown in the sketch, to the left-hand side. This latter building had been destroyed in 1886.

$(9\frac{3}{8} \times 5\frac{3}{8})$

D. 37-1896.

36. Staircase of No. 10, Austin Friars, 1895 (Water-colour).

Early in 1896 the interesting house, No. 10, ceased to be. It was in the precinct of Austin Friars, on the north side of the Old Friars' Church, the nave of which has for centuries been handed over to the Dutch congregation in London. As appeared from a date on a rain-pipe, it had been in existence at least as early as the year 1704. The porch was approached by steps; ascending these, one saw in front a spacious staircase, so typical of the period that it is here portrayed. This staircase was panelled throughout, and was especially noticeable from its ceiling, which was painted on plaster with allegorical figures, in the style of Sir James Thornhill. The house No. 11 formed part of the same block of buildings. While these were in process

of destruction a Gothic arch was exposed to view, the upper part of which had been in a room on the ground floor of No. 10, incorporated in the east wall of the house. From the character of the mouldings it appeared to date from the fifteenth century, and had no doubt belonged to the cloisters of the Augustine Friars. Other mediæval remains were found, and a paper on the subject was read by Mr. Allen S. Walker, before the London and Middlesex Archæological Society.

D. 77-1896.

37. Arms of the Olmius Family on Mantelpiece at No. 21, Austin Friars, 1888 (Black and white).

The house to which these arms belonged had been built in the latter part of the seventeenth century, possibly before the great fire, which did not extend so far north. In the year 1705 it came into the hands of Herman Olmius, merchant, descended from an ancient family of Arlon in the Duchy of Luxembourg, and naturalised by Act of Parliament, 29 Charles II. He was a member of the French Protestant Church in Threadneedle Street, and made a large fortune; he died in 1718. His eldest son was a deputy-governor of the Bank of England, and his grandson was raised to the Irish peerage as Lord Waltham, but the title became extinct in the next generation. For many years, beginning in 1783, the well-known Huguenot family of Minet occupied the house, and in 1838 Messrs. Thomas, Son & Lefevre were established here, the last-named being a brother of the late Lord Eversley. This house, a drawing of which the writer hopes at some future time to add to the collection, was remarkable as having come down to us in almost unchanged condition from its earliest time. To the west it formerly overlooked the Drapers' Garden, and it had a garden of its own about half an acre in extent, with brewery, coach-house, and stables. Inside, there was a good staircase, some of the rooms were charmingly panelled, a strong room and parts of the kitchen were lined with Dutch tiles, and in front of a Purbeck marble mantelpiece there was a coat of arms in white marble (No. 37), with various foreign quarterings. It may be described as follows:—

Quarterly: 1. Per fess azure and argent, a fess counter embattled or; in chief a mullet of six points of the second; in base on a mount vert an elm tree proper. OLMIUS.

2. Sable, a dexter hand proper, issuing out of a cloud and grasping five wheat ears or. GERVERDINE.

3. In chief a deer's head couped azure, crowned argent; in base six besants or. REYNSTEIN.

4. Azure, a goat erect argent, hoofed and horned or, browsing on a vine proper. CAPPRÉ.

On an escutcheon of pretence sable, a herring or in bend. DRIGUE.

These are the arms of Herman Olmius, whose name was the Latinised form of the Flemish or Dutch word for elm. The Gerverdine arms are those of his mother Margareta; the arms on the escutcheon of pretence are those of his wife Judith. No. 21, Austin Friars was swept away in 1888. The boundary at the end of its garden had been formed by one side of the premises known as No. 23, Great Winchester Street, to which allusion will next be made.

38. Kitchen Range in No. 23, Great Winchester Street, 1889 (Black and white).

$$(10 \times 12\frac{1}{2}) \qquad \text{D. 40-1896.}$$

39. Chief Reception Room, No. 23, Great Winchester Street, 1889 (Black and white).

The fine old mansion in which these drawings were done stood back from the street, and was approached through a paved yard with a lodge on

each side of the entrance. Outside, its chief characteristics were a somewhat high pitched roof, and wings projecting forward. Within, the staircase with its plaster decorations, was handsome. The well-proportioned room of which a drawing is here given (No. 39) was on the first floor. There were other panelled apartments, and the kitchen range (No. 38) was very old-fashioned. After the dissolution, the house and gardens of the Augustine Friars had passed into the hands of William Paulet, first Marquis of Winchester, hence the name Winchester Street. From a date carved on a grotesque bracket, formerly to be seen at the north-east corner, it appears that the street was constructed, partly at least, in the year 1656, during the government of Cromwell. Strype, writing in 1720, says that here was "a great messuage called the Spanish Ambassador's house, of late inhabited by Sir John Houblon, Knight and Alderman, and other fair houses." Even down to our time it was a remarkably picturesque specimen of a London street. No. 23, Great Winchester Street was destroyed in 1890.

40. The City Greenyard, No. 18, Whitecross Street, 1895 (Black and white).

This was formerly the place to which stray horses or cattle found in the City were taken for safe custody. It is stated in an Act of Parliament, May, 1765, that "The Commissioners appointed to remove nuisances may seize the waggon, cart, dray, or other carriage so placed, together with the horse or horses, etc., etc., and to remove the same to the Common Pound of the City, commonly called the Greenyard." Here are now (and have been for many years) the Lord Mayor's stables, his wonderful State coach, and the carriage he uses on ordinary occasions, which is shown in the illustration; the figure of the Lord Mayor's coachman may also be seen standing in a doorway. Between the open space and Whitecross Street were the Gresham almshouses, removed to Brixton in 1883. They had been originally at the back of old Gresham College, between Broad Street and Bishopsgate Street.

The almshouses in Whitecross Street were, after 1883, for a time utilised as quarters for married men in the City Police.

41. Bunyan's Monument, Bunhill Fields, 1894 (Black and white).

Bunhill Fields Burial Ground in the City Road, near Finsbury Square, described by Southey as the "Campo Santo" of the Dissenters, was one of the three great fields, namely "Bonhill Field," "Mallow Field," and the "High Field or Meadow Ground, where the three windmills stand, commonly called 'Finsbury Field.'" As early as the year 1315 it seems to have been let to the City authorities, and in 1553 a lease was granted to the Corporation of this with other land, being a part of the church property of the Dean and Chapter of St. Paul's, and the lease was again and again renewed. In 1661 the ground was underlet to a person of the name of Tindal for fifty-one years. In the deed it is described as meadow land, and the citizens are to be allowed to use it for purposes of recreation. Up to that date, therefore, it does not appear to have become a burial ground; but it was probably set apart for the burial of victims of the Great Plague, although not so used. It is a mistake to connect it with "the Great Pit in Finsbury" mentioned by Defoe in his Memoirs of the Plague, which was situated near the upper end of Goswell Street. However, about this time Tindal turned it into a burial ground. For many years called by his name, it was adopted as their place of interment by several Dissenting sects, and from 1665 to 1852, when all City cemeteries were closed, no fewer than 123,000 burials took place here. For some years after this the place was neglected, but in 1867-68 it was put in order and opened to the public October 14th, 1869. In Bunhill Fields there are now about six thousand tombs; a record of them is kept in the Surveyor's Office, Guildhall. Among eminent persons here buried are General Charles Fleetwood (Cromwell's son-in-law), Defoe, Susannah Wesley, mother of John and of Charles, Dr. Isaac Watts, Joseph Ritson, the antiquary, William Blake, painter and poet, Thomas Stothard, R.A. But perhaps the most widely known is John

Bunyan, who wrote "The Pilgrim's Progress." He died at the house of his friend, Mr. Strudwick, a grocer at the Star on Snow Hill, and was buried in that friend's vault. The monument was restored by public subscription, under the presidency of the Earl of Shaftesbury in 1862; a drawing of it is here given.

42. Chimneypiece and part of room in No. 4, Coleman Street, 1892
(Water-colour).

Until a few years ago a house was standing on the west side of Coleman Street, near the north end, which, like houses innumerable, was reputed to have been a residence of Oliver Cromwell; at first sight it appeared to date from the earlier part of the eighteenth century. There was in it a good eighteenth century staircase with a skylight above, and one of the rooms had a handsome mantelpiece, also apparently Georgian. Another room, on the first floor, was distinguished by very remarkable features: it was panelled with cedar, and, as will be seen, the style of this panelling and of the handsome carved chimneypiece are distinctly Jacobean. The house, therefore, was much older than appeared at first sight, or else it had been rebuilt early in the eighteenth century, the chimneypiece and panelling being insertions from an older building. The houses at the north end of Coleman Street were not destroyed in the Great Fire. In 1891-92 the cedar room was used as an office by Mr. H. S. Foster, then Sheriff of London. In 1896 the house was pulled down by Messrs. Colls and Son, whose offices adjoined, and in clearing away the foundations the workmen came upon three ancient wells—two of them went down 20 ft. below the pavement level. The following is quoted from an illustrated article in the "City Press" for June 6th, 1896:—"The construction of these wells or elongated water-butts was simplicity itself. Tubs or casks, bound with wooden hoops, were sunk into the ground and banked up with puddled clay to keep them water-tight. The clay remains to this day, as also do the wooden hoops (or did till very recently), but the latter are as soft as touchwood." The description of

these casks reminds one of casks somewhat similar which have been found in Roman wells at Silchester, and were exhibited in the rooms of the Society of Antiquaries at Burlington House. In the wells beneath No. 4, Coleman Street, were discovered various pieces of pottery in remarkably good preservation, which are now in the Guildhall. The collection represents types ranging from the beginning of the fifteenth to the end of the seventeenth century. The soil in which these old wells were sunk was dark and peaty, like that of Moorfields, on the other side of the City Wall.

43. Interior of The Two Brewers Public-house, No. 27, London Wall, 1886 (Black and white).

The Two Brewers Public-house, at the entrance to Fox and Goose Yard, London Wall, destroyed a few weeks after the completion of this drawing, was evidently a very old building. The sign was in former days a common one, being usually represented by two brewers' men carrying a barrel of beer slung between them on a pole. It is curious that a sign of a similar description was used by the Romans; one representing two men carrying between them an amphora was found at Pompeii. It is figured in Larwood and Hotten's "History of Signboards," that of the Two Brewers being placed alongside for comparison.

44. Part of the Chapter Coffee House, from Paul's Alley, 1887 (Black and white).

The Chapter Coffee House in Paternoster Row (No. 50) and also opening into Paul's Alley, a passage from St. Paul's Churchyard, was noted in the 18th century as a house of call for London publishers. In the "Connoisseur," No. 1, January 31st, 1754, is the following notice of it:—"And here my publisher would not forgive me was I to leave the neighbourhood without taking notice of the Chapter Coffee House, which is

frequented by those encouragers of literature, and, as they are styled by an eminent critic—'not the worst judges of merit'—the booksellers. The conversation here naturally turns upon the newest publications, but their criticisms are somewhat singular. When they say a *good* book they do not mean to praise the style or sentiment, but the quick and extensive sale of it." Late in the 18th century and early in the 19th, several clubs met here, of which an account is given in the "Curiosities of London," by John Timbs. Goldsmith appears to have known it well. Chatterton says, in a letter to his mother, "I am quite familiar at the Chapter Coffee House." And here Charlotte and Anne Brontë stayed on their first visit to London in June, 1848. It had been visited by their father, and thus they gained their knowledge of it. The late Mr. George Smith, the famous publisher, remembered calling on them there, and Mrs. Gaskell gives a graphic description of the low ceilings, the wainscotted rooms, and the high narrow windows. After the death of the proprietor, Charles Faithfull, in November, 1853, the house became an ordinary tavern; it was rebuilt before 1890, there are now no rooms over the passage. From the Chapter Coffee House were issued in the seventeenth century two leathern trade tokens, specimens of which are preserved in the Beaufoy Collection at the Guildhall Museum. The larger one, representing a groat, has on it:—

O.—CHAPTER COFFEE HOUSE (4)—In the field, a mitre.

R.—Blank.

The leather appears to have been gilded.

45. Royal Mail Tavern, from Fitchett's Court, Noble Street, 1889 (Black and white).

This house, on the south side of Noble Street, from the style of the brickwork must have been built in the early part of the eighteenth century, but little is known of its history. The sign was comparatively modern,

suggested, no doubt, by the proximity of the General Post Office, which was moved from Lombard Street to St. Martin's-le-Grand in 1829. The Royal Mail Tavern was destroyed in May, 1897.

46. Reminiscence of the Oxford Arms, Warwick Lane, 1875 (Water-colour).

The structure, of which a small part is here shown, was approached by a passage from Warwick Lane, being bounded on the west by the old wall of the cathedral precinct and touching Amen Corner on the south. It was a fine example of its kind. As was said by a writer in the "Athenæum" of May 20th, 1876:—"Despite the confusion, the dirt, and the decay, he who stands in the yard of this ancient inn may get an excellent idea of what it was like in the days of its prosperity, when not only travellers in coach or saddle rode into or out of the yard, but poor players and mountebanks set up their stage for the entertainment of spectators who hung over the galleries or looked on from their rooms—a name by which the boxes of a theatre were first known." The house must have been rebuilt after the Great Fire, which raged over all this area. That it existed before, is proved by the following odd advertisement from the "London Gazette" for March, 1672-73:—"These are to give notice that Edward Bartlet, Oxford Carrier, hath removed his Inn in London from the Swan at Holborn Bridge to the Oxford Arms in Warwick Lane, where he did Inn before the Fire. His coaches and waggons going forth on their usual days, Mondays, Wednesdays and Fridays. He hath also a hearse and all things convenient to carry a corps to any part of England." In the palmy days of coaching, just before the advent of the railways, the Oxford Arms was in the hands of Mr. Edward Sherman, who carried on the chief coaching business at the Bull and Mouth, St. Martin's-le-Grand. After 1868 many of the rooms were let out in tenements, but the inn still did a good carriers' business, carts leaving daily for Oxford and other places. It was closed in 1875 and pulled down in the following year. Views of this house formed the first of a series issued by the Society

for Photographing Relics of Old London. The late Mr. Alfred Marks, the accomplished secretary, wrote useful accompanying notes. Another old galleried house, which long lingered on the east side of Warwick Lane, was the Bell Inn, where Archbishop Leighton died in 1684. As Burnet tells us, he had often said that "if he were to choose a place to die in it should be an Inn; it looked like a pilgrim's going-home, to whom this world was all as an Inn, and who was weary of the noise and confusion in it." Thus his desire was fulfilled.

D. 43-1896.

47. Deanery of St. Paul's, 1891 (Black and white).

This house was built by Wren, after the Great Fire, on the site of the former Deanery, but shorn of the chief part of its garden stretching down to the river, which was portioned off in building leases to defray the cost of the new structure. In our drawing the high gates almost concealed the porch, which is ornamented with carved festoons of flowers. There is also a handsome staircase. Many years ago rooks used to build in the plane-trees in front. The drawing was taken from the steps of No. 5 Dean's Court, now destroyed, where was the Vicar-General's Office for Marriage Licences.

$$(8\frac{1}{4} \times 10\frac{7}{8})$$

D. 45-1896.

48. Dean's Court, St. Paul's Churchyard, 1894 (Water-colour).

The Deanery stands in Dean's Court, and the wall enclosing it is here shown on the left, the artist's standpoint being very close to that in No. 47. In 1894 great changes took place at this spot, which had before been singularly quiet and old-fashioned. The entrance from St. Paul's Churchyard was, before, through an archway, under a house dating from immediately after the Great Fire, which was said traditionally to have been used by Wren as an office during the rebuilding of St. Paul's. This house appears in course of demolition, while the ground on the right lies vacant, and we are thus

enabled to have a glimpse of the cathedral, soon afterwards again quite concealed. The buildings to the east, facing St. Paul's Churchyard, together with the Vicar-General's office and other houses on the same side of Dean's Court, were cleared away to enable Messrs. Pawson and Co. to extend their warehouses, the Ecclesiastical Commissioners having granted them a building lease for that purpose. Dean's Court did not actually form part of the precincts of Doctors' Commons (finally cleared away in 1867), but was associated with it and in its immediate neighbourhood. Sam Weller, in "Pickwick," thus humourously refers to the entrance:—"St. Paul's Churchyard—low archway on the carriage side, bookseller's at one corner, hotel on the other, and two porters in the middle as touts for licences." It was here that his father was inveigled into matrimony.

$$(8\frac{3}{4} \times 6\frac{3}{8})$$

D. 74-1896.

49. St. Paul's Churchyard, laid out as a Garden (Black and white).

The present cathedral of St. Paul is the third dedicated to that Saint and built more or less on the same site. The first was founded in the early part of the seventh century by Ethelbert, King of Kent; the second, known as *old* St. Paul's, was begun A.D. 1087. This, having been destroyed by the Great Fire, was replaced by the present marvellous building, which we owe to the genius of Sir Christopher Wren. It will thus be seen that St. Paul's Churchyard has had hallowed associations for about 1,300 years. The name, in its fullest sense, is applied to the irregular area surrounded by houses encircling the cathedral and including the burial-ground. These houses, before the Fire and for some time afterwards, were largely inhabited by booksellers and publishers, who by degrees worked their way into Paternoster Row, where they still flourish. For many years after burials had ceased, the burial-ground attached to St. Paul's was in a somewhat neglected condition. In 1877 an agreement was entered into between the City Corporation and the Dean and Chapter, by which the former pledged themselves to lay out a considerable sum on the enclosed space if they were allowed to convert it into a garden for the benefit of the public, and on

September 14th, 1879, the north-eastern part, which is here represented, was publicly opened by the Lord Mayor. Here the weary may sit amidst trees and flowers beneath the shadow of the great cathedral, and enjoy seclusion from the turmoil of City life. The scene here represented is, however, a thing of the past. The fountain has disappeared, and with it most of the pigeons, its place being taken by a cross erected under the will of the late Mr. H. C. Richards, as a memento of the old St. Paul's Cross.

D. 75-1896.

50. The Yard of the Swan with Two Necks, 49, Carter Lane, 1894
(Water-colour).

There has been more than one hostelry with this sign in the City of London. The most famous was the Swan with Two Necks in Lad Lane, at one time owned by Mr. William Chaplin, perhaps the greatest coach proprietor that ever lived. After the advent of railways, in partnership with Mr. Horne, he established the great carrying business which still flourishes on the old site in Lad Lane, now absorbed by Gresham Street. The Swan with Two Necks, in Carter Lane, was also a coaching house, but although picturesque, of comparatively small importance. Outside was a painted sign, placed flat against the wall, and visible from Dean's Court. Times having changed, the building in front became an ordinary public-house, while the galleried portion was occupied by persons in the employment of Messrs. Pawson, the great warehousemen. This drawing was made in October, 1894, when the place had just been vacated, having been taken over by the Post Office authorities. It was shortly afterwards destroyed, and a Post Office Savings Bank has been built on the site. The origin of the sign may be thus explained. The swans on the upper reaches of the Thames are owned respectively by the Crown and the Dyers' and Vintners' Companies of the City of London, and, according to ancient custom, the representatives of these several owners make an expedition each year up the river and mark the cygnets. The Royal mark used to consist of five diamonds, the Dyers' of four bars and one nick, and the Vintners' of the chevron or letter V and two

nicks. The word "nicks" has been corrupted into "necks," and as the Vintners were often tavern-keepers, the Swan with Two Necks became a common sign. The swan-marks which I have described continued in use until the year 1878, when the swanherds were prosecuted by the Society for the Prevention of Cruelty to Animals, on the ground that they inflicted unnecessary pain. Although the prosecution failed, the marks have since been simplified.

No. 51. VIEW FROM PAUL'S PIER. 1891.

51. View from Paul's Pier, 1891 (Black and white).

The spectator may here suppose himself to be standing near the site of Paul's Wharf, which Stow describes as "a large landing place with a common stair upon the river Thames, at the end of a street called Paul's Wharf Hill, which runneth down from Paul's Chain." The bridge in the middle distance is Southwark Bridge. In the immediate foreground is a curious riverside dwelling, squeezed in between two great warehouses; its quaint bay window projecting over a wide doorway for the passage of

goods, which opens on to the Thames. The house, containing nineteen rooms and two staircases, was, in 1891, still occupied as a private residence, being let in apartments, and was one of the last of its kind on the Thames bank in London. It was popularly supposed to be 300 years old, and to have been occupied by James I., an adjoining wharf being used as a barrack for his soldiers, but, from the architectural point of view, there was nothing to indicate that it dated from before the end of the seventeenth, or beginning of the eighteenth century. East Paul's Wharf, immediately beyond, had been rebuilt in 1890, but the large warehouse adjoining it on the west, known as Paul's Wharf, and sometimes called the "barracks," looked as if it had been built about a hundred years. It ran back some distance, having twelve gables alongside the way to Paul's Pier. Shortly after the completion of this drawing, a subterranean brick tunnel (partly under the old house) was discovered. It began at a distance of about 50 feet from the Thames, and extended in a northerly direction for about 110 feet. It was 14 feet wide with a clear way of some 8 feet, after allowing for a deep deposit of mud along the floor. The arch within was covered with stalactites, in some cases a yard long; the two ends had been bricked up. The writer of an article in the "Builder" for August 2, 1891, suggests that "this tunnel may possibly have been made to carry off some of the torrents that used to run down the steep inclines in this part of the town after great and sudden rains, sometimes to the peril of human life, as witness the story told by Stow apropos of Dowgate (1574)." The old house, the "barracks," and the tunnel were all destroyed in 1898. During the work of reconstruction, ancient timber piling came to light, which had been used for the embankment of the river. Paul's Pier has of late years been abolished. A seventeenth century trade token, issued from Paul's Wharf, reads as follows:-

O.—AT . Y^E . NEXT . BOAT . BY PAVLS = A boat containing three men; over it, NEXT BOAT.

R.—WHARFE . AT . PETERS . HILL . FOOT = M. M. B.

D. 46-1896.

52. Back of the Green Dragon Inn, St. Andrew's Hill, 1890 (Black and white).

This picturesque old house, here shown from Green Dragon Court, had no special history, but, to judge by its style, must have dated from immediately after the Great Fire. St. Andrew's Hill was first called Puddle Hill, and then Puddle Dock Hill, after the neighbouring wharf of that name. Shakespeare owned a house in Ireland Yard hard by, where, in 1900, remains of the Blackfriars Priory were brought to light. The Green Dragon was the badge of William Herbert, Earl of Pembroke, who died in 1570. This house was pulled down in 1896. Its better known namesake in Bishopsgate Street, an old galleried coaching inn, had disappeared in 1877.

54. Carved Emblematical Figures, Allhallows the Great, 1893 (Water-colour).

The church of Allhallows the Great, Upper Thames Street, is mentioned in a will of 1259. The patronage of the living was anciently in the hands of the Le Despencers; it afterwards came to Richard Nevil, Earl of Warwick, "the King maker." This church had a large cloister on the south side. The whole was destroyed or very much injured in the great fire, and rebuilt by Sir Christopher Wren, who, according to his custom, worked in such parts of the walls and foundations as were available. The tower and north aisle or ambulatory of this structure (which seems never to have been open to the nave) were removed in 1876 for the widening of Upper Thames Street. Under the Union of Benefices Act, the church itself was sold by auction

March 31st, 1894, and shortly afterwards pulled down, the ground being bought by the neighbouring brewery. It is now an open space with its fragment of churchyard. The interior was of singular beauty, and retained its original fittings to the end, among them the fine open screen shown in drawing No. 53 and now at St. Margaret's, Lothbury. This screen is sometimes said to have been made at Hamburg, and given by the Hanseatic merchants, so long connected with the neighbouring Steelyard. It is, however, undoubtedly English work. The earlier documents bearing on the subject make it almost certain that both screen and pulpit were presented by Theodore Jacobsen, who in 1680 succeeded his brother Jacob as house-master of the Steelyard, an office which the latter had held at the time of the Great Fire. It was chiefly through their efforts that the Steelyard was rebuilt, and the Jacobsen family thereby acquired claims over it, which, after protracted litigation, were bought up by the Hanseatic towns in 1748. These retained the Steelyard and some slight connection with the church until after the middle of the nineteenth century. It may be observed also that the screen has on it an eagle "displayed." The beautiful sounding board of the pulpit also has an eagle. This is now at St. Margaret's, Lothbury; the pulpit itself has been removed to a church at Hammersmith.

The second drawing represents a carved allegorical group—Charity trampling on Envy—formerly on the front of the organ gallery, from which the general view was taken. There, in the place it was designed for, it had a very telling effect. It is now fastened on to a lectern in the church of St. Michael, Paternoster Royal, with which parish that of Allhallows has been united.

55. Doorways of Nos. 1 and 2, Laurence Poultney Hill, 1895 (Water-colour).

These very handsome doorways, of a style which was not unusual in the reign of Queen Anne, are situated in so narrow a lane that it was

difficult to get an effective view of them. An important brick mansion, built on this site immediately after the Great Fire, and occupied by one, "Justus Otgher," so named in an indenture, was taken down at the beginning of the eighteenth century, and replaced by the two houses of which these doorways form part. Within one of these shell-shaped canopies is the date of erection, 1703; in the other is a representation of two boys playing at marbles. On July 15th, 1704, the two houses were sold to Thomas Denning, citizen and salter, for £3,190. The Rev. H. B. Wilson,

D. D. and F.S.A., who wrote a history of the parish of St. Laurence Poultney, was residing in 1831 at No. 1 (which still has a handsome staircase), while No. 2 was occupied by Mr. Justin Fitzgerald.

56. Back of the Swan and Horseshoe and of the Admiral Carter Inns, from Montagu Court, 1887 (Black and white).

Montagu Court is situated almost at the junction of Little Britain and Duke-Street. The next turning to the west leads into Bartholomew Close. The wooden building to spectator's right is the back of the Admiral Carter, which faces this latter precinct. About the year 1889 it was modernised. The house took its sign from Admiral Richard Carter, who was killed at the battle of Barfleur, May 19th, 1692. We may suppose that it was built shortly afterwards. The Swan and Horseshoe Inn, with its incongruous double sign, beyond being old and somewhat picturesque, was of no special interest. Of late years it has been rebuilt, and is now absolutely commonplace.

$$(8\frac{1}{2} \times 4\frac{3}{16})$$

D. 48-1896.

57. Old House at the entrance to Bartholomew Close, 1886 (Black and white).

This old wooden house, with its quaint gable and barge-board, was destroyed early in 1887 for the widening of the entrance from Little Britain.

It was occupied by a greengrocer, whose family had lived there for nearly half-a-century.

$$(8\frac{7}{8} \times 6\frac{13}{16})$$

58. The Blakeney's Head Public-house, 35, Bartholomew Close, 1887
(Black and white).

A sign derived from a famous commander, like that mentioned in the note to No. 56, was the Blakeney's Head, 35, Bartholomew Close—a memorial of the man who so bravely defended Minorca against the French in 1756. In the year 1890 the house was untenanted. It remained closed and in a dilapidated condition for some time, but about 1895 was done up and re-christened the Rahere, after the founder of St. Bartholomew's Priory and Hospital. In June, 1900, having changed its name a second time, it was again closed, and was destroyed soon afterwards.

$$(11\frac{1}{4} \times 7\frac{7}{16})$$

D. 49-1896.

59. The Green Man and Still, Cow Cross Street, Clerkenwell, 1886
(Black and white).

This picturesque little ale-house had absolutely no history as far as the writer could discover, but it must have dated from the latter part of the seventeenth century. It was rebuilt about 1889. Stow says:—"On the left-hand side of St. John Street lieth a lane called Cow Cross, of a cross some time standing there, which lane turneth to another lane called Turnmill Street."

D. 51-1896.

60. Chimney-piece in the Baptist's Head Public-house, St. John's Lane, Clerkenwell, 1889 (Black and white).

On the eastern side of St. John's Lane, Clerkenwell, near the old Priory Gate, a stuccoed public-house with the above sign stood until about the year 1895. Though outwardly modern and commonplace, a fragment of it had once formed part of a mansion which, early in the sixteenth century, belonged to Sir Thomas Forster, a judge of the Common Pleas, who died in 1612. The chimney-piece, here portrayed, was in the taproom. It is of fine Reigate stone, the frieze being ornamented with fruit and flowers. In the centre are arms, and on each side a crest, thus heraldically described by Cromwell in his History of Clerkenwell:—"The arms are quarterly; first and fourth argent; a chevron vert between three bugle-horns sable, for the family of Radclyffe with which that of Forster intermarried, the crescent being introduced as the filial distinction of a second house. The Buck at one end was the original crest of the Forsters; the Talbot's head at the other, with the crescent, might be that of this branch of the Radclyffe's." The frieze was supported by pilasters in the same style, and one side of the room had panelling of the linen pattern. This was apparently all that remained of the original house, which, in the days of its splendour, must have covered a good deal of ground, for it had another frontage in St. John Street; it was then ornamented by grotesque carvings, and had bay windows with painted glass. The sign may have been selected out of compliment to Sir Baptist Hicks, afterwards Lord Campden, who built a Sessions-house hard by. In the 18th century the Baptist's Head was doubtless resorted to by some of the literary men who worked for Cave; it also afforded solace to a very different class, as we learn from a print in the "Malefactor's Register," which represents prisoners, on their way to Newgate, halting here for refreshment; the view of the old house is interesting. For further information on the subject of this chimney-piece and of the Forster family, see Archer's "Vestiges of Old London (1851)," where it is also figured. It has now found its way into an upper room of St. John's Gate, which is occupied by the St. John's Ambulance Association.

$$(6\frac{1}{4} \times 8\frac{3}{16})$$

D. 52-1896.

61. Old Bell Inn, Holborn, 1890.

This old galleried inn on the north side of Holborn was of great interest and picturesqueness. The earliest notice of it which has come to the writer's knowledge was on the 14th of March, 1538 (30 Hen. VIII.), when William Barde sold a messuage and garden called the Bell, in the parish of St. Andrew, Holborn, to Richard Hunt, citizen and girdler. Richard Hunt, who died in 1569, gave thirty sacks of charcoal yearly for ever, as a charge on the property, to be distributed on St. Thomas's Day to thirty poor persons of the parish, one half below and the other above Bars: now represented by an annual payment of £2 5s. from the ground landlords to St. Andrew's parish.

On February 20th, 1605, by deed poll, Thomas Hunt, citizen and vintner of London, son and heir of Richard Hunt, releases to John Corder, citizen and vintner, all his right in that messuage "called the Bell with the appurtenances in the parish of St. Andrew, Holborne, in the suburbes of the cittie of London, between the tenement sometime of John Davye on the east, and a tenement heretofore of the Prior and convent of the late dissolved Pryorie or Hospitall of our Ladie without Bishopsgate" (which must have been the Hospital of St. Mary of Bethlehem, sometimes called Bedlam) "on the west; one head thereof extending upon the Kinge's high waye of Holborne, and the other head thereof upon the garden of Elie place." After various changes of ownership the property in 1679-80 passed into the hands of Ralph Gregge, whose family came from Bradley in Cheshire. His grandson, Joseph, finally parted with it, May 3rd, 1725, to Christ's Hospital, for £2,113 15s. In the deed of sale three houses are mentioned, so the various parts were let separately. They are described as "formerly one great mansion-house or inn, commonly known by the name of the Bell or Blue Bell Inn." A very short time, probably two years, before this sale the front of the premises facing Holborn had been rebuilt, a small part to the west being turned into a shop, latterly occupied by a silversmith. The sculptured arms, not as sometimes has been asserted, of the Fowlers of Islington (who had never been connected with the house), but of the

Gregges, then owners, were built into the wall. These arms are now in the Guildhall Museum.

The inn is mentioned by John Taylor (1637) as a place of call for carriers. It eventually became a coaching house of considerable reputation, this part of its business being, about the year 1836, in the hands of Messrs. B. W. and H. Horne, the most famous coach proprietors in London, except William Chaplin. For many years until finally closed, September 25th, 1897, the inn was occupied by the Bunyer family. Architecturally the Bell was interesting, because, with one possible exception, it was the last galleried inn in London on the Middlesex side of the river, though until the advent of railways such houses were common. The galleries were perhaps as old as the reign of Charles II. A still older portion was a cellar immediately to the left of the entrance, which was built of stone with well laid masonry and might have been mediæval. All the rest of the buildings seem to have dated from the earlier part of the eighteenth century. There is a sympathetic reference to the old Bell Inn by William Black in his "Strange Adventures of a Phaeton."

62. Part of Barnard's Inn, Holborn, 1886 (Water-colour).

$$(15\frac{5}{16} \times 12\frac{3}{8})$$

D. 54-1896.

63. The old Hall, Barnard's Inn, 1886 (Water-colour).

Barnard's Inn, on the south side of Holborn, was originally called Mackworth's Inn, from having been the residence of Dr. John Mackworth, Dean of Lincoln in the reign of Henry VI. His successor and the Chapter of Lincoln leased it to Lyonel Barnard, from whom was derived the name by which it has so long been known. As early as the middle of the fifteenth century it was let to legal students, for Stow tells us that anno 1454 there was "a great fray" in Fleet Street between "men of court" and the

inhabitants there, in the course of which the Queen's attorney was killed. For this act the principal governors of Clifford's Inn, Furnival's Inn, and Barnard's Inn, were sent prisoners to Hertford Castle. Barnard's Inn, like its neighbour, Staple Inn, was a place of legal study—an Inn of Chancery attached to Gray's Inn. The establishment was governed by a Principal and various Ancients. A Reader also was appointed from Gray's Inn, and great respect was shown to him. The Principal, accompanied by the Ancients and gentlemen in commons in their gowns, used to meet him on his coming and conduct him into the hall. Barnard's Inn had latterly no more than a nominal connection with Gray's Inn, the houses being let out as chambers, and not occupied by students of the law. In 1854 the Society consisted of a Principal, nine Ancients, and five Companions. The advantage of being a Companion was stated to be "the dining," and the advantage of being an Ancient, "dinner and some little fees." In 1888 the whole was advertised for sale, and early in the nineties it was bought by the Mercers' Company and adapted for the purposes of their school, which was removed thither from College Hill in 1894.

The hall, still in existence, is only 36 feet long by 22 feet in width, and faces the narrow passage by which one enters from Holborn. It certainly dates from the foundation of the building in the fifteenth century, but has been altered and renovated from time to time. A louvre still adorns the roof, designed doubtless for the emission of smoke from a central hearth, but it must have been closed many years ago. There is at each end a projecting fireplace, apparently Tudor, though the stonework has of late been renewed. Their carved wooden overmantels have friezes in style belonging to the sixteenth century, which surmount panelling of the linen pattern. Similar panelling decorates the walls. Although this has been much renewed, portions of it are original. The drawing of the interior (No. 61) shows portraits above the panelling; the full length over the western mantelpiece, representing Chief Justice Holt, is now at the National Portrait Gallery. The heraldic glass in the windows dates mostly from the eighteenth century. The figure seated at a table is clad in one of the cloaks which were worn on

certain occasions by the Ancients. Beyond the hall was a somewhat irregular quadrangle; part of it is represented in the painting No. 62. The quaint gabled houses to the spectator's right, which were close to the yard of the White Horse Inn, disappeared in the year 1893. Those in the centre of the drawing, their fronts abutting on Fetter Lane, remained until quite recently. At No. 2 dwelt Peter Woulfe, F.R.S., known as the last true believer in Alchemy, who here strove at the impossible task of making gold. Sir Humphrey Davy said of him that he used to hang up written prayers and recommendations of his processes to Providence. The chambers were then so filled with furniture and apparatus that it was difficult to reach the fireside. His remedy for illness was a journey to Edinburgh and back by coach, and a cold taken on one of these expeditions brought on inflammation of the lungs, from which he died. Other houses in the quadrangle have been replaced by the new school buildings. There are various references to Barnard's Inn, not quite of a complimentary nature, in "Great Expectations," by Charles Dickens.

D. 71-1896.

64. Old Butchers' Shops, Clare Market, destroyed 1891 (Black and white).

Much property in this neighbourhood was owned by the Earls of Clare of the Holles Family, and John Holles, second Earl, whose mansion was at the end of Clare Court, Drury Lane, founded the market soon after the middle of the seventeenth century. A stone bas-relief of the Holles Arms, surmounted by an earl's coronet with the date 1659, was formerly at the corner of Gilbert passage, and afterwards on the house numbered 8, Clare Street. The butchers of Clare Market were for years flourishing, and here "Orator" Henley erected his "gilt tub" commemorated by Pope, and used to preach on such Scripture texts or subjects as admitted of a burlesque treatment. By degrees the place degenerated, and in 1891 most of the buildings here were cleared away; among others, the old "bulk-shop," in the foreground. It stood at the north-east corner of Holles Street, and adjoining

it on the north were other shops of a similar kind. For some time before their destruction they had been unoccupied. According to Oldys, Nat Lee, the dramatic poet, when one night returning overladen with wine from the Bear and Harrow in Butcher Row, Strand, through Clare Market, to his lodging in Duke (now Sardinia) Street, "fell down on the ground, as some say, according to others on a *bulk*, and was killed or stifled in the snow." He was buried in the parish church of St. Clement Danes, 6th May, 1692.

D. 88-1896.

65. The Cheshire Cheese Tavern, Fleet Street, from Wine Office Court, 1890 (Black and white).

Now that the Cock in Fleet Street has flown over the way to comparatively modern quarters, and Dick's is no more, the Cheshire Cheese, at No. 145, is the most old-fashioned tavern not only in this neighbourhood, but in all London, and the old style is carefully kept up. Contrary to general belief, and to many printed statements, there is no record that the great Samuel Johnson, who so much appreciated the charms of tavern life, ever frequented it, though this is by no means improbable, as he lived hereabout for many years. Indeed, Gough Square, where he compiled his dictionary, is within a minute's walk, and his friend Oliver Goldsmith wrote the Vicar of Wakefield at No. 6, Wine Office Court, close to the spot from which the drawing is taken, at a time when the evening has begun, and "Tavern lights flit on from room to room." At the old Cheshire Cheese the Modern Johnson Club has often met, traditions of Johnson's visits are repeated, and his portrait hangs in a corner of the principal dining room on the ground floor. This room has been depicted by various artists of distinction, among others by Seymour Lucas, R.A., and Dendy Sadler. The panelled walls, the seventeenth century fireplace, the sawdusted floor, and other quaint survivals, combine to make a pretty picture. An illustrated "Book of the Cheese," which has gone through several editions, is, or was, sold at the bar.

66. Hare Court, Temple, 1891 (Black and white).

Passing out of Fleet Street through the Inner Temple Gateway, under the old room acquired some years ago by the London County Council, the first opening on the right leads us into Hare Court, which "Elia" has described with less than his usual sympathy as "a gloomy churchyard-like place, with trees and a pump in it." At this pump he had often drunk when a child, and the contents later in life he recommends as "excellent cold with brandy." The back of Dick's coffee-house is here to be seen, nestling against a fine old block of chambers, and overshadowed on the right by a high modern structure which seems to have got in there by mistake. Dick's, sometimes called Richard's, stood on the site of the printing office of Richard Tottel, law stationer in the reign of Henry VIII.; it got its name, however, from Richard Torner or Turner, who was landlord in 1680. From the days of Steele and Addison many eminent men frequented it. As is well known, coffee-houses for half a century or more had a great influence on the sale of books; every new poem or pamphlet of any importance was to be seen in them. Peter Cunningham records that he had several in his possession bearing in large letters on their title-page "Dick's Coffee-house." This picturesque old place of entertainment, like the Rainbow and other houses of a similar description, was approached from Fleet Street by a long passage. In front it was a wooden structure; the back was really half-timbered, the timbering concealed by plaster; inside the original staircase remained. It disappeared in 1899; the rest of the seventeenth century buildings in Hare Court had been swept away some years previously.

67. Sion College and the City of London School, Victoria Embankment, 1893 (Black and white).

Sion College, near the north end of Blackfriars Bridge, and next on the west to the City of London School, was founded in 1623, as a College and Almshouse, according to the will of Dr. Thomas White, who was Vicar of St. Dunstan's in the West, and held other clerical appointments. A library was added by the munificence of Dr. John Simson, rector of St. Olave's, Hart Street, and an executor of the will. Until of late years, the home of the College was in London Wall, between Aldermanbury on the east and Philip Lane on the west, the former site of Elsing Spittal. The old library was built along the east side of Philip Lane, the hall stood back in the College garden. Mr. W. Niven, in his volume on London City churches, gives a good etching of the picturesque gateway. New Sion College, here shown, was formally opened by their Royal Highnesses the Prince and Princess of Wales, December 15, 1886.

The City of London School was established in Milk Street about the year 1835 for the sons of persons engaged in professional or commercial pursuits, deriving part of its income from property bequeathed for educational purposes by John Carpenter, town-clerk of London in the reign of Henry V. The school had been transferred to its present site on the Victoria Embankment a short time before this drawing was made.

No. 69. THE COCK AND PIE, DRURY LANE.

69. The Cock and Pie, Drury Lane, 1880 (Black and white).

The plastered house which appears to the right of this drawing was for many years known as the Cock and Pie, or Cock and Magpie, public-house,

but was turned to other uses long ago. Apart from its quaintness, it is worthy of record as having been possibly, I might say probably, for a time the residence of Nell Gwynn. Under the date May 1, 1667, Pepys, after saying how on his way to Westminster, he met "many milk-maids with their garlands upon their pails, dancing with a fiddler before them," refers to her in these words:—"Saw pretty Nelly standing at her lodging-door in Drury Lane in her smock sleeves and bodice looking upon me; she seemed a mighty pretty creature." Peter Cunningham, in his "Life of Nell Gwynn," places these lodgings at the top of Maypole Alley, over against the gate of Craven House, a position which exactly corresponds with that of the old Cock and Pie, and a view of this house is used to illustrate his volume. After 1838 the well-known bookseller, George Stockley, for some years occupied the building. He convinced himself of Nell Gwynn's connection with it, and his belief was shared by the late Edward Solly, F.R.S., who wrote an interesting letter on the subject to "Notes and Queries." The building, most likely, dated from the time of Charles I., and appears to be marked on Faithorne's map of 1658. The panelled house next door, which seemed coeval, was of a kind almost extinct. They stood on the south side of Drury Lane, and were both destroyed in the autumn of 1890. Messrs. W. H. Smith & Son's establishment in the Kingsway stands as nearly as may be on the site.

70. House in Nevill's Court, Fetter Lane, 1891 (Water-colour).

On the east side of Fetter Lane, at No. 32, is the chief establishment of the Moravians in London; behind is their chapel, and a little further north is a narrow passage leading to Nevill's Court. Here, on the south side, stands an interesting old house, which belongs to the Moravian Society. As long ago as 1744 it passed into their hands, when it was described as "the great house of Nevill's Alley." It was the home of the Rev. C. J. la Trobe and of Count Reuss; and Charles Joseph la Trobe, first Governor of Victoria, was born here. The earliest account of the Moravian missions was issued from

this house—then as now No. 10—more than a hundred years ago. There is a quiet dignity about the old place, which bears the stamp of having seen better days. This site was for some years to let on building lease, but at the time of writing the house was no longer threatened. Further east, on the opposite side of the way, were one or two buildings of still earlier date. These houses just escaped the Great Fire; they were destroyed in the winter of 1911-12.

$$(13\frac{1}{8} \times 10\frac{3}{8})$$

D. 73-1896.

71. New Exchange Court, Strand, 1891 (Black and white).

On the north side of the Strand, between Nos. 418 and 419, is New Exchange Court, now occupied by that excellent body, the Corps of Commissioners, who have their headquarters here. Of late years all the old buildings represented in this drawing have been swept away. In 1891 they formed an admirable background for the figures of the veterans who made it their home. The picturesque house behind the projecting lamp on the left of this drawing was known until about 1886 as the Thatched House Tavern. Earlier in the century it was called Nell Gwynn's Dairy, and her name had also been connected with a panelled room (now also destroyed) in a house near Maiden Lane, with which the court communicates. It is, however, almost certain that Nell Gwynn never resided here; like Cromwell, if we believe the popular legends she must have been ubiquitous.

$$(9\frac{3}{8} \times 6\frac{1}{2})$$

D. 59-1896.

72. The Nag's Head Inn, Whitcombe Street, 1889 (Black and white).

This drawing represents an old galleried inn on the east side of Whitcomb Street, once Hedge Lane, which, as its former name implies, was not always hemmed in by bricks and mortar. It appears from a manuscript note-book, formerly in the possession of the late Mr. F. Locker-Lampson, that Hogarth in his later years, when he set up a coach and horses, kept

them at the Nag's Head. He was then living on the east side of Leicester Square. On an old drawing of the Nag's Head, which belongs to the writer, it is stated that "this inn did the posting exclusively for the Royal family from George I. to William IV." It was latterly used as a livery stable, and, the lease having come to an end, was closed in 1890. The space remained vacant for many years, and is now covered by the fine publishing offices of Messrs. Macmillan & Co.

$$(7\frac{5}{8} \times 12\frac{3}{4})$$

D. 80-1896.

74. Old Men's Garden, Emanuel Hospital, Westminster, 1891 (Sepia).

Emanuel Hospital (sometimes called Dacre's almshouses), on the west side of James Street, Westminster, was founded pursuant to the will, dated December 20th, 1594, of Anne, Lady Dacre, widow of Gregory, last Lord Dacre of the South, and sister of Thomas Sackville, Earl of Dorset, the poet, "towards the relief of aged people and bringing up of children in virtue and good and laudable acts in the same hospital." On the death in 1623 of the last surviving executor of Lady Dacre, the guardianship of the hospital descended, by the Charter of Incorporation, to the Lord Mayor and Aldermen of the City of London. The hospital was rebuilt, as it appears in the drawings, during the reign of Queen Anne, and afforded protection to a varying number of old men and women (formerly twenty-four) belonging to Westminster, Chelsea, or Hayes in Middlesex; the schools had been disconnected with it, and formed a portion of the Westminster United School, since 1873. In spite of much opposition from those who loved the picturesque old group of buildings, Emanuel Hospital was closed in 1892. The site was afterwards sold for £37,500, a new scheme being drawn up for the regulation of the charity. The drawing numbered 73 gives a general view of the buildings. In the centre, surmounted by a little clock turret and showing a pediment with the Dacre arms, is the chapel from which people are issuing, the front figure with staff and gown being that of an almsman who officiated as beadle. The master lived close to the chapel, and the old men in the tenements on the left side, their garden, shown in No. 74, being at the back. The entrance, facing James Street, had handsome wrought-iron gates. In the old church at Chelsea there is a stately monument with recumbent figures to Lord and Lady Dacre.

D. 81-1896.

76. Chief Reception Room, No. 10, Downing Street, 1888 (Sepia).

One of the most historic mansions in London is No. 10, Downing Street, facing the Foreign Office, which has been the official home of the first Lord of the Treasury ever since Sir Robert Walpole moved into it from St. James's Square in 1735. It had belonged to the Crown, and had been granted by George I. to Baron Bothmar, the Hanoverian minister, for life. The residence really consists of two houses, with a covered way between them. That which faces the street is a plain Georgian structure, resembling No. 11, which forms part of the same block. The building at the back seems little to accord with its surrounding. It stands in a garden, much frequented by woodpigeons, which once, no doubt, formed part of St. James's Park. On a misty morning in spring one might imagine it to be on the outskirts of some peaceful country town. The view shows the south side, the part towards Downing Street being discernible behind a tree on the right: the building to the left is the Treasury. The artist has ventured to clothe his little figures in costumes which harmonise more with the old place than the frock coats and trousers of the present day. The windows opening on to the terrace belong to the famous old cabinet room, where Pitt and Sir Robert Peel, Disraeli and Palmerston, have often sat. In the large reception room on the first floor which forms the subject of drawing No. 76, are a series of interesting portraits, the best, perhaps, being that of Richard Weston, Earl of Portland, Lord High Treasurer in 1633. The portly form of Sir Robert Walpole is in the place of honour, empanelled above a fine marble mantelpiece. It was in the ante-room, on the first floor of No. 10, Downing Street, that on January 12th, 1887, the Earl of Iddesleigh, better known as Sir Stafford Northcote, breathed his last. This house, although it has undergone various changes, was originally designed by Sir Christopher Wren, as is proved in the London Topographical Society's Record, vol. 2, pp. 23-26 (1903).

77. Schomberg House, Pall Mall, 1894 (Black and white).

Schomberg House, Nos. 81 and 82, on the south side of Pall Mall, is an interesting specimen of a nobleman's mansion in the late seventeenth century, though its symmetry has been spoiled by the destruction of the east wing, about the year 1850. Timbs thought that it dated from the time of the Commonwealth; it is, however, generally supposed to have been begun for the famous Duke of Schomberg, the favourite of William III., who was killed at the Battle of the Boyne in 1690, and not to have been finished until some years after his death. His second son, Meinardt, the third Duke, died in 1719, when the title became extinct. The house then came into the hands of Meinardt's daughter, Frederica, who married first the Earl of Holderness, and afterwards Benjamin Mildmay, created Earl of Fitzwalter in 1730. Thirty years later, on the accession of George III., the Duke of Cumberland, victor at Culloden, came here as tenant, from St. James's Palace, but he did not remain long; the Earl of Holderness soon afterwards selling the mansion for £5,000 to "Beau" Astley, the portrait painter, who had married Lady Daniell, a wealthy widow. Astley spent a large sum in converting it into three dwellings, and fitting up the central part fantastically for his own use. It was probably he who set up the bas-relief of "Painting" over the doorway, which still remains. He was succeeded by Nathaniel Hone, R.A., now chiefly remembered by his picture called "The Conjuror." In 1781 this central portion was let to Dr. Graham, the notorious quack, who exhibited here his "Temple of Hymen" and "Celestial Bed," and here "the blooming Priestess of the Temple endeavoured to" "entertain ladies and gentlemen of candour and good nature" by reading a lecture on the means of preserving "health, beauty, and serene mental brilliancy even to the extremest old age." Soon, however, the farce was played out, and in 1786 Graham was succeeded by Richard Cosway, the miniature painter, and his handsome wife. They lived here for some years, and society flocked to their parties, which were not unfrequently attended by the Prince of Wales, who had access to them through a private door from the garden of Carlton House. The western wing of Schomberg House was from 1774 occupied by that great artist, Thomas Gainsborough, and here he died in 1788. Reynolds had visited him, at his request, a few days before, when he used the often-

quoted words: "We are all going to Heaven and Vandyck is of the party." And here in the following spring his widow held an exhibition of his works still remaining on her hands. In the course of last century Messrs. Dyde and Scribe converted the east wing into a place of business. They were succeeded by Mr. Harding, in whose time George III. and the Princesses used to visit the shop and make their own purchases. Other well-known people have been connected with Schomberg House. Robert Bowyer, miniature-painter to Queen Charlotte, here collected a large number of engravings and paintings to illustrate the history of England, which he called the Historic Gallery. It proved unsuccessful, and he applied for help to Parliament, which passed an Act empowering him to dispose of it by lottery; this he did in 1807. The bookseller, "Honest Tom Payne," moved in 1806 to Schomberg House from his old shop at the Mews Gate, where the National Gallery now stands. Messrs. Payne and Foss succeeded him, who brought together a matchless collection of old books, and stayed here until their retirement from business. It had been said (Smith's Nollekens, Vol. II., p. 398) that Jervais, the portrait painter, eulogised by Pope, was also for a time a tenant. Schomberg House, or what remains of it, has for many years been incorporated in the War Office.

D. 63-1896.

78. Back of Devonshire House, Piccadilly, from the Garden, 1893 (Black and white).

Devonshire House stands on the site of Berkeley House, built in 1665 for Sir John Berkeley (created Lord Berkeley of Stratton), which in its turn was on the site of Hay Hill Farm. The property at first included the site of Lansdowne House and Garden and Berkeley Square. Lord Berkeley died in 1678, and in 1684 two new streets (Berkeley Street and Stratton Street) were built on a portion of the grounds by his widow. In 1695 the Princess Anne, who was then on bad terms with her brother-in-law, William III., lived here with her husband till the death of her sister, Queen Mary, in the same year. William, first Duke of Devonshire, bought the house in 1697,

and the first and second Dukes both died here. The original mansion was destroyed by fire in 1733, and the present one—rather a dull piece of architecture—was built from William Kent's design in 1735, at a cost of £20,000. It has since been considerably altered. In 1874, as we are told by Sir N. W. Wraxall, the great rallying points of the coalition against Pitt were Carlton House, Burlington House, and Devonshire House, where Georgiana, the charming Duchess of Devonshire, reigned over her brilliant court. In the ball-room here was acted before the Queen and Prince Albert, on May 16th, 1851, for the benefit of the Guild of Literature and Art, Lord Lytton's play, "Not so bad as we seem." Among the actors were Charles Dickens, Wilkie Collins, Augustus Egg, Frank Stone, R. Horne (the author of "Orion"), Mark Lemon, and John Tenniel. The fine wrought-iron gate in front of the house, facing Piccadilly, which was placed there in Queen Victoria's Jubilee year (1897) had stood since 1837 at the entrance to the grounds of Chiswick House, having been brought originally from Heathfield House, Turnham Green, once the residence of Lord Heathfield, who, as General Elliot, so bravely defended Gibraltar. Devonshire House is one of the few London mansions still possessing a large garden, which is adorned by copies of antique statues.

$$(10\frac{7}{8} \times 15\frac{1}{16})$$

D. 64-1896.

79. Lansdowne House, from Berkeley Square, 1893 (Black and white).

Dividing the gardens of Devonshire House and Lansdowne House is Lansdowne Passage, a short cut for walkers from Curzon Street to Hay Hill. Thomas Grenville records that the iron bars at the two ends were put up late in the 18th century, because a mounted highwayman who had committed a robbery in Piccadilly escaped through this passage by riding down and up the steps. Lansdowne House, like that last described, is interesting from its connection with historic personages, as a specimen of the dwelling of a great nobleman in the 18th century, and from its having a considerable garden. It was designed by Robert Adam (the most famous of the brothers who built the Adelphi) about the year 1765, for Lord Bute, then Prime

Minister, whose treaty of peace with France raised such a fury of opposition that his enemies did not hesitate to say that he had been bribed. On his fall from power it passed, as yet unfinished, into the hands of Lord Shelburne, afterwards the first Marquis of Lansdowne, to whose descendant it still belongs. Embowered in foliage it certainly has a picturesque effect from the adjoining Berkeley Square.

$$(7\frac{5}{8} \times 10\frac{3}{8})$$

D. 65-1896.

80. Library of Chesterfield House, South Audley Street, 1893 (Black and white).

Whatever may have been their defects, the noblemen's mansions built in the eighteenth century were mostly distinguished by fine staircases and reception rooms. A notable specimen is Chesterfield House, which was planned by Ware, an architect of no mean merit, for Philip, fourth Earl of Chesterfield, who wrote the famous *Letters to his Son*. Here Samuel Johnson is popularly supposed to have "waited in the outer rooms" and been "repulsed from the door;" but this must have occurred not later than 1747, as is clear from Johnson's own words, and the Earl did not take possession of his new home in South Audley Street till March 13th, 1749. The ground attached to it has been sadly curtailed since he wrote to a friend "My garden is now turfed, planted, and sown, and will in two months make a scene of verdure and flowers not common in London." Inside, however, there has been comparatively little change. The marble staircase, with its pillars, has a very stately effect; it was brought from Canons, near Edgware, the letters on the wrought iron balustrade being the initials of the "princely" Chandos, whose ducal coronets were removed by Lord Chesterfield and replaced by his own. On the ground floor at the back there is a splendid suite of rooms, including the library, which is represented in drawing No. 80. Its first owner called it with pardonable pride "the best room in England," and here are still to be seen under the cornice, in capital letters a foot high, the Horatian lines:

"Nunc veterum libris, nunc somno et inertibus horis,
Ducere sollicitæ jucunda oblivia vitæ";

an indication of the life he proposed to lead amidst his books and pictures. The portraits in framed panels, which decorate the walls, are a most interesting series, representing, as they do, eminent people painted by some of the finest artists of the eighteenth and nineteenth centuries. Scattered throughout the mansion there are many other superb portraits by Reynolds, Gainsborough, and Romney, which were collected by the late owner, Lord Burton, and are here appropriately housed.

$$(18 \times 22\frac{1}{4})$$

D. 66-1896.

81. Bourdon House, Davies Street, 1893 (Black and white).

North of Berkeley Square begins the estate of the Duke of Westminster in this part of London, brought to the Grosvenor family by Miss Mary Davies, who married Sir Thomas Grosvenor in 1676. And here, on the east side of Davies Street, named after her, stands Bourdon House, a pleasant old dwelling, over-shadowed by the trees which grow in its little courtyard. Inside, the most noteworthy feature is the carved woodwork, which seems to be French in style, dating, perhaps, from the early part of the eighteenth century. There is a strong tradition that this house was originally occupied by the Davies family; it is certainly one of the oldest on the estate. The name Bourdon first appears on the parish rate books in 1739. Within the last few years the house has been enlarged.

D. 67-1896.

82. Scarsdale House, Kensington, 1892 (2 Water-colours).

Scarsdale House stands—perhaps one should now say stood—a little back, at the north-east corner of Wright's Lane, within a stone's throw of the Kensington High Street railway station. Of its early history little is known,

but the main part of the building must have been at least coeval with Kensington Square; that is, it must have existed for more than 200 years. It is stated by one of his descendants that this property first belonged to John Curzon, who is perhaps best remembered in the family as having owned a horse of Eastern blood, one of the progenitors of the modern racehorse. For a short time Lord Barnard occupied the house; in 1721 William Curzon was living here, and was one of the largest contributors to the parish poor-rate. Early in the nineteenth century it was a ladies' boarding school, but many years ago it became the residence of the Hon. Edward Curzon (second son of Mr. Robert Curzon and Lady de la Zouche), who bought it from his cousin, Lord Scarsdale. The pair of Jacobean mantelpieces in the drawing-room once graced a wing, now destroyed, of the historic mansion of Loseley. The old house in Wright's Lane, with its delightful garden, is immortalized in Miss Thackeray's novel, "Old Kensington." This was Lady Sarah's home, "with its many windows dazzling, as the sun travelled across the old-fashioned housetops," and here was the room with the blue tiles which Lady Sarah's husband brought from the Hague the year before he died. The garden is now partly a coalyard, and part is absorbed by the widening of the roads. The house, wholly transformed and dismantled, is converted into an annexe of a draper's establishment in High Street, Kensington.

83. Turner's House, Cheyne Walk, Chelsea, 1880 (Water-colour).

On the river front beyond Lindsey House, no great distance from the site of Cremorne Gardens and next but one to a tavern called the Aquatic Stores, stands a small cottage, one of a pair now joined together and numbered 118, Cheyne Walk, to which in his old age J. M. W. Turner, the great artist, used to retire from his house in Queen Anne Street. He must have loved the Thames, for he had previously resided first at West End, Upper Mall, Hammersmith, and afterwards, from time to time, at Sandycombe Lodge, Twickenham. He, no doubt, selected the humble

dwelling at Chelsea chiefly because, from its low roof, still protected by a wrought-iron railing which he caused to be placed there, he could get a fine view of Chelsea reach, now obscured by the modern house next door, which projects in front. For the sake of privacy he took the name of the landlady, and was known in the neighbourhood as Mr. Booth, Admiral Booth, or "Puggy" Booth. The cottage is now somewhat below the level of the roadway; an old inhabitant, formerly a waterman, told the writer that in his youth it was only separated from the Thames by a raised path. Turner died here December 19th, 1851, in a room the window of which may be seen immediately below the railing or balcony whence he is believed to have studied the view. Afterwards, for many years, the place remained outwardly in much the same condition as when he left it. By degrees it became dilapidated, the little trees in front disappeared, and in 1895 there was an ominous announcement that the property was to be sold for building purposes. The late Mrs. Haweis made efforts to save it; and there was a correspondence on the subject in the "Times." After remaining empty and dilapidated during many months, the pair of cottages were bought and judiciously restored by one who valued the memory of our illustrious landscape painter. A large studio was then built at the back, where there were formerly other tenements.

D. 83-1896.

84. Old Fish Shop, Cheyne Walk, Chelsea, 1887 (Water-colour).

This quaint little house, one of the oldest in the parish, stood in what used to be known as Lombard Street, but now forms part of Cheyne Walk. It was four doors west of a tavern called the Rising Sun, and in old days had been a freehold, with the right of pasturage on Chelsea Common. In front of the gable was a plaster or terra cotta medallion, with a head in relief which might have been copied from a classical coin. This, though a humble specimen of its class, belonged to a style of decoration common in the seventeenth century. The writer has before him a view, dated 1792, of a building then on Tower Hill, with similar medallions. Sometimes the heads

of Roman Emperors were thus placed, sometimes the Cardinal virtues and other emblematic figures. The fish shop in Cheyne Walk, long kept by Mrs. Elizabeth Maunder, was pulled down in November, 1892. Mr. Percy Thomas etched it, and there is a famous lithograph of the lower part, by Whistler, who for years lived hard by. The medallion is now in the Chelsea Free Library. After the destruction of the old fish shop Mr. C. R. Ashbee built a house on this and the adjoining site, numbered 72 to 74, Cheyne Walk, and in that house Whistler died, July 17, 1903.

D. 69-1896.

85. Old Thatched Cottage, near Paddington Green, 1895. (Water-colour).

This was considered to be the last thatched cottage in London, though at the time of writing one in Camberwell still survives. It stood on the west side of the old burial ground of St. Mary's Church (now a public garden), and behind No. 12, St. Mary's Terrace, Paddington Green, and in 1895 was occupied by Welsh-speaking people connected with a temporary Welsh chapel which stood hard by. The walls of this cottage were composed of pebbles and broken flint plastered over, and its rural look was enhanced by the surrounding ground with trees growing thereon. The date of its erection was not known. In the "Bayswater Annual" for 1885 there was a statement that in 1820 the cottage belonged to a Mr. Chambers, "a banker of Bond Street." In those days the occupants commanded an uninterrupted view of the Harrow Road as it turned northward. Claremont House, within a short distance of Chambers's Cottage, was remarkable for the "Claremont Caverns" about which many uncanny tales were told. They were the work of a Mr. Southgate Stevens who here carried on in secret processes for extracting gold from quartz and other minerals. He was said to have spent some £30,000 in this fruitless quest. A drawing and short account of Chambers's Cottage will be found in the "Builder" for May 18th and June 8th, 1895; it was demolished a year or two afterwards, to make room for St. David's Welsh Church.

*** END OF THE PROJECT GUTENBERG EBOOK DRAWINGS OF
OLD LONDON ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the

collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with

this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official

version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, “Information about donations to the Project Gutenberg Literary Archive Foundation.”
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.

- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES

EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a)

distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact

links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
